

Infinite 541

Chapter 541: Change the Future? A Desperate Fate!_2

Now that the cost is clear, Su Yu rather at ease.

After understanding the cost, the next question is: In Su Yu's current state, how many times can he use this ability?

Almost as soon as this question emerged in his mind, the answer was already there: "Seven times!"

This was Su Yu using the ability of foreseeing the future to see the answer in advance.

In his current state, he can only support foreseeing the future seven times.

If he exceeds seven times, he will no longer be able to maintain his sanity, completely turning into a quantum madman.

Actually, the real limit should be nine times.

But Su Yu had already used it on the demon twice, so only seven times remain.

"Only seven times?"

Su Yu frowned slightly, this number seemed a bit too few.

This limitation is quite large, it can't be used casually.

Moreover...

"Isn't this wrong?"

Su Yu also discovered another problem.

Earlier, when interpreting the memory of the demon, the number of times he saw the answer in advance was far more than ten times.

With his computational speed at the time, it was more than billions of times.

"It seems that internal thinking does not consume the number of times, only observing the outside world consumes the number of times?"

Su Yu mused to himself.

This is good news.

Internal thinking does not consume the number of times, so he can maintain a high computation state.

Just like now, Su Yu considered a bunch of problems, but in fact, a millionth of a second hasn't passed.

This high computation, though not foreseeing the future, is almost equivalent to "time stands still."

Because Su Yu's thinking speed is so fast, everything outside seems almost stationary to him.

In this stationary spacetime, he can fully ponder combat strategies.

"Now, the duration, cost, and number of limitations for foreseeing the future are all understood."

"Next, it's the last question!"

"That is, can the foreseen future be changed?"

Su Yu mused to himself.

This question is extremely crucial.

Because if the future cannot be changed, this ability is almost useless.

If the future cannot be changed, then even if he sees his own death in advance, he can only wait helplessly for death to come.

If that's the case, having this ability is less than not having it.

So, Su Yu must find out the answer to this question!

And to find out, it's simple.

That is to wait, do nothing.

Previously, in the future that Su Yu saw, he consciously descended on the duplicate and was discovered by the demon.

Now, Su Yu only needs to do nothing and not consciously descend on the duplicate.

Then everything he saw before will not happen.

That is equivalent to the foreseen future being changed!

Su Yu closely watched the demon approaching the duplicate, waiting for the answer to arrive.

He did not use the ability to foresee the future to see the answer in advance.

Because he felt that this question touched on the nature of time and destiny, estimating that even foreseeing the future could not see the answer in advance.

Besides, just waiting 0.01 seconds will reveal the answer, why waste a foresight?

In Su Yu's wait, a microsecond, which is a millionth of a second, passed.

In the next moment, Su Yu suddenly felt an overwhelmingly strong pull coming from the duplicate.

His consciousness involuntarily was sucked into the duplicate.

Once his consciousness entered the duplicate, a large amount of the demon's memory surged in!

But Su Yu ignored these memories and instead mobilized the powerful energy within the duplicate, ready to charge.

At the same time, the demon approaching the duplicate suddenly retreated and said:

"Haha Su Yu! I knew you wouldn't..."

All of this happened in a flash.

But for Su Yu, who possesses quantum computation, it was slow as if still.

Su Yu felt all this, and his heart grew heavier and heavier.

The most terrible situation has occurred!

Just now, his consciousness descended into the duplicate, then mobilized the duplicate's energy to charge, and then the demon realized something was wrong and retreated sharply...

All this was not Su Yu's intention.

Instead, it all happened on its own under an unknown and powerful force!

Su Yu never intended to let his mind descend into the duplicate, but did so involuntarily!

At this moment, he was like a puppet on strings, trying his best to resist, but to no avail.

The unknown force was simply too strong!

That is the power of time, the power of destiny!

Although Su Yu is strong, compared to this supreme power that controls everything between heaven and earth, the stars in the universe, he is infinitely small, how could he resist?

So, the answer is quite obvious!

The future Su Yu sees through quantum computing cannot be changed!

Whatever is seen, the future will inevitably play out as such.

"Could it be that the future is truly predestined and unchangeable?"

At this moment, Su Yu was extremely unwilling at heart.

If the future cannot be changed, doesn't that mean everything is preordained?

What meaning does his fight hold until now?

"Impossible! Find another way!"

Su Yu refused to accept this reality!

At this moment, only half of the 0.01-second future he saw had passed.

The demon's words were only half-spoken.

Su Yu still had half the time to think of a way.

Su Yu was determined to find a way to change the future in the remaining 5 milliseconds!

But now he couldn't move, could only watch the "plot" play out as the predetermined fate, what other way could there be?

No!

Su Yu's thinking was still somewhat free at present.

Aside from not being able to leave the duplicate, his thinking hadn't been restricted!

He could still do one important thing!

"Consume one foresight and see the future again!"

Su Yu made up his mind and directly consumed another foresight to watch the future again.

At this moment, this was the only thing he could do!

Although he had already seen the future unfolding now, watching again would be a waste of foresight.

But waste it if needed, if the future cannot be changed, having infinite foresights is meaningless, right?

Watching again, maybe there will be changes?

As Su Yu focused, the ability to foresee the future was activated once more!

"...I knew you wouldn't be so easy to die!"

"What, thinking of playing dead to lure me over? Do you really think I'm that dumb?"

No changes appeared in the foreseen future.

The demon finished speaking the remaining half of the sentence.

Attempt failed!

Six foresights left!

"Watch again!"

Su Yu unhesitatingly activated the ability again.

"...I knew you wouldn't be so easy to die!"

"What, thinking of playing dead to lure me over? Do you really think I'm that dumb?"

Still no changes!

Five foresights left!

"Watch again!"

Su Yu resolutely activated the ability again.

"...I knew you wouldn't be so easy to die..."

"Watch again!"

"Watch again!"

"Watch again!"

Su Yu consumed his foresights down to the last one in one breath.

At this moment, his mind was extremely unstable!

Self-observation could hardly maintain its probability cloud.

Su Yu felt his thoughts jumping incessantly.

In a daze, it seemed like he returned to a long time ago, before he had traveled, still in middle school.

In the classroom as the teacher lectured, his mind wandered far, thinking of online games at one time, wondering what to choose in the cafeteria today another...

And now, Su Yu was in such a distracted state.

And tens of thousands, even a hundred million times more severe than just being distracted.

In a millionth of a second, almost an infinite amount of chaotic information flashed through Su Yu's thoughts!

His personality seemed to have split into millions, even billions of fragments, each with its own ideas, all in a mess!

And they were still splitting nonstop!

"To reminisce such a distant past, it must be quite serious indeed..."

One of Su Yu's personalities suddenly let out a bitter laugh.

Although his mind was split, he could barely maintain his sanity with his powerful computation.

After all, he still had one foresight left unused.

His mind had not yet completely quantumized! He hadn't turned completely into a quantum madman!

Realizing this, Su Yu resolutely thought to himself once more:

"Watch again!"

Su Yu seemed truly insane! He even wanted to use his last foresight!

No!

Actually, he wasn't insane, because he finally saw a glimmer of hope to break the impasse!

Chapter 542: Su Yu Beyond Time

At this moment, Su Yu's thinking is extremely quantumized, his spirit fragmented into billions of pieces, thoughts leaping, extremely chaotic and mad.

However, it also pushed his Quantum Computing Ability to the extreme!

He now has billions of personalities, each possessing the full computational power in normal conditions.

In other words, his computational power is now billions of times that of his normal state!

However, due to extreme madness and chaos, he cannot properly utilize this immense computational power.

Most of the computational power is wasted on thinking about meaningless things.

Fortunately, Su Yu still has a part of his personality barely maintaining rationality, able to use computational power for normal thinking.

Although it's only a small fraction of rationality, when they combine their computational power, it's still extremely impressive.

Utilizing this massive computational power, Su Yu finally calculated a possibility to break the situation.

This is not foreseeing the future, but using pure computational power to analyze and deduce the only possible scenario.

That possibility is:

In the original future, Su Yu's state was normal, and he did not die.

So as long as Su Yu dies before the future arrives!

Wouldn't that change destiny?

This idea is truly madness at its peak, purely a suicide!

Moreover, in normal circumstances, Su Yu, locked by the Power of Destiny to "act out a fixed script," doesn't even have the freedom to die.

He can't even commit suicide now.

But if Su Yu uses up his last chance to foresee the future, he will no longer be able to maintain the stability of his state!

Not just his spirit, even his quantum body and Quantum Spiritual would immediately become a chaotic Quantum Probability Cloud.

Never able to find himself again.

That would be no different from dying!

Therefore, Su Yu plans to use this move to fight against Time and destiny!

Because the backlash from foreseeing the future also belongs to the power of Time.

Su Yu intends to see whether the backlash of Time is stronger or destiny is stronger?

This method is genuinely something only a madman can think of, and only a madman would attempt.

Under normal circumstances, Su Yu would never have such a thought.

After all, what if the power of backlash is entirely unable to overcome destiny?

Even if it does, if Su Yu is dead, what's the point?

But now, Su Yu is already ninety-nine percent mad, so he doesn't care about anything.

Gamble it!

Anyway, if destiny really can't be changed.

Then that means Su Yu's death is also destined, so why worry? Just do it!

Therefore, in the next moment, Su Yu used up his last chance to foresee the future!

"...I knew you weren't so easy to kill!"

"What, trying to play dead to lure me in? Really think I'm that foolish?"

The uncomfortable voice of the vengeful demon resounded once again, no different from before.

The difference was in Su Yu himself.

At this moment, although Su Yu activated foreseeing the future and saw the future scenes.

He had already lost the ability to understand these scenes.

He is now thoroughly mad from the backlash of excessive use of foreseeing the future!

His mind has become completely quantumized, transformed into an abstract Probability Cloud.

With the complete quantumization of his mind, his body and energy also began quantumized transformation.

Su Yu's body suddenly turned blurry, like a cloud of mist, about to diffuse and dissolve into the air!

Once fully dispersed, it could never be reassembled!

By then, the world would no longer have Su Yu!

At this moment, a mysterious force appeared out of nowhere.

This force forcibly recombined the Quantum Probability Cloud that was Su Yu!

It's the great power of Time and destiny!

In the original destiny, Su Yu's state was normal.

And destiny cannot be changed!

So now, Su Yu's state must also be normal!

This force aims to maintain the normal trajectory of destiny, keeping Su Yu's state normal!

However, the backlash from foreseeing the future is also a strong force!

Therefore, just as Su Yu's body was recomposed, it showed signs of bursting open again under the force of backlash!

The two forces immediately came to a stalemate!

...

So, is Su Yu dead or not? Mad or not?

Even Su Yu himself doesn't know.

He only knows that after using the last chance to foresee the future, his entire thought exploded, splitting into an endless number of personalities, incredibly chaotic, with no reason left.

However, in this endless madness, Su Yu occasionally can think normally! Can sustain self-recognition!

"Why is this?"

A question arose in Su Yu's mind.

"It's said that if you give a monkey a typewriter and let it type randomly. Given endless time, the monkey would certainly type out a masterpiece like Shakespeare, such is the wonder of probability."

"Now, all my thoughts have turned into a chaotic Probability Cloud. Any idea is completely random! Incredibly chaotic."

"In this endless randomness and chaos, my normal thinking is like the Shakespeare typed by a monkey, though the probability is very small, it's not impossible!"

"Because thoughts are so chaotic, chaotic to the extreme, it actually forces the occurrence of extremely low probability events, leading to normal thinking!"

The answer immediately appeared in Su Yu's heart.

Thinking so chaotic to the extreme will indeed, due to probability, occasionally lead to normal thinking.

"Truly marvelous..."

Su Yu couldn't help but sigh.

In fact, his current state is also within his calculations.

Chapter 543: Su Yu Beyond Time_2

However, beforehand, Su Yu merely had a vague suspicion, which has now finally been confirmed.

Moreover, the current state is unstable, relying entirely on probability and luck.

Perhaps in the next moment, this state might be disrupted, and who knows when it will appear again.

Realizing this, Su Yu stopped fretting over his own state and attempted to observe the external world.

He was very curious about what he would see in the external world in his current state.

What would happen if he activated the ability to foresee the future in this state?

When Su Yu focused his thoughts externally, he was astonished to discover...

"This is..."

Su Yu saw a line!

It wasn't a line segment in the ordinary sense, but a sort of abstract concept.

A line composed of infinite images, sounds, information, matter, time, space... and so on.

On this line, Su Yu saw himself, the Evil God's nemesis, the Mechanical City, the Ruins Star, even a Brutal Evil God...

Everything and anything was part of this line.

"Is this the legendary timeline?"

Su Yu immediately understood what this line was—it was the so-called timeline.

Everything in the world exists within it.

Perhaps, if another creature were here, they might see it as a river or a painting.

Time itself is formless; it's Su Yu who comprehended it in the shape of a line.

This line continuously extends in the direction representing the future, while the opposite direction represents the past.

Now, however, Su Yu discovered that he wasn't on the line; rather, he was ahead of it!

The line was extending towards Su Yu.

Fleeting scenes flashed around Su Yu, and as the line approached, these scenes rapidly became reality!

"So, I'm in the future?"

"My Probability Cloud has spread to the future!"

"Is this the essence of the ability to foresee the future?"

Su Yu seemed to somewhat understand.

The spread of the Quantum Probability Cloud occurs not only in space but also in time.

The Quantum Probability Cloud can spread to the future!

When Su Yu activates the ability to foresee the future, a part of him spreads the Quantum Probability Cloud into the future timeline.

This is how he sees the future in advance.

This ability consumes the Probability Cloud more and more in the future's timeline, and these clouds cannot be retrieved, naturally driving one insane.

And now, Su Yu is completely mad; nearly all his Probability Cloud has reached the future's timeline, thus witnessing the entire truth.

"Now that most of my Probability Cloud is in the future, could I use Self Observation to consolidate myself again?"

A possibility occurred to Su Yu's mind.

Previously, he fell into chaotic madness because the Probability Cloud was split between the past and the future, unable to unite.

Now, it seems there is no such problem.

He quickly, based on previous experience, activated Self Observation.

Then he found it was useless.

He attempted Self Observation, but the revealed scene was not himself, but the timeline.

The moment he thought of the timeline, the vast information impacted his thoughts tremendously.

Self Observation instantly collapsed.

Then, Su Yu's thoughts also collapsed along with it.

"Is this the essence of backlash?"

While Su Yu's thoughts were collapsing, they returned to normal again, he mused internally.

The Quantum Cloud spreading into the future and seeing the timeline, the infinite vast information diluted the self, making Self Observation impossible.

Fortunately, there was still probability and luck to maintain his thoughts!

Outside the timeline, a moment is eternity, the probability of time, or rather, time is infinite.

In this state, probability and luck are not so unreliable; even the smallest probability event will undoubtedly occur.

So Su Yu's thoughts stabilized the moment they collapsed.

This was an unexpected surprise.

"So, from now on, am I not a being living outside the timeline? Invincible!"

Upon realizing that his thoughts could remain stable, Su Yu was extremely excited.

In his current state, he seemed to have transcended time and destiny, living outside the timeline, overlooking everything.

Doesn't this make him invincible? Almost like a true deity!

Although he used to be an Evil God, worshipped by many believers,

Su Yu actually did not care much; in his heart, so-called Evil Gods were just powerful Transcendents with peculiar abilities.

But now, standing outside the timeline, Su Yu felt somewhat like a deity.

Though Su Yu currently still had just a trace of thought.

This bizarre place had no material or energy; only abstract thoughts and the more abstract timeline could exist.

Perhaps only the Quantum Cloud of thoughts could spread in time; matter and energy could not.

"But, can I truly be invincible like this? Something feels off..."

After the excitement, Su Yu felt something was wrong.

Had he truly become a god so easily?

He quickly figured out what was wrong!

That was...the timeline was charging towards him.

That abstract timeline, like a speeding train, came crashing with an unstoppable momentum.

And compared to this timeline "train," Su Yu was like an ant.

Seeing the charging timeline, a scene flashed in Su Yu's mind of himself being crushed into fragments by a train.

Could this timeline even have offensive traits?

This was probably the so-called "history's wheels rolling forward, crushing all obstacles," right?

Su Yu internally mocked and quickly attempted to evade.

But where to hide?

The timeline is everything!

Outside the timeline, there's nothing, not even space, only some illusory scenes.

These scenes only become real when the timeline arrives.

So Su Yu had nowhere to hide, he could only watch helplessly as the timeline charged over, without any room to evade.

"Is this the essence of the Power of Destiny? The future cannot be changed..."

Su Yu came to an understanding.

Earlier, when he attempted to change the future, the force that stopped him was the impact of the timeline.

This force was so formidable that back then Su Yu had no power to resist it and could only let the timeline roll over.

Although Su Yu was in no real danger back then, he was deeply despairing.

Destiny being unchangeable is the greatest despair!

That's why Su Yu made such a shocking decision, using the backlash from foreseeing the future to attempt suicide, trying to defy destiny!

Now, though he seems to have half-succeeded, sending his own thoughts out of time to see the timeline,

The fate carried by the timeline seemed still unstoppable.

It continued to crush towards Su Yu.

"I don't believe it!"

Seeing the charging timeline, Su Yu's heart roared wildly! He stretched out his hands, trying to steer this unstoppable torrent of destiny in another direction!

He didn't have a body at the moment, only abstract thoughts.

But under strong will, he seemed to conjure a pair of large hands out of thin air, reaching towards the timeline.

Su Yu did not believe destiny was truly unchangeable!

Boom!

The next instant, the timeline crashed into Su Yu's large hands.

Su Yu had already prepared himself for the impact shattering him into fragments.

However, this unstoppable timeline actually halted under his hands!

"?"

Su Yu's heart was filled with questions.

Did this ominous-looking timeline turn out to be a façade?

"Could it be..."

Su Yu quickly looked inside the timeline.

Then he saw within the timeline, and within the Mechanical City, his own body.

His body was frozen there, caught in the center of two powerful forces.

One force sought to blast Su Yu's body into chaotic Quantum Probability Clouds.

The other force aimed to keep Su Yu's body intact.

These two forces were at a stalemate; the essence was the time and fate of fighting itself.

That's why the timeline had come to a halt! It ceased to advance!

Because it had to resolve Su Yu's "BUG!"

"This is the opportunity!"

Seeing everything clearly, Su Yu was overjoyed.

He exerted himself, beginning to push the timeline, attempting to make it change course.

Originally, this was impossible, but now that the timeline had stopped, everything was possible!

Under Su Yu's efforts, the timeline slowly changed direction!

Chapter 544: The Death of the Revenge Demon!

Rumble...

Su Yu felt a booming in his consciousness, a powerful pressure weighing on his thoughts.

It was like the weight of a planet, crushing him.

It was the power of the timeline, trying to crush Su Yu's thoughts completely to prevent him from altering it.

This power, surpassing all else, but Su Yu did not retreat a step.

At this moment, he had no body, no energy.

All he could rely on was his consciousness, only his strong willpower.

He exerted his willpower to the limit, resisting the crushing pressure of the timeline.

And at this moment, there were countless images flashing at the front of the timeline.

These were countless possibilities for the future.

The originally destined future, under Su Yu's efforts, finally showed numerous variables!

Looking at these potential futures, Su Yu felt a surge of joy in his heart.

He gathered all his strength to try and push the timeline in a certain direction.

This was extremely difficult; that tiny distance seemed farther than the entire universe.

But Su Yu would never give up!

It seemed like only a moment had passed, yet it also felt like a billion years.

Finally, Su Yu felt the pressure lighten.

In the next instant, Su Yu opened his eyes.

"Huh? Eyes?"

Su Yu thought it was strange, as he didn't even have a body, so where did these eyes come from?

"Am I back?"

Su Yu was stunned for a moment before realizing he had somehow returned to his body!

This left him somewhat dazed.

All the previous experiences, the splitting into billions of personalities, stepping outside the timeline, pushing the timeline...

It all seemed like an abstract yet bizarre dream realm.

At this moment, Su Yu heard the unpleasant voice of the Demon of Vengeance beside him:

"...I knew you wouldn't die so easily!"

"What, trying to fake death to lure me in..."

Those two sentences from the Demon of Vengeance were surprisingly not yet finished!

Su Yu had experienced so many things just now, but it seemed like no time had passed at all.

"Did I really change the timeline?"

Hearing the familiar words from the Demon of Vengeance, Su Yu felt bewildered.

Could it be that his previous efforts were in vain?

After all, the Demon of Vengeance was still going to finish saying those two sentences, as foreseen in the future.

However, when the Demon of Vengeance was about to finish those sentences, it suddenly froze.

It turned around abruptly, looking at Su Yu's body, full of terror: "Su Yu! How can you..."

It had seen Su Yu's body!

"What's going on?"

Su Yu was also surprised; he was clearly quantumized, how could the Demon of Vengeance see him?

Could it be that the Demon of Vengeance suddenly gained the ability to see through quantumization?

"Wait, no! Where's my quantumization?"

Su Yu suddenly realized, right now, his body was solid to the extreme.

There wasn't the slightest bit of illusion, what quantumization?

At this moment, he stood beside the Demon of Vengeance in his true form, without any concealment, not even ordinary invisibility.

So the Demon of Vengeance immediately discovered him!

"Returning from outside the timeline, I've already undone the quantumization?"

"I've only just discovered it now; it seems the previous events had a tremendous impact on my spirit..."

Su Yu thought to himself.

With his thought reaction speed, he should have discovered the quantumization was undone the moment he returned.

But the impact on his spirit was so great from earlier experiences that even upon returning to his body, he was momentarily stunned.

By this time, the Demon of Vengeance had recovered from seeing Su Yu with calmness and even a bit of confusion, with a sinister smile: "So, your death was all a disguise?"

"Trying to lure me out?"

"But why not disguise it now? Do you think you have full confidence in keeping me here?"

"Let me tell you, I've planted memory bombs in the consciousness of everyone in the Mechanical City. Once they explode, everyone will die."

"I advise you not to act rashly..."

The Demon of Vengeance slowly retreated, speaking threats.

But the tone seemed somewhat... cowardly?

In previous direct confrontations with Su Yu, it had never won.

So upon seeing Su Yu appear directly, it chickened out.

While retreating, it secretly activated its strange abilities, attempting to take control of other people in the Mechanical City to use as hostages for its escape.

Indeed, it intended to flee.

In a normal situation, even if it couldn't beat Su Yu, it would still have the power for a fight.

Even in defeat, it had means to save its life.

But this time, looking at Su Yu's calm and even slightly confused expression, a penetrating chill rose from the depths of its consciousness.

"Something's wrong! There's definitely something wrong with Su Yu!"

"What's happening?"

"No, there must be extreme danger; I need to escape quickly..."

The alarm in the Demon of Vengeance's heart rang relentlessly, and its sense of danger reached its peak awareness.

It didn't know what was wrong, only knowing there was immense danger at the moment.

All it knew was if it didn't leave now, it would certainly die.

Its body rapidly became illusory, trying to merge into the void, using its strange abilities to escape via the "Memory Space."

At the same time, an eerie light appeared above the heads of everyone in the Mechanical City—this was the power of the Demon of Vengeance.

It was using this means to control the people of the Mechanical City, thereby threatening Su Yu, so that Su Yu dared not stop its escape.

Yet the Demon of Vengeance wasn't sure if this means would work.

After all, last time it threatened Su Yu with hostages, but it was swiftly defeated.

Su Yu wasn't the type to be threatened.

But it had no choice; even if the threat didn't work, it could at least make Su Yu somewhat concerned.

It only needed a little bit of time to escape.

Then it could hide in the shadows, slowly figuring out Su Yu's background.

However, to the Demon of Vengeance's surprise, Su Yu facing the threat, indeed did not prevent its escape.

Chapter 545: Death of Chou Mo!_2

In fact, Su Yu made no move, simply watching Qiu Mo's rapidly fading figure silently.

It seemed as though he was truly letting it go.

But within Qiu Mo's heart, there was no joy, instead, it felt heavier.

Because Su Yu's demeanor suggested no threat, but rather indifference.

The way Su Yu looked at it was like looking at a dead thing.

"Su Yu, what exactly did you do?"

"Tell me!"

"Otherwise, I will detonate all the memory bombs and wipe out all lives in the Mechanical City!"

"Tell me!"

"Don't you care at all about the lives of these people?"

Qiu Mo roared furiously at Su Yu, questioning him.

It suspected that Su Yu might have secretly done something to it, hence his calmness.

After all, it was very adept at tampering with others' memories.

And Su Yu's mysterious appearance, perhaps he did something similar?

Hearing Qiu Mo's questioning, Su Yu continued to look at it with the same look as if it were already dead.

A moment later, Su Yu gently opened his mouth and spoke just five words:

"You are already dead."

BOOM!

Those five words were like five bolts of heavenly thunder, fiercely struck onto Qiu Mo.

Qiu Mo was stunned, and an inexplicable yet extreme sense of danger surged again, making it even more furious:

"What? I am already dead?"

"What a joke, you think such a ghost story can fool me?"

"I..."

Qiu Mo roared furiously, unwilling to believe Su Yu's words, thinking Su Yu was trying to scare it.

However, it stopped mid-sentence suddenly.

It realized its body was disintegrating!

Its power was dissipating!

Its spirit was weakening!

None of this could be stopped.

This made it profoundly aware of a fact, that is, it truly was already dead!

Now it was merely relying on nine-star level power and will to barely maintain a little bit of consciousness.

But even this consciousness was dissipating rapidly.

"When..."

"I remember now, it was from the moment I discovered Su Yu's presence, I had already died..."

Qiu Mo only now recalled why it was so terrified when it first saw Su Yu appear.

It was because, at that moment, its instincts were telling it that it already had died!

"How can this be! How could it be like this?"

Now, Qiu Mo's heart was filled with boundless terror and bewilderment.

It didn't understand when it was attacked? How could it suddenly die?

Given its power, what kind of attack could silently and invisibly instant-kill it?!

No!

Qiu Mo carefully recalled and found it had no actual attack.

It felt like it just suddenly died.

Just like passing away naturally, life ending, dying naturally.

Because it was so peaceful, it didn't notice until Su Yu reminded it, only then did it realize it was already dead.

How is that possible?

As a nine-star level extraordinary being, its lifespan was incredibly long.

Living another thousand years wouldn't cause any aging, how could it suddenly die of old age?

"How can it be?"

"Su Yu! It must be you! What exactly did you do!"

"How could I die? I won't die, my revenge is not complete yet!"

Qiu Mo shouted madly, filled with immense unwillingness in its heart.

It attempted to use various powerful extraordinary abilities to try and prevent its own death.

But at this moment, in just those brief words, its power had almost entirely dissipated.

The powerful spiritual energy from before, it simply couldn't use now.

Even if it could use it, those abilities didn't have the power to bring the dead back to life.

Seeing that in no more than 0.01 seconds, Qiu Mo would completely disappear and be dead beyond death.

"The power actually dissipated this quickly!"

"As a nine-star Transcendent, even in death, my will should be able to last a very long time before dissipating!"

"How could this happen, it must be some kind of extremely high-level powerful force..."

At the last moment, Qiu Mo suddenly calmed down, looking towards Su Yu.

"This is the power of time!"

Qiu Mo said.

It wasn't a question but said in a firm tone.

Su Yu raised his eyebrows and nodded slightly.

Unexpectedly, Qiu Mo actually figured it out!

Perhaps, it was not guessed, but it really had some kind of perception.

That's right, Qiu Mo was killed by the power of time!

Previously outside the timeline, Su Yu exerted all his strength to push the timeline.

The direction it pushed was, "Qiu Mo dies immediately," that direction.

As for how Qiu Mo suddenly died? Su Yu didn't know either.

At the time, he couldn't see the future's details clearly, only knew that in that future, Qiu Mo would soon die.

After Su Yu pushed the timeline in that direction, he immediately returned to his body.

After returning, Su Yu was a bit confused and somewhat skeptical, Did this really work?

Could it truly kill such a powerful Transcendent like Qiu Mo?

However, when Qiu Mo discovered Su Yu at that moment, Su Yu knew it really worked!

Because Qiu Mo originally had fixed two sentences, only said half of one before noticing Su Yu.

And then it changed its words, not finishing those two sentences.

This indicated that the originally destined future was truly changed by Su Yu!

Since the future changed, it showed Su Yu indeed pushed the timeline.

All the previous was not an illusion or dream realm, it truly worked!

Next, it was simple, just waiting for Qiu Mo to die.

Su Yu had been calmly watching Qiu Mo, wanting to see how it would die.

Just now, Su Yu realized that Qiu Mo actually died at the moment he returned.

That's why Su Yu said, "You are already dead."

At the same time, Su Yu also understood how the timeline caused Qiu Mo's death.

"Dying of old age?"

"What principle is this?"

"Could it be it drained its lifespan? The timeline extracting lifespan makes a bit of sense, but still can't grasp the principle..."

Su Yu murmured to himself as he watched Qiu Mo quickly dissipate.

He was very curious about the principle of Qiu Mo's death.

Seeing a life killed by the timeline, it was Su Yu's first time, very valuable for research.

And now, seeing Su Yu nod, Qiu Mo felt a burst of despair in its heart.

"For a thousand years, I have been pursuing the power of time, even creating the Time Drifter profession."

"But until now, it didn't truly succeed once."

"Unexpectedly, in such a short time, Su Yu you truly mastered the power of time and used it to kill me."

In its final moments, Qiu Mo didn't go mad as before, only lowly sighed a few words.

Its heart filled with immense unwillingness.

The supreme power it pursued for thousands of years, unexpectedly Su Yu mastered it in such a short time?

"Su Yu, you are too strong, indeed worthy of a powerful being resurrected from ancient times, I was too arrogant, should not have opposed you."

"Unfortunately, I haven't avenged yet..."

Finally, Qiu Mo left these last two sentences and then completely dissipated.

It was utterly and completely dead.

Su Yu was very certain, no matter how bizarre Qiu Mo's means were, no matter how many clones it had, this time, it was dead through and through.

Being erased by the power of time, unless Qiu Mo completed the Time Drifter's ceremony and also possessed the power of time, could it possibly survive.

Now, it's still at nine stars, having not completed the ceremony.

So death was inevitable!

"Phew! Finally completely killed this formidable enemy!"

Su Yu looked at the place where Qiu Mo dissipated and let out a long breath.

This guy Qiu Mo, strong in power, strange in means, haunting endlessly.

It was the strongest opponent Su Yu has encountered, except for the Brutal Evil God.

Su Yu thought that to completely solve such a formidable enemy, it would definitely require a world-shaking battle, and the scene perhaps would not be worse than the previous trial.

If not careful, the entire Mechanical City would be shattered.

However, unexpectedly, Qiu Mo died so easily, that Su Yu throughout the process never truly took action against Qiu Mo, just pushed the timeline, and Qiu Mo died on its own.

"Was it really that easy?"

"The power of time, truly terrifying..."

Su Yu sighed in his heart.

Looking at how easily Qiu Mo died.

But to achieve this goal, Su Yu had to risk his life just to barely succeed.

Completely quantumizing his thoughts, splitting into billions of personalities, going outside the timeline to change the future.

The dangers within were so intense that even when Su Yu thought about it now, he had some lingering fear, he nearly really died!

"I don't know if in the future I will have to go to that place outside time again to push the timeline."

"Anyway, in the short term, I won't attempt it again, that is almost equivalent to suicide."

Chapter 546: The Cost of Power! The "Gift" Left by Choumo!

Although Su Yu had just attempted to control the timeline once, he didn't show the slightest yearning for that supreme power.

He made up his mind that he wouldn't try to control the power of the timeline again in the short term.

Playing with death is not an option!

The power to control the timeline sounds immensely powerful, almost like a true creator god.

But Su Yu knew it was too dangerous.

Don't be fooled by how easily Su Yu just killed the Vengeance Demon.

But conversely, with just a little mishap, it would have been Su Yu who died.

It's really gambling with life!

No! It's downright suicide!

Previously, Su Yu tried to close off all perception to become quantumized, which was also extremely dangerous.

But actually, Su Yu still had the Profession Panel as a trump card, assuring himself that he could still wake up after closing off perception.

But this time controlling the timeline, Su Yu really had no trump card, no reliance at all.

The Profession Panel had no related function.

He didn't even remember the Profession Panel at the time.

At that moment, Su Yu just relied on some analytical calculations, and resolutely killed himself, trying to use his own death to break the impasse.

Simply insane to the extreme.

Although in the end, Su Yu was reborn from death and successfully revived, even counter-killing the formidable enemy, Vengeance Demon.

But this situation was not Su Yu's original intent.

Su Yu's previous risky attempt wasn't to kill the Vengeance Demon.

Although Vengeance Demon was strong, it wasn't worth such desperation.

The real reason Su Yu risked his life was to understand whether time and destiny could really be changed!

This answer was what made it worth risking everything.

Fortunately, the answer is now out!

Destiny can be changed!

"Destiny is not predestined, what a piece of good news..."

Su Yu felt immense joy in his heart at this moment.

Not because he killed a great enemy, but because he knew his destiny was free!

Destiny can be altered!

"However, if I can change it, others strong enough should also be able to change it!"

"I still need to quickly enhance my power, otherwise, if someone else does this one day and alters my timeline, that would be dangerous..."

Su Yu reminded himself.

He's only at eight-star strength now and yet, with the help of quantumization, he can manipulate the timeline.

Could even stronger Transcendents do it too?

Could the Brutal Evil God do it too?

Thinking of this, Su Yu felt an increasing sense of crisis.

The previous joy vanished completely, and his mood instantly became extremely heavy.

Su Yu even had the illusion that at the end of the timeline, the Brutal Evil God was reaching out with an evil hand, trying to erase Su Yu from the timeline while laughing wildly.

It wasn't just the Brutal Evil God; Su Yu seemed to feel countless greedy and sinister eyes staring at him from outside the timeline, trying to devour him.

A mass of terrifying and twisted images flashed through Su Yu's mind.

Su Yu immediately felt a coolness rising from the bottom of his heart, making his whole body tremble and almost suffocate, desperately wanting to head to the end of the timeline to see what's going on.

"Can't be paranoid!"

"Being able to change destiny doesn't seem to be entirely a good thing."

"This feeling is really unpleasant!"

Su Yu quickly realized something was wrong. He hurriedly calmed his spirit to stop himself from overthinking.

But it didn't help much.

Right now, Su Yu seemed to have symptoms of "victim complex."

Knowing destiny can change, having such worries is entirely normal.

If Su Yu can change destiny, so can others!

And when others alter the timeline, he wouldn't know or see it.

Just like the Vengeance Demon, he died not knowing how he died, and even after death, he wasn't aware he was dead!

It's only natural to worry and be anxious about this.

Under normal circumstances, with Su Yu's Stability, he wouldn't lose his composure like this.

But this bizarre experience subjected his Spirit to too much shock, causing these uncontrollable thoughts.

"Wait? Perhaps this is some kind of aftereffect of controlling the timeline?"

Su Yu suddenly had an inspiration and thought of a possibility.

His current emotional state might not just be a psychological issue.

It might be the cost of power!

After all, with such a powerful ability to control the timeline, if there were no cost, it would seem unrealistic.

And the cost might be... sanity?

"Calm down! Calm down!"

Thinking that this might be the cost of time power, Su Yu quickly used the power of the Ghost Hidden Blade, using that nihilistic deathly emotion to calm the waves in his heart.

Under normal circumstances, Su Yu would not use Extraordinary Power to influence his own emotions, to avoid dependency.

He would only use the origin emotion power of Ghost Hidden Blade: Power of Nihilism when facing mental pollution from Evil Gods.

This power, in essence, is nothingness, an absence of emotion.

So it can calm various mental pollutions.

However, this time, the otherwise invincible Power of Nihilism proved somewhat ineffective.

Even with the use of the Power of Nihilism, Su Yu's worry and anxiety still did not dissipate.

Fortunately, after Su Yu "increased the dosage," he finally quelled those paranoid emotions.

"Finally calmed down."

Su Yu let out a long breath, calming down.

And this also confirmed his previous speculation.

These negative emotions of "victim complex" are certainly not ordinary psychological issues.

Ordinary worry and anxiety would be instantly calmed by the Power of Nihilism.

Su Yu, as an Evil God, could maintain his humanity, showing the strength of the origin emotion of the Ghost Hidden Blade.

And just now, it took Su Yu using a lot of Power of Nihilism to barely calm down, which clearly wasn't normal.

Chapter 547: The Price of Power! The "Gift" Left by Choumo!_2

It was clear that some powerful Extraordinary Power was at work.

This Extraordinary Power should be the cost of altering the timeline.

This cost seems insignificant, just some negative emotions.

But Su Yu knew that this cost was actually very heavy.

Because rationality is more important than power for a Transcendent.

That recent paranoia, if it got any worse, Su Yu might have gone crazy.

Fortunately, Su Yu had self-healing methods, otherwise if time dragged on, the problem would have been serious.

"This is good news, having a severe cost is also a kind of restriction. There's no need to worry that other powerful beings will casually change my timeline..."

Su Yu muttered to himself and became a bit calmer.

Destiny can be changed, and that is a good thing.

But if it could be changed without any cost, that would be the most terrifying.

As it stands, destiny can be changed, but at a huge cost.

This is what truly gave Su Yu a sense of security.

After calming his mood, Su Yu did not take any other actions, nor did he check for any spoils left by the dead demon.

He stood still, lost in thought.

He was recalling the memories from when he manipulated the timeline earlier.

Those memories, though they happened not long ago.

But recalling them now, Su Yu felt a bit hazy about them.

Su Yu knew that this was normal.

Because everything outside the timeline is too abstract.

The so-called "timeline" is not a line at all, nor is it something that exists in reality.

It's fundamentally impossible to describe or recall it with a normal state of mind, or even accurately record it.

Su Yu could maintain some vague recollections because of his powerful strength and strong spirit.

Otherwise, he might have forgotten everything upon returning.

Even so, he didn't dare to delay too long, fearing that after a while, he would really forget everything.

He could only immediately start pondering and analyzing.

"Speaking of which, the timeline I saw earlier, the various scenes in it, all seem to relate to myself."

"The entire timeline certainly doesn't only have such little content."

"After all, I'm not the center of the Universe."

"So, the timeline I saw earlier, was it actually... unique to myself?"

After pondering for a moment, Su Yu analyzed a key point!

What he saw earlier was just his own timeline!

The various scenes in it were all related to Su Yu.

Although other people appeared, like the demon, they were merely passersby, whereas Su Yu was the protagonist of that timeline.

"Could it be that because I am the protagonist of this timeline, I can easily change it?"

Su Yu muttered to himself.

He had always felt that changing the timeline seemed a bit too easy!

Although he went through life and death and bore a huge cost.

But... it was still too easy! Who wouldn't fight for their life? Can fighting for your life change the timeline?

Even though Su Yu didn't have time-related abilities, by sheer willpower alone, he could change the future and miraculously kill the nine-star demon?

Isn't that too easy? Is it achievable just by fighting desperately?

But now, Su Yu had an answer in mind.

That answer was, Su Yu was the protagonist of that timeline, and because it was his home ground, he could alter the "field."

And the demon was just a passerby, which is why Su Yu could kill it so easily.

"If that's the case, if the demon also had the ability to see the timeline, what it saw would be completely different from what I saw."

"In the demon's timeline, it is also the protagonist."

"Could it be that everyone... no! Perhaps every stone, every leaf, has its own unique timeline?"

"Countless timelines converging together, forming... the river of time?"

Su Yu pondered deeply.

In his consciousness, he imagined countless abstract lines.

These lines intertwined to form a river that spanned ancient times and traversed the Universe.

That is the legendary river of time!

Of course, this was all just Su Yu's imagination.

Su Yu could only see his own timeline, not a single one belonging to others, let alone the complete river of time.

This was actually good news.

It meant that if other powerful beings wanted to kill Su Yu by altering the timeline, it would be much harder.

Just like the demon, if it hadn't appeared today, Su Yu could only stare blankly.

Because Su Yu could only change the forward direction of the current timeline.

With the demon appearing, Su Yu changed the direction of the timeline to "demon's death" in order to kill it.

If the demon didn't appear and wasn't in the current timeline, there would be nothing he could do.

Su Yu's ability, in essence, is to alter the "future."

The future requires "now" as a foundation.

If Su Yu were a bit more powerful, able to change the past and kill the demon of the past, it wouldn't need to be so complicated.

Or perhaps if Su Yu could directly alter the demon's timeline, he could easily kill it.

But as for how to reach that realm, Su Yu himself didn't know.

"It seems that on the path of time, I've only just taken a small step. I can only change my own timeline, and can only alter the future, not the past."

"If I could see others' timelines and interfere with them, that would count as a big step."

"If I could influence the entire river of time, that would be the true divine power, but I don't even know if such power truly exists."

Su Yu roughly divided the power related to timelines into three major levels.

He was still at the first small level.

And even this first small level, Su Yu had a long way to go.

As for the following two major levels, Su Yu didn't even know if they really existed, let alone whether he could reach them.

"Forget it... I won't think about it anymore..."

After thinking through all of this repeatedly and confirming nothing was missed, Su Yu decided not to dwell further.

No matter how much he pondered now, it was impossible to derive more insights.

He could only wait for future exploration.

Then, Su Yu looked up into the sky.

The demon was now deceased, completely dissipated.

It didn't seem to have a real body, leaving not even a corpse after death.

However, it didn't mean it left nothing behind.

It left behind a very important "thing," and that was... Su Yu's doppelgänger!

That's right, that doppelgänger did not disappear!

With a move, Su Yu came before the doppelgänger and observed it carefully.

This doppelgänger was the key to the demon's ritual, crafted perfectly, even possessing power similar to Su Yu's own!

Even the Origin Power of the Evil God's Bone from the Ghost Hidden Blade, it actually had!

Su Yu suspected this doppelgänger wasn't made by the demon.

Rather, it was summoned from past history using a technique similar to the Power of Time.

The power of this doppelgänger and its origin held immense value.

Moreover, this doppelgänger was imbued by the demon with all its memories!

All the demon's secrets, including the Time Drifter's ritual, were hidden within this doppelgänger!

This doppelgänger was the best "gift" the demon could leave for Su Yu.

With this doppelgänger, even without mentioning the abundant memories and knowledge it contained, Su Yu's power essentially doubled!

Of course, this was limited to the body's power, not counting battle armor.

Because Su Yu didn't have a second suit of Brutal Battle Armor for the doppelgänger to wear.

"Not necessarily, the true technical challenge of the Brutal Battle Armor lies in the energy source."

"Now that I have the technology for Energy Crystals, it's enough to create a new Brutal Battle Armor..."

An idea suddenly popped into Su Yu's mind.

Create a second suit of Brutal Battle Armor!

The combat power of the Brutal Battle Armor mainly relies on the strong Ghost Energy output of the Brutal Core.

And now, with the Energy Crystal given by Zhang Chenfeng, the energy problem is easily solved, and creating another Brutal Battle Armor is no longer a dream!

It's even possible to mass-produce the Brutal Battle Armor!

Su Yu previously had the idea of mass-producing the Seven-Star Battle Armor, and now that the demon's been dealt with, this can be put on the agenda!

It's just a pity that another key material for the Brutal Battle Armor: the Evil God's Bone, might be hard to obtain.

New Brutal Battle Armor might not match the strength of the original.

But no matter, victory can be achieved through sheer numbers!

By then, hundreds or thousands of Brutal Battle Armors flying about, who could resist?

Su Yu was delightfully imagining, feeling more and more pleased.

Chapter 548: Return from the Dead? Mr. Su Yu's 'Back from the Dead'?

"However, there's no rush to forge the new battle armor yet; let's first decode the memories inside this pseudo-body."

"And... them..."

Su Yu turned his head and looked at the people in the Mechanical City.

Tie Long, Xie Yitian, Yang Lie, Xiao Shengyin and others were still immersed in the sorrow of Su Yu's "death".

They did not notice that Su Yu was standing right there, calmly watching them.

Because the duel between Su Yu and the Qi Demon, though complex to describe, actually happened in a flash of lightning.

It lasted less than a second!

For transcendent beings like Su Yu and Qi Demon, a battle might go on for three days and nights without a result, or it could decide life and death in just a single second.

Moreover, the conversation between Su Yu and the Qi Demon was conveyed through spiritual energy vibrations, transmitting at extreme speeds.

Plus, Qi Demon was invisible the whole time, while Su Yu was mostly in a quantumized state, virtually undetectable.

So, amidst such a grand battle, none of the many bystanders felt a thing!

Who would have known that within such a brief second, while an ordinary person couldn't even complete a thought, a nine-star powerhouse had already fallen?

This is the world of the strong! On a completely different dimension from ordinary people!

Additionally, Qi Demon had used her abilities to interfere with the emotions of the crowd, greatly diminishing their perception of the outside world.

So even transcendent beings like Tie Long, with eight or seven stars, felt nothing at all the whole time.

However, now that the fight was over and Qi Demon was dead, her influence dissipated, and Su Yu, released from the quantum state, would surely be noticed by everyone soon.

Su Yu looked at the crowd, didn't speak, and quietly waited for a few seconds.

During these few seconds, the effects left by Qi Demon completely vanished.

Finally, someone noticed Su Yu.

At this moment, everyone was originally immersed in endless sorrow, some mouths agape as if to wail, but just as a cry was about to erupt, something felt amiss.

It seemed there was Su Yu's presence?

They hurriedly turned their heads towards the direction of the presence, turning with such force it nearly twisted their necks off.

Then they saw two Su Yus, standing quietly not far away...

They rubbed their eyes in disbelief:

"Mr. Su Yu?!"

"Mr. Su Yu isn't dead? Who just said Mr. Su Yu died?"

"Wait, why are there two Mr. Su Yus?"

The crowd stood dumbfounded, staring at the unharmed Su Yu.

Su Yu smiled slightly, "Haha, I heard you all were spreading rumors that I was dead?"

He was in a good mood at the moment and casually made a joke.

The crowd, upon hearing this, hurriedly waved their hands, "Ahem, it was all a misunderstanding, a misunderstanding, how could Mr. Su Yu die..."

Some of them internally nearly burst out cursing.

Who just said Mr. Su Yu died!? Isn't he alive and well, able to talk and joke?

There's even an extra one...

None of these people were Su Yu's mechanical believers, unable to sense Su Yu's state.

Previously, they had believed it when Tie Long and the other believers were absolutely sure that Su Yu was dead.

But now, isn't he alive and well?

In their joy beyond measure, they couldn't help but glare at Tie Long and the others.

This bunch is truly unreliable, spreading such false information!

Made them nearly cry their hearts out at their age, too much!

Tie Long and the mechanical believers, however, were now full of disbelief.

Just now, they clearly sensed that Su Yu had vanished.

How did he suddenly come back to life?

Even the Mechanical City and the Mechanical Spirit, these two mechanical lives, were a bit doubtful of the "mechanical life" they sensed.

Could it be there really was a mistake earlier?

No reason for it—they are Su Yu's creations, how could they sense wrong?

Seeing Tie Long and others doubting life, Su Yu lightly shook his head, then spoke earnestly:

"No more joking."

"Actually, it's not a misunderstanding, just now I indeed died once."

"No, strictly speaking, I died twice!"

"Earlier, while studying this ancient instrument, through certain means, I died once."

"When I died, the Qi Demon lurking in the Mechanical City emerged, attempting to perform an evil ritual using your memories."

"After I returned from death, I discovered its existence and fought it. During the process, due to an accident, I died once again. This death was even more complete than the last."

"But because of this death, I gained a different kind of powerful strength, allowing me to completely kill the Qi Demon and resurrect."

"Now that the Qi Demon is utterly dead, none of you have to worry about its threat anymore."

"This pseudo-body was created by the Qi Demon as part of the ritual. It poses no danger, everyone can rest assured."

Su Yu gave a brief outline of the events that occurred.

Although many confidential details couldn't be extensively explained, he selected what could be told and conveyed it.

After all, such a big incident needs a reasonable explanation; otherwise, everyone would inevitably overthink, causing chaos.

Upon clarification, everyone naturally settled down.

Seeing Su Yu's serious recount, they all immediately focused their full attention to listen.

And as they listened, they became increasingly stunned.

What is Mr. Su Yu saying?

During the study of the ancient instrument, he died once?

Can death really be measured in occurrences?

A normal person, isn't dying once the end?

Moreover, Mr. Su Yu, after dying, can be revived?

Then, after being resurrected, Mr. Su Yu found that terrifying Qi Demon, battled it, and "died" again?

After dying, he gained some powerful form of strength, killing that terrifying Qi Demon?

Chapter 549: Return from the Dead? Mr. Su Yu, Who Has "Died and Come Back to Life"?_2

Wait, that terrifying vengeance demon, a nine-star level vengeance demon, is dead?

Is it true that Mr. Su Yu killed it in a state of death?

How was that done?

And Mr. Su Yu came back to life after killing the vengeance demon.

Is coming back from death so easy?

Everyone was left stunned after listening to Su Yu's account.

It's hard to accept these facts right away.

The death of the vengeance demon was already shocking enough, but compared to Su Yu's operation of dying and coming back to life, it seemed trivial.

If someone else were telling these stories, everyone would definitely scoff.

Is this a story? It's too far-fetched!

But since Mr. Su Yu is speaking in a serious tone, they have no choice but to believe it.

But... how is this possible?

Everyone was skeptical, yet had to believe, caught in a dilemma.

Su Yu saw them like this, and felt a bit helpless.

Speaking the truth, no one dares to believe it!

Actually, Su Yu felt he was being conservative with his words.

If he brought up things like quantumization, probability clouds, and related timelines, it would seem even more bizarre.

If he did that, people wouldn't only disbelieve but also would fail to understand.

In this era, people who understand quantum mechanics are hard to find, so they would listen like it was a heavenly book.

That's why Su Yu didn't mention those things; even if they understood, it wouldn't be useful.

Moreover, it would reveal Su Yu's trump card.

So Su Yu only said that he died twice, without getting into the specifics of how he died.

But now, seeing everyone's reaction, he realized that if he didn't provide details, they wouldn't believe.

However, suddenly someone murmured:

"The ancient warrior is revived..."

Those six words were uttered by someone unknown.

Like a clap of thunder, they woke everyone up.

"Yes! The ancient warrior revived! How could I forget!"

Everyone's eyes shone, looking at Su Yu.

They completely believed now! Believed wholeheartedly!

Because... there had always been a legend that Su Yu is an ancient warrior revived, gradually reclaiming his ancient powerful strength!

That would explain how Su Yu, while dying and resurrecting, could also kill the vengeance demon!

Since Su Yu could revive once, he might be able to revive a second and third time.

Dying and coming back to life, for such a leader, isn't a problem at all.

Death is not an end, but a kind of beginning!

In fact, everyone started to imagine that with each death and resurrection, Su Yu would regain more ancient power!

That's why Su Yu said he obtained some powerful force after dying!

That's why after dying twice, Su Yu was able to kill the vengeance demon!

Everything makes sense now!

Su Yu saw the varying expressions on everyone's faces, guessing what they were thinking.

He was momentarily speechless.

Their ability to fill in the blanks was really impressive.

Even with Su Yu hiding various details and saying things that sounded like fantasy.

In a short time, they could come up with seemingly logical settings to patch things up for Su Yu.

"...Perhaps they have some misunderstandings?"

"Forget it, let them be then."

Su Yu opened his mouth, then decisively shut it.

If they want to think that way, let it be.

Su Yu nodded slightly, then spoke again with seriousness:

"Now that the threat of the vengeance demon is gone, let's immediately commence the plan for global development! As for the specific plan, you arrange it yourselves first, and after you are prepared, present it to me for review."

"You must collect resources as much as possible! These resources will soon transform into your strength!"

"Moreover, it's not just about resources! You can also gather population from various settlements and cities to expand the team of the Mechanical City. Of course, it must be by persuasion, not by force; if they really don't want to come, don't force it."

Su Yu was formally launching global development.

And it's not just about resource extraction; he wouldn't overlook even the global population!

The whole Ruins Star surely has more than the millions in the Mechanical City.

There are many small settlements, and in some places, there might even be million-population large cities with other seven-star warriors in charge.

Su Yu wants them all!

It's not that Su Yu has ambitions to rule more people.

It's because he knows that soon enough, this planet will fall into terrifying battles.

Ordinary human settlements, even million-population large cities with seven-star warriors, are incredibly fragile in face of such wars.

Just a minimal repercussion could lead to the complete decimation of a city.

And what's worse than death is being polluted by the Evil God, where neither life nor death is an option.

Including these populations into the Mechanical City would be a form of protection for them too.

Additionally, it would enhance the strength of the Mechanical City.

However, Su Yu dared not promise he could definitely protect these people during the battle.

Nor was he interested in forcing others to accept his rule.

So Su Yu advised everyone to persuade and not coerce.

After hearing Su Yu's orders, they all looked excited and breathed heavily.

Mr. Su Yu is going to... unify the world?

Since the fall of the Ghost Empire, never in thousands of years has there been a power capable of unifying the world on Ruins Star.

And now, a power comparable to the Ghost Empire is about to be born in Mr. Su Yu's hands!

No! It will surely be more powerful than the Ghost Empire!

Thinking of these things left everyone extremely excited.

Getting involved in such a colossal change, how could one not be excited?

They felt immensely fortunate to be part of the Mechanical City!

After a long while, they shouted in unison, "At your command, Mr. Su Yu!"

Su Yu saw this and nodded in satisfaction: "Alright, you all quickly go and start discussing how to conduct global development."

Global development is such a complicated matter, involving the movement of millions of people.

Su Yu didn't bother to micromanage, so he let them handle it themselves, overseeing only the general direction.

"Mechanical Spirit, give them computational support!"

Su Yu said again.

For such big affairs, massive calculations are inevitably needed.

So the support of the Mechanical Spirit was required.

"Yes, Master!"

The Mechanical Spirit, having recovered from the shock of Su Yu's resurrection, quickly responded.

The crowd accepted the order, enthusiastically rushing out.

Such significant affairs, they didn't want to delay even a moment.

When they came, their faces were filled with anger and sadness.

Now they're all smiling, which was quite a spectacle.

Seeing everyone about to leave, Su Yu thought for a moment and added:

"Right, if you sense my death in the future, don't be too alarmed; it might be because I'm conducting some experiment."

Su Yu intended to continue researching on the Subspace Analyzer in the future, and the practice of quantumizing himself by closing off perception would not be rare.

If every time caused a commotion, it would be troublesome, so Su Yu reminded them.

"Huh? Again?"

Everyone paused for a moment upon hearing.

The smile on their faces froze.

They thought Mr. Su Yu dying twice would be it, but how come it sounds like he plans to die frequently?

That's also...

Too great!

A moment later, their smiles blossomed again.

Because...

Every time Mr. Su Yu "dies and comes back to life," he revives more ancient power!

He died twice today and could easily kill a nine-star terrifying vengeance demon.

If he dies ten or eight more times, wouldn't he be invincible?

So, dying is good!

"Mr. Su Yu, feel free to die!"

"No matter how you die in the future, we won't worry about it anymore!"

They exclaimed collectively, then ran out.

Their words left Su Yu with a peculiar expression: "I feel there's something off..."

"It seems impossible to explain this matter clearly... forget it!"

Su Yu shook his head and rationally decided not to dwell on the issue.

Then, Su Yu once again looked at the dummy beside him.

Now, without any other disturbances, it was time to decipher the memories of the vengeance demon!

Though the vengeance demon is dead, its memory is a treasure trove!

Su Yu felt a slight excitement.

What kind of secrets lie within the complete memory, inheriting the wisdom and hatred of dozens of Seven-star Transcendents and creating a Fourth Rank profession like the Time Drifter?

Chapter 550: A Great Harvest! Fourth Rank Profession, the Complete Ceremony of the Time Drifter!

"Power of Nihilicity!"

Su Yu muttered silently in his heart, releasing a force of dead silence and nihility to envelop the fake body created by the grievance demon.

Although the grievance demon was already dead, to be safe, it was better to use the Power of Nihility to "antivirus" it first before investigating the memories inside.

The Power of Nihility could even brainwash the Brutal Split Mind into idiocy.

If there were any will hidden in this fake body, it would have nowhere to hide under the Power of Nihility.

As the Power of Nihility enveloped the fake body, it quickly became transparent until it disappeared into the real space.

"Seems like there's no hidden danger?"

Su Yu sent his spirit into the Nihility Space and found the fake body staying there quietly without any movement.

Previously, when the Brutal Split Mind was taken into the Nihility Space, it caused quite a ruckus.

Seeing this, Su Yu was slightly relieved.

It seemed there was indeed no cognitive will existing in this fake body, just an empty shell.

However, Su Yu still didn't dare to enter the fake body rashly.

No way, the grievance demon's abilities were truly bizarre, and who knew if the memories it left behind had any hidden dangers.

Even if the grievance demon was completely dead, and even if the Power of Nihilism didn't detect any activity, one couldn't be careless.

Su Yu didn't even dare to let Fear Intelligence try it, in case Fear Intelligence got contaminated, that would be troublesome.

So... Su Yu needed to use his quantumized state to study the grievance demon's memory.

He then isolated his perception again and stepped into the Subspace Analyzer.

After some operations, Su Yu completely shut down all perceptions and "killed" himself.

Within just a few minutes, he was awakened by the reminder from the Profession Panel.

When he woke up, he had already transformed back into a Quantum Body!

...

At the same time Su Yu "killed" himself...

Outside, Tie Long and the other believers of Su Yu suddenly paused mid-step with strange expressions.

Others nearby noticed their oddities and quickly asked, "What happened?"

They all knew that these believers had a tight connection with Mr. Su Yu; did something happen to Mr. Su Yu again? Or was there a new order?

Tie Long and others replied in a peculiar tone, "Mr. Su Yu seems to have 'died' again just now..."

People froze when they heard this.

Su Yu had mentioned before that he would "die" again in the future, and people shouldn't panic.

But who would've thought the 'future' meant just a few seconds later?

They had just left, and less than a minute later, Mr. Su Yu had 'killed' himself again?

But after a moment, everyone was all smiles.

They turned to look behind them, their faces showing admiration and exclaiming:

"Mr. Su Yu 'dies' so quickly!"

"Mr. Su Yu is so diligent; we can't slack off. We must quickly draft the detailed plan for the global expansion!"

With that, they quickened their pace, rushing to a meeting for discussion.

Mr. Su Yu was so quick to 'die.'

What right did they have not to work hard?

Tie Long and the other believers sincerely prayed in their hearts.

Their devout prayers and faith transformed into Professional Experience for Su Yu.

With their efforts, Su Yu received an experience alert from the Profession Panel within just a few minutes and awoke again.

As soon as he awoke, he heard Tie Long and the others' prayers.

He immediately felt speechless.

"What do they mean by, 'Mr. Su Yu 'dies' so diligently. What right do they have not to work hard?"

"They're clearly praising me, but why does it sound so strange? 'Dying' so diligently, is that even a compliment?"

Su Yu complained in his heart, feeling that after this incident, his image as the ancient revival overlord seemed a bit skewed...

Fortunately, it wasn't a big problem.

In time, everyone would probably get used to him 'dying' repeatedly.

He shook his head and then, with a shift in thought, spread out his Probability Cloud, and his consciousness descended into the fake body's interior.

Boom!

As soon as Su Yu entered the fake body's interior, a massive amount of memories flooded toward his consciousness.

Su Yu was slightly surprised. The grievance demon was already dead, and the fake body had been disinfected by the Power of Nihilism.

Yet these memory fragments, devoid of any will, still had some kind of "offensive" nature.

These memories actively wrapped around Su Yu's consciousness, trying to submerge it completely.

Aiming to turn Su Yu into a second grievance demon!

"Accept it! Accept it!"

"Accept these memories, and you will gain immense power!"

"Revenge! Revenge!"

Su Yu felt countless voices echoing in his consciousness, tempting him to wholly accept these memories.

It was not only to make Su Yu accept the memories but also to accept that never-extinguished obsession with revenge over centuries.

Su Yu sneered slightly in his heart, completely ignoring the temptation of these voices.

Actually, these memories were incredibly terrifying.

After all, the grievance demon's forte was memory manipulation.

The memories it left behind seemed to carry a "data virus"-like quality.

Even without any will controlling them, these memories would actively contaminate the consciousness of any beings daring to approach them.

Just like the innate contaminative nature of Ghost Energy.

This intrinsic pollution couldn't be eliminated, even by the Power of Nihilism.

In a certain sense, the grievance demon was equivalent to a nine-star "Data Ghost" specialized in memory.

Even Xie Yitian, a seven-star Data Ghost, could easily invade the brains of hundreds of thousands of people and freely alter their memories.

How terrifying must the nine-star grievance demon be?

The terror of its remaining memories was unimaginable.

If Su Yu had let his spirit enter this fake body in a normal state, he might not have been able to withstand it.
