

Infinite 561

Chapter 561: Quantum Teleportation! Revisiting Radiation Land!_2

Then he activated his mind, using self-observation, to disperse his quantum probability cloud to a distant place, attempting to complete the instant teleportation.

Earlier, Su Yu was preoccupied with battling the Vengeful Demon, and later delving into the study of the Subspace Analyzer, leaving no time to explore the secrets of quantum teleportation.

Now he was finally going to give it a thorough examination.

Of course, he didn't foolishly attempt to teleport directly out of the Ruins Star.

That would be suicidal.

He wanted to teleport to the other side of the planet, crossing over ten thousand kilometers, to test the limits of this quantum teleportation.

Then, he failed.

"It seems it doesn't work very well..."

Su Yu discovered the limitations of this method.

To disperse the probability cloud, it must be somewhere Su Yu can accurately pinpoint.

For example, the location of his believers.

Only then can he extend his mind there to complete the probability cloud's dispersion.

The few instances of quantum teleportation that Su Yu had completed before all followed this condition.

And now, if Su Yu wanted to teleport to an unfamiliar place out of thin air, nothing happened, and he remained in his original position.

It seems that to teleport out of Ruins Star, one must first leave some believers outside the Ruins Star to teleport there.

But since Su Yu hadn't been outside Ruins Star, how could he develop believers outside the planet?

Moreover, where outside the planet could he find believers to develop?

It became a chicken and egg problem.

Su Yu knew that this path was temporarily unfeasible, but he wasn't disheartened.

Because Su Yu suspected that even if it were feasible, the creations of Zhang Chenfeng might have ways to intercept him.

So there was no need to dwell on it too much.

Moreover, this method could still serve as a trump card, and perhaps there would be opportunities in the future.

Who says you can't develop believers outside a planet if you don't leave the planet?

Everything is possible.

As for how to gather believers outside the planet? Su Yu hadn't figured that out short-term...

"This kind of quantum teleportation seems similar to the movement method in subspace."

"In subspace, to teleport spiritual bodies also requires knowing the coordinates to complete it."

"It seems the connection between subspace and the material world is really fascinating..."

Su Yu pondered.

The characteristic of this quantum teleportation is very similar to the way subspace uses memory coordinates to teleport.

The mysteries within are worth studying.

Could subspace teleportation also be a special quantum state?

Su Yu couldn't immediately decipher the secrets within.

"Well, even if I can't leave Ruins Star, just being able to teleport within the planet is already a formidable technique."

"Let's try again..."

After pondering for a while, Su Yu started another attempt.

This time, he tried to teleport to a familiar place.

Then, he succeeded.

In the next instant, Su Yu's quantum body appeared outside the Mechanical City, several thousand kilometers away.

It was a place he was familiar with, in the Radiation Land.

"It's indeed instant travel!"

Su Yu looked at the Radiation Land before him, feeling immensely excited.

This quantum teleportation is indeed magical and quick!

Previously, even if Su Yu activated the full speed of the Brutal Battle Armor, it would take some time to cross several thousand kilometers.

But now, he arrived in an instant!

His mobility had once again improved significantly!

He had previously thought while using spiritual body teleportation in subspace, how amazing it would be to do the same in the material world.

Now, it had unexpectedly become a reality!

"However, this doesn't seem to be true teleportation; there is still a slight delay..."

Su Yu's sensitivity to time was comparable to an extremely precise atomic clock.

By carefully sensing, he could discover that although he crossed several thousand kilometers instantly to reach Radiation Land,

That "instant" still took a bit of time.

Although that bit of time was less than a thousandth of a second, it was existent.

Therefore, quantum transmission isn't true teleportation, it's just incredibly fast.

With a simple calculation, Su Yu could determine that this quantum teleportation speed was actually at light speed.

"Indeed, it's still impossible to surpass the speed of light?"

"In that case, quantum teleportation can't be used to cross the Galaxy, with only light speed, it's really too slow."

Su Yu was somewhat surprised by this result.

After all, with quantumization, he could even surpass time, see timelines, and change destiny.

But still couldn't surpass light speed?

Is the light speed limit this difficult to break?

"Tsk tsk, I must be getting carried away, even thinking about breaking the light speed limit now."

Su Yu suddenly chuckled to himself.

Recently, he was running around at ten times the speed of sound, and now he was already setting his sights on light speed.

And wasn't satisfied yet?

Thinking of this, Su Yu felt a bit smug.

Being able to move at light speed in the material world.

This kind of ability seemed heaven-defying in the eyes of ordinary Transcendents, what more could he want?

Although Su Yu's kind of light speed movement had significant limitations.

First, it must be the location of Su Yu's believers.

Also, Su Yu wasn't actually entirely outside the Radiation Land.

At this moment, a part of his quantum probability cloud was still inside the Subspace Analyzer.

Right now, Su Yu simultaneously existed in both the Subspace Analyzer and the Radiation Land.

This is a trait of the quantum probability cloud, and also a restriction.

Because Su Yu's quantumization relies on the internal environment of the Subspace Analyzer to be completed.

If he were to disperse the quantum probability cloud entirely from the Subspace Analyzer, he would immediately fall out of the quantumized state.

In that case, the basic condition for teleportation would no longer exist.

"Although it's limited, it's still pretty good."

"Moreover, once I understand the principle of quantumization and can actively control the quantum state, then I won't need to rely on the Subspace Analyzer and can teleport freely..."

Su Yu mused to himself.

At present, he must rely on the Subspace Analyzer to complete quantumization.

He naturally wouldn't be content with such limitations and wanted to master the secrets of quantumization on his own truly.

At that time, he could truly teleport freely at light speed, as he wished.

And the secret of quantumization lies within the Subspace Analyzer!

Among the remaining dozen or so machines, there certainly is one specialized in this quantumization function!

The Subspace Analyzer is truly a treasure trove!

Thinking of this, Su Yu decided to return and continue his research on the Subspace Analyzer.

However, just before he set off, he turned to look at the Radiation Land before him and had a sudden thought.

"Wait, since I'm here, why not... go in and have a look?"

The Radiation Land was where the capital city of the Ghost Empire used to be.

The not-quite-dead Ghost Emperor was rumored to be hiding within.

Earlier, Su Yu and Tie Long had a big battle here, triggering the activation of ghost energy, and even condensing a dark king shadow resembling the Ghost Emperor.

Later, Su Yu acquired the Source Core Crystal Beast in the Radiation Land, foiling the Ghost Emperor's revival plan, causing a riot in Radiation Land, and Su Yu fled.

Since then, Su Yu had seldom returned here.

He merely used the radiation beast believers here to remotely mine resources.

Now that he's here again, Su Yu wasn't in a hurry to leave.

"There's still no change here, huh..."

Looking at the Radiation Land before him and thinking about past events, Su Yu sighed slightly, feeling a sense of nostalgia like returning to an old haunt years later.

In truth, it hadn't been that long since Su Yu last visited the Radiation Land, merely a month or two.

But Su Yu's strength had undergone tremendous changes, experiencing numerous significant events, a life more exciting than most people in a lifetime.

So it felt like a long time had passed.

"I wonder how the Ghost Emperor inside is doing now?"

"Let's go see..."

With a slight sigh, Su Yu collected his thoughts.

Then his probability cloud shifted, starting to move.

Previously, he dared not venture into the Radiation Land lightly due to inadequate strength and fear of the Ghost Emperor.

Now that his strength was sufficiently powerful,

The most important thing is that, as a quantum body, he comes and goes without a trace, so he doesn't need to be overly concerned.

It's the perfect opportunity to go in and take a look!

And at this moment, deep within the Radiation Land, in thick darkness, a powerful presence suddenly opened its eyes!

Chapter 562: Radiation Ghost City! The Terrifying Ghost Emperor!

"Is it finally here?"

"Su Yu..."

In the depths of the Radiation Land, the powerful presence seemed to sense something and murmured softly.

This powerful existence seemed to have no physical form, just a formless sound wave.

As his voice echoed, a large number of Radiation Beasts nearby trembled and bowed to the ground.

...

At this moment, Su Yu was quickly advancing through the Radiation Land.

Because he had quantum teleported here in his Quantum Body, he hadn't brought the Brutal Battle Armor.

Unable to break the sound barrier with his flight as he used to, he had to rely on his own abilities to move.

But in fact, Su Yu's speed was even faster than before!

Because he had Quantum Teleportation.

This teleportation method required a believer to locate it for long distances to achieve it.

But at close range, anywhere within sight didn't need to be located.

Wherever he saw, with a thought, he instantly arrived!

Theoretically, this was at light speed!

Of course, Su Yu wasn't actually at light speed at this time.

After all, his thoughts needed time to operate too.

From seeing the target to mental processing, it inevitably consumed time.

Simply put, teleportation had a "cooldown time."

Keeping Su Yu's speed from being too outrageous.

But it was still astonishing.

Even reaching up to hundreds of times the speed of sound.

When Su Yu, clad in armor and fully powered, actually reached the speed of sound a hundred times, it was through sheer force, the commotion it caused akin to a nuclear explosion, and it was not lasting, only holding for a short time.

But now, Su Yu could travel at a hundred times the speed of sound quietly, without even stirring the air.

And this teleportation required almost no consumption, it could last as long as he wished.

That's the advantage of Quantum Teleportation.

"Tsk tsk, this way of moving is truly exhilarating!"

Su Yu praised as he teleported.

His figure flickered through the Radiation Land continually.

Instantly disappearing from the spot, then appearing in the distance, then disappearing again...

Occasionally teleporting back, meticulously exploring the entire Radiation Land.

Although he turned back now and then, it hardly consumed any time because it was so fast.

Anywhere he saw, he could instantly reach.

This was a vastly different sense of euphoria compared to flying with the Brutal Battle Armor in the past.

"If I could achieve this state without relying on the Subspace Analyzer, that would be amazing..."

Su Yu sighed softly in his heart.

At this moment, his Quantum Teleportation still depended on the Subspace Analyzer.

When he could perform quantumization himself, that would be true freedom for teleportation at will.

"Wait, I've roamed this far here, why haven't I seen a single Radiation Beast?"

A thought flashed in Su Yu's mind, pulling him from the excitement of teleportation, sensing something amiss.

By now he had ventured over a thousand kilometers.

He explored many places, witnessing landscapes completely different from others.

But strangely, he hadn't seen a single Radiation Beast.

This was very bizarre, and Su Yu immediately became vigilant.

It seemed some strange transformation had occurred here.

He temporarily ceased his movements and carefully sensed.

He was sensing his believers.

Su Yu had many Radiation Beast believers in the Radiation Land, who had always been helping him develop resources in the area.

Since the Mechanical City's upgrade, those resources were no longer needed.

So Su Yu didn't care much about these Radiation Beast believers, nor was interested in sensing their state, it wouldn't matter if they all died out.

But now, he had to sense them because something was wrong.

"Those Radiation Beast believers don't seem to be dead, but their state is somewhat off."

"They all seem to be in the deepest part of the Radiation Land?"

"What on earth happened?"

After sensing briefly, Su Yu murmured to himself.

In fact, figuring everything out was easy; he could just use the believers' sense to teleport directly and descend over there.

But that was too reckless; who knew if there would be danger there.

So, after pondering for a moment, Su Yu flashed forward once more.

He needed to see for himself what was really going on in the deepest part of the Radiation Land?

This way, he wouldn't descend directly and could escape if there was danger.

...

In the deepest part of the Radiation Land, there was a vast and grand city.

This city was very peculiar, without too many tall buildings.

At first glance, it was mostly low houses, seeming unrelated to the word grand.

But if you could get closer and observe carefully, you'd find this city completely different from the ordinary ones.

Ordinary cities develop upwards, building skyscrapers.

But this city developed downwards, with most structures stretching below!

The city's ground-level structures appeared quite low and their style somewhat eerie and sinister.

But the underground part of the city was extraordinarily grand.

Only, from a normal perspective, one couldn't see the underground scenes.

This city was the core of the Ghost Empire back in the day, the Radiation Ghost City!

Also the core of the Radiation Land, one of the terrifying forbidden zones on Ruins Star!

"Is this the Radiation Ghost City?"

At this moment, Su Yu stood at the outskirts of the Radiation Ghost City, quietly observing.

In plain sight, the center of the Radiation Ghost City had a huge pit, like an abyss, deep and bottomless at a glance.

Above the pit was a long spiral staircase extending downward, its length unknown.

Chapter 563: Radiation Ghost City! The Terrifying Ghost Emperor!_2

This abyssal pit is continuously inhaling and exhaling a large amount of high-energy tendrils, like it's breathing.

Those high-energy tendrils are incredibly dense, occasionally solidifying into physical form, turning into thick tendrils that seem to possess some kind of life, wildly dancing towards the sky.

The scene looks like a terrifying demon from the depths of hell, trying to break free from its bonds and descend upon the human world!

But in the next moment, everything returns to normal.

The ghost energy tendrils disappear as if everything just experienced was an illusion.

"No wonder it's called a forbidden zone, it's indeed terrifying..."

Su Yu looked at the abyssal pit, his expression solemn.

He didn't think that what just happened was an illusion.

It was all real.

He could feel the powerful high-energy tendrils contained within those tendrils.

Even more powerful than when Su Yu goes all out!

That is to say, the intensity of those ghost energy tendrils exceeds nine stars!

And the ghost energy state is somewhat strange, suddenly vanishing like an illusion.

This makes it even more frightening.

"The Ghost Emperor is indeed a power above nine stars."

Su Yu thought to himself.

He knew that such a scene must be related to the Ghost Emperor.

This represents the strength of the Ghost Emperor! A strength beyond nine stars!

Much stronger than the previous Demon of Resentment!

Su Yu wouldn't dare to stay here if he didn't have a Quantum Body that could retreat at any time.

"Are all my believers in there?"

Su Yu could sense that he had a large number of Radiation Beast believers gathered within Radiation Ghost City at this moment.

Even deep within the abyssal pit.

Originally, Su Yu could use the perspective of these believers to see the surrounding environment, but now he couldn't see anything.

He tried to give commands to those believers, but there was no response.

Su Yu felt that those believers were in a very strange state.

They were clearly Su Yu's believers, but they seemed to have surrendered to an even more powerful existence?

"Why is this?"

"Could it be that the Ghost Emperor has captured and subdued all those believers of mine?"

"This isn't good at all..."

Su Yu murmured to himself.

"Su Yu, you have finally arrived..."

While Su Yu was pondering, he suddenly heard a voice echoing in his consciousness.

This voice was extremely unfamiliar, containing both domineering and cold qualities within its tone.

Like the whisper of a terrifying demon king from the deepest abyss.

As soon as Su Yu heard this voice, he felt a chill throughout his body.

His instincts were warning him, danger! Extreme danger!

"The Ghost Emperor! This must be the Ghost Emperor!"

"He has truly resurrected and has even discovered me!"

Su Yu realized that in this Radiation Land, there existed a presence capable of emitting such a terrifying voice.

Apart from the Ghost Emperor, it couldn't be anyone else!

Moreover, the Ghost Emperor had actually discovered him!

Even though he was in a Quantum Body, taking advantage of the special quantum state enabled by the Subspace Analyzer.

Under normal circumstances, observers couldn't notice him!

But the Ghost Emperor had indeed discovered him!

Su Yu quickly pondered strategies: to respond or to flee?

"Why don't you respond to this Emperor?"

The voice, seeing Su Yu remain silent, spoke again.

This voice referred to itself as "this Emperor," clearly implying it was indeed the Ghost Emperor.

Hearing this, Su Yu pondered for a moment, about to respond.

It seemed like the Ghost Emperor didn't directly attack but was open to communication.

Therefore, Su Yu decided to respond first, to see if he could extract some information.

However, just as Su Yu was about to speak, he suddenly became alert, sensing something was wrong?!

He immediately shut his mouth without speaking.

Instead, he activated his future-seeing ability.

He intended to foresee any potential danger before responding to the Ghost Emperor.

Facing such an ancient power, caution was necessary!

"..."

When seeing the future, in the vision, Su Yu was just about to respond to the Ghost Emperor.

Then, once more, he felt a sudden alertness in his heart!

"?"

In foreseeing the future, everything visible is just a scene of the future.

In a sense, it's not real, similar to an illusion.

Therefore, whatever Su Yu intends to do in seeing the future won't affect his present self.

But now, Su Yu had a feeling.

If he responded to the Ghost Emperor in the future, he would immediately be threatened by some kind of terrifying danger, affecting his present self!

"No good! This Ghost Emperor is too strange; it seems to have some kind of power over time as well!"

Right now, Su Yu was extremely shocked and immediately stopped his future-seeing.

The Ghost Emperor's power could somehow affect present-day Su Yu from the future.

This method was absolutely terrifying.

Su Yu didn't dare to delay any longer, and in an instant, he vanished, returning to the Mechanical City.

Simultaneously, he quickly severed the connection with those Radiation Beast believers.

He abandoned those believers immediately!

Su Yu suspected that the recent danger was related to those Radiation Beast believers.

Those Radiation Beasts seemed to have been controlled by the Ghost Emperor.

Su Yu could use these believers to sense positions and teleport.

Who knew if the Ghost Emperor had some method to use these Radiation Beast believers in reverse to locate Su Yu himself.

Better to abandon them for safety's sake.

Deep within the Radiation Land, the powerful presence chuckled softly the moment Su Yu left, "Gone quickly, quite cautious..."

"Su Yu, which old friend are you?"

"Could it be that one..."

"A pity..."

Around him, the shivering Radiation Beasts had become silent.

The moment Su Yu abandoned them, they all perished.

As believers abandoned by the object of their faith, there was only one result: death!

"Returned..."

After Su Yu returned to the Mechanical City, he finally sighed in relief.

This was his stronghold, very far from the Radiation Land, enough to ensure safety.

"If that voice just now really was the Ghost Emperor, then his power is truly terrifying!"

"It seems as though just responding to his question would lead to some kind of terrifying erosion of power."

"Luckily I fled quickly!"

Even though Su Yu had returned to his stronghold, he still felt a little trepidation.

That brief moment felt more terrifying than all past battles.

If he had made the wrong choice and responded to the Ghost Emperor with a single word.

He probably wouldn't have been able to return!

"What exactly is the power of the Ghost Emperor?"

"Why does merely responding to him pose such terrifying danger?"

Su Yu, to this day, couldn't figure out the source of that earlier danger.

"Perhaps it's some special ability of the Ghost Emperor? Just by talking to him, you encounter danger—it's just too insidious..."

Su Yu cursed under his breath.

This kind of ability was indeed too sinister.

If Su Yu hadn't been quantumized with future-seeing ability and very keen danger perception, he would probably have fallen into a trap.

"But fortunately, the Ghost Emperor doesn't seem to have completely resurrected; otherwise, he would have come looking for me long ago."

Su Yu murmured to himself with a bit of relief.

Although the Ghost Emperor was terrifying, there seemed to be some limitations.

If not, Su Yu had previously stolen the Ghost Emperor's Source Core Crystal Beast and gathered a large number of believers in the Radiation Land, severely undermining the Ghost Emperor.

The feud would have been long established.

If the Ghost Emperor could move freely, he would have attacked him long ago.

This Dark King wasn't forgiving, revenge was certain.

The fact that Su Yu was still alive and well indicated that his condition was not yet capable.

However, compared to before, the Ghost Emperor's condition was evidently much improved.

If the earlier Ghost Emperor had this eerie power, Su Yu could never have obtained the Source Core Crystal Beast.

It seems that although Su Yu's power has grown rapidly recently, the Ghost Emperor's growth is even faster!

Previously, when Su Yu just reached seven stars, he could "bully" him.

In such a short time, this entity already possessed strength beyond nine stars!

This exploration of the Radiation Land yielded Su Yu no gains.

Instead, he lost a bunch of Radiation Beast believers and was quite frightened.

But Su Yu felt it was all worth it.

Because he discovered the potential threat of the Ghost Emperor early.

If he waited until the Ghost Emperor fully revived to find out, it would have been too late.

"As expected, great changes are coming! The Ghost Emperor is about to fully revive."

"Time waits for no one..."

Su Yu sighed slightly in his heart.

"Su Yu..."

At that moment, Su Yu suddenly heard that voice again.

His heart tightened instantly!

Chapter 564: Eavesdropping on the Ghost Emperor! Global Development Starts Now!

"Su Yu, who exactly are you, my old friend?"

"Could it be that person..."

"What a pity..."

Then, Su Yu heard a section of words like this.

"Hmm?"

Su Yu was somewhat puzzled.

This voice, it seemed as if it wasn't speaking to him? But more like talking to itself?

Moreover, these voices were not transmitted through air or Spiritual Energy, but directly resonated in Su Yu's consciousness.

Su Yu felt, it was just like... listening to the prayers of believers usually.

But how could the Ghost Emperor possibly pray to Su Yu?

"Could it be that those Radiation Beasts believers of mine, even in death, haven't completely severed their connection with me, thus they can still send back some voices?"

"Or is it the ability of the Ghost Emperor? Trying to use this to erode me?"

Su Yu felt something was amiss, worrying that there might be some danger.

He quickly focused his mind, using the Power of Nihilism, enveloping himself with this deathly force, not listening, not looking, not thinking.

He was conducting an "antivirus" on himself, to avoid being invaded by the Ghost Emperor's power.

But even with Su Yu being so careful, that voice still resonated in his consciousness.

"Su Yu... once I fully recover, I will come to meet you."

"In this world, to have someone like you emerge, it is truly interesting."

"Your power, neither living nor dead, what kind of ability is this? It is somewhat peculiar, but it hasn't surpassed nine stars, and won't be my match..."

The Ghost Emperor muttered a few more sentences to itself.

Su Yu, listening to these voices, did not feel the previous terrifying sense of danger.

It seemed the Ghost Emperor was indeed just talking, with no malice intended.

"What's going on?"

Su Yu felt somewhat strange in his heart.

He felt, this voice, didn't seem like the ability of the Ghost Emperor.

Instead, it was as if he had inadvertently "eavesdropped" on the Ghost Emperor's self-talk?

"It does seem like there's no danger after all."

"Why am I suddenly hearing the voice of the Ghost Emperor? Could it really be because of those deceased Radiation Beasts believers playing some role?"

"No, it's not! I truly have severed the connection with them."

Su Yu quickly denied the speculation in his heart, it's not the merit of those Radiation Beasts believers.

"Moreover, my previous sense of danger also seemed somewhat unusual."

"The Ghost Emperor's ability can even surpass Time. It can threaten my current self in the future."

"But I was able to detect this threat in advance."

"Since when has my danger sense become so strong?"

Su Yu's danger sense was essentially a keen perception of the timeline after being quantized.

But earlier, the Ghost Emperor's ability seemed able to even interfere with the timeline.

Thus, Su Yu's danger sense should, theoretically, also be interfered with.

If it were solely relying on the quantumized danger sense, Su Yu would likely have already fallen into the trap.

"It's not just the quantumized danger sense; rather, it seems like... [Lens] is at work!"

At this moment, Su Yu suddenly had an inspiration, looking at the Subspace Analyzer beside him, he began to understand a bit.

He was now completely different from when he was battling a former tyrant; he also possessed another power!

The power of the alien machine, [Lens]!

Thinking of this, Su Yu suddenly transformed again, morphing into that [Lens], into that peculiar alien machine.

"I have slumbered long enough, this planet needs to once more resound with my voice..."

Suddenly, the Ghost Emperor's voice became clearer.

"Indeed!"

"Haha, Ghost Emperor, no matter how strong you are, it seems you can't match the technology of this Alien Star..."

Su Yu's heart was set, now completely confirmed.

It seems, upon reverting to human form, he also possessed a portion of the [Lens]'s power.

This alien machine could analyze Subspace.

And the connection between a powerhouse like the Ghost Emperor and Subspace, needn't be elaborated.

So the [Lens] even analyzed a part of the Ghost Emperor too.

That's why Su Yu instinctively sensed the danger beforehand, not responding to the Ghost Emperor's question.

Of course, this analysis only parsed a small part of the Ghost Emperor, to be precise, it parsed the "voice" of the Ghost Emperor.

And after Su Yu returned to the interior of the Subspace Analyzer, this power was strengthened, able to even remotely eavesdrop on the conversations of the Ghost Emperor.

"Such power, truly formidable! Just a bit of contact, and you can analyze the enemy's abilities."

"This way, as long as I don't get instantly killed on the spot, I will gradually gather information and reclaim the ground!"

"Hehe, it seems this round wasn't a complete loss for me."

Su Yu chuckled lightly in his heart.

Previously, Su Yu was scared off by just two sentences from the Ghost Emperor; if this counted as an encounter, then Su Yu would be considered defeated.

But now Su Yu discovered he could safely eavesdrop on the Ghost Emperor's moves.

This situation flipped around, allowing Su Yu to win a round again.

Eavesdropping on the Ghost Emperor this way surely offers opportunities to obtain more intelligence.

Hence, when facing the Ghost Emperor in the future, it would allow him to hold every advantage!

"This Subspace Analyzer is truly a treasure..."

While eavesdropping on the Ghost Emperor, Su Yu couldn't help but sigh in his heart.

After collecting the structure information of the [Lens], he could transform into the [Lens], thus possessing the power of the [Lens].

He could even eavesdrop on the Ghost Emperor.

This was an undoubtedly powerful, supreme ability.

And within the Subspace Analyzer, there were over a dozen similar machines!

If all the information from these machines could be collected, wouldn't that mean possessing over a dozen types of special alien abilities?

Thinking of this, Su Yu felt a twinge of excitement.

However, this matter couldn't be rushed, requiring a gradual expansion of consciousness to accommodate such vast amounts of structural information.

Chapter 565: Eavesdropping on the Ghost Emperor! Global Development Starts Now!_2

The crucial point now is to monitor the Ghost Emperor guy.

"My Empire..."

After a while of monitoring, Su Yu discovered that the Ghost Emperor seemed to have been in slumber for too long and was a bit chatty, muttering to himself from time to time.

However, there wasn't much useful intelligence.

Most of it was just uninformative lamentations.

After half an hour, the Ghost Emperor completely fell silent, and there were no more words coming through.

"It seems we won't get any information for now."

Su Yu thought with some regret, exiting the monitoring state.

He was still hoping to catch some secrets of the Ghost Emperor, but it seems like there's no hope for now.

But it's no wonder, even an ordinary person wouldn't casually mutter their secrets to themselves.

Let alone a powerful Dark King like the Ghost Emperor?

He's just chatty, not stupid.

It seems Su Yu will have to take it slow and steady if he wants to uncover the secrets of the Ghost Emperor.

But that doesn't mean Su Yu came away from this monitoring session empty-handed.

"Those 'sounds' are his reward."

"What exactly is the Ghost Emperor's ability? Just the mere sound makes me feel so dangerous."

"These sounds contain some kind of powerful force."

Su Yu looked at the mass of 'something' in front of him, lost in thought.

It was a mass of 'sounds,' the very words the Ghost Emperor had just said.

At this moment, these words, like real substances, were enveloped by the Power of Nihilicity, floating in the air.

These sounds were extracted by Su Yu from his awareness, turning into this form.

They were completely different from normal sound waves.

Under the scrutiny of the Lens, they revealed some kind of powerful nature, not to be ignored by Su Yu.

Using the Lens, Su Yu carefully observed this mass of sound and discovered their essence was extremely high, surpassing nine stars.

The power contained within these sounds was completely different from ordinary Spiritual Energy and Ghost Energy.

Although the Lens could reveal a lot of information from it, Su Yu couldn't understand it.

Because Su Yu hadn't even reached nine stars yet, let alone surpass it. The power contained within these sounds was beyond Su Yu's comprehension.

"This is some good stuff!"

"Store it away. Study it well later."

Su Yu stored this mass of sound into the Nihility Space for research later.

This was the first time Su Yu had obtained a sample of power above nine stars, a significant find!

If he could figure it out, it would almost be equivalent to understanding the Ghost Emperor's abilities thoroughly, which would have huge benefits.

If one day the Ghost Emperor fully recovers and comes looking for trouble with Su Yu, only to find out that Su Yu knows his abilities inside out, what kind of situation would that be?

"Heh, if I decode your abilities, you might not be the one coming for me, but rather me going for you."

Su Yu chuckled internally.

The Ghost Emperor clearly harbored deep malice towards him, and Su Yu wasn't someone with a good temper.

Once he's confident enough, he'll venture into the Radiation Ghost City again and have a good showdown with him!

"Alright, let's go out now and see how their discussion on global development is coming along."

By now, enough time has passed that Su Yu thought Tie Long, Yang Lie, and Xie Yitian should have figured out some plans.

So it was time to emerge and officially start the global development!

The Ghost Emperor is about to fully awaken, it seems the situation is pressing, there's no delaying it.

With a thought, Su Yu left the Subspace Analyzer.

Exiting the internal environment of the Subspace Analyzer, Su Yu immediately released the quantumized state.

At the same time, in a large conference room in Mechanical City, everyone was in discussion when Tie Long suddenly paused, showing joy.

Others immediately noticed Tie Long's reaction and quickly asked, "What is it? Has Mr. Su Yu revived?"

Tie Long nodded, "He's alive! He's alive!"

Everyone breathed a sigh of relief.

Throughout this day, Tie Long had been updating everyone on Su Yu's status.

Originally, everyone had grown a bit numb to Su Yu's appearances of dying and reviving.

But this time, Mr. Su Yu seemed to be dead for quite a while, a few hours already.

This was because Su Yu had completely finished collecting data from the Lens, no longer needing to die and revive, maintaining the quantumized state throughout, making Tie Long sense that Su Yu was in a "death" state all along.

Initially, they were somewhat indifferent, but as time dragged on without news, they began to worry.

Could Mr. Su Yu be completely dead this time?

Now, seeing Tie Long confirm Su Yu's revival, they felt relieved.

"Looks like we were overthinking. Mr. Su Yu can stay dead however long he wants, no need to worry at all."

"Well, we've pretty much completed our discussions. Let's go report to Mr. Su Yu."

Everyone quickly got up and headed underground.

After a day of discussion, they had hashed out most of the details for global development.

Now that Su Yu was alive, they were just right to report.

These details, in fact, could have been sent remotely to Su Yu via Mechanical Spirits.

But they still wanted to see with their own eyes that Su Yu was truly fine, not entirely reassured just by Tie Long's perception.

The group made their way down and quickly reached Su Yu's location, which was the core melter of Mechanical City, now considered Su Yu's laboratory.

"Come in."

As soon as they approached, they heard Su Yu's familiar voice.

They hurried in.

And then saw...a strange machine?

Everyone was stunned, and then blinked to realize it was an illusion, there was no machine, only Mr. Su Yu.

"Are we too tired, what did we just see? Looked like a pile of scrap iron..."

They thought curiously.

"Have they started to notice something?"

Su Yu noticed their odd behavior, thinking to himself.

What they saw wasn't an illusion, but Su Yu conducting an experiment.

He was testing whether his current state could transform into the Lens and harness the power of this alien civilization.

Ordinarily, not being in a quantum state should mean he couldn't transform into the Lens.

But his experiment showed that wasn't the case.

His flesh couldn't transform.

But in that instant, his Spirit underwent a change.

This allowed him, on the spiritual level, to partially become the Lens.

So when they saw Su Yu just now, they had that illusion, thinking they saw a strange machine.

This was because Su Yu's Spirit was too strong, leaking some form of reality.

"Looks like the Spirit naturally has some quantum traits."

"Even in my flesh state, being able to use part of the Lens' power is a good thing."

Su Yu was excited about the successful experiment.

He looked at them, "I already know your purpose, hand over the chip."

They quickly handed a chip to Su Yu.

This chip contained their discussed results, the concrete plans for global development.

Su Yu took the chip and used his data abilities to read the information inside, examining it carefully.

The information in the chip was very detailed, with a global map showing various resources, population data, and detailed development plans.

Su Yu looked at these and nodded slightly.

It seemed the people of Mechanical City had done their jobs well.

Global development wouldn't just mean letting millions of people dig around aimlessly; they needed specific intelligence to know where resources were and how to develop them.

During this day, their primary task was collecting and summarizing various pieces of intelligence.

They came from cities all over the world, from north to south, and together managed to almost fully understand the global distribution of resources.

"Not bad!"

After reviewing, Su Yu nodded and praised a bit.

"However, there's a question: Why is there no marine resource data?"

Chapter 566: Bizarre Deep Sea, Origin of Nihilism!

Su Yu noticed that the resource map only showed land, but no oceans.

In truth, the ocean might hold even more resources than the land.

After all, given the extensive exploitation of the land over the years, there's probably not much left.

With little human activity, the ocean should have more resources and greater development value.

This is why Su Yu asked why there were no plans for ocean development.

With the power and technology of the Mechanical City, developing ocean resources shouldn't be difficult.

"The ocean?"

Hearing Su Yu's question, everyone exchanged glances and said:

"In the ocean, there are numerous Radiation Beasts. There's even Radiation Beasts above seven-star level..."

It seems they have considered ocean development, but after investigation, found the Radiation Beasts too numerous and powerful, so they decided to abandon it.

"Radiation Beasts above seven stars? You've investigated?"

Su Yu perked up at the news.

Radiation Beasts, generally, peak at six stars.

After all, seven stars require rituals, and Radiation Beasts, lacking wits and driven purely by instinct, have no means to perform a ritual.

In all the time that has passed, Su Yu has only ever seen one near-seven-star Radiation Beast, the Source Core Crystal Beast in the Radiation Land.

That creature is suspected to be one of the Ghost Emperor's means of resurrection, with his consciousness in control, thereby having a hope of breaking through to seven stars.

And that hope is just a hope; it hasn't actually broken through to seven stars.

Aside from that, Su Yu hasn't seen any seven-star or near-seven-star Radiation Beasts.

Previously, Su Yu had also suspected that seven-star or even eight-star Radiation Beasts might exist in the ocean.

But having never truly explored the ocean, he couldn't confirm it.

However, listening to Tie Long and the others now, did they really discover seven-star Radiation Beasts in the ocean recently?

"That's correct..."

"Mr. Su Yu, I was just about to report this to you. The situation in the ocean depths is not just ordinary Radiation Beasts, but extremely strange and possibly not fit for development right now."

Tie Long quickly replied.

Su Yu immediately turned to him, awaiting his explanation.

The others also shifted their gaze to Tie Long, frowning.

Because earlier, Tie Long had only mentioned many Radiation Beasts in the ocean, unsuited for development, but said nothing of anything strange.

What's going on?

"Yesterday, I went to the distant sea eight thousand kilometers away."

"Then, I dove underwater..."

Tie Long began his tale.

It turns out that during the discussions yesterday, someone also brought up the sea resources.

Thus, they proposed sending Tie Long to explore.

Because Tie Long passed Zhang Chenfeng's creation trial and has the Galaxy Battle Armor, he can break through the air at ten times the speed of sound, his mobility second only to Su Yu.

So, the task of exploring the ocean was given to him.

He didn't decline, setting out immediately and soon reaching the distant sea.

The distant sea showed no signs of any human activity, just a vast expanse of water.

As soon as Tie Long dove underwater, he attracted a large number of Radiation Beasts.

These Radiation Beasts were completely different from the land-based ones, mainly aquatic creatures mutated under the pollution of Ghost Energy.

They were numerous, and their strength was formidable, many were at the peak of six stars.

Luckily, with Tie Long's eight-star strength and the Galaxy Battle Armor, even such a number of six-star Radiation Beasts couldn't threaten him immediately.

Tie Long continued to dive until he reached a depth of over thousands of meters underwater.

At this depth, there was no light, only complete darkness.

Not only that, but the water here was also highly polluted, containing strong Ghost Energy, hindering all detection methods.

Even with his Spiritual Vision and the various visual modes of the Galaxy Battle Armor, Tie Long couldn't see very far.

Carefully, he continued to dive another one to two hundred meters, suddenly encountering a seven-star Radiation Beast!

It was an octopus, incredibly huge, with a body length of dozens of meters, covered entirely with tentacles and eyes.

It formed a network with its tentacles, attempting to capture Tie Long.

After a fierce battle, relying on his eight-star strength, Tie Long successfully defeated the octopus and was about to kill it.

A seven-star Radiation Beast, sure to be a treasure trove.

However, seeing the unfavorable situation, the octopus immediately released Ghost Energy-filled ink, obscuring Tie Long's sight completely, then made its escape.

Tie Long was helpless; not wanting to return empty-handed, he dived once more.

Gradually, he reached two thousand meters underwater...

Here, Tie Long unexpectedly shivered.

It seemed that he encountered something truly astonishing at two thousand meters underwater.

"Two thousand meters underwater, it's extremely eerie."

"The water there contains large amounts of highly polluted Ghost Energy, seemingly no longer normal matter, but some kind of distorted energy mass."

"The environment there is thus extremely warped."

"I even had the illusion that I was not diving, but entering Subspace."

"In that environment, an overwhelming sense of deathly silence and loneliness washed over me."

"All my emotions seemed about to freeze, turning me into a living dead."

"At that moment, with some sanity remaining, I quickly ascended, trying to escape that dreadful state."

"In that instant of ascent, I vaguely saw numerous Radiation Beasts lurking deeper underwater."

"Each one more powerful than the seven-star octopus..."

"The number was... terrifying! Whether they were hundreds, thousands, or tens of thousands?!"

"If they were provoked, I would surely die, and if they reached land, no living creature on land would survive..."

Chapter 567: Bizarre Deep Sea, Origin of Nihilicity! _2

"Fortunately, those Radiation Beasts seem to have been affected by the eerie environment there and have fallen into slumber, unable to move. Otherwise, I definitely wouldn't have been able to return."

"Mr. Su Yu. This matter is too terrifying. I've been wanting to report to you, but unfortunately, you haven't had the time..."

Tie Long spoke with lingering fear as he recounted these events.

Though he was powerful and bold,

he was still somewhat frightened upon witnessing so many Seven-star Radiation Beasts.

Hundreds or even thousands of Radiation Beasts, perhaps far more.

Anyone who saw this would be scared.

As Tie Long narrated, he used his abilities to project the images he had seen.

Su Yu watched the images Tie Long projected, lost in thought.

In the images released by Tie Long, there were countless Radiation Beasts under the deep sea, causing one's scalp to tingle.

If it was truly as Tie Long said, that all those Radiation Beasts were Seven-star, or even stronger,

it was simply too unbelievable.

Where did so many Radiation Beasts above Seven-star come from?

Su Yu fell into contemplation, while everyone else was shocked.

"Tie Long, why didn't you mention this earlier?"

"Didn't you previously say there were only a few Seven-star octopuses in the ocean, and too many Six-star ones, making it hard to develop?"

"How could there be so many Radiation Beasts above Seven-star, how is that possible?"

"Moreover, I've also explored the underwater realm before, where could it be so outrageous..."

They all had expressions of disbelief.

It seemed Tie Long had concealed it from them before, and only now did they learn of this situation.

Tang Xiaomei had also explored the deep sea but hadn't encountered the bizarre events that Tie Long described, so she was somewhat skeptical.

Xiao Shengyin and Shao Lan hesitated to speak; having lived by the sea before, they probably also explored the ocean and hence did not fully believe Tie Long's words.

Upon hearing this, Tie Long nonchalantly said, "What's the use of telling you? It would only cause a panic, can you guys even deal with these Radiation Beasts?"

"It's only valuable to report to Mr. Su Yu."

"As for why you didn't discover it earlier, how would I know? Anyway, I wouldn't lie to Mr. Su Yu, believe it or not..."

Upon hearing this, everyone fell silent.

What Tie Long said was harsh, but it made sense.

This matter is too frightening. Telling them earlier wouldn't help and would only cause panic.

Only by telling Su Yu could a solution possibly be found.

Moreover, as a believer of Su Yu, Tie Long couldn't possibly make up lies.

So, is this matter true?

Are there really vast numbers of Seven-star Radiation Beasts under the sea?

They all turned their hopeful gaze to Su Yu, wanting to hear an explanation from him.

At this moment, Su Yu too was somewhat helpless.

He originally thought Tie Long was just exploring the ocean and found a few Seven-star Radiation Beasts.

Who would have expected such a large-scale event to emerge!

Hundreds to thousands of Radiation Beasts above Seven-star, submerged in the deep sea!

Even if Tie Long only explored that specific sea area, what about the depths of other sea regions? Could there also be vast numbers of Seven-star Radiation Beasts lurking?

This is practically a terrifying doomsday army!

Su Yu wanted to develop resources and build a Seven-star army, but that was still a distant goal.

And now it turns out that there is indeed an army of Seven-star Radiation Beasts in the deep sea, of unknown origin.

Everyone is now counting on Su Yu to come up with a solution, yet he has no idea where these things came from, so what could he possibly do?

However, as the only leader in everyone's eyes, he couldn't show weakness.

So, Su Yu ignored everyone and continued to ponder.

"Radiation Beasts... Ritual..."

Su Yu was contemplating why there were so many Seven-star Radiation Beasts. It was almost like mass production.

"There is only one possibility, a remnant from ten thousand years ago!"

Su Yu recalled the time from ten thousand years ago when the Human Empire still existed.

At that time, Subspace was more stable, and advancing to Seven-star level was much easier than now.

The Empire could even mass-produce Seven-star Transcendents.

If the Empire could mass-produce Seven-star Transcendents, could other powerful forces, like the Brutal Evil God, mass-produce Seven-star Radiation Beasts?

"This way, it makes sense!"

"The Seven-star and above Radiation Beasts in the deep sea are all remnants from ten thousand years ago, minions of the Brutal Evil God!"

Su Yu quickly came up with a line of thought and figured out the origins of these Radiation Beasts.

On this planet, besides the Brutal Evil God,

there isn't any other presence that could have created so many Seven-star Radiation Beasts, right?

"However, Tang Xiaomei said she also explored the deep sea before without discovering the Radiation Beasts."

"Is it a matter of luck that she didn't find them, or were these Radiation Beasts invisible before and only appeared now?"

"Could it be that these Radiation Beasts have been asleep until now and are finally about to wake up?"

"What major event could have prompted their appearance? Zhang Chenfeng's creations also behaved unusually before."

"Is it possible that the true body of the Brutal Evil God is about to break free?"

Su Yu thought, as speculations rose one after another in his mind.

Previously, Zhang Chenfeng's creations suddenly gave him the green light.

With trials and gifts, Su Yu speculated that a major event was about to unfold, causing even Zhang Chenfeng's creations to not sit still.

Shortly before, Su Yu faced the revived Ghost Emperor.

Now, Tie Long discovered a large number of Radiation Beasts in the deep sea.

All of this filled Su Yu with a feeling of "a storm is brewing."

All sorts of creatures and forces are about to revealed themselves.

Unfortunately, although Su Yu knew a big event was about to happen, he had no idea what the situation was.

He could only guess that the Brutal Evil God was about to break free.

However, if that was truly the case, Zhang Chenfeng's creations would tell him directly, so why not speak plainly?

Su Yu couldn't figure it out at the moment.

"Tie Long said earlier that in the deep sea, he felt emotions of deathly silence and coldness, as if he would become an unconscious corpse."

"This description sounds somewhat familiar?"

Su Yu remembered Tie Long's previous words.

According to Tie Long's description, the deathly silent power in the deep sea resembled Su Yu's Ghost Hidden Blade and Power of Nihilism!

"Ghost Hidden Blade, Power of Nihilism, Tie Long..."

Su Yu pondered for a moment, suddenly struck by inspiration, and thought of another possibility.

Tie Long's Galaxy Battle Armor possesses the power of loyalty and betrayal.

This power is said to come from a powerful entity caught by the Human Empire in Subspace, using the power of that Subspace entity as the core force of the Galaxy Warrior's [Betrayal Legion].

Su Yu now suspects that his Ghost Hidden Blade power might also be based on this principle?

Could it be that the Human Empire back then also captured an entity known as "Nihilism" deep in Subspace?

This "Nihilism" is the origin of the Ghost Hidden Blade's power!

Back then, Zhang Chenfeng fought a brutal battle with the Brutal Evil God.

The Brutal Evil God's minions, including a vast number of Seven-star Radiation Beast subordinates, were very troublesome.

So Zhang Chenfeng used this "Nihilism" to seal those brutal Radiation Beast subordinates in the deep sea.

The Power of Nihilism was extremely strong, and though terrifying, those Radiation Beasts could only submissively sleep for ten thousand years under its erosion.

It is even possible that the true body of the Brutal Evil God was also sealed under this Power of Nihilism.

But now, under some change, those Radiation Beasts and the Brutal Evil God are finally about to break free from the erosion of the Power of Nihilism and awaken?

"So, does this mean that the 'Nihilism' is coming into existence along with those Radiation Beasts?"

"If I can obtain the core power of that 'Nihilism', my Ghost Hidden Blade..."

Su Yu's heart warmed at this thought.

His Ghost Hidden Blade had always been one of his core powers, one of the biggest confidences in combating the Evil God.

This profession is exceptionally powerful in dealing with various spiritual contaminations and Evil God's erosions.

Su Yu's Ghost Hidden Blade is only at eight stars, with subsequent ranks not yet unlocked, leaving much potential.

Now that Su Yu knows that the origin of the Ghost Hidden Blade's power is likely to be revealed, how could he not be stirred?

If he could obtain it, perhaps he could push the Ghost Hidden Blade's power to an unimaginable level!

Chapter 568: New Features of Mechanical City! Implementing Energy Currency!

"After my Ghost Hidden Blade upgraded, it can enter a nihilism space."

"I've never known how that nihility space came to be."

"Could it be related to that entity 'Nihility'? Could it be its subspace domain?"

Su Yu pondered privately in his heart.

He had always used that nihility space as a storage space, storing many things there.

However, that space was not created by him; it suddenly appeared after his Ghost Hidden Blade evolved, and after the Evil God Origin emerged.

To this day, Su Yu still didn't know its principles or origins.

Now it seems, perhaps it is because his Ghost Hidden Blade is powerful enough that it connected with the subspace entity "Nihility."

Perhaps that nihility space is the subspace domain of "Nihility."

And now, with the impending great change, this "Nihility" lurking in the deep sea is also gradually surfacing.

Along with it, those Radiation Beasts sealed by it are also emerging...

"Mr. Su Yu?"

The crowd saw Su Yu deep in thought, silent for a long time, and couldn't help but speak.

They worried, was this matter so difficult that even Mr. Su Yu had no solution?

The sheer number of Radiation Beasts above seven stars was truly terrifying.

The Transcendent Union, when combined, had just that many Seven-star Transcendents, which seemed almost laughable compared to the vast number of Radiation Beasts in the deep sea.

If those Radiation Beasts awaken, it would truly be an apocalypse!

At this moment, Su Yu came back to his senses, looked up at the crowd, and suddenly unleashed a wave of power toward them.

It was the Power of Nihilism; Su Yu released his Power of Nihilism.

This power was invisible and formless, and extremely fast, so much so that the crowd had no time to react before they were struck by it.

This power was released then retracted, yet the crowd felt that in that instant, their emotions and thoughts had come to a standstill.

After a moment, the crowd gradually recovered from that strange state.

They were sluggish in thought, at a loss for a while, unclear why Su Yu had suddenly attacked them.

At this moment, Tie Long suddenly showed surprise: "Yes! That's it!"

"It's this power! Incomparably deathly silent, nihilism!"

"Previously, I was a bit unsure, but now it seems, indeed it's the same power as Mr. Su Yu's..."

Tie Long recognized it; the Power of Nihilism that Su Yu just emitted was identical to the power he encountered in the deep sea!

Tie Long had known Su Yu for quite a while and had seen him fight using the Power of Nihilicity. Previously, he had some doubts whether Su Yu's power was the same as the one in the sea.

However, earlier Tie Long was somewhat uncertain, and now having personally experienced the Power of Nihilicity again, he finally confirmed it! The power in the deep sea and Su Yu's power are exactly the same!

Therefore Tie Long was utterly surprised!

He couldn't resist speculating whether the numerous Radiation Beasts in the sea had something to do with Su Yu. Could it be...

"So it is..."

Su Yu saw Tie Long speak and nodded slightly as well.

It seems that Su Yu's previous hypothesis was mostly correct; the power in the deep sea was indeed the Power of Nihilicity.

And upon hearing Tie Long's words, the others were still a bit confused, but after a moment, they all reacted, looking at Su Yu with immense surprise.

"What? The power in the deep sea is actually Mr. Su Yu's power?"

"So many Radiation Beasts, could they be sealed there by Mr. Su Yu?"

"Is Mr. Su Yu an ancient powerful figure resurrected, meaning... his power is hidden in the sea, waiting for him to reclaim it..."

"Could those Radiation Beasts have been sealed by Mr. Su Yu in ancient times?"

"No wonder Mr. Su Yu inquired about the ocean from the start; turns out he had plans all along!"

They were indeed imaginative, quickly concluding that those Radiation Beasts were sealed in the sea by Su Yu in ancient times.

Tie Long also thought along these lines, though he didn't speak it out loud.

Su Yu listened to the whispers among the crowd, smiled slightly to himself, and instead of explaining, he spoke:

"You don't need to worry too much, those Radiation Beasts in the sea, barring any unexpected changes, are no different from corpses—no thoughts, no consciousness, they will not awaken."

Su Yu understood that with the overbearing power of nihilism, those Radiation Beasts, sealed for so many years, had long since become "Plant Beasts."

Even if they left the deep-sea environment, they probably wouldn't wake up, so there's no need to worry.

Hearing this, everyone suddenly felt greatly assured in their hearts.

It seems Mr. Su Yu has full confidence, which was more than anything they could hope for.

"However, the power in the sea is still extremely dangerous, and even if all those Radiation Beasts awoke, they wouldn't compare to that power."

"When you develop resources, don't enter the sea."

Su Yu advised again.

Those Radiation Beasts posed no threat, but what about the subspace entity "Nihilism"?

This entity, regarded by the Human Empire as the origin of the Ghost Hidden Blade's power, is actually quite similar to the brutal split mind within the Brutal Core.

Back when Su Yu first obtained the brutal split mind, this entity was always thinking of revolt.

It was only later that Su Yu, using the Power of Nihilism, brainwashed the brutal split mind into a fool that it finally settled down.

Su Yu did not know the situation of "Nihilism."

Does it still possess self-awareness? Would it also seek rebellion?

After so many years, is the Empire's ancient seal on "Nihilism" still secure?

If "Nihilism" wanted to break free from its seal, it would be a terrifying adversary, possibly not far from the menace of the Brutal Evil God itself.

Chapter 569: New Features of Mechanical City! Implementing Energy Coin!_2

"Alas, this planet is truly full of dangers, whether it's the land, the ocean, the clouds, high-altitude orbit, or subspace..."

Su Yu couldn't help but sigh at this thought.

The stronger one's power, the more one knows, and the more one realizes, there is no safe place on this planet; danger lurks everywhere.

But it's not surprising, for essentially, this planet is a war-torn world or rather... a battlefield!

The war has continued for thousands of years, and it still hasn't ended.

On the battlefield, naturally, there is no safe place!

"As a War Mechanic, I wonder when I will be able to dominate a battlefield of this planet's scale?"

Su Yu secretly sighed in his heart.

As a War Mechanic, he possesses the Power of Dominator, capable of controlling the battlefield.

But a battlefield on the level of this planet is somewhat beyond his ability.

If one day, he can expand the powers of a War Mechanic to encompass the entire planet, then he would truly be a Dominator of the battlefield.

Upon hearing Su Yu's reminder, everyone was immediately alert and quickly responded, "Yes, Mr. Su Yu!"

Initially, they thought since the deep sea was within Mr. Su Yu's power, there was nothing to worry about.

But why did Mr. Su Yu advise them to stay away from the ocean and not to develop it?

Could it be that...

After all these years, Mr. Su Yu's lost powers have actually developed self-awareness and are planning to rebel?

Or were they occupied by some evil being?

Everyone immediately imagined an elaborate drama.

Su Yu further added, "Of course, it's not about abandoning the resources in the ocean."

"I need to explore first and confirm there is no danger."

"Haha, so many seven-star Radiation Beasts are the best resources; they cannot be wasted."

In Su Yu's view, the combined resources around the globe might not compare to those Radiation Beasts in the deep sea.

They are indeed rare beyond measure, seven-star and above Radiation Beasts!

The materials from their bodies are treasures, high-end goods.

Su Yu's plan to forge a seven-star mechanical army would truly rely on those Radiation Beasts.

They are "treasures all over."

Additionally, to uncover the secrets of "Nihility," Su Yu must explore the deep sea.

However, this task can only be undertaken by Su Yu himself; others without the Power of Nihility for protection would become fools if they stayed in the deep sea for too long.

"Yes, Mr. Su Yu, we understand!"

Upon hearing that Su Yu would personally explore the deep sea, everyone was instantly reinvigorated! It seems Mr. Su Yu would go to reclaim his lost powers!

There will surely be a spectacular battle!

It's just too bad they probably won't be able to witness it...

Next, Su Yu looked at the resource map and offered several opinions, making some arrangements.

For instance, everyone wanted to deploy personnel globally to establish resource development bases.

But Su Yu directly said there's no need for such trouble; leave it to the Mechanical City.

Su Yu informed them that the Mechanical City can split itself.

Each split body becomes a new small Mechanical City.

Capable of flying freely, traveling worldwide, it can serve as a development base!

Once the local resources are developed, it can directly break through and fly to another location.

These split Mechanical Cities can even absorb resources and "grow" into new full Mechanical Cities.

"What? The Mechanical City can split?"

The crowd listened in disbelief.

They had never heard that the Mechanical City had such a function!

This powerful Miracle City can even "give birth"?

Even the Mechanical City itself expressed puzzlement, "Master, do I have such a function?"

Su Yu smiled gently, "Not yet, but you can develop it yourself."

Actually, Su Yu had just thought of this.

The initial Design Blueprint of the Mechanical City didn't include the splitting function.

However, the Mechanical City had evolved significantly from the original blueprint designed by Su Yu.

Many functions Su Yu hadn't designed were developed by the city itself.

For example, the "mouth" it uses to devour resources was evolved by itself.

The designs from Su Yu back then weren't so domineering.

Simply put, the current Mechanical City is a powerful Transcendent Being, no longer confined to the original design blueprint.

It can design its own functions and continue to evolve.

"Ah? I can develop it myself?"

The Mechanical City's response seemed surprised but quickly turned to excitement, answering:

"Yes, Master! I definitely will not disappoint you and will develop the splitting function soon!"

It mused, previously needing to fly far to feed, but with the splitting function, it would be much more convenient.

Moreover, its body had reached saturation, with limited "appetite."

By splitting more avatars, it could "eat" more!

That would be delightful!

This fellow, although with a massive body, was newly born and was primarily focused on "eating"...

In fact, without Su Yu's reminder today, it might have developed the splitting function after a certain period.

"Very good."

Su Yu nodded in satisfaction.

Having a self-evolving Mechanical Apostle is indeed convenient.

For any new function, just a command is needed, letting it develop by itself, saving Su Yu from unnecessary effort.

Everyone else, having heard, also showed excitement.

Actually, they had sensed earlier that the scale of the Mechanical City seemed a bit small.

Now, housing millions of people, it's nearing its limit.

If, in the future, the global population reaches tens of millions, wouldn't it be overcrowded?

Hence, they proposed the plan for establishing resource bases globally.

But unexpectedly, the Mechanical City can split?

"Then in the future, wouldn't..."

The crowd couldn't help but recall the creations of Zhang Chenfeng in the sky.

In their view, the Mechanical City may not necessarily be inferior to those creations.

It's just that the number of Mechanical Cities is too small, with only one city.

If it can keep splitting, then someday, it could rival those creations of Zhang Chenfeng?

If hundreds or thousands of Mechanical Cities ascend at once, what a magnificent scene...

They had to admit, the crowd dares to dream.

Su Yu had not yet considered creating hundreds or thousands of Mechanical Cities.

Where would so many resources come from?

But it didn't stop the crowd from imagining.

After handling this matter, Su Yu brought up the next topic.

He took out the energy currency and passed it along for everyone to see.

Then he explained:

"This is the energy currently used by the Mechanical City and will be its currency in the future."

"Take a look."

Su Yu had been busy with various studies lately, and only now had the time to introduce this new currency.

Then, Su Yu demonstrated to everyone how to use the energy currency.

This item contains extremely pure energy, with properties of three-state transformation, allowing free conversion between energy, matter, and data.

When transformed into energy, it can be used for battle, driving Mechanical Creations, and Spiritual Energy cultivation.

When transformed into matter, with the ability of data materialization, it can become various items, even Mechanical Creations.

When turned into data, it can be directly stored in an Intelligent Chip, convenient for carrying or even transmitting wirelessly via networks.

The various magical conveniences of this new currency left everyone in awe.

Even strong individuals like Xiao Shengyin and Tie Long of seven-star and eight-star levels were no exceptions.

When had they witnessed something so miraculous?

This thing is a treasure indeed!

Not to mention, according to Su Yu, everyone will use this treasure as currency?

Everyone will have it?

"It's said that thousands of years ago, when the Human Empire still existed, a very magical Transcendent currency was used, which was not just currency but also possessed magical power!"

"However, it was always a legend; we have never seen it."

"Could it be that this is that legendary currency of the past?"

"Now, Mr. Su Yu has recreated it? And will be promoting it on a large scale?"

The crowd looked at the energy currency in their hands, testing its three-state transformation, and the more they tried, the more astonished they became.

Some even recalled the legendary currency of the Human Empire thousands of years ago! Could it be this treasure?

Chapter 570: Empire Currency? The Revival of Empire's Glory? Temporary Battle Armor System!

"The currency of the Human Empire from ten thousand years ago?"

Su Yu felt a stir in his heart upon hearing the discussions around him.

This was the first time he had heard such a statement.

He had heard quite a few legends about the powerful Human Empire from millennia ago.

But what currency did the Human Empire use? He didn't know, and this was the first time he'd heard of it.

After all, Su Yu was still a young man, and his experiences couldn't compare to those of the older folks.

Moreover, he was quite pragmatic. Such inconsequential legends wouldn't catch his attention before; he focused only on mechanical technology, not on currency legends.

What relation did the currency of the Human Empire from ten thousand years ago have with him?

But now it seemed that the currency of the Human Empire wasn't trivial at all; it was actually very important!

"The Human Empire, ruling over the Galaxy ten thousand years ago, indeed needed a currency that could traverse the universe."

"Such a currency needed to have sufficient value on any planet and under any circumstances."

"An energy coin capable of three-state conversion, containing powerful Spiritual Energy, would be very suitable."

"And my energy coin, created by Zhang Chenfeng, was gifted to me. Could it really be the currency of the Human Empire?"

"That said, the two Energy Crystals given by Zhang Chenfeng could actually be 'two dollars'? No, those two Energy Crystals are big, probably worth two million or even twenty million."

"The last trial was essentially throwing money at people..."

Su Yu pondered silently.

Thinking this way, although everyone was making conjectures, they seemed to have hit the mark.

The energy coin created by Su Yu could very well be the currency of the Empire back then.

The form might be different, but the essence should be the same.

At this time, after the discussion, the crowd, seeing that Su Yu remained silent, couldn't help but direct their inquisitive gazes toward him:

"Mr. Su Yu, the origin of this energy coin, could it be..."

They wanted to verify with Su Yu.

Was this energy coin really the currency of the Human Empire from ten thousand years ago?

Seeing this, Su Yu nodded slightly and said, "This energy coin is indeed related to the Human Empire of the past. As to whether it's the Empire's currency, if you think it is, then it is."

Su Yu didn't give a definite answer, in case it was later discovered that the Human Empire used another currency, which would be awkward.

So he answered vaguely.

However, Su Yu was telling the truth; after all, the energy coin was a creation of Zhang Chenfeng's, wasn't it related to the Human Empire?

Hearing this, the crowd assumed Su Yu had already acknowledged it, and they immediately cheered.

To them, the matter of the energy coin being the currency of the Human Empire from ten thousand years ago held significant meaning.

"Mr. Su Yu is indeed a resurrected ancient powerhouse, able to even restore the currency of the Human Empire!"

"Mr. Su Yu has not only revived himself but also the glory of the Human Empire from ten thousand years ago!"

"He must have been a major figure in the Human Empire back then..."

The crowd thought excitedly in their hearts.

Many of them had grown up hearing the legends of the Human Empire from ten thousand years ago, with a deep longing for that glorious civilization of the Galaxy.

However, born on Ruins Star, they could only touch the glory of the Empire in stories and dreams.

But now, Su Yu had tangibly brought a part of the Empire's glory before them.

Whether it was the miraculous Mechanical City or these energy coins, they were wonders they had previously only seen in stories.

To them, Su Yu, the ancient resurrected powerhouse, was reviving the ancient glorious Empire on this planet!

"Well, as long as you're happy..."

This excitement among the people was something even Su Yu hadn't anticipated.

But since it wasn't a bad thing, Su Yu let them be.

Subsequently, Su Yu proposed some modifications and suggestions regarding the global development plan.

For instance, having Xie Yitian assist the Mechanical Spirit in "Coin Casting," since Yitian's Data Materialization ability was greatly beneficial for energy coin production.

For instance, suggesting a "Temporary Battle Armor" plan.

These and various other instructions were given, and the crowd listened respectfully, growing more impressed.

Compared to Su Yu's plan, their day-long discussion on the global development seemed overly simplistic.

It wasn't that they were foolish, but rather Su Yu's plan involved many ingenious technologies beyond their imagination.

Take the energy coin or the division of Mechanical City, for example; how could they have anticipated these beforehand?

After explaining everything, Su Yu let everyone adjourn and proceed to formally implement the plan.

The crowd immediately dispersed and got busy.

Soon, millions of residents in Mechanical City learned the news and were instantly excited.

They had long heard about the upcoming global development and were eager to participate in this rare grand event in history.

However, they had been anxiously waiting for the news.

Upon hearing that it could begin, cheers erupted, reaching the sky.

Hundreds of thousands cheered in unison, nearly dispersing the clouds above.

However, contrary to their expectations, they weren't immediately sent to the surface for mining.

The first order from the upper echelons of Mechanical City was to distribute energy coins to them.

The distribution process involved remotely transmitting the energy coins directly to their personal terminals.

These residents, all from major cities, each had an information terminal.
