

Infinite 581

Chapter 581: The Strange State of Mechanical Creations! The Secret of the New Recruit Navigator! - Part 2

Even the Assault Tanks, he brought two of them.

Additionally, he also brought along a lot of ordinary food, water, compressed air, metals, various materials, and energy coins.

Because Su Yu was unsure what he would encounter when going to the Giant God Soldiers Corps, he made thorough preparations.

Although Su Yu is now very powerful and has reached an eight-star realm, he still has basic physiological needs, such as breathing and eating.

The demands are minimal, but they are not nonexistent.

If he were trapped unexpectedly somewhere, these ordinary supplies would be life-saving.

Looking at it now, the preparations were correct.

In this Manifestation Space, these items from the real world are the most precious.

Because it's very likely that there's no way out!

After all, if one could freely come and go, supplies here wouldn't be so scarce.

This Manifestation Space is estimated to be impossible to escape by normal means.

Flying around might only lead to the "boundary."

Even flying back along the original route would probably be useless.

Which means that Su Yu is already trapped here.

"I wonder if there's a way out on this thing..."

After checking the supplies, Su Yu turned his hand, taking out the Giant God Soldiers Corps' New Recruit Navigation Disk again.

He tried to activate it with Spiritual Energy as he did before.

But this time, it didn't respond at all.

It seemed like after navigating Su Yu to this place, it had completed its task and was no longer useful.

"It looks like relying on it to navigate out is impossible for now."

Su Yu mused to himself.

However, he did not give up and tried to analyze this device with his Mechanic skills.

Soon, he stowed the Navigation Disk away again.

The Navigation Disk isn't complex, but it possesses extremely sophisticated encryption technology.

Su Yu couldn't decipher it immediately.

In fact, Su Yu had obtained this Disk a long time ago, but he still hasn't fully understood its structure and principles.

After all, it's an Empire creation with imperial encryption technology; Su Yu's struggle to decrypt it is understandable.

This is different from the Subspace Analyzer.

The Subspace Analyzer's encryption relies on quantum effects, which Su Yu can bypass by quantumizing himself.

The encryption of this Navigation Disk is entirely different, very profound, making Su Yu feel puzzled.

However, it wasn't entirely fruitless for Su Yu.

He just obtained a complex coordinate route algorithm from the surface structure of the Disk.

Su Yu went through a confusing route when entering this space.

The algorithm he just got is the calculation process of that journey.

That route doesn't seem fixed but is calculated based on some complex rules.

It changes all the time.

If Su Yu wants to get out, he must rely on himself to calculate a new route.

He hasn't figured out this algorithm yet, but at least there's hope now, and he can slowly work it out.

"To enter and exit this Manifestation Space, specific algorithms are required, with a specific route.

The algorithm shouldn't require high computing power, but it's somewhat profound and needs to be slowly interpreted..."

Having obtained this algorithm, Su Yu felt slightly relieved.

This algorithm is the key to getting out.

With this trump card, Su Yu's confidence increased significantly.

At this moment, the Galaxy Battle Armor beside him asked: "How did you, Mr. Su Yu, get this Navigation Device?"

Hearing this, Su Yu turned to look at it, pondered for a moment, and said: "I picked it up."

"When I first found it, it said I was a new recruit for the Giant God Soldiers Corps and needed to report to the camp."

"So, I came, and now you see this situation."

Su Yu spoke the truth; he really just picked up this Navigation Device.

But the Galaxy Battle Armor didn't believe it at all: "How is that possible!"

"These new recruit Navigation Devices for the Giant God Soldiers Corps are made by the Empire, with a strong identity-binding feature; it wouldn't just belong to whoever finds it!"

Su Yu nodded in agreement upon hearing this; the Galaxy Battle Armor's words made sense.

It's illogical for the new recruit Navigation Device of the Giant God Soldiers Corps to recognize an owner so easily.

Could anyone who finds it report to the Giant God Soldier Camp?

Even in the Mechanical City, personal information terminals in everyone's hands have facial recognition and biological information detection functions.

It wouldn't just belong to whoever picks it up.

So could the Giant God Soldiers Corps' new recruit Navigation Device really be that haphazard?

"I really just picked it up; I'm telling the truth."

"Maybe I'm inherently the owner of this new recruit Navigation Device, and picking it up was just reclaiming my belonging."

Su Yu chuckled.

The Galaxy Battle Armor was silent for a moment, then said: "A new recruit? Ordinary new recruits don't possess such abilities as Mr. Su Yu."

"Unless your identity from a millennium ago isn't a mere new recruit but held some kind of high authority. This new recruit Navigation Device recognized your authority and thus acknowledged you as its master."

"No wonder, since Mr. Su Yu is a resurrected ancient powerhouse and holds high authority, it's normal."

Listening to this, Su Yu became interested: "High authority being?"

He knew very well that he was not any resurrected ancient powerhouse, so where would such high authority come from?

But the Navigation Device for the Giant God Soldiers Corps somehow came into his hands and instantly recognized him as its owner, urging him to quickly report to the camp.

Even afterward, Zhang Chenfeng's creation acknowledged his identity.

What on earth was happening?

"Could this Navigation Device be broken?"

Su Yu speculated to himself.

This possibility was quite significant.

Although Empire technology is powerful, it doesn't ensure absolute immunity to malfunctions or bugs.

The new recruit Navigation Device might have malfunctioned, incorrectly identifying Su Yu, which is normal.

And Zhang Chenfeng's creation simply went along with it, affirming this identity.

However, besides the possibility of a malfunction, Su Yu thought of another possibility.

That is...

"Maybe I really am some resurrected ancient powerhouse with high authority from ancient times?"

This notion seemed far-fetched.

After all, wouldn't Su Yu himself know if he were any resurrected ancient powerhouse?

In the past, Su Yu would never have entertained such thoughts.

But now Su Yu knows.

Powerful Transcendents can master the Power of Time!

Su Yu pondered that perhaps if he becomes strong enough in the future, truly mastering the Power of Time, he could return to the past a millennium ago and accomplish various great deeds...

If that were so, his identity as a resurrected ancient powerhouse would indeed be justified.

No longer pretending.

Perhaps this Giant God Soldiers Corps' Navigation Device was intentionally left by Su Yu from the future for himself a millennium later!

So upon finding it, it instantly recognized its owner because it was originally his own belonging!

"Tsk tsk, the thought of it is incredible."

"But it's too far-fetched, like making up a story."

Su Yu's mind expanded; in a short time, he thought of a lot of improbable scenarios.

Although this theory seemed to have some truth to it.

But Su Yu knew, it was almost impossible.

He had already witnessed the mysteriousness of time and the Power of Destiny, and it wasn't as simple as he thought.

Even if he were that powerful in the future to travel back in time.

The real scenario might far exceed his current imagination.

So all this thinking now is just storytelling, far from the truth.

Nevertheless, Su Yu kept this speculation in mind for future verification.

"Or perhaps, Mr. Su Yu, your origin as a new recruit is extraordinary..."

This time, the Galaxy Battle Armor spoke again.

Hearing this, Su Yu was intrigued and asked curiously: "Speaking of which, where do the new recruits of the Giant God Soldiers Corps come from?"

The Galaxy Battle Armor paused and then said: "Since navigation is needed, they certainly aren't residents of Azure Star."

"So, they come from the Universe!"

Chapter 582: The Mysterious Origins of the New Recruit! Undercover Plan!

"Are you from the outer universe?"

Su Yu was slightly startled, and pursued further.

The Galaxy Battle Armor explained, "That's right!"

"As far as I know, new recruits for the Giant God Soldiers are mostly selected from the troops on this planet."

"During the selection process, they undergo various training at the Giant God Soldier Camp. New recruits already at the camp wouldn't need any navigation devices, would they?"

"Only new recruits sent from other stars would need such a thing."

Although the Galaxy Battle Armor did not belong to the Giant God Soldier Corps, as an imperial unit, it understood quite a bit about them.

Upon hearing this, Su Yu pondered for a moment and then nodded, saying, "So, that new recruit must have just arrived at Azure Star and immediately faced a major crisis. Perhaps they've already perished."

"A thousand years later, I happen to find this navigation device, and it mistook me for its owner, sending me here to report."

He imagined that a thousand years ago, a new recruit from the Giant God Soldier Corps had just arrived at Azure Star on some spacecraft, only to encounter a Subspace upheaval and an attack from the Brutal Evil God...

The Galaxy Battle Armor replied, "That's very likely."

"However, for such a new recruit to be sent from another star, their identity and strength must be extraordinary. Perhaps they even came with orders from high-ranking officials!"

"Mr. Su Yu, I suspect you are that new recruit from another star!"

The Galaxy Battle Armor said so much just to convey this one message: Su Yu is that mysterious new recruit from another star!

Su Yu heard it and smiled.

Now his identity was becoming increasingly complicated.

From some ancient powerhouse, he had now become a mysterious new recruit from outer space.

However, Su Yu wouldn't explain. It's just as well if the Galaxy Battle Armor chooses to misunderstand, given its loyalty to the Empire, wouldn't it bow down to a mysterious and noble recruit from another star?

The Galaxy Battle Armor was probably somewhat unsure; otherwise, it would have acknowledged its master by now.

"A new recruit from another star, along with a Subspace Analyzer that seems to be the creation of alien civilization."

"Things are getting more and more interesting..."

"I wonder if there are any other visitors from other stars on this planet?"

Su Yu mused to himself.

Having never left the atmosphere in his lifetime, he was immensely curious about anything from other stars.

This curiosity was also the driving force for him to continually strengthen himself.

He wanted to break through the blockade and travel to the stars as soon as possible to witness more sights.

However, he still didn't know how long it would take to achieve this goal.

For now, encountering these things from other stars was truly a delightful surprise.

"Turns out picking up this thing was really fortuitous..."

Su Yu chuckled lightly and carefully put away the New Recruit Navigator.

This item seemed more important than he had imagined.

Su Yu even suspected that the coordinate algorithms within the navigator contained some secret.

According to the Galaxy Battle Armor, this location, which is now the Giant God Soldier Camp, has transformed into a Manifestation Space, completely different from the camp of a thousand years ago.

The place had changed, becoming something other than real space.

Yet strangely, this navigation device could still navigate Su Yu inside.

What principle was at work here?

The algorithm he obtained from the navigation device must hold some profound secrets!

"Mr. Su Yu, what's your plan next?"

The Galaxy Battle Armor asked again.

It could tell that Su Yu had observed enough of this city.

Now it was time to take further action.

Su Yu nodded, "Next, it will be somewhat dangerous."

As he spoke, Su Yu looked towards the center of the city.

He could faintly feel that a massive threat was lurking there.

The Galaxy Battle Armor also seriously said, "You plan to head to the city center? It's indeed very dangerous there; even I can feel it!"

"Mr. Su Yu, no matter what you plan to do, you'll have to hurry; this Manifestation Space is essentially a Data Space."

"Such a Data Space must be controlled by some intelligent 'host', and this powerful host surely has a self-inspection mechanism."

"Once the self-inspection starts, there's a high probability it will find us, the two 'outsiders' who've just appeared."

"By then, we won't be able to have such a calm conversation anymore, and we'll definitely be hunted!"

Upon hearing this, Su Yu frowned, "Self-inspection?"

"Indeed, time seems to be running out, and I have a bad premonition as well."

"Therefore, my plan is... to infiltrate!"

He then looked at the Galaxy Battle Armor.

The Galaxy Battle Armor felt uneasy, "Mr. Su Yu, you don't want me to infiltrate, do you?"

Su Yu said, "In this city, Mechanical Creations hold a very high status. I, as a human, wouldn't be suitable for infiltration, so it'll have to be you."

The Galaxy Battle Armor stayed silent for a moment, "But I only have one data core left; if there's any danger, I'm doomed!"

Su Yu quickly replied, "Don't worry, if you're going to infiltrate, I certainly won't let you go with just your core exposed."

With that, Su Yu immediately took out a pile of materials.

He then activated his Mechanic abilities and conducted a simple refinement on these materials.

In a short time, a humanoid mecha was forged.

The speed was mostly because Su Yu used previous blueprints, casually utilizing the blueprints of the Brutal Battle Armor and Azure Oath.

Due to the rush in crafting this humanoid machine's internal structure, many parts were illogical and inconsistent, but he used solid materials, all high-end stocks from Su Yu's inventory.

Based on the strength of the materials alone, it reached the level of six-star top-tier, maybe even seven-star!

However, without a power system or intelligent systems, it was merely a giant alloy figure, with no combat power whatsoever.

Chapter 583: The Mysterious Origins of the New Recruit! Undercover Plan!_2

"Try it out, how does this body feel? I've named it the [Stealth Mech]."

Su Yu smiled at the Galaxy Battle Armor after crafting the humanoid Mechanical Creation.

So, this Mechanical Creation was prepared as a new body for the Galaxy Battle Armor.

With this new body, the Galaxy Battle Armor would be able to carry out covert operation missions.

"Mr. Su Yu, are you willing to give me a body?"

The Galaxy Battle Armor asked somewhat unexpectedly.

It was currently considered Su Yu's captive, and Su Yu had always been wary of it.

Right now, it only had a data core and no body, making it unable to cause any trouble.

But if it had a body, then it might rebel and flee once it gains a form.

"We are collaborators now, naturally, there has to be enough trust."

Su Yu said matter-of-factly.

Actually, Su Yu wasn't entirely sure whether the Galaxy Battle Armor would run away, so he had left a safeguard in the mechanical body.

The Galaxy Battle Armor heard this, hesitated for a moment, and then its data core floated close to the Stealth Mech.

The chest armor of the [Stealth Mech] automatically opened, revealing a space to accommodate the data core.

The Galaxy Battle Armor flew inside, the chest armor closed, and then it started moving, stretching its legs and arms.

Clearly, the Galaxy Battle Armor had now taken control of this machine.

Su Yu watched it and activated the Holographic Perception:

[Stealth Mech]

[Producer: Su Yu]

[Grade: Excellent]

[Traits: None]

[Equipment: None]

[Skills: None]

[Overall Damage Rating: None]

[Overall Defense Rating: Six-Star Top Level]

...

"Except for defense rating, everything else is none..."

Su Yu laughed at his quickly and roughly constructed "Stealth Mech."

He had no choice; it was already impressive to create a six-star top-level mechanical body in just a few minutes; there was no time to design other functions.

"This body is acceptable, but it needs a bit of adjustment."

The Galaxy Battle Armor was somewhat satisfied with this new body.

It adapted to this new body slightly, then suddenly clenched its fist, and a stream of light flashed across the surface of the [Stealth Mech], suddenly bursting out with a powerful aura.

Su Yu's eyes narrowed, and he activated the Holographic Perception again.

Then he saw:

[Intelligent Mechanic·Stealth Mech (Galaxy Battle Armor)]

[Producer: Su Yu]

[Grade: Legendary]

[Trait: Power of Loyalty]

[Equipment: None]

[Skills: None]

[Overall Damage Rating: Seven-Star Top Level!]

[Overall Defense Rating: Seven-Star Top Level!]

"Impressive..."

Su Yu praised.

In a short period, the Galaxy Battle Armor used its power of loyalty to transform this roughly constructed Stealth Mech into a mighty seven-star top-level mecha.

This ability was quite similar to Nuonuo's, both could enhance Mechanical Creations.

However, Nuonuo used its own body to possess and enhance.

The Galaxy Battle Armor used its power of loyalty to make every component of the Stealth Mech "absolutely loyal," resulting in a dramatic power increase.

"Unfortunately, my power hasn't fully recovered, and I can't adjust it to the eight-star level."

The Galaxy Battle Armor said regretfully.

"But for stealth purposes, it's enough."

"Mr. Su Yu, what is your specific plan?"

After adjusting its body for a while, the Galaxy Battle Armor asked.

Su Yu saw that it had not tried to revolt and run away, feeling relieved, knowing that the Galaxy Battle Armor was genuinely willing to cooperate.

Su Yu thought for a moment and said, "Go to the city center and covertly investigate the situation there."

"If you're not discovered by those Mechanical Creations, that would naturally be best."

"If discovered, certainly seven-star or even nine-star level Mechanical Creations will try to interact or capture you."

"At that time, you should claim to be a mechanical creation mistakenly entering from the outside and seek to join this mechanic-dominant city. And hand over this piece of algorithm to them."

"With an outsider identity and this piece of algorithm, you'll be very valuable, and certainly won't be killed."

"This way, you'll have the chance to infiltrate their ranks and gather intelligence. Even if you can't get in, it will ensure your survival."

Su Yu said while handing the Galaxy Battle Armor a portion of the coordinates algorithm he obtained from the Navigation Device.

Su Yu arranged for the Galaxy Battle Armor to go undercover. If the enemy is crazed and their first reaction to intruders is to kill, then the Galaxy Battle Armor would be in danger.

Hence, for such a dangerous task, Su Yu naturally had to provide it with something to ensure survival, which was that piece of algorithm.

If the enemy had insight, obtaining this algorithm would be like finding a treasure, as it might contain a route out.

However, it's only half the algorithm. To get the rest, they must keep the Galaxy Battle Armor.

"Mr. Su Yu has thought thoroughly... wait, this algorithm?"

The Galaxy Battle Armor was quite satisfied with Su Yu's arrangement.

When it was initially captured by Su Yu, it was ready to self-destruct, showing true fearlessness in the face of death.

But it was rather a matter of bending rather than breaking and did not mean it truly wished to die.

So Su Yu letting it go undercover with a backup path made it feel grateful.

Although there was still danger, what mission is absolutely safe? With some guarantee, it's enough for it.

However, when it received part of the algorithm from Su Yu, its entire body seemed to tremble slightly: "This is..."

Its normally calm tone showed rare shock.

Seeing this, Su Yu quickly asked, "What is it? This algorithm I got from the Navigation Device, is there a problem?"

The Galaxy Battle Armor shook its head: "No... no problem!"

"Rest assured, Mr. Su Yu, I will definitely complete this stealth mission!"

"If it truly comes to a critical point, I will self-destruct and not expose Mr. Su Yu's existence!"

The Galaxy Battle Armor said in a serious tone.

Su Yu felt a subtle change in the Galaxy Battle Armor's attitude.

From a collaborator's stance to that of... a subordinate facing a superior?

Even mentioning self-destruct.

What was going on?

This change seemed to start after it received that piece of algorithm?

"Self-destruct isn't necessary."

"If you get captured, just wait for me to rescue you, no need to go to such extremes."

Su Yu said quickly.

"Yes! Mr. Su Yu!"

The Galaxy Battle Armor immediately responded.

Su Yu's reassuring words seemed to have turned into orders in its ears.

"It's just a mathematical algorithm, is it really that significant?"

Su Yu wondered, not understanding what the Galaxy Battle Armor realized.

The essence of the algorithm was calculating a navigation route based on surrounding coordinates, altitude, gravity... and other parameters.

This Navigation Device used this algorithm to lead Su Yu to this place.

The algorithm is purely mathematical without any Extraordinary Power within.

However, the encryption mechanism was highly complex, making it difficult for Su Yu to reverse-engineer a route out.

"Could there be a special identification number hidden in the algorithm that the Galaxy Battle Armor recognized as the identity of the owner of the Navigation Device?"

"This alien newcomer seems to have an extraordinary identity!"

"Just half of the algorithm alone nearly changed the Galaxy Battle Armor's attitude to that towards a superior officer..."

Su Yu speculated in his mind.

Guessing that the Galaxy Battle Armor recognized the identity of the Navigation Device's owner through the algorithm.

Nonetheless, Su Yu did not voice this as the Galaxy Battle Armor was evidently reluctant to elaborate.

For this one quick to self-destruct, it wouldn't divulge anything if it didn't want to say it.

"Mr. Su Yu, any other instructions? If not, I'll begin the mission!"

The Galaxy Battle Armor inquired.

"Go ahead, be careful in everything."

The Galaxy Battle Armor nodded and made its way towards the city center.

Once far from Su Yu, it disengaged from invisibility, but since both Su Yu and it were in a secluded alley, it was not discovered by other residents of the city.

"With the Galaxy Battle Armor on an infiltration mission, it's time for me to do mine..."

Su Yu murmured.

The task he plans on undertaking is also an espionage mission!

The Galaxy Battle Armor is going undercover among the Mechanical Creations, while Su Yu is naturally heading to the humans!

Chapter 584: Rebel Forces! Spiritual Energy Application Skills! Su Yu's Infiltration Plan

"I refuse to believe that the humans here will just accept oppression without protest. Won't they resist?"

Su Yu murmured to himself.

He felt that the humans in this city, as descendants of the Mechanic troops of the Giant God, shouldn't be so weak.

Are they only being bullied honestly by a group of Mechanical Creations?

There must be hidden resistance forces within the concealed parts of the city!

Su Yu's so-called going undercover with the humans was to infiltrate this force, investigate, and find a way to unite with them to overthrow the rule of these Mechanical Creations and save the millions of Mechanic descendants.

In truth, this isn't really going undercover, since everyone has the same stance—wanting to overthrow the rule of these Mechanical Creations.

But as an outsider, Su Yu feared he might not be easily trusted.

So he prepared to first disguise himself and investigate the situation, then make a long-term plan.

Of course, Su Yu didn't just want to save people.

Among the resistance forces, there must be powerful Transcendents, and the ancient Mechanic knowledge they possess is also Su Yu's goal this time.

Su Yu came here not initially to save people but to seek ancient knowledge and improve himself!

Saving people is naturally the best, but he cannot forget to enhance his own strength.

"First, I need to find out where they are..."

Su Yu whispered.

That resistance force, which is highly likely to exist, must be very concealed.

Otherwise, it would have been eradicated long ago.

Or maybe, has it been eradicated?

Perhaps even more than once?

Su Yu pondered these questions and then continued to wander and observe various parts of the city.

By now, it was deep night, but the smelting factories across the city were still brightly lit.

Groups of human Mechanic workers were tirelessly working hard.

Moreover, the working conditions for these humans were extremely harsh, without any intelligent tools.

These human Mechanics completed complex and heavy tasks relying solely on some simple mechanical devices, their own hands, and Spiritual Energy.

In every factory, there were several intelligent Mechanical Creations wandering around, with huge cameras staring everywhere.

This is supervision!

However, these mechanical supervisors seemed somewhat absent-minded. Some were even lying on the ground "asleep."

If it weren't for Su Yu's ability as a Mechanic to sense that these mechanical supervisors' bodies had no abnormalities,

he almost thought they were dead.

They were actually slacking off.

After all, supervising wasn't exactly a fun task.

The fact that Mechanical Creations would slack off is indeed a spectacle in this city.

Su Yu's Mechanical Apostles were all model workers.

Though the mechanical supervisors were slacking off, those human Mechanics were diligently working without any sign of slacking.

There wasn't even any communication; everything proceeded in silence.

In contrast, these humans seemed more like cold, mechanical machines, devoid of any emotion or thought.

As for why they worked so hard, Su Yu understood.

Because those mechanical supervisors were equipped with long guns and short cannons, a variety of terrifying killing weapons.

Obviously, if caught slacking off by these supervisors, it wasn't just a matter of being warned, it could mean death!

"The more I see this scene, the more uncomfortable I feel..."

Su Yu sighed inwardly. These humans were indeed tragically oppressed.

Though he sighed, he did not act; he just silently observed as the Mechanics worked.

After watching for a while, he secretly thought, "Everyone possesses Spiritual Energy; they're all Extraordinary Mechanics..."

Indeed, each of these workers was a Spiritual User and an Extraordinary Mechanic!

They ranged from one-star to three-star.

However, so far Su Yu hadn't seen any four-star or higher, so he didn't know if there were any.

These workers relied on their abilities to melt down and remold one scrap part after another.

Despite this heavy workload, they became extremely proficient in applying their abilities.

"They are very economical in their use of Spiritual Energy..."

After observing for a while, Su Yu, with his keen eyesight, noticed that these workers employed highly sophisticated techniques in utilizing Spiritual Energy during work, almost with no extra waste.

They brought energy utilization efficiency to the extreme.

Even Su Yu couldn't achieve this when he was at the same level.

This level of efficiency in using Spiritual Energy was close to the seven-star level.

Seven-star Transcendents relied on powerful spiritual power to forcibly enhance energy efficiency.

But these Mechanic workers relied purely on exquisite techniques.

"Energy here is very scarce too, and the connection with Subspace is faint, making it very difficult for low and mid-tier Transcendents to draw energy."

Su Yu sensed that in this Manifestation Space, though it was still possible to absorb Subspace Energy, it had become much harder.

For someone like Su Yu, an eight-star powerhouse, this obstacle was nothing.

Previously, Su Yu hadn't much cared about it.

But for these low-level Transcendents, this was a grave issue.

Their daily training and work would be affected by insufficient energy.

Hence, they developed these ultimate energy utilization techniques to prevent running out of Spiritual Energy.

After observing for a while, Su Yu noticed that among the workers' energy utilization techniques, there were some novel ideas that were quite useful to him.

After all, these were techniques studied and refined by a million people over millennia.

This immediately piqued Su Yu's interest.

He focused his mind to carefully observe the workers' Spiritual Energy usage processes, attempting to learn their techniques.

Chapter 585: Resistance Forces! Spiritual Energy Application Techniques! Su Yu's Infiltration Plan_2

These skills, even one-star or two-star Transcendents can grasp them. As an eight-star expert, Su Yu naturally learned very quickly.

In a short time, he had already mastered this skill.

Then Su Yu tried using this technique himself, and immediately discovered that his Spiritual Energy efficiency had increased by 1% out of thin air!

These low-level Transcendents' skills actually worked for him, an eight-star expert!

Although the effect was greatly diminished, there was still an effect.

And with the energy efficiency increased by 1%, Su Yu's strength improved by 1% as well!

Because at Su Yu's level, the efficiency of energy use in full combat determines his strength.

By improving energy efficiency by 1%, avoiding waste and overflow, he could output 1% more energy in battle!

These Mechanic workers improved energy efficiency to save energy.

But Su Yu used it to avoid waste, to unleash more energy, increasing combat power.

Don't underestimate the 1% increase; with Su Yu's strength, it was already precious.

Moreover, this was a technique for Spiritual Energy application.

It is independent of rank, battle armor, skills, etc.!

Theoretically, even if Su Yu advanced to nine stars or beyond, this 1% boost could still have an effect!

Su Yu's strength was permanently improved by 1%!

"This really is an unexpected joy..."

With a 1% increase in power out of nowhere, Su Yu was naturally very pleased.

"Besides, these techniques used by low-level Transcendents must be quite rudimentary."

"If a resistance organization truly exists underground, they should have more advanced techniques to increase power further!"

The more Su Yu tasted this, the more he felt that this technique for Spiritual Energy application had endless wonders.

Moreover, there was more to it than met the eye.

He estimated that what he learned was merely a low-level version.

More advanced ones require finding four-star or even seven-star human Mechanics to learn.

If he could learn them, Su Yu's strength would surely be improved again, and at that time, it may not be merely 1%!

At this moment, Su Yu was even more eager to find that human resistance organization.

While familiarizing himself with the newly learned techniques, he carefully observed those Mechanic workers, hoping to find clues as soon as possible.

Eventually, he found it!

Su Yu discovered that in the factory he was in, the energy saved by those Mechanic workers was all being collected.

Then, taking advantage of opportunities to communicate while working, they avoided the surveillance of the mechanical overseers and secretly handed over the energy to someone.

That person was a young girl, only about sixteen or seventeen, but already a top-tier three-star, nearly four-star.

By the looks of it, she was quite the little genius.

After receiving the energy, the girl unhesitatingly absorbed it immediately.

On the surface, she remained calm and composed, continually completing her work.

Because of her strong power, her work was especially heavy, and her energy consumption was high.

Even with the energy application techniques, she was somewhat overwhelmed; over time, her strength wouldn't increase and could even weaken.

But with the support of others, she showed no signs of weakening; she was even on the brink of breaking through to four stars.

After she absorbed the energy and saw the Mechanical Creations tirelessly working hard to accumulate energy for her, her eyes faintly sparkled with tears.

But she quickly held them back with strength.

And those mechanical overseers, being lackadaisical in their work, did not notice these small, concealed actions.

"This little girl looks like a genius among humans."

"Is this how they secretly cultivate talent?"

"If she breaks through, she will likely be absorbed into that resistance organization and further cultivated."

Su Yu thought silently to himself.

He could see that the Mechanic workers were clearly nurturing her by giving the energy to the girl.

What are they nurturing her for? Of course, it's to accumulate strength to resist the mechanical beings' harsh rule! Otherwise, is it to do more work?

This girl is their seed of resistance!

Who knows how many strong individuals the human Mechanics have secretly cultivated over the years?
Are there any seven-star ones?

Su Yu went to check a few other factories and found that basically, each had such a seedling figure.

There was also a young man who had already broken through to four stars, but under some power's influence, there was no leakage of energy at all, maintaining the appearance of a three-star.

"It seems this young man is a member of that organization."

"This ability to conceal his presence almost fooled even me. It must have come from an extremely powerful Transcendent, at least seven stars!"

"They do indeed have seven-star experts!"

Su Yu thought while looking at the four-star youth.

He was thinking about how to use this four-star youth to find that resistance organization.

"Directly making a move to interrogate or check memories? Forget it, not appropriate."

If he took action directly, Su Yu could surely turn this youth's memories inside out.

But having no grievances or enmity, Su Yu was unwilling to do so.

Moreover, this four-star youth had powers from a seven-star or higher expert, acting rashly could bring about uncontrollable consequences.

Su Yu wanted to find that resistance force to make friends and allies, not to make enemies.

"Waiting for him to contact the organization and stealthily tracking him? Also inappropriate..."

Su Yu dismissed another idea.

Who knows how frequently that resistance organization contacts each other? If he waited indefinitely, how long would it take?

"Therefore..."

Su Yu returned to the previous factory, standing before the girl.

After pondering for a while, he suddenly discreetly transmitted a bit of Spiritual Energy to the girl.

The energy that Su Yu transmitted was very little, but because it came from an energy coin, it was extremely pure, far surpassing the girl's own energy.

Moreover, the energy from the energy coin seemed to possess an extremely strong adaptability.

The girl needed to digest energy from others first.

However, when coming into contact with the energy transmitted by Su Yu, she absorbed and digested it instantly, immediately showing signs of a breakthrough.

"What's going on? How did I suddenly feel a surge of power, am I about to breakthrough, sensing the depths of subspace to absorb pure Spiritual Energy?"

The girl was startled inside, her eyes flickering with panic.

If she had a breakthrough under the mechanical overseers' surveillance, her end would be dire.

The mechanical rulers are very strict in controlling human abilities; rashly breaking through would equal seeking death!

Even worse than death, she could be captured and brought to the core of the city, become a limb-less construct made into an energy provider by Mechanical Creations!

That would truly be worse than death, with no hope of ever turning things around.

Thinking of such terrible consequences made her panic even more.

Fortunately, living in such a high-pressure environment had greatly improved her psychological resilience.

Although her eyes showed panic, her hands didn't slow down at all, not revealing any anomaly.

At the same time, she desperately suppressed her breakthrough.

Su Yu's energy control was extremely precise.

He had calculated as he transmitted the energy, so she could suppress and temporarily not break through.

If not, it would have been good intentions gone wrong. Su Yu wasn't that unreliable.

After a while, the girl breathed a sigh of relief, seemingly having suppressed the breakthrough.

But of course, she couldn't suppress it for too long.

The girl quickly and stealthily made a gesture to inform others in the factory.

The others, who had been watching her situation all along, saw her gesture and their eyes instantly revealed delight!

"Song Qing is going to breakthrough!"

"Good! Another four-star!"

"So young and already breaking through, she might have the chance to reach seven stars in the future!"

"If we keep accumulating like this, sooner or later, we will have enough power to resist!"

"We must quickly arrange for Song Qing to breakthrough and then contact the Elders to give her camouflage and seal up..."

The Mechanic workers thought to themselves.

And Su Yu smiled slightly.

All he had to do was wait for this girl to make her breakthrough and follow her, and he would surely find that resistance organization.

Chapter 586: Lost? The Location of the Elder Council!

The girl named Zhou Qing did not carry the power left by the seven-star powerhouse, so Su Yu could safely "manipulate" her to help her breakthrough.

Next, Su Yu patiently waited for a few more hours, and finally, it was time to change shifts.

This factory operates non-stop, with two shifts.

Zhou Qing and the other mechanic workers, seeing the people coming to change shifts, all breathed a sigh of relief.

They exchanged glances and queued to exit the workshop.

This factory had over three hundred mechanic workers, which was quite a number.

After they went out, they took out synthetic food outside the workshop, had a simple meal, drank some water, and rested for a while.

Then they set off, heading towards the distant residential area.

Su Yu remained invisible, following behind them.

From the outside, the residential area looked quite grand, with skyscrapers over a hundred floors tall.

But upon entering, one could notice that the rooms inside were extremely simple, almost without decoration or furniture, looking very oppressive, like warehouses for storing machines rather than human dwellings.

After entering one of the residential buildings, Zhou Qing and the mechanic workers immediately activated their ability, combining all their spiritual energy to emit a strange spiritual energy wave.

Moments later, everyone breathed a sigh of relief.

A middle-aged man said, "Alright, we have temporarily blocked the surveillance system in the building and also informed the Elder Council."

"Zhou Qing, you can try to break through now, quickly! If you're short on energy, we will provide it! You must succeed!"

Upon hearing this, Zhou Qing nodded heavily and said, "Yes!"

She then closed her eyes and began to breakthrough.

"Using spiritual ability collectively? Interesting..."

Su Yu saw clearly from the side that these mechanic workers had combined everyone's spiritual energy to release a spiritual ability to block surveillance, along with some kind of remote communication.

This spiritual ability far surpassed their individual levels, surprisingly reaching a six-star level.

Moreover, its intricacy was much stronger than an ordinary six-star spiritual ability.

"This combined spiritual energy technique is also worth learning!"

Su Yu remembered everything he had just witnessed.

Just a few hundred low-level Transcendents could collectively release a six-star spiritual ability.

What if there were more?

The Mechanical City has millions of Transcendents; if they all united using this technique, what a powerful force it would be!

This technique is indeed one of the things Su Yu came here to find!

"This trip was indeed worthwhile..."

Su Yu thought as he carefully watched Zhou Qing's breakthrough.

After all, breaking through the four-star level can still be difficult and somewhat dangerous for ordinary people.

If she encountered any accidents during her breakthrough, Su Yu would step in to help.

Fortunately, she was breaking through very smoothly, and in a short time, Su Yu felt her spiritual energy steadily rising.

This signified her enhanced sensitivity to subspace, allowing her to absorb more subspace energy!

The occurrence of this situation indicated that her breakthrough was nearing its end.

Ten minutes later, Zhou Qing suddenly opened her eyes, with a flash of electricity in them!

Soon after, the electricity spread throughout her body, materializing complex three-dimensional models around her.

Upon closer inspection, Su Yu realized they were all various mechanical blueprints.

"Is this her ability?"

"These blueprints, formed by electric light, only need materials to be filled in, and they can automatically meld and rapidly generate various mechanical creations."

"This ability is indeed convenient; I wonder what profession it aligns with?"

Su Yu's sharp eyes instantly recognized the essence of these blueprints, which were meant for the rapid manufacturing of machinery.

By then, Zhou Qing had already retracted the electric light blueprints, and although this scene was dazzling, it consumed energy and couldn't be wasted like this.

After putting away the electric light blueprints, Zhou Qing excitedly murmured to herself, "Finally succeeded! Finally became a four-star production line mechanic!"

Upon hearing her words, the others also showed expressions of surprise and envy, but merely in their eyes, with little change in their facial expressions.

They seemed to have become accustomed to keeping their emotions hidden.

Still, when Su Yu heard the name "Production Line Mechanic," he almost burst out laughing.

The name was just too plain.

Moreover, it clearly wasn't a combat profession but one specializing in production and manufacturing.

In the Empire thousands of years ago, this profession was likely an ordinary job on a factory assembly line.

With Zhou Qing's ability to create electric light blueprints, one person could practically be an entire mechanical production line, greatly enhancing the efficiency of producing mechanical creations.

Indeed, the name was fitting.

At this moment, a middle-aged man saw Zhou Qing brimming with joy and advised, "Xiaoqing, don't get complacent!"

"In the future outside, you must not show such an expression, or you'll be easily discovered!"

"Moreover, you are not yet a combat profession and need to report to the Elder Council, learn a new profession to gain combat capability; you still have a long way to go."

"Your parents died at the hands of those mechanical beasts; you must exert effort if you wish to have a chance for revenge!"

Upon hearing this, Zhou Qing quickly collected her smile, returning to a calm expression and said with her head lowered, "Uncle Ming is right, I was too excited. I'll be more careful in the future."

Upon mentioning her parents, a look of sadness flashed in Zhou Qing's eyes.

Seeing Zhou Qing obediently listening, Uncle Ming nodded in satisfaction.

Chapter 587: Lost? The Location of the Elder Council!_2

However, he noticed that Zhou Qing looked a bit disappointed and sad after his reprimand, so he quickly praised her again: "Xiao Qing, you do have a good talent, breaking through so quickly!"

The others hurriedly chimed in: "Yes, in a few decades, maybe there will be another Elder!"

"Keep it up! Strive to add another strong seven-star figure for humanity!"

Upon hearing everyone's praise, a smile returned to Zhou Qing's eyes.

After everyone had praised for a while, Zhou Qing finally couldn't hold back and curiously asked:

"I've heard stories about the Elder Council since I was little, but where is the Council, and where are the Elders exactly? Will an Elder come to pick me up soon?"

Upon hearing this question, Su Yu also perked up.

That so-called Elder Council, it seemed, was the base of that resistance force.

As long as he followed Zhou Qing later, he would definitely find it.

Hearing this question, everyone else looked at each other.

After a while, Uncle Ming coughed twice and then said: "We don't know where the Elder Council is either; those who come out of there never tell us..."

"It's said that as long as a young person breaks through to four stars and uses special Spiritual Energy to contact the Elder Council, this breakthrough individual will soon disappear into thin air."

"As for where they go... wait a minute, where is she?"

Uncle Ming hadn't finished his words when he was startled to find that Zhou Qing in front of him was gone!

Everyone was stunned for a moment, then reacted: "Great, it seems Xiao Qing has been picked up by the Elders!"

At this moment, even Su Yu was stunned.

He hadn't even realized how Zhou Qing disappeared just now!

Su Yu hadn't blinked at all just now!

"What's going on? Instant Teleportation?"

But even if it were Instant Teleportation, there should have been energy fluctuations.

"Wait, in this Manifestation Space, perhaps Teleportation doesn't require any energy at all, just some kind of 'permission.'

"Like moving a character in a virtual world, it's just a matter of changing a coordinate."

Su Yu rapidly analyzed in his mind, quickly figuring out the principle behind it.

In this Manifestation Space, everyone is like an NPC in a game.

A simple change of coordinates can achieve Instant Teleportation.

"From this perspective, the capabilities of this resistance force are even stronger than I imagined. They actually possess a portion of the Manifestation Space's permissions."

"This is going to be difficult; haven't I lost track now?"

Su Yu scratched his head a bit.

The power of the human resistance had exceeded his expectations, and now he had lost track of people.

"Fortunately, I left a little trick on that girl; I wonder if it will be discovered..."

Su Yu wasn't hasty but quietly began to sense.

The energy he transmitted to Zhou Qing earlier was actually carrying a little trick.

It was a little Mechanical Spirit Clone.

It's just a small piece of data, then using the ability of Data Materialization, it transformed into a speck of dust, attached to Zhou Qing, extremely concealed.

This little clone has no attack power, its energy is not even comparable to a one-star Transcendent.

But it is considered Su Yu's Mechanical Apostle, closely linked to Su Yu.

With the help of this little Mechanical Spirit Clone, Su Yu could sense its position and the surrounding situation.

Su Yu closed his eyes, searching for that subtle sensation.

Because the Mechanical Spirit Clone was so minimal, the sensing was extremely faint, so he had to fully concentrate.

After a few minutes, Su Yu finally sensed that Zhou Qing was in a mysterious place.

Not up, not down, not left, not right.

In any case, not in any direction, but she did indeed exist.

"What's going on?"

Su Yu was puzzled.

He initially thought Zhou Qing had been taken to a certain location in the Manifestation Space, and as long as he knew the direction, he could find her.

But now, this situation confused Su Yu.

However, Su Yu's mind was extremely quick, his intelligence far surpassing ordinary people.

He pondered for a moment, combined it with the current situation, and quickly hypothesized a possibility:

"Could it be that Zhou Qing is now in another Manifestation Space?"

"Since they are two different Manifestation Spaces, there is no distinction in up, down, left, or right between them!"

"This resistance force's power is more and more surprising! Their mastery of permissions can create another Manifestation Space to use as a base?"

Su Yu deduced that Zhou Qing was in another Manifestation Space!

Mutual independence with the Manifestation Space where Su Yu currently was, hence unable to sense a specific direction!

Like in the central computer of Illusion City, storing many different virtual scenarios.

Each scenario is a different virtual world.

Would there be any left, right, up, or down distinction between two virtual worlds?

Is world A above world B, or below?

None at all.

"If that's the case, then use data thinking..."

After making his hypothesis, Su Yu immediately changed his approach.

There won't be any left, right, up, or down distinction between two virtual worlds.

But in the main computer's data, they must still have 'positions' and 'addresses.'

Manifestation Space is fundamentally virtual data.

Although the "main computer" sustaining this Manifestation Space was unknown, it surely would have positions and addresses.

These positions and addresses are abstract data, not actual directions and coordinates.

Su Yu naturally couldn't find Zhou Qing's whereabouts using real-world thinking.

Now he switched his thinking, adopting data thinking, beginning to sense and analyze Zhou Qing's 'data address.'

"Tsk tsk, could this be considered tracing through the network?"

Su Yu silently mocked in his heart, then focused, fully cracking it.

This was extremely difficult.

After all, without any permission in this Manifestation Space, Su Yu could only crack it forcibly.

Under normal circumstances, he wouldn't be capable of completing such a task.

After all, his Data Mechanic was still at six-star level, not upgraded to seven stars.

Luckily, with the Mechanical Spirit Clone as a guide, it gave Su Yu clear coordinates.

The Mechanical Spirit Clone itself, being an eight-star level data life clone, also actively cooperated with Su Yu, transmitting the surrounding environment's data to him.

As a result, Su Yu's cracking progressed tremendously smoothly!

Even through this, Su Yu managed to glimpse some of the secrets of Manifestation Space!

Initially, Su Yu was completely clueless about the workings of Manifestation Space.

But now, borrowing from the data comparison between the two Manifestation Spaces, analyzing their differences, he gradually grasped some insights.

"So that's it, the essence of space seems to be a special form of matter!"

"Since it's possible to manifest matter, it's also possible to manifest space!"

"However, to complete such a task, one requires a deep understanding of the essence of space to simulate various properties of space with data, along with powerful data manipulation ability..."

Su Yu analyzed Zhou Qing's position while summarizing in his mind, growing more and more delighted.

At this rate, once he understood the secrets of Manifestation Space, perhaps in the near future, he too could attempt to manifest his own space!

Just as Su Yu was absorbed in his research, suddenly he sensed a furious voice from the Mechanical Spirit's side:

"What is this! Courting death!"

The next instant, Su Yu's connection with the Mechanical Spirit Clone was severed.

It seemed the Mechanical Spirit Clone was discovered!

Before the connection was interrupted, Su Yu received the last piece of information that the Mechanical Spirit Clone initiated self-destruct.

The Mechanical Spirit Clone was tasked by Su Yu before deployment.

If it got discovered, it would self-destruct to avoid leaking Su Yu's intelligence.

As a small clone, it lacked complete self-awareness and wasn't a fully-fledged data life, so it self-destructed as programmed.

Sadly, Su Yu had yet to fully analyze Zhou Qing's location.

"The snake has been alerted now! No choice, have to try!"

Su Yu knew that the Mechanical Spirit Clone had just been discovered; if he didn't act soon, who knows if that Elders' Council would escape!

After all, they could create a Manifestation Space as a base, maybe they could create a second one.

Where would Su Yu look for them then?

Determined, Su Yu immediately condensed his own Data Spirit Power into a mass and punched into the void.

This punch was silent, with no energy fluctuations, but he blasted a black void in the space!

Without hesitation, Su Yu leapt into the void!

This was the result of Su Yu's research! Breaking through the Manifestation Space, forcibly crossing!

Chapter 588: Su Yu's "Diplomatic Strategy

In the real world, Su Yu wanted to rely on Spiritual Energy to forcibly break through space, but that was impossible.

Unless it was a special profession like Xiao Shengyin.

Otherwise, the power needed to break space and create a spatial passage would be terrifyingly immense.

Far beyond what Su Yu could achieve now.

However, in this Data Manifestation Space, accomplishing such a feat was much easier.

Essentially, Su Yu was not breaking space, but breaking data.

After Su Yu jumped into the Space Black Hole, he instantly vanished from this Manifestation Space.

The Mechanic workers around were oblivious to everything happening beside them.

"Is this... outside the Manifestation Space or outside the Boundary?"

"Truly magical..."

Previously, the Galaxy Battle Armor had warned Su Yu not to fly recklessly; leaving the Boundary of the Manifestation Space could be dangerous.

And now, after breaking through space, Su Yu found himself outside the "Boundary".

At this moment, Su Yu was not in any space.

Neither in the real world nor in the Manifestation Space.

He was in the data turbulence outside the Manifestation Space.

There was no direction here, no light, nothing.

Upon entering, Su Yu felt as though his whole body was being torn apart.

It seemed like he was about to be deconstructed into pure data by the environment here.

Fortunately, he was strong enough and had the Brutal Battle Armor protecting him, so he could hold on for a while.

"Need to hurry!"

However, Su Yu knew that this situation wouldn't last long.

He was like a "virus" that had invaded a smart mainframe, about to be eliminated by the mainframe's Defense System.

The mainframe capable of manifesting such a large Data Space was far stronger than Su Yu.

If it took any longer, Su Yu feared he would truly be broken down into data, becoming part of the Manifestation Space.

Not daring to delay, he quickly followed the "address" sensed and punched through the data turbulence, heading toward that direction.

In data turbulence, there is no physical distance.

Whether he could reach the location depended on Su Yu's ability to precisely locate the "address".

In a way, it was quite similar to Subspace.

Using the information obtained earlier, Su Yu searched for a while and finally felt that he touched a data barrier.

"This is it!"

Su Yu rejoiced, knowing he had found the right place.

He clenched his fist and punched out fiercely.

The data barrier shattered in response to the punch, creating a large hole.

Unlike the previous black hole, this time, light appeared in the hole!

Su Yu stepped into the light.

...

At this moment, in the Elder Council Space.

This was a huge hall filled with various iron-gray mechanical devices, with thick pipes everywhere, occasionally sparking.

In the core area, there were a dozen coffin-like hibernation pods, each with an elder lying inside.

Besides that, there were many other people in the hall.

At a glance, there were thousands of people, all of whom were Four-star Transcendents or above, led by a wrinkled old man who looked alarmed and was busy operating a mechanical device.

Others were also doing their respective tasks, some operating machinery and others outputting energy.

"Quick! We must transfer the Elder Council immediately!"

"Is there still time? I feel a powerful data stream approaching!"

"Your feeling is nonsense, never accurate!"

"What if it's true?"

"We'll have to fight!"

"Zhou Qing, what have you touched!"

These people were very tense, working while discussing.

In the corner, Zhou Qing, who had just arrived here, was dumbfounded.

She had just been brought into this space, met a seven-star elder, and before she could be happy, she heard the elder shout angrily, pulling something out from her.

Then the elder's face turned fearful, shouting, "Mechanical Beasts are attacking!"

The entire Elder Council Space became chaotic, and no one paid attention to her or explained anything.

Occasionally, someone spoke to her, but only to question her.

"Wh... why is this happening..."

"Did I bring some danger? Wuu..."

This strong little girl finally couldn't hold back her tears.

At this moment, she suddenly felt a warm big hand pat her shoulder: "Little sister, I am sorry, all this came because of me."

"Consider these energy coins as my compensation..."

This voice was so gentle that Zhou Qing felt warmth in her heart.

Before she realized who the voice belonged to, she felt several items being pressed into her hand.

As soon as those items entered her hand, pure Spiritual Energy immediately seeped into her body.

Although Zhou Qing was young, she had been a Transcendent for seven or eight years, but she had never felt such pure Spiritual Energy.

It was like living in a scorching, water-scarce desert all her life, and suddenly one day, she drank pure, sweet cold water.

Her whole body felt almost blissful.

But shortly after, she reacted, quickly turning around to see who was behind her.

And then she saw...

"Ah!"

Zhou Qing screamed in shock.

If she weren't a Four-star Transcendent with strong physical and mental resilience, she might have fainted from the shock.

Because she saw...

A broken black Mechanical Battle Armor, with a similarly broken humanoid inside.

The humanoid, like a living person soaked in strong acid.

Only half of the skin remained, with the muscles corroded, organs exposed, and even the heart visible beating.

Chapter 589: Su Yu's "Diplomatic Strategy"_2

The skull was even more horrifying, almost reduced to just a skull.

A few scraps of flesh hung on it, and through its eyeless sockets, you could vaguely see the brain inside.

The terrifying appearance alone was bad enough.

The key was this monstrous being's body exuded an aura that was terrifying, deep, brutal, majestic... and so on, all mixed together.

Zhou Qing felt like she had encountered her destined nemesis, unable to muster any thought of resistance, filled only with boundless fear that overwhelmed her soul.

Upon hearing Zhou Qing's scream, the others were startled and quickly turned to look.

And so, they too saw the eerie, terrifying humanoid!

And behind the humanoid, that space black hole!

Suddenly, everyone was stunned.

The next moment, the scream of that Seven-Star Elder echoed throughout the space:

"There's a traitor summoning Mechanical Beasts to attack! It's Seven-Star... no! Eight-Star! Maybe even Nine-Star!"

"Awaken all the Elders, fight to the death!"

"Kill!"

With a mighty roar, a powerful spiritual energy burst from this Elder's body, enveloping the entire hall space.

Everyone around the Elder felt their own power inexplicably enhance by a whole star level under this energy.

War Mechanic! Power of Dominator!

This Elder turned out to be a War Mechanic!

He's now using the Power of Dominator, to dominate this war, enhancing allies and weakening enemies!

Those Extraordinary Mechanics, boosted by the Power of Dominator, immediately released spiritual energy, merging everyone's spiritual energy together!

The combined energy of so many people, with special techniques, was potent enough to rival a Seven-Star, even Eight-Star Transcendent!

Meanwhile, those elders in the ten-plus slumber pods suddenly opened their eyes, pushed open the lids of their pods, pulled out the tubes on their bodies, and sat up!

Each of these elders was at least Seven-Star! Their combined aura was earth-shattering!

The entire hall space shook as if about to collapse!

"Kill!"

In a short time, these people were ready for battle, brewing a formidable attack.

The next moment, they were about to launch at the terrifying monstrous being!

Even Zhou Qing was within the attack range!

They didn't know how Zhou Qing was connected to this terrifying monster, but there was no time for questioning, only to kill!

"This is going to cause big trouble..."

Su Yu muttered to himself.

Indeed, the terrifying monster was Su Yu.

Earlier, when traversing the data turbulence, the streams of data, with their extreme corrosiveness, had eroded him into such a horrifying monster.

At first, he wasn't even aware of it, as all his senses were intensely distorted in the data turbulence.

Even his own state was difficult to grasp.

Only after seeing everyone's reaction did he use spiritual power to take a look at himself, and was taken aback.

"I didn't expect the data turbulence to erode me so severely and terrify everyone."

In fact, it was only superficial damage, not affecting his essence.

It was like playing a virtual game where the game character's model texture didn't load properly, making it look ghostly, but not impacting the character's abilities.

But the look was too frightening.

Mostly because Su Yu's armor and body were damaged, causing his aura to leak.

The auras of Brutal Evil God, Fear Intelligence, Ghost Hidden Blade, Power of Heavenly Punishment... all sorts of terrifying auras were pouring out.

Even with a slight leak, it almost scared Zhou Qing into passing out.

The others were so terrified they wanted to fight desperately.

"Originally, I intended to infiltrate as an undercover agent, but I got discovered from the start, such bad luck."

"In theory, I'm here representing the Mechanical City for diplomatic alliance, but with a brawl right on the first meeting, it's all messed up."

"I need to come up with an idea..."

Su Yu quickly thought.

Once the fight breaks out, and causes a commotion, if the location is truly exposed, the enmity will become enormous.

Seeing the next moment, everyone's attack was about to arrive, and the situation was on the verge of an irreversible state.

Su Yu suddenly thought of an idea.

"Hold on! I mean no harm!"

Su Yu shouted loudly, then swiftly took action, utilizing supersonic speed, and suddenly pulled out a pile of things from Nihilicity Space!

"So fast! Watch out for attacks!"

Seeing this, the elders thought Su Yu was striking first to launch an attack.

They were extremely terrified in their hearts, Su Yu's speed was incredibly fast, evidently reaching the Nine-Star level!

They were utterly in despair, whether they could defeat this monster or not, this Elder Council space was doomed to be destroyed.

Not to mention, there might still be an army of Mechanical Beasts to follow.

Was the human resistance about to be extinguished today?

However, the next moment, these elders widened their eyes.

Because they saw something...

"Is that... Imperial currency! My God, so much Imperial currency!"

"What is this monster trying to do?"

They recognized that what Su Yu brought out was tens of thousands of "Imperial Currency"!

These people, being descendants of the Giant God Soldiers' stationed Mechanic from ten thousand years ago, naturally knew about the human empire's currency from back then.

This energy currency minted by the Empire has a magical trait of trinity transformation, also contains potent pure spiritual energy, making it the best supplement for a Spiritual User.

Especially in this Manifestation Space, where energy and matter are extremely scarce, Imperial Currency is incredibly valuable.

These descendants of Mechanics have treasured a few Imperial Currencies as valuable items, not daring to use them easily.

Now seeing Su Yu suddenly take out so many, how could they not be shocked?

For a moment, everyone was highly perplexed, not knowing what Su Yu was up to, fighting's a fight, why pull out money? Showing off wealth?

Of course, they didn't know, what Su Yu pulled out was not Imperial Currency, but energy coins he had created himself.

But there's little difference, these people didn't recognize it.

At this time, the pure spiritual energy from the energy coins spread throughout the Elder Council space.

Everyone, sensing this pure energy, couldn't help but shudder, their attacking movements paused for a moment.

They were inwardly exclaiming, was the terrifying monster using money to distract them?

Su Yu then lightly lifted his hands, tossing the pile of over thirty thousand Imperial Currency towards everyone:

"I was reckless, this is a small token, please don't mind."

Su Yu smiled.

Meanwhile, he activated his abilities to repair his flesh, and the Brutal Battle Armor was also being repaired.

In such a short time, Su Yu had recovered seventy to eighty percent, with various terrifying auras retracted, looking no longer so scary.

And by now, the pile of Imperial Currency had already flown in front of everyone.

The Mechanics exchanged glances, what was this?

In previous Mechanical Beast attacks, they always fought directly, never heard of throwing money!

However, they finally calmed down, suppressing their impulse to attack.

Because so much money placed before them, with the "scent" of pure spiritual energy, deeply impacted them.

It made their killing intent significantly wane.

"Haha, paying to pave the way really works, turns out I'm still quite a diplomatic expert..."

Su Yu chuckled to himself.

The tense situation earlier was quelled by him with a heap of money.

This was his "diplomatic strategy".

Anyway, these energy coins were nothing to him.

His Brutal Battle Armor could produce a huge amount of energy coins every day.

Previously, when propagating these energy coins, Su Yu distributed at least one energy coin per person to hundreds of thousands of people in the Mechanical City.

Compared to that, this mere tens of thousands of energy coins were nothing.

If it weren't for the energy scarcity here among the Transcendents, he really wouldn't have brought out these tens of thousands of energy coins.

These energy coins, for Su Yu, were just change, casually tossed into Nihilicity Space to gather dust, in case of an energy shortfall someday for use.

Never imagined they'd come in handy one day.

"Who are you? What do you want?"

"Whatever you intend to do! Humanity will never surrender!"

Finally, after a while, an Elder spoke up.

Chapter 590: Food and "Poison

The Elder's tone still held deep suspicion.

At this point, Su Yu spoke again, "Allow me to introduce myself. I am human, not some Mechanical Beast, and I come from the outside world."

As soon as Su Yu said this, it was as if a bomb had been dropped.

"What? Human? From the outside?"

The crowd was skeptical when they heard Su Yu claim to be human.

After all, when did such powerful Transcendents appear among humans? Why haven't they seen any?

However, as Su Yu's body recovered, the Seven Star Elders could sense that Su Yu was indeed flesh and blood, wearing Mechanical Battle Armor.

Not a Mechanical Beast using a Flesh Core as an Energy Source.

This is a fundamental difference, and these Elders, having dealt with Mechanical Beasts for hundreds or even thousands of years, were confident they wouldn't mistake it.

So, it appears Su Yu truly is human?

But the question arises again, where did such a powerful human come from? Could he be a hidden genius, secretly training?

Without the help of the Elder Council, how could one independently train to the level of Eight Stars or even Nine Stars?

Or perhaps, a traitor who has allied with the Mechanical Beasts?

They did not immediately consider the possibility of an outsider, as this Manifestation Space has been sealed for too long! There have never been any outsiders appearing.

These people have almost forgotten about the outside world!

Just as everyone was puzzled about Su Yu's origins, they suddenly heard Su Yu claim to be an outsider.

They were immediately taken aback, eyes wide open in shock.

From the outside! How can it be? No outsider had appeared in this Manifestation Space for ten thousand years!

Could it be that the passage to the outside world has finally appeared?

Impossible! It must be a conspiracy of the Mechanical Beasts!

Perhaps this Su Yu is a new breed of Mechanical Beast, and his Imperial Coins are from the Mechanical Beasts' stockpile!

These humans call the Mechanical Creations that oppress them "Mechanical Beasts."

In their view, Su Yu's appearance, and those Imperial Coins, could all be part of the Mechanical Beasts' conspiracy!

But after ten thousand years, do the Mechanical Beasts really still have so many Imperial Coins?

The Imperial Coins are limited; they cannot be forged by anyone here, neither humans nor Mechanical Beasts.

Moreover, if the Mechanical Beasts had truly found this place, they would simply wage war and kill everyone, no need for any conspiracy.

Could this formidable human Su Yu really have come from the outside?

The crowd found it hard to believe at that moment.

Yet, they couldn't help but believe.

They have been living in this Manifestation Space for so long, experiencing so much hardship and oppression.

For ten thousand years, generation after generation, they have constantly longed to escape this space.

They have always hoped for a day when an outsider would appear to guide them out.

And now, as Su Yu stood before them, they found it hard to accept.

Although unwilling to believe, they could not completely dismiss it either.

Everyone remained silent, afraid to speak, lest they shatter this illusion.

Seeing this, Su Yu could understand their feelings.

So, Su Yu had a thought and began to take things out of the Nihilicity Space.

Speaking of which, Su Yu still didn't understand the principle behind this Nihilicity Space. Even in this Manifestation Space, it didn't impede the Nihilicity Space's function.

With the convenience of the Nihilicity Space, Su Yu could carry a large amount of supplies and resolve the recent "diplomatic" crisis.

Now, Su Yu was about to use the resources from his Nihilicity Space once again.

However, this time, Su Yu did not take out any Energy Coins.

Nor any Mechanical Creations or similar items.

Instead, it was something quite ordinary.

It was...

Various foods, water, meat, vegetables, beverages, wine... were continuously taken out by Su Yu from the Nihilicity Space.

When Su Yu took these things out, he specifically used Spiritual Energy to heat and thaw them, while also opening the packaging.

Immediately, the aroma of food filled the entire Elder Council hall.

This aroma was more enticing to everyone than the Pure Spirit Energy of Energy Coins!

Because they, from childhood until now, had never eaten genuine food, only disgusting synthetic food.

And the raw materials of that synthetic food... best not mentioned.

Gulp!

Someone made a noticeable gulping sound.

Su Yu glanced quietly and found it originated from an Eight Star Elder.

This Elder was strong and robust, seemingly of the flesh body type, making the gulping sound particularly loud.

The other Elders were actually similar; their eyes were fixed on the food Su Yu took out, all swallowing their own saliva.

These Elders, although all Seven Star powerhouses, with great strength, were still human after all.

The desire for delicious food is engraved in their genes.

They craved it!

In this Manifestation Space, what could they eat? Always synthetic food, it's no wonder they craved more.

Especially considering these Elders might have been craving for hundreds or even thousands of years.

This torment, just thinking about it made Su Yu feel terrified.

Actually, Su Yu could go ten days or half a month without eating, with no problem, but if it were a month or two without eating.

He might start to miss good food, even if not hungry.

If it were a year, a hundred years, a thousand years without eating...

Better off dead.

Su Yu thought it would be unbearable; but in fact, he could use the Power of Nihilism to suppress his emotions and forcibly endure it.

But there was no need to endure.

And now, these Elders might have endured a millennium of hunger torment!

Seeing this food, their restraint was remarkable, merely gulping.
