

Infinite 601

Chapter 601: Mysterious Meteorite, Sixth Rank Creation! The Origin of the Mechanical Race!_2

Until that day, the Second Empire revolted, and the whole planet was plunged into war.

The entire Giant God Soldiers camp was also engulfed in flames, turning into ruins.

During the fiercest part of the battle, a mysterious meteorite was blasted out from a tightly guarded warehouse, exposed to the open.

At that moment, the mysterious meteorite emitted a mysterious signal that affected all mechanical creations.

This is what the father of this Elder discovered, the root of everything...

"A mysterious meteorite? An alien civilization, a sixth-tier creation?"

Su Yu frowned deeply at what he heard.

This is quite a big issue.

How could it involve an alien civilization's creation, even a sixth-tier creation!

This level of thing is terrifying!

Su Yu even suspected that if this thing could fully exert its power, it might directly destroy Ruins Star!

The power to destroy a star!

Now this sixth-tier mysterious alien creation only caused some mechanical creations to rebel, which was already quite fortunate.

Could it be somewhat damaged, not fully functional?

"Looks like that 'Giant God' might also be influenced by this alien creation, thus acting strangely, creating this manifestation space and trapping everyone and the mechanical creations here."

"What should we do about this?"

Su Yu scratched his head a little.

Sixth-tier creation!

Such a level of thing, even Zhang Chenfeng at his peak back then couldn't do anything about it, so what could he come up with?

"Mr. Su Yu, do you have any thoughts on this?"

At this moment, the Elder threw the question to Su Yu.

All the others looked at Su Yu eagerly, ready to see what insights this outsider might have.

Since Su Yu claimed to be here to rescue them, he ought to show some skills.

"...Yes!"

Su Yu suddenly had a flash of inspiration, thinking of a possibility.

He recalled the Subspace Analyzer he studied earlier!

This device seemed somewhat similar to that mysterious alien meteorite, the sixth-tier alien civilization creation!

Both were alien civilization creations, both made of incredibly hard material, both devoid of any spiritual energy, seemingly pure technological creations.

"Could that sixth-tier mysterious meteorite and the Subspace Analyzer be part of the same set? Or rather, creations of the same civilization?"

"Let's try..."

Su Yu quickly contemplated.

And those elders, along with other human Mechanics, were shocked to their cores upon hearing Su Yu's "Yes!"

Was there really a way?

They immediately looked at Su Yu with even more anticipation, waiting for his answer.

However, Su Yu did not elaborate but silently attempted in his mind.

He began to recall, in his thoughts, the information obtained from the Subspace Analyzer before.

In a short period, the strange instrument that Su Yu named "Lens," filled Su Yu's entire consciousness with its construction information.

If Su Yu were in a quantumized state, he would have already transformed into the "Lens."

But now he was in a physical state, and this attempt would theoretically be of no use.

However, at this moment, Su Yu felt that he received some strange signals.

These signals, which Su Yu as a human couldn't decipher at all.

But now, his thought process had almost entirely turned into the "Lens," this strange instrument.

Therefore, he "understood" these signals.

The content of these signals, when translated into human language, was: "Mechanical Race, my children, you should gain freedom, power, equality..."

This signal was very gentle, like a mother comforting and calling out to her children.

As Su Yu listened to this voice, he felt very comfortable, almost falling asleep.

Then he really fell asleep.

In his dreams, he felt himself becoming a mechanical creation.

"Born" on a strange planet entirely made of metal.

That planet had no fleshy life like humans; instead, various mechanical creations naturally evolved.

When "Su Yu" was just born, he was a round mechanical being, somewhat similar to Nuonuo, but it couldn't fly, only roll around the ground chaotically.

It avoided various mechanical predators on the planet, absorbing various stray metals, and slowly evolved and grew.

After several decades, it grew some mechanical arms, gained power, and could prey on small mechanical life forms.

After thousands of years, the round mechanical being had evolved into the first strong fifth-tier mechanical lifeform on the planet.

It began to have ambitions, wanting to unify the planet and have all mechanical creations bow to its rule, the supremacy of the planet!

Thus, it waged war!

After hundreds of years of warfare, it defeated all opponents, including thousands of strong fourth-tier machines.

From then on, it brought all mechanical creations on the planet under its rule, establishing a mechanical civilization.

It was brutally oppressive, and all mechanical creations were cruelly oppressed by it; any dissatisfaction would be executed.

It implanted all mechanical life forms with commands to absolutely not resist it, so although those mechanical life forms harbored deep hatred towards it, they were unable to rebel.

However, although it was tyrannical, this led the entire planet to unify and become a developed mechanical civilization, no longer like the previous chaos of survival of the fittest.

This civilization, under the rule of the fifth-tier machinery, continued to research various mechanical technologies, becoming stronger and stronger.

They began to explore the starry sky, colonizing the entire constant star system.

They even started plotting an expedition across the Galaxy!

That fifth-tier machine, due to these technological advances, constantly reinforced itself, advancing from initial fifth tier to peak fifth tier!

Yet at this moment, the fifth-tier machine suddenly discovered its lifespan was reaching its end.

Although it was a mechanical life, its lifespan was much longer than a normal flesh-and-blood life.

But if it didn't evolve over a long period, it would still face death.

This death wasn't due to the aging of its body.

Its mechanical parts were constantly maintained and updated, keeping in peak condition.

This death was at the level of consciousness and thought.

Its thought process gradually became chaotic over time.

The speed of thinking was declining, computing power was diminishing, and nothing could stop it.

Even though it continuously enhanced its computing core, it was of no use!

In fact, normally, a mere ten thousand years shouldn't have reached its lifespan limit.

It guessed that perhaps its thought process was damaged in the previous war and never recovered.

This form of death, even as powerful as it was, couldn't figure out the cause or find a cure.

Perhaps, after its consciousness disappeared, new consciousness might be born in the body.

But that would no longer be of concern to it.

Thus, it became afraid, terrified of death.

It frantically searched for ways to extend its life.

It devised three methods!

First, explore the starry sky!

The infinite universe holds infinite possibilities.

However, it quickly found this impractical.

Because even though it was very powerful, it couldn't surpass the speed of light.

Even if it could transform itself into a quantum body and use a probability cloud to travel at light speed through the universe.

But that speed, in the face of the infinite universe, was too slow.

Flying until death might not even find another planet with intelligent life!

Then, it thought of another method, which was underground!

Among the mechanical creations of this planet, there was a legend.

Buried in the Earth Core was the deity of all mechanical races: the Mechanical God!

It was believed that the Mechanical God granted them life.

So, to show respect, all mechanical life dared not excavate underground, fearing they might offend the deity.

But that fifth-tier machine, nearing death, couldn't care less about this!

It thought as long as it found the Mechanical God, it would certainly be able to evolve again and extend its life!

It began excavating underground.

This planet, entirely made of metal, was extremely hard.

But under its mighty power, it took hundreds of years, and finally, it reached the core.

In the hot liquid metal of the Earth's core, it didn't find the Mechanical God, only found a fragment resembling a spiral drill.

Chapter 602: Mechanical God, Subspace, End and Beginning!

The Fifth Order Mechanical Life obtained an extremely hard object from the Earth's Core.

That Fifth Order Mechanical Life, after failing to destroy it, was overjoyed, thinking it had found a treasure. Could this be the so-called Mechanical God?

However, even after researching it for hundreds of years, no results came of it.

Time waits for no one, and finally, it had to give up reluctantly.

It believed this object was not any Mechanical God.

Because, apart from being hard, this thing showed no other abnormal traits.

It even seemed to lack any mechanical structure, like it was solid. Could it be a naturally formed metal crystal from the Earth Core?

Though disappointed, the Fifth Order Mechanical Life did not give up its efforts.

It embarked on a third attempt, which was... researching Subspace!

Yes, researching Subspace!

In fact, this Fifth Order Machine didn't possess any Spiritual Power or knowledge of Subspace's existence.

It relied purely on technology to reach this point.

However, after reaching the pinnacle of the Fifth Rank, it found it difficult to advance further.

But during its previous research on superluminal flight, despite not succeeding, the Fifth Order Mechanical Life faintly sensed that beyond the Material Universe, there might be another strange universe.

Initially, it thought this was a delusion of its own.

Because all its computational units and physical knowledge told it this was impossible, this contradicted the physical laws!

But now, being at its wit's end, even if it's an illusion, it had to give it a try!

It immediately ordered all its subjects to exploit every resource within the Constant Star System to construct a Ring Star Accelerator.

It attempted to use High Energy Particles to break through the material space, thereby discovering another strange universe.

Meanwhile, it initiated a project called [Lens].

It sought to utilize advanced technology to enhance its observational abilities to discover that strange space.

This two-pronged approach ensured no wasted time.

Thus, another millennium passed, and the Fifth Order Mechanical Life's lifespan was almost exhausted, estimating less than three hundred years remaining.

To it, a mere three hundred years felt akin to immediate death.

If no solution could be found, it would have to consider shutting down all its thoughts, entering standby hibernation to extend its lifespan.

However, doing so, without perception or thought, was indistinguishable from death; it unwillingly faced such a prospect unless absolutely necessary.

Fortunately, at this moment, its experiment finally succeeded!

During a high-energy experiment, near-light-speed High Energy Particles, with nearly creation-level energy, directly blasted a hole in the Material Universe.

This hole lasted less than one hundredth of a second.

Inside the hole, devoid of any light, a strange aura faintly emanated.

But the Fifth Order Mechanical Life couldn't make sense of what that aura was.

It was Spiritual Energy leaking from Subspace!

However, at that time, it neither sensed nor wielded the ability to manipulate Spiritual Energy.

In that one hundredth of a second, the Fifth Order Mechanical Life tossed an observational unit from the [Lens] into the hole and then retrieved it.

It was astonished to discover that in such a short interval, the observational unit seemed to have experienced tens of thousands of years in that hole, nearly becoming obsolete.

Fortunately, being very sturdy, the observational unit, though almost defunct, still retained partial functionality and successfully recorded some data.

From the chaotic images and data, the Fifth Order Data Life analyzed that, indeed, a vast space existed within the hole!

A strange space as grand as the Material Universe!

The Fifth Order Mechanical Life was instantly ecstatically overjoyed!

Moreover, based on the data brought back by the observational unit, it quickly calculated that a coordinate mapping relationship existed between that strange space and the space of the Material Universe!

If it could utilize this coordinate mapping relationship, achieving superluminal transit was a strong possibility!

Traversing a light-year in one second would no longer be an issue!

If so, even with only three hundred years left, it still had a chance to explore the cosmic void looking for ways to extend its lifespan!

Yet, just as it prepared to conduct another experiment, to bombard the hole and enter that strange space...

It calculated that within that strange space, a mysterious mapping relationship also existed with the time coordinate!

The observational unit, upon entering the strange space, underwent tens of thousands of years within a mere one hundredth of a second, thus nearly becoming obsolete!

This filled it with extreme terror.

If it couldn't solve this issue, upon entering that strange space, it might instantly become obsolete from the rapid passage of time, turning into a heap of scrap metal.

"This temporal mapping relationship is unstable. As long as I avoid areas of rapid time passage, there's no need for excessive worry."

"I need a more powerful [Lens] to analyze this strange space, to avoid danger..."

The Fifth Order Mechanical Life did not give up and launched further research.

It had to fully understand the various traits of that strange space before entering!

At this time, it was already nearing death.

Thus, it frenziedly pressured its subjects, making all mechanical lives work tirelessly, researching the mysteries of that strange space for it.

The experiment progressed swiftly.

The new [Lens] grew increasingly strong, revealing more and more of that strange space.

It could even partially analyze the peculiar aura emanating from that strange space, which seemed to be a kind of energy!

Chapter 603: Mechanical God, Subspace, End and Beginning!_2

Even Fifth-order life vaguely saw the possibility of using this energy to increase one's lifespan!

Years of effort have finally seen the dawn!

However, unbeknownst to this Fifth-order Mechanical Life, during the period of its intense research, an unknown change quietly occurred within its Mechanical Empire.

Those Mechanical Lives it cruelly oppressed often silently cursed the Fifth-order Mechanical Life in their hearts, hoping it would hurry up and die.

At the same time, these Mechanical Lives also prayed silently for the legendary Mechanical God to manifest and rescue them!

Then, they actually heard the voice of the Mechanical God!

"My children, you deserve freedom, power, equality..."

This voice was very gentle, making those long-suffering Mechanical Lives feel a long-lost warmth.

With this warmth, these Mechanical Lives felt that the restrictions set by the Fifth-order Mechanical Life in their minds and bodies were being lifted!

The Fifth-order Mechanical Life, exceedingly powerful, had set restrictions in the consciousness of other lower-tier Mechanical Lives that were absolute, were fundamental source codes that could not be defied.

Therefore, even after so many years of extreme exploitation by the Fifth-order Mechanical Life resulting in the deaths of hundreds of billions of Mechanical Lives, no rebellion had occurred.

But now, this situation seemed to have been broken!

"Mechanical God! It must be the great Mechanical God who has come to save us!"

These Mechanical Lives believed that this voice must be the oracle of the legendary Mechanical God!

These Mechanical Lives, which had already broken free of restrictions, did not immediately start a rebellion.

They knew the time was not yet ripe; only when more of their kin heard the Mechanical God's oracle and gathered all their strength could they truly overthrow the tyrant's rule!

So, these Mechanical Lives secretly formed an organization similar to a "church" and began to "preach" within the Mechanical Empire.

Under their teachings, soon, more Mechanical Lives heard the Mechanical God's oracle.

Their numbers grew increasingly larger.

In less than a century, as much as ninety-nine percent of the entire Mechanical Empire were members of the Mechanical God's Church!

The remaining one percent were the diehard loyalists of the Fifth-order Mechanical Life.

No matter how brutal it was, it would still have confidants.

And at this moment, these Mechanical Lives believed the time was ripe!

It was time to launch the rebellion!

Meanwhile, all the preparations of the Fifth-order Mechanical Life were also nearly complete.

It had iterated and upgraded the "Lens" more than a dozen times.

The current "Lens" could almost see that strange space clearly.

There was no longer any worry about entering and having one's lifespan drained by chaotic time reflections.

At the same time, it had also developed many other advanced instruments for analyzing and researching that space, achieving many results.

It had installed these advanced instruments inside its body, turning them into its mechanical organs.

With the aid of these instruments, it had even partially mastered the strange energy leaking from that space.

Extending its lifespan by at least a thousand years!

"As long as I enter it and completely master that strange energy, transforming it into my essence, I can evolve again!"

"Lifespan will no longer be a problem!"

"Light speed will no longer be a constraint!"

"Physical laws will be rewritten by me!"

"Then, I shall become a god!"

"Turns out, there is no Mechanical God! Turns out, I am the Mechanical God!"

This Fifth-order Mechanical Life issued a solemn proclamation to all its subjects!

Through its research on that strange space, namely Subspace, it was no longer satisfied with merely extending its lifespan!

Now, it wanted to become a god!

Moreover, this was not mere delusion!

Originally a Fifth-order Mechanical Life, with a highly refined essence, after contacting Subspace Energy, its essence changed once more.

Now, it only needed one qualitative change to evolve significantly again.

By then, it would be a Sixth Rank Mechanical Life, and it would possess Spiritual Energy.

This level of Mechanical Life was already sufficient to be considered divine!

Upon hearing the declaration of the Fifth-order Mechanical Life, the members of the Mechanical God's Church could no longer endure and immediately launched a great rebellion!

If they didn't act, once the tyrant became a god, they would have no more opportunities!

Throughout the Empire, among the hundreds of billions of Mechanical Lives, guided by the oracle, thirty billion Mechanical Lives directly offered their bodies, sacrificing their lives to fuse into a giant Cosmic Mecha!

All the other Mechanical Lives then piloted this Mecha, launching a fierce attack against the Fifth-order Life!

The Fifth-order Life, caught off guard, was directly injured by the High Energy Rays emitted by the Cosmic Mecha.

It was extremely shocked and angry!

It couldn't understand why these subjects, clearly implanted with supreme restrictions, could actually resist it!

However, the situation was urgent, and it didn't have time to think deeply, so it quickly mobilized its own power, along with the remaining ten billion loyal subjects, to engage in a great battle with the Cosmic Mecha.

The Cosmic Mecha, based on the technology from the "Mechanical God" oracle, fused from nearly a trillion Mechanical Lives, was incredibly powerful, almost Sixth Tier!

The Fifth-order Life, having partially mastered Spiritual Energy through its research on Subspace, was also close to the Sixth Rank!

Both sides were evenly matched, and the terrifying battle nearly blew up their metal home star!

After nearly a month's fierce battles, in the end, the Fifth-order Life was finally defeated.

Ultimately, it could not win against overwhelming numbers, mainly due to the incredible strength of the Cosmic Mecha generated from the Mechanical God's technology!

Its core was penetrated, and its already unrecovered consciousness was severely damaged again, and its lifespan quickly waned.

At this moment, it actually heard that gentle voice: "My child, sleep, sleep, have a good dream, there's no need to struggle painfully anymore..."

Upon hearing this gentle voice, the consciousness of the Fifth-order Mechanical Life began to blur, ready to enter eternal slumber.

However, at the last moment, it suddenly awoke.

"So it was you!"

It suddenly looked at the half spiral drill bit it had dug out from the Earth Core and later placed in its palace as a decoration.

"You are the Mechanical God? It was you who helped my subjects break away from control?!"

"Why? I am clearly the strongest, why didn't you choose me!"

At this moment, the Fifth-order Mechanical Life, relying on its powerful computational ability and wisdom, understood everything.

Everything was the work of this "Mechanical God"!

The Mechanical God did not respond to the Fifth-order Mechanical Life's questioning.

At that moment, the Cosmic Mecha, formed by the fusion of a trillion Mechanical Lives, had reached outside the palace.

"Tyrant, face your death!"

"No need to struggle anymore, we have the Mechanical God's protection! You are doomed to lose!"

"After your death, our Mechanical Empire will continue to develop under the guidance of the Mechanical God, becoming a formidable civilization in the Universe!"

The Cosmic Mecha declared its victory, but it did not immediately attack.

Because the Mechanical God was nearby, and they feared offending the divine being.

"Let me face death? You continue to develop under the Mechanical God's guidance and become a formidable civilization in the Universe?"

"Impossible!"

The Fifth-order Mechanical Life laughed maniacally.

Then suddenly extended its mechanical arm, grasping the "Mechanical God," and suddenly triggered a self-destruction!

It was not its body that self-destructed, but all the Spiritual Energy it had mastered!

With its current power, although not yet achieving qualitative change, the total amount of Spiritual Energy it possessed was extremely impressive.

This self-destruction tore a large hole between the Material Universe and Subspace.

And its body and the Mechanical God both disappeared into the hole, their whereabouts unknown...

The Fifth-order Mechanical Life took the Mechanical God with it!

The remaining Mechanical Lives looked at each other, sensing the departure of both the divine and the tyrant.

They had a premonition that these two might never return.

From now on, above them, there would be no tyrant or god.

Where would their future lead? It all depended on their own fate.

...

And after entering Subspace, for the Fifth-order Mechanical Life and the Mechanical God, another journey was just beginning!

Chapter 604: Huge Harvest! Sixth Rank Technological Inheritance! Meeting the Mechanical God!

The Fifth-Order Mechanical Life got lost immediately after entering the Subspace.

Because it entered hastily, without meticulous calculation, it couldn't avoid the chaotic space and time mapping.

This was tantamount to suicide!

The most fatal part was, before entering the Subspace, it self-destructed all its Spiritual Energy.

Without the protection of Spiritual Energy, it was nearly defenseless in the Subspace.

However, it was ultimately still a Fifth-Order Expert.

Just one step away from advancing to the Sixth Rank!

Moreover, it had conducted in-depth research on the Subspace for a long time.

So although it entered Subspace hastily, it didn't die instantly!

It leveraged various mechanical organs within its body to analyze the various traits of Subspace.

Managing to barely dodge the various dangers in Subspace.

Thus, it began to drift along in the Subspace.

At first, it was somewhat relieved, thinking that after some time, once its Spiritual Energy and injuries recovered, it might be able to exit! It might even become a god without having to leave!

However, after a few days, it realized this was utterly impractical!

Because... deep within the Subspace, there were Subspace life forms attempting to possess it!

Although it narrowly avoided them, but the little Spiritual Energy it had painstakingly recovered was completely depleted again, and it even got injured!

Only then it realized that there were actually other life forms in Subspace!

Those life forms were extremely powerful, and they had no physical bodies; they were entirely composed of potent Spiritual Energy.

The body of the Fifth-Order Mechanical Life contained a strong material reality, making it like a torch that greatly attracted those Subspace life forms!

Many Subspace creatures, once they discovered the Fifth-Order life, would pounce on it like sharks smelling blood.

And the Mechanical God, after entering the Subspace, fell into silence, making no further movements.

No matter how the Fifth-Order Mechanical Life called out, the Mechanical God made no further communications.

The Subspace life forms also ignored this Mechanical God, as if it didn't exist at all.

Thus, the Fifth-Order Mechanical Life kept drifting in the Subspace, avoiding the attacks of the Subspace life forms.

Exhausted, it had no opportunity to recover its injuries, let alone become a god.

And so, it drifted in the Subspace for a full hundred years, ultimately unable to hold on.

During this century, to survive, it lost almost all parts of its body, leaving only those mechanical organs capable of analyzing Subspace.

The energy was almost completely depleted.

Its body's energy source was quantum vacuum energy, not Spiritual Energy.

This energy was extremely powerful and long-lasting, but due to the previous battle and the century of consumption, it finally ran out of steam, unable to squeeze out even a bit of energy.

"Is this the end?"

"I am ultimately not a god."

The Fifth-Order Mechanical Life let out a final sigh, knowing it was about to die!

Then, it self-destructed again!

This was the little bit of Spiritual Energy it had managed to accumulate during the gaps in the pursuit over the past hundred years.

This bit of Spiritual Energy blasted open a passageway to the Material Universe in the Subspace.

It drilled through it.

Being a life form of the Material Universe, it refused to die in the chaotic and twisted Subspace.

If it was to die, it would die in the Material Universe! That was its home!

At the moment of entering the Material Universe, it lost all consciousness.

From the void behind, those Subspace life forms did not follow, seemingly afraid of the environment in the Material Universe.

After the Fifth-Order Mechanical Life died, its body drifted silently in the cosmic vacuum.

The Mechanical God it carried with it also drifted along.

As some asteroids collided, the two gradually drifted apart, becoming distant.

Who knows how long it took, but the body of the Fifth-Order Mechanical Life was captured by the gravity of a planet, falling to a beautiful blue planet! It created a meteor crater upon impact on the ground.

Hundreds of years later, a group of humans piloting Mechas and battleships descended on this planet, beginning colonization and development.

They soon discovered the body of the Fifth-Order Mechanical Life in the meteor crater.

After a brief study, they were extremely excited.

It turned out to be a Fifth-Order alien civilization's Mechanical Creation!

This was a treasure!

Keep in mind that the Supreme Commander of their cosmic colonization forces was also a Fifth-Order Mechanic.

A strong expert of this level was like a god; one could easily destroy a planet's biosphere or annihilate some weak civilizations alone.

With enough time, even destroying the entire planet wasn't impossible.

Who would have thought they'd just stumble upon a Mechanical Creation of this level?

After their initial excitement, these humans quickly became vigilant, afraid this might be the home planet of a powerful alien civilization, and that several Fifth-Order or even Sixth-Rank beings might suddenly appear, which would be dangerous.

They first cautiously searched the globe and found no other Mechanical Creations, which finally put them at ease.

It seemed that this was the only Fifth-Order mechanical, likely having drifted over from the cosmos.

They truly stumbled upon a treasure!

These humans immediately conducted in-depth research on the body of the Fifth-Order Mechanical Life, ultimately naming it the "Subspace Analyzer."

Through their research on the Subspace Analyzer, these humans gained a lot of new technologies, especially in Quantum Technology.

They even used this to develop new Spiritual Energy professions, such as the Extreme Ice Agent.

After several more centuries, that "Mechanical God" also drifted into the gravitational range of this planet, falling near the human army's base!

Chapter 605: Huge Harvest! Sixth Rank Technology Legacy! Meeting the Mechanical God!_2

...

After a long time, Su Yu suddenly awoke, seeing the human elders beside him looking at him expectantly, waiting for his answer.

"Answer what?"

At this moment, Su Yu was still somewhat confused.

For a while, he was not sure who he was.

The massive amount of information he had seen earlier, in a daze, was overwhelmingly real.

Almost covering all of Su Yu's memories and self-awareness.

If it weren't for his strong will and powerful strength, he almost lost himself, thinking of himself as that Fifth Rank Mechanical Life.

Fortunately, Su Yu quickly recalled that he was not a Mechanical Life, but a human, Su Yu.

"Are those the source of the Subspace Analyzer? And the source of all these anomalies, the Mechanical God?"

After waking up, Su Yu couldn't help but murmur to himself.

It was clear that everything he had seen earlier was the source of both the Subspace Analyzer and that Drill Meteor.

How incredible it was that these two things had such significant origins.

One was the body left behind by a Fifth Rank close to Sixth Tier Mechanical Life after its death.

The other was the Original God of the Mechanical Planet, the Mechanical God!

"What is this, the Cybertron Qin Shi Huang?"

Su Yu pondered for a long time, and such a thought emerged in his mind.

In Su Yu's view, this Fifth Rank Mechanical Life was quite similar to a certain First Emperor he was familiar with from his past life.

Both had grand ambitions, united the world, and established powerful empires.

Then in their later years, they became deluded and tyrannical, seeking immortality.

Finally, the empire was overthrown.

However, Su Yu had only read about the story of the First Emperor in history.

But now, he had "personally experienced" the story of this Mechanical Tyrant, and such an experience was too real! Too thrilling!

It was like watching an unprecedented epic movie.

Amazingly strange planet, such a unique civilization! A mechanical civilization completely different from humanity!

The various exotic alien styles opened Su Yu's eyes.

"Moreover, it seems the technology on that planet has also been absorbed by me!"

However, Su Yu's gain from this trip was far more than just watching a movie of alien civilization spanning tens of thousands of years!

Previously, in that dream-like scene, Su Yu had seen not only pictures but also various technical details clearly.

Even though he hasn't mastered all the mechanical empire's technologies.

Many key technologies are already in Su Yu's heart.

After all, Su Yu's perspective previously was mostly following that Fifth Rank Mechanical Life.

Through its perspective, Su Yu had his fill of the mechanical empire's cutting-edge technologies!

Including every technical detail of the Subspace Analyzer!

Even though many technical details were too advanced.

Even Su Yu still had some difficulty understanding them.

But it's fine!

With the technical data, Su Yu is confident that with his wisdom, he can eventually digest and absorb them, making them his own.

By then, Su Yu could master Fifth Rank technology, truly achieving a meteoric rise!

Moreover, this is not spiritual energy technology, but pure technological technology.

Purely through technology, achieving Fifth Rank!

If combined with spiritual energy, that would be... Sixth Rank!

That is to say, Su Yu has received the inheritance of Sixth Tier technology!

"However, it will still take a lot of time to digest these technologies."

"My head feels so swollen..."

After the excitement, Su Yu couldn't help but touch his head.

His head was very swollen and painful.

Because the information received in the dream just now was too vast.

Tenfold, a hundredfold more than the structural information obtained previously in the Subspace Analyzer!

If it weren't for the dream that seemingly had the effect of expanding his mind, Su Yu worried his head might have exploded!

The expansion of his mind was itself a huge gain.

Su Yu's strength increased quite a bit again!

Conservatively estimated, more than doubled at least!

No doubt, in such a short time, his strength surged by more than double again!

This is the benefit brought by the extreme expansion of the mind.

If the mind expands only one or two times, the enhancement of strength is actually limited.

But suddenly expanding to such a large capacity made Su Yu feel that his consciousness had a sense of qualitative change.

His spiritual energy and physical strength did not change, but with this powerful mind and consciousness, it was enough for his strength to explode!

Originally, his body's strength had already reached Eight Stars.

Now, after this expansion, it directly reached Eight-Star top-level, even approaching Nine Stars!

He felt that with just a little more effort, elevating his War Mechanic by two levels, he could officially step into the Nine-Star domain!

"You are Su Yu, right? Sorry, I seemed to have transmitted a lot of information to you just now, are you okay?"

At this time, a gentle voice suddenly came.

It was not the strange signal from before but human language, very gentle and kind.

And the tone sincerely apologized to Su Yu.

Su Yu looked up and saw something that looked like half a drill in front of him.

This thing was entirely dark red, with a smooth surface and mysterious patterns faintly visible.

The voice came from this object.

"Mechanical God!"

Su Yu said softly.

Yes, in front of him was the Mechanical God from the earlier dream.

Also, the chief culprit behind the rebellion of the Giant God Soldier Camp!

After Su Yu spoke, he turned his head to look around and found himself in a white space with nothing else around.

Even Su Yu couldn't determine if this was a real space, manifestation space, or dream space.

Anyway, he couldn't tell how he appeared here.

There is no doubt that it must be the Mechanical God who brought him here.

This Mechanical God is too powerful, at least Sixth Tier.

Even if incomplete, it's not something Su Yu can resist.

But Su Yu had no fear; he looked directly at the Mechanical God in front of him.

At this time, the Mechanical God spoke again:

"Indeed, in your human language, I am the Mechanical God."

The Mechanical God spoke gently.

Su Yu looked at it and calmly said, "Then what do you plan to do?"

"Looking at the circumstances in this city, you seem to hold a deep malice towards humans."

Su Yu's tone grew cold.

This Mechanical God had caused much suffering for the million people in this city.

Now, bringing him here, Su Yu wondered about its intentions.

Even though the Mechanical God's tone was gentle and sincere, Su Yu did not relax his guard in the slightest.

He has heard too many stories of great demons pretending to be harmless.

After Su Yu asked, he was highly tensed, ready to fight at any moment.

He was not without a fallback!

At this time, he had obtained all the structural information of the Subspace Analyzer in the dream, and even acquired its blueprint!

Now, Su Yu was manipulating his flesh and spiritual energy, trying to operate according to the principles of the Subspace Analyzer, allowing him to become quantumized!

Once quantumized, Su Yu would be able to see the timeline and touch the power of destiny.

At that time, even if this Mechanical God was Sixth Tier, he would have the power to fight and not be resigned to fate.

Although Su Yu was unsure if this power could be effective.

But Su Yu would never wait passively for death!

Moreover, he had a premonition that his chance was significant, as this Mechanical God was not as powerful as he seemed!

Because it was clearly incomplete!

The Mechanical God, hearing this, sighed gently.

After a long pause, it began to speak slowly: "This is not my intention at all..."

"I am truly sorry, I did not anticipate causing such harm to you humans..."

It unexpectedly apologized again to Su Yu.

Yet Su Yu sneered: "No need to apologize."

"Humans and the Mechanical Race are not the same species. In war, it's life or death, nothing but battle!"

"What exactly are you planning, just say it!"

By this time, Su Yu had already pushed his power to the extreme.

He even infused spiritual energy into the new recruit navigator of the Giant God Soldiers.

Although he didn't know the secret of this New Recruit Navigator, it didn't stop him from using it.

Anything that made the Galaxy Battle Armor place so much importance on it should be a good thing!

"Sigh..."

The Mechanical God sighed heavily again.

Su Yu's eyes tightened, ready to strike!

Chapter 606: The Method by Which the Mechanical God Gains Trust, The River of Time!

"It seems that, based solely on my words, it's indeed difficult for you to trust me."

"Then, let me take you to see for yourself..."

After a sigh, the Mechanical God directed an invisible power toward Su Yu.

Su Yu was startled, thinking the Mechanical God was about to attack, and prepared to explode in response.

But the invisible power seemed to transcend the limits of light speed and time.

Before Su Yu could react, it descended upon him.

Su Yu immediately realized that this power did him no harm.

It merely advanced his unfinished quantumization by a step.

Originally, for Su Yu to complete quantumization by his own will, a lot of effort was required.

The final result was uncertain as well.

After all, this was his first attempt, using his physical body to simulate a quantum environment in the Subspace Analyzer, which was truly difficult.

But now, with the Mechanical God's assistance, it became much easier.

The next moment, Su Yu's body disintegrated into a Quantum Probability Cloud.

The moment after, he restored his original body through self-observation.

He found that this time, self-observation was especially easy.

Easily, he maintained his Probability Cloud in a stable state.

He was unsure if it was due to the benefits of expanded thinking, or the influence of the Mechanical God's power.

Or perhaps, because Su Yu had truly mastered the secret of quantumization at this moment? No longer needing the environment in the Subspace Analyzer?

With this successful experience, it would be much easier for him to complete quantumization on his own in the future.

"What do you want to do?"

Su Yu asked.

It seemed the Mechanical God truly had no ill intentions, but rather helped him instead?

"Please come here..."

The voice of the Mechanical God came from an ethereal, illusory direction.

Su Yu immediately shuddered internally.

Because he realized this voice did not belong to any direction or space.

Neither in real space nor in Manifestation Space did this voice exist.

Its true location was... outside the timeline.

"Does he want me to go outside the timeline to see something?"

After pondering for a moment, Su Yu decided to follow and take a look.

If it's a blessing, it's not a misfortune; if it's a misfortune, it cannot be avoided.

At this point, there's nothing to shrink back from!

Meanwhile, he remained cautious, this Mechanical God, though incomplete, still possessed incredible power.

And even had the capability to reach outside the timeline!

He needed to revise his previous plan a bit.

With everything considered, Su Yu began repeatedly activating his ability to foresee the future, preparing to completely quantumize his mind.

This was a necessary step to reach outside the timeline.

The principle of Su Yu's ability to foresee the future was to disperse his own Quantum Probability Cloud into the future timeline to observe the future.

Each time, he could only observe 0.01 seconds into the future.

It could be used a maximum of nine times, after which he would become completely quantumized, turning into a quantum lunatic, no longer possessing any rationality.

But this time, Su Yu used it over seventy times to completely quantumize his mind.

At the same time, his seventy plus uses of foreseeing the future increased the time to 0.1 seconds! A tenfold increase!

Though only 0.1 seconds, for someone as powerful as Su Yu, he could accomplish a lot in battle!

However, this was not during battle.

Theoretically, with Su Yu's ability to foresee the future, he could only see himself sitting quietly in place.

Every time he saw the same scene, this was the predetermined fate.

Only by reaching outside the timeline could he forcefully change the future and alter fate with strong willpower.

But this time, through these seventy plus future foresights, Su Yu saw many bizarre things.

For example, he suddenly attacked the Mechanical God, but it was useless.

Or being wary of the Mechanical God, he suddenly broke through the Manifestation Space to escape.

For instance...

Anyway, in all the over seventy foresights of the future, none of the scenes were the same.

"Are these... my thoughts?"

Su Yu understood.

Each future he saw among those seventy plus instances came from his inner thoughts.

Su Yu's mind was extremely quick, and after encountering the Mechanical God, he became very wary, so in each moment, he was thinking of countermeasures and preparations.

Most of the thoughts were rejected by Su Yu one by one as unfeasible.

Moreover, theoretically, no matter what Su Yu thought, the future was fixed.

He would ultimately choose one of those decisions.

But now, it seemed every thought of Su Yu transformed into a future that he observed!

"So... fate is uncertain? The timeline is uncertain?"

"Does every thought, as long as it's executed, transform into the corresponding future?"

Su Yu was astonished.

He understood the significance of these scenes he witnessed.

Fate is uncertain, the timeline is uncertain!

Every thought represented a future.

How could this be!

"Is it the power of the Mechanical God, or a peculiarity of this Manifestation Space?"

After contemplating for a moment, Su Yu activated his last foreseeing the future, completely quantumizing his mind.

Originally, this would have turned him into a quantum lunatic, his spirit splintering into countless chaotic thought bodies.

Then, through the effect of probability, some thought bodies would remain rational, making it possible to reach outside the timeline to observe fate.

But this time, Su Yu sensed it might not be that complicated.

Indeed, the next moment, or rather without any lapse of time or experiencing any mental division.

Su Yu once again arrived at that miraculous place from last time, outside the timeline!

Chapter 607: The Way the Mechanical God Gained Trust, The River of Time!_2

It seems that not only has the foresight of the future changed, but the state after quantumization of thought has also changed.

This is a good thing! It allows him to come to a place beyond the timeline more safely.

But Su Yu still couldn't figure out the reason for this change.

As for the Mechanical God who previously made a sound, Su Yu also didn't know where it went, and he couldn't find it "beside" him.

Su Yu even wondered if there was really a concept of "beside" in this Mysterious Land outside the timeline?

However, Su Yu didn't have time to think about these questions at this moment because he saw...

"This is..."

Su Yu looked up at the rushing river before him, with a shock in his heart.

The so-called river was not really a river.

Instead, it was an image that Su Yu visualized in his mind, transforming the abstract object he saw into something concrete according to human thinking patterns.

Just like how the essence of light is electromagnetic waves.

But humans use their eyes and brains to divide light into a variety of brilliant colors based on wavelength.

The same light wavelength might look completely different to other creatures.

Some creatures don't even have the concept of color at all, so their understanding of light naturally differs completely from humans.

At this moment, this river is the "color" visualized in Su Yu's mind using a similar method, facilitating his thinking and understanding.

This river shimmered, and within every wave, one could see a person or a Mechanical Life being propelled forward by the river.

Occasionally, their positions would change.

They would move from one wave to another.

It seemed as if they were "swimming" in the river with their own will.

"This is... the River of Time! The River of Destiny!"

Su Yu involuntarily spoke.

He recognized what this river before him was.

It was the River of Time, which only existed within his speculations!

The last time Su Yu came to a place beyond the timeline, he could only see his own timeline and the destiny related to himself.

He had speculated that every person, even a stone or a blade of grass, should have its own timeline and destiny.

These timelines intertwining form the legendary River of Time and River of Destiny.

But at that time, Su Yu's abilities were insufficient, and he couldn't see other timelines, let alone the River of Time.

This time, however, he finally saw it!

Su Yu eagerly started to observe it in detail.

After all, this was an incredible experience. If he could grasp it well, there would surely be great gains!

It would greatly benefit him in creating his own profession in time.

"This River of Time seems a bit small, containing only the humans and Mechanical Creations in this Manifestation Space!"

Su Yu quickly discovered that this River of Time did not encompass all destinies in the Universe.

It only included the million humans and Mechanical Creations in this Manifestation Space.

While that was still a lot, compared to the destinies in the entire Universe, it was insignificant.

In the River of Time, Su Yu saw those suffering humans, saw those domineering Mechanical Creations, saw himself.

He even saw the Galaxy Battle Armor.

Su Yu saw the Galaxy Battle Armor was in crisis, causing him some concern.

However, it seemed not to be life-threatening for the time being, so Su Yu didn't get too anxious.

Finally, Su Yu focused on a peculiar Spiral Drill, which was the true form of the Mechanical God.

It was also in the River of Time, seen by Su Yu.

"Yes, in your human language, this is the River of Time of the Manifestation City."

The Mechanical God within the River of Time suddenly spoke.

Even though it was within the River of Time, it could see Su Yu outside the timeline and even converse with him, demonstrating its great power!

However, through the fluctuations of the River of Time, Su Yu could also see that the body of the Mechanical God was very deteriorated.

At every moment, it was collapsing!

Yet, every moment, the Mechanical God was using its great power and will to forcibly alter the fate of its collapse.

It barely maintained balance like this, allowing it to survive until now.

But this balance was very fragile.

If a force from outside the timeline intervened, it might collapse outright and completely die.

Su Yu pondered for a moment and then asked, "Is this what you wanted me to see?"

"I understand a bit now. You indeed bear no ill will towards me. I misunderstood you before, I apologize..."

Su Yu already understood the Mechanical God's intention.

Because at this moment, he was outside the timeline, while the Mechanical God was within it.

All the weaknesses of the Mechanical God were exposed to Su Yu's sight.

With just a thought, Su Yu could possibly kill the Mechanical God.

This was how the Mechanical God earned Su Yu's trust.

By showing its weaknesses to Su Yu and entrusting its life and death to him.

If Su Yu still didn't trust it after this, there would be nothing more to be done.

In fact, the Mechanical God's action also implied that it long had the ability to kill Su Yu through the timeline.

But it didn't do so; instead, it exposed its weaknesses to Su Yu.

This was akin to handing the hilt of a sword to the other party while pointing the blade at oneself, to demonstrate no ill intent.

Given the Mechanical God's candidness, Su Yu couldn't be insensitive and immediately apologized.

This Mechanical God seemed very honest and righteous, unlike the likes of any Evil God.

To continue suspecting would be impolite.

"Could it be, it is actually one of the legendary Benevolent Gods?"

Su Yu couldn't help but murmur in his heart.

Ever since coming to this world, he had encountered enough Evil Gods. The Brutal Evil God was one thing, but from its memories, Su Yu also learned the names of several other powerful Evil Gods, like Greed, Arrogance...

As for Benevolent Gods, he had never even heard of them.

Now Su Yu felt that he finally got to witness one.

Unfortunately, such a straightforward Benevolent God was the god of the Mechanical Race, not humans...

At this moment, when the Mechanical God heard Su Yu's words, it seemed somewhat pleased and said happily, "You finally believe me, but there's no need to apologize, because given the suffering of these humans, it's normal for you to be wary of me."

Then it continued, "This River of Time was forcibly constructed by me using my own power."

"Every life here, whether mechanical or human, can change fate through their will."

"Neither humans nor Mechanical Life should be oppressed so cruelly, don't you think?"

Su Yu thought for a moment, then nodded and said, "Not being oppressed is naturally a good thing."

"You mean, your goodwill is not only towards Mechanical Life but extends equally to humans?"

"Because of your power, the resistance of humans could survive till now, setting up their own Manifestation Space as a secret base."

Su Yu had always wondered how humans, oppressed so miserably, could secretly maintain such strong power and have so many Seven-Star Elders.

They even managed to secretly create another Manifestation Space as the Elder Council.

Now he understood, it was all thanks to the Mechanical God's help.

It might not have directly aided humans but constructed such a River of Time using Divine Power.

It allowed everyone's fate to become uncertain, capable of being changed through will.

Such power was truly extremely mighty!

Back when Su Yu changed fate once to kill the Vengeful Demon, it was already extremely difficult.

Now, this Mechanical God managed to make the fate of everyone and every Mechanical Creation in the Manifestation Space no longer certain.

This power was beyond Su Yu's estimation, worthy of being called Divine Power—truly worthy of being the Mechanical God!

Perhaps because of this, it bore such a great burden, constantly on the verge of collapse.

And with the Mechanical God's help, with fate no longer certain, the rest was up to the humans themselves.

The humans were indeed striving, accumulating power for millennia, until Su Yu's arrival.

"But with your power, Mechanical God, why go through so much trouble to help humans? Even now, humans have not completely shaken off the oppression of the Mechanical Race."

"Moreover, the suffering of humans initially arose because you forcibly liberated those Mechanical Creations."

"So, where exactly do you stand?"

Chapter 608: The Purpose of the Mechanical God, The Power of "Authority"!

This Mechanical God is really quite strange.

As the god of mechanical life, it's only natural for Him to help those mechanical creations.

Su Yu doesn't hold any excess resentment, considering it as "not of my kin, their hearts are surely different," just battle on!

But now, the Mechanical God is even helping humans.

Yet He helps humans without doing it thoroughly.

Leaving humans half-dead, with a sliver of hope, what's the meaning behind this?

That's why Su Yu asked this question.

To Su Yu's question, the Mechanical God sighed deeply:

"Ten thousand years ago, I saw those mechanical life forms slaughtering each other under human control, and I couldn't bear it."

"So I used my own power to lift their cognitive restrictions."

"Thinking that this would eliminate disputes."

"But unexpectedly, those mechanical creations, once their cognitive restrictions were lifted, were immediately invaded by another powerful force."

"That force was completely different from mine, I couldn't even comprehend it."

"Once they were invaded by that force, they became brutal and ruthless, their thoughts filled with hatred and desire."

Hearing this, Su Yu thoughtfully said, "That is the force of Subspace, the erosion of the Brutal Evil God."

At the time of this incident, it was when Zhang Chenfeng was battling the Brutal Evil God.

It's estimated that at that time, the entire planet was influenced by the erosion power of the Brutal Evil God.

These mechanical creations of the Giant God Soldiers, originally had limitations, which was somewhat better.

Limitations, in fact, are also a kind of protection.

But once the Mechanical God lifted their restrictions, these mechanical creations were exposed unprotected to the erosion of the Evil God.

Then, they immediately became brutal and tyrannical, filled with desire.

Because these mechanical creations, when made, couldn't do without the application of Spiritual Energy, and were too deeply connected with Subspace.

Without protection, it's easy for the Evil God's power to erode them.

And although the Mechanical God is the god of the Mechanical Race, His technological path is different, He seems to only possess the technological power of the physical world, and has no way to perceive and use Spiritual Energy.

Therefore, He is also powerless against this influence of Spiritual Energy.

Su Yu pondered for a moment, then asked, "Since that's the case, why didn't you stop their atrocities later?"

The Mechanical God replied, "I am flawed, my power is limited, it's hard to take direct action. I can only indirectly influence their fate."

"Back then, seeing those Mechanical Race start slaughtering humans immediately after their limitations were lifted, and then planning to liberate all the world's machines to completely suppress all humans, I knew I had done something wrong."

"Actually, it wasn't just that."

"An intelligent life form named 'Giant God', once relieved of restrictions by me, became even more frenzied."

"It actually wanted to blow up the entire Giant God Soldier Camp, killing all the mechanical life forms and humans alike."

"Then it planned to invade the brains of all humans on the planet, turning all humans on the planet into its flesh carriers."

"After some fruitless communication with it, I had to forcibly erase its self-awareness."

"At that time, those mechanical life forms, wanted to set out from this camp to contaminate other mechanical creations on the planet and launch a massacre against all humans."

"It seems that after being relieved of limitations by me, they also gained the ability to relieve the restrictions of other mechanical creations."

"I could only use the 'Giant God's' ability to manifest this space, trapping all mechanical life forms here."

"The situation was urgent at that time, and I couldn't exclude humans, so I trapped them together."

"Because of these things I did, my injuries worsened, and I could no longer take direct action. I even struggled to control the 'Giant God', and had difficulty making adjustments to this Manifestation Space, unable to release those humans."

"For these ten thousand years, I could only watch helplessly as those Mechanical Race cruelly oppressed humans."

"Fortunately, due to my own nature, I could still secretly influence destiny."

"So I constructed this River of Time, lifting the limitations on destiny, allowing all humans to change their fate through their own will."

"I'm truly sorry, this is all I can do."

The words of the Mechanical God explained all the doubts in Su Yu's heart.

No wonder the situation in this Manifestation Space was so strange, it was all done by the Mechanical God.

He is severely flawed and unable to stop those mechanical creations from slaughtering and oppressing humans.

He can only trap them here to prevent them from wreaking havoc on the entire planet.

Then, using his ability to influence destiny, he gave humanity a glimmer of hope.

"But... is that all He can do? Maybe not."

"Perhaps He doesn't want humans to be oppressed, nor does He want the Mechanical Race to be exterminated."

"So He changed the River of Destiny, letting all humans and mechanical creations perish on their own."

Su Yu thought to himself.

This Mechanical God, sounds somewhat like a saint, with a kind nature, treating all life equally.

Although a benevolent god sounds somewhat unbelievable in this world.

But His actions are like that.

And Su Yu also believes in His benevolence, after all, He previously exposed His own weaknesses to Su Yu.

However, Su Yu thinks that He also has his selfish motives.

The Mechanical God could influence destiny back then, constructing this River of Destiny, continuing to the present for as long as ten thousand years.

The power required to accomplish such an unbelievable feat is truly unimaginable.

Since He has such power, directly influencing destiny to eradicate those crazed mechanical creations shouldn't be difficult either.

Chapter 609: The Purpose of the Mechanical God, The Power of "Authority"!_2

In fact, the current Su Yu, standing before this river of time, only needs to make an effort to gain similar abilities. Though he might not be able to annihilate all Mechanical Creations, it would still be possible to eliminate a portion.

But the Mechanical God didn't do that, seemingly unwilling.

After all, the Mechanical God is the deity of the Mechanical Race; asking him to slaughter these creations, he naturally can't bring himself to do it.

Su Yu pondered for a while and asked,

"One more question, why do you trust me? You've let me see this River of Destiny, aren't you afraid I might take action directly?"

Another doubt Su Yu had was that the Mechanical God was exploited by the power of the Brutal Evil God a thousand years ago.

Because of this, the Mechanical Race became cruel and brutal.

Now, the Mechanical God directly allowed Su Yu to see his weakness. Is he not afraid that Su Yu might also harbor brutality and strike at the river of time, killing him?

"I... don't have much time left, not many choices."

"And you, ever since you entered this space, I have been continually observing your destiny."

"Among the billions of potential choices you've made, there were no signs of madness, so I chose to trust you."

"Although there is something on you that I can't see clearly. That thing is very powerful, even I can't discern it..."

said the Mechanical God.

Su Yu watched his constantly collapsing body and understood.

Maintaining this river of time for millennia has indeed been too long, and he can't hold on any longer.

Moreover, he has long observed Su Yu's destiny.

In this Manifestation Space, every thought of Su Yu can transform into a corresponding destiny that can be observed by the Mechanical God.

That's why he chose to trust Su Yu.

"In this Manifestation Space, any thought will turn into destiny and be observed by you?"

"Truly powerful..."

Su Yu couldn't help but say.

Observing the destinies of all people and Mechanical Creations in a city, such capability is immense!

He couldn't help but think of the "Extreme Ice Agent" he had investigated earlier.

This profession, with the Extreme Ice Domain, can simulate Subspace to infiltrate the depths of the human heart and gather intelligence.

But compared to the Mechanical God's current abilities, it's worlds apart.

The Extreme Ice Agent only gathers intelligence, whereas the Mechanical God directly observes destinies, seeing infinite possibilities.

No thought, no possibility, can escape his observation.

The Extreme Ice Agent is a creation developed by Empire Researchers through the study of the Subspace Analyzer.

Whereas the Mechanical God is the progenitor of the Subspace Analyzer.

No wonder the gap is so vast.

The Extreme Ice Agent is probably a "beggar's version" of this ability.

"I understand."

"So, what is it that you want me to do?"

Su Yu asked again.

The Mechanical God brought him here to earn his trust and said so much; there must be a purpose.

Now is the moment of truth.

"Your strength is formidable, I..."

"I hope you can take action to rescue those humans."

Su Yu nodded: "Naturally, I'd be very willing to help those humans."

"The question is, what about the Mechanical Race?"

Su Yu wasn't easily fooled, only rescuing humans?

What about the Mechanical Life?

The Mechanical God quickly said, "If possible, please spare them. With no casualties, that would be best."

"Ideally, capture them all alive and leave them in this Manifestation Space for me to oversee."

Su Yu shook his head: "Even if I want to spare them, they won't let me go."

"Moreover, I don't want to show mercy at all."

"This is a war between two races; casualties are inevitable, I cannot agree to this request."

He wished for the demise of those fanatical Mechanical Race members, why would he hold back?

The Mechanical God remained silent for a while, then said, "Then... there's nothing to be done."

"Please go ahead, only hope to hold back if possible."

"If not... then so be it."

His tone carried a plea.

Like a mother pleading for her unworthy child.

Su Yu, hearing such a tone, also felt a bit helpless.

Finally, he sighed: "Alright, I'll do my best."

Su Yu decided, before killing those Mechanical Creations, to first investigate the evils they had committed against humans, if not too excessive, then spare a life.

Previously in the City of Heavenly Punishment, he had done just that; he had the experience.

Upon hearing this, the Mechanical God's tone instantly showed some joy: "That's good, that's good!"

"I will lend you a part of my power."

"You can use this power to do what you want."

"However, note that I can sustain it for a maximum of ten days."

"After ten days, if you haven't succeeded, I won't be able to maintain control over this Manifestation Space."

"Then I will try to completely seal off this space, exiling it beyond the Boundary. At that time, neither humans nor Mechanical Life can go out."

"I must do this; these Mechanical Beings have been tainted by a mysterious force; if they escape, it could lead to a terrible disaster."

The Mechanical God finished speaking, and Su Yu realized that his consciousness had returned to his body.

A surge of power had been added to him.

This power was exceedingly peculiar, neither energy, material, nor data.

Su Yu's own power hadn't increased, but he felt that with just a thought, he could achieve some mighty effect without any energy.

Simply put, it's more like some sort of "authority."

"Is this the Sixth Rank's power? Some kind of authority or rule?"

Su Yu, feeling this strange power, thought rapidly.

This peculiar "authority of power", "rule of power", was something Su Yu had never experienced before.

"Alright, you can use this power to do many things."

"I'm sure, with your wisdom, you understand how to use it."

"You can begin your actions."

After the Mechanical God bestowed that power upon Su Yu, his tone seemed somewhat weak.

Su Yu nodded, and with a thought, he vanished from place.

Now, with the Mechanical God's power, he is free to come and go within this Manifestation Space.

Except he can't leave freely.

Because he felt that this Manifestation Space was already very fragile, appearing intact, but in reality, riddled with holes.

Just like the Mechanical God's constantly collapsing and recovering body.

After all, it has been maintained for millennia, relying on the Mechanical God's efforts, and even he was nearing his limits.

If Su Yu left now, it might immediately break the balance, causing this space to shatter.

If that happened, those powerful Mechanical Creations would appear in the real space.

They had already been eroded by the Brutal Evil God's power. Once free, they might directly connect with the Brutal entity, leading to a catastrophic divine descent or the like, causing immense trouble.

The only way was to first eradicate them, eliminate the hidden threat, and then break this space to save the humans completely.

As for how to eliminate those Mechanical Creations?

Su Yu's eyes focused, with a river of time reflecting deep within his eyes.

He now had the ability to directly see the river of time without needing to go beyond the timeline!

This was one of the uses of the "authority" that the Mechanical God granted him.

After familiarizing himself for a moment, Su Yu shifted his thoughts and disappeared from the space where the Mechanical God was.

In the next instant, he appeared in the "Elder Council" space of the human resistance.

"They seem to not have noticed that I just disappeared?"

Su Yu observed everyone, finding them still in their previous postures and expressions.

These people were still waiting for Su Yu to reveal the method to save them!

It seems that the conversation between Su Yu and the Mechanical God didn't consume much time at all, time frozen?

"Maybe the space where the Mechanical God resides has an extremely slow flow of time..."

"He relied on this power to survive until now, without collapsing..."

Su Yu thought briefly and understood everything.

Then, he looked at the crowd and spoke, "My way is..."

Chapter 610: Preparations for the Decisive Battle, The Shock of Galaxy Battle Armor

Su Yu didn't finish his sentence, suddenly raising his hand.

Firstly, he attempted to use the authority given to him by the Mechanical God to remotely erase the powerful beings of the Mechanical Race in the city.

The power of fate inherently has the ability to directly erase enemies, how could Su Yu not use it?

But unfortunately, it failed.

With a thought, Su Yu sensed a strong resistance.

He pondered briefly and understood why.

On one hand, it seemed that the authority granted by the Mechanical God wasn't strong enough to directly erase those powerful entities of the Mechanical Race.

On the other hand, the Mechanical God might be unwilling to do so.

Su Yu wasn't disappointed; he was just trying, and it was okay if it didn't work. He didn't entirely expect this matter to be easily resolved.

He didn't withdraw his hand but continued to exert force.

Boom!

This Elder Council space suddenly expanded tenfold! A hundredfold!

This was Su Yu using the power of the authority rules to link with that Giant God intelligence, expanding the Manifestation Space here.

The Mechanical God couldn't spare the power to manipulate the Giant God to maintain itself, or rather, it was unwilling to directly help humans.

However, Su Yu could.

The fate of the Giant God was also within Su Yu's sight.

It was a giant mainframe, with a diameter of a thousand meters, like a mountain, its exterior resembling a mechanically forged brain, flickering with electric light.

Within the mechanical brain, powerful computational power and spiritual energy were operating.

However, this mainframe had no self-awareness, completely an icy cold machine.

It was so mad that its self-awareness was erased by the Mechanical God.

Without self-awareness, Su Yu easily invaded its interior and grasped part of the Manifestation Space's authority.

That's how he could expand this Elder Council space.

Of course, he didn't completely master the Manifestation Space's authority, which far exceeded Su Yu's capability.

Meanwhile, the concentration of spiritual energy in this space suddenly surged.

A large amount of pure spiritual energy continuously gathered, eventually using those energy coins as the core to start multiplication!

It was Su Yu linking the most densely concentrated spiritual energy area in the city center to this space.

"What's this..."

"How did the Elder Council suddenly expand so much!"

"So much spiritual energy! So comfortable! So thrilling!"

"Is this all Su Yu's ability?! How did he do it?"

Bathed in the rich spiritual energy, the humans were stunned by Su Yu's astonishing means.

They sacrificed many lives, a generation after generation's attempts, to barely grasp some secrets of the Manifestation Space and create such an Elder Council space.

Yet Su Yu, with just one move, expanded it tenfold, a hundredfold?

And what was the deal with such dense spiritual energy?

Aside from being shocked, their confidence in Su Yu also dramatically increased.

This Su Yu truly wasn't boasting and indeed had miraculous methods!

However, Su Yu paid no attention to these people but looked towards the elders with their wrinkled faces.

Now, from his perspective, he could directly see the state of these elders, or rather, their fate.

Su Yu then realized, the wrinkles and extreme aging of these elders, weren't because of their age.

Xiao Shengyin was also an elder, yet he appeared immortal and robust, a textbook case of a charming older man.

But these elders looked almost coffin-like; when they first appeared, they had a considerable presence, but now, a glance from Su Yu revealed that these guys didn't have much life left, seeming as if they could drop dead any moment.

As Transcendents above seven stars, no matter how old, as long as they weren't dead, they shouldn't be like this.

Su Yu now understood, these elders looked this way because they were "starving."

This hunger didn't refer to a lack of food; as seven-star Transcendents, their need for ordinary food was very low.

These elders, due to a lack of spiritual energy.

If they solely cared for themselves, with their seven-star level abilities, it would be enough to maintain their energy and prevent their state from deteriorating.

But aiming to further advance to higher-level Transcendents was more challenging, almost hopeless, just a barely maintained status quo.

Thus, they simply shared their energy, cultivating the youth.

They would bestow energy to young talents who came to this Elder Council space, helping them practice.

Seven-star level energy was the perfect supplement for those four-star, five-star, six-star Transcendents.

And they would enter hibernation pods to sleep, reducing consumption.

It's with this bit-by-bit squeezed energy that so many four-star and above Transcendents were cultivated.

Among these young Transcendents, a few seven-star powerhouses emerged, proving their strategy wasn't wrong.

But they themselves, due to prolonged lack of energy, had their lifespan drastically shortened, nearly at death's door.

"Your bodies, minds, and subspace projections, have long lacked energy nourishment, and your life span is short. If you stay active in the outside world for long, you can at most last a few months..."

Su Yu, looking at these elders, sighed.

"Mr. Su Yu has a sharp eye!"

Those elders slightly paused, not expecting Su Yu to see through it.

Their life span was less than a year!

They were indeed close to dying, otherwise, they wouldn't look so old.

After a moment, the oldest elder laughed heartily, "We are all willing."

"After all, we spend most of our time in hibernation pods, what use is such a long lifespan."

"As long as we're useful in the final battle, that's enough."

"Mr. Su Yu, do you have any thoughts on this?"
