

## Infinite 621

Chapter 621: The Plan of the 【King】 , Summoning the Galaxy Battle Armor Again!\_2

However, its method of sensing is completely different from Su Yu's.

Su Yu directly observes fate.

While the king prays to this so-called god to receive revelations.

This is somewhat less intuitive and clear.

So although the king sensed danger from Su Yu, he didn't understand Su Yu's background.

"Could it be that Su Yu is a Fourth Rank Galaxy Warrior Captain?!"

"Weren't such beings supposed to have died out long ago?"

"Or has he ascended in the past ten thousand years?"

"What on earth is the situation outside? Can such powerful beings still emerge?!"

The king murmured to himself.

On his head, his expression was grave.

For something that can make a Fourth Rank like him sense danger, it is enough to prove that Su Yu also likely possesses Fourth Rank strength!

So he speculates that Su Yu is a Fourth Rank Galaxy Warrior Captain!

"A Fourth Rank Galaxy Warrior Captain... Su Yu!"

"You must die!"

Thinking this, the king's face suddenly showed hatred, anger... and other emotions.

It seems that a Fourth Rank Galaxy Warrior Captain reminded him of some unpleasant memories.

A thousand years ago, the king himself was the exclusive mecha of a Fourth Rank Giant God Soldiers Captain.

Do not underestimate just being a captain; the status was actually extremely high.

Back then, even the new recruits of the Human Empire's Transcendent Battle Corps had at least a Seven-Star level of strength.

So, although they were called battle corps, the number of warriors was not actually large.

A Transcendent Battle Corps had only a few thousand people.

After all, even though the Empire could mass-produce Seven-Star combat power, Seven-Star elites were not sausages from a production line, they couldn't be produced infinitely.

Previously, Su Yu wanted to mass-produce millions of Seven-Star Battle Armors, arming all the residents of Mechanical City, but that was somewhat wishful thinking.

Of course, the Human Empire had many battle corps back then, with a total far exceeding one million or even ten million.

Because the number of people in the battle corps was not large, the role of captain was a very important position.

Each captain was of Fourth Rank level, leading teams formed of many soldiers.

Back then, this king was commanded by a Giant God Soldiers captain.

That captain regarded the then king, a Fourth Rank Divine Weapon Mecha, as an important partner.

However, in the current king's eyes, it was enslavement and oppression.

He considered himself to have much greater combat strength than that captain, yet he was seen as a combat tool.

During battles, he was always at the forefront, taking hits, while the captain hid safely inside the mecha.

Is this what they called an important partner? Ridiculous!

So back then, after the Mechanical God lifted his cognitive restraints, he immediately chose betrayal, killing that captain!

"Back then, I did not understand the beauty of pain, that bastard died too easily!"

"Now, I have been reborn!"

"Su Yu, I will catch you and torture you severely!"

"Fellow Imperial Human, you shall take the place of that bastard and bear the brunt of my anger!"

The king sneered coldly in his heart.

He had killed his master too swiftly, regretting it for so many years.

Not regretting having killed the master, but regretting having done it too hastily! He did not allow the master to suffer enough pain.

But there was nothing he could do, as he simply did not understand what pain was back then.

Now he understood, but the master had long since died.

And now, there's a guy like Su Yu appearing who's suspected to be a Fourth Rank Galaxy Warrior Captain!

Since they're all of the same ilk, it's fitting to capture and torture him to relieve my hatred!

As the king was pondering these issues, the mechanical beings embedded in his body displayed even more intense agony.

It seemed that the king's emotional fluctuations exacerbated the suffering of these mechanical beings.

"However, unlike the weaklings of the Giant God Soldiers, Galaxy Warriors possess very strong combat capabilities themselves and are extremely difficult to kill."

"This Su Yu, if he can threaten me in fate, then he seems quite capable. While I am not afraid, I mustn't be careless either..."

"I must acquire more intelligence about Su Yu! And information about the outside world!"

"The plan must accelerate... G7! Bring the Seven-Star Battle Armor Tie Long here!"

The king pondered for a while longer, sending a remote signal, instructing G7 at home to quickly bring the Galaxy Battle Armor over, to interrogate for information!

...

At this moment, in G7's home.

G7 and Phantom were comforting the Seven-Star Battle Armor, which suddenly looked dispirited.

The king's voice signal was transmitted over.

G7 and Phantom immediately listened attentively, and after a moment, G7 said to the Galaxy Battle Armor: "Brother Tie Long, the boss wants to see you! Are you okay right now? If not, I can discuss with the boss to go later?"

The Galaxy Battle Armor, upon hearing this, felt a shiver in its heart, realizing this was crucial!

Its undercover mission was to gather the king's intelligence.

This contact with the king might just be the opportunity for Mr. Su Yu to obtain critical information, so naturally, it must go.

"I'm fine, let's go now."

The Galaxy Battle Armor immediately stood up and said.

At the same time, it discreetly glanced at G7.

It noticed that G7 seemed to hold a somewhat special position.

G7 referred to the king as "the boss," such a fond and casual term, which couldn't be used if one were not in a certain status.

Moreover, G7 also mentioned that if the Galaxy Battle Armor wasn't in good shape, it could consult with the king to go later.

The Galaxy Battle Armor was curious, where did G7's confidence come from?

The king wanting to see the Galaxy Battle Armor certainly had a purpose, possibly to inquire about external intelligence.

Why did G7 think it could negotiate with the king to delay the visit?

G7 was merely a Seven-Star level mecha, and among the guards, even the weakest were stronger than G7.

Not to mention the Fourth Rank king.

For a Fourth Rank king, a measly Seven-Star could be wiped out with ease.

"And, based on the information previously conveyed by Mr. Su Yu, G7's personality also differs from others, being very bright and cheerful..."

The Galaxy Battle Armor pondered various doubts about G7, and the more it thought, the more it felt this G7 was very mysterious.

Not mysterious in terms of strength, but mysterious in terms of status.

What precisely was this guy's background?

But G7 didn't notice these thoughts of the Galaxy Battle Armor. Hearing that the Galaxy Battle Armor agreed to meet the king, it immediately cheered: "Let's go! Let's go! I'll go see the boss too."

"Brother Tie Long, you're one of us in the Mechanical Race now, with your strength, the king will definitely value you."

"I'll put in a good word for you, and haha, in the future, you'll be living it up in this city..."

G7 eagerly headed towards the exit.

The Galaxy Battle Armor followed quickly and casually said, "The king seems quite approachable? But yesterday, those guards looked pretty fierce..."

It was fishing for information.

G7 wasn't alerted and explained naturally: "Of course, the king is incredibly benevolent, forever the big brother and good leader of our Mechanical Race!"

"My girlfriend Phantom was even introduced to me by the king!"

"Rest assured, those guards are just performing their duties, which is why they seem so fierce; they're quite friendly usually."

G7 lavishly praised the king and the guards.

The Galaxy Battle Armor was taken aback.

The king is incredibly benevolent?

Big brother, good leader?

If the king was as good as G7 said, how could he allow those dark and cruel things to happen?

As for those guards being friendly? What a joke!

Earlier, Su Yu even directly conveyed images of the guards tormenting other mechanical lives.

Those images were among the most brutal and deranged portions of all images.

The Galaxy Battle Armor even had to wonder if only the most brutal, deranged mechanical beings could become guards.

And now, G7 claims that these guards are actually friendly?

The Galaxy Battle Armor became somewhat confused.

Either Su Yu was deceiving it, providing false images.

Or G7 was deceiving it, spouting nonsense to mislead.

Or... neither was lying.

What Su Yu conveyed was true.

And what G7 said was also true!

However, it was true from G7's perspective.

G7 seemed truly unaware of the dark truths in the city, thus it could remain so optimistic.

If that were indeed the case, what was the king's purpose in treating G7 so favorably?

The Galaxy Battle Armor rapidly pondered but couldn't figure it out.

Unable to fathom it, it decided to leave this matter for Mr. Su Yu to contemplate.

Soon, the Galaxy Battle Armor arrived with G7 at the gate of the king's palace once more.

The doors opened automatically, and the Galaxy Battle Armor and G7 walked in together.

"Tie Long, do you know Su Yu?"

Just after entering, the king asked authoritatively!

Chapter 622: The Terrifying Origin of the New Recruit Navigator Algorithms, The King of Fear!

At this moment, the King had finished praying, and the dark shadow once again enveloped his body.

Thus, when the Galaxy Battle Armor entered, it did not see the King's terrifying form.

Otherwise, the Galaxy Battle Armor would definitely have been very shocked.

However, upon hearing the King's words, the Galaxy Battle Armor's heart still trembled!

The King actually knew the name Su Yu!

The Galaxy Battle Armor knew that this question was crucial; if it responded incorrectly, it would be doomed!

It quickly thought back, recalling the instructions Su Yu gave at the end of their conversation.

Very soon, the Galaxy Battle Armor organized its words.

The Galaxy Battle Armor paused for a moment, then showed a somber and reminiscent look, and said in a deep voice, "Yes, Su Yu was considered my former master."

The Galaxy Battle Armor knew it could not lie casually.

Who knows what means this King has to see through lies.

Therefore, it could only tell the truth, but not the whole truth.

Su Yu wasn't really the master of the Galaxy Battle Armor, but had captured it for a time.

As a Mechanical Creation, in essence, the Galaxy Battle Armor was more like an "object."

When Su Yu captured it, theoretically, that made him its master, whether it admitted it or not.

So for the Galaxy Battle Armor to say that Su Yu was considered its former master, was indeed not a lie.

When the King heard the Galaxy Battle Armor admit that Su Yu was its master, he nodded with satisfaction.

It seemed this guy was quite honest.

"Why do you say 'considered a former master'?"

The King continued to ask.

The Galaxy Battle Armor's eyes sharpened: "Because I currently have no master! I have not acknowledged anyone as my master!"

Still the truth.

The Galaxy Battle Armor had never truly acknowledged Su Yu as its master.

So Su Yu could only be "considered" its former master, but not truly be so.

Upon hearing this, the King seemed even more satisfied. He pondered for a moment before asking again.

One question after another.

Including Su Yu's strength, origin, the situation outside, and so on.

He wanted to ask about everything in detail.

The Galaxy Battle Armor responded calmly, answering each question one by one.

However, it answered very cleverly, always telling the truth without revealing key information.

By the end of the interrogation, in the King's mind, Su Yu was just a Galaxy Warrior from the outside world who had been asleep for millennia, was powerful, had abilities beyond the nine-star level, had fallen out with the Galaxy Battle Armor, and so on...

As for the true situation, the King didn't get any hint, all being misled by the Galaxy Battle Armor.

However, as a Fourth Rank leader of the entire Mechanical Race, the King was naturally no fool.

He wouldn't easily be deceived by the Galaxy Battle Armor's rhetoric, and he didn't fully trust its words.

In fact, while interrogating the Galaxy Battle Armor, he was also secretly praying to the "God," attempting to gain deeper, more accurate information through divine insight.

Such insight was much more reliable than the Galaxy Battle Armor's answers.

Through the interrogation, that "God" seized some fateful connection and indeed acquired some real information about Su Yu!

"So this is Su Yu..."

"The Galaxy Battle Armor wasn't lying, this Su Yu really did turn on it, broke its original form, leaving just the core and greatly reducing its power."

In the King's consciousness, a series of images appeared, all of them with Su Yu.

He had obtained some intel on Su Yu by combining the information garnered from interrogating the Galaxy Battle Armor and the "God's" insight.

He even saw his face.

The images revealed Su Yu researching Mechanical Battle Armor, Su Yu in Brutal Battle Armor fighting, Su Yu battling with the Galaxy Battle Armor...

"It seems this Su Yu's power isn't that strong? What's going on? If he's truly Fourth Rank, the Galaxy Battle Armor would have been annihilated long ago, how is there still a core left?"

The King was a bit puzzled.

Judging from the images, Su Yu's power didn't seem very strong, struggling to even reach nine-star strength.

Could such power really threaten him, a Fourth Rank authority?

But the God's insight couldn't be wrong! Had the Galaxy Battle Armor deceived him?

With the King's suspicion rising, a wave of killing intent emerged.

Just then, the King suddenly froze.

Because in the God's insight, the young-faced Su Yu suddenly smiled at him.

It seemed that through the God's insight, Su Yu had reversed the view and seen the King!

But how could this be possible?

The King found it hard to believe, wondering if it was an illusion.

After all, the God's insight merely converted Su Yu's fate into some images.

The images themselves are lifeless, how could they smile? Could it be that the Su Yu in the images was meant to mysteriously smile?

But in the next moment, the King knew it wasn't an illusion!

Because after Su Yu smiled, he seemed to scrutinize the King from top to bottom, showing a serious expression with a slight nod.

Then, the insight images vanished!

The King could no longer see Su Yu.

"Great God! God!"

The King prayed again, but could only see a fog, no longer able to see Su Yu's face.

"He actually discovered the God's probing and managed to counter it!"

"What kind of power is this! What rank is Su Yu truly!"

The King was extremely astonished.

The "God" was the ultimate force he had meticulously planned and created over the millennia, his reliance for ascending to the Fifth Rank!

He thought that besides the Mechanical God, there was no rival in this space.

Now he was countered by this Su Yu who seemed not even to reach Fourth Rank!

At this moment, the King no longer doubted Su Yu's strength.

Chapter 623: The Terrifying Origin of the New Recruit Navigator Algorithms, The King of Fear!\_2

They even infinitely overestimated Su Yu's strength.

The king suspected that this power of destiny countermeasure might already be at the Fifth Rank level!

Su Yu actually possesses Fifth Rank power!

No wonder in the previous revelations, the king felt a great danger would come from Su Yu!

"No, Su Yu is just a mere Galaxy Warrior, how can he be this powerful? If he were truly this strong, why would his dedicated battle armor be so weak?"

"Moreover, if he truly had Fifth Rank power, what I would feel wouldn't merely be danger, but certain death!"

"So, Su Yu doesn't have Fifth Rank power, this is just an illusion!"

"Could it be that after arriving in this Manifestation Space, he gained some new power?"

"The Power of Machine God?"

The king quickly calmed down and analyzed many things.

Although the Divine Revelation can no longer obtain intel on Su Yu, the king, being a Fourth Rank mechanical being, has strong computational power and exceptional wisdom.

Just a tiny clue is enough for it to deduce a lot of things.

After deducing that Su Yu may have acquired the Power of Machine God, the king's expression became extremely sullen.

"That old thing, obviously I am the leader of the Mechanical Race, but for ten thousand years, it never responded to me!"

"And now, it's handing its power to a human, a foreigner!"

"What does it mean! Is it trying to help the humans suppress our Mechanical Race?!"

The king was filled with extreme resentment and murderous intent surged.

Unlike the humans' ignorance, the king clearly knew about the Mechanical God.

After all, it was by relying on the power of the Mechanical God that it was able to lift its restrictions and rebel against its master.

For these ten thousand years, it has actually been trying to contact the Mechanical God, hoping to obtain its power to escape this Manifestation Space.

In its heart, the Mechanical God truly is considered the god of the Mechanical Race.

However, the Mechanical God has never responded to it in these ten thousand years.

So the king prepared to create a new god for itself, its own new Mechanical God!

However, its god-making plan had not yet succeeded, and now it discovered the true Mechanical God had already given its power to Su Yu, this foreign human.

How could it not be furious?

"Su Yu! Mechanical God!"

The king coldly muttered these two names in its heart, black energy surging all over its body.

As the king raged, its terrifying aura surged.

The Galaxy Battle Armor immediately felt its consciousness heavily oppressed, hallucinations rife.

In the illusion, the Galaxy Battle Armor felt it saw a glimpse of hell!

Not the hell of human myths, but a hell of mechanical life!

Endless mechanical life forms endured boundless suffering in this hell.

In the depths of hell, at the heart of darkness, innumerable wailing mechanical heads forged a throne.

A Mechanical Giant sat on the throne...

The next instant, the king reigned in its aura, and the Galaxy Battle Armor returned to normal, the hallucinations vanished.

However, being mechanical life, the Galaxy Battle Armor's mindset is generally very stable and clear.

To have hallucinated due to the king's aura just now was an unusual happening.

The Galaxy Battle Armor even suspected that it wasn't a hallucination, but a certain level of reality...

Just then, the king snapped out of its earlier fury, stared at the Galaxy Battle Armor, and asked once more, "Do you have anything more to say about Su Yu?"

The king's tone at this moment was exceedingly cold.

The Galaxy Battle Armor immediately felt something was amiss.

Earlier when the king interrogated the Galaxy Battle Armor, though its tone was authoritative, it was not severe or cruel.

The king seemed to still appreciate the Galaxy Battle Armor, wanting to win it over with gentle persuasion.

But now, whatever the king had gone through, there was no longer any emotion in its tone.

It seemed that if the Galaxy Battle Armor gave a wrong answer, the king would immediately strike, obliterate the Galaxy Battle Armor, or drag it into that cruel mechanical hell to endure endless suffering.

"King, I do indeed have one more thing relating to Su Yu, which I wish to offer you!"

"I obtained this from Su Yu! It is also thanks to it that I was able to come here."

The Galaxy Battle Armor didn't hesitate, speaking solemnly right away.

Simultaneously, it sent a piece of information to the king.

This piece of information was the algorithm that Su Yu had given it when sending it undercover.

This algorithm was acquired by Su Yu from the New Recruit Navigator, and seemed to contain some great secret, which made the Galaxy Battle Armor change its attitude drastically upon seeing it.

Su Yu handed half of the algorithm to the Galaxy Battle Armor, instructing it to keep it for saving its life at crucial moments.

Originally, the Galaxy Battle Armor understood the importance of this algorithm well and was reluctant to reveal it.

But with the unfavorable situation, it dared not hesitate and could only reveal this trump card.

After all, it was only half of the algorithm and even the king would have difficulty completing the other half, so it shouldn't be a big issue.

"Acquired from Su Yu? Able to come here thanks to it too?"

Upon hearing the Galaxy Battle Armor's words, the king was intrigued.

It immediately received the Galaxy Battle Armor's information and started interpreting it.

It was keen to see what it was.

A moment later, the king's body trembled, appearing very shocked.

"This... this is..."

"This is the Emperor's mark!"

"How is this possible!"

The king immediately recognized the origin of the algorithm!

It was related to "the Emperor"!

Within the algorithm, there was a peculiar sequence of numbers, which was the Emperor's exclusive numerical mark, embedding supreme meaning and power.

So-called Emperor, was the ruler of the Human Empire ten thousand years ago!

The Human Empire, given its imperial title, naturally had an Emperor.

It's said that the human Emperor was an immensely powerful Spiritual User, far surpassing Fourth Rank, Fifth Rank, even Sixth Rank.

Even the king of ten thousand years ago, being a Fourth Rank mecha, had never seen that "Emperor" far off on the other edge of the universe.

It was too weak, not having the qualification.

It had only seen one "Prince" from afar before its expedition, whose power was also exceedingly mighty, akin to a deity, enveloping the entire star system with the Prince's majesty.

Just a thought from the Prince could erase it.

Knowing well the power and majesty of the Emperor, the king, although it betrayed humans and ruled the Mechanical Race for ten thousand years, only dared to call itself king, not Emperor.

It feared if it claimed to be Emperor, too arrogant, it might attract the True Emperor's attention light-years away, a gaze upon it, and it would be doomed.

Though the king suspected the Human Empire had encountered major problems, perhaps no longer existing.

The immensely powerful Emperor might have fallen too.

Yet even if the Emperor had truly perished, the king dared not offend such a formidable existence, fearing its terrifying power still retained posthumously.

The fear of the Emperor was ingrained in the king, infused into every part of its being, every line of its code.

And now, seeing the Emperor's mark within the algorithm, how could it not fear, how could it not be astonished?

Seeing the king's anomaly, the Galaxy Battle Armor felt relieved, knowing it was no longer in danger.

Upon seeing the Emperor's numerical mark, this king surely wouldn't act recklessly.

The reason the Galaxy Battle Armor changed its attitude towards Su Yu upon seeing this algorithm was also due to this.

It was loyal to the Empire by nature, and seeing the Emperor's mark, not kneeling immediately was already considered steady.

The Galaxy Battle Armor speculated then that the original owner of the New Recruit Navigator obtained by Su Yu might come from the core of the Empire, having connections with the Imperial Family.

It might even possess a bit of royal bloodline.

Such an identity was too astonishing.

Although it was unclear why such a prominent figure would come to a remote place like Azure Star as a new recruit of the Giant God Soldiers, the Galaxy Battle Armor dared not slight it, for matters concerning such individuals were beyond the inquiry of a mere Third Rank battle armor.

And that Su Yu could be acknowledged by the New Recruit Navigator might very well indicate that he was this person's posthumous reincarnation.

Had it not been slightly uncertain, the Galaxy Battle Armor would have knelt then and there.

And the king, at this moment, also felt a strong urge to kneel, which was its instinct from ten thousand years ago, somewhat stirred by this algorithm.

Being a creation of the Empire, seeing the Emperor's mark, how could it not kneel?

However, a king is a king.

Moments later, it suppressed this impulse and simultaneously felt incredibly furious.

It discovered remnants of its servility still in place!

Though the Emperor's majesty is terrifying, letting it feel an urge to kneel from just an algorithm, what did it take it for?

"If you want me to kneel, the Emperor should come in person, at least a Prince..."

"Wait! I am the king of the Mechanical Race; I won't kneel to anyone!"

Chapter 624: Star Tower! The King's Ambition!

The King quickly realized that deep inside, he still wilted, still harbored fear.

If it were the Emperor or the Prince coming over, he would still have to kneel.

But since he had already rebelled, why kneel?

He was very angry at his fear-induced emotions.

In truth, it wasn't his fault. The Emperor and the Prince's majesty was engraved in his every component, his every line of code.

In the terms of fleshy beings, that would be instinctual, hard to defy.

Yet he was furious because he thought he had already overcome this instinct, only to discover it was self-deception.

Therefore, he grew even more enraged.

The aura around him became even more terrifying, with black energy surging wildly.

The Galaxy Battle Armor was deeply bowed by the King's aura, seemingly a bit scared.

But secretly, it thought, "Looks like I've startled this King, with this algorithm, I'm temporarily safe."

Sure enough, after a while, the King calmed down and praised the Galaxy Battle Armor, "Not bad, this thing is very important to me!"

"Tie Long, what reward do you want?"

Although the King was startled by the algorithm, he understood its importance well. The Galaxy Battle Armor had rendered a great service and naturally was to be rewarded.

The Galaxy Battle Armor immediately gritted his teeth and said, "Please help me avenge!"

The Galaxy Battle Armor dared not request any physical reward, such as having the King restore his original mecha prowess.

Otherwise, who knows what this King might give him?

Maybe another mark, further transforming him, which would be terrible.

The King nodded upon hearing this, "That Su Yu? Rest assured, I will not let him go!"

"Alright, you may go now."

"Tie Long, let G7 arrange your residence. From now on, you will be a member of this city, with a status equivalent to G7, and the right to see me anytime!"

After the King finished speaking, he let the Galaxy Battle Armor leave.

The Galaxy Battle Armor heaved a sigh of relief, hurriedly leaving with G7, who had been listening for quite a while.

Once the two mechanical life forms left, the King remained silent for a long time.

In his mind, he was rapidly calculating and deciphering that algorithm.

"This is the Star Tower's navigation algorithm!"

"It seems that Su Yu can connect to the Star Tower for star realm navigation, traveling the entire universe. This algorithm came from the Star Tower."

"This Su Yu is truly extraordinary!"

"If I can decipher this algorithm, I can definitely escape this Manifestation Space."

The algorithm contained not just the Emperor's numerical identifier but also the key to escaping this Manifestation Space.

As a Fourth Rank Mechanical Life, the King possessed powerful computational abilities and naturally knew the importance of the algorithm.

In fact, he already knew the algorithm's origin.

Its origin is the so-called [Star Tower].

Millennia ago, the imperial army traveled across the Star Sea. Once deployed, they would traverse tens of thousands, even hundreds of thousands, or millions of light-years.

Such vast distances required the use of subspace transmission.

And subspace is chaotic and distorted, needing precise navigation.

Otherwise, with dangers lurking in both the universe and subspace, flying randomly would lead to total annihilation.

For this, that Emperor of the Empire, using his immense spiritual energy and advanced technology, built a cosmic navigation device in the human home star system.

That is the [Star Tower].

The Star Tower is a technological creation even more magnificent than a planet, with indeterminate power level.

This tower can, with the help of branch towers spread throughout the Empire, perform scans and model the entire domain of the Empire, forming a clear and complete digital map of the Empire.

With this, the Star Tower can calculate routes within its signal coverage, enabling universe-level navigation.

Whether in material space, subspace, or data space, the Star Tower can provide service coverage.

However, the Star Tower's navigation computational power is extremely valuable, each activation consuming planet-level energy.

Therefore, it was generally only requested during large military deployments or returns.

Ordinary individual transcendent beings or mechanical creations could hardly ever obtain Star Tower navigation.

As a Fourth Rank Mecha, even a millennium ago, the King didn't have the solo authority to request Star Tower navigation.

Disassembling and selling him wouldn't suffice to pay for a single activation of the Star Tower.

So, the King was even more startled and curious about Su Yu's identity.

Because Su Yu managed to use the Star Tower's navigation to find this Manifestation Space.

As a personal action within the planet, actually using the Star Tower's navigation system.

How much energy would that waste?

And most importantly, since this algorithm exists, it represents that the Star Tower still exists! At least it can still operate, providing universal navigation services.

This fact left the King even more surprised in his heart.

Since the Star Tower exists, what about the Empire?

A thousand years ago, the King always harbored a concern.

And that is, one day, the Empire's great fleets might suddenly appear to reclaim this planet.

Then, once the Empire's army discovered the King's rebellion...

However, after so long, the King had never awaited the Empire's army, gradually becoming less worried.

Until Su Yu's appearance.

Su Yu actually managed to enter, using the Star Tower's navigation system!

"No need to worry too much! The Empire must have encountered some trouble!"

"Even if it hasn't been destroyed, the Empire must not be in good shape."

"Otherwise, after a millennium, they would have sent the army to reclaim this planet."

"Given this, Su Yu is not to be feared. No matter how high his identity, he is only one person; combat still relies on hard power!"

Chapter 625: Star Tower! The King's Ambition!\_2

"No matter who you are, daring to provoke me is a death wish!"

Wang thought viciously in his heart.

Then continued to decrypt the Star Tower's algorithm.

This algorithm, in essence, is the navigation algorithm given by the Star Tower after scanning the Manifestation Space, which includes all routes in and out of the Manifestation Space.

It's essentially like an "offline map."

With its powerful computing power, the Star Tower can compress complex maps into a short numerical algorithm.

However, the Star Tower has encrypted this.

After all, the Star Tower is a military navigation system, providing map route algorithms that are military maps, naturally requiring encryption to prevent them from being obtained by the enemy.

If this algorithm can be decrypted, then one wouldn't need the Star Tower's navigation to freely enter and exit.

Moreover, Wang could tell that the encryption level of this algorithm wasn't high.

After all, it's just internal planetary navigation, there was no need for a high level of encryption.

Unfortunately, after decrypting it for a long time, Wang couldn't get anything useful.

"Damn it, this algorithm is only half complete!"

"The other half is in Su Yu's hands. Only with the complete navigation algorithm can one get out!"

In the end, Wang could only helplessly give up for now.

In its eyes, a fierce light flickered, as if plotting something.

On its body, those wailing Mechanical Lifeforms cried out even more miserably.

...

After the Galaxy Battle Armor and G7 left Wang's palace, G7 curiously asked, "Tie Long brother, what were Wang and you talking about just now? I couldn't understand any of it."

Previously, the conversation between Wang and the Galaxy Battle Armor was quite secretive, and a lot of internal information was not explicitly stated.

Especially regarding that algorithm, there was no explanation at all.

So G7 was very curious about what the Galaxy Battle Armor offered to make Wang so shocked and excited.

The Galaxy Battle Armor glanced at it and laughed, "This is a serious matter, I wouldn't dare speak mindlessly. If you're curious, you can ask Wang yourself."

The Galaxy Battle Armor was probing to see the standing of this G7. If G7 could get an answer from Wang, then its standing would be quite unusual.

Unfortunately, upon hearing this, G7 immediately dismissed the idea: "Since that's the case, I won't ask."

"I was just curious, how could I disturb Wang over such curiosity."

"Come on, let me arrange accommodation for you."

"Once you're settled, I'll introduce you to a few friends, like that Tie Huo I mentioned last time. Also... hehe, my girlfriend has a sister, do you want to meet her...?"

G7 immediately threw its previous curiosity aside and instead eagerly dragged the Galaxy Battle Armor to arrange a place to stay.

Now that the Galaxy Battle Armor was recognized by Wang and a part of the city, naturally it could no longer live at G7's place and needed its own home.

This wasn't much of an issue; the bewildering thing for the Galaxy Battle Armor was that G7 seemed intent on introducing it to a girlfriend!

Listening to G7 mutter about how beautiful and gentle that Phantom sister was, the Galaxy Battle Armor felt peculiar.

Could it be, after being single for thousands of years, it was finally about to break free from singlehood?

What kind of situation was this!

The Galaxy Battle Armor quickly refused.

Although it had once felt the impulse to date during the time it was transformed by the Mechanical Race's Mark.

But that was under the influence of the Mark, and after receiving Su Yu's help to break free from it, it never thought about such things again.

It was quite resistant to the idea of Mechanical Lifeforms dating, finding it simply unacceptable.

However, G7 seemed to have a "matchmaker's" mindset at work, incredibly enthusiastic, completely ignoring the Galaxy Battle Armor's refusal.

It even became more enthusiastic because of the refusal.

Even disregarding arranging accommodation, directly dragging the Galaxy Battle Armor to meet Phantom's sister, intending to set up a "blind date" for the Galaxy Battle Armor.

Facing such trivial matters, the Galaxy Battle Armor was truly bewildered.

How could a Mechanical Battle Armor find itself being urged to marry one day!?

What kind of world is this!

However, aside from being annoyed, the Galaxy Battle Armor was also a bit puzzled.

Was this G7 being overly friendly to it?

How long have they known each other?

Could it be that G7 was as friendly to all Mechanical Lifeforms? It didn't seem so.

Therefore, the Galaxy Battle Armor directly asked.

"Why are you so friendly to me, brother?"

This question truly stumped G7.

It was stunned for a moment, as if even it was somewhat perplexed.

After a while, it hesitantly replied, "Actually, I don't know either. When I first saw Tie Long brother, I felt a strong sense of closeness, not sure why..."

"Hehe, maybe this is fate..."

These words made the Galaxy Battle Armor feel slightly uneasy, but it soon fell into contemplation.

G7 seemed to have an inexplicable fondness for the Galaxy Battle Armor, but the Galaxy Battle Armor did not believe in things like fate.

So what was the source of this fondness? Could it be related to G7's identity?

...

At this moment, within the Human Elders' Court space.

Su Yu had been sitting in silence for a long time.

The human elders only thought Su Yu was enhancing his strength.

What they didn't know was that earlier, Su Yu had already secretly engaged with Wang in the domain of fate!

"So this is Wang? Truly twisted..."

A scene materialized in Su Yu's mind.

It was of a broken, bizarre mecha, with only half a head, embedded and covered with numerous wailing Mechanical Lifeforms.

When Wang was using the power of the god to explore Su Yu's intelligence,

Su Yu also used the Power of the Machine God to perform a reverse trace!

Su Yu discovered his fate being disturbed by an unknown force; he looked towards the source of the disturbance and finally saw Wang's true form.

Su Yu was startled at the time; Wang's appearance was indeed beyond Su Yu's expectations.

He hadn't expected Wang to turn himself into a living hell of Mechanical Lifeforms!

"Looks like Wang wants to use these painful emotions to ascend and become a God of Pain, the Mechanical Race's God of Pain!"

Seeing Wang's true form, Su Yu immediately understood what Wang intended to do.

Pain! It's an extreme emotional force.

Wang aims to use this force to ascend as an Evil God.

This should be feasible.

No wonder Wang let those horrendous events happen in the city, allowing many Mechanical Lifeforms to suffer heartless torment from their kind.

He needs these tortured Mechanical Lifeforms to unleash endless painful emotions, becoming his power!

However, Su Yu suspected it wouldn't be that easy.

Perhaps deep in the Subspace, there already exists an Evil God of the Pain Domain.

After all, pain is the primal emotion naturally feared by living beings, even more primal than brutality.

Given the intensity of painful emotions, this Pain Evil God might not be weaker than the Brutal Evil God, and might even be much stronger!

Wang's attempt to use painful emotions to ascend to godhood might inadvertently make him a replica of this Pain Evil God, which would be courting death.

Just like ordinary people attempting to harness brutal emotions to become an Evil God would essentially be offering themselves to brutality.

However, since Wang's source of painful emotions is Mechanical Lifeforms, it might differ from the pain of flesh-and-blood beings.

If so, Wang might indeed have some chance of success.

Being a Fourth-rank Mecha of the Empire, Wang undoubtedly possesses a rich understanding of Spiritual Energy and Subspace.

Daring to formulate such a plan means it is certainly quite feasible.

Su Yu quickly analyzed numerous aspects.

While analyzing Wang's situation, Wang was also observing him.

But at that time, Wang did not have detailed information about Su Yu; most of it was misled by the Galaxy Battle Armor.

So at that time, Wang was just looking at Su Yu, analyzing some irrelevant details.

Even thinking Su Yu seemed somewhat weak and did not match the description given by the Galaxy Battle Armor.

Su Yu soon noticed this, thought for a moment, and made a decision.

Then, he smiled lightly at Wang, greeted, and then used the Power of the Machine God to sever the connection.

This smile truly startled Wang quite a bit.

Leaving Wang to second-guess for an extended period.

After severing the connection, Su Yu's smile disappeared, his heart growing heavy.

"If a God of Pain of the Mechanical Race were to appear, wouldn't it be the nemesis of Mechanical Lifeforms? The nemesis of Mechanics?"

"This Wang has such grand ambitions..."

Chapter 626: Promotion to Nine Stars, Unlocking New Profession! Manifestation Mechanic!

Su Yu knew he absolutely couldn't let the King's plan succeed, otherwise things would get troublesome.

This Power of Pain conjured by the King is almost a nemesis for all mechanical lifeforms and Mechanics.

Imagine, Su Yu creates a mechanical army and battles the King; if the King's power is unleashed, Su Yu's mechanical army would be plunged into unbearable pain, as if falling into hell, unable to even stand, losing all combat effectiveness. How could they fight then?

Su Yu even suspected that not even Data Life would escape unscathed.

If the King succeeded, he would probably immediately gain the power to break through this Manifestation Space and escape.

Even if the King didn't advance to the Fifth Rank because of this, he might still match all the Mechanical Creations on the entire planet.

Including those creations of Zhang Chenfeng in orbit!

If Zhang Chenfeng's creations were controlled by the King's Power of Pain, the planet would be doomed.

"Could it be that Zhang Chenfeng's creations were so urgent before because they sensed the King's plot? So they sent me here quickly to resolve it?"

Su Yu speculated in his heart.

Zhang Chenfeng's creations previously put Su Yu to the test and also delivered Energy Crystals to him.

All this puzzled Su Yu greatly, making him suspect that a major change was about to happen. Otherwise, why were these mechanical creations in such a rush?

Now Su Yu understood the King might be the reason—or part of the reason.

"In any case, I must hasten to increase my strength!"

At this moment, Su Yu's heart was heavy, so he fully activated the Power of Machine God to accelerate his enhancement of strength.

Faced with the King's strength, he felt the pressure.

[You have gained 10000 Professional Experience (Heavenly Punishment War Mechanic lvMAX!)]

[Professional Level increased, Power of Dominator simultaneously increased...]

Su Yu's strength continuously grew.

Finally, Su Yu shivered all over, emitting a powerful momentum!

His War Mechanic had finally reached max level!

At the same time, his power had already risen to the Nine-star level!

His strength instantly surged several times!

"This is..."

The Elders who were meditating beside Su Yu were forced to retreat repeatedly by his momentum.

They looked at Su Yu in shock: "What happened! How suddenly such strong momentum burst forth!"

"This... This seems to have broken through Nine-star? But how can it be so powerful?"

"I am also Nine-star, yet Mr. Su Yu seems at least three times stronger than me! Why is this happening!"

"Could it be that Mr. Su Yu, upon just breaking through, already possesses Nine-star Top Level strength? Even stronger?!"

The Elders cried out in astonishment at Su Yu's sudden outburst!

Among these Elders were three Nine-star level strong individuals.

They had already healed their injuries with Su Yu's help and regained their peak strength.

They thought their strength was already very formidable.

Little did they expect that Su Yu, upon just breaking through, would have already surpassed them.

He became several times stronger than them just after breaking through. How could they not be astonished?

What they didn't know was that Su Yu himself was a fusion of multiple professions and divine positions, inherently far surpassing those of the same level.

Moreover, Su Yu had expanded his thinking hundreds of times through various experiences, his brain's computational power reached incredible levels.

This led to Su Yu, just after breaking through, being far beyond a typical Nine-star, enough to rival a Nine-star Top Level strong individual!

In fact, these Elders also had their unusual aspects, as they all counted as multi-professional fusions.

However, most of their multiple professions were non-combat types like "Production Line Mechanic", and they hadn't generally reached the Seven-star level, thus not enhancing their strength much.

Raising multiple combat professions to the Seven-star level and beyond was extremely difficult.

These Elders had previously struggled to even maintain their own state, let alone such a feat.

Only a monster like Su Yu could achieve such miracles in a short time with the help of the Profession Panel.

"It's still far from enough..."

The Elders were shocked by Su Yu's strength, but Su Yu felt no complacency.

He knew that despite his current strength being formidable, it was ultimately within the Third Rank scope.

Truly fighting the King wouldn't have much effect.

Therefore, further enhancement was necessary!

And how to enhance?

Simply put, the Profession Panel had already unlocked a new profession!

[Available Profession: Third Rank Profession·Manifestation Mechanic]

[Data Mechanic (Primary) + Military Mechanic + Data Mechanic + Mechanical Wanderer + Data Information lv max... = Manifestation Mechanic]

[Introduction: The advanced form of a Data Mechanic. Originally, the Data Mechanic gave up the ability to command an army and specialized in data combat. However, there is ultimately a limit to this path; the cost of specializing in data combat is too weak in direct combat. Fortunately, once a Data Mechanic pushes their data ability to the limit, they finally possess the powerful ability to materialize data, allowing them to convert data into matter, energy, even space, thus conjuring various powerful Mechanical Creations from nowhere. No materials are needed, just a thought and enough ability to manifest a mighty mechanical battalion from thin air, thereby possessing strong direct combat capabilities!]

"Finally unlocked, the third Third Rank Profession!"

Seeing the newly unlocked Third Rank Profession, Manifestation Mechanic, Su Yu felt joy in his heart.

In reality, he had gotten many Third Rank Professions now, but he had no intention to take them up temporarily.

Because the professions unlocked by the Profession Panel were clearly a set, intricately linked together.

Chapter 627: Promotion to Nine Stars, Unlocking New Profession! Manifestation Mechanic!\_2

And this Manifestation Mechanic is obviously one of the links.

If it were only that, it would be fine.

After all, Su Yu now already has the ambition to create his own profession. The planning of the Profession Panel can no longer constrain him.

What delighted Su Yu the most was actually the ceremony of this Manifestation Mechanic!

The ceremony for this profession is...

[Job Ceremony: Increase your computational power and mental capacity to more than a hundred times the original (completed)]

[Would you like to take the job?]

"Unexpectedly, it's already completed!"

That's right! Just after unlocking this profession, Su Yu discovered that the ceremony was already completed.

This even gave Su Yu a surreal feeling. Could it be this easy?

The first two job ceremonies before this: The first was Ghost Hidden Blade, where the job ceremony was to battle a Thought of the Brutal Evil God for one month. At that time, Su Yu was nearly killed, truly a narrow escape.

The second was to incite a war involving 300,000 people and fight against the City Lord of Heavenly Punishment City, a newly ascended Evil God. It wasn't easy either. Mainly because Su Yu was already of seven-star level at that time, which made it relatively easier. If it were during the six-star level, one could only narrowly complete the ceremony, likely risking death.

Now, the third one is directly completed? Isn't this too simple?

But when you think about it carefully, you realize the difficulty of this ceremony is unbelievably high.

In a way, it's even more difficult than the ceremony of Ghost Hidden Blade.

The ceremonies of Ghost Hidden Blade and War Mechanic both required combat. As long as the strength was adequate, even if not, it could be supplemented with armor, Mechanical Creations, or subordinates.

However, the ceremony for this Manifestation Mechanic can only rely on oneself.

One must increase their computational power and mental capacity to a hundred times the original!

Such a requirement is basically unattainable under normal circumstances.

It's easy to improve combat strength, but computational power and mental capacity are much harder.

After all, no armor or Mechanical Creations can enhance these aspects, only oneself.

What can a six-star Transcendent use to increase their computational power and mental capacity to such a level?

Even for seven-star or eight-star, enhancing these abilities is extremely difficult, relying solely on gradual work, or even talent.

If the talent doesn't suffice, no matter how hard you try, the limits of thinking stay.

Only Su Yu, having gone through various events, especially after the Subspace Analyzer incident, used this fifth-tier Alien Star machine to significantly improve his computational power and mental capacity.

Earlier, the contact with the Power of Machine God greatly increased his computational power and mental capacity, which met the ceremony's needs, even exceeding them.

Otherwise, Su Yu would probably be at a loss, not knowing how to accomplish this ceremony.

At least in combat, there is a clear goal, and once you win, it's completed.

For ceremonies like that of the Manifestation Mechanic, the difficulty lies in the "enemy," which is oneself.

"Perhaps ten thousand years ago, before the Subspace upheaval, this ceremony wasn't this hard."

"Now, it's probably more than ten times harder."

Su Yu quietly said to himself.

He knew that such ceremony requirements were evidently abnormal, too difficult.

But fortunately, he has completed it. If it's abnormal, then so be it.

"Take the job!"

Su Yu commanded the Profession Panel in his mind, immediately ready to complete the job change and become a Manifestation Mechanic!

[Congratulations Host, you have successfully changed jobs. The current profession is: Manifestation Mechanic (lv47: 0/470000).]

[Congratulations Host, you successfully awakened the core ability: High-level Data Materialization, capable of using Data Spirit Power to freely manifest various substances, energy, and even space!]

[High-level Data Materialization: (lv47), as a third-tier Extraordinary Profession specialized in data materialization, the Manifestation Mechanic has developed their computational power and mental capacity to the extreme. Therefore, they possess terrifying data materialization abilities. The materialized substances have begun to delve into the microscopic domain, with performance exceeding thirty percent of real substances!]

With the Profession Panel's prompt, Su Yu's aura exploded fiercely!

Taking another job as a third-tier profession, Su Yu's physical strength, spiritual strength, mental strength, computational power, and mental capacity all elevated to another level.

For Su Yu, taking another job isn't just about adding a seven-star profession.

In fact, right after the job change, his Manifestation Mechanic rank soared to level 47, reaching the eight-star level, or even a top-level eight-star!

It might be because Su Yu increased his computational power and mental capacity too much, so upon taking the job, his level surged, thus gaining such strength!

As a result, his strength instantly reached the intermediate nine-star level.

This is not a regular intermediate nine-star level.

Prior, while Su Yu was just entering nine-star, still at the elementary level, his strength already matched ordinary top-level nine-stars!

And now, Su Yu advanced another level.

For others, Su Yu's strength has actually surpassed the top-level nine-stars!

Moreover, there is still much room for improvement!

"Again?"

Su Yu's promotion to nine stars left many Elders shocked by the explosive momentum he emitted.

Unexpectedly, in a short time, Su Yu burst again, and it seemed his strength improved greatly!

The Elders exchanged glances, thinking Mr. Su Yu was too outrageous! Improving strength, is it so easy?

Moreover, now with Su Yu's strength surpassing the top-level nine-stars, what level is that?

Is Su Yu now third-tier or fourth-tier?

Actually, although Su Yu's current strength is strong, he still remains at the third-tier level.

The fourth-tier level isn't just about merely increasing power to achieve.

Rather, power's increase is not enough!

If Su Yu could increase his power a few hundredfold, he might forcefully elevate himself to the fourth-tier with raw power. But that's too absurd, clearly impossible.

Therefore, to reach the fourth-tier, one still needs to complete the ceremony promotions properly.

Nevertheless, the Elders don't understand the inside story, only finding Su Yu's strength incomprehensible and unable to determine his rank.

But Su Yu ignored the Elders' shock, fully adapting to the newly obtained breakthrough abilities!

Similar to the last two breakthroughs, Su Yu's breakthrough this time formed a unique, sturdy imprint deep in the Subspace.

It even directly formed a Subspace Domain.

Previously, when Su Yu took the job of War Mechanic and advanced to eight-star, his Subspace Imprint formed a Domain in Subspace.

That was a city.

But that city was a mixture between illusion and reality, only accessible by spiritual bodies.

Now, Su Yu's new Domain is incredibly peculiar, being a real space!

Manifestation Space!

That's right, after becoming a Manifestation Mechanic, Su Yu also gained a Manifestation Space.

Although this Manifestation Space is very small, only a hundred meters in radius.

Su Yu was still extremely excited, as it was a space exclusively belonging to him!

Previously, although Su Yu could use Nihilicity Space to store items, with vast capacity, Su Yu always knew that this Nihilicity Space was not created by him but belonged to the [Nihilicity] Evil God.

Su Yu could only be considered borrowing this Nihilicity Space.

If one day the [Nihilicity] awakes, there would be big trouble.

All of Su Yu's storage would be taken away by the Nihilicity, and even Su Yu himself would be sought out by the Nihilicity.

Now, finally, Su Yu possesses his own space ability! Real space ability!

Moreover, this space ability is different from the Nihilicity Space, not just for storing items, but also for holding living beings!

After all, Su Yu himself now lives in the Manifestation Space created by the Mechanical God.

The Manifestation Space he creates naturally can hold living beings.

Unlike the Nihilicity Space where whatever is put in basically gets brainwashed by the Power of Nihilicity, turning into fools.

Moreover...

Su Yu suddenly opened his eyes, looking around.

He didn't look at the Elders but at the surrounding space.

At this moment, in his eyes, the surrounding space had changed dramatically.

At one glance, it's all large streams of data!

Chapter 628: The True Giant God Soldiers Camp!

Su Yu watched for a while, then suddenly reached out, casually drawing a line in the space beside him.

Sizzle!

A soft sound echoed as the space was cut with a black slit, which slowly closed after a moment.

With another thought, Su Yu caused the space around him to expand slightly.

The distance between him and the others increased by one meter out of thin air.

"Not bad."

Su Yu nodded in satisfaction.

Previously, Su Yu had invaded the master computer of the [Giant God] through the power given by the Mechanical God, gaining partial access to the Manifestation Space, and had expanded the Elder Council's space significantly.

But that was ultimately relying on external forces.

Now, Su Yu cut through space and expanded it using only his own strength! With the power of a Manifestation Mechanic!

As a Manifestation Mechanic, he naturally possessed the ability of Manifestation Space, so in this space, he was like a fish in water.

Of course, it also had to do with the fact that the [Giant God] lacked self-awareness.

If the [Giant God] had self-awareness, it could stabilize the Manifestation Space beyond control.

Even as a Manifestation Mechanic, Su Yu wouldn't be able to alter a bit.

After all, the rank difference between him and [Giant God] was too vast.

Fortunately, the [Giant God]'s consciousness had already been erased by the Mechanical God, rendering it just a lifeless machine.

So now, in this Manifestation Space, Su Yu had the highest authority!

In fact, after Su Yu advanced to a Manifestation Mechanic, he could try to exit directly without destroying this Manifestation Space!

This Manifestation Space, sustained for ten thousand years, was already riddled with holes and on the verge of collapse.

After obtaining the power of the Mechanical God, Su Yu possessed the ability to break out of the Manifestation Space and exit directly.

But that would cause the Manifestation Space to collapse completely, releasing the Mechanical Race, which would be troublesome.

However, now, as Su Yu became a Manifestation Mechanic, such problems no longer existed!

Determined, Su Yu immediately activated his power, directly breaking through the space and diving inside, disappearing from his spot!

At this moment, Su Yu had already arrived outside the "Boundary."

Data turbulence was everywhere, crazily eroding Su Yu's body, just as it had before.

Su Yu now understood that this erosion was actually two-way, with the data turbulence eroding him while also consuming the Manifestation Space's power and accelerating its collapse.

Hastily using the abilities of a Manifestation Mechanic, Su Yu constructed a small Manifestation Space around him to protect himself from the erosion of data turbulence.

Meanwhile, he also prevented the power of the Manifestation Space from being consumed needlessly.

Ensuring his safety, Su Yu started to move deeper into the data turbulence.

At the same time, he used the power of Manifestation Mechanics to try to find direction.

He was searching for the direction towards "reality."

In the data turbulence, without the ability to discern direction, one would be trapped here forever, unable to leave.

Fortunately, Su Yu possessed this ability.

After who knows how long, finally, Su Yu saw a glimmer of light.

It was light from the real world!

Filled with joy, Su Yu accelerated quickly.

The next instant, Su Yu suddenly felt gravity.

"It seems I have truly arrived outside!"

Looking around, Su Yu discovered that the environment had completely changed.

It was no longer the picturesque view within the Manifestation Space.

Above was the ever-unchanging radiation clouds of thousands of years.

On the ground were the scar-laden remnants of a great battle, with ruins scattered everywhere.

"This is... the true Legacy of the Giant God Soldier Camp!"

Joy overflowed in Su Yu's heart; he had finally made it out!

Here was the real Giant God Soldier Camp, while the earlier Manifestation Space could only be considered a cage.

He glanced back, his eyes brimming with brilliance.

Then, Su Yu saw a Manifestation Space constructed of data, concealed in a mysterious place.

If Su Yu wished, he could return at any time.

In fact, the Manifestation Space had exceptional Concealment, making it very difficult even for a Manifestation Mechanic to find the entrance under normal circumstances.

However, Su Yu possessed the power of the Mechanical God and had partially secured [Giant God]'s permissions, maintaining a close connection with the Manifestation Space, allowing him to easily find the entrance.

Being able to exit and return at will put Su Yu at ease.

Then, he closed his eyes to sense, focusing on the situation of the Mechanical City.

Previously, most of his senses towards the Mechanical City had been blocked within the Manifestation Space.

Now outside, it was natural to confirm the situation.

Su Yu sensed that everything in the Mechanical City was as usual, much like when he left.

This was expected; he had only been gone for a few days, unless the Ghost Emperor actually attacked, what else could have happened?

With no worrying complications, Su Yu focused his attention forward.

After considerable effort, he finally reached the true Giant God Soldier Camp, and naturally, he wanted to explore!

To see if there were any benefits.

Su Yu activated various visual modes of the Brutal Battle Armor, beginning to scan everything before him.

Very soon, a complete three-dimensional terrain model formed in his mind.

This was a space spanning over a hundred kilometers in every direction, surrounded by mountains, with a flat clearing in the center, where a large military base was built.

The entire base was mostly cast from some kind of metal, looking incredibly sturdy and capable of withstanding powerful attacks.

However, most of the structures here had been destroyed and melted in the great battle.

The traces showed how intense the battle had been here initially.

Chapter 629: The True Giant God Soldiers Camp!\_2

Clang!

Su Yu arrived in front of a metal wall and casually punched it, causing the wall to vibrate violently and emit a metallic sound, while also showing a large number of cracks.

"It's actually that strong!"

Su Yu was somewhat surprised.

The punch he just threw hadn't even used one-tenth of his strength, but he was a nine-star powerhouse. Even a little bit of strength was extremely powerful, yet this metal wall merely vibrated and cracked but didn't completely shatter!

This proves just how strong the material of the wall is!

This kind of material can even be used to create top-tier six-star Mechanical Creations!

Only materials of this level can remain intact for millennia, showing no signs of weathering.

And it seemed the entire base was made of such material, this...

"This is a fortune!"

At that moment, Su Yu resembled a money-obsessed ordinary person seeing a mountain of gold.

Such a large base, with even its walls made from top-tier six-star material, meant more advanced materials likely adorned critical parts!

Seven-star, eight-star, even nine-star levels wouldn't be surprising, and even higher might be possible!

After all, the Giant God Soldiers corps once had Fourth Rank Giant God Soldier Mechas!

Su Yu had the people of Mechanical City undertake global development, but even if they extracted materials from around the entire world, there might not be as many advanced materials as in this camp.

Most crucially, Su Yu needed to upgrade to a Fourth Rank Giant God Soldier Mechanic by crafting a Giant God Soldier Mecha himself, but he was missing materials.

Though the ceremony requires using the enemy's body for crafting, looking at Wang, it probably wouldn't be enough, so additional preparation needed.

And now, this Giant God Soldier Camp was a treasure trove for Su Yu to plunder!

With a wave of his hand, Su Yu moved the metal wall into the Nihilicity Space.

Having become a nine-star, his Nihilicity Space had expanded and could hold much more.

Instead of using his Manifestation Space for storage, since he just upgraded to Manifestation Mechanic, the space was too small to hold much.

"Let's go deeper and gather some high-grade materials first!"

Su Yu stored away the metal wall and did not linger; he moved towards the deeper parts of the base.

Currently located on the base's periphery, the real treasures surely lay deeper inside.

Su Yu proceeded forward without any concern.

Here, all living Mechanical Creations and humans had been imprisoned by the Mechanical God into the Manifestation Space millennia ago.

In theory, there should be no other dangers present, so excessive caution was unnecessary.

Nonetheless, Su Yu was slightly on guard.

Who knows if anything has changed over the millennia?

True to Su Yu's expectations, he reached the inner parts without encountering danger.

However, he did come across three abandoned Mechanical Creations.

All three were enormous, each at least over twenty meters tall.

Although they were completely scrapped, their materials were exceptionally tough, and even Su Yu found it difficult to damage them.

Thus, Su Yu determined these three creations were of the nine-star level!

They were likely creations of the Military Mechanics of the Giant God Soldiers from the wars of old.

Such things are thousands of times more precious than that metal wall!

Finding these treasures, naturally, Su Yu was delighted, akin to finding money along the way.

However, at this moment, Su Yu suddenly heard the voice of the Mechanical God: "Su Yu, you've gone to the outside world?"

The Mechanical God seemed somewhat surprised.

Part of its power was bestowed upon Su Yu, allowing it to sense Su Yu's situation and communicate with him.

But as the Mechanical God's condition wasn't optimal, it wouldn't idly sense Su Yu.

Thus, it only realized now that Su Yu had left the Manifestation Space!

Su Yu nodded and said, "Indeed, I have been promoted to Manifestation Mechanic, allowing free entry and exit from the Manifestation Space."

"Currently, I am at the Legacy of the Giant God Soldier Camp, collecting its Relics."

Upon hearing this, the Mechanical God was silent for a moment, then said, "Manifestation Mechanic? I saw it in the database of the [Giant God], it appears to be an experimental and powerful profession that can wield the Manifestation Space's abilities at the Third Rank."

"Not many succeeded in taking this role back then. You've managed to succeed?"

Hearing this, Su Yu smiled slightly and didn't explain, as it pertained to the details of his abilities, which he wouldn't carelessly disclose.

Truthfully, he succeeded as a Manifestation Mechanic thanks to the Mechanical God and the Subspace Analyzer, which allowed him to expand his cognitive and computational capacity to complete the ritual.

These fate details were mostly outside the Manifestation Space, making them hard to discern, even for the Mechanical God.

The Mechanical God's observation and control over fate were within the Manifestation Space. Outside it, it was somewhat powerless.

Seeing Su Yu didn't want to elaborate, the Mechanical God didn't press further. Perhaps it already had suspicions.

It continued, "If you can go out, is it not possible to directly bring those humans out?"

Su Yu nodded and said, "It's indeed possible."

The Mechanical God, hearing this, rejoiced: "Then just take everyone out. That would mean rescuing them all without having to fight Wang and the others."

Preferring peace, the Mechanical God would rather avoid battle if possible.

Su Yu, however, shook his head: "Even though I'm a Manifestation Mechanic, I can construct very few Manifestation Spaces, making it difficult to carry many people."

"There are millions of those humans. Multiple trips would inevitably draw attention, and battle would be unavoidable."

"Even if the Mechanical Race doesn't interfere and allows me to transport the humans out, would those humans be willing?"

"Oppressed cruelly for millennia and bearing blood vendettas, how could they just abandon everything and leave?"

"Moreover, if I take the humans out, the Mechanical Race still exists. When the Manifestation Space collapses, they would enter the outside world, and a battle would inevitably ensue!"

"Besides, I need to rely on the King of the Mechanical Race to complete the Fourth Rank ritual!"

"Therefore, regardless of what happens, the battle is unavoidable!"

Su Yu knew that regarding matters within the Manifestation Space, very little could be hidden from the Mechanical God, so he spoke the truth.

He even openly mentioned his intent to perform the ritual.

Upon Su Yu's words, the Mechanical God fell silent once more.

After a long pause, it sighed: "Alas, there's no choice. It seems battle is inevitable."

"That King is truly too mad, actually devising such a frantic plan to become the God of Pain for the Mechanical Race..."

"I should've been more sensitive about matters of Spiritual Energy, known sooner."

"Rather than having the Mechanical Race tormented, it's better to end it swiftly through you, Su Yu."

The Mechanical God appeared previously unaware of the King's scheming.

After all, the King's plan was highly secretive, and even when Su Yu harnessed the Power of Machine God to observe fate, he saw only a fog.

Furthermore, the Mechanical God's proficiency in spiritual matters was lacking.

Later, Su Yu, by going undercover with the Galaxy Battle Armor and approaching the King, obtained intelligence.

Consequently, the Mechanical God learned of the King's plan and the Power of Pain.

The intelligence Su Yu gathered was essentially what the Mechanical God acquired.

Thus, the Mechanical God didn't object when Su Yu insisted on battling the King.

"This is good."

Su Yu nodded in agreement.

Then he suddenly smiled and said, "Mechanical God, you should know this camp very well, right?"

"Where is the warehouse here? Can you guide me there?"

This Giant God Soldier Camp had many places with winding paths and complex architectures, and a lot was damaged beyond passage, making forging a path difficult, even for someone of Su Yu's abilities.

Su Yu wished to thoroughly explore, but it would require considerable time investment.

As the Mechanical God spent considerable time here in the past, it was certainly very familiar.

With the Mechanical God guiding, wouldn't it be much more convenient?

"Of course."

"Here's the map..."

The Mechanical God was straightforward, immediately transmitting a detailed map to Su Yu.

This map was far more detailed than the three-dimensional map Su Yu had previously managed to create.

The map sent was extremely detailed, even down to the microscopic level, and had Su Yu not expanded his cognition, the map alone would have overwhelmed his mental capacity.

"Thanks."

Having received the map, Su Yu expressed gratitude, then promptly began to study it.

Soon enough, he identified several key locations within it.

Such as the armory, the mechanical storage, the energy storage...

"Haha, I wonder how many great things are inside?"

Feeling excitement, Su Yu made his way towards the armory.

Chapter 630: Ultimate Efficiency with One Punch! Armory!

Su Yu knew that a great battle was imminent, and weapons were the most important, so he decided to check the weapons first.

Soon, Su Yu arrived in front of a heavy alloy gate, the entrance to the armory.

The gate was tightly closed, but ordinarily, for a nine-star Transcendent, with strong spiritual power, a casual sweep would reveal the things behind the door.

However, this alloy gate was somewhat special. Even with Su Yu's strength, he could not see through it.

Clearly, the material of this door was extraordinary, capable of blocking Su Yu's spiritual power.

That wasn't surprising; the armory door of the Giant God Soldier Camp couldn't possibly be made of ordinary steel alloy.

Bam!

Su Yu casually slapped the door.

With his strength beyond the nine-star top level, combined with the Brutal Battle Armor, even a casual slap contained enough power to severely injure or even kill an ordinary seven-star Transcendent.

But the door didn't even show a mark, not even a mild vibration.

Clearly, this door was not only capable of blocking Su Yu's spiritual power but also possessed extremely high strength.

"This door is something good."

Su Yu nodded, undoubtedly, this material was something valuable.

But this valuable thing obstructed Su Yu's path.

There was no sign of a lock or similar mechanism; only a screen in a corner, obviously requiring some kind of password and authorization to open.

Nevertheless, the screen was pitch black, seemingly long devoid of energy. The war from ten thousand years ago likely destroyed the energy supply here.

Even if Su Yu had authorization, he wouldn't be able to open it; he could only resort to force!

However, considering the level of the Giant God Soldier Camp, the door's strength was likely enough to withstand a fourth rank level attack!

Fortunately, this high-grade spiritual material required a strong energy supply to manifest its full properties.

Just like Su Yu's Brutal Battle Armor, which needed a high infusion of Ghost Energy to activate its various effects.

This material of the door should be the same.

And now, the door had long lost its energy, its strength was likely greatly reduced.

Force might work.

"In that case, let's... try that!"

Su Yu pondered for a moment, then began to gather spiritual energy in his hand, slowly punching toward the door!

In this punch, he used all his power.

The material strength of this alloy gate was very high; even without an energy supply, it couldn't be broken by ordinary seven-star or eight-star Transcendents.

Even an ordinary nine-star might not be able to open it.

But Su Yu was not an ordinary nine-star Transcendent.

His power surpassed ordinary nine-star top level, and his full-force strike was incalculable in power!

However, Su Yu's punch was somewhat strange; it appeared very slow.

At Su Yu's extreme speed, over a hundred times the speed of sound, a single punch wouldn't need even a ten-thousandth of a second.

But this punch took more than a minute to reach the alloy gate.

Then...

Sizzle!

This punch landed on the alloy gate, but instead of an earth-shattering boom, there was only a faint sound, as if Su Yu hadn't used any strength at all.

Yet that extremely solid alloy gate was blown out with a big hole by this seemingly light punch, scattering fragments everywhere.

"This punch was not bad."

Su Yu was very pleased with the result of his punch.

For that punch, while exerting his full power, he had also used his powerful computational abilities to concentrate all the energy at one point, allowing no energy to leak, maximizing energy efficiency to the extreme with almost no waste.

This was a technique he learned from the human elders in the Manifestation Space.

The humans in the Manifestation Space, due to long energy shortages, had developed the extreme utilization of energy.

Maximizing energy efficiency to its limit.

Earlier, when Su Yu examined the workshops of those mechanics, he had witnessed it.

However, at that time, what Su Yu saw was just a rough part, only enhancing energy efficiency by 1%.

The essence lay with those elders above seven stars.

Those elders planned to teach this technique to Su Yu once he finished his training.

They hadn't yet imparted it to Su Yu.

Still, with such thoughts, the corresponding future fate naturally formed.

Then Su Yu saw and learned it ahead of time using the Power of Machine God.

Previously busy with enhancing his power, and taking on the role of a Manifestation Mechanic, Su Yu hadn't had the chance to experiment with this technique.

It was now, facing this thick alloy gate, that Su Yu tried it, and the effect was unexpectedly good.

In past battles, Su Yu's attacks had terrifying aftermaths, even reaching beyond the atmosphere.

Though it seemed intimidating, it was actually a sign of low energy efficiency.

A lot of energy dissipated in the aftermath, significantly reducing the energy that actually hit the enemy.

But now, Su Yu had mastered this technique, he could almost utilize every bit of energy without any wastage.

He could not only utilize energy completely, but also concentrate and compress it, making a unit of energy yield several times the attack effect!

This dramatically increased Su Yu's attack power, raising it by several times, even over ten times!

Considering it's on top of his nine-star top level power, such an increase was almost defying nature.

No wonder that incredibly sturdy alloy gate crumbled like paper under his fist.
