

Infinite 671

Chapter 671: Radiant Mecha!_2

Extreme hatred caused the black aura on its body to become even more intense, as if the hatred brought immense pain, enhancing its power.

Regarding the hatred and curses towards the [King], Su Yu turned a deaf ear. In fact, Su Yu couldn't hear anything at all right now.

As a Third Rank Transcendent, suddenly controlling the power of the Fifth Rank, the exhilarating feeling was beyond any enjoyment an ordinary person could imagine, and Su Yu was lost in it.

Fortunately, Su Yu suddenly awoke moments later, then felt a splitting headache, chaotic thoughts, and extreme fatigue.

It was like an ordinary person working continuously for seven days and nights without sleep, feeling like they were about to die at any moment.

"Not good, this kind of power is too burdensome for me now!"

Su Yu immediately understood where the problem lay.

As a Third Rank Transcendent, actually wielding the power of the Fifth Rank was simply burning life, an act of pure suicide.

It was thrilling, but within a thousandth of a second, Su Yu would be exhausted to death.

If it weren't for Su Yu having the Power of Nihilicity, waking up at a critical moment, he would have died moments later.

"This Radiant Mecha is so unreliable, trying to kill me..."

Su Yu couldn't help but curse in his heart.

But in the next moment, he realized he was wrong to curse.

In fact, the Radiant Mecha had been conveying information to him all along, but Su Yu was too intoxicated to notice it just now.

[Warning! Radiant is being invaded by unknown forces! Threat level: 5!]

[Warning! Radiant is being controlled by unknown life! Threat level: 4!]

[Warning! Defense system offline, no activation authority! Unable to autonomously eliminate the invasion!]

[Detected Giant God Soldiers member: Su Yu! Rank: Recruit!]

[Granted temporary authority to recruit Su Yu according to Giant God Soldiers third wartime regulation!]

[Authorization complete! Defense system activated! Invader expelled!]

[Unknown force residue detected! Warning! Unable to eliminate! Unable to eliminate!]

[Recruit! Wake up quickly, use this Mecha's power to eliminate the invader! Remove the invading unknown force! If you can't wake up within a millisecond, this Mecha will revoke your authority!]

[Countdown...]

It turned out that the intelligence of the Radiant Mecha had awakened, but various systems on the Mecha were offline, making it difficult to autonomously eliminate the [King]'s invasion.

After contacting Su Yu just now, through some principle, it determined that Su Yu belonged to the Giant God Soldiers as a recruit and even obtained Su Yu's name.

Thus, it granted Su Yu authority.

With the authority, it equated to having a master.

As a Mecha, it needed a master to fully activate its functions, as per its initial design.

This was a safety measure established by Zhang Chenfeng during its creation, imposing multiple restrictions on the actions of the Radiant Mecha.

Compared to Su Yu's Nuonuo, Mechanical Spirit, and other Mechanical Apostles, the freedom of this Radiant Mecha was incredibly low, requiring authority for almost anything it wanted to do.

This safety mechanism was necessary.

After all, as a Fifth Rank Mechanical Creation, whether in intelligence or power, it was overwhelmingly powerful.

If it could move freely without a master's authorization, that would be too dangerous; if it lost control, it could destroy a planet and extinct a civilization in a short time!

This safety mechanism was of extremely high rank.

Even as a Fifth Rank Mecha, it was difficult to autonomously break through.

However, there was still a way.

Granting Su Yu temporary authority was a way to bypass restrictions in a dire situation, also an emergency mechanism designed by Zhang Chenfeng at the time.

After granting Su Yu temporary authority, the autonomous ability of the Radiant Mecha increased sharply, enabling it to activate the defense system and expel the [King] from the Mecha.

However, the greatest invasive force within the Mecha was not the [King], but the Hell Furnace in its chest!

The defense system alone could not extract this furnace, which was where Su Yu came in!

Su Yu needed to wake up to provide more operational authority for the Radiant Mecha!

However, the Radiant Mecha also understood the importance of proportion, knowing that Su Yu could not withstand its power due to his rank, so it was always counting down; if Su Yu couldn't wake up within the time limit, it would revoke his authority to prevent Su Yu's death from being overwhelmed.

Meanwhile, the Hell Furnace in the Radiant Mecha's chest kept flashing, erupting with terrifying power.

This thing was judged by the Radiant Mecha's intelligence as a threat level of 5, higher than the [King]'s 4.

This meant the Hell Furnace was something of the same rank as the Radiant Mecha, also a Fifth Rank Mechanical Creation!

No wonder this thing was now the energy source of the Radiant Mecha, just like Su Yu's Brutal Core.

If it could power a Fifth Rank Mecha, how could the Hell Furnace's rank be low?

And the [King] itself seemed to remain at the Fourth Rank.

The [King]'s terrifying power just now was borrowed using the Radiant Mecha's strength; having been expelled, it immediately revealed its true form, reverting to the Fourth Rank level.

It was now transforming into a mass of black aura, flying erratically around the Radiant Mecha, cursing Su Yu, while attempting to invade the Radiant Mecha once more.

However, now that the Radiant Mecha had regained some autonomous ability, how could it tolerate it approaching again?

Every time the [King] flew close, it felt a terrifying danger, signaling that the Radiant Mecha was about to strike!

So the [King] immediately retreated and then approached again moments later.

Then retreated again...

At this moment, the [King] in front of the Radiant Mecha was like an annoying mosquito, buzzing around, constantly probing and harassing.

Yet for the Radiant Mecha, if it really took action, swatting the [King] would be just like swatting a mosquito.

The [King] was well aware of this fact, making it angrier and a bit sorrowful at heart.

Clearly, it had just wielded the Fifth Rank Planet-Level power, a cosmic force like the True God of Creation.

How did it turn into a mosquito flying aimlessly in just a short time?

All because of Su Yu!

Thinking of this made the [King] even more hateful!

However, it did not think it had lost!

Because the Hell Furnace, which it personally forged, was still lodged in the chest of the Radiant Mecha.

Utilizing its connection with the Hell Furnace, the [King] activated it at full power, causing the Power of Pain to rampage wildly inside the Radiant Mecha.

Busy suppressing the Exotic Energy, the Radiant Mecha had no time to deal with it.

This was also the reason why the [King] could still fly about the Radiant Mecha without getting killed.

As time went on, the Power of Pain gradually gained the upper hand inside the Radiant Mecha, and the danger sensed by the [King] grew weaker, indicating the threat the Radiant Mecha posed was diminishing.

If things continued this way, it would eventually be able to invade the Fifth Rank Mecha again, once more possessing the mighty power of the Fifth Rank!

With its mechanical nature, as long as it invaded the Radiant Mecha for a long time, it could eventually fuse completely with this Mecha, which would effectively elevate it to the Fifth Rank!

And at this moment, Su Yu awoke.

Speaking of complexity, all this actually happened within a thousandth of a second.

[Recruit! Quickly wake up, use this Mecha's power to eliminate the invader! Remove the invading unknown force! If you can't wake up within a millisecond, this Mecha will revoke your authority!]

[Countdown...]

Su Yu also heard the information from the Radiant Mecha.

With rapid thoughts, he instantly understood everything.

He replied calmly, "What should I do?"

He didn't know how to dismantle the Hell Furnace, this terrifying Fifth Rank creation.

Upon hearing this, the Radiant Mecha seemed surprised, then hurriedly said, "Control my arms and remove the foreign object from the chest!"

Su Yu was slightly stunned, was it that simple?

But he had no time to ask more questions, as the thousandth of a second was fast approaching, and if he delayed even a bit more, he would be exhausted to death by the massive power of the Radiant Mecha.

He didn't dare to hesitate, quickly attempting to sense the arms of the Radiant Mecha.

This was easy, with the full cooperation of the Radiant Mecha, Su Yu felt the Mecha's body to be like his own, able to control any part with a thought.

Then, Su Yu tried lifting the Radiant Mecha's two large hands to his chest, grasping the gigantic Hell Furnace and yanking it out forcefully!

At this moment, Su Yu seemed to hear infinity screams, and the next moment, a massive, twisted Mechanical Furnace was pulled out from the Radiant Mecha's chest by Su Yu!

"No..."

At the same time, the [King]'s unwilling roar also echoed!

Chapter 672: Radiant Blueprint

At the instant the Hell Furnace was pulled from the chest of the Radiant Mecha, Su Yu felt his consciousness merge into the body of the Radiant Mecha, unlocking various permissions to control many energy structures, mechanical devices, combat algorithms, and information data that Su Yu could not understand...

It was the Radiant Mecha utilizing Su Yu's temporary permissions to muster strength to remove the Hell Furnace.

At this moment, Su Yu had no control at all and could only let the Radiant Mecha operate.

After all, he couldn't understand it even by looking; how could he control it independently?

However, he was rapidly memorizing every detail at this moment. Being able to personally experience such advanced energy usage is indeed a great opportunity and will certainly be significantly beneficial afterward.

As the Radiant Mecha mobilized permissions and power, a large amount of energy surged from the Hell Furnace, intending to confront the power of the Radiant Mecha.

What seemed like a simple hand yank with both hands was actually a colossal war between two Fifth Rank Mechanical Creations.

In microscopic realms, energy levels, data worlds. . . In various domains, the two Fifth Rank machines collided countless times in an instant.

Su Yu even faintly felt that these two Mechanical Creations had a fierce struggle on the level of fate.

In less than one ten-thousandth of a second, no one knew how many times these two Mechanical Creations clashed.

Their struggle was something even Su Yu couldn't completely comprehend.

Just like before, when Su Yu was battling the King on the level of fate, even the Fusion People were staring blankly, not knowing what Su Yu was doing.

Although Su Yu couldn't fully understand, it was evident that the Radiant Mecha won in the end.

The Hell Furnace was successfully pulled out!

As the Hell Furnace was removed, a voice echoed from within: "Radiant! You'll regret this..."

It was the voice of the King.

It appears that the Hell Furnace, though a Fifth Rank Mechanical Creation, lacked intelligence and consciousness and was entirely controlled by the King.

And no one knew how the Fourth Rank King managed to create and control this Fifth Rank Hell Furnace.

Perhaps this explains why the Hell Furnace was no match for the Radiant Mecha.

However, according to what the King said, it seemed that something bad would happen after the Radiant Mecha removed the Hell Furnace.

But the Radiant Mecha didn't care and didn't wait for the King to finish speaking, simply holding the Hell Furnace in both hands and then exerting force!

The high-level energy, algorithms, data, information that Su Yu couldn't comprehend... erupted once again in the palms of the Radiant Mecha!

Boom!

In the hands of the Radiant Mecha, it seemed as if a sun had truly appeared!

Even Su Yu had difficulty looking directly at this blinding light and could only close his eyes.

Meanwhile, he heard the King's anguished scream: "No! Radiant! Your current body isn't real; if you destroy the Hell Furnace, you will also..."

When Su Yu opened his eyes again, he saw that in the palm of the Radiant Mecha, the Hell Furnace was already twisted and damaged.

The Pain Energy that had been constantly gushing out seemed to have disappeared.

It seemed that the Radiant Mecha had destroyed it.

Seeing this, Su Yu felt a slight sense of loss.

Such a Fifth Rank Energy Core was undoubtedly a rare treasure; it's a pity it was destroyed just like that.

However, Su Yu also understood that this thing was too dangerous, and the Radiant Mecha might have destroyed it to prevent it from being invaded again.

The most crucial point is that the state of the Radiant Mecha might not be good.

After all, according to the information Su Yu obtained from that shard earlier, the Radiant Mecha had been destroyed a millennium ago, so how could this radiant Mecha be here now?

Could it be...

As Su Yu was speculating in his heart, he saw the one-kilometer-high Radiant Mecha shrink.

Its colossal body disappeared rapidly like a dream or illusion.

In a short time, only a broken mechanical core with a diameter of about ten meters was left on the ground.

This mechanical core seemed to be the true body of the Radiant Mecha.

Given the massive size of the Radiant Mecha, what's left is just like a human only having a finger left! Or even less.

It was broken to such an extent!

The kilometer-high body earlier seemed to be maintained using the energy from the Hell Furnace.

When the Radiant Mecha removed the Hell Furnace and lost energy support, it revealed its original form.

No wonder the King had just said that Radiant Mecha would regret pulling out the Hell Furnace.

"You..."

Su Yu tentatively sent a message to the broken core of the Radiant Mecha, trying to see if it could still communicate or had any consciousness.

But at this time, Su Yu was stunned to find that this broken mechanical core was also slowly disintegrating, even seemingly not real itself!

Just as Su Yu was stunned, this last bit of core disappeared into the air just like that.

At the moment it completely vanished, some information was transmitted into Su Yu's consciousness, it was the calm voice of the Radiant Mecha: [Abnormal Energy has been eliminated!]

[New Recruit Su Yu has reached maximum capacity and temporary permissions have been reclaimed...]

[According to the Fifth Battle Guidelines of the Giant God Soldiers Legion, New Recruit Su Yu is awarded 100 merits! Promoted to Captain rank!]

[New Recruit Su Yu, you are now a full member of the Giant God Soldiers Legion and the sole full member, thereby automatically becoming the Commander of the Giant God Soldiers Legion!]

[The war is not yet over, Captain Su Yu, you may decide your future combat path at your discretion...]

The tone of the Radiant Mecha was procedural and methodical, showing none of the regret that the King had anticipated.

Chapter 673: Radiant Blueprint_2

After conveying this information, the Radiant Mecha completely disappeared without a trace.

At this moment, Su Yu's mind was also in chaos, likely the so-called "overload" mentioned by the Radiant Mecha.

He stared blankly for a moment before coming to his senses and realizing what had happened: "Did I just get promoted? Captain rank? Commander of the Giant Divine Soldiers?"

"But what use is a commander without any troops..."

He felt somewhat speechless, a little lost.

The immensely powerful Radiant Mecha, experienced for less than a millisecond, was gone.

Now, the only power he could control was his own Fourth-Order top-level body and the Brutal Battle Armor.

Previously, he felt his power was strong, but after experiencing the planet-level power of the Radiant Mecha, his own energy seemed blandly insipid.

Too weak! I am truly too weak!

It's like tasting true delicacies of the mountains and seas, then trying to swallow chaff and vegetables, how could anyone be satisfied?

For those Fusion People, normal gourmet food is like poison.

And for Su Yu, the power of the Radiant Mecha was also like poison, once tasted, it would never be forgotten.

However, Su Yu, with his strong will, quickly adjusted himself due to the Power of Nihilism suppressing his emotions.

"It seems my control over my mental state is a bit lacking."

"But it's no wonder, I am ultimately human, with human emotions, to suddenly wield such great power and then immediately lose it, it's a huge emotional drop, psychological fluctuations are normal..."

Su Yu didn't feel there's anything wrong with feeling this loss.

These are normal emotions, just face them normally.

After adjusting his emotions, there was no more sense of loss in Su Yu's heart, instead, fighting spirit surged!

No matter how strong the power of the Radiant Mecha, it's still external!

Even if lost, it's not a pity, Su Yu would eventually rely on himself to master the power of the Fifth Rank, truly standing alongside planets!

And... the appearance of the Radiant Mecha was bizarre, and its disappearance was equally strange, Su Yu didn't even know whether the Radiant Mecha just now was real or an illusion.

With such a mysterious mecha, who knows if it truly disappeared or just seemed to?

Maybe there might be a chance to bring it out again in the future?

But now is not the time to consider such things, the key now is... [King]!

Although the Hell Furnace was destroyed, [King] was unscathed, still alive and kicking with Fourth-Order power!

But, its mood isn't too good now.

Su Yu lost the power of the Radiant Mecha and felt a bit of loss.

On the other hand, [King] lost both the Hell Furnace and the Radiant Mecha, which was enough to drive it mad.

Its achievements planned for millennia vanished in less than a minute.

Thinking of this heartache, Su Yu couldn't help but feel sorry for [King], sorry enough that laughter bubbled up...

At this moment, [King] was hovering dumbfounded before the scrapped Hell Furnace, motionless.

Though its body was still, the black aura surrounding it was ever-fluctuating.

"Ah....."

[King] suddenly let out a sky-shattering roar, a sound filled with endless pain! Despair! Hatred!

It turned sharply towards Su Yu, and within the black aura, a pair of red eyes flared!

In that instant, Su Yu felt a palpable killing intent.

[King]'s hatred, murderous intent, seemed to have substantiated, transforming into a strong energy resonating with its Power of Pain, making it even more dangerous.

Confronting such killing intent, Su Yu just smiled.

"Su Yu, you still dare to smile!"

"How do you wish to die?"

"No! I won't let you die. Even if planets are destroyed, the universe undergoes heat death, I won't let you die, you'll only enjoy endless pain in Hell..."

[King]'s voice was like a demon crawling out from Hell.

Su Yu never thought he could hear such intense emotions from a Mechanical Creation.

Thus, Su Yu laughed even more heartily: "Good, very good!"

"Now that you're only Fourth Rank, it's time for us to solve this problem head-on!"

"I'm counting on you for my Fourth-Order Ceremony!"

The current [King] had already lost the Radiant Mecha and Hell Furnace, its strength greatly diminished, no longer possessing Fifth Rank power, "only" a Fourth Rank from the Mechanical Race.

So Su Yu was ready to commence his ceremony!

To face and eliminate [King] upfront, using its mechanical remnants to craft his own Giant God Soldier Mecha!

"Using me to complete your ceremony? You dare?!"

"I am Fourth Rank! And at the peak of Fourth Rank! What do you rely on?!"

"You dare talk tough at the brink of death! Now that the Radiant Mecha is gone, let's see how you die!"

[King]'s tone was menacing, approaching Su Yu inch by inch, like a cat playing with a mouse, in no rush to kill.

It seemed to want to subject Su Yu to terrifying psychological pressure, to torment Su Yu as revenge!

However, the effect was not as expected.

Because Su Yu was still smiling.

Before, Su Yu couldn't defeat the Fifth Rank [King], and now against the Fourth Rank version, he still couldn't...

But who cares, Su Yu couldn't care less.

Due to the various changes earlier, Su Yu now had complete faith in the prophecy of fate.

In this battle, he would definitely win!

"[King], did you forget about the Prophet?"

"Before, you didn't believe in the prophecy, but now?"

Su Yu spoke with a smile.

Upon hearing this, [King] was momentarily speechless.

Seeing this, Su Yu laughed even more freely.

Although the feeling of predetermined fate isn't pleasant.

But if it can be used to "bully" a strong enemy, then isn't that feeling perhaps quite satisfying?

"No! Damn fate, I don't believe it! My fate is solely in my hands!"

[King] roared and charged at Su Yu.

And Su Yu himself was rather curious.

How could he possibly defeat this powerful [King] head-on now?

He carefully sensed his power, trying to find an opportunity for victory.

In a short moment, he found it!

"So, before disappearing, the Radiant Mecha left me such a gift..."

In his mind, Su Yu unexpectedly found a blueprint, it was... the blueprint of the Radiant Mecha!

Su Yu himself didn't know when this blueprint appeared.

It might have been infused into his thoughts at the moment of his mental chaos earlier by the Radiant Mecha.

For the Radiant Mecha, a Fifth Rank mecha, its blueprint was undeniably a top secret among secrets.

Even [King], who previously controlled the Radiant Mecha, only used some bizarre means to indirectly control it and perhaps didn't have its blueprint data.

But now, Su Yu had it!

For such powerful mechas, their blueprint data itself represents power! Just like the structure data of the Subspace Analyzer!

Previously, Su Yu utilized the structure data of the Subspace Analyzer to transform into an alien star civilization's mechanical being.

Now armed with the blueprint data of the Radiant Mecha, what could he do?

In the next moment, with just a thought, Su Yu's consciousness was filled with the blueprint data of the Radiant Mecha.

The powerful Spiritual Energy within his body, various professional energies, especially abilities related to the Mechanic, automatically operated!

His body went through a tremendous transformation!

At this moment, Su Yu felt he was no longer human but a mighty mecha!

In fact, he was no longer human; his body was glowing! Growing bigger!

In a short time, he transformed from a human-sized 1.8 meters to a several-hundred-meter light-cast giant!

The light gradually faded, and Su Yu looked down at his enormous body.

Although he wasn't as big as the previous Radiant Mecha, he was still half its height!

About a five-hundred-meter tall body!

His body was streamlined, shining with a silver glow.

The entire person seemed both metal forged and biologically skinned, faintly emitting a sun-like radiance, appearing noble and sacred.

On that metallic lustrous skin flowed eerie green patterns, the power of Ghost Energy, imbuing Su Yu's aura with noble sanctity and an eerie evil.

Majestic and grand, both holy and wicked! Such was Su Yu now!

Seeing this, [King]'s mechanical eyes nearly popped out:

"This... this is the Radiant Blueprint! It's the supreme secret of the Giant God Soldiers!"

Chapter 674: Power of Sunshine!

The [King] was clearly knowledgeable and immediately recognized Su Yu's current state as stemming from the Radiant Mecha blueprint, the so-called Radiant Blueprint.

But Su Yu ignored the exclamations of the [King], instead lowering his head to admire his own body.

It's not that he's narcissistic, but this current state is indeed powerful and majestic, perfectly aligning with Su Yu's aesthetics.

Alright, Su Yu is indeed being narcissistic.

"I really am quite dashing now..."

Su Yu raised his hand, touched his light-cast face, feeling extraordinarily pleased.

This wasn't about wearing some Mechanical Battle Armor, but a transformation of his true form!

This Radiant Mecha blueprint is truly magical and fits perfectly with Su Yu's profession and Spiritual Energy.

Just a brief recollection of the blueprint's content, and he can transform into a Light-Cast Giant!

Unlike the Subspace Analyzer's blueprint, which requires quantumization first, and even after transformation, there's no real combat power, only observation and analysis.

The Subspace Analyzer, after all, is alien technology, which doesn't match well with Spiritual Energy.

The most critical point is that, it wasn't even a combat Machine Creation.

In contrast, the Radiant Blueprint is an actual weapon of war, a blueprint for a Fifth-Rank Planet-Level Mechanical Creation!

With this blueprint, Su Yu's transformation into a Light-Cast Giant naturally led to a significant power surge!

Though Su Yu himself couldn't quite gauge his current level of power, he estimated it certainly wouldn't be any weaker than the Fourth Rank!

He could definitely take on the [King]!

And at this moment, the [King] continued to prattle:

"Did the Radiant Mecha give you this blueprint? How could it reveal such an important secret to you?"

"Clearly, I'm the strongest existing member of the Giant God Soldiers, why not give it to me!"

"Hateful! So hateful..."

The [King] roared, his tone full of endless jealousy and resentment.

Clearly, he had coveted the Radiant Mecha's blueprint for a long time, dreaming of obtaining it.

Now that this treasure had fallen into Su Yu's hands with ease, how could he not be envious and resentful?

Su Yu was left somewhat speechless.

It seemed the [King] was a bit maddened, claiming he was the strongest existing member of the Giant God Soldiers, when he had already defected. It would be odd if the Radiant Mecha acknowledged him.

Su Yu, on the other hand, was the legitimate Captain and the highest Commander of the Giant God Soldiers—although he was a lone wolf, his identity was in place.

Who else should receive the blueprint but him?

However, the [King], being furious, wouldn't listen to reason.

Nor did Su Yu feel inclined to argue, laughing heartily and saying:

"Ha ha, didn't you just ask me why I completed the Fourth-Order Ceremony with you?"

"Now have you seen? Just because of this!"

"Rest assured, I won't let you die easily!"

Su Yu said with a mocking tone, somewhat impertinently.

But given his current stature, his words seemed like divine pronouncements, full of majesty.

Previously, it was the [King] who looked down upon Su Yu.

Now it was reversed, with Su Yu looking down on the [King].

"Su Yu, you should die! You really should die!"

Upon hearing Su Yu, and looking up in rage at Su Yu's towering figure, the [King] became even more furious.

But Su Yu just laughed, clenched his large fist, with light gathering, then explosively punched the [King]!

"Die!"

The [King] also roared and charged at Su Yu, dark energy swirling madly around his body.

Judging by his hoarse roars, he seemed to be exerting all his strength, even entering a self-destructive state.

The black energy around the [King] kept expanding, transforming into a hundreds-meter-tall black giant in a short time.

This black giant had an eerie appearance, wholly composed of sinister black energy that squirmed incessantly.

On its skin surface, expressions of anguished wailing faces appeared continuously, showcasing tormented Mechanical Life and even half-mechanized humans.

Inside this black giant was a hell of suffering, perpetually enacting various tortures, producing pain beyond ordinary imagination.

This pain even seeped out, attempting to assimilate all life into itself.

Ordinary people and Mechanical Creations would instantly have their consciousness sucked in by one glance at this Dark Demon God, suffering eternal torment, becoming part of Mechanical Hell.

Even Third-Rank experts couldn't withstand it, and Fourth-Rank experts would also be affected.

Yet, Su Yu felt nothing, even a bit exhilarated, his power surging even more fiercely.

Bang!

Su Yu's fist collided with the [King]'s fist.

Despite the collision, there was no world-shaking energy explosion.

Only light and dark colors, continuously eroding and devouring each other!

Su Yu and the [King], surprisingly, were in a deadlock.

"Indeed, my power now is capable of direct combat with the [King], without losing the upper hand!"

This fist collision, Su Yu's heart was set at ease.

Since he could directly stalemate, then there was the power to fight! If he could fight, he could win!

"However, is this considered my own power or borrowed?"

Su Yu lifted another huge arm, clenched his fist again, light gathering, and punched towards the [King].

The [King] certainly wouldn't back down, raising the eerie arm of the Dark Demon God, harnessing the endless Power of Pain, punching towards Su Yu.

In the blink of an eye, the two punched each other thousands of times, and with increasing speed!

Light and dark forces surrounded, entwined, and circulated between them, forming a Taiji-figure-like chaotic shape, dazzling to behold.

Chapter 675: Power of Sunshine!_2

One person and one machine, both remained focused only on their opponent!

The two giants, possessing the most elite strength on this planet, now fought like ordinary people, wildly trading blows!

At their level of skill, superficial moves were nothing but trivial tricks.

What mattered was energy control, the superiority of algorithms, the frequency of the spirit, the resilience of willpower... and other hard indicators.

And in these aspects, the "King" considered itself definitely superior to Su Yu.

Because Su Yu, after all, was fundamentally of the Third Rank, with no experience in using Fourth Rank power.

However, this was merely wishful thinking on the "King"'s part.

After thousands of punches exchanged with it, Su Yu showed no sign of being at a disadvantage; in fact, he grew stronger the longer he fought!

Because when Su Yu fought the "King," he inadvertently recalled the details of energy flows and algorithm optimizations inside the mecha, observed when the Radiant Mecha previously extracted the Hell Furnace.

Before, Su Yu couldn't understand those details at all, but after transforming into the Light-Cast Giant and engaging the "King," he started to grasp some of them.

And the more intensive the battle became, the more he understood! The more adept he felt!

"So, those technical details need such a body to be fully utilized!"

"Earlier, the Radiant Mecha must have intended for me to clearly see those details."

"Some of the details are likely unknown even to the 'King,' after all, it was never truly acknowledged by the Radiant Mecha."

Upon realizing this change, Su Yu was filled with immense joy.

His thoughts flickered wildly, and the radiant power on his fists grew stronger and stronger!

The "King" naturally noticed this detail, feeling both shocked and wrathful.

It too roared and increased its power, growing stronger with each clash against Su Yu! The battle grew even more intense!

Its essence of power derived strength from pain!

This pain was not just from the suffering of other beings.

It seemed the "King's" own pain also increased its power, and the effect seemed even better!

However, under normal circumstances, the "King" would not willingly inflict pain on itself.

Using the Power of Pain did not mean it enjoyed suffering.

Normal beings prefer joy and dislike pain. Although the King was twisted, it was still normal in this aspect and wouldn't exchange its own suffering for power.

Otherwise, even if it gained power, living immersed in endless pain held no meaning.

But now, it was in such pain! It hadn't tasted such agony in millennia, pain beyond its control.

This pain wasn't something it desired; it was brought upon it by Su Yu.

Everything it had pursued for ten thousand years was destroyed and taken by Su Yu within minutes.

Now, Su Yu was using this power to battle it fiercely, trying to kill it, and use it as a component for a ritual!

How could it endure this? How could it not be in pain?

This was too much bullying!

At this moment, the "King" even felt a bit aggrieved.

Thinking about it made the pain in its heart even deeper.

It, the King of the Mechanical Race, nearly a fifth-rank super being, forced into such a situation by Su Yu, a mere third-ranked human.

When it thought about this fact, it felt on the verge of madness.

Thus, its Power of Pain naturally surged, becoming stronger and stronger with the fight.

Su Yu quickly noticed the change in the "King," feeling troubled.

The "King" had been intensely provoked and was on the brink of madness.

If it continued to grow, would it directly break through to the Fifth Rank?

The "King" was originally top-tier at the Fourth Rank, capable of attempting to break into the Fifth Rank.

But apparently, ascending to the Fifth Rank was exceedingly difficult; it had tried for millennia without success, which was why it sought the power of the Radiant Mecha.

Now, had Su Yu forced it to its limits, ready to break free from constraints and ascend to the Fifth Rank?

If that happened, it would mean Su Yu had fulfilled its wish.

"That won't do! You want to ascend? I'll kill you first!"

Su Yu hardened his resolve, and the power of radiance intensified further!

In that instant, the entire Manifestation Space flooded with light, suppressing the "King's" dark power of pain!

The power Su Yu transformed into seemed infinite, constantly rising, with no end in sight.

"Roar..."

The "King" roared wildly, but under Su Yu's fierce assault, signs of its breakthrough seemed suppressed.

This slightly calmed Su Yu's heart, yet puzzled him.

Where exactly did such power come from?

Is it considered borrowed power?

If he used this state to actually kill the "King," could he complete the ritual?

The most critical question was, what if this power suddenly ran out? Forget completing the ritual, he might instantly be killed by the "King"!

No one could answer this question.

The Mechanical God had long been silent, busy maintaining the stability of the Manifestation Space, unable to aid Su Yu.

Even if the Mechanical God was still around, with its insulative nature towards Spiritual Energy, it likely couldn't provide any insight.

Su Yu didn't rely on the Mechanical God, instead, he devoted himself to figuring out the principle.

"Firstly, the power couldn't have come from nowhere."

"I also didn't feel any external power being infused into me, nor did it come from the subspace."

"So... this light power of mine now seems to be my own power?"

Su Yu, after analyzing, surprisingly discovered this terrifying power was actually his own?

This was somewhat unbelievable.

How did he not know he had such strength?

If he had known he could transform into a Light-Cast Giant and suppress the Fourth-Order Top "King," why go through so much effort?

"Could it be that I'm harboring the bloodline of some cosmic giant, awakening at the critical moment?"

"Or was I some ancient powerhouse in a past life, now truly revived?"

At that moment, Su Yu even considered such strange thoughts, really doubting if he was some ancient powerhouse reborn.

But Su Yu quickly dismissed the unreliable notion.

Now was not the time for idle thinking during the war.

Switching his mindset, Su Yu soon thought of another possibility:

"After eliminating all possibilities, then it must be..."

"The power of faith and intent!"

Su Yu had known all along he possessed a powerful force!

The power of faith!

Since Su Yu's ascension to Seven Stars, this power had always accompanied him.

Su Yu had saved millions of humans, tamed a large number of Radiation Beasts, and even demons from the depths of subspace.

These humans, Radiation Beasts, and demons constantly provided Su Yu with the power of faith and trust.

While many weren't Su Yu's believers, he could always sense that sense of reverence and trustful intent.

Yet Su Yu had always found it difficult to directly utilize this power, unable to transform it into combat strength.

Instead, the Profession Panel could convert this power of faith into professional experience, helping Su Yu rapidly upgrade.

After ascending to Seven Stars, Su Yu barely trained and hardly "leveled up by fighting," relying predominantly on this effortless experience to upgrade.

To have elevated Su Yu to his current level in such a short time highlighted the power's strength.

Moreover, now it seemed this power wasn't just for upgrading but also for fighting!

By using the Radiant Blueprint to transform into the Light-Cast Giant, Su Yu finally unearthed this power from deep within his body, turning it into the endless radiance filling him!

"So that's it!"

"This power isn't just faith but includes gratitude, joy, hope, reverence..."

"These positive emotions constitute my current self; its essence is extremely powerful! It was always lurking deep within my body, unearthed by the Radiant Blueprint!"

After figuring all of this out, Su Yu felt exceedingly excited.

Because this power was not external but truly his own.

It was something he had amassed through his struggles! It belonged to him and could not be taken by anyone!

Using this power to defeat the "King" would not be considered borrowed power! It would surely complete the ritual!

With this understanding, the radiance emanating from Su Yu instantly glowed even brighter.

"Speaking of which, this power is indeed honest and open. In a world ravaged by evil gods, to have such a bright power is truly rare."

"Radiant Mecha, truly lives up to its name! It's just like the sun!"

"This power shall be called the Power of Sunshine!"

Chapter 676: The Transformation of the 【King】 , the Eternal Power of Pain!

Su Yu named the brilliance on his body, which was transformed from the power of faith and belief, as the Power of Sunshine.

After all, it was a power obtained from the Radiant Mecha blueprint.

And as Su Yu's understanding of the Power of Sunshine deepened, the radiance around him grew stronger and stronger.

Truly like a blazing sun descending upon the earth, ready to burn away all darkness completely!

"I remember there was a member in the Transcendent Union who was killed by a demon of revenge, and their profession was [Radiance Nun]."

"Back then, I was curious, does this world really have a true god with the attribute of light? Who is the deity served by this nun? Now it seems there might really be one!"

"In a sense, I am now!"

After realizing the essence of the Power of Sunshine, Su Yu had a thought.

That is to say, in this world, there might truly be a true god! Not like those brutal Evil Gods, but a real deity!

If not, then Su Yu could act as one for a while!

At this moment, the [King] was being burned by the light of the Power of Sunshine, and the power of darkness was being firmly suppressed, growing weaker, and any sign of a previous breakthrough had completely disappeared.

After realizing this fact, its heart was even more tormented.

But this pain, at this moment, seemed unable to increase its power, only making it endure psychological torment.

Realizing this fact, the pain of the [King] naturally intensified even more.

Finally, the radiance around Su Yu had pushed the darkness of the [King] into a small corner.

The Pain Demon God, which the [King] had transformed into, was as tall as Su Yu's Light-Cast Giant.

But now, it had shrunk several times, weakened beyond measure, completely unable to withstand Su Yu's attack.

Su Yu was exhilarated, and the radiance on his body amplified even further. He was about to press on and strike with full force to kill the [King].

At this moment, the [King], which was being firmly suppressed by Su Yu, suddenly underwent a change.

The dark mist writhing outside its body, under immense pressure, actually solidified into substance, no longer just an illusory energy.

This substance instantly formed the body of the [King].

A more than 200-meter tall black Giant God Soldier Mecha was fiercely condensed.

Originally, the [King]'s body was incomplete, only half a head remained, embedded with numerous wailing members of the Mechanical Race.

Previously, it had always fought using the dark mist that enveloped its exterior, while its actual body didn't engage, nor was it convenient to move.

But now, this dark mist had turned into substance, allowing the [King], which hadn't recovered for millennia, to restore its complete form!

"This is..."

Su Yu was taken aback upon witnessing this and did not immediately attack.

He stared at the new body of the [King], with a sense of realization: "The greater the pressure, the more intense the pain, this creature truly broke through under the pressure I imposed on it!"

"Although it didn't actually ascend to the Fifth Rank, it restored its missing body, which is quite troublesome..."

Su Yu realized that despite his fierce attack, he hadn't killed the [King], but rather unwittingly helped it break through its limitations and restore its body.

The power of pain from the [King] seemed to only break through under extreme despair and pressure.

The ferocious assault by Su Yu happened to meet the criteria, assisting the [King].

This creature was indeed resilient.

However, Su Yu noticed that although the [King] had restored its body and gained great benefits, something seemed off?

Su Yu did not rush to attack and decided to observe first.

While Su Yu was surprised, the [King] was delighted.

"I have recovered? I have recovered! Hahaha..."

The [King] looked at its complete body with an elated and maniacal laughter.

It didn't know what kind of grave injury it had suffered back in the day, but it had never recovered for millennia, which also hindered its ascendance.

Thus, it sought the power of the Radiant Mecha, attempting to seize this Fifth Rank Mecha to circumvent its injuries and indirectly ascend to the Fifth Rank.

But now, it had finally recovered! It restored its body without relying on the Radiant Mecha!

In the instant of recovery, it once again felt the signs of a breakthrough!

This naturally delighted it even more.

However...

"Why, I should be delighted, should be excited, but why am I still in such pain?"

Although the [King] laughed heartily, there wasn't a trace of joy on its face.

Theoretically, it should have been ecstatic.

It also thought it should be.

But at this moment, its heart was still filled with intense pain and despair.

It desperately tried to make itself happy but found it impossible. Instead, the pain in its heart became even more acute.

Its heart sank with joy, as if the delight and excitement just now were all illusions.

And Su Yu, at this moment, finally understood and burst into laughter: "Congratulations, your power of pain has finally broken through!"

"Now you are pain, and pain is you! This power has completely fused with you, never to be separated again!"

"From now on, you will never experience any happy, joyful emotions, no matter what surprises you encounter or benefits you receive; the only thing you will feel is endless pain!"

"Haha, since you cultivated the power of pain, if you don't feel pain yourself, what would be the point? You've finally done it right now!"

"I gave you a hand, shouldn't you thank me?"

Su Yu's words hit home, exposing the true situation of the [King].

Now, the [King] had completely fused with the power of pain.

It is pain, and pain is it.

So, even though its body had recovered and power had increased, it could no longer feel any happiness or excitement.

Chapter 677: The Transformed "King," The Eternal Power of Pain!_2

For a mechanical race with rich emotions, this is eternal torment.

Previously, the [King] said it would subject Su Yu to eternal torment, but instead, it was the one to first experience it.

So Su Yu laughed loudly without holding back.

After all, all of this was the [King]'s own doing.

It tormented its kin, oppressed humanity, and gained power through the suffering of these lives.

Now, making it taste its own medicine could be considered a form of retribution.

Though theoretically this was beneficial, a power increase, even with limitless prospects.

But from a psychological standpoint, this was eternal torture.

And upon hearing Su Yu's mocking laughter, the [King]'s body began to tremble.

It was deeply wounded by Su Yu's words, the inner pain magnifying tenfold, a hundredfold, nearly driving it to collapse.

Yet in its current state, already fused with the power of pain, it didn't even have the privilege of collapsing.

It could only remain conscious, enduring this everlasting pain.

Realizing this truth, it became even more despairing, even more pained.

And as its pain intensified, so did its power, continuously rising, doubling! Tripling!

Though it was already a fourth-order top, nearly touching the peak, it could still keep getting stronger!

Su Yu's laughter abruptly ceased, his expression turning grave.

Boom!

The next moment, the [King] could no longer endure the unending pain and suddenly erupted, charging at Su Yu.

An earth-shattering clash began once more!

However, this time, the situation was completely reversed!

It was the [King] pressing Su Yu down!

"Su Yu! It's all because of you! I will kill you! I will torture you with the power of hellish pain... ah..."

The [King] screamed madly while attacking fiercely.

It tried to vent its pain by attacking its great enemy, Su Yu.

But it seemed to have no effect, instead aggravating its own pain.

Relying on its own pain, the [King] kept getting stronger, seemingly without an end.

This kind of power was simply unbelievable, like the legendary perpetual motion machine, capable of infinite energy output without external input.

Su Yu's power of sunshine was accumulated bit by bit in the past.

The [King]'s power of pain, however, seemed to have no end.

Su Yu suddenly found it difficult to withstand, being beaten back step by step, as the power of sunshine inside him rapidly depleted.

If this continues, sooner or later Su Yu will be beaten to death by the [King]!

No! The [King] certainly won't let Su Yu die so easily.

It will use the power of pain to erode Su Yu, making Su Yu feel the same painful torment as it does!

Seeing the [King]'s miserable state, Su Yu certainly didn't want to become like it, although stronger, what meaning was there in such a life?

And at this time, with the [King]'s frantic attack, its now qualitatively changed power of pain spread out, beginning to invade Su Yu's body and spirit.

Su Yu began to feel the same pain as the [King], as the erosion took place, the pain continued to intensify.

The physical pain, Su Yu could still endure, but it wasn't just the physical pain, the strongest was on the spiritual level.

Living as long as he had, how could Su Yu not have pain in his heart? No regrets?

These painful memories were usually buried deep in memory, Su Yu wouldn't think of them when idle.

He wasn't a sentimental person, usually busy with many things, no time to think about those past events.

But now, the [King]'s strength forcibly dredged up Su Yu's nearly forgotten painful past, greatly enhancing them.

Even the slightest sadness and loneliness were amplified to the point of wanting to die.

As for the true feeling of despair, it was enhanced to its extreme.

"Haha, do you feel it? This is how I feel! Does it make you want to die?"

"Don't worry, you won't die! I won't let you die; who would keep me company if you died? Haha..."

The [King] laughed without any hint of amusement.

Deeply trapped in hell, unable to liberate, it wanted to drag its enemy with it to endure the suffering together.

It might be the only bit of pleasure it could feel, even if only brief, fleeting, but enough to make it chase madly.

It wasn't just Su Yu, the [King]'s power of pain was already pervading the entire manifestation space, invading every inch, pulling all life into the hell of suffering.

In the space of the Elder Council, those fusion people were also affected at this time.

Previously, after Su Yu moved these people to the Elder Council space, he used his authority to provide them with a virtual screen, allowing them to watch the battlefield live broadcast.

As combat personnel, they must grasp the battlefield situation at all times; Su Yu's arrangement was also normal.

So previously, these individuals were 'watching the live stream', being amazed by Su Yu's astonishing performance.

Such a terrifying kilometer-long mecha, a fifth-order creation, seemed to be mysteriously controlled by Su Yu, then vanished!

That formidable [King] was directly expelled from the mecha by Su Yu, only to curse angrily.

Latterly, Su Yu transformed into a light-cast giant through the Radiant Blueprint, clashing with the [King] turned dark demon god, dominating the battle and further astonishing them.

This reversal of the situation made those fusion people worried for Su Yu relax, each exclaiming in admiration:

"Mr. Su Yu is so strong; even the legendary Radiant Mecha was defeated by him... The mecha disappeared, should have been defeated, right?"

"Is this Mr. Su Yu's true form? Really..."

"What rank is Mr. Su Yu? Does he still need to undergo a ceremony to serve as a Giant God Soldier Mechanic?"

"Such a big shot's affairs, you ask me, who should I ask..."

These people were both shocked and delighted.

Though descendants of stationed mechanics, their inherited knowledge was incomplete, utterly clueless about the source of Su Yu's power.

They assumed the light-cast giant Su Yu transformed into was his true form, his hidden strength.

While everyone was engrossed in their discussions, the [King] broke through!

Then almost instantly, the [King]'s power of pain crossed many barriers, penetrating into this Elder Council space.

"Ah! What is this? So painful, so painful!..."

"I want to die..."

These fusion people immediately began to scream horribly.

Previously, they experienced hell's pain in the pain domains created by the mechanical race.

But compared to now, those pains were child's play.

Nearly instantly, these fusion people were on the verge of collapse.

Yet this qualitatively changed power of pain maintained their consciousness, preventing collapse, making life truly worse than death.

"Haha, those humans will soon become my pain puppets, part of my power!"

"Su Yu, don't worry! Once I deal with you, I'll traverse the globe, sending any life related to you into hell to keep you company!"

"Come, stop resisting, hell's pain is your eternal end!"

The [King] laughed wildly, though without a hint of joy, only a face full of pain.

Su Yu's face was also twisted in pain; at this moment, he had almost been dragged completely into hell by the [King]!

The light on his body was suppressed to a flicker, like a flame about to be extinguished at any moment.

Su Yu felt that the power of sunshine within him was nearly depleted.

Once completely exhausted, he would revert to third rank strength, at the mercy of the [King].

Then, he would surely face endless torment.

Such hellish pain, who knows if it would last thousands or tens of thousands of years! Perhaps longer! Unimaginably long!

The thought alone was enough to send shivers down one's spine.

Yet Su Yu felt no fear, instead pondering, "The [King]'s power of pain can undergo a qualitative change under immense pressure."

"What about my power of sunshine?"

"The power of sunshine seems to be the opposite attribute of the power of pain, possibly two sides of the same coin, like the power of loyalty and the power of betrayal."

"My current power of sunshine is just accumulation from before! I should be like the [King], able to spontaneously generate endless power of sunshine, which is the right path! Only then can I win!"

"Come! Give me more pain, let me see, what is the limit of this power of sunshine! See where my limit lies!"

Su Yu shouted in his heart, suddenly giving up resistance against the power of pain.

The next moment, Su Yu fell entirely into hell!

Chapter 678: Counterattack in Hell! The True Power of Sunshine Belongs to Su Yu!

At the moment Su Yu gave up resisting, he almost lost all perception of the outside world.

Endless pain drowned all his senses, thoughts, and rationality...

In his consciousness, there was only boundless pain.

This pain was extremely intense.

A thousand times, ten thousand times more severe than what the Fusion People endured!

After all, those Fusion People only bore a bit of the aftershock.

Su Yu was the true target of the King's attack, the enemy the King hated most!

Even if those Fusion People, with their senses combined across a hundred thousand individuals, endured pain overlapping onto each other, it still wasn't half the pain Su Yu bore at this moment.

In Su Yu's heart right now, aside from the intense pain, there was shock.

The Power of Pain unleashed by the King was simply overwhelming. Su Yu hadn't expected it to reach such a degree.

This pain exceeded the extremes of both physical and psychological limits; if not experienced personally, it was completely unimaginable!

Moreover, typical pain, at its peak, would lead to sluggishness and numbness of the mind, a loss of consciousness.

That is the biological instinct of self-preservation, to prevent the pain from being fatal.

But now, the pain Su Yu endured made him increasingly clear-headed the more intense it became.

So he could still think and be shocked.

And due to this clarity, the perception of pain became even sharper, more unbearable.

This pain could not kill a person; it was pure torture! Never-ending.

In nearly an instant, Su Yu regretted...

He regretted why he had to fight the King, why he had to voluntarily give up resistance, fall into this Hell, why he had to...

In one ten-thousandth of a second, Su Yu's mind was filled with intense feelings of regret.

No matter how firm his will was, under such extreme pain, he could not control his thoughts nor suppress this feeling of regret.

But the emotion of regret was of no use, unable to change Su Yu's current situation.

Its only function was to make Su Yu suffer more, the more he regretted, the more he suffered, the more he suffered, the more he regretted, reinforcing each other, constantly intensifying!

Su Yu felt, under this extreme pain, even time had stopped, even a second had no end.

It was no longer like days as years but seconds as millennia; not even a fraction of a second felt like ten lifetimes had passed.

Another fraction of a second passed, and Su Yu no longer regretted.

He just wanted to die quickly, to be relieved swiftly!

He wanted to gather strength and self-destruct, to grant himself a swift end.

But under the intense pain, he couldn't control himself, he couldn't even end it himself.

While the Power of Pain on the King could enhance the King's combat power, since this was a power cultivated by the King himself.

But on Su Yu, it made him numb and rigid all over, making it difficult to control his actions.

Upon realizing this fact, Su Yu naturally became even more miserable...

With every passing moment, new emotions surfaced within Su Yu.

Regret, resentment, anger, despair... Each emotion added to Su Yu's suffering.

This was true Hell!

The Power of Hell of the King was originally cultivated from the suffering of Mechanical Life.

But once the power reached its peak, it no longer mattered if it was mechanical or human, the effect on a flesh and blood life like Su Yu was one hundred percent!

While Su Yu was suffering pain in Hell, the King found this immensely delightful.

Because although Su Yu was being suppressed by the King before, he could actually hold out for a long time.

And although the Power of Pain of the King was infinite, the stronger the power, the more excruciating the King's own pain was.

Thus the King did not wish to continuously explode, simply unable to bear it.

But then Su Yu suddenly relinquished resistance, voluntarily entering Hell, and naturally, the King was overjoyed.

It no longer had to endure additional pain.

Of course, for it, the so-called delight actually contained no joy, just a reduction in its own suffering.

"Haha! Are you foolish, Su Yu? Voluntarily giving up resistance?"

"Come, enjoy the pain of Hell!"

The King laughed while hurling more Power of Hell at Su Yu.

Su Yu's body actually maintained the form of a Light-Cast Giant, with extremely strong defense.

The King's energy and kinetic attacks could not penetrate, could not kill Su Yu.

But Su Yu gave up resisting the Power of Hell, allowing this painful emotion to seep inside, assaulting Su Yu's spirit.

Thus, within a short time, the pain Su Yu endured increased tenfold! A hundredfold!

Normal energy attacks wish to increase tenfold or a hundredfold, that's exceedingly difficult.

But pain, being a subjective perception on a spiritual level.

Not to say tenfold, a hundredfold, but a thousandfold or billionfold were all possible.

In Hell, the pain never ends!

"..."

As the King exerted its power, once again increasing Su Yu's pain, an indistinct sound came from Su Yu's mouth.

Su Yu had been silently enduring the pain without making a sound, but now he seemed finally unable to bear it.

A strong impulse actually broke through the numbing effect of the Power of Pain, allowing him to make a sound.

And when Su Yu made a sound, he was not trying to scream in pain, but rather...

He wanted to beg for mercy!

That's right, the pain was so intense that Su Yu even had the thought of begging for mercy!

But Su Yu still, relying on a strong will, forcibly held back at the critical moment, only emitting a light groan.

How could he beg for mercy from the enemy?

Chapter 679: Counterattack in Hell! The True Power of Sunshine Belongs to Su Yu!_2

But this soft hum was still heard by the [King].

With the [King]'s wisdom, it immediately understood the meaning behind Su Yu's hum and burst into laughter again:

"Haha! Su Yu, are you trying to beg me for mercy?"

"Speak up, beg me for mercy, and I might consider letting you go! You don't believe it? Haha, I don't even believe it myself!"

"But even though I won't let you go, I might consider easing your pain a bit!"

"How about it? Beg for mercy, say something nice, make me happy, and I'll let you be free for a moment, how about a thousandth of a second..."

The [King] spoke tempting words to Su Yu.

This wasn't really a temptation at all, after all, the [King] itself mentioned it would never let Su Yu go.

At most, it could only slightly reduce Su Yu's pain, and only for a thousandth of a second.

What kind of benefit is this?

But after hearing it, Su Yu was immediately tempted.

Just by begging for mercy, I could be free for a thousandth of a second?

Not to mention a thousandth of a second, even a ten-thousandth, or a hundred-thousandth of a second, as long as he could have a moment of relief, to Su Yu at that moment, it was supreme happiness.

So his lips moved, as if he was about to speak, to beg the [King] for mercy.

However, Su Yu still made no sound.

At the critical moment, Su Yu's strong willpower told him not to bow down! Don't beg for mercy! Not even in death!

Su Yu's heart was engaged in a fierce struggle.

And this struggle intensified Su Yu's pain, making him have more impulses to beg for mercy.

Yet Su Yu used his strong will to suppress these impulses.

In a short time, he suppressed countless times, and the pain only increased more and more.

The [King] naturally saw Su Yu's struggle and pain and laughed even more happily.

At this moment, its smile genuinely showed some signs of joy, unlike before, where the laughter seemed more like crying.

The more pain Su Yu was in, the less the [King] seemed to suffer, as if Su Yu was sharing the burden.

"So that's it! By dragging more lives into hell, sharing the pain, I will become more and more relaxed!"

"Eventually, I might truly be free! And at the same time, my power will increase endlessly! Your suffering is my strength!"

At this point, the [King] had a new insight into the Power of Pain.

This is how to cultivate this power!

"Haha! Su Yu, just wait, I will drag all the lives on the entire planet into hell! I won't let you die, I will let you watch your family and friends fall into hell and keep you company!"

"Then, I might truly advance to the Fifth Rank! Then I can depart for the Galaxy!"

"Drag the entire starry Universe into hell!"

"Hahahahaha..."

The former [King], after fully merging with the Power of Pain, was utterly in despair, thinking it could never escape the suffering of hell.

But now, it finally saw hope.

As long as it dragged more life into hell, it could find relief and even become stronger from it!

So at this moment, its laughter was genuinely joyful, even the pain in its body was suppressed for a short time.

Although it was only suppressed for a moment, in the next moment, the endless hellish torment surged again, more intense than before.

The [King]'s smile suddenly froze, showing a twisted expression.

Its expression turned fierce, and it launched more Power of Pain at Su Yu, sharing its pain.

And the pain Su Yu suffered suddenly increased manyfold!

At this moment, Su Yu seemed to have been completely crushed by the pain.

Under the [King]'s barrage of the Power of Pain, Su Yu's body just twitched a few times, without making any other moves, nor did he try to beg for mercy as before.

It seemed that at this moment Su Yu had even lost the ability to beg for mercy.

"What is going on?"

The [King] felt its own pain lighten considerably after bombarding Su Yu with the Power of Pain.

It looked at Su Yu, who showed no reaction, feeling a bit puzzled.

To endure such pain, even it can barely stand it; why was Su Yu's response so calm? Not even a sign of begging for mercy?

"Is it so painful that he completely lost the ability to act?"

The [King] guessed that its Power of Pain was so fierce that it stunned Su Yu.

In fact, at that moment, Su Yu still had a strong urge to beg, and he still retained a bit of self-control, capable of begging for mercy.

But this urge had been entirely suppressed by Su Yu, unable to influence his body at all.

Moreover, as Su Yu suppressed the urge to beg, the Power of Sunshine within him was actually slowly increasing!

Though it was only a trace and invisible from the outside, the [King] hadn't noticed.

But Su Yu was well aware that his Power of Sunshine had indeed increased!

He was suddenly overjoyed!

"I see now!"

"This Power of Sunshine is a force transformed from faith and willpower!"

"The Power of Sunshine I previously used came from others! But now, under this ultimate pain, by suppressing my own pain and weakness with will and faith, I finally produced my own Power of Sunshine!"

Su Yu understood.

As Su Yu previously thought, the Power of Sunshine and the Power of Pain seemed to be two sides of the same coin, both at a spiritual level.

So earlier, when Su Yu found himself at a disadvantage, he took the initiative to stop resisting the pain, voluntarily falling into hell, trying to find his own Power of Sunshine in hell, hoping this force would also undergo a qualitative change!

Now, under extreme pain, Su Yu refused to give in and relied on strong willpower and faith to finally produce his own Power of Sunshine!

Once he realized this, Su Yu's spirit was invigorated, and he swept away the regrets, annoyances, and other emotions caused by pain.

He fully mobilized his faith to enhance that trace of Power of Sunshine.

This newly born Power of Sunshine was entirely different from the power Su Yu had used before.

That previous power, Su Yu could use only, but wasn't deeply connected to it.

But now, this newly born Power of Sunshine was self-generated, and it was one with him.

This newly born Power of Sunshine, although just a little, brought Su Yu endless courage, faith, hope, brightness...

All kinds of wonderful emotions came into being, and not even the hellish pain could overpower them!

In fact, Su Yu was still enduring the hellish pain, and it was increasing all the time.

But the positive emotions brought by the Power of Sunshine could suppress and ignore some of this pain.

For a strong-willed person, it's not about being unaware of the pain but about not being afraid!

Pain, for Su Yu, was no longer an obstacle, but even a tool to hone his will.

It made his Power of Sunshine grow faster and purer!

At this moment, Su Yu was just like the [King]!

The [King] had merged with the Power of Pain, and the pain was it, it was the pain.

And now Su Yu also merged with the Power of Sunshine, the Power of Sunshine was him, and he was the Power of Sunshine!

This process of fusion was happening rapidly!

Meanwhile, intense changes were occurring within his body.

The Light-Cast Giant that Su Yu transformed into was originally specifically designed to accommodate and use the Power of Sunshine.

Previously, Su Yu didn't know how to use it, but now that he merged with the Power of Sunshine, he truly mastered this body!

At this moment, Su Yu was no longer merely generating the Power of Sunshine through willpower. He was devouring the Power of Sunshine from others in his body, continuously strengthening himself.

Moreover, this devouring process was imbalanced; by consuming one portion of energy, Su Yu could enhance by two portions.

Like eating a pound of food and gaining two pounds of weight.

It completely defied the conservation of energy.

Su Yu utilized his will to "process" and "purify" these external sources of the Power of Sunshine, making them stronger! Even continually self-replicating!

"Haha! [King]! You can use the Power of Pain to become a Perpetual Motion Machine, and now I can too!"

Su Yu suddenly laughed heartily, his entire body bursting with powerful energy, shining brilliantly!

It's time to fight back!

Chapter 680: The Peculiar Power of Sunshine, Die Smiling or Live in Agony?

At this moment, Su Yu was filled with belief, courage, radiance, and other positive emotions and will.

These wills continuously transformed into Su Yu's Power of Sunshine, making his strength endlessly stronger, seemingly never weakening.

The light emanating from him was like a blazing sun, instantly dispelling the Power of Pain surrounding him, even blasting the King away.

"How is this possible!"

The blasted King wasn't injured, after all, this was merely an explosive energy from Su Yu, not a targeted attack.

But indeed, it was deeply hurt.

The King looked at the radiant light on Su Yu's body with disbelief.

It couldn't understand; moments ago, Su Yu was clearly trapped in hell, unable to extricate himself.

Why did he suddenly break free and even unleash such power?

Yet, the King realized the truth in an instant: "You actually understood the true power of the Radiant Mecha!"

"Damn it, why! How! I have researched for thousands of years and haven't mastered it, why can you!"

The King shouted unwillingly, its consciousness filled with unwillingness and resentment.

Since the war with Su Yu began, it couldn't count the number of times it had broken down defensively.

It had been researching the Radiant Mecha for millennia but had never mastered its core power.

That's why it devised another way, using the Power of Hellish Suffering to drive and control this Mecha.

However, to drive the Radiant Mecha, using the Mecha's original power is naturally the most suitable.

As for the Power of Hellish Suffering, the stronger it is, the more intense the suffering one endures.

If given a choice, the King wouldn't want to use such a self-tormenting power.

Now, seeing that the Radiant Mecha's power it had sought for millennia was truly mastered by Su Yu in such a short time, it was naturally unacceptable and very angry.

"What is impossible?"

"With your temperament, this Power of Sunshine was never yours to wield, yet this Power of Hellish Suffering suits you perfectly!"

Su Yu didn't rush to attack but instead smiled.

"..."

The King, upon hearing this, immediately fell silent, with a twisted expression on its face once again.

Having researched the Power of Sunshine for thousands of years, it naturally understood that this power required not only relevant technologies and the Radiant Blueprint but also belief, light, courage... and other positive emotions and forces to generate.

And since the day it was released from restraint, its heart had been full of darkness, making it unlikely to generate the Power of Sunshine.

The Power of Hellish Suffering was indeed very suitable for it.

But this meant it was destined to fall into hell, to fuse with hell, to endure endless suffering, which it couldn't accept.

"No! The Power of Sunshine is essentially just a form of energy; as long as there are detailed technologies and data, I can certainly find a way to master it!"

"As long as I defeat you, use the torture of hell to extract the secrets of the Radiant Blueprint, I will certainly be able to master the Power of Sunshine! By then, with both hell and sunshine in my grasp, I will surely advance further!"

The King shouted.

It refused to admit it was destined to fail and doomed to endure the pain of hell.

Hearing it speak, Su Yu did not refute but nodded: "Indeed, the Power of Sunshine is basically a type of energy, just the way it is generated is somewhat special and requires a special mental state."

"If there are related technologies, it is indeed possible to devise an alternative production method; you have reminded me."

Su Yu also thought that the limits of the Power of Sunshine were somewhat significant.

He had just emerged from Hell's Pain, continuously suppressing his negative emotions and erupting with immense courage and belief in his heart, which allowed the Power of Sunshine to be generated, continuously and endlessly.

If his courage and belief weakened, this Power of Sunshine would naturally also weaken.

Su Yu considered himself a normal person, subject to fluctuations in his mental state, unable to maintain peak condition eternally.

After all, he's not a machine, and even machines, once endowed with intelligence and emotions, experience fluctuations in mental state.

This realization highlighted that the Power of Sunshine was somewhat unstable.

After the battle, Su Yu would certainly research the related technologies to fully understand the details of this technology.

Allowing himself to produce powerful Power of Sunshine without needing to constantly maintain peak willpower.

That would mean truly mastering this power.

Su Yu is essentially a proponent of technological fundamentalism, believing that any power can be mastered through technological research and advancement.

This Power of Sunshine, dependent on a mental state for sustenance, was somewhat idealistic and didn't fit his preferences.

So, Su Yu agreed with what the King had said.

This agreement caught the King off guard, leaving it speechless.

At the same time, a chill rose in the King's heart.

It realized that Su Yu was a truly fearsome enemy.

Not because of the terrifying strength, but because of the formidable psyche.

Even at this moment, even after enduring the torture of hell, and then immediately breaking through to master the powerful Power of Sunshine.

Amidst such drastic changes between heaven and hell, Su Yu maintained the rationality of a researcher, without becoming arrogant.

He could even heed and agree with the words of the formidable enemy, the King.

Such an enemy was truly terrifying.

In comparison, the King, always caught in pain and anger, constantly breaking down and roaring, was vastly outclassed.

"Calm! Calm!"

The King hurriedly admonished itself, unable to lose control over its emotions anymore; continuing like this, it truly feared being defeated by Su Yu, leading to eternal damnation.
