

Infinite 721

Chapter 721: The New Giant God Soldier Mecha!

"Those ten powerful beings were actually fused from these first and second-order Transcendents?"

Tie Long finally understood why this group of guys was so peculiar.

It turned out they were all formed by the fusion of a hundred thousand people through some kind of technology or capability.

"Where did Mr. Su Yu find these bizarre people, and how does he have such technology? First and second-order Transcendents, able to fuse into such terrifyingly powerful beings?"

"So does that mean we can do it too...?"

Tie Long, Xie Yitian, Yang Lie, and the others exchanged glances, all filled with excitement.

This trip by Mr. Su Yu really brought back too many surprises!

This kind of technology that enhances strength through fusion, they had never heard of before.

A bunch of Transcendents at most six-star level, actually able to fuse into Fourth Rank combat power?

It's simply unbelievable!

And they also noticed that the battle armor worn by these Fusion People had separated and was actually fused too!

"Besides humans, even battle armors can be fused?"

Tie Long and the others were even more thrilled.

For them, trying to elevate their power rank was incredibly difficult.

This fusion technology showed them a new path, how could they not be excited?

They cautiously stepped forward, trying to strike up a conversation with those descendants of Mechanics, attempting to find out what this fusion technology was all about.

However, those descendants of Mechanics were in high spirits eating, not in the mood to respond to them.

So the response Tie Long and the others got was basically: "This fusion... truly delicious!"

"Fusion ah... delicious, delicious..."

"Mm... water, water!"

After asking around, Tie Long and the others didn't get any useful information.

They weren't disappointed though, knowing that such a miraculous technology couldn't be casually revealed.

But so many people not letting slip any information, the people Mr. Su Yu brought back sure had tight lips!

Then they watched these people eat while pondering internally, could the downside of this fusion technology be that it easily leads to hunger?

Another half day passed, these guys finally finished eating and drinking, then one by one fell asleep, they were too exhausted.

Tie Long and the others, seeing this, could only helplessly call others to move these people to the residential area arranged by Xiao Shengyin.

After some busy work, they finally settled all these descendants of Mechanics properly.

Finally, Tie Long, Xie Yitian, Xiao Shengyin, Yang Lie, Tie Xin, and the others went together to report to Su Yu.

Besides reporting, they had other intentions, which was to ask Mr. Su Yu to help them enhance their strength.

There was no other way, this time the enemy faced by Mechanical City had raised its combat power again, with the emergence of Fourth Rank Ghost Imperial City.

And Su Yu himself also advanced to Fourth Rank, and even brought back ten Fusion People of Fourth Rank combat power.

Tie Long and the others were originally the strongest in Mechanical City aside from Su Yu.

But now it seems they've been left behind by those Fusion People, unable to keep up with the situation's development.

If this continues, they're afraid they'll have to sit with the ordinary residents.

How could they accept that? So they all wanted to seek a solution from Su Yu.

These days, they also collected a lot of resources, just right to bring them over, hoping to see if Su Yu found them adequate for crafting battle armor, and besides battle armor, perhaps the fusion technology could also be taught to them...

Soon, the group arrived beneath Su Yu, looking up at Su Yu who was as majestic as a mountain, all hesitant to speak.

At this moment, Su Yu was too awe-inspiring and holy, they dared not disturb him lightly.

However, before they could speak, Su Yu directly opened his eyes.

His eyes, like the sun and the moon, shone with magnificent light.

Seeing Tie Long and the others' hopeful eyes and the various materials they brought, Su Yu smiled slightly, immediately understanding their intention.

It seemed they were all anxious, eager to enhance their strength.

Su Yu didn't say much, with a thought, the resources and materials they brought flew up out of thin air, refining in the air, slowly forming into a humanoid shape.

"Thank you, Mr. Su Yu!"

Tie Long and the others were immediately excited upon seeing this, understanding that Su Yu was crafting battle armor for them!

They dared not make a sound, afraid of disturbing Su Yu.

Tie Long felt a bit strange, thinking: "As a Half-Mechanical, wearing battle armor, isn't that a bit odd?"

Tie Long originally planned for Su Yu to help him remold his body, but since Su Yu was only just starting to craft battle armor, he said nothing more.

Yang Lie and the others felt a bit guilty, knowing the materials they brought were actually far less precious and fewer in quantity than those of Tie Long and other seven-star strong individuals.

They originally just wanted to join in for fun, maybe manage to get a set of Six-star Top Level battle armor.

But now, seeing Su Yu's action of refining all the materials together, was this going to be a unified distribution? If so, they were in for a huge gain.

As Su Yu's refining continued, a Mecha began to take shape in the air...

"Wait, a Mecha? Not battle armor but a giant Mecha?"

Everyone looked at each other, unsure of what Su Yu was doing.

With so many materials brought by so many people, Su Yu only crafted one Mecha? How were they supposed to divide it?

Two days later, finally, that Mecha was completely formed.

It was a Giant God Soldier Mecha over two hundred meters tall, entirely silver-gray, faintly exuding white light, appearing somewhat dazzling.

Once the Mecha formed, a powerful aura shot skyward.

Tie Long and the others immediately showed surprised expressions, instantly confirming that the Mecha's combat power was at least Nine-star Top Level!

Chapter 722: New Giant God Soldier Mecha!_2

This mecha has already used up all the materials brought by Tie Long and the others, and Su Yu also put in some of his own.

[Naming Completed]

[Giant God Soldier Mecha·Radiance]

[Creator: Su Yu]

[Grade: Legendary]

[Trait 1: Giant God (As a Giant God Soldier Mecha, it possesses the general performance of a Giant God Soldier Mecha, with extremely strong defense and attack capabilities. Moreover, due to the use of the Radiant Mecha's blueprint technology, its performance exceeds that of a typical Giant God Soldier Mecha, allowing it to exert far superior defense and power beyond a third-order top level!)]

[Trait 2: Radiance (Due to the adoption of part of the Radiant Mecha's blueprint technology, it possesses some abilities of the Radiant Mecha, able to gain the Power of Sunshine from the will of other life forms! It can thus amplify its strength, and has a significantly strong additional lethal impact on any dark and twisted enemies.)]

[Trait 3: Repair (This mecha uses semi-mechanical semi-biological technology, composed entirely of Radiant Cells. If it gets damaged, it will use the Power of Sunshine for self-repair.)]

[Trait 4: Fusion Transformation (The greatest utility of this mecha is not fighting, but transforming the user, filled with the Radiant Blueprint technology, into a Radiant physique, rapidly enhancing strength!)]

[Trait 5: Divine Descent (This mecha is imbued with the Mechanical Descent ability of the Giant God Soldier Mechanic! It can descend out of thin air, attaching itself to the pilot at a thought.)]

[Equipments:]

[Melee Weapons: None]

[Ranged Weapons: None]

[Skills: None]

[Overall Offensive Power Assessment: Nine-star Top Level!]

[Overall Defense Power Assessment: Nine-star Top Level!]

This describes the attributes of this mecha on Su Yu's Profession Panel.

Su Yu utilized his Giant God Soldier Mechanic abilities along with the newly researched Radiant Blueprint technology to create this mecha.

Given his current capability, creating a third-order mecha is incredibly easy; with materials available, he could craft one within at most ten hours!

The reason it still took him two days was that he applied the newly researched Radiant Blueprint technology!

Su Yu modeled the structure using Radiant Cells in crafting this mecha.

Its structure is not made of traditional mechanical parts, but composed of countless mechanical cells.

There are even various mechanical organs inside that correspond to human organs one by one.

The greatest purpose of this structure is not for battle, but to resonate and fuse with the human body, to transform the human body!

Indeed, this mecha is actually a human transformation device, capable of transforming humans who enter into a "Radiant Physique".

The so-called Radiant Physique is just like the Light-Cast Giant that Su Yu transforms into.

Of course, it cannot be as massive and powerful as Su Yu's transformation but can greatly enhance strength.

Additionally, having crafted another Giant God Soldier Mecha, Su Yu received feedback that slightly boosted his power, and the Giant God Soldier Mechanic's level went up.

"Not bad, not bad..."

Su Yu looked at the completed Giant God Soldier Mecha, feeling very satisfied in his heart.

While he was satisfied, Tie Long and the others were a bit anxious, with so many of them and just one mecha, what is this supposed to mean? Are they supposed to take turns piloting this one? How would that work?

"Mr. Su Yu, this is..."

Despite their anxiety, they dared not rush, only cautiously asking.

"Inside this mecha, I've applied a technology called the Radiant Blueprint..."

Su Yu slowly began to explain some of the principles to them.

"Mr. Su Yu, are you saying, this mecha can transform us into how you currently look?"

Upon hearing this, everyone was astonished.

Su Yu's Light-Cast Giant form was overwhelmingly powerful; they could hardly look directly at it, only guessing it to be Mr. Su Yu's ancient divine body.

They had never imagined this was some miraculous biological transformation technology! Moreover, that Mr. Su Yu was willing to let them try it!

"Indeed, though it won't make you as strong as me, it will significantly enhance your abilities."

"What, you don't want to? Admittedly, transforming oneself might cause a bit of psychological hurdle. If you're not willing, then I'll forge new armor for you..."

Su Yu observed their reaction and chuckled lightly.

"We are willing! We are!"

Upon hearing this, none dared hesitate, nodding quickly, fearing Su Yu might change his mind.

To have a divine body like Mr. Su Yu's, only a fool would refuse!

"Then go in and give it a try, everyone can enter; the pilot cabin is very spacious."

Su Yu addressed them.

Then, the Giant God Soldier Mecha's pilot cabin opened.

Upon hearing this, they quickly thanked Su Yu before rushing toward the cabin.

They were running because the mecha was so tall; Tie Long was fine, as he could fly, but the others couldn't, so they had to run.

For them, running up walls was no difficulty. The Giant God Soldier Mecha was so towering that its surface was just like a wall, sturdy enough for them to climb on.

Soon, they all entered the pilot cabin, then the door slammed shut, and there was no more movement.

Su Yu quietly sensed the state inside the pilot cabin, nodding slightly.

Those individuals had already detected with the mechanical cells of this mecha, starting the fusion and transformation!

This transformation process is very safe; after all, Su Yu had tested it himself and was still maintaining the transformation.

The Mechanical God also used its power to observe fate, verifying the safety of this technology.

Otherwise, Su Yu wouldn't casually conduct human experiments.

Besides, even if something went wrong, Su Yu was right there, ready to provide assistance.

However, the Mechanical God's power had diminished, its observation of fate not as clear as before. It could only confirm safety but couldn't see the post-transformation strength changes in these individuals.

Su Yu was looking forward to the surprise that these people's transformations might bring.

The transformation required some time, so Su Yu waited silently.

However, before the transformation was completed, the residents of the Mechanical City, who had gone out mining, had already returned.

Although they were scattered worldwide, they returned simultaneously on pieces of the Mechanical City.

Along with them were millions of captured people!

"Finally returned?"

Su Yu looked at the approaching fragments of the Mechanical City, nodding slightly.

Soon, those fragments connected back with the main body of the Mechanical City, merging back into one.

In these days, those fragments had "grown" significantly, apparently having "eaten" quite a bit globally.

Connecting with these fragments instantly doubled the size of the Mechanical City!

Therefore, even with millions of new residents, there was no concern for lack of space.

At this moment, those on the returning fragments, upon seeing this Sky City, were all dumbfounded.

Initially, they thought these gray fragments were merely bragging by the residents of the Mechanical City, speaking of Sky City, Miracle City, fearing it was merely a big stone flying in the sky.

While a flying boulder indeed represents a marvel, it's not a place to live.

Some even had rich imaginations, picturing the Mechanical City as the lair of an Evil God, a flesh-and-blood nest flying in the sky, constructed from human skeletons, and they being caught to become "building materials".

In short, along the way, these people let their imaginations run wild, envisioning all sorts of scenarios.

They never foresaw this.

All they saw was a beautiful modern city, quietly floating in the sky, with skyscrapers, bustling traffic, neon lights flickering, and all sorts of advanced mechanical facilities that operated independently, maintaining the city's functionality.

Each resident used these advanced, convenient mechanical devices freely, coming and going with happiness and freedom reflected on their faces.

"Is this the lair of an Evil God? This doesn't seem right?"

They couldn't help but murmur, as it differed from what they'd imagined.

Faced with their astonishment, the residents of the Mechanical City had knowing smiles but remained silent.

Caught off guard, huh? Today, we'll open your eyes...

They had been verbally battered by these folks all the way, and finally could stage a comeback.

"Wait, what is that? Is that... Mr. Su Yu?"

While those residents of the Mechanical City were feeling elated, their eyes suddenly fixed straight ahead.

Because they had spotted, at the end of their sight, the massive figure sitting cross-legged!

Chapter 723: Su Yu's Gift! Unprecedented New Ability!

"What are they looking at?"

The captured village residents, seeing these Mechanical City folks suddenly standing still, were full of curiosity and followed the gaze of the people from the Mechanical City.

In the distance, at the edge of the city, sat a gigantic figure hundreds of meters tall.

The figure wore a silver and black interwoven Mechanical Battle Armor, with bright white light shining through the seams of the armor, as if it were cast from light.

A pair of eyes, like the sun and moon, gazed at them from afar.

Seeing this figure, the village residents were also taken aback, and a thought instinctively came to mind:

"The Mechanical City really has too much free time to have the energy to build such a huge statue."

"However, being able to raise such a large city into the sky is already an incredible engineering miracle, so having the leisure to create a big statue seems normal..."

"Previously, I always thought this city, though grand and advanced, was missing something. Now I understand, it was missing such a statue..."

These village residents instinctively thought that the giant figure was a statue of a deity.

To these village residents, who struggled to survive, spending a lot of manpower and resources to build something that couldn't be eaten or drunk, creating so-called 'wonders,' was purely a senseless act.

It was a meaningless endeavor.

However, considering the sights in the Mechanical City, these village residents also felt that such an advanced Sky City, Miracle City, having such a statue was very reasonable.

Such a miraculous city in the sky should indeed have such a statue; this statue bestowed a magnificent divinity upon the Miracle City, truly like a Divine Kingdom in the sky...

"Could this statue be the god they worship? It looks grand and open, not like some Evil God Demon. Could it be that what they said before was true?"

The previously skeptical crowd, on seeing the statue, had ninety-nine percent believed.

Because after seeing the light-forged statue, a sense of courage, light, warmth... and other positive emotions involuntarily surged in their hearts, not sure if it was an illusion.

This feeling instinctively gave them a good impression of the Mechanical City.

Originally, these village residents did not believe in any gods. They survived purely through their own hard work and battles, fighting Radiation Beasts every day.

As for gods, they only existed in stories told to children; any adult with a brain wouldn't believe in them.

And it's said that gods are not anything good, all are like Evil God Demons, and being targeted by them would result in unspeakable tragedy.

But now, after seeing the statue, a new thought emerged in everyone's mind: could it be that they really hit the jackpot and were brought into the realm of a True God?

Even the two Seven Star City Lords of Rock Cave City and Sky Sea City looked at the 'statue' with bewilderment.

They seemed to have discovered something, but were afraid to confirm it.

Should just be a statue, right? Otherwise, it would be too terrifying...

Just as the people were admiring the 'statue,' suddenly, the 'statue' stood up...

Stood up?

The village residents were pondering how the statue was built, when Su Yu suddenly stood up and, in one step, instantly walked from a distance to stand before them.

The crowd felt as if the statue from afar suddenly appeared right in front of them.

They dumbly looked up at that majestic figure, feeling dizzy and lightheaded.

"It's not a statue, but real?"

"Is this the god they worship? It actually descended to the world, just sitting in the city?"

The minds of these village residents were in chaos.

They had initially thought that the residents of the Mechanical City worshipped some god, creating a statue, and were impressed by how well the statue was made.

But it turned out to be real?

Legends say that gods are aloof and seldom appear...

At this moment, the two City Lords of Rock Cave City and Sky Sea City finally confirmed: that earlier feeling wasn't an illusion, it was real!

That was no statue but a powerful Transcendent beyond imagination!

On this planet, could there really be such a powerful being?

While these people were in mental chaos, Su Yu's commanding voice came from the sky: "Do not be afraid, it is I, Su Yu."

This was directed to the residents of the Mechanical City.

Hearing this, the residents of the Mechanical City snapped out of their previous daze and exclaimed in shock, "It really is Mr. Su Yu!"

The reason they were so shocked earlier was that they discovered the distant giant seemed very much like Mr. Su Yu, but they dared not confirm it.

Mr. Su Yu had just left the city; how did he become so gigantic?

But now, with Mr. Su Yu personally before them, speaking, and feeling that powerful yet familiar aura, they finally confirmed, this was indeed Mr. Su Yu!

"This aura is entirely different from the Seven Star and Eight Star experts felt before. Could this be..."

The crowd also noticed that Su Yu's aura was completely different from before, not in the same rank as Tie Long and the other Third Rank Transcendents.

These residents of the Mechanical City had never experienced the aura of a Fourth Rank powerhouse, and with Su Yu being somewhat restrained, they dared not confirm it.

But there was already suspicion in their hearts.

After all, the change in this aura was too drastic.

Could it really be that Mr. Su Yu has broken through to the legendary Fourth Rank? Surpassing Nine Stars?

On the Ruins Star, the highest rank for Transcendents is Nine Stars; beyond Nine Stars, no one has ever heard of it.

Chapter 724: Su Yu's Gift! Unprecedented New Ability!_2

However, these people had been in the Mechanical City for so long that they had experienced considerable growth and knew that above the Nine Stars, there were even stronger realms.

So, after discovering Su Yu's breath had changed dramatically, they all suspected that Su Yu had broken through to the legendary Fourth Rank.

But upon achieving the Fourth Rank, how could he change so much?

Rumor had it that Mr. Su Yu was the resurrection of an ancient power. Could this be Mr. Su Yu's true form?

Although they had many doubts in their hearts, no one dared to speak up and ask, as it was, after all, Mr. Su Yu's secret.

"This mission was completed very well. You've worked hard. Leave these people to me to handle. If you're tired, you may go back and rest. The mission rewards will be distributed soon."

Su Yu spoke again.

Hearing this, everyone in the Mechanical City was instantly fired up. Mr. Su Yu is so considerate; upon returning, he said nothing but first mentioned the rewards.

Thinking about bringing back so many people and resources, and how much energy currency could be exchanged, they were overjoyed.

Immediately, everyone knelt down in unison: "Thank you, Mr. Su Yu!"

However, they did not listen to Su Yu and go back to rest. They were too excited to rest now.

They all gathered behind Su Yu's gigantic figure, wanting to see how Mr. Su Yu would "deal" with the captured settlement residents.

This bunch of people from the settlements had cursed them nicely along the way.

Now with Mr. Su Yu backing them, it was time to raise their heads and cheer.

Seeing this, the settlement residents became instantly nervous, most of them too scared to breathe.

Earlier, they thought Su Yu was a statue, admired only from afar, just marveling at its craftsmanship, grandeur, and magnificence.

But now, they realized that the so-called statue was actually alive and had come before them to "deal" with them.

The psychological pressure was entirely different now.

Deal with them? How would he deal with them?

Would this "Mr. Su Yu" want to devour them?

Though this so-called "Mr. Su Yu" appeared above-board, who could say for sure?

If it weren't for the Power of Sunshine emanating from Su Yu, continually instilling courage in their hearts, some timid ones might have already been frightened out of their wits.

"You... you brought us here, what do you want?"

The two seven-star powerhouses from Rock Cave City and Sky Sea City stepped forward to ask.

They were both seven-star powerhouses, knowledgeable and wise, and had already confirmed that Su Yu was a legendary Fourth Rank powerhouse.

Facing such an incredible powerhouse, despite the fear and despair in their hearts, they still mustered the courage to question him.

Su Yu looked down at them; millions of people were at his feet, like ants, densely packed.

Most of these people would become his city residents and warriors in the future.

Therefore, it was necessary to handle this well.

After all, he wasn't like the Ghost Emperor, doing brainwashing and oppressive rule.

Su Yu pondered and slowly spoke: "I have a gift to give to you all..."

After he finished speaking, Su Yu's entire body suddenly emitted an infinite white light.

This white light was extremely strong, yet not blinding, like a white mist, enveloping everyone.

It enveloped not only these settlement residents but also the residents of the Mechanical City behind him.

Then almost everyone felt a warm, itchy sensation all over.

The settlement residents were taken aback, thinking it was some malicious method of Su Yu's, intending to use this light to burn them to death.

However, they quickly discovered that the warmth and itchiness were not due to harm, but because their wounds were healing, healing!

These settlement folks, living in the harsh environment of the wastelands, regardless of gender or age, all had some injuries or illnesses.

But now, under Su Yu's white light, everyone was healing; in no time, everyone seemed ten years younger.

It was the changes brought about by the recovery of injuries and illnesses that had plagued them for many years.

The earlier warmth and itch had turned into comfort.

They were enjoying it so much that some nearly moaned with pleasure.

Not only the settlement residents but also the people of the Mechanical City enjoyed the benefits.

However, the Mechanical City residents generally lived better lives and so didn't have many injuries or illnesses; under this white light, they merely recovered from some fatigue.

The light quickly dissipated.

Everyone incredulously moved their hands and feet, discovering that the sensation just now was not an illusion; their bodies had genuinely recovered!

Some with severed limbs started growing new flesh at the stumps, and some with terminal illnesses felt completely at ease as if the tumors in their bodies had vanished completely!

Seeing the joyous faces of the people, Su Yu imperceptibly heaved a sigh.

"Such large-scale restoration is really tiring..."

Su Yu thought to himself.

With his power, killing these millions would merely be a thought.

But helping them recover from injuries and illnesses, although it only took a moment, made Su Yu feel more exhausted than the previous fierce battle with the [King].

Building often proves much harder than destroying.

Though tired, with Su Yu's current power, a slight breath was enough for him to recover.

Of course, his "breathing" was naturally not the same as a normal person's but involved an energy exchange with the semi-closed Subspace Domain to restore his state.

"Recovery abilities are quite troublesome, requiring Spiritual Energy to penetrate into other people's cells for precise control, stimulating vitality..."

Su Yu summarized his experiences in his heart.

He had just used recovery powers for the first time.

Actually, earlier, when those ten Fusion People were injured, Su Yu used Spiritual Energy to heal them.

But that was just the inherent healing effect of Su Yu's Fourth-Rank Spiritual Energy after his ascension.

Essentially, it was supplementing those Fusion People with energy, akin to feeding the injured a hearty meal, allowing them to recover on their own.

Moreover, it only worked on strong individuals like Fusion People; ordinary people couldn't possibly absorb Su Yu's high-level Spiritual Energy and would instead be shattered.

But just now, Su Yu truly employed a recovery ability to simultaneously restore the injuries of millions.

This was also a result of Su Yu's prior research on the transformation of the Radiant Blueprint.

This transformation can modify every cell and gene of the human body, turning Su Yu, a normal human, into a Radiant Giant, and then back to a normal human afterward, exploring the wonders of the human body's mysteries.

In recent days, through studying this transformation principle, Su Yu gained deep insights into the microscopic structure of the human body, cellular composition, and reactions of biological molecules.

With this research, Su Yu not only developed the Giant God Soldier Mecha capable of altering the human body but also uncovered unprecedented active healing abilities!

This healing ability wasn't as simple as a light shining to make all ailments disappear; it was much more complex.

The principle involved Su Yu, through incredibly powerful computational and control capabilities, channeling his Spiritual Energy deep into other people's cells, and repairing them at the cellular level.

This repair, in fact, consumed little energy.

But it required an astronomical amount of computational power.

Each person has tens of trillions of cells, not to mention countless proteins, bio-molecules, and genetic information within each cell...

Su Yu needed tremendous computational power to influence and manipulate so many cells and bio-molecules at the cellular level for treatment.

Not to mention, dealing with millions of people exponentially increased operational difficulty.

Even the complexities here were nearly overwhelming for Su Yu, even though he was already at Fourth Rank, with his Spirit penetrating the microscopic realm.

He even sought help from the Mechanical God to share the computational load, achieving this feat.

And he still used the relatively gentle Power of Sunshine. If he had used the more aggressive Giant God Soldier Mechanic's Spiritual Energy, ordinary people might not have been able to handle it.

Still, regardless of the challenges, Su Yu succeeded in simultaneously performing a grand healing for millions!

"It seems my Spirit has truly entered the microscopic domain!"

"With this, I can self-heal from even the most severe injuries!"

Su Yu realized that this healing method could not only be applied to others but also to himself.

With such strong control over cells, Su Yu suspected that he might find it hard to die in the future.

Even if beaten down to a drop of blood, or even a single cell, or if all cells were annihilated, he could regain his complete body!

Chapter 725: Look Up, Gaze Directly at the Evil God!

If the body is blown to the point that not even a single cell is left, it basically means one is utterly dead, completely dead.

However, the ability that Su Yu has developed now allows him to recover even when not a single cell remains of his body.

It's actually equivalent to being able to resurrect after death!

The ability to revive!

At this moment, Su Yu is already at the Fourth Rank, incredibly powerful, and his spirit can exist independently of the body for a long duration, almost undying and undestroyable.

Previously, when he was at the Third Rank, Su Yu could even separate part of his spirit to enter subspace for gatherings, let alone now?

However, no matter how strong the spirit is, it still ultimately needs a physical vessel.

Just like an intelligent being requires hardware support.

The spirit exposed outside is easily influenced by the various emotions and energies out there.

A drop of water can remain pure in a container, but if poured into the ocean, can it remain pure? It will certainly be assimilated by the ocean, making it hard to ever return to its original state.

If Su Yu's body were destroyed and could not recover for a long time, even if his spirit were undestroyed, it would be corroded by the endless extreme emotions in subspace, gradually becoming extremely paranoid, and ultimately losing humanity completely.

If that happens, it's as good as being dead. Su Yu would be completely dead, and what remains would merely be an Evil God with Su Yu's memories.

In this world, sheer undying is actually not difficult.

Every Evil God claims to be undying and indestructible. Even the Brutal Split Mind of the earlier Third Rank had the ability of undying, and the City Lord of Heavenly Punishment City, who hadn't yet completely ascended to divine position, also couldn't die and is currently suffering in Su Yu's Pain Engine.

While it may be easy to be undying, maintaining humanity and preserving one's personality under the premise of being undying is exceptionally challenging.

Even if an Evil God doesn't die, after being reborn, it's no longer the original entity.

In such a case, it's actually tantamount to death.

Thus, the recovery ability Su Yu has just developed is of great significance to him.

It ensures he can restore the completeness of his body and his original self, even in the most dangerous situations.

However, if Su Yu were truly obliterated by a powerful enemy, leaving not a single cell, for the current Su Yu, it would be a difficult task to recover.

After all, although Su Yu's spirit can delve into the micro-scale, it can basically only reach the cellular level.

Even at full stretch, it can at most reach the macromolecule level of proteins.

To use various micro molecules and atoms out of thin air to "mold" a body from nothing is extremely challenging.

Moreover, his body, having undergone multiple promotions and Spiritual Energy training, is fundamentally different from an ordinary person's body, making recovery even more difficult.

If not a single cell is left, recovery might take a hundred or even a thousand years of effort at least.

But despite the numerous limitations, the fact that Su Yu could develop this ability is indeed a huge benefit.

He even had an idea that...

"That group of guys from the Transcendent Association previously said I was some ancient strongman reborn."

"I know full well that I'm no ancient strongman. I'm just Su Yu."

"However, now that I have such an ability, I'm afraid I might indeed remain undying in spirit after death and then be resurrected a thousand years later..."

"Moreover, if in the future I develop a time machine, I might actually travel back to witness the great war ten thousand years ago. Even if I die, I could be resurrected ten thousand years later, which would align perfectly..."

After turning these thoughts over, Su Yu even found himself somewhat whimsical.

He actually wanted to create a time machine, go back to the past, and make this so-called ancient strongman rebirth a reality!

However, it must be said, there's a real possibility of such a thing.

After all, Su Yu had already encountered the God of Pain from the future, who sent subordinates to win him over.

Even providing Su Yu with unparalleled talent in the path of pain across the time-space distance.

This essentially is a form of time travel.

Since the God of Pain could achieve such a feat, Su Yu thought that once he truly researched the profession of Time Mechanic, creating a time machine to return to the past of ten thousand years ago wouldn't be strange.

But that is a matter for the future.

Su Yu has just named this Time Mechanic, and who knows when he will develop it.

Furthermore, with the Fourth Rank's strength, it's hard to say whether he can indeed create a time machine to go back to the past.

After all, if time travel were so easy, the God of Pain, who looks upon Su Yu favorably, would have crossed over in person long ago, without the hassle of relying on the Rotten Meat Eyes.

"By the way, I'm now at the Fourth Rank, and can resurrect after death, even the Ghost Emperor has resurrected too, so what about Zhang Chenfeng?"

Su Yu thought of another matter.

With his current strength, it could be said that even intending to die is difficult.

So what about Zhang Chenfeng, who is much stronger than Su Yu? Is he really... dead?

If Zhang Chenfeng hasn't completely died, then where is he? What is he doing?

Thinking of this, Su Yu felt a heaviness in his heart.

This matter definitely needs thorough investigation!

Zhang Chenfeng, this guy, is considered ruthless and cruel. If he has come back to life, whether he is an enemy or a friend to Su Yu is uncertain.

If he bears malice, then it is another formidable enemy not inferior to the Brutal Evil God.

Su Yu went through these thoughts in just less than one ten-thousandth of a second.

His thinking speed is so fast that, when he had sorted through all these ideas, the people below his feet had not yet recovered from their previous shock and joy.

Chapter 726: Look Up, Gaze Directly at the Evil God! - Part 2

Then, Su Yu put these thoughts to the back of his mind and focused his attention on the people in front of him.

He slowly spoke, "So, what do you think of my gift? Are you all satisfied?"

His voice was majestic and grand, waking everyone from their joyful shock.

The gift Su Yu mentioned earlier was, of course, the healing he had provided to everyone, which was indeed an exceptionally generous welcome gift.

People raised their heads to look at Su Yu, and suddenly many knelt down in ecstasy, "Satisfied! Satisfied! Thank you for the divine grace!"

"My child, my child can finally live..."

"Thank you..."

Many among them were suffering from severe illnesses or even terminal diseases due to the harsh environment.

However, what was a terminal illness to them was easily curable for Su Yu, so they were now all healed.

How could they not be overjoyed?

These people no longer cared why Su Yu had gathered them here.

After all, they were almost dead anyway, and now that Su Yu had saved them, he was like a true god who had descended. What else could they do but worship?

The others were not as enthusiastic, as those with terminal illnesses were in the minority after all.

But at this point, they mostly believed that Su Yu had no malicious intent. If he did, why would he heal their illnesses?

Besides, what level of power must it be to heal millions of people simultaneously? Could it really be divine?

They hesitated, wondering if they should also kneel and worship?

This grand act of healing from Su Yu instantly dissipated the resentment and dissatisfaction among those who were forcibly brought here to the extreme.

To most of these people, the healing ability Su Yu demonstrated seemed like a miracle.

Only the two seven-star City Lords from Rock Cave City and Sky Sea City knew what had just happened.

Su Yu was a powerful Transcendent who had surpassed nine stars, and he had just used an unbelievable Extraordinary Ability to heal everyone's injuries.

These two City Lords even sensed that Su Yu's Spiritual Energy had penetrated their cells, adjusting their bodily functions.

This level of terrifying control power nearly scared them out of their wits.

Although they were seven-star powerhouses, when had they ever seen such a peerless strength?

Nonetheless, whether ordinary settlement residents or the two seven-star City Lords, they all still had doubts in their hearts.

This Mr. Su Yu is so powerful, almost god-like. Why did such a being bring them here?

Seeing this, Su Yu naturally understood their doubts.

So he raised his hand and pointed to the sky, "Do you see those clouds?"

"Within those clouds lies the true form of a powerful Evil God. It was originally asleep but is now stirring and will awaken soon."

"When that happens, all living beings on this planet will be shrouded in the Evil God's aura."

"Without protection, you would instantly die or mutate into horrifying monsters."

"Therefore, I issued a task to gather all of you. I fear that the Evil God within the clouds could awaken at any moment and cause mass extinction."

"Time is tight, and extraordinary measures are necessary."

"Please, I ask for your understanding."

Su Yu directly told them the reason for his actions.

Upon hearing this, everyone followed Su Yu's finger and looked up to the sky.

The clouds churned above, but nothing seemed unusual.

The crowd was skeptical. They saw these clouds daily; could there really be an Evil God hiding within?

True or false? How come they never noticed before?

Just then, a twisted tentacle suddenly emerged from the clouds, disappearing in an instant.

The tentacle moved extremely quickly, almost invisible from the ground.

But now, being on the Mechanical City high in the sky and so close to the clouds, many of them saw it.

The next moment.

Boom boom boom boom boom boom boom!

A series of explosions sounded!

It was people's eyeballs exploding!

Many were low-level Transcendents or ordinary people.

Seeing the body of an Evil God up close like this, how could they endure it?

Both eyes exploded instantly, with blood flying everywhere!

Simultaneously, strange cracks appeared on their bodies, as if the internal muscles swelled and broke through the skin.

Within the cracks, faintly visible were eyeballs, tentacles, teeth, and other fleshy organs... growing as if ready to emerge at any moment.

Their aura became extremely brutal, screaming madly as if intent on killing, dismembering, and devouring everyone around them! Even family members were not spared.

The scene quickly descended into chaos.

But in the next instant, a white light from Su Yu once again enveloped everyone.

Moments later, the white light faded, and everyone's eyes had returned to normal, with the strange cracks disappearing.

It was Su Yu using his healing ability again to cure them.

At the same time, Su Yu used the Power of Nihilism and Power of Sunshine to help them rid themselves of the terrifying pollution caused by directly gazing at the Evil God.

After recovering, these people were all baffled, as if they did not know what had just happened.

Those who hadn't seen the Evil God's tentacles were looking at the mutated ones in terror, as if they were looking at monsters.

In fact, moments ago, they did transform into monsters.

"Just now, you saw the true form of the Evil God within the clouds, causing you to mutate instantly."

"In the future, be careful not to look up at the sky again."

Su Yu said.

Hearing this, those people suddenly awoke as if from a dream, and the terrifying memories surged in.

They quickly kowtowed to Su Yu, "Thank you, Mr. Su Yu, for your protection! Thank you, Mr. Su Yu, for your protection!"

They fully believed Su Yu's words.

There truly was an Evil God lurking in the clouds!

They had never thought that such danger could be lurking in the sky above this planet.

In the past, these people also thought that with countless Radiation Beasts on the ground, flying up might be safer.

Who would have thought that things in the sky were more perilous!

Just one glance could mean death!

Su Yu had his subordinates bring them here not to harm them but to save them!

But, isn't Mr. Su Yu's Mechanical City flying this high somewhat imprudent...

Their minds were in turmoil, not knowing what to think.

Even the two seven-star City Lords were utterly shocked.

They had also directly seen the tentacles of the Evil God, though their strength allowed them to resist mutation.

Yet, they were almost unable to control themselves in the face of that brutal and cruel aura.

If not for Su Yu helping them to break free from the influence, they might have gone mad over time.

The terrifying feeling was something they never wanted to recall.

Although Su Yu was powerful, because he harbored no malice, they did not feel deeply affected.

However, with the true form of the Brutal Evil God, they deeply felt their own insignificance, like ants.

But they were seven-star powerhouses!

Entities that governed cities with millions, yet under the terrifying Evil God, they felt like ants!

Consequently, the two seven-star powerhouses exchanged glances and surprisingly both knelt before Su Yu.

Seeing this, Su Yu was somewhat surprised.

These two seven-star powerhouses were quite prideful, yet this was enough to humble them?

Although Su Yu could tell they seemingly had a request?

"Mr... Mr. Su Yu, may I ask, are you human?"

The two City Lords asked, somewhat stammering.

Su Yu nodded, "I am indeed human, and the City Lord of this Mechanical City. In essence, my current state is an Extraordinary Ability; I can still revert to human form."

Su Yu's kind demeanor, coupled with his admission of being human, eased the pressure on the two City Lords considerably. They continued to ask, "Mr. Su Yu, have you surpassed nine stars, becoming like a god?"

Despite living for centuries, these two City Lords had little knowledge of Extraordinary Knowledge above nine stars due to their long concealment.

They had always believed nine stars were the pinnacle for Transcendents, and anything beyond was the domain of mythical gods.

Now, witnessing Su Yu's power, surpassing their imagination, prompted their question.

They wanted to know if there was a path beyond nine stars.

They had been trapped at the seven-star stage for centuries, finding it challenging to even reach eight stars.

Now, suddenly seeing a Fourth Rank powerhouse displaying incredible power, how could they not be excited?

Su Yu understood their intentions immediately, nodding, "Indeed, I have surpassed nine stars and am now a ten-star Transcendent."

"With the right opportunity to complete the ceremony, you too can reach a state like mine."

Upon hearing this, the two seven-star City Lords exchanged a glance and then simultaneously knelt before Su Yu, "Please teach us, Mr. Su Yu!"

Their demeanor was exceedingly respectful.

They wanted to become his apprentices!

Chapter 727: It's Great to Join Mechanical City!

Their bow of respect left Su Yu slightly astonished.

After all, these two Seven-star City Lords were proud individuals. When they were captured by the people of Mechanical City earlier, these two preferred death over submission and even used powerful tactics in an attempt to go down fighting.

Eventually, it was only when a swarm of those debt-armored individuals overwhelmed them that these two were barely subdued and brought back. For strong warriors like them, this should be considered a great humiliation.

Being high-ranking warriors, rulers of large cities with populations in the millions, they could not easily stomach such disgrace.

Su Yu initially thought that he would need to exert significant effort to conquer them.

And yet, they just kneeled directly before Su Yu now?

It's important to note that even among the strong warriors in Mechanical City, only a few had ever kneeled to Su Yu, and that was mostly out of gratitude or faith.

Normally, Su Yu never put on airs before those individuals, insisting they kneel or such; he maintained a level of respect for these skilled warriors.

Even with ordinary citizens in the city, Su Yu never demanded they kneel; after all, he wasn't some feudal emperor.

Yet at that moment, upon first meeting, the two Seven-star strong warriors displayed such reverence, which made Su Yu suspect whether they harbored hidden intentions.

It couldn't be that Su Yu's domineering aura alone compelled the two city lords to bow, could it?

However, Su Yu soon realized that he was the only one surprised by this.

The others, on the contrary, appeared as if this was the most natural thing.

It seemed as if these two Seven-star City Lords bowing respectfully to Su Yu was entirely expected.

Upon careful consideration, Su Yu understood that today's circumstances were different from before!

Now, Su Yu truly had the merit to make two Seven-star warriors bow upon first meeting.

When Su Yu initially encountered the strong warriors of the Transcendent Union, he had just broken through to a Seven-star level and was actually on equal footing in both strength and status with the others.

Later, as Su Yu's power surged rapidly, he had far exceeded those individuals.

Yet between them, the dynamics hadn't significantly changed.

Although the members of the Transcendent Union now acknowledged Su Yu as their leader and essentially followed his directives,

there wasn't a rigid hierarchy among them.

More than a superior-subordinate dynamic, it resembled a fellowship; when not engaged with serious matters, everyone came and went freely, with few restrictions.

But now, it was the first time the two from Rock Cave City and Sky Sea City laid eyes on Su Yu, who possessed Fourth Rank power, strong as a deity.

To the two city lords, such a warrior far surpassed their imagination, deserving the utmost respect.

Most importantly, Su Yu's demonstrated strength and realm unveiled the path forward for the two city lords: he showed them that Nine-star Transcendence was not the limit, and there lay a vast expanse beyond!

Simultaneously, Su Yu revealed to the two city lords the impending terrifying crisis on this planet.

The Evil Gods within the clouds made the two Seven-star warriors feel like mere ants, igniting an insatiable desire for power within their hearts.

Thus, after a brief period of contemplation, they quickly resolved to kneel and seek mentorship from Su Yu, requesting his teachings in power and knowledge to confront future crises!

"Have I really reached such a state?"

Having understood all this, Su Yu sighed internally.

His perception of Seven-star warriors was still rooted in the impressions of a few months ago.

Back then, Su Yu had just broken through to Seven-star and joined the Transcendent Union.

The members of the Union were each skilled and outstanding individuals with uncommon strength and status.

But now, Su Yu was taken aback to find that, as his power increased, the once formidable Seven-star Transcendents were really not so different from ordinary people in front of him.

The two "ordinary people," upon witnessing Su Yu's immense strength, kneeling to seek mentorship—such a sight ceased to surprise anymore.

Previously, Su Yu had simply been slow to realize it.

No wonder, since Su Yu's power had risen too swiftly.

Nevertheless, Su Yu understood that these two Seven-star warriors, who previously resisted fiercely, now kneeling to seek mentorship, might not be genuinely sincere.

After all, they had just met Su Yu and didn't yet understand his temperament, whether good or ill.

Would they necessarily believe Su Yu just because he professed to be good?

If they were seeking mentorship and Su Yu was indeed good, then all would be well.

If not, then showing respect wouldn't hurt either.

Considering this, the two Seven-star warriors might not have been as unyielding as they previously appeared, rather showing cleverness and some suspicion; but that's normal: to survive so long as Seven-star warriors, even fools would have grown savvy.

In a short time, Su Yu contemplated all this clearly within his mind.

Then he spoke: "As long as you join the Mechanical City and have the ability to earn enough energy coins, you can exchange them for various resources, break through realms, and increase your strength."

"Even ritual materials for the Fourth Rank might not be impossible to exchange."

"Alright, you may rise."

Su Yu did not directly agree to their request to become disciples.

He had never taken on disciples before, nor did he have that intention.

Besides, if he really took on disciples, how would he teach them?

Su Yu's true "skills" came from the Profession Panel, which couldn't be taught.

As for other techniques, knowledge, and technology, Su Yu could easily make them purchasable through energy coin exchanges—all one needed was energy coins, requiring no student-teacher relationship.

"Yes, Mr. Su Yu!"

The two Seven-star warriors, seeing Su Yu's refusal, were slightly disappointed but dared not speak more, quickly standing up.

Chapter 728: It's Great to Join Mechanical City!_2

However, curiosity surged in their hearts. Can those energy coins really be exchanged for anything?

Even fourth-rank rituals and materials can be exchanged? In this case, it seems that apprenticeship is not necessary...

Su Yu looked at the two Seven-Star City Lords and the rest of the crowd and asked, "Now, are you willing to join Mechanical City and become one of its members?"

The crowd responded boisterously, "Willing!"

No one was unwilling, even if some truly didn't want to, after witnessing Su Yu's power just now, they dared not speak up.

"Very good."

"However, joining Mechanical City requires abiding by its rules."

"Leaders of the settlements, please step forward."

Su Yu nodded with satisfaction, then said.

Upon hearing this, hundreds quickly stepped forward, standing behind the two Seven-Star City Lords.

These individuals were leaders of various settlements, all powerful figures. Of course, their so-called power was relative to ordinary people.

These leaders possessed at least four-star strength, with some even reaching the pinnacle of six stars, just second to the two Seven-Star City Lords.

"Organize and submit the population data of your settlements, I need to conduct a survey."

"Hold this, recall the data in your mind, and you can input the information."

With a thought, Su Yu manifested hundreds of disc-shaped mechanical devices, which flew into their hands.

These devices could read the extraneous thought waves of humans, extracting memories.

For the current Su Yu, creating these trinkets was a simple matter of using the abilities of a Manifestation Mechanic.

In fact, the Temporary Battle Armor System Su Yu devised had such a function.

A mere thought could control the system, allowing one to take a loan for a battle armor, or go bankrupt on a whim, quite convenient...

Su Yu needed to incorporate so many people into Mechanical City, so a basic population data survey was essential.

These individuals were hastily gathered without any documentation, so this method was necessary.

In truth, Su Yu could forcibly use his Data Ability to invade their brains and extract memories, but that would be too violent, and Su Yu was not so overbearing.

Besides, not being in the Manifestation Space, without the help of the Time River, even the Mechanical God could not observe the fate of so many people simultaneously; otherwise, population data would be unnecessary.

The leaders, including the two Seven-Star City Lords, looked at the small mechanical devices in their hands with astonishment.

This little thing, could it really extract memories with a mere thought?

They attempted to recall the population data of their settlements, and sure enough, in the next moment, various data emerged from the mechanical devices.

They were astounded. When had they ever witnessed such "advanced technology"?

Their understanding of the marvels of Mechanical City deepened significantly.

Soon, a large amount of data was recorded into those mechanical devices.

Without needing to retrieve those devices, Su Yu had already acquired the data. Then he looked at the crowd, his gaze suddenly turning cold.

Their hearts immediately chilled.

In the next instant, tens of thousands of people were lifted into the air, brought before Su Yu.

These individuals appeared confused, unaware of Su Yu's intentions.

With another thought, Su Yu utilized his formidable ability to invade these individuals' brains, viewing their memories directly.

In the next moment, thousands of people flew back.

Looking at the remaining tens of thousands, Su Yu coldly announced, "You are all criminals from various settlements, having committed numerous crimes. I refuse to let you join Mechanical City."

These individuals were akin to Su Yu's past arch-enemy "Li He", criminals in their respective settlements, having committed many wrongdoings.

Such individuals existed in every settlement. Out of millions, only selecting a few tens of thousands was already considered minimal.

After all, on this Ruins Star, the harsh environment meant that those who survived more or less committed a few dishonorable acts.

Su Yu ignored minor offenders; these tens of thousands had blood on their hands, each one brutal and savage.

Su Yu naturally would not allow such individuals to join Mechanical City.

Those tens of thousands blanched at the words.

If Su Yu wouldn't let them join, was he going to kill them?

However, Su Yu continued, "The crimes you committed were in your respective settlements, which are none of my concern."

"Now, I request you leave Mechanical City."

Relieved, the criminals realized they were being expelled, not killed.

Wait, not right!

They had just witnessed the terror of the Evil God in the clouds—if expelled from Mechanical City, wouldn't they die once the Evil God awakened?

As they began to plead, Su Yu's thought conjured mechanical jet packs onto their backs out of thin air.

Su Yu then commanded coldly, "Begone! These packs will ensure you reach the ground."

"You have just thirty minutes to leave, or face death!"

As Su Yu's words carried a hint of killing intent, the criminals trembled, daring not to utter another word.

They quickly ceased speaking, heading towards the city's edge.

Upon reaching the edge, their jet packs instantly emitted gas, lifting them into the air.

They leaped off, flying towards the ground below.

The others witnessing this remained silent but dared not speak up.

Su Yu glanced at them, then said, "I know many of you have deep enmity with these individuals."

"Having let them go, are you unsatisfied?"

The crowd hastily shook their heads.

Su Yu's ominous aura at this moment was terrifying; who would dare express dissatisfaction?

Given Su Yu's current strength, even a slight leak of emotion was insurmountable for these people.

In truth, they were indeed dissatisfied.

Those criminals, each heinous and deserving of death, Su Yu should have killed them, yet he supplied them with jet packs for a safe departure—why?

Su Yu, aware of their confusion, smiled slightly, "You have grudges with them, I do not."

"In my Mechanical City, each of you has the opportunity to become a strong warrior, potentially a super warrior above Seven Stars!"

"If you seek revenge, find ways to enhance your own strength and settle it yourselves!"

"Now, welcome to Mechanical City!"

Su Yu extended a hand to the crowd.

Upon hearing Su Yu's words and seeing that descending hand in the sky, any lingering dissatisfaction vanished, replaced by a desire for power.

Indeed, upon joining this wondrous Mechanical City, how could they worry about not being able to take revenge someday?

Just hope those enemies live long enough, not dying too soon!

"Yes, Mr. Su Yu!"

They exclaimed in unison.

As their voices resounded, millions of data terminals flew into their hands.

These data terminals were what Su Yu prepared over the past two days, crafted from real materials, not data manifestations.

Having undergone multiple upgrades, these terminals were no longer outdated, each equipped with a Mechanical Spirit avatar, with powerful functions, especially the Temporary Battle Armor System and Energy Coin Exchange System.

These devices were the identification after joining Mechanical City.

Upon receiving them, they were officially part of Mechanical City!

Once connected to the terminals, neural signals instantly linked, displaying various information and floating windows before their eyes.

The first displayed was a compilation of the laws and regulations of Mechanical City.

Then came a plethora of exchange and trade information.

Aside from those personally opened by Su Yu—battle armors, abilities, knowledge, transformations...—there were many other miscellaneous items available for exchange.

Su Yu previously granted a bit of permission on the exchange system to ordinary residents.

Thus, some residents could sell goods and services through the exchange system.

For such a large city, trade and economy were inevitable.

Seeing an overwhelming array of exchange items, the newcomers to Mechanical City found their heads spinning.

"What? You can exchange for Seven-Star Battle Armor?"

"What! Full-body mechanical transformation requires so few energy coins?"

"Huh? You can hire a seven-star powerhouse as a bodyguard?"

"My God, what are these energy coins? How can they buy everything?"

They exclaimed repeatedly, but their minds held only one thought:

It's great to join Mechanical City!

Chapter 729: Welcome New Residents of Mechanical City, Personal Space Feature!

The most advanced mechanical creations that many of these settlement residents had seen before were basically on the same level as the rangers Su Yu used to build.

A four or five-star mechanical unit could be regarded as the treasured protector of some small to medium-sized settlements.

After all, in Sanctuary 73 where Su Yu used to stay, the strongest was only a four-star.

A four or five-star mechanical unit, as long as it was strong enough and had energy, could easily wipe out an entire settlement.

But now, these people discovered that such four or five-star mechanical creations were in abundance in the exchange system of the Mechanical City's information terminal!

Pricier ones cost about a dozen energy coins, while cheaper ones were just one or two.

Additionally, various advanced technologies, high-end Meditation Techniques, precious resources, materials... could all be exchanged for, dazzling everyone's eyes.

Even the Seven-Star Battle Armor could be acquired, and it could be delivered instantly from thousands of miles away? Although it's temporary, it's still astonishing.

This is just too incredible!

People from Rock Cave City and Sky Sea City only found out now why, during the great battle between the two city lords and people from Mechanical City, over ten seven-star elites suddenly appeared on the side of Mechanical City.

It turned out they had all bought the temporary seven-star battle armor!

People found it hard to believe that these things could really be 'bought' with money?

According to their understanding, such precious items should be kept under wraps.

Even if traded, it would be through bartering, so how come in Mechanical City, it seems they are everywhere and can be bought just like that?

Could these items on the information terminal be fake?

However, they looked up at Su Yu's imposing figure and immediately dismissed any disrespectful thoughts.

Given Mr. Su Yu's potent status and strength, would he deceive them?

Just with a thought, Mr. Su Yu conjured up millions of information terminals.

These information terminals are also highly advanced technological creations, yet Su Yu could create so many at will.

Plus, the powerful strength shown by the residents of Mechanical City when they came to capture people... This demonstrated the formidable power of Mechanical City.

These exchange items are definitely not fake; they are all real! They can genuinely be bought with energy coins!

As long as you have energy coins, anyone can become a Transcendent! Everyone can possess formidable strength!

The crowd could hardly contain their excitement.

Most of them were ordinary people, doing hard labor such as farming and hunting in their settlements.

They envied those Transcendents who could battle Radiation Beasts head-on, but without the talent to awaken Spiritual Energy, their envy was futile, and they resigned themselves to being ordinary forever.

But now, as long as they had energy coins, their long-held dreams could instantly come true, how could they not be excited?

But then again, how does one acquire energy coins?

In the exchange system, a single energy coin could get a fair amount of good items, so this valuable currency must be hard to obtain, right?

Thinking of this, they quickly turned to the "task" section to see how they could earn energy coins.

Sure enough, the task section had various ways to earn energy coins.

Some of them were private tasks issued by residents of Mechanical City.

The tasks weren't difficult, some were even non-combat tasks like being a chef in a restaurant.

But the compensation was very low, sometimes even only 0.01 energy coins.

Seeing such low rewards, the crowd ignored them and instead looked at the tasks officially issued by Mechanical City.

Indeed, those official tasks had very high rewards, starting at one energy coin each.

There were even tasks with over ten thousand energy coins as rewards.

However, after seeing the specific content of these tasks, everyone suddenly felt dismayed.

Because the most conspicuous task was:

[Urgent Task: All residents of Mechanical City, go to human settlements across the planet and bring back as many people as possible!]

[Rewards: Bring back one ordinary person for 1 energy coin. A one-star Transcendent for 2 coins, two-star 4 coins, three-star 10 coins, four-star 30 coins, five-star 100 coins, six-star 500 coins! Seven-star 100,000 coins!]

[This task may be cooperatively completed, rewards will be allocated based on contribution, conflict over rewards is prohibited, otherwise all rewards will be revoked and severe penalties will apply...]

The settlement residents realized that these tasks were actually about capturing them!

Moreover, the rewards were so generous?!

These newly inducted settlement residents couldn't help but look up at Su Yu's back.

Behind Su Yu stood the old residents of Mechanical City.

At this moment, those fellows were beaming with smiles.

Because... Su Yu's promised rewards had just been credited!

By bringing back so many people, each person at least received a few energy coins.

Some even received hundreds or thousands, and some, due to capturing two seven-star city lords, got tens of thousands!

This truly was a bumper harvest! Naturally, they couldn't help but grin from ear to ear.

Meanwhile, those new members they captured naturally didn't feel too happy.

"So we're worth so much?"

"I almost want to sell myself!"

"Oh my god, the two city lords are actually worth ten thousand coins, which directly can be exchanged for permanent Seven-Star Battle Armor!"

"If only I had joined Mechanical City earlier, I could have earned this money too..."

The crowd buzzed with discussions, looking at the two seven-star city lords with eyes almost sparkling.

These two seven-star city lords were indeed incredibly valuable.

Even the two seven-star city lords themselves were dazzled by the massive rewards.

Bringing back a seven-star elite, the reward was a hundred thousand energy coins, enough to exchange for a permanent Seven-Star Battle Armor!

Chapter 730: Welcome to the New Residents of Mechanical City, Personal Space Feature!_2

It's important to realize that they have lived for hundreds of years without a Seven-Star Battle Armor.

After all, they're not Mechanics, nor do they know any Seven-Star Mechanics, so where would they get such high-level armor?

If they had a Seven-Star Battle Armor, their combat strength and survivability would increase dramatically!

Even a Seven-Star Transcendent would face many inconveniences and be prone to injury if relying solely on their physical body without armor.

For many years, they have dreamed countless times of acquiring a Seven-Star Battle Armor, but ultimately it remained a dream.

And now, the armor is right before their eyes, yet they have no money to buy it...

The two Seven-Star City Lords exchanged glances, both seeing regret in each other's eyes.

They both regretted that if they had joined the Mechanical City earlier and taken action against the other, they could have had the Seven-Star Battle Armor on them now...

Alas, it's only a thought.

Now they are all members of the Mechanical City, and even if they capture each other, they won't receive any energy coins.

For a moment, everyone felt the urge to sigh towards the sky.

There are so many good things in the exchange system, yet they can't afford any of them; it's truly disheartening to look at.

But with an Evil God above the clouds, they don't dare to look up, forcing themselves to endure.

At this moment, a window suddenly popped up in everyone's information terminal.

To their surprise, their accounts had just received ten energy coins!

One energy coin can exchange for a temporary four-star armor to use for a month, and ten coins can directly exchange for a permanent version of the armor.

These ten energy coins can allow an ordinary person to have four-star strength!

Along with the account notification, there was also a line explaining.

Everyone, both astonished and delighted, quickly looked:

"Is this a welcome gift from Mr. Su Yu?"

"Mr. Su Yu is so generous!"

Everyone immediately cheered.

Even the two Seven-Star City Lords showed smiles.

Although these ten energy coins might not be of great use to them, it was surely better than having nothing at all.

Su Yu looked at the excited crowd and laughed inwardly.

This group of people, having just joined the Mechanical City, was already "assimilated," with nothing but energy coins on their minds.

This was intentionally guided by Su Yu.

These people, forcibly brought here by his orders, would undoubtedly have feelings of nostalgia and even resentment towards their original homeland.

Su Yu aimed to fill their minds with various stimuli, shocks, and surprises, serving as a "welcoming ceremony," to leave them no room for other thoughts.

By the time they calm down, they would have truly integrated into the Mechanical City and become one of its members.

Meanwhile, those who just received the energy coins, some immediately tried to use these currencies.

Some of them, following the instructions, "withdrew" them.

Turning the virtual currency into tangible coins.

In an instant, round energy coins appeared in their hands, crystal-clear and glowing with energy.

Witnessing its actual withdrawal sparked immediate exclamations of surprise.

The virtual currency had actually turned into tangible material!

Although information terminals provided some introduction on the material, energy, and informational tri-state conversion of energy coins,

previously, everyone was skeptical about its magical capabilities. Was it real or not?

But now, with successful experimentation, they finally confirmed it was true! There really was such a magical currency!

The pure spirit energy emitted from the withdrawn energy coins made the eyes of the Transcendents in the group light up.

They tried absorbing the pure spirit energy from the energy coins to train, and instantly, spiritual energy surged in many Transcendents, leading to breakthroughs!

These people had never before absorbed such pure spiritual energy.

They had painstakingly trained and meditated to extract a bit of spiritual energy from subspace to maintain their consumption.

But the spiritual energy in the energy coins was incredibly pure, almost matching the quality of a Seven-Star Transcendent's spiritual energy.

For them, absorbing this energy was like a starving person finally having a sumptuous feast, fulfilling both body and mind, leading to successive breakthroughs.

In a short time, tens of thousands of Transcendents broke through their realms, and they continued to progress.

After a long while, the breakthroughs finally ended, and the Transcendents' strength saw significant growth.

Among these people, the proportion of Transcendents was roughly three percent.

In total, there were about a hundred thousand people, most of whom were one-star Transcendents, now mostly elevating from one-star to two-star, and from two-star to three-star, with smiles all around.

None of them ever thought that originally extremely difficult spiritual energy breakthroughs could be so easy!

All it took was a single energy coin, or perhaps not even a full one.

Since, except for a few four-star Transcendents or above, others couldn't even deplete the energy from a single energy coin.

Many ordinary people awakened to spiritual energy through contact with the pure spirit energy during this process, entering the ranks of Transcendents.

After a significant breakthrough, the crowd once again gratefully thanked Su Yu.

They excitedly realized the truth in what Su Yu had previously said, that with energy coins, anyone could become a powerful being.

After their thanks, they eagerly attempted to purchase items in the exchange system.

"This Body Casting Meditation Method, suitable for the body system, can be cultivated up to the peak six-star level, and even includes a subsequent seven-star advancement ceremony? Only eight energy coins? Buy it!"

"Ten energy coins can purchase a permanent four-star armor, much better than a temporary one! Buy it!"

"This weapon..."

With money and upgraded abilities, a wave of enthusiastic purchases followed.

Though they could only afford some cheap goods, they were still joyously excited.

Some who bought meditation techniques immediately began training, continuously amazed by the powerful effects.

Yet, those who purchased physical items like Mechanical Battle Armor were curious.

How would these physical items be delivered?

Soon, their curiosity turned to endless shock and delight.

Because...

[Your purchased items have been credited! Stored in your Personal Space.]

The information terminal notification popped up, and then they discovered a new "Personal Space" option in their information terminal.

Opening the Personal Space revealed everything they had purchased stored inside it.

Their breaths became heavy immediately, eagerly attempting to "withdraw" these purchased items like they did with the coins.

In the next moment, various armors, weapons, and materials appeared out of thin air in their hands!

"Is this real?"

They experimented with storing the armors and weapons back inside, and it indeed worked!

Moreover, they tried storing their personal belongings inside, and that worked too!

"This...this..."

In their excitement, they didn't even know what to say.

The legendary storage space! It actually existed! And Mr. Su Yu even gave it to them for free!

Living in this world of spiritual energy, these people naturally fantasized about the convenience of such a miraculous storage space, though none had ever seen it.

Now, having come to the Mechanical City, such a legendary thing was given to each person?

Mr. Su Yu is truly generous!

However, they soon realized they celebrated too early.

[Personal Space (Trial): Each person can try the Personal Space for 24 hours, with a capacity of 10 cubic meters, freely storing any items.]

The information terminal's notification popped up.

This was a new feature created by Su Yu, the Personal Space!

Since Su Yu became a Manifestation Mechanic, he already possessed the ability of Manifestation Space, allowing him to create items akin to spatial pockets.

Therefore, he added this feature to these people's information terminals.

It wasn't that Su Yu manifested hundreds of thousands of independent spaces; rather, he connected these people's information terminals to his large Manifestation Space.

He installed hundreds of thousands of "doors," each data terminal serving as an exit.

This way, items from the Manifestation Space could be retrieved through these "doors," instantly delivered to people's hands.

Long ago, Su Yu had witnessed Xiao Shengyin using the Navigator's ability to achieve subspace transmission of materials.

Now Su Yu could finally achieve similar effects, and even better!
