

Infinite 781

Chapter 781: New Trait of the Profession Panel! Su Yu Takes the Field, Time Travel Experiment!

In the coming period, Su Yu continued his research as a Time Mechanic.

With the data from the experiment, his research delved deeper.

At the same time, he cautiously guarded against the Mechanical Star Core within the gas giant planet.

That thing, Su Yu had no idea what it actually was or what its purpose might be.

In this eerie Dark Space-Time, there was no way to investigate, so he could only remain cautious.

Fortunately, the Mechanical Star Core quietly absorbed and controlled the energy of the gas giant planet, and aside from that, there was no movement.

Quickly, another ten years passed.

During these ten years, Su Yu continuously explored the mysteries of space-time and conducted another time travel experiment.

Moreover, Qi Feihang was used as the experimental subject.

Qi Feihang, having prior experience, was accustomed to it, plus the fusion of two historical timelines post-experiment enhanced his power considerably, so he gladly accepted.

However, this time the experiment encountered an issue.

Actually, the process of this experiment wasn't too different from the last.

Qi Feihang traveled back to a point in the past, contacted Su Yu, altered history, and then fused it with the present.

But, during execution, it was more aggressive.

In the last experiment, Qi Feihang secretly escaped at the start, causing differences between the histories.

This time, Qi Feihang hid two days before the experiment started and never entered the experimental area.

As a result, the changes to history were even greater, and the discrepancies between the two histories were larger.

Due to these significant changes, when Qi Feihang returned, the fusion didn't go smoothly. Although it succeeded in the end and his strength greatly increased, he underwent a drastic change in character, almost suffering from a mental breakdown.

He couldn't handle it.

It was Su Yu who barely managed to calm him down using the Power of Nihilism, preventing him from splitting into two people.

However, even though the reactions were intense during the fusion of the two histories this time, Su Yu seemed to have adapted; the fusion was even easier than before, with no discomfort whatsoever.

Moreover, after this experiment, Su Yu merged with another self from a different history, and his strength increased once again.

The Giant God Soldier Mechanic level increased by over thirty levels, nearing its maximum.

The Giant God Soldier Mechanic is a Fourth Rank profession, with a total of 150 levels, and each level requires far more experience than before.

Under normal circumstances, Su Yu found it nearly impossible to quickly level up.

Especially in this isolated, eerie space-time, leveling up became even harder.

Relying on meditation to level up might take hundreds or thousands of years.

Now, having this method of merging with another version of himself provided Su Yu with an urgent solution.

Otherwise, even if he developed the Time Mechanic, without reaching the maximum level of the Giant God Soldier Mechanic, he wouldn't be able to hold the ceremony to take up the position.

Currently, Su Yu is at level 113, with 37 levels to go until maximum level.

Each fusion with another self can increase the level by about forty to fifty.

Another experiment could bring this Fourth Rank profession to its maximum level!

And today, Su Yu was once again ready for an experiment, prepared for a new round of experimentation.

However, he was somewhat hesitant.

He was pondering the potential dangers.

And who should be the experimental subject?

Over two years had passed since the last experiment.

But Qi Feihang had not fully recovered, his thoughts still somewhat chaotic.

The last experiment seemed to have caused considerable damage to Qi Feihang.

But Su Yu himself didn't encounter any problems.

Su Yu initially thought it was because, as a Fourth Rank Transcendent, his strength was great enough to resist.

But now, Su Yu suddenly had a new idea.

"It seems it's not just a matter of strength..."

Su Yu stood beneath the newly built Mechanical Tower, deep in thought.

He recalled the feeling during the last experiment and found he had fully adapted to the fusion of two versions of himself.

Now, upon reflection, this adaptation wasn't due to his inherent abilities.

His Time Mechanic hadn't been successfully researched yet; where would that capability come from?

"Is it... the Profession Panel?"

Su Yu pondered for a moment, then suddenly had an inspiration, considering a possibility.

It's because of the Profession Panel!

Qi Feihang traveled back in time, altering history, causing two different timelines.

[Past] determines [Present].

Having two different [Past] histories implies there should be two different [Present]s.

But according to Su Yu's understanding of space-time theory, there can only be one [Present], so the two histories begin merging in the present to form one.

What if they couldn't merge?

Qi Feihang was an example; inability to merge could lead to a mental split.

Might even cause physical splits, directly turning into two people!

But Su Yu seemed to have none of these issues, and after much contemplation, he realized the significant difference between him and Qi Feihang.

It wasn't because Su Yu was a Fourth Rank Transcendent with immense strength.

It was because of the Profession Panel!

In both timelines, Su Yu had a Profession Panel.

And Su Yu just discovered that these two Profession Panels seemed to be interconnected!

Su Yu recalled that due to different experiences in the two timelines, his professional experience should logically have slight differences.

This one with a few hundred less experience, that one with a few hundred more, was perfectly normal.

Discrepancies of less than a few hundred points should exist.

Su Yu usually gained experience through meditation and training.

And there should definitely be some difference in meditation time between the two histories, so naturally, experience points would differ.

Chapter 782: New Trait of the Profession Panel! Su Yu Takes the Field, Time Travel Experiment!_2

However, Su Yu discovered that in the Profession Panels of both timelines, the experience was exactly the same! There was no difference at all!

This is completely unreasonable!

Either the Profession Panel has made a calculation error.

But Su Yu doesn't believe the Profession Panel would make such a basic mistake.

Even if it was a calculation error, how could it be wrong in the same way on both sides?

Or perhaps, the Profession Panels of the two timelines are actually interconnected!

When it calculates experience, it might be adding up Su Yu's experience from both timelines and then taking the average!

This proves that although Su Yu was split into two due to the different timelines,

the Profession Panel did not split!

It spans across both timelines, unique and singular from beginning to end!

The Profession Panel is very mysterious and powerful; it's normal for it not to be affected by the splitting of history.

And because the Profession Panel serves as an anchor, it made the fusion of the two timelines for Su Yu extremely easy and without obstruction.

In other words, the two Su Yus in the two timelines were originally one due to the Profession Panel.

"I didn't notice this earlier; that was careless."

Su Yu thought about this and shook his head slightly in his heart.

His thoughts were rapid, with computational power comparable to a superintelligent being, yet he overlooked such a crucial clue, only realizing it now.

This too is a case of even the wisest can err.

Su Yu, after all, is human; no matter how powerful he is, there will inevitably be some oversight.

Fortunately, he is cautious, and even if he was momentarily negligent, he eventually noticed the key point.

"Tsk, tsk, it seems my mindset has an issue and needs adjustment."

Su Yu introspected in his heart.

He believed that his lack of attention to the Profession Panel's issue was not just due to oversight but also a mindset problem.

The Profession Panel was too familiar to Su Yu.

Everything on the Profession Panel had become a matter of course for Su Yu.

All he needed was to accept it, without looking closely or studying it thoroughly.

Because Su Yu always felt that research would be useless.

Now Su Yu realized that this kind of thinking is unacceptable.

Although the Profession Panel is extremely mysterious, it is not beyond research.

Hasn't he just uncovered a new trait of it now?

The Profession Panel is actually interconnected in different histories!

It can even act as an anchor to help the different Su Yus from various histories to fuse as one!

After adjusting his mindset, Su Yu felt slightly excited.

Because he thought of the benefits brought by this trait of the Profession Panel.

Previously, Su Yu found it strange that history fusion could quickly upgrade him, which seemed too convenient.

If that's the case, as long as one takes up a Time System profession, wouldn't time travel and self-fusion, upgrading like drinking water, be even more powerful than his Profession Panel?

However, seeing the unlucky state of Qi Feihang, Su Yu understood that it was not that simple.

History fusion indeed leads to upgrades, but it's also extremely dangerous; a slight mistake can turn one into a split-personality madman.

It could even lead to more extreme dangers.

In the past two years, whenever Su Yu checked and treated Qi Feihang, he always felt there was a strange aura about him.

Although that aura was weak, it was very terrifying.

It's unknown what happened to Qi Feihang during the fusion.

If Qi Feihang really couldn't fuse, it might be more than just splitting into two; who knows what might happen.

And it's not just an upgrade problem; maybe every time a Time System profession uses this ability to travel through time, it will bring about such dangers.

Even if one successfully takes up the profession, there's no way they'd dare to use it recklessly.

The vengeful demon of the past thought that just by taking up a Time System profession, they could freely travel through time to complete their revenge; it seems they were too naïve.

However, for Su Yu, who possesses the Profession Panel, this danger doesn't exist!

He can use this method to quickly upgrade without any concerns!

Or travel through time without any concern!

Of course, it might not be completely without concern, but he's definitely much stronger than others.

"It seems this time's experiment, I'll do it myself."

Su Yu murmured to himself.

This time, after thinking it over, he planned to do the experiment himself.

After conducting two experiments, Su Yu collected enough data to theoretically allow him, as a Fourth Rank, to achieve time travel.

Originally, Su Yu thought of having the Galaxy Warriors conduct more experiments to collect more data before proceeding himself.

This was an act of caution.

After all, if the Galaxy Warriors had issues during the experiment, Su Yu could still rescue them.

If he had issues, the Galaxy Warriors couldn't save him.

But now, having understood the special nature of the Profession Panel, and with newfound confidence, he naturally decided not to wait and planned to proceed himself.

He looked at the Mechanical Tower in front of him, smiled slightly, and left the place.

This Mechanical Energy Tower was what he had prepared for this experiment, and there was only one.

To achieve time travel for his Fourth Rank self, this one Energy Tower was insufficient.

Another year passed in the blink of an eye.

Now Su Yu was finally ready.

At this point, thirty Mechanical Towers stood across the planet's surface, scattered across various locations.

All these towers had a nine-star level.

As long as Nuonuo conducted fusion enhancement on them, they would become thirty Fourth Rank Mechanical Energy Towers!

Moreover, they could resonate with each other; once fully activated, they would be enough to allow the consciousness of Su Yu, a Fourth Rank powerhouse, to travel through time and return to the past!

This experiment, Su Yu intended to make it massive.

If the experiment succeeded, Su Yu should be able to directly upgrade the Giant God Soldier Mechanic to the maximum level.

Then the Time Mechanic could collect the final data and prepare for official profession acceptance!

Su Yu adjusted the thirty Mechanical Towers, confirming that all functions were normal, and then had Nuonuo perform fusion on them.

Then, Su Yu descended underground, plunging straight into the Earth's core.

In the high-temperature Earth Core, Su Yu silently activated his ability, sensing the thirty towers on the surface, and then ordered, launch!

Boom!

All thirty towers activated simultaneously, resonating with the planet's energy, and with Su Yu's body in the Earth Core, operating at full power and increasingly intense!

During the first experiment, just one Mechanical Tower caused an energy storm reaching the planetary orbit.

This time, a full thirty Mechanical Towers dispersed across the planet activated simultaneously, their resonance and amplification causing a hundredfold greater commotion.

Viewed from space, the entire planet seemed to glow faintly!

The entire planet's surface was almost enveloped by the energy storm!

Su Yu used these thirty towers to mobilize nearly all the energy of the entire planet, inciting a worldwide energy storm.

Of course, it's not to say that Su Yu had mastered the planet's energy, but he used energy resonance to guide the planet's energy into an outburst.

It can only be considered as borrowing momentum rather than truly mastering it.

Even if it's just borrowing momentum, achieving this extent is very impressive.

Su Yu had spent twenty years researching on this planet, not in vain.

He advanced from acquiring the Profession Panel, becoming a Transcendent, to reaching Fourth Rank in less than a year.

Now, having spent a full twenty years of rigorous effort, it is not surprising to have such achievements.

The entire planet's energy was driven by Su Yu, growing increasingly violent.

Finally, the operation of these towers reached its limit! Then they emitted spiritual energy sparks and exploded directly!

Once the explosion ended, all of the planet's energy vanished without a trace, calming down in an instant.

And those thirty Spiritual Energy Towers all became scrap metal, with only a series of ghostly green mechanical spheres floating nearby.

It was Nuonuo!

It's due to Nuonuo's fusion enhancement of these Mechanical Towers that met the requirements of Su Yu's experiment; otherwise, they would have vaporized at the experiment's onset.

However, despite Nuonuo's reinforcement, these Mechanical Towers were all scrapped after use; they were all single-use.

And after these Mechanical Towers were scrapped, Nuonuo naturally separated from the fusion state.

It looked at these scrapped Mechanical Towers, hesitated for a while, and cautiously asked, "M-Master? (◡_◡)"

It merely assisted in Su Yu's experiment but was unaware of the experiment's outcome.

Having caused such a huge commotion just now, it was also slightly nervous and didn't know whether Su Yu succeeded or not.

Chapter 783: Back to the Past!

Nuonuo called out twice, but didn't make any sound; instead, it was pure data information. This was how it always communicated with Su Yu.

With Nuonuo's current Fourth Rank strength, this information instantly transmitted over ten thousand kilometers, even reaching deep into the Earth Core.

Logically, Su Yu should definitely hear it; however, Nuonuo did not receive any response.

After a while, it called out again, but still no response, and suddenly felt a bit panicked.

It hurriedly tried to sense Su Yu's location carefully.

As Su Yu's Mechanical Apostle, it was closely connected to Su Yu, and with a slight sensing, it could detect Su Yu's general state and position.

But at this moment, it couldn't sense anything! It was as if Su Yu never existed from the beginning!

Its heart sank, and it quickly merged its 30 avatars worldwide into one, then drilled underground.

Soon, it arrived at the Earth Core and started searching.

But there was only the searing Earth Core lava; where was Su Yu's shadow?

Su Yu had disappeared!

Clearly, the experiment was supposed to send Su Yu's consciousness back to a previous time point, but now, even Su Yu's body had vanished.

Nuonuo panicked even more, but quickly calmed down and patiently waited in the Earth Core.

Previously, when Su Yu studied the Subspace Analyzer and entered a Quantumized state, Nuonuo had also lost its sense of Su Yu.

At that time, Nuonuo had panicked too, but fortunately, Su Yu returned quickly.

This time, he should also return soon, right?

As Nuonuo anxiously thought about this, its body suddenly flickered and disappeared too!

...

A while ago, the experiment reached a critical moment.

The 30 Energy Towers operated at their limit, and Su Yu felt his consciousness suddenly unimpeded, sensing another body.

This feeling was very peculiar.

It was like a person born with a high-level spinal paralysis, whose body below the neck had no sensation, only able to feel one's head.

Then one day, this person recovered; only then did he realize that his body not only had a head but also many other parts.

That was exactly how Su Yu felt at that moment.

Of course, Su Yu was not a patient with high-level spinal paralysis.

What he sensed was an extra body besides his main body.

Those extra bodies of Su Yu weren't in the present but in past time points.

The bodies at those time points naturally belonged to Su Yu.

It was just that he couldn't originally sense them, like a person with high-level spinal paralysis unable to feel the parts below the neck.

And now, Su Yu had finally "recovered" temporarily.

Moreover, what Su Yu could sense at this moment wasn't just one body, but a full 30!

time nodes, 30 bodies!

Su Yu used a total of 30 Energy Towers for this experiment.

So when they activated, he actually connected to his past selves across 30 different time nodes simultaneously.

These 30 time nodes were respectively 3 months ago, 8 months ago, a year ago, 17 months ago...

During the 20 years Su Yu had spent on this planet, he connected with 30 of his past time nodes.

These 30 Su Yus were communicating, sharing thoughts and memories at that moment!

Even more strangely, these 30 Su Yus weren't actually on the same historical timeline.

Previously, Su Yu conducted 2 experiments, causing 2 new historical timeline branches to form.

In addition to the original unaltered historical timeline, the [past] timelines now actually totaled 3.

The [present] was merged from these 3 different historical timelines.

Su Yu didn't just travel back to one timeline, but he was in all 3.

And quite evenly distributed, with 10 Su Yus on each timeline.

Originally, these 3 timelines didn't interfere with each other, but because of Su Yu's experiment, they were temporarily connected.

Su Yu involuntarily tried to control these 30 bodies, moving limbs and raising eyebrows.

Indeed, without any obstacle, in these 30 time nodes, the 30 bodies moved according to Su Yu's will.

At this moment, Su Yu had a vague illusion that he was no longer just a small [point] on a timeline.

But a [line] composed of 10 [points]!

These lines totaled 3 and finally merged into one.

This shift from [point] to [line] was fundamentally different; it was an evolution of life!

However, before Su Yu could fully savor this curious sensation, the experiment concluded in the next instant, and the connection among the 30 time nodes was instantly severed.

Any fundamental distinction or life evolution was gone.

Then, Su Yu's body in the [present] vanished into thin air.

That's why Nuonuo couldn't find him.

However, Su Yu's consciousness did not disappear.

His consciousness returned to the past.

At this moment, Su Yu had a total of 33 different consciousnesses residing in 33 different historical segments.

These 33 histories included 1 original history with no alterations.

were altered by Su Yu's previous two experiments.

The remaining 30 were newly created by this experiment.

These 33 consciousnesses did not have direct connections with each other at that moment.

However, emerging from the same individual, they shared the same memories.

Except for the 3 Su Yus in the 3 older histories, who remained unaware of this.

The other 30 newly created historical Su Yus were all pondering.

Pondering the Time-Space Mysteries revealed by this experiment, contemplating what to do next?

"To think so many bodies could be linked, that was somewhat unexpected."

Originally, Su Yu only intended to use the 30 Energy Towers to enhance the planetary energy's influence, thus sending his Fourth Rank consciousness back in time.

Chapter 784: Return to the Past!_2

The result was successful, but the problem was it was too successful, returning to 30 time nodes at once.

This brought a major problem.

Consciousness returning to a past time node would create a new historical timeline.

When time returns to the [present], the two different histories will undergo fusion.

And now, Su Yu instantly connected to 30 time nodes, resulting in 30 different historical timelines!

Plus the original historical timeline, making a total of 31!

These 31 different historical timelines will undergo fusion at the [present]!

If not handled properly, it will lead to very serious consequences.

The 31 Su Yu's now have two choices.

The first option is to do nothing.

All Su Yu's faithfully play their historical roles, making the 30 histories not too different from the original one.

When reaching the [present], fusion won't cause significant issues.

The second option is for these 30 Su Yu's to act in secret.

Make some changes to history, creating a larger gap between these 30 histories and the original one.

This way, more data can be collected during fusion.

But there is a risk, with Su Yu's profession panel, the fusion of two different histories wouldn't be dangerous.

But with 33 histories merging, who knows what might happen, it could go smoothly, or it could cause unpredictable dangers.

These two choices in front of Su Yu made him somewhat troubled.

Normally, the safer first option would be the choice.

But after careful reflection, these Su Yu's realized it's not feasible.

Neither of the two choices is feasible!

His strength at the moment is extremely strong, with deep insights into the Dao of Time, he has a vague feeling that the current version of him has vanished!

If he goes through history step by step, reaching the [present] might mean immediate death.

Or rather, the Su Yu from the [present] was meant to die! Both body and consciousness have already vanished.

"Does a Fourth Rank powerhouse only have one chance to return to the past?"

Su Yu felt extremely heavy-hearted.

This was completely different from the previous two experiments.

Qi Feihang had traveled back twice and returned safely both times.

Now, Su Yu only experimented once and couldn't return!

Just waiting for this short span of 20 years or so to pass, he estimated he would completely vanish.

timelines will fuse in the [present], but with Su Yu from the [present] already gone, even if fused, it likely won't change this reality.

This is some unknown space-time mechanism Su Yu wasn't aware of beforehand, and now it's too late after rash experimentation.

But there's no way.

If Su Yu didn't experiment personally, he might never have discovered this mechanism.

And once he personally experiments, he inevitably falls into the trap, unable to return!

Now, Su Yu can only try to find a solution.

So Su Yu quickly came up with a third option!

The third option is more radical, facing death to bring rebirth!

This choice means to go all in, directly researching and building Energy Towers within the new 30 histories, to conduct another time-travel experiment.

Let the 30 past Su Yu's perform time travel again, connecting to more time nodes, creating more historical timelines.

Each Su Yu on the timeline could connect to 30 more time nodes, creating 30 additional historical timelines!

Thus, 30 turns to 900, 900 to 27000, 27000 to 810000...

Then cycle this process until accumulating enough, connecting to endless time nodes, connecting to Su Yu of countless different time nodes!

Quantitative change leads to qualitative change, Su Yu believes that continuing this will eventually lead to some new changes! Possibly new vitality!

These 30 Su Yu's residing in past time nodes quickly made the same decision!

They planned to build Energy Towers ahead of time at past time nodes to conduct time-travel experiments early!

As soon as they decided, the 30 Su Yu's from different histories immediately began to act.

With memories and experience from the future, they no longer needed to spend time researching, only to gather materials and build Energy Towers.

All of this was done in secret from the Galaxy Warriors; Su Yu still faithfully played his role in history in front of the Galaxy Warriors.

After all, the historical changes Su Yu made were only directed at himself.

Earlier, when Su Yu communicated with the Mechanical God, he understood that every person, even every stone, and every drop of water, had their own timeline, their own destiny.

Su Yu could only try not to affect others, or creating 30 histories for those Galaxy Warriors or the underground civilians would harm them.

They don't have Su Yu's abilities, and when fusion occurs, they would definitely perish.

Even though Su Yu kept acting, it was impossible to perfectly restore history.

There were actually some slight differences among the Galaxy Warriors in these 30 histories.

But the small differences, like breathing one more time in this history or taking one less step in that one.

These small disparities shouldn't be an issue, they should be overlooked during fusion, not causing significant impact.

So Su Yu kept playing the historical role while conducting experiments in secrecy.

Soon, the 30 Su Yu's in these histories secretly gathered materials and rebuilt 30 Energy Towers, spread out across the globe.

All of this was naturally observed by Nuonuo in each history.

This also had a massive impact on its history, reaching a level that could not be ignored.

So [present] it also vanished.

However, it was always united with Su Yu in prosperity and in decline, so it was not a big deal.

Thus, in 30 different historical time nodes, 30 Su Yu's conducted time-travel experiments again.

Then, the 30 Su Yu's re-connected with the Su Yu on 900 different time nodes from the past!

History split again, turning into 933!

The newly born over 900 Su Yu's didn't stop, quickly gathering materials and beginning new experiments!

Soon, Su Yu became 27033!

Then, conducted experiments again...

Again and again, until finally, Su Yu was unsure how many of himself there were.

A million? Ten million? A billion? A trillion?

Because the Su Yu's on different time nodes had no contact with each other.

It was fundamentally impossible to estimate how many experiments were conducted, how many different histories, and how many different Su Yu's existed.

However, the expected qualitative change from quantitative change had not yet arrived.

"What can be done?"

Su Yu was somewhat at a loss.

If he doesn't find a way to break through the situation now, he is certainly doomed to die.

So many Su Yu histories, when the fusion happens, they certainly won't be able to fuse, leading to certain death.

At this moment, Su Yu from a certain time node suddenly had an inspiration and thought of a possibility.

That is...

If during the experiment, consciousness returns to the past.

And at that past time node, Su Yu is also experimenting, and consciousness is also returning to the past, what will happen?

For example, Su Yu at 12:00 today is conducting an experiment with consciousness returning to the past, linking with Su Yu from 12:00 yesterday.

The Su Yu from 12:00 yesterday is also experimenting, linking with Su Yu from 12:00 the day before yesterday.

The day before yesterday...

Multiple time point Su Yu consciousnesses overlap, all returning to the past together, what will happen?

Su Yu was slightly excited. He might have found the way to break through!

At that moment, after numerous experiments, Su Yu had basically traversed each time node within these 20 years.

Almost creating countless Su Yu's.

However, there had not yet been an overlap of two experiment time points.

Because when the experiment succeeds, the consciousness linking with the past self actually takes just a moment, less than a millionth of a second.

For two experimental time nodes to perfectly overlap within that millionth of a second requires precise calculation and arrangement.

But it won't be difficult for Su Yu. He hadn't thought about it before, but now, with a deliberate arrangement, how could it be difficult?

Meanwhile, the Su Yu's in each history also came to this idea.

They were also excited, immediately starting arrangements and precise calculations to control the experimental time nodes.

Soon, a new round of experiments began!

Su Yu, within the Earth Core, controlled 30 Energy Towers with his consciousness, stirring planetary energy to connect his consciousness with the past timeline self.

And at the past time nodes, those Su Yu's were also experimenting, also sending their consciousness back.

Two experiments, simply overlapped!

No! Not just two experiments, but countless ones!

Chapter 785: Qualitative Change! Unifying All History, Time Mechanic Ritual Completed!

Originally, when Su Yu conducted experiments, his consciousness traveled through time and space, connecting to his past self, but it could only last for an instant, less than a millionth of a second.

Moreover, every time he conducted an experiment, 30 Energy Towers would activate simultaneously, allowing connection to only 30 time nodes.

But now, that restriction has been broken.

When Su Yu's consciousness returned to the past, connecting to his past self.

The Su Yu of the past was also conducting experiments, also returning to a more distant past, connecting with himself further back.

Cycling in this manner, Su Yu's will was linked like a chain, connecting one section after another.

At this moment, during the twenty years on this planet, almost every minute and every second, at every time node, there was Su Yu conducting experiments, with his will completely united.

This connected section by section.

Su Yu's will almost traversed every time node within these twenty years.

The quantitative change he had longed for had finally reached a qualitative change!

Boom!

Su Yu's consciousness suddenly trembled violently.

He felt that, due to his repeated experiments, constantly altering history, the countless historical timelines that had branched off began to contract and fuse!

Every time Su Yu conducted an experiment, a new historical timeline would branch off.

In each different historical timeline, there was a new Su Yu.

These different Su Yus from varying timelines could not communicate with each other originally.

But now, because Su Yu's will penetrated every node of the timeline, a qualitative change occurred.

These originally independent timelines unexpectedly established a connection!

The Su Yus from different historical timelines could actually sense each other, with their memories shared and consciousness linked!

Originally, each Su Yu in the historical timelines had slight differences, almost splitting into distinct personalities.

But now, they became one again, with no distinctions.

Since these Su Yus had no more distinctions, the historical timelines also held no significant differences.

Therefore, the different historical timelines began to merge!

Originally, due to Su Yu's rampant time travels, the historical timelines were too numerous, exceeding the limit of fusion.

The Su Yu of the [present] had disappeared, effectively dead beyond death.

But now, these historical timelines actually started merging again.

Rather than merging, it could be said those surplus historical timelines were dissipating.

Finally, the endless historical timelines fused back into one!

In this final merged historical timeline, Su Yu's will had traversed every single time node.

There was no need for any experiment to sustain it, and Su Yu's will could travel through time at will, altering every node in this history as he pleased.

For example, Su Yu from a year ago, who was in the Underground Shelter, focused on researching the mysteries of the Time Mechanic.

But with a mere thought, Su Yu could make his self from a year ago leave the Underground Shelter to wander the planet's surface instead of conducting research.

This changed history!

Moreover, altering history in this way would not split into a new historical timeline, avoiding any issues of unfusible timelines!

Because the Su Yu from different historical timelines had already interconnected and fused, no longer distinct.

Historical splits meant nothing to Su Yu and thus ceased to exist as splits.

"This is truly changing history! This is... traveling through time!"

At this moment, Su Yu felt immense joy in his heart.

His desperate gamble for survival against all odds had truly succeeded!

At this point, Su Yu could declare his experiment a great success.

Changing history at will without causing splits counts as true time travel, a true change in history!

Previously, even if Su Yu traveled to the past and changed history, it didn't really change anything; it merely branched a new history.

Which of the two histories counts, ultimately awaited until the [present] moment when both histories fused and "competed" before the final result could merge.

This fusion result was not very controllable, and it might not align with Su Yu's intent.

Moreover, the split histories persisted.

With Su Yu's excessive time travels, history would split more and more, ultimately unable to merge, causing Su Yu to self-destruct.

Now, without the problem of historical splits, Su Yu could truly travel through time, altering history without restraint!

"It's really thanks to the Profession Panel."

Su Yu knew that his ability to rapidly connect all historical timelines and unify all history.

Was not only due to his own efforts but also the advantages brought by the Profession Panel.

Previously, the various Su Yus isolated within countless historical timelines couldn't link up, yet there was still a connection among them.

This connection was the Profession Panel.

The Profession Panel was incredibly mysterious, not constrained by space and time, eternal and unique.

As the master of the Profession Panel, there was a trace of linkage among these Su Yus across different historical lines.

Thus, Su Yu could "easily" accomplish the unification of the historical timelines.

If not, with so many historical timelines and limitless different Su Yus, under normal circumstances, they would have completely split apart, beyond unification long ago.

"The Power of Time truly isn't something a Fourth Rank can touch."

Su Yu couldn't help but sigh in his heart.

This Power of Time, under normal circumstances, is almost impossible for a Fourth Rank to grasp!

Chapter 786: Qualitative Change! Unifying All History, Time Mechanic Ritual Completed!_2

It's equivalent to suicide!

Only Su Yu, with his Profession Panel and unique abilities, could succeed.

Anyone else would have been doomed long ago.

It seems that the previous nemesis who tried to research the Power of Time at the Third Rank was truly overestimating themselves.

Even if Su Yu ignored it, it would have ended up killing itself.

However, if Su Yu ignored the nemesis, it might create several historical timelines before its death, which would also be troublesome.

Luckily, it's as dead as it can be, so Su Yu doesn't need to worry anymore.

"I suppose now I have preliminarily completed the ritual of the Time Mechanic and initially mastered the Power of Time."

"Reaching this point, it's truly by luck..."

Su Yu knew that at this moment, he had preliminarily completed the ritual of the Time Mechanic!

This profession was developed by Su Yu himself, and naturally, the ritual was also designed by him.

The requirement for the ritual is: create a time machine, achieve time travel, and change the past!

Now, Su Yu has naturally completed it.

Moreover, due to this ordeal and historical fusion, Su Yu, as the Giant God Soldier Mechanic, has also reached full level!

The fusion of two historical timelines used to allow Su Yu to level up dozens of times.

Now with countless historical fusions, Su Yu's strength naturally would also improve.

However, Su Yu's unification of the historical timelines actually caused those split histories to naturally disappear, not truly merge.

So Su Yu merely upgraded the Giant God Soldier Mechanic to a full level, which did not significantly enhance his strength.

Otherwise, with countless Sus from various timelines merging, joining forces from countless Fourth Rank Sus, it wouldn't be difficult to destroy planets or even star systems.

Not to mention the Fifth Rank, even the Sixth Rank would be within reach, making it a shortcut to ascension.

But that's clearly impossible.

So many different historical timelines have exceeded the limits of fusion.

Fusing with oneself from historical timelines, this extra energy certainly doesn't come out of nowhere; it comes from Subspace.

To extract infinite amounts of energy from Subspace at will, it's not that simple.

Merging with one or two of yourself in history is one thing, but merging with countless selves trying to ascend instantly, that's just seeking death.

Subspace isn't generous; it "keeps accounts." If you can't repay the debt owed to it, then you must pay with your life!

Of course, this debt is a metaphor, not implying that Subspace has self-awareness and keeps track of accounts daily.

This process of debt and repayment is more like a natural phenomenon, a physical rule.

This rule is actually more terrifying! It is ruthless and unyielding, with no room for negotiation.

If you owe Subspace, you must repay!

If you can't repay, then you die! Use your all to fill this hole!

"Fortunately now, the debt owed to Subspace isn't too much."

Su Yu contemplated that his ordeal was equivalent to merging with three or four of himself.

Using this energy to level up the Giant God Soldier Mechanic to full level wouldn't immediately trigger Subspace backlash.

Su Yu always used external forces for energy in his armors, mechas, and the Mechanical City, such as the Brutal Core and Hell Engine, allowing these things to draw energy from Subspace.

The energy Su Yu used, the debt owed was repaid by the Brutal Split Minds and other unfortunate ones.

This was also a reasonable use of the rules.

He often used the Power of Faith and other forms of energy from believers, which counted as external force, thus reducing the debt to Subspace.

But this time, by merging with himself from historical timelines and quickly upgrading, it was a solid debt owed to Subspace.

Su Yu estimated that while this made upgrades faster, Subspace backlash would surely come sooner.

He wasn't sure what kind of backlash it would be, but perhaps it wouldn't be too severe?

"Regardless, now I have completed the ritual and can become the Time Mechanic."

"By then, even if there's backlash, I'll have means to counter it."

Su Yu thought to himself, and his mind shifted to return to the "present."

Once he returned to the "present," he could immediately become the Time Mechanic!

His consciousness was still in the "history" for now.

To advance to the Time Mechanic, it still needed to happen in the "present."

The past is, after all, history.

Only what happens in the "present" counts as reality.

His Giant God Soldier Mechanic reaching full level and the completion of the Time Mechanic ritual also happens in the "present."

In the historical timeline, his Giant God Soldier Mechanic was far from full level.

To advance, it couldn't be completed in the history; he needed to return to the "present" for it to be complete.

This is also the rule of time and space; even if you can travel through time, it's not omnipotent.

So Su Yu shifted his mind, intending to return to the "present" to become the Time Mechanic!

He was excited as he had longed for a Time System profession for a long time!

Now Su Yu had unified all historical timelines; there was no fusion issue, so logically, he could return to the "present" with a thought to start the process!

However, before Su Yu could remain excited for long, he quickly realized that his "present" self did not appear!

The "present" Su Yu was still in a state of disappearance!

Su Yu's consciousness existed at every time node in the past twenty years.

In these twenty years, he could freely travel through time and change history, but he couldn't appear in the "present."

The "present" him was already dead, disappeared! He couldn't return!

"How could this be..."

At this moment, Su Yu's consciousness was a "line segment" about twenty years long on the timeline.

This line segment was only so long; it couldn't go further!

It was broken!

"This is... backlash!"

Su Yu's heart sank.

He quickly understood that Subspace backlash had already arrived! It could not be changed!

Subspace backlash actually subtly affects a Transcendent's fate under certain natural rules, causing them to die through various disasters, having their energy return to Subspace, thus repaying the debt owed to Subspace.

It's like an apple on a tree, falling to the ground under the influence of gravity, rotting into part of the soil, and returning to the earth.

This Subspace backlash is like planetary gravity, pulling Transcendents, the "apples," to the ground to rot and return to Subspace.

This backlash of fate occurs in the future, not in the past!

The influence of fate is naturally in the future.

The backlash Su Yu faced now was that he had no future! His future had already disappeared!

"How could this backlash come so quickly and severely!"

Su Yu's heart sank more.

The severity of this backlash had already exceeded his expectations.

Su Yu's recent experiment absorbed only enough Subspace Energy to level up the Giant God Soldier Mechanic to full level.

Yet, such ferocious Subspace backlash cut off his future entirely!

This was completely unreasonable.

If such a small amount of energy could cause such strong backlash, how could other Fourth Rank Transcendents train and become stronger?

"Wait... So that's how the account is calculated..."

Su Yu, after careful thought, understood.

Although the energy he obtained from Subspace was not much.

Only enough to level his Giant God Soldier Mechanic to full level.

But in the "book" of Subspace, this is not how it's calculated.

From the perspective of Subspace, Su Yu had previously split into countless historical timelines; all those different historical Sus must fuse in the "present."

If merging were successful, the energy needed would be unimaginably vast.

This was like Su Yu asking Subspace to lend star system-level terrifying energy.

The rule of Subspace "pondered" for a bit, realizing Su Yu couldn't possibly repay such a vast amount, so it collected the debt in advance by directly killing Su Yu.

So, Su Yu's "future" was gone.

Although later on, Su Yu unified the timelines, essentially retracting his request to borrow energy.

But on Subspace's side, the debt had already been noted and collected; it wasn't retractable.

So Su Yu died.

"It's calculated like that..."

Su Yu felt gloomy and somewhat speechless.

What should he do now?

Does it mean he can only endlessly loop within these twenty years and never get out?

Besides, can it truly loop indefinitely?

Chapter 787: 1000 Cycles, Return to the Future!

Su Yu had already taken the profession of the Time Mechanic to the final step, just one bit away from successfully completing the profession and mastering the Power of Time.

Yet he hadn't anticipated that there would be one final calamity awaiting him.

"... I should have thought of it earlier."

Su Yu shook his head in his heart.

From the beginning, Su Yu intended to pioneer the Time Mechanic profession because he was concerned about backlash from Subspace.

Extracting energy from Subspace always faced terrible backlash.

Would mastering the Power of Time also have its anomalies? How strong would the backlash be?

So Su Yu planned to use machines to replace human effort, creating a time machine to bear the backlash.

But now, Su Yu found that he couldn't avoid it at all, and he himself had to endure this backlash.

Perhaps after Su Yu successfully completed the profession, the machine could substitute him in enduring it.

But to succeed in the profession, he first needed to withstand a backlash using his own body.

This became a chicken-or-egg problem, with no way around it.

Now that Su Yu had lost the future, it was as if he were dead—a dead man!

The question now was, how to come back to life?

"Ah, the Power of Time is indeed difficult to grasp... Luckily, I have time to slowly find a way."

Su Yu thought to himself, without getting overly flustered.

Su Yu's consciousness was like a "snake" twenty years long, coiled on the timeline.

Time seemed to have lost its meaning for him.

He could endlessly repeat the cycle on this twenty-year-long timeline segment, providing him with endless time to think.

Sufficient for him to come up with a solution.

"Perhaps my time isn't really endless..."

Su Yu pondered for a while, then suddenly sensed something in his heart, identifying the [Now], and moved forward by one second.

Su Yu had a vague understanding.

He was within history, theoretically already beyond time.

But time did not change with his will and continued to move forward.

The mark of time moving forward was that the [Now] was still developing.

But Su Yu's time had ceased to move forward, eternally halted at the moment after the experiment where his body disappeared.

Therefore, the temporal node of [Now] was moving further away from Su Yu.

This distance was not spatial but temporal.

"This being the case, in a year or ten years... when I am too far from the [Now], is it possible I will no longer be able to maintain consciousness, and truly die then?"

Su Yu speculated in his heart.

His current state was neither dead nor alive, living in history, as if the real time had lost its meaning for him, equating to immortality.

But immortality isn't that simple, even in this highly restricted alternative form.

If Su Yu's guess was correct, then as the [Now] continuously moved forward and the distance grew, he would gradually lose power.

Ultimately dying completely, becoming a phantom in history.

Fortunately, the [Now] had only moved forward a few minutes; Su Yu still had plenty of time to think of a solution.

"What should I do?"

Su Yu pondered deeply.

He quickly had a train of thought.

Su Yu existed in the [Past], and the time machines he had previously built all traveled to the past, never once going to the [Future].

Now that the [Past] had been almost fully researched, the [Now] had disappeared.

To break through, it seemed only possible to start from the [Future].

"Thus, I must continue experimenting, creating a time machine, to travel from the [Past] to the [Future]."

Su Yu had come up with a solution.

He needed to conduct a new time machine experiment in history again.

This time, however, it wasn't to travel back to the past but forward into the future!

Having thought of a specific solution, Su Yu felt much calmer.

He suddenly had another idea: "First travel back to the past, then travel from the past to the future... Could this be the complete Time Mechanic ritual?"

"It's very likely!"

Su Yu thought that his ritual might never have been entirely complete, returning to the future might be the crucial final step.

The Time Mechanic was a profession Su Yu created himself, and the ritual was also his own design, so he couldn't be certain if there were any flaws.

Now it seemed, this ritual indeed had flaws.

Earlier he thought he had completed the ritual, but he had been happy too soon.

Only by completing an experiment in returning to the future can it be considered successful!

Thinking this, Su Yu felt more at peace.

Since it was a destined difficulty to encounter, there was no need to overthink it—just strive to overcome it.

Mastering the Power of Time wouldn't be so simple; having such difficulties was normal.

If it were too easy to succeed, Su Yu would instead be suspicious if there was something wrong.

And so, the historical Su Yu began his research.

Traveling from the [Now] to the [Past] took Su Yu a full twenty years to succeed.

Now wanting to travel from the [Past] to the [Future], naturally, was not a simple task.

Even though there was prior experience, it wasn't something that could be easily applied.

The difficulty lay in the fact that the future wasn't determined!

Su Yu had previously traveled back to the [Past], knowing the energy activities of the past planets, allowing him to specifically create Energy Towers to resonate with the energy fluctuations of the planetary time nodes in the past.

But regarding the future, Su Yu had no idea how the planetary energy would behave.

Although he could foresee the future through being Quantumized, he could only see a tiny bit.

And it wasn't far, only a fraction of a millisecond into the future.

This amount of time was too short to meet his requirements.

Chapter 788: 1000 Cycles, Return to the Future!_2

Su Yu needed to see a farther future, grasp the planetary energy activities of the future, to complete the experiment.

"And most importantly..."

"Previously, it was always consciousness traveling. Now, I no longer have a destiny. In the future timeline, I have no body at all! So I need to travel with my body as well!"

The difficulty of this experiment is somewhat exaggerated.

In the future, even my body is gone.

So I need to travel with my body together!

Body travel and consciousness travel are not on the same difficulty level at all.

But Su Yu had no choice but to try his best.

Fortunately, he had a lot of time.

In twenty years of history, cycling repeatedly, constantly trying various experiments, trying various possibilities.

At the same time, he racked his brains to study the various knowledge in his mind, study the data of the Subspace Analyzer, study the inheritance of the Mechanical God, study the Radiant Blueprint...

In this way, Su Yu went through more than a thousand cycles!

And the [now] time point has also moved forward by more than a hundred years! The distance to Su Yu became more and more remote.

"Over a thousand cycles, and only moved forward more than a hundred years, that's not bad."

At this time, Su Yu, after over a thousand cycles, theoretically was more than twenty thousand years old.

But in his perception, not much time passed, and he felt his mentality was still very young.

This time in the time loop is very peculiar, Su Yu didn't know how to compute it.

It shouldn't be directly equivalent to real passage of time.

Moreover, the speed of the [now] time point moving forward and the corresponding relationship of loop times were also sometimes fast, sometimes slow, with no pattern.

Sometimes, with one loop, [now] moved forward several years.

Sometimes, with one loop, [now] passed less than a second.

Su Yu also tried to study its rules, but failed.

Perhaps this also reflects the chaotic nature of Subspace, a rule that there are no rules.

So Su Yu gave up studying, and seized the time to research his Time Mechanic.

After one thousand one hundred and fifty-six cycles of history, and [now] moved forward one hundred and five years, Su Yu knew he couldn't wait any longer.

Because, Su Yu was about to lose his sense of the [now] time point.

[Now] had moved more than a hundred years forward, enough distant from Su Yu.

If completely lost the sense of [now], he would be utterly lost in these twenty years of history and could never be liberated until he completely became a part of history.

Thus, Su Yu needed to start the experiment!

This experiment could only succeed, not fail.

Because he wanted to conduct a physical travel, not a consciousness travel.

According to Su Yu's research, to achieve physical travel, he needed to first destroy his own body, then condense it in the [future].

It's equivalent to dying first, then resurrecting.

This matter posed great risk for Su Yu.

Because dying represented having no future, meaning he cut off part of his twenty-year history.

For instance, if Su Yu died in the tenth year, but the experiment failed, didn't successfully travel to the future.

His twenty-year history loop would only have ten years left, the remaining ten years were abandoned by himself.

Because he died in the tenth year, where would the remaining ten years be?

Moreover, because he lost ten years of history, the distance to [now] became more remote, likely losing the sense of the [now] time point directly.

In fact, Su Yu had gone through multiple experiments in the past, dying many times.

However, all were experiments carried out at nodes relatively close to [now].

Though none succeeded, the lost history was only several seconds, so it wasn't too serious.

But this time, Su Yu wanted to cut off a whole ten years of time at once!

Because in the tenth year, the fluctuations of planetary energy were the greatest, the most suitable for his experiment!

If not successful, losing this ten-year history would almost certainly be fatal!

Yet, Su Yu had no retreat left, he could only give it his all!

The one thousand one hundred and fifty-seventh cycle, the tenth year!

Su Yu again established 30 Energy Towers on the surface.

These 30 Energy Towers, after thousands of cycles of improvement, had undergone earth-shaking changes.

Each was incredibly precise, with various intricate parts, chips, and pipelines densely covering the tower body.

Though complex, there was no chaos at all, instead, there was an infinitely harmonious and precise mechanical aesthetic, which could be called a peerless artwork.

Even all 30 Energy Towers were different, each with different styles and mechanical aesthetics.

This was the mechanical aesthetics accumulated by Su Yu over more than a thousand cycles.

Anyone with a basic sense of aesthetics would just need a glance, and would be captivated.

"If my experiment fails, these 30 Mechanical Energy Towers would remain on the planetary surface, serving as proof I once existed."

Su Yu admired his work, speaking to himself.

Beside him, Nuonuo sensed his mood, also sighed: "Master, rest assured, we will surely succeed! Nuonuo will always be with you! (∇)"

Nuonuo didn't have the ability for time travel, in reality, it didn't go through these over a thousand cycles with Su Yu.

In its perspective, there was always only this one time.

But Su Yu had told it everything, it knew what to face this time.

It went through the experiment entirely, so just like Su Yu, it had no future, if Su Yu's experiment failed, it would disappear completely with Su Yu!

However, it always remained optimistic, not losing heart, instead cheering Su Yu up.

Upon seeing this, Su Yu smiled slightly, patted Nuonuo's round body, then said: "Go ahead."

"Yes! Master!"

Nuonuo immediately activated its ability, its body divided into 30, merging into the thirty Energy Towers, reinforcing them all to the Fourth Rank level.

"Mas... Master! Hell's Intelligence will also always be with you..."

The previous Fear Intelligence, after experiencing the Manifestation Space incident, had ascended to Hell's Intelligence, mastering the Power of Hellish Suffering.

Though it still retained a timid character.

Upon hearing Su Yu might disappear, its tone trembled slightly, but still gathered courage to comfort Su Yu.

Su Yu smiled slightly, shook his head, and gently comforted it with a few words.

Once Su Yu disappeared completely, his Giant God Soldier Mecha, Nuonuo, Hell's Intelligence, Brutal Battle Armor, these belongings would surely disappear.

They also were a part of Su Yu's history, having previously followed Su Yu to travel through time and change history, ending up divided into countless ones.

Subspace "Receiving the Bill" would not spare them.

As for the Mechanical City, Mechanical Spirits far in another space-time, Su Yu wasn't sure what would happen to them.

Su Yu himself was hard-pressed, couldn't care about so much at the moment.

After arranging everything, Su Yu sunk into the Earth Core, quietly waiting, waiting for the planetary energy to reach its peak, that will be the moment when Su Yu's experiment begins.

As for the Galaxy Warriors, Su Yu also made arrangements.

He created a mechanical avatar, resembling him exactly, staying in an underground hollow Sanctuary, "performing" history.

Su Yu had surpassed history, even if he changed the past, it wouldn't split into new historical timelines.

The Galaxy Warriors, however, didn't possess such abilities.

If Su Yu didn't care about them and changed the history of these Galaxy Warriors at will.

These Galaxy Warriors would definitely split into countless historical timelines.

They're not Su Yu, this would be a sure-death, perhaps not even knowing how they died.

This is also the terrifying aspect of Power of Time, returning to change past history and kill, simply a defense without a strategy.

Thus, although Su Yu had changed his own history thoroughly, in front of the Galaxy Warriors, Su Yu always used the mechanical avatar to fool them, performing history.

Letting these Galaxy Warriors follow the original historical trajectory.

This mechanical avatar would keep acting until the twenty-year historical loop ended.

In the eyes of the Galaxy Warriors, when the twenty years ended, Su Yu began experimenting, then disappeared, everything was just as in the original history.

While Su Yu was pondering these, he suddenly sensed the information from the Energy Tower, indicating the planetary energy fluctuation reached its peak! It's time to start the experiment!

"Let's begin!"

Chapter 789: Inauguration, Time Mechanic!

With Su Yu's thought-driven command, all 30 Mechanical Energy Towers on the planet's surface simultaneously activated, beginning to resonate with the planet's energy at a specific frequency.

In a short time, a violent energy storm swept across the entire planet, making it glow brilliantly.

However, this intense energy storm came quickly and went just as fast.

It only erupted for a moment before dissipating without leaving any trace, not even having enough time to cause any damage to the surface.

However, the intense energy storm didn't truly disappear; instead, it was guided by those 30 Energy Towers, burrowing into the Earth Core, striking Su Yu directly.

If a powerful being had the ability to see through the planet, they would see 30 beams of energy racing rapidly underground, finally converging at the Earth Core!

In the Earth Core Magma, Su Yu's eyes abruptly widened, his Spiritual Energy pushed to the limit, thinking to himself: Come on!

Boom!

beams of energy simultaneously struck Su Yu, guided with precise calculations, leaving almost no margin for error in angle or timing.

These energy beams, originating from the planet, were extremely formidable and specifically modulated by Su Yu to a frequency that didn't harm the Earth Core's magma; all the energy directly bombarded Su Yu!

Yet Su Yu's entire Spiritual Energy, fully exerted, was not for defense at all.

On the contrary, he used his Spiritual Energy to weaken his own defenses!

At that moment, Su Yu, under his own "effort," was unprecedentedly weak.

Then, he was struck by 30 energies of the planet.

Thus, Su Yu died! His body was completely obliterated by the planet's energy! Not just cells, even molecules were shattered, turning into the universe's invisible and immeasurable Basic Particles.

His spirit was also crushed by this violent energy.

However, Su Yu's will spanned 20 years of history.

Dying at this point in time didn't affect earlier time points.

His consciousness was immediately poised to be reborn at a previous time point.

Yet, just as Su Yu's will was about to return to a previous time point to start the next historical loop,

he couldn't sense the previous time points anymore!

"Indeed, with my death, I've directly severed 10 years of history, making me 10 years farther from [now], too far to restart the loop!"

Su Yu's will pondered in a nebulous place.

At this time, he was unable to restart the loop, his consciousness adrift, and he himself didn't know where he was now.

This unclear place couldn't sustain his survival.

In a few moments, his consciousness would dissipate, resulting in complete death!

The shadow of death loomed over Su Yu's mind, with all sorts of memories and illusions surging forth!

The memories of his life, the thousand cycles, flashed through his consciousness in an instant!

"Is this really dying, seeing flashes of my life before my eyes!"

Su Yu had already conceded to the thought of dying.

Never before had Su Yu been so close to death!

Yet, facing such dire straits, Su Yu was not afraid but rather rejoiced.

Because this was what he had designed!

At this moment, Su Yu was situated in past history, yet unable to sense past time nodes.

He himself was somewhat confused about where exactly he was.

Although he would soon die, he was almost detached from the timeline and history itself because of it!

This bizarre state was just as calculated by Su Yu.

So Su Yu was overjoyed.

At this moment, Su Yu's will, stimulated by the brink of death, magnified his thought processes and senses to the maximum.

Utilizing this near-death clarity, Su Yu concentrated his will, ignoring those deathbed hallucinations, and focused all his efforts on sensing.

He was sensing the future!

According to his calculations, due to the prior experiment, the intense planetary energy erupting now would resonate with another planetary energy eruption 115 years in the future!

If he could use this resonance to sense that future, he could project his will there! Achieve rebirth!

This was the most critical step, and according to Su Yu's calculations, a violent planetary energy fluctuation was bound to occur 115 years later.

If the calculation was correct, he would live.

If wrong, he would die!

Su Yu's consciousness spun rapidly.

At this moment, he was outside the history, without true time, but with psychological time.

In his heart, this instant of sensing seemed to last ten lifetimes, far more than even a thousand cycles' fraction!

Just as Su Yu's will began to weaken, with the near-death clarity fading, his heart suddenly moved!

"Sensed it!"

Su Yu was immediately thrilled, without a moment to spare, quickly projecting his will forward.

In an instant, his will traversed a spacetime distance ordinary Transcendents could never cross.

years later! On this planet's dark surface, suddenly great light erupted! A terrifying energy storm emerged from nowhere!

The storm vanished in an instant, leaving only a massive beam of light descending from the sky, crashing onto the icefield!

The light dispersed, and a magnificent figure slowly rose on the planet's dark surface, like a deity!

"Finally... I'm alive again!"

At this moment, Su Yu was in the state of Sunshine Transformation, clad in Hell Mecha, radiating brilliance.

Terrifying waves of energy spread outward, like a miniature star falling onto the planet's surface.

Su Yu's heart was filled with immense joy.

His experiment was a success! He had truly traversed to 115 years into the future!

To be precise, he had traversed to 125 years after arriving on this planet!

Chapter 790: Inauguration, Time Mechanic!_2

In the tenth year of Su Yu's experiments in history, he crossed over one hundred and fifteen years.

The earlier experiment completely obliterated his body and spirit, yet it wasn't true destruction. Instead, through the resonance of time and space, they were sent to the future! And here they condensed!

All his efforts were not in vain. With a desperate gamble, he truly succeeded!

Perhaps it was because Su Yu had pushed his will to the limit before, that when he descended this time, he was in his strongest state. His instinct was to face death in his strongest form and to conquer death!

"Su... Lord Su Yu!?"

At this moment, not far away, ten Galaxy Warriors, along with some inhabitants of the Underground Shelter, all stared in awe at Su Yu, who suddenly descended like a deity!

They were conducting some survey work on the planet's surface, but they did not expect that Lord Su Yu, who disappeared without a trace a hundred years ago in an experiment, would suddenly appear!

Seeing Su Yu's magnificent figure stunned them all, and only after a long pause did their hearts fill with joy.

"Lord Su Yu has appeared; we are saved!"

Su Yu's majestic figure slightly turned to glance at them.

Su Yu naturally noticed them, and his descent beside them was no coincidence but rather a deliberately calculated result by him.

Otherwise, with such a vast planet surface, how could Su Yu descend here by chance?

"You all..."

Su Yu looked at them and began speaking like thunder.

But just as he spoke two words, he was interrupted.

[You have gained 10,000,000 Professional Experience (Giant God Soldier Mechanic Lv max!)]

[Mechanical Descent is synchronously improved...]

[Based on your max-level Core Ability (Mechanical Descent), you have gained a Core Specialization (Mechanical Divine Realm)]

[Core Specialization: Divine Kingdom Prototype of the Mechanical Divine Realm]

[Description: The Giant God Soldier Mechanic pushes their abilities to the limit, capable of opening up a prototype of the Mechanical Divine Realm in subspace. You can usher mechanical believers into the Divine Realm, establish a mechanical civilization, and collect mechanical faith to provide yourself with power! The more mechanical believers, the stronger your power, and the faster your cultivation. Mechanical believers in the Mechanical Divine Realm can descend into the material world according to your will at any time. The mechanical kingdom descending into reality will significantly amplify your mechanical creations' power while greatly weakening the opposing mechanical creations' power. As the number of mechanical believers increases, the prototype of the Mechanical Divine Realm will continuously strengthen until it develops into a true Divine Kingdom...]

It was a prompt from the Profession Panel!

Just after completing the experiment and arriving in the "future," Su Yu's Giant God Soldier Mechanic instantly reached max level and unlocked the Core Specialization ability!

The original Mechanical Descent ability transformed directly into the Divine Kingdom Prototype of the Mechanical Divine Realm!

Su Yu's Giant God Soldier Mechanic could only draw power from a small number of mechanical creations like the Giant God Soldier Mecha.

Now, with this Divine Kingdom, it seems any mechanical creation can be introduced to the Divine Realm to become mechanical believers, providing him with a continuous supply of energy and experience!

Moreover, this Divine Kingdom prototype can also be used for combat.

Su Yu's Mechanical Descent ability was merely a "one-click wardrobe change" ability.

It allowed him to don the Giant God Soldier Mecha more conveniently and swiftly.

The Giant God Soldier Mecha is enormous; carrying and wearing it is cumbersome. This ability is very practical, but besides that, it provides almost no combat power enhancement.

The combat strength of the Giant God Soldier Mechanic lies in the Giant God Soldier Mecha he crafts; if the mech is strong, the combat power is strong.

The body's combat capability is very mediocre.

But now, after this ability evolved, it greatly enhanced, turning directly into a Divine Kingdom Prototype.

According to the description, this Divine Kingdom Prototype can greatly amplify the strength of one's mechanical creations while significantly weakening the enemy's mechanical power. For the Profession Panel to use the term "greatly," the enhancement and weakening must not be trivial!

Moreover, not only can he "descend" a single mech, but it seems all mechanical believers within the Divine Kingdom Prototype can instantly descend!

Although Su Yu's Manifestation Mechanic ability could also take out mechanical creations inside instantly, this Mechanical Divine Realm Prototype holds a unique mystery, completely different from the Manifestation Space.

The Divine Kingdom Prototype's descent is extremely fast, at least much faster than the current third-rank Manifestation Mechanic.

And it can specify locations, unlike the Manifestation Mechanic's retrieval, requiring objects to be taken out from the "door."

The Divine Kingdom Prototype truly descends out of thin air.

Furthermore, this Mechanical Divine Kingdom Prototype's descent, much like previously descending the Giant God Soldier Mecha, seems it can descend onto others, allowing armor and mecha to be worn swiftly.

Quick wearing is one thing, but it can even directly "descend" into others, transforming them into temporary semi-mechanical lifeforms!

Moreover, once transformed, they can be reverted! After descending, they can still return to flesh and blood.

If entering combat, with a single thought, Su Yu could transform nearly a million of his subordinates into semi-mechanical lifeforms.

Afterward, he could restore them to their original state without affecting their physical structure.

The wondrous aspects of this reflect the core specialization capability of a fourth-rank profession!

Su Yu even suspected that the original Giant God Soldier Mechanic did not inherit such a miraculous, powerful core specialization.

His Giant God Soldier Mechanic profession was unlocked by the Profession Panel, lightly fused with things like the Evil God Origin, resulting in mutation.

However, there was no time for Su Yu to ponder carefully, as the Profession Panel notifications continued to pop up.

This time, a new profession was unlocked!

[Available Profession Direction: Fourth-Rank Profession·Time Mechanic]

[Giant God Soldier Mechanic (Primary)]

[Introduction: A Spiritual Energy profession developed by Su Yu himself, capable of creating a time machine, traversing time and space, altering the past, and determining the future!]

[Profession Ceremony: Build an incomplete time machine, achieve strong enough time and space traversal, and survive (completed)]

It was Su Yu's self-created Time Mechanic, recognized by the Profession Panel, directly unlocked!

Moreover, the ceremony was completed!

[Time Mechanic Ceremony completed, do you wish to take up the profession?]

The Profession Panel popped up with a notification to inquire.

Su Yu naturally wouldn't hesitate: "Accept the profession!"

Boom!

[Profession successfully accepted!]

[Congratulations to the Host for successfully taking up the profession; current profession: Time Mechanic (lv1: 0/100000).]

[Congratulations to the Host for successfully awakening the core ability: Power of Time]

[Power of Time: (lv1) As a Time Mechanic, you have mastered the Power of Time through time traversal! This power allows you to traverse time and space, alter the past, and determine the future. Even without a time machine, traversal can still be achieved. Note! Without a time machine, traveling through time and space will subject you to time-space backlash, causing your fate to warp and leading to unpredictable outcomes. Using a time machine can mitigate time-space backlash, but there remains incalculable danger.]

With a directive in Su Yu's heart, he successfully became a Time Mechanic!

However, nothing changed with him inherently; there was no enhancement in Spiritual Energy.

The Profession Panel's evaluation of him remained at ten-star maximal.

This ten-star maximal is still due to his Giant God Soldier Mechanic having reached max level, not because of the Time Mechanic.

After taking the profession of Time Mechanic, it seems nothing changed, not even half an Energy Coin's worth in his energy increased.

But Su Yu could sense that within him, or rather not within but in a mystical place, there appeared a peculiar power.

This power was neither energy, data, matter, nor spirit; it was truly the Power of Time!

By utilizing this power, there was no need for a Mechanical Energy Tower or any resonance; he could directly traverse time and space!

This is the power of the Time Mechanic! A genuine Power of Time uniquely his own!

After all, this is an Extraordinary Profession. If it relied entirely on time machines, there would be no need for any ceremony; mastering the relevant knowledge would suffice—why would Su Yu go through such trouble?

Though as a Time Mechanic, he relies on mechanics to traverse time and space, it doesn't mean his essence lacks time-space traversal capability!

"Finally succeeded!"

Feeling the peculiar Power of Time, Su Yu was extremely delighted.

The power he pursued so ardently for so long was finally attained!
