

## Infinite 831

Chapter 831: After 178 Seconds, the Future Has Arrived! Prophecy—This Is How It Comes True!

At this moment, Su Yu's thoughts split into millions, merging into the consciousness of all the residents of the Mechanical City.

Moreover, the entire Mechanical City was crafted by his own hands.

Logically speaking, in this state, there shouldn't be any secret in this city that could escape Su Yu's notice.

However, Su Yu couldn't find any trace of the Mechanical God within the city.

This struck Su Yu as odd.

Su Yu had a lot of trust in the Mechanical God. Previously, in the Manifestation Space, he had been able to defeat [King] and ascend to the Fourth Rank, all with the help of the Mechanical God.

Even though this Mechanical God had fallen in ranks and only retained the strength of a Fourth Rank, he had thus broken through some racial limitations and mastered a peculiar kind of Spiritual Energy.

The true power of the Mechanical God couldn't be simply measured by the Fourth Rank.

So, a year ago, when Su Yu departed, he left the Mechanical God in the Mechanical City. With such a powerful figure holding the fort, Su Yu was at ease.

However, upon Su Yu's return as the Time Mechanic, the Mechanical God was nowhere to be found in the Mechanical City.

If the Mechanical God were still in the Mechanical City, it would have been difficult for the Ghost Emperor to easily use his spiritual power to influence the residents of the Mechanical City, leading to internal conflict.

After all, when the Ghost Emperor had infiltrated the Mechanical City back then, it was the Mechanical God's ability that had scanned him out.

Yet the Mechanical God was absent, allowing the Mechanical City to be eroded by the power of the Ghost Emperor.

This was not normal!

What was even more abnormal was...

"Why is it that I'm only remembering this now?"

Su Yu suddenly felt a chilling shock in his heart.

He realized that for such a long time, he had almost forgotten about the Mechanical God, ignoring the existence of this old friend.

Having experienced a thousand reincarnations in the Dark Space-Time — such a long period of time — it seemed he hadn't thought about the Mechanical God even once.

This was even more unusual.

Even ordinary people wouldn't be this forgetful, let alone a strong figure like Su Yu.

Unless, some power had modified his memory!

"The Vengeful Demon?"

When it came to formidable enemies in the realm of memory, the first entity Su Yu thought of was the Vengeful Demon. This entity's ability in the memory domain had left a deep impression on Su Yu.

However, it was evidently impossible to be the Vengeful Demon. Even if it revived on the spot, for Su Yu, it would only be a matter of a casual strike to kill it, and modifying Su Yu's memory would be even more impossible.

Su Yu's analysis concluded that the modification of his memory was very deep and very solid.

So solid that even after experiencing a thousand cycles, accounting for tens of thousands of years, and even after he had taken up the position of Time Mechanic, resulting in a qualitative change in his consciousness, it was only now starting to loosen, and he noticed something was amiss.

Even up to now, Su Yu only discovered something amiss but couldn't truly recall the truth.

This was terrifying.

Su Yu reviewed all possible culprits in his mind and finally concluded: "Eliminate all possibilities, and there is only one situation left..."

"The one who tampered with my memory... is myself!"

That's right!

It was Su Yu himself who tampered with his own memory.

Such deep memory modification was only possible with his own active cooperation.

As for what exactly Su Yu did to his memory and for what purpose, even he didn't know now.

After all, he had no memory of it.

"It seems, before I left, there were some arrangements even I wasn't aware of..."

Since returning to normal space-time, Su Yu had been engaged in battles one after another, with hardly any pause for breath.

He was now forced to the brink of life and death.

This situation was not what he desired.

But there was no choice — the powerful enemies were too fierce, leaving no time to breathe.

Now, to Su Yu's astonishment, he realized he seemed to have made prior arrangements!

It was unknown where the Mechanical God, this huge support, had been arranged, as it still hadn't appeared.

Realizing this fact, Su Yu felt considerably relieved; since there were arrangements, it was a good thing.

He became curious about what kind of plan he had devised, which was so mysterious.

Su Yu didn't think carefully about it.

The arrangement was clearly meant to be kept even from himself; if he thought it through, it would be useless.

So Su Yu emptied his mind, fully immersing his consciousness in the emotions and humanity of the millions of residents of the Mechanical City.

His humanity resonated with the emotions of these millions more firmly.

However, it was still not enough to resist the arrival of the Pain Evil God!

Su Yu could feel, as time progressed, the 178 seconds slowly ticking away, bringing the Pain Evil God ever closer.

He, who had transformed into a human-shaped black hole, was beginning to lose his human form, about to completely become a true black hole.

Then, he would become a true Pain Evil God, and possibly never be able to turn back into a human again!

Su Yu didn't act rashly; it was pointless to be urgent now, he could only wait.

He chose to trust in his own wisdom, to trust in the arrangements he had made in advance.

Remaining: 100 seconds...

Remaining: 50 seconds...

Remaining: 1 second!

seconds had reached the final juncture, with only 1 second remaining!

In the future, one second away, the battle between the Brutal Evil God and the Pain Evil God had reached its climax.

The blood-red star avatar of the Brutal Evil God shone with a scorching light, almost rivalling a fixed star, yet unable to illuminate the surrounding darkness.

The Pain Evil God, in the form of a black hole, emulated a true celestial black hole, using its immense gravity to continuously tear at the body of the Brutal Evil God. A large amount of bloody flesh material radiated a scorching red light, frantically orbiting around the Pain Evil God, eventually falling into the black hole.

On the surface, this resembled the astronomical phenomenon of a black hole devouring a fixed star in every way.

The blood-red star form of the Brutal Evil God had been torn to shreds by the gravity of the Pain Evil God.

Chapter 832: After 178 Seconds, the Future Has Arrived! Prophecy—This Is How It Comes True!

The black hole formed by the incarnation of the Pain Evil God seemed unharmed on the surface.

But it didn't know how many times it had refreshed its state using the Power of Time; the backlash must have accumulated to an extremely severe level.

The two Great Evil Gods were already mutually wounded and battered.

Yet, they fought more valiantly as the time node approached the [present], for both Evil Gods' powers were steadily increasing.

They awaited the last second to pass, at which point both Evil Gods would return to the [present] with their full strength to battle!

They both understood that this final second was crucial.

If they could defeat their opponent in this last second, they would achieve the ultimate victory; otherwise, once the time node reached the [present], defeating their opponent would become far more difficult.

Thus, in this last second, the two Evil Gods erupted with even more powerful and intense force than in the preceding hundred-plus seconds! They fought with mad ferocity!

Strangely enough, despite the intensity of the Evil Gods' battle, Zhang Chenfeng's Mechanical Council remained utterly silent.

In truth, there were no Mechanical Creations at all on this battlefield of the future.

They only existed in the [present], but in the [future], they had disappeared.

Otherwise, the two Evil Gods might have joined forces to first eliminate these Mechanical Creations.

But now, they had erased their own futures and could not bother with them.

Finally, the last second was about to pass!

In space, a faint black hole with a diameter of over three hundred kilometers was about to descend!

Meanwhile, the Brutal Evil God's body also began to show extensive damage and started to emit an incomparably blazing light.

This battlefield in the [future] where the two Evil Gods fought was about to overlap with the [present].

Su Yu felt an immensely powerful attraction coming from space,

compelling him to fly upwards involuntarily, to merge with the virtual image of that black hole and become the true Pain Evil God.

"It should be coming, right?"

Su Yu thought to himself, knowing that if he had made arrangements in advance, it should be activated now.

Sure enough, in the next instant, just as the God of Pain was about to descend, a surprising change occurred!

It was the Mechanical Council!

Though they didn't exist in the future battlefield, the time node had already returned to the [present], and they were naturally still floating calmly in the planet's orbit.

After observing coldly for so long, they finally launched an attack!

All kinds of heavy weapons fired simultaneously once more!

And as soon as these Mechanical Creations took action, they immediately drew the attention of the two Great Evil Gods!

They attacked the Mechanical Creations simultaneously, as if by unspoken agreement!

Clearly, the two Evil Gods were extremely wary of these Machines left by Zhang Chenfeng, seizing any opportunity to join forces and eliminate them!

Boom!

The attacks of the Mechanical Council members collided with those of the two Evil Gods.

In just an instant, these Mechanical Creations began to show signs of faltering.

After all, sealing away just one Brutal Evil God was already extremely challenging for them; with the addition of a Pain Evil God, how could they possibly win?

Their attacks were directly shattered, and in the blink of an eye, the brutal red luminosity and the dark gravity of the Pain Evil God had already invaded their machinery.

However, their goal had already been achieved.

Because their true target was not the two Great Evil Gods.

It was... the Mechanical City!

Boom!

Several members of the Mechanical Council took advantage of the chaos to unleash a barrage on the Mechanical City.

A planetary disintegration beam, a positive electron cannon, and two subspace deep-dive torpedoes simultaneously hit the Mechanical City!

The destructive power of these heavy weapons was immense.

Even though the Mechanical City was a powerful Fourth Rank Mechanical Creation at this moment, its defenses were instantly shattered, and it was directly reduced to ruins!

The entire population of the city simultaneously perished, without exception!

Su Yu was instantly stunned!

He had just immersed his mind in the thoughts and emotions of the millions in the Mechanical City, using it to stimulate his own humanity and resist the invasion of the God of Pain, waiting for "his" plan.

He had pre-modified his own memory, surely having made certain arrangements.

And yet, was this what he was waiting for?

People Su Yu knew and was familiar with.

Yang Lie, Tie Xin, Feng Tian, Huang Ying, Tie Long, Xie Yitian, Xiao Shengyin, the Mechanic descendants of the Manifestation Space... all of them perished in that instant!

Su Yu felt indescribable emotions in his heart.

The emotions and memories of those millions flashed through his mind.

Through previous emotional resonance, Su Yu had become extremely familiar with these millions, like old friends of many years.

And now, they all died in an instant!

At this moment, it seemed to Su Yu that he had died a million times, had witnessed a million of his old friends die.

When Su Yu came to his senses, he found himself already standing on the ruins, looking up at the sky and howling maniacally!

Beside him was a mountain of corpses and a sea of blood.

The blood-red earth was piled high with corpses.

Not far away, a wide expanse of ruins was all that remained of the Mechanical City.

In the sky were countless eyes of rotting flesh, writhing fleshy tendrils, twisted mechanical arms and gun barrels, and a sea of dead dark water...

On the blood-red earth stood only one person, Su Yu.

Su Yu stood on the blood-red earth, clad in tattered battle armor, shouting furiously at the twisted sky...

Without realizing it, he had disengaged from the human-shaped black hole state and the Sunshine Transformation, shedding the Giant God Soldier Mecha.

He stood wearing only the tattered Brutal Battle Armor, beside the mountain of corpses, looking up at the sky and roaring in rage.

"This is... the prophecy!"

Su Yu looked up at the sky, feeling this scene incredibly familiar.

It was the apocalyptic scene from the prophecy.

In the prophet Zhou Qing's prophecy, everyone would die except Su Yu!

It now seemed this was the moment!

Everyone was dead; only Su Yu was left!

"So, the doomsday in the prophecy wasn't half an hour later but just five minutes after this! It's right now!"

Su Yu felt the capriciousness of fate; he had never imagined the prophecy would come so quickly, in such a form.

Previously, Su Yu had been influenced by the Star Soul power of the Ghost Emperor, and upon observing the future of the Mechanical City, discovered that the apocalypse would arrive in half an hour, which left him in despair.

But he thought he was merely under mental influence, assuming there was still enough time.

Yet who could have guessed the true situation would be even faster!

Now, from when he returned near the Mechanical City, fought the Ghost Emperor, until the Brutal Evil God unsealing, and the Pain Evil God battling in the future for 178 seconds, only five minutes had passed!

In just five minutes, the apocalypse had already arrived!

Everyone was dead; only Su Yu was left!

Faster than the half-hour he anticipated!

Moreover, the source of the apocalypse was actually Zhang Chenfeng's Mechanical Creations, which suddenly attacked the Mechanical City, destroying it and killing everyone!

The prophecy, unexpectedly realized in such a way!

At this moment, another hidden piece of information descended from the sky.

Su Yu did not avoid it, allowing that information to flood into his body.

Suddenly, memories poured from the depths of his consciousness.

This memory was very old, seemingly sealed for a very long time...

"So, was this your plan?"

"Or rather, my plan, where I schemed to kill everyone?!"

Su Yu murmured softly.

...

One year and one month earlier.

At that time, Su Yu had just returned from the Manifestation Space, preparing for his battle with the Ghost Emperor.

On this day, Su Yu unexpectedly approached the Mechanical God.

"Mechanical God, can you construct the river of time now?"

Su Yu asked the Mechanical God with a grave expression.

The Mechanical God pondered for a moment and replied, "With a certain price, or with your help, it can be done."

Thus, Su Yu assisted the Mechanical God in constructing a small river of time within the Mechanical City.

This river of time covered a very small area, just a room, but despite its size, it was fully functional, with all past and future within the Mechanical God's grasp.

Su Yu specifically instructed the Mechanical God to make some adjustments to this river of time.

He had the Mechanical God build this river of time not to combat anyone but to prevent information leakage.

The target of prevention was Su Yu himself! His future self!

Su Yu, once the Mechanical God completed the river of time, solemnly said to Him, "I now suspect that the future Pain Evil God is myself!"

Chapter 833: A World-Shaking Scheme Even Su Yu Doesn't Know! Do You Want to Survive, My Future Self?!

The Mechanical God was taken aback upon hearing this from Su Yu, and couldn't help but exclaim, "What?"

Immediately, they realized that Su Yu wouldn't joke about something so serious.

So the Mechanical God asked, "Are you certain?"

Su Yu nodded, "Almost completely certain."

Su Yu did not disclose his source of information because he couldn't.

This source of information was related to his biggest secret: the Profession Panel!

After learning from the Rotten Meat Eyes that he was being watched by the Pain Evil God, Su Yu had suspected why the Pain Evil God was targeting him.

The most unique thing about him was the Profession Panel.

Su Yu immediately suspected that the Pain Evil God had discovered his Profession Panel and thus wanted to seize it.

However, when Su Yu inquired with the Profession Panel, it immediately prompted him:

[This panel has information counteraction function; anyone who knows about the panel's existence will be recorded.]

[Current record: Su Yu.]

[No current risk of leak]

[Note: Do not reveal the panel's existence to anyone, or it will attract unpredictable dangers!]

Su Yu was still the only one who knew about the Profession Panel's existence.

At that time, Su Yu was relieved.

But after returning to the Mechanical City for some time, Su Yu spent every day studying the knowledge he acquired in the Manifestation Space and researching the Time Mechanic when a bold idea suddenly emerged.

What if the Pain Evil God was actually himself, Su Yu?

Perhaps in some future possibility, Su Yu completely abandoned his humanity and became the Pain Evil God.

Then this Evil God Su Yu, crossing through time and space, influenced the current Su Yu, endowing him with the talent of the Pain Domain.

To catalyze the birth of this Great Evil God.

Calculating it this way, the Profession Panel hadn't leaked; only Su Yu himself knew.

This kind of thing seemed rather incredible.

But through the study of the Power of Time, Su Yu discovered this possibility could be true.

Moreover, most importantly, when Su Yu had this thought, suspecting he might be the Pain Evil God, his Power of Hellish Suffering surged sharply.

It seemed merely because of a thought, his talent in the Pain Domain surged once again!

This made Su Yu confident in his judgment that the Pain Evil God was very likely himself!

When he realized his identity, whether he wanted it or not, he was closer to the Pain Evil God.

Because he and the Pain Evil God were indeed the same person, just at different time points.

The Pain Evil God was a future possibility of Su Yu.

When Su Yu suspected he was the Pain Evil God, the probability of this future occurrence surged.

Because when Su Yu realized such a possibility, he would inevitably, in the face of a life-and-death crisis in the future, try to become the Pain Evil God to cope with the crisis.

This was dictated by his character, refusing to compromise and fighting to the death.

In future developments, that is indeed the case.

A mere suspicion drastically increased the probability of the Evil God's birth.

The Time Domain is indeed mysterious and indescribable.

Subsequently, Su Yu asked the Profession Panel again, but this time, the Profession Panel's response was the same as last time, saying there was no current risk of leak.

Still, only Su Yu knew of the panel's existence.

But Su Yu sensed something was off.

Although this Profession Panel is extremely advanced, it doesn't seem to have self-awareness.

Compared to flexible life, it's more akin to a fixed program, somewhat inflexible, possibly even less intelligent than Nuonuo.

This inflexibility is actually beneficial because Su Yu definitely didn't want another strong consciousness within his body.

But this inflexibility could also create loopholes.

For example, in the Profession Panel's records, only Su Yu knows of the panel's existence.

But is this "Su Yu" the current Su Yu or the future Su Yu?

Or does the Profession Panel consider past and future versions of Su Yu as the same entity?

If that's the case, that's a big problem!

There's another possibility, that the Profession Panel has no loopholes and knows the Pain Evil God is Su Yu himself.

But it can't reveal the truth to Su Yu.

Because merely suspecting it in his heart made his talent in the Pain Domain soar instantly.

If this matter were directly confirmed by the Profession Panel, perhaps Su Yu would immediately become a god, and the God of Pain would directly descend.

That would make things worse.

Anyway, now Su Yu merely suspects but without confirmation from the Profession Panel, it's not 100% certain.

This leaves room for maneuver.

No matter what, faced with this possibility, Su Yu must handle it cautiously!

So, Su Yu specially approached the Mechanical God, asking them to construct a small time flow.

Then, within the coverage of the time flow, he conveyed this information to the Mechanical God.

And when Su Yu spoke these words, he sensed his Hell Prototype tremble sharply.

Its intensity increased significantly.

It seemed that with just a word, his talent in the Pain Domain elevated once more!

Thus, Su Yu was more convinced of his own judgment.

The Mechanical God, after hearing this, remained silent for a moment, seemingly in thought, then solemnly said:

"In that case, even the time flow I constructed cannot block the gaze of the Pain Evil God."

The Mechanical God's words were based on evidence.

The "King" in the Manifestation Space at that time was influenced by the Pain Evil God right under the eyes of the Mechanical God, cultivating the Power of Pain.

Chapter 834: A World-Shaking Scheme Even Su Yu Doesn't Know! Do You Want to Survive, My Future Self?!

It seems that even the river of time of the Mechanical God cannot stop the God of Pain from gazing across time and space.

Upon hearing this, Su Yu couldn't help but his expression darken. In fact, he had long considered this possibility, but he had to give it a try.

Fortunately, the Mechanical God immediately added, "However, I have now acquired Spiritual Energy. The river of time I've constructed has some special features. It should be able to shield the perception of that Pain Evil God within a small range."

Su Yu breathed a sigh of relief upon hearing this.

This was within his expectations.

The Mechanical God had always been insulated from Spiritual Energy, but now that it had acquired some, especially the "elimination" type of special Spiritual Energy, there should be some changes.

Being able to shield the perception of the Pain Evil God is naturally a great thing.

"However, this is of no use."

"If you are indeed the Pain Evil God, no matter what we discuss here, He will eventually know in the future. This cannot be shielded."

"Unless you never leave this room for the rest of your life, I can keep helping you shield, but that would be meaningless."

The Mechanical God poured a bucket of cold water.

If Su Yu is indeed the future Pain Evil God, then he must also have Su Yu's memories and past experiences.

Everything about Su Yu could not be hidden from that Evil God.

Su Yu nodded upon hearing this, "Indeed, which is why it's best if..."

"I myself don't even know what I discussed with you in this room."

With that, Su Yu stretched out his hand and extracted a cluster of spiritual power from his own head.

Then, Su Yu took out the other Su Yu body that the Demon of Vengeance had forged using memory before its death.

The Demon of Vengeance had attempted to replace Su Yu, even using memory abilities to forge another Su Yu body.

This other body had been kept inside the Manifestation Space by Su Yu and hadn't been used for anything, but now it was useful.

Su Yu infused that cluster of spiritual power into the body forged by the Demon of Vengeance.

Instantly, the body became animated, initially a bit confused, but after a moment, it smiled and muttered, "I am Su Yu! I am also the future God of Pain!"

It was Su Yu using a portion of his own spiritual power, memory, and the additional body forged by the Demon of Vengeance to create a clone.

This clone possessed Su Yu's memories, thoughts, and even power.

However, this clone was Third Rank, not Fourth Rank.

After all, the Demon of Vengeance back then was only Third Rank and couldn't forge a Fourth Rank body.

After creating this clone, the original Su Yu's body moved, left the room directly, and distanced itself from the Mechanical God.

After distancing himself, he felt a bit bewildered, "What was I just doing? Oh right, researching the Time Mechanic! It involves the Power of Time, which is truly remarkable. It even muddled my spirit a bit."

"But it's also a good sign, indicating progress in research!"

Then, Su Yu returned to the laboratory to continue his research.

And in front of the Mechanical God, the newly created "Su Yu" smiled and said, "Let's continue."

The Mechanical God, caught off guard upon seeing this, applauded, "This should solve the problem!"

This was Su Yu's devised method: to split off another version of himself to discuss countermeasures with the Mechanical God.

This clone stayed with the Mechanical God, shielding the perception of the Pain Evil God.

Now, it remains to be seen what solutions this Su Yu can work out with the Mechanical God.

The original Su Yu, however, washed his hands of everything and even forgot about it entirely.

He couldn't afford to remember.

The more he pondered this matter, the closer he got to the Pain Evil God, almost like an unsolvable puzzle.

If Su Yu knew he was the Pain Evil God, he might have tried to become the Pain Evil God during grave crises in the Dark Space-Time, causing His early arrival.

Not thinking about it and forgetting it might delay the Pain Evil God's coming.

A while later, Su Yu went to Radiation Ghost City to duel with the Ghost Emperor.

Then, falling into an ambush, he traveled to the Dark Space-Time, experienced a thousand-time loops, succeeded in becoming a Time Mechanic, and returned.

Upon returning, there were continuous battles.

First, the Ghost Emperor, then the Brutal Evil God unsealed, and the Pain Evil God descended.

Until now, the members of the Mechanical Council launched a barrage, wiping out the entire Mechanical City's population in an instant, then airdropped that clone to merge with Su Yu's body.

Only then did Su Yu awaken.

It turns out, this was the plan he had discussed with the Mechanical God!

First, attune himself with the thoughts and emotions of millions of Mechanical City's people, then at the critical moment, kill them all instantly.

This was to maximize triggering Su Yu's humanity and separate him from the Pain Evil God!

Unbeknownst to them both, the Mechanical God and the clone Su Yu had also connected with Zhang Chenfeng's Mechanical Council, utilizing their heavy weapons for the final destruction and slaughter.

Perhaps the Mechanical Council members provided technical guidance, too.

After all, both Su Yu and the Mechanical God knew too little about Fifth Rank Evil Gods.

They couldn't fathom a way to stop the Pain Evil God's arrival.

The Mechanical Council, Zhang Chenfeng's direct lineage, had inherited technology from the millennia-old Human Empire and sealed the Brutal Evil God for millennia.

With their guidance, this plan had a glimmer of success.

As for why the Mechanical Council agreed to this plan, it was clear the threat of the Pain Evil God was too great, leaving them no choice but to concur.

Now it seems the plan succeeded!

Su Yu was no longer in the previous human-shaped black hole state and had returned to normal.

This plan even used the Prophet's prophecy, abiding by the law that it must come true!

The prophecy would inevitably come true, unable to be circumvented.

But it wasn't said it couldn't be manufactured intentionally.

Therefore, after discussions, the Su Yu clone, the Mechanical God, and the Mechanical Council decided to artificially create the prophesied future.

In the prophecy, everyone else died, only Su Yu stood on the blood-red earth.

At that time, Su Yu was a normal human figure, not the Pain Evil God!

Since everyone was fated to die in the prophecy, it was better to use their death to awaken Su Yu's humanity completely.

Thus, the plan genuinely succeeded!

The cost was... the lives of millions in the Mechanical City!

Su Yu looked at the sea of corpses and blood around him, overwhelmed with infinite grief and guilt.

These people were killed by him, as it turns out!

Su Yu knew it was a necessary price to pay.

He understood that by defeating strong enemies, there might be a chance to reverse time, change history, and resurrect everyone.

But he couldn't stop the grief and guilt.

Because Su Yu now needed these emotions, this intense humanity, to separate from the Pain Evil God!

At this moment, the sky above, with the black hole's phantom, brutal tentacles, the sea of silence, and sometimes-vaguely visible black hole, remained in a stupor.

It seemed they hadn't anticipated such a development!

Roar!

The first to respond was the Pain Evil God.

Since Su Yu's humanity fully awoke, separated from Him, then what would He become?

His black hole incarnation, already somewhat faint and unreal.

Now, His form was rapidly disappearing!

Su Yu fully unleashing humanity had reduced His potential of being born to an extreme minimum.

At this moment, He couldn't possibly descend at this time point, leaving Him unprecedentedly weak.

So He wanted to flee.

If He fled back to the future, there was still a chance!

Su Yu remained alive, with the potential to become the Pain Evil God!

However, while He wanted to flee, the Brutal Evil God was not willing to let Him escape!

The Brutal Evil God quickly reacted, letting out a wild roar, extending countless bloody tentacles toward the Pain Evil God!

Numerous bloody tentacles wrapped around the Pain Evil God's black hole incarnation, preventing Him from leaving the "now" and escaping to the future!

For the Brutal Evil God, a Fifth Rank Great Evil God in an extremely weak state was a "great supplement."

If He could devour it, He would recover from the millennium of decay caused by the seal and might even make further progress!

Not only the Brutal Evil God, but those unexpected waters of death above were also rushing toward the Pain Evil God!

Even those Minced Meat Eyes, which seemed to be the Pain Evil God's subordinates, now swarmed toward the Pain Evil God like hungry dogs, wanting a share of flesh!

The once invincible Pain Evil God seemed about to be completely devoured!

If He were devoured, it meant true death, marking Su Yu's future potential as completely vanished.

The Pain Evil God hadn't been truly born; if He died, it would truly be death, with no chance of resurrection!

Faced with this situation, Su Yu smirked coldly, secretly whispered to himself: "Want to survive, my future self?!"

Chapter 835: The Truth Behind the Final Plan! Evil God Soldiers... Mecha!

Su Yu didn't really voice this question.

It was just a thought that flashed deep within his mind.

But Su Yu knew he didn't need to say it out loud—just having the thought was enough for the other party to hear it.

Because the one Su Yu was directing his question to was the Pain Evil God, his future self.

The Pain Evil God is Su Yu's future, and under normal circumstances, all of Su Yu's thoughts would be known by Him.

However, now, through previous planning, Su Yu has used the special technology of the Mechanical Council, combined with intense humanity, to temporarily separate himself from the Pain Evil God.

So now, the Pain Evil God could only hear parts of Su Yu's inner voice.

Su Yu could choose to let Him hear; otherwise, He wouldn't be able to.

The very question was something Su Yu wanted Him to hear.

Su Yu only needed to slightly release the divine blockade when asking, and the Pain Evil God would naturally hear.

After Su Yu asked that question, he only waited for a moment before he heard a response in his heart: "What do you mean?"

This voice was his own, albeit colder and more ruthless.

The Pain Evil God is Su Yu, who has completely discarded his humanity; such a being has no human emotions and is cold beyond compare.

But no matter how cold He is, He still has the basic desire to survive—without it, the will to exist wouldn't persist, and self-destruction would have happened long ago.

That's why He responded to Su Yu's question; He wanted to live!

Su Yu rapidly analyzed the psychological state of the Pain Evil God, and a moment later, another thought flashed through his mind.

He transmitted the information carried by this thought to the Pain Evil God.

The Pain Evil God immediately received the information and responded: "You actually want to control me?"

That's right, the information Su Yu just transmitted was asking Him to cooperate with Su Yu's next actions.

If He accepts Su Yu's control, He can survive!

The Pain Evil God is a fifth-tier Great Evil God, and the plan Su Yu's clone and the Mechanical God devised was not merely to eliminate Him but to seize control of His power, to truly grasp this immensely powerful force!

This plan could be described as somewhat fanciful.

How could Su Yu, with a mere fourth-rank strength, control a fifth-tier Great Evil God?

But Su Yu's clone and the Mechanical God, in conjunction with the Mechanical Council, with the essence of the Mechanical God and technical support from the Mechanical Council, had a chance of success!

The Pain Evil God was silent for a moment. It's unknown if He was mocking Su Yu's arrogance or if He had no such emotion and was merely weighing the pros and cons.

Soon, He gave a response: "Okay!"

No questions, no doubts, just an answer.

The Pain Evil God did not ask how Su Yu would control Him, nor did He ask how He would survive after Su Yu took control.

Because at this moment, He was out of time.

The assault from the Brutal Evil God, the Sea of Desolation, and the Rotten Meat Eyes was too fierce.

A moment more of hesitation, and He would be utterly torn apart and devoured by those three entities!

So He agreed swiftly.

Receiving the response, Su Yu immediately looked up at the sky.

His gaze did not fall on the Pain Evil God being devoured but rather at those twisted, proliferating mechanical gun barrels under the erosion of the Power of Brutal; those were the remnants of the Mechanical Council left by Zhang Chenfeng!

With just a glance, those Mechanical Creations received the signal!

They fired again!

This time, their target was the Pain Evil God!

A physical projectile, long prepared, was launched at the Pain Evil God, hurtling towards Him at tens of thousands of times the speed of sound!

This projectile bore no Spiritual Energy fluctuations and was completely different from all previous attacks.

Roar!

The Brutal Evil God, the Sea of Desolation, and the Rotten Meat Eyes immediately reacted, intercepting this projectile.

Though eager to devour the Pain Evil God, they still remained very cautious of these Mechanical Creations left by Zhang Chenfeng.

So the moment these Mechanical Creations launched an attack, they spared no effort to intercept it with full force.

No matter what those Mechanical Creations aimed to do, they wouldn't allow it to succeed!

Thus, the projectile moving at tens of thousands of times the speed of sound was instantly smashed to pieces under their interception, shattered even to Basic Particles!

Not a trace of the projectile could get close to the Pain Evil God!

However, after the projectile was shattered, something resembling data yet not data, resembling energy yet not energy, suddenly shot out from it.

This new entity's speed was tens, hundreds, thousands of times faster than the original physical projectile, even surpassing light speed and physical laws.

This thing took almost no time to pass through the interception of the Brutal Evil God and His companions, striking the black hole form of the Pain Evil God's incarnation!

The efforts of Brutal and His companions to intercept proved utterly futile.

Then, this new entity quickly merged into the divine body of the Pain Evil God and disappeared.

Subsequently, the originally shattered black hole began to rapidly repair itself.

Meanwhile, this black hole with a diameter of over three hundred kilometers shrank and transformed at high speed.

In a short time, it took the form of a human-shaped black hole!

This human-shaped black hole was much smaller than the previous three-hundred-kilometer-diameter black hole, yet still massive, standing a thousand meters tall!

The current appearance was identical to the form Su Yu had been in when eroded by the Pain Evil God before, only larger.

Chapter 836: The Truth Behind the Final Plan! Evil God Soldiers... Mecha!

Then, this human-shaped black hole suddenly dropped, rushing toward Su Yu on the ground!

Roar!

The Brutal Evil Gods saw this and immediately realized something, launching a fierce attack again.

They simultaneously attacked both the human-shaped black hole and Su Yu's body!

If they couldn't divide the Pain Evil God, then they would destroy it!

As long as Su Yu's body is killed, the Pain Evil God would no longer have its origin power, and it would never be reborn.

At this moment, the Mechanical Council unleashed its power again, all the heavy weapons fired in unison.

Those terrifying heavy weapons, with planet-destroying momentum, launched the fiercest bombardment against the Brutal Evil Gods.

They seemed to overload all the weapons, completely disregarding any maintenance principles.

Even if some weapons couldn't withstand the load and self-destructed, it was worth it!

Thus, the Brutal Evil Gods were briefly stopped and couldn't attack Su Yu and the human-shaped black hole.

And within this short time, the human-shaped black hole had already fallen above Su Yu.

Without any hesitation, Su Yu jumped into it, fusing with it!

Buzz!

At the moment Su Yu leaped into the human-shaped black hole, the sky's fierce battling Brutal Evil God, the Dead Calm Waters, the Rotten Meat Eyes, and even the Mechanical Council all froze.

Then they all convulsed violently! Even issuing screams!

They all felt unprecedented, extreme pain!

Not only that, but the entire Ruins Star seemed to be twisting, convulsing, and screaming!

The whole Ruins Star was convulsing, in pain!

Seen from space, one could see the entire Ruins Star cracking open hundreds of kilometers wide, reaching to the Earth's core.

The entire planet seemed to be cracking, shattering!

It seemed the pain was too intense, making this planet unable to bear it.

This scene was dramatically stronger than when the Ghost Emperor rose to a pseudo-fifth rank!

Because this was the true sight caused by origin power upon the birth of a fifth-tier being!

The entire planet was wailing, welcoming the arrival of the God of Pain!

At this moment, the Pain Evil God truly descended!

No longer a phantom from the future, but a real, true fifth-tier Great Evil God!

Because it had truly fused with its body, Su Yu, with no more missing parts!

"This... is the Fifth Rank?"

"This... is the Fifth Rank!"

Two voices almost simultaneously echoed in Su Yu's heart!

One was Su Yu's own voice, full of humanity and emotion.

The other was incredibly cold, merely a statement with no emotional fluctuations.

These two voices were exactly the will of Su Yu, and the will of the Pain Evil God!

Under normal circumstances, if the Pain Evil God were birthed, it would completely devour the humane part of Su Yu, leaving only a divine Su Yu, becoming a truly terrifying Evil God.

But obviously, that was not the case now.

Su Yu had fused with the Pain Evil God at the moment, but he wasn't really devoured by it, instead retaining their individual self-awareness.

In fact, it was Su Yu's consciousness that took the lead!

Those voices just now were Su Yu's, ringing out first!

This meant the will of the Pain Evil God was suppressed by him.

This was simply inconceivable, clearly not Su Yu's power alone, but with external help!

That external help was... the Mechanical God!

The entity 'shell' launched by the Mechanical Council at the Pain Evil God earlier was actually the body of the Mechanical God, a fragmented spiral drill-shaped object.

The original body of the Mechanical God had long been shattered, and the body fired as a 'shell' was rebuilt with Su Yu's help.

That body also shattered under the Brutal Evil Gods' attack.

The thing drilling out of the Mechanical God's remains was naturally the Mechanical God's origin will.

The Mechanical God's tier was extremely high, perhaps even higher than the Brutal Evil Gods.

Though incomplete, relying on its nature, it easily broke through the Brutal Evil Gods' interception and successfully blasted its own will into the black hole that was the embodiment of the Pain Evil God.

Once the Mechanical God merged into the Pain Evil God's embodiment, it immediately employed its essence as well as techniques developed by the Mechanical Council, mechanically transforming the Pain Evil God!

Yes, mechanical transformation!

This mechanical transformation wasn't any conventional mechanical technology but utilized the essence of the Mechanical God.

The Mechanical God previously slumbered at the Earth's core of the Metallic Planet, and merely by its overflowing origin power, it created an entire planet of Mechanical Life, spawning a mighty Mechanical Empire.

Earlier, the Mechanical God exerted this essence to the extreme, forcibly mechanizing the Pain Evil God!

No matter if the Pain Evil God looked like a black hole, it was forcefully mechanized all the same!

The Pain Evil God understood the Mechanical God's intent as soon as it made contact.

Yet, it did not resist, instead cooperating actively.

For it was very rational and knew this was its only chance to survive.

On some level, it was Su Yu, possessing intelligence as great or even surpassing Su Yu's.

Hence the Pain Evil God wouldn't pose any hindrance at such a critical moment.

In such a short period, with the Pain Evil God's cooperation, it was transformed into...

A Giant God Soldier Mecha!

Indeed, the Pain Evil God was no longer an independent Evil God, but a Giant God Soldier Mecha!

Or more precisely, an 'Evil God Soldier Mecha'!

Thus, the Pain Evil transformed into the form of a human-shaped black hole.

This also involved Su Yu's clone.

That clone had not returned, but remained at that instant, launched into the Pain Evil God by the Mechanical God.

That clone was part of Su Yu, likewise part of the Pain Evil God.

Su Yu, as the Giant God Soldier mechanical body, having its participation enabled the Mechanical God to transform the Pain Evil God into a Giant God Soldier Mecha.

A Giant God Soldier Mecha belonging to Su Yu!

After completing the transformation of the Pain Evil God, the Mechanical God consumed too much and fell into slumber.

Previously badly injured, it slumbered at the planet core for countless millennia.

This slumber lacked even a body; who knows when or if it would awaken again?

However, even in slumber, its origin is firmly fixed at the Pain Evil God's core, suppressing it.

This 'Evil God Soldier Mecha' transformed from the Pain Evil God at this time, like Nuonuo, the Mechanical Spirit, and other Mechanical Apostles personally crafted by Su Yu, under Su Yu's control, held in check by him.

No matter if the Pain Evil God was much stronger than Su Yu, it couldn't resist such control.

Otherwise, wouldn't the enormous price paid be in vain?

Of course, the fact that this mecha is far stronger than Su Yu, the owner, is not a good thing; it undoubtedly waits for a chance to disastrously retaliate against its owner.

Even if Su Yu uses it, he faces a great risk of being eroded and contaminated by it.

Yet, any risk, when compared to the mighty power at the Fifth Rank level, is worth it!

This was the plan Su Yu's clone, the Mechanical God, and the Mechanical Council came up with after an entire year of discussion.

Also known as the Mechanical Council's so-called "ultimate plan"!

This plan has now been fully accomplished!

Successfully capturing the Pain Evil God, the Fifth-tier Great Evil God from the future, and transforming it into an Evil God Soldier Mecha!

Su Yu truly possessed the power of the Fifth Rank!

And the price was the annihilation of the Mechanical City!

The Mechanical God's body was destroyed again, its will fell asleep, possibly for tens of thousands or even millions of years before reawakening.

"Mechanical God..."

Su Yu felt the dormant Mechanical God within the Evil God Soldier Mecha, heart heavy with pain.

This friend paid too great a price for this plan.

However, the emotions in Su Yu's heart only lingered for a moment, for he had no time to delay!

Then, Su Yu sharply raised his head, gazing at those twisted tentacles, the Dead Calm Waters, and the Rotten Meat Eyes that were writhing in pain in the sky.

Boundless killing intent surged from his heart!

Now, it's his turn to make a move!

Chapter 837: Giant God Shatters the Kong, Star-Destroying Fist!

[Evil God Soldier Mecha]

[Creator: Su Yu-Mechanical God]

[Grade: Sovereign Level!]

[Trait 1: Giant God (As a Giant God Soldier Mecha, it possesses the universal capabilities of a Giant God Soldier Mecha, boasting extremely high defense and attack power. Additionally, it has been transformed from the complete Divine Body of a Fifth Rank Evil God, elevating its power to a Planet-Level strength, capable of destroying an entire planet when fully exerted!)]

[Trait 2: Hell (This mecha is crafted using the complete Divine Body of the Pain Evil God, granting it infinite Power of Hellish Suffering and energy that never depletes. Every attack comes with pain damage that surpasses the limits of living beings' endurance, providing formidable additional lethality against

any rational enemy. Even creatures or Mechanical Creations devoid of any intelligence, and even planets, would be affected by the Power of Hellish Suffering, experiencing immense pain! All pain from living, non-living entities will empower the Evil God Soldier Mecha! It can also absorb and seal other life forms into the mecha to enhance its power. Sealing Rank: Fifth Rank!]

[Trait 3: Time (This mecha is crafted using the complete Divine Body of the Pain Evil God, who is a Fifth Rank Evil God in both the domains of pain and time, granting the mecha Fifth Rank Power of Time. It can use the Power of Time to travel through time, alter the past, modify the present, and determine the future! Concurrently, the mecha's Power of Hellish Suffering also incorporates time attack effects, whereby anything eroded by the Hellish Suffering empowered by the Power of Time will have its past and future affected, with its past, present, and future eternally sealed in Hell!) (Warning: Using the Power of Time accumulates temporal backlash, please use it cautiously)]

[Trait 4: Divinity (This mecha was transformed from the complete Pain Evil God, hence possessing the complete Fifth Rank Evil God essence: Spiritual Erosion, Faith Origin...etc. Warning! The Pain Evil God has not truly merged with Su Yu's body, leading to a flaw, lacking the true Evil God's Undying trait! If it is completely destroyed, it cannot resurrect in the depths of Subspace!)]

[Trait 5: Self-repair (This mecha has a self-repair function—if damaged, it uses the Power of Pain to mend itself, rapidly restoring without any material needed. Even if entirely destroyed, it can return by utilizing the Power of Time from the past and future. The body repaired using the Power of Pain will be stronger than before—the stronger the Power of Pain, the faster the repair, and the stronger the body after repair!)]

[Trait 6: Erosion (The mecha is crafted using the complete Divine Body of the Pain Evil God. This Evil God, too powerful, possesses will and power that erode all approaching living beings and materials, even its owner cannot avoid it. When using this mecha, if one does not harbor Fifth Rank power, they must strictly control the duration of use and adopt protective measures, otherwise, one risks erosion and losing their humanity.)]

[Trait 7: Planet-Level (This mecha is already powerful enough, its existence involves the essence of the universe, equating to the essence of a complete planet. Its Subspace projection is completely sealed, forming a real Spiritual Planet in the depths of Subspace where life can be nurtured! It will also attract certain entities from deep within Subspace to settle. The life nurtured will naturally regard it as a deity. The attracted entities will likewise, yet note, if the attracted life is too powerful, there is a chance of usurpation!)]

[Trait 8: Star Control (As a Fifth Rank being, this mecha can fully manipulate all planetary energies of a planet, thereby controlling all geological changes, moving mountains and filling seas, restructuring planets)]

[Trait 9: Fusion (As a mecha, its primary use remains in operation. It can be piloted by a Mechanic to fight, or it can fuse with the pilot to serve as their second body, perfectly controlled for even greater power. If the pilot abandons their mortal frame, they can completely merge with the mecha, becoming a powerful lifeform of Fifth Rank. However, due to the nature of the Evil God Soldier Mecha, if the pilot is not strong enough after fusion, they might lose themselves, becoming part of the Pain Evil God.)]

[Trait 10: Space Flight (As a Fifth-Rank level powerful mecha, the Evil God Soldier Mecha naturally possesses long-range leap functionality in Subspace, allowing for light-year-level space travel, usable as a spacecraft. Warning: Subspace is too chaotic, without specific navigation, avoid long-range leaps or unforeseeable mishaps may occur)]

[Trait 11: Intelligence (This mecha currently lacks intelligence, the original intelligence of the Pain Evil God is unable to control this mecha, hence it temporarily cannot autonomously battle. However, an intelligent module is reserved and can be installed at any time. If successful, it can autonomously fight, removing the need for pilot control. Note: According to Empire safety protocol, Fourth Rank or higher Mechanical Creations require strict safety verification for autonomous combat to prevent mechanical uprising.)]

[Trait 12: Self-destruct (At the core of this mecha lies the original source of the special mechanical lifeform 'Mechanical God'. If this mecha shows signs of severe backlash, it can be activated to initiate self-destruct.) (Warning: Once self-destruct is initiated, this mecha will be completely destroyed, losing potential future possibilities, consequences unknown.)]

Chapter 838: Giant God Pierces the Void, Star-Destroying Fist!

[Equipment:]

[Melee Weapon: None]

[Long-range Weapon: None]

[Skills: None]

[Comprehensive Lethality Assessment: Fourteen-star Top Level!]

[Comprehensive Defense Assessment: Fourteen-star Top Level!]

Before launching an attack, Su Yu first opened the Attribute Panel of the Evil God Soldier Mecha in the Profession Panel.

In this Attribute Panel, instead of the attributes of the mecha, it was better to say that the traits of the Pain Evil God were detailed to Su Yu.

After all, this mecha was completely transformed by this Evil God, and the mecha's abilities were essentially the Evil God's powers.

Su Yu's clone and Mechanical God, in that brief period of transformation, didn't have the time or capability to add any new traits to the mecha.

The so-called transformation mainly still involved controlling the Pain Evil God.

The extra traits added were just the basic strength and defense of the Giant God Soldier Mecha.

So most of the mecha's abilities were within Su Yu's expectations.

Having gone through so much, Su Yu had enough understanding of the fifth-tier strength.

The various abilities of the Pain Evil God did not exceed Su Yu's expectations.

Only a few details were different from what Su Yu had imagined.

However, the last "self-destruct" trait still surprised Su Yu a bit.

The Mechanical God, at the last moment, left Su Yu with an insurance policy.

If this Evil God Soldier Mecha wanted to retaliate, Su Yu could activate self-destruct and completely bury it!

The Mechanical God indeed handled things thoroughly.

The Pain Evil God now transformed into a mecha was not completely fused with Su Yu.

Its essence still belonged to a kind of future possibility, not real enough.

After all, Su Yu's main body was still fourth-tier.

It was just the Mechanical God's power and technology that forcibly fixed this future possibility.

If the Mechanical God reversed this power, it could bury the Pain Evil God, achieving self-destruction.

As a future possibility, once the Pain Evil God self-destructs, it would no longer have the ability to resurrect, leading to complete death.

However, if this self-destruct method was used, would it also cause the Mechanical God's essence to self-destruct?

Su Yu instantly decided never to use this function until the most desperate moment.

Another surprise was the Profession Panel's classification of this Evil God Soldier Mecha's rank as [Sovereign Level].

Su Yu slightly inquired, and the Profession Panel explained this was a naming standard by the Human Empire back then for fifth-tier Mechanical Creations, meaning only those who reached the fifth-tier were qualified to lead an army and embark on intergalactic expeditions!

The Profession Panel also adopted this naming method.

Su Yu's mind worked extremely fast; analyzing this information didn't delay him at all.

Upon instantly embedding all the attributes of the Evil God Soldier Mecha into his mind, Su Yu, with a mere thought, activated this mecha.

Inside the mecha, various mechanical parts began to roar into operation.

The originally abstract black hole outline instantly became clear, with distinct edges and corners.

Although the structural details were still unclear, it was already apparent this was a gigantic machine, not a vaguely shaped human black hole.

The Mechanical God's transformation of the Pain Evil God was extremely thorough; this Evil God Soldier Mecha was entirely a Mechanical Creation.

All its functions were realized using mechanical components, and Su Yu, as a Mechanic, had no hindrance controlling it; it felt as if he had handcrafted it himself.

This made Su Yu inwardly marvel at the Mechanical God's exquisite transformation, capable of thoroughly converting the Pain Evil God into a Giant God Soldier Mecha, realizing all the Evil God's functions with mechanical components.

Under normal circumstances, to achieve a function with a Mechanical Creation, one must first understand its principles.

Then, according to these principles, design and manufacture the corresponding mechanical devices to realize the function.

Just like designing and manufacturing an Electromagnetic Cannon, one must first understand the principles of electromagnetic induction and all the materials science and weapons design and manufacturing technical knowledge to design and produce it.

But the Mechanical God's transformation of the Pain Evil God was precisely the opposite.

The Pain Evil God first had various powerful abilities, and the Mechanical God transformed it, allowing the Pain Evil God to naturally change its Divine Body according to these ability traits, "generating" various mechanical components capable of realizing these functions!

The various mechanical components of the Evil God Soldier Mecha were not designed at all.

They were [naturally generated] under the stimulation of the Mechanical God's essence.

As for why these mechanical components, once operational, could exert the Pain Evil God's abilities?

The principle behind this, perhaps even the Mechanical God himself, couldn't explain clearly.

Like a person, who can grow various organs and flesh upon being born.

But if asked to explain the principles of how these flesh and organs function and grow, how the heart beats, or how the brain calculates, they wouldn't know.

The Evil God Soldier Mecha is the same; it wasn't constructed but "grew".

The Mechanical God essentially allowed the Pain Evil God to be "reborn", obtaining a new body.

And this body is a mechanical one controlled by Su Yu!

If Su Yu had the time, he could study the mechanical components and gain new technologies from them.

But now, he didn't have the mood or time for that.

He merely silently pushed the output of the mecha to maximum power.

Then, filled with killing intent and anger, Su Yu rose to the sky, delivering a punch towards the Brutal Evil God, whose body convulsed from immense pain!

The Evil God Soldier Mecha had no weapons, but as a Giant God Soldier Mecha, it naturally possessed the universal ability of a Giant God Soldier Mecha: incredibly strong physical might!

This was a new trait the Pain Evil God gained after transformation!

With the fifth-tier power of the Pain Evil God, how ferociously could it propel the physical power of the Giant God Soldier Mecha?

Only to see a thousand-meter-tall humanoid mechanical black hole launch a punch towards the sky filled with blood and flesh tentacles.

This punch, powered by the fifth-tier Power of Pain as energy, was split, integrated, and enhanced by countless mechanical components within the Evil God Soldier Mecha before bursting out forcefully.

This strike had no embellishments, just pure kinetic energy.

But so powerful, it defies description!

In terms of the speed at the end of the fist, it almost reached light speed, displaying relativistic effects!

The relativistic mass of this punch was already approaching that of a small asteroid!

If this punch directly hit a planet's surface, it would be like an asteroid impact, enough to sink a continent in one blow.

It could even punch a hole in the planet, causing planetary damage and the extinction of all life forms!

Before this punch even hit, the front of the fist was already colliding with the air, triggering a violent nuclear fusion!

Roar!

Sensing danger, the Brutal Evil God finally recovered from its previous convulsions, immediately gathering power in an attempt to block Su Yu's attack.

However, it was too late!

In the next instant, a punch as fierce as an asteroid impact had already struck the body of the Brutal Evil God.

Directly lighting up a sun in the sky!

A true fusion sun!

In the extreme high temperature, the sky full of blood and flesh tentacles were instantly vaporized and evaporated!

The powerful energy formed a blazing white energy stream shooting straight into the universe!

Moreover, this punch not only possessed overwhelming kinetic energy but also carried with it the Power of Pain and the Power of Time!

The damage from this punch occurred not only in the [now]; the Brutal Evil God in all timelines, past, and future, were simultaneously struck! All felt an indescribable agony!

This made it involuntarily convulse once more.

And Su Yu tirelessly continued, punching like lightning, in an instant launching hundreds or thousands of punches.

Each punch contained force comparable to an asteroid impact, and in an instant, hundreds or thousands of punches; if they all hit, they might actually shatter a planet!

The power of the fifth-tier, capable of planet destruction, isn't just empty talk; it truly has such strength!

Of course, not all who reach the fifth-tier can shatter stars with their fists. It's the Giant God Soldier Mecha combined with the Pain Evil God's power that achieves such pure and ultimate brutality!

As long as Su Yu is willing now, he could completely destroy the Ruins Star!

Of course, he wouldn't do that; all those punches hit the body of the Brutal Evil God instead.

At this moment, the Brutal Evil God's body, enveloped with flesh tentacles wrapping around the Ruins Star, looked boundless and terrifyingly hopeless.

But in the face of Su Yu's exceptionally violent Star-Destroying Fists, it was rapidly obliterated!

Su Yu's punches targeted not only the Brutal Evil God but also didn't spare the dead sea water and rotten meat eyes nearby!

At this moment, he only wished to unleash his power freely, obliterating every bit of twisted and wicked existence, sparing none!

Chapter 839: Battle Over!

Buzz!

This is a sound that only Su Yu can hear.

It is the various mechanical parts of the Evil God Soldier Mecha operating at high speed.

Every time Su Yu throws a punch, every time he attacks the countless energy channels within the Evil God Soldier Mecha, he extracts massive amounts of the Power of Pain from the core Hell of Suffering.

This Power of Pain is a high-level fifth-tier Spiritual Energy.

Then, through the Evil God Soldier Mecha's core Spiritual Energy to Kinetic Energy conversion system, this immense energy can be converted into pure physical kinetic energy for attacks.

The power system of the Evil God Soldier Mecha is extremely advanced, and conventional mechanical gear transmissions, hydraulic transmissions, electromagnetic transmissions, etc., are basically unseen in the Evil God Soldier Mecha.

No matter how advanced those conventional transmission systems are, they have losses and their limits.

For instance, Su Yu's body is also powerful, but ultimately it is limited by the human physique.

The human body, even at the fourth rank, still relies on muscle contraction to move bones and exert force.

This method of force exertion, if excessive, will cause joint collapse.

Similarly, various transmission force structures in Mechanical Creations have their limitations.

It can never be as ferocious as the Evil God Soldier Mecha.

The Spiritual Energy to Kinetic Energy conversion system of the Evil God Soldier Mecha directly converts immensely powerful Spiritual Energy into equally immense physical kinetic energy, with almost no loss or delay.

How powerful is it when fifth-tier Pain Spirit Power is directly converted into pure physical kinetic energy?

Under Su Yu's fierce attack, the entire Ruins Star is filled with apocalyptic scenes of heaven and earth collapsing.

Previously, the sky was covered with blood-touch tentacles, dead sea water, and rotten meat eyes, which were already terrifying enough.

The brutal aura emanating from them had long caused all life on the planet, be it animal or plant, to either die directly or undergo terrifying mutations, with scarcely any survivors.

However, that influence only remained on the Spiritual Energy level and wasn't physical destruction.

Now, with Su Yu driving the Evil God Soldier Mecha, it's pure physical destructiveness.

Although Su Yu's target is Brutality, even a bit of energy spill can cause immense damage to the environment of the Ruins Star.

Mountains explode, seawater evaporates, sky crumbles, earth sinks, all life exterminated!

Anyway, Su Yu's Mechanical City has been completely wiped out, and apart from the Ghost Emperor's Radiation Ghost City, there are no humans left on the entire planet, so what scruples could Su Yu have?

He just has to keep throwing punches!

The design concept of the Giant God Soldier Mecha is to maximize physical destructiveness.

Especially the Evil God Soldier Mecha, transformed using the fifth-tier Pain Evil God as a basis, is incredibly powerful.

The Brutal Evil Gods can destroy planets, but definitely not as Su Yu does, relying solely on fists to smash a planet.

Before such ferocious power, even the Brutal Evil Gods find it hard to withstand.

The Pain Evil God hadn't yet fused with Su Yu and was still a phantom state, actually weaker than the Brutal Evil God, so it was overwhelmed and had to rely on the Power of Time to constantly refresh its state to barely maintain.

But now, although the Pain Evil God has been transformed into a mecha, it has also fused with Su Yu's body, causing its power to surge!

Moreover, with the added power of mechanical transformation, which further amplifies the Pain Evil God's power, it unexpectedly starts pressing Brutality back!

The Brutal Evil God tried to use tentacles to attack Su Yu, but they were instantly blown apart.

The dead sea water and rotten meat eyes were even worse, unable to come close at all.

They also attempted to use their spiritual power to erode Su Yu's spirit, but it was futile.

The Pain Evil God's resistance in the spiritual domain is tremendously strong; otherwise, it couldn't have mastered the powerful Pain Power without collapsing from its own agony.

So, it has strong resistance against the spiritual erosion of the Brutal Evil Gods.

Most importantly, the will controlling this mecha is Su Yu himself, while the one bearing the spiritual infection is the Pain Evil God, which takes all the spiritual damage.

This also showcases the defense capability of the mecha.

Before the mecha is completely destroyed or the Pain Evil God can no longer endure, no force can harm Su Yu inside the mecha.

Thus, only Su Yu is able to beat Brutality, while they cannot hit Su Yu.

This is the advantage of combat using Mechanical Creations.

So, in a short time, Brutality's body suffers severe injuries.

Although they are Subspace Evil Gods, they are not immune to physical attacks; as long as the force is strong enough, they can be smashed!

What's more, Su Yu's fists not only carry the Power of Pain and the Power of Time, which are more damaging to them than mere physical harm.

"Stop!"

As Su Yu continued to punch furiously, the Brutal Evil God suddenly spoke.

Since being unsealed, this Great Evil God has always sent out incomprehensible, brutal roars.

But now, it transmitted a message to Su Yu in human language, asking him to stop.

Su Yu snickered, realizing it could speak human language.

The prior brutal roars were pure arrogance, disdainful of communicating with a "lower" human like Su Yu.

But now, it must communicate.

If it continues like this, its body will be smashed by Su Yu.

And Su Yu is not only smashing their bodies but also using the Power of Hell's Pain to suppress the shattered Evil God's body into the Hell of Suffering, providing energy for the Evil God Soldier Mecha.

Chapter 840: Battle's End! (Part 2)

It's as if he's eating its flesh, drinking its blood.

This way, the more Su Yu fought, the stronger he became, while on the side of Brutal, the more they fought, the weaker they grew.

Although Su Yu's fierce combat fits the Origin of Brutal and would actually enhance its strength, the enhancement couldn't catch up with the depletion, making it not worth the loss for Brutal.

So Brutal finally couldn't bear it and initiated communication.

Though Brutal is fierce, it's adept at assessing the situation, far from being a mindless beast.

"What do you want to say?"

Su Yu casually replied.

Moreover, while speaking, Su Yu didn't cease his attack, instead becoming more ferocious!

"Human! Now that you possess Fifth Rank strength, there's no need to fight with Us."

"This planet is under seal, we can work together to break the seal and head to the cosmic starry sky."

The Brutal Evil God instantly transmitted this large chunk of information.

It actually wanted to cooperate with Su Yu to break the seal and head to the stars together.

"I'll crush you, then it's not too late to break the seal!"

Su Yu shouted fiercely.

He had no intention of compromising with the Evil God.

After speaking, Su Yu immediately erupted again, his strength increasing once more!

From the previous battle, Su Yu had become much more adept at controlling the Evil God Soldier Mecha, so he could push its capabilities further.

Giving his all, swearing to smash Brutal!

"Human!"

Brutal became furious at once.

The aggressive red light in its body surged, enveloping the entire Ruins Star.

The surface of Ruins Star began to melt under this intense light, the melted surface even writhing, as if transforming into some overwhelmingly brutal bizarre creature.

"Here it comes!"

Seeing this, Su Yu knew the Brutal Evil God had finally used Its big move.

He feared nothing, ready to test this being's strength.

Indeed, those extremely intense red lights gathered in the air, transforming into a thousand-meter-tall red giant.

Though twisted, it somewhat resembled a human shape, adorned with a chaotic Thousand-Handed Thousand-Eyed figure, displaying immense brutality.

Once formed, the bloody fleshy tendrils covering the sky withered, quickly fading into Nihility, as if drained of power.

The brutal essence capable of covering an entire planet was now extremely condensed into this giant, its strength unfathomable?

It seemed the Brutal Evil God intended to go all out against Su Yu!

"But, why is it a thousand meters again?"

Seeing the giant manifested by the Brutal Evil God, a question arose in Su Yu's mind.

The Radiant Mecha is a thousand meters tall, the Evil God Soldier Mecha is also a thousand meters tall, and now the Brutal Evil God, too, is a thousand meters.

When referencing the Radiant Mecha's blueprint, the transformation during the Evil God Soldier Mecha's reconstruction made sense at a thousand meters.

However, the Brutal Evil God could once wrap the entire Ruins Star with Its fleshy tendrils.

Once transforming into a humanoid form, it still retained the thousand-meter form.

Either it was deliberate, or there is... some intangible limitation that prevents It from enlarging further in humanoid form.

This thought flashed through Su Yu's mind and he put it aside.

Regardless of the limitation, what mattered now was battling the Brutal Evil God!

Su Yu controlled the Evil God Soldier Mecha, charging forward at high speed, delivering a fierce strike toward the Brutal Evil God!

A blow powerful enough to sink a continent, cleanse a biosphere, struck violently against the Brutal Evil God's body!

Boom!

A scorching fusion nuclear explosion erupted between Su Yu and the Brutal Evil God.

But Su Yu saw that this strike did not truly hammer the Brutal God's body; instead, it was blocked by Its dozens of arms!

The Brutal Evil God did not retreat a single step.

Then, thousands of twisted arms of Brutal simultaneously lashed toward Su Yu!

Su Yu responded by intercepting!

Boom!

The collision between the two sparked another fusion explosion!

Su Yu also remained unmoving.

They were evenly matched!

The power of each arm of the Brutal Evil God was actually less than that of the Evil God Soldier Mecha.

However, the combined force of thousands of arms was terrifyingly immense, capable of matching the physical strength of the Evil God Soldier Mecha!

Additionally, with each Brutal God's strike, the power augmented, intending to rip apart Su Yu's Evil God Soldier Mecha with overwhelming physical might!

Truly deserving the name of an Evil God defined by brutality, it was indeed fierce.

Yet, Su Yu was unmoved! He also drove the Evil God Soldier Mecha, standing firm against the shadow of Brutal.

Between them, fusion explosions occurred continuously, seemingly unending.

The nuclear fireball of fusion entirely enveloped both, obscuring any view of them, only the ever-expanding fusion fireball shining above Ruins Star.

Beneath, Ruins Star's surface melted into a sea of magma under the intense heat, with the magma sea evaporating, forming a vast circular depression.

This large crater spanned over a thousand kilometers in diameter, and continued to expand.

If Su Yu and the Brutal Evil God kept battling, the whole Ruins Star might end up evaporated, transforming into a gaseous planet!

The violent conflict heated the entire atmosphere, stirring up a global, violent, and terrifying high-temperature storm.

The planet's ecosystem was utterly destroyed.

Even below, the remnants of the Mechanical City, those millions of corpses, had been vaporized.

Only the core part of the Mechanical City barely survived, but wouldn't last long.

But Su Yu remained indifferent, considering it as cremation for those people.

Right now, Su Yu only aimed to explode the Thousand-Handed Thousand-Eyed giant before him!

Above, the stagnant seawater, the Rotten Meat Eyes, although not directly attacked, were still injured by the terrifying aftermath, yet they stayed to watch from afar.

Indeed, encased in the seal, they had nowhere to escape.

They simply spectated, hoping to gain an advantage from the battle's outcome.

Finally, when the fusion fireball in the sky expanded to a three-hundred-kilometer diameter, a change occurred.

"Brutal, you lost!"

It was Su Yu's voice!

Hearing this shout, the Rotten Meat Eyes and stagnant seawater were shocked, attempting to flee immediately, but it was too late.

A blazing red figure abruptly emerged from the fusion fireball.

It wasn't Su Yu but the Brutal Evil God! Its Thousand-Handed Thousand-Eyed form had been dismantled, with only a couple of hundred arms remaining.

A large hole was pierced through its chest, exposing chaotic, pulsating internal organs.

Apparently, it was no match for Su Yu's Evil God Soldier Mecha and suffered severe injuries.

However, such injuries didn't impede its actions; it rapidly approached the stagnant seawater and Rotten Meat Eyes, attacking without hesitation.

The stagnant seawater and Rotten Meat Eyes, caught off guard, were promptly torn apart.

Brutal greedily devoured the Divine Bodies of these two Evil Gods, swiftly recovering its injuries.

At this moment, Su Yu's figure emerged in pursuit.

The Evil God Soldier Mecha remained void-like in appearance, seemingly undamaged.

Seeing Su Yu coming, Brutal, without a word, tore open the space, slipping into Subspace and disappearing.

Only the remnants of the stagnant seawater and Rotten Meat Eyes were left behind.

Seeing this, Su Yu didn't pursue Brutal, instead attacking the Rotten Meat Eyes and stagnant seawater.

These two weren't as strong as the Brutal and Evil God Soldier Mecha; after successive attacks from two Fifth Rank forces, how could they resist?

The remaining stagnant seawater and Rotten Meat Eyes were thoroughly dismantled by Su Yu and suppressed into the Hell of Suffering.

With these two consumed, the various damages inside the Evil God Soldier Mecha began rapidly repairing.

The Evil God Soldier Mecha was actually heavily damaged in the recent battle; it just wasn't obvious due to its blackness.

Thus Su Yu didn't chase Brutal, opting to first settle the Rotten Meat Eyes and stagnant seawater to restore injuries.

After recovering, Su Yu glanced at the devastated Ruins Star, exhaling deeply: "The battle is over..."
