

Infinite 871

Chapter 871: Su Yu, Do You Think You're So Righteous?

Su Yu was astonished, his mind racing non-stop, rapidly pondering what this Nameless City was all about.

He quickly remembered something, something similar, and that was... the Galaxy Battle Armor!

Su Yu recalled the first time he encountered the Galaxy Battle Armor, that guy claimed to be from the "[Betrayal]" Legion, possessing the Power of Betrayal, yet was extremely loyal to the Empire, never betraying them.

Su Yu thought back then that this guy was full of nonsense.

Later, Su Yu learned that the power of the Betrayal Legion came from a powerful subspace entity called [Betrayal].

This entity was captured from the subspace by the Empire, processed through technological means, becoming the power source for this legion.

This entity named [Betrayal] was actually a powerful Subspace Evil God, whose original power was the Power of Betrayal.

But its power was two-sided, the opposite of betrayal is loyalty.

The Empire used technical means to stimulate the loyalty contained in the Power of Betrayal, making it the Origin Power of the Galaxy Battle Armor, which is the Power of Loyalty.

So the Galaxy Battle Armor was extremely loyal to the Empire, never betraying.

The reason Su Yu thought of this was because he suspected that the Nameless City, protected by the Brutal Evil God, may also be for this reason.

The Brutal Evil God, too, is a two-sided God.

It not only has a brutal, evil, and cruel side, but it also has a benevolent, generous side.

And this city is the manifestation of the Brutal Evil God's other side.

Just like a person of extreme evil might occasionally show mercy, this city is likely the Brutal's "goodwill".

If that's the case...

"Is this guy trying to turn over a new leaf?"

Su Yu muttered to himself, somewhat unable to accept it.

At this time, Su Yu heard a voice: "Su Yu...do you think you're very righteous?"

This voice came from the history Su Yu observed, deep and resonant like a male bass, very steady and imposing, seemingly possessing a divinity that embraces all.

Su Yu was stunned for a moment before realizing that this was the voice of the Brutal Evil God.

The Brutal Evil God is a Fifth Rank Great Evil God, although not adept at the Power of Time, it also has the power to see through the past and future.

Su Yu's observations in history had already alerted it, or rather, it had noticed Su Yu's historical observation from the beginning.

After all, the city was under Brutal's protection, Su Yu had observed the city for a thousand years, it is very normal for it to notice.

Thus, just as Su Yu voiced his musings, this Evil God spoke.

Realizing this fact, Su Yu laughed immediately.

Brutal, this guy even changed his voice.

From the sinister Evil God's Voice to this imposing male bass, what, really wants to be a righteous god?

Su Yu thought for a moment, then replied: "Brutal, what do you wish to express?"

Brutal did not answer directly but instead asked: "Su Yu, what do you think of this human city that believes in me?"

Su Yu did not hesitate, answering: "To be fair, this city is very decent."

Although Su Yu opposed Brutal, he had to admit, this city under Brutal's protection was indeed flawless.

Of course, there were still flaws; this city had developed for a thousand years but had no progress, always remaining this small in scale.

The technology and Spiritual Energy also hadn't developed much; compared to the Mechanical City now, it was nothing.

But compared to the Ruins Star before Su Yu's rise, it was much better.

In the past, only cities garrisoned by Seven-Star Powerhouses on the Ruins Star could compare with this city under Brutal's protection, even inferior.

Because cities with Seven-Star Powerhouses garrisoning them were likely to offend the blockade, getting annihilated by Mechanical Creations from the sky

After about a few hundred years, they would be completely wiped out.

Looking at it this way, this thousand-year city was indeed much better than all other cities on the Ruins Star before.

Upon hearing this, Brutal seemed satisfied, and then continued, "Such a city, as long as I wish, I can build ten, a hundred, a thousand."

"Under my protection, humans can live, propagate..."

Su Yu interrupted without letting it finish: "As long as you wish? So do you wish? How many such cities are there now? There aren't just this one, right?"

"Humans dead by your hands number in the tens of billions. Now you create a small city with a population of tens of thousands, you wouldn't want to tell me you're a Righteous God and not an Evil God?"

Su Yu's words carried sarcasm, but in his heart, he was pondering how Brutal, out of nowhere, didn't come with force, but wanted to philosophize with him, jabbering across history.

However, hearing Su Yu's sarcasm, Brutal seemed unfazed. Instead, it agreed: "That's right, I am indeed a Righteous God!"

"I protect humans, as the God of Brutal, Master of War, King of Darkness!"

Su Yu was dumbfounded, only feeling that Brutal was truly shameless.

But after all, the Brutal Evil God was not human, being shameless seemed normal too.

But Su Yu still feigned a slightly interested demeanor, asking: "Oh? I haven't heard of that..."

As Su Yu spoke, he was secretly using the Power of Time, tracing the source of Brutal's voice.

The Brutal Evil God's essence was hidden deep in subspace, very secluded, Su Yu had difficulty finding it.

Even in the timeline of past history, the Brutal Evil God could hide and disappear.

But now, as Brutal and Su Yu were communicating across time and space, this gave Su Yu an opportunity.

As long as he stalled for enough time, there was a chance to follow this voice and find Brutal's essence!

Chapter 872: Su Yu, Do You Think You're So Righteous? (Part 2)

Even if it was only to locate the Brutal Evil God within the historical timeline, Su Yu could use this to attack Him!

Whether in the past, present, or future, as long as Su Yu caught even a trace, He wouldn't easily escape!

In these four years, as Su Yu's mastery of the Evil God Soldier Mecha deepened, his use of Fifth-Order Time Power grew ever stronger.

This Evil God Soldier Mecha was originally Su Yu's future and essentially part of him.

He used the power of the mecha with unparalleled harmony, making swift progress.

This gave Su Yu great confidence when facing the Brutal Evil God, provided he could capture His trace.

Yet the Brutal Evil God seemed utterly oblivious to Su Yu's covert actions and continued, "Su Yu, do you know that I am, in fact, considered part of humanity!"

Hearing this, Su Yu was slightly taken aback and then said, "What kind of nonsense are you talking about?"

Meanwhile, he continued tracking the Brutal's position, getting closer and closer.

Brutal said, "My name is Brutality! I am a god born from human emotions, and essentially, I am part of humanity!"

Hearing this, Su Yu curiously asked, "You actually consider yourself part of humanity? How peculiar."

Brutal replied, "There is no distinction between gods and humans."

At this moment, his words seemed mysterious, but when considered, they seemed to hold some truth.

After thinking for a moment, Su Yu responded, "So you sheltered these humans, allowing them to build such a city?"

Brutal said, "As a god of humanity, it's only natural that I would shelter humans."

Hearing this, Su Yu sneered, "Those humans you killed wouldn't think so."

Brutal said, "Killing humans is also a form of protection."

Su Yu scoffed, "What kind of twisted logic is that?"

Brutal explained, "Since the Subspace Tide erupted, we gods awakened from the depths of subspace, signifying that humanity's previous path could no longer be followed."

"We gods, are the future!"

"Su Yu, you must have already realized this!"

Upon hearing this, Su Yu appeared thoughtful.

He felt that Brutal's words must be referencing the previous incident with the Mechanical Soul.

Since the Subspace Tide erupted, the inside of subspace became extremely chaotic, making it exceedingly difficult and life-threatening to ascend to Seven Stars.

However, the Mechanical Soul's advancement was almost effortless, with nearly a one hundred percent success rate.

Su Yu concluded that the Mechanical Soul was related to the Pain Evil God, and as a creation of the Evil God, it could adapt effortlessly in the chaotic subspace, easily advancing and achieving mass production of Third Rank.

This indicated that in such an environment, following the normal Extraordinary Path was challenging.

Yet the path of the Evil God Demon was very smooth.

What the Brutal Evil God meant by saying humanity's previous path could not be followed was referring to this.

The Brutal Evil God believed that their kind of evil gods were humanity's future!

Sitting back and thinking, it seemed to make some sense.

Seeing Su Yu pondering, the Brutal Evil God continued, "Su Yu, you rule over millions, attempting to build human civilization, but you're destined to fail!"

"The next eruption of the Subspace Tide is imminent. At that time, we gods will be even stronger, and the path of humanity will be completely severed."

"They will eventually face extinction!"

"Only through my protection can humanity survive this calamity and continue to exist in this universe!"

With this, the power of the Brutal Evil God fluctuated rapidly, ceasing to speak but transmitting many images instead.

In those images, Su Yu saw countless humans dying silently.

It was a vision of the future, one hundred years ahead during the eruption of the Subspace Tide.

At that time, the Ruins Star held billions of people, but in an instant, they were all wiped out!

Whether they were ordinary people or strong individuals of Third or Fourth Rank, none were spared.

The Brutal spoke again, his voice like thunder, "Su Yu, this future, you surely can see it too. How do you think these people died?"

At this moment, Su Yu's expression was unprecedentedly grave.

The future, a hundred years from now, was naturally something Su Yu could see. He could see human civilization being wiped out in an instant during the Subspace Tide eruption.

But Su Yu had always dismissed it, assuming it was when the Brutal Evil God launched a final battle.

Due to the unpredictable dangers of the time point a hundred years in the future, when the Subspace Tide erupted, Su Yu couldn't truly travel there to observe closely and could only speculate.

But now it seemed, that wasn't the case at all.

A hundred years from now, those humans didn't die by the Brutal's hand. It was the eruption of Subspace Spirit Power, and environmental changes that they couldn't adapt to that led to their extinction!

Realizing this, the situation was far more severe.

Su Yu pondered for a moment before asking, "So you're saying, with your protection, they can survive and not die?"

Brutal said, "Of course!"

Su Yu laughed, "You're not here to persuade me to let the humans of the Mechanical City convert to you, the Great Evil God, are you?"

Brutal said, "Precisely!"

Su Yu shook his head, "Stop dreaming. That's impossible!"

Then he firmly declared, "Before the Subspace Tide erupts, I will advance to Fifth Rank to protect them through the disaster!"

Su Yu then added with a smile, "I should thank you; with your reminder, I'm now prepared in advance."

The Brutal Evil God didn't get angry but questioned instead, "Su Yu, why are you so stubborn? Do you think you're righteous?"

"Even if you advance to Fifth Rank, it won't be possible to protect them all. Surely many will die!"

"And even if you can safeguard them through this disaster, what about the next one? And the one after that?"

"The changes in subspace will not cease; you cannot always protect them! Indeed, you cannot even protect yourself, and you're blocking their path to survival!"

Su Yu said, "I've never claimed to be righteous. But you, do you think you're righteous? What a joke!"

In the face of Su Yu's ridicule, the Brutal Evil God replied matter-of-factly, "Indeed, in such circumstances, we gods are righteousness! We are the future!"

"Brutality, Greed, Nihilism..."

"We gods were born from human emotions and are their saviors!"

"In this universe, besides humans, many other races have their own gods as well."

"They accepted their gods, but humans rejected gods, which will lead to their extinction!"

"Su Yu, you should make a choice! Let humans believe in me, and they will survive the disaster!"

"There's no need to worry that I will go back on my word. You have enough strength to supervise me."

As Brutal said these words, his tone was immensely compelling, truly presenting the image of a savior of humanity.

Such a powerful Great Evil God claiming to be the savior of humanity was truly somewhat ridiculous.

But upon careful consideration, the words of the Brutal Evil God indeed made some sense.

In the current harsh environment of the universe, the normal Extraordinary Path was already increasingly challenging.

And a hundred years from now, with the Subspace Tide eruption, it's more than just "challenging"—it's direct extinction!

Not only Transcendents but even ordinary people will face direct extinction. It seems that humans are inherently genetically wired for transcendence; even if they haven't embarked on the Extraordinary Path, they will be affected by the subspace environment.

And these Subspace Gods like the Brutal Evil God can protect humans, boldly claiming "justice" and "the future."

Moreover, Su Yu knew that Evil Gods had two sides: an evil side and also a side that could be deemed normal.

Though Su Yu didn't know how to steadily evoke the other side of an Evil God, it now seemed that the Brutal Evil God might want to turn over a new leaf? To become a true God of humanity?

But if that's the case, what about the humans previously killed by the Brutal Evil God?

Over the millennia, the Brutal Evil God had directly or indirectly caused the deaths of humanity by the trillions. If in a grand act of transformation, He turned from a terrifying Evil God to a universally revered true God, it would be far too lenient for Him.

Seeing Su Yu contemplating, Brutal Evil God asked again, "So...Su Yu, what is your choice?"

After a long silence, Su Yu finally spoke, "My choice is..."

"I've found you!"

...

Chapter 873: Rematch with the Brutal Evil God! Su Yu's New Technique!

Su Yu's tone suddenly shifted, and a piercing light burst forth from his eyes.

Through this period of dialogue, Su Yu had successfully located the track of the Brutal Evil God!

In the history of the past, on that unknown planet, Su Yu's figure suddenly appeared, directly in the form of the Radiant Giant, standing in midair, exuding brilliant light.

At this point in time, that human city was enduring a disaster.

In the darkness, a large number of twisted creatures were assaulting the city's defenses.

The people in the city were praying to the Brutal Evil God, seeking the deity's protection.

And the Brutal Evil God also responded to the prayers, immediately descending power to erase those twisted creatures.

And the moment Su Yu appeared was exactly when the power of the Brutal Evil God descended.

At that instant, the figure of the Brutal Evil God flickered in the darkness, a Thousand-Handed Thousand-Eyed giant floating above those twisted creatures.

Su Yu could see that all those twisted creatures had a hidden energy path connecting them to the divine body of the Brutal Evil God.

Su Yu sneered inwardly.

This so-called protection of humanity by the Brutal Evil God was all nonsense; these twisted creatures were the subordinates of the Brutal Evil God!

The disaster was actually brought by this Evil God, who manipulated these twisted creatures to attack the human city, and then pretended to respond to prayers by erasing the creatures, thus harvesting the devout faith of humans.

"Brutality!"

Su Yu spoke softly, his figure transformed again, now wearing pitch-black battle armor like a human-shaped black hole — the Evil God Soldier Mecha!

Almost simultaneously, this powerful fifth-tier mecha launched an attack!

A pitch-black energy ray blasted toward the Brutal Evil God in the darkness.

The speed of this ray was incredibly fast, immediately striking the Brutal Evil God's body.

BOOM!

The Brutal Evil God let out a terrifying roar beyond human hearing and comprehension.

Then His body underwent a mutation under the attack of Su Yu's dark ray.

In a blink, an immense power gathered atop the Thousand-Handed Thousand-Eyed form.

However, this power was not aimed at Su Yu, but at Himself!

A monstrous power of brutality was converging, and in the next moment, the Brutal Evil God would unleash His strongest power upon Himself.

In simple terms, the Brutal Evil God actually wanted to commit suicide!

Obviously, this was not because the Evil God suddenly despaired but because Su Yu's attack was effective!

The dark ray that had just struck the Brutal Evil God was a new move developed by Su Yu over these four years.

Evil God Soldier Mecha: Self-Destruction Cannon!

Over the past four years, although Su Yu was busy controlling planetary energy and nurturing the Mechanical Soul,

he was never idle regarding the development of the Evil God Soldier Mecha.

The Evil God Soldier Mecha was Su Yu's most powerful battle strength.

Su Yu was always contemplating how to utilize this mecha to unleash even greater combat power.

Given Su Yu's strength, multitasking was an easy feat.

Initially, Su Yu intended to equip the Evil God Soldier Mecha with weapons.

However, any weapon usable by the Evil God Soldier Mecha would need to be at least fifth-tier, which Su Yu was unable to produce.

He did not yet possess the capability to manufacture fifth-tier machinery.

In fact, the Pain Evil God's tier was sufficient; if Su Yu were to ascend to the fifth rank, he could easily manufacture fifth-tier machinery.

But the Pain Evil God's path was not aligned with the Mechanic profession; it wasn't compatible, making it virtually impossible to exploit the Evil God Soldier Mecha to craft fifth-tier weapons.

Faced with no alternative, Su Yu could only take the next best route—attempting to develop new techniques for the Evil God Soldier Mecha.

This resulted in the current move: Self-Destruction Cannon!

The secret of this move lies in the extreme concentration of the Power of Pain, combined with the acceleration from the Power of Time, before being fired.

Once fired, it can cause unbearable pain to the enemy in an instant.

Under extreme pain, one's entire will is reduced to a single thought: to quickly commit suicide and escape the terrifying pain.

In terms of sheer energy strength, this move couldn't even break a brick; it is a purely spiritual attack.

Perfect for dealing with a powerful Evil God like the Brutal!

Indeed, under this extreme pain, the Brutal Evil God could not withstand it and initiated self-destruction!

BOOM!

In the next instant, the Brutality within the Thousand-Handed Thousand-Eyed immediately unleashed strong dark red rays onto Himself.

It was the intensely concentrated Power of Brutal, possessing incredibly destructive force.

The divine body of the Brutal Evil God was, in the blink of an eye, blasted into pieces by this violent assault.

However, the divine body of Brutality was not completely destroyed because, crucially, more than half of the hands and eyes had not fired the dark red rays.

Instead, the twisted creatures beneath Brutality, attacking the human city, turned their claws and fangs upon themselves in an instant, committing suicide.

It seemed their suicide absorbed a major portion of the Self-Destruction Cannon's power on behalf of Brutality!

The shadow of Brutality also had a similar mechanism to transfer damage, allowing these twisted creatures to suffer the attack on His behalf.

This was not unexpected for Su Yu; it would have been strange if a grand Brutal Evil God were defeated by a single move.

However, after dying, the corpses of those twisted creatures underwent a change, capturing Su Yu's attention.

"These are all... humans?"

Su Yu observed that after death, the corpses of those twisted creatures revealed various human characteristics.

Chapter 874: Rematch with the Brutal Evil God! Su Yu's New Move! (Part 2)

He immediately understood that these twisted creatures were actually monsters mutated from humans under the power of the Brutal Evil God.

The Brutal Evil God used to speak nicely, claiming to be the god of humans and would protect humanity, but it was all nonsense.

Su Yu's gaze turned icy.

In the next instant, another dark ray shot out, another Self-Destruction Cannon!

This move was very effective, so naturally, Su Yu wouldn't use it just once.

Roar!

This time, the Brutal Evil God was prepared. Hundreds of remaining eyes shot out dark red rays simultaneously, clashing with Su Yu's attack.

However, they couldn't withstand it!

The moment the dark red rays touched the Self-Destruction Cannon's energy, in a short time, the dark red rays actually reversed direction, blasting towards the Brutal Evil God itself!

These dark red rays, under extreme pain, even betrayed the Brutal Evil God and turned against itself!

The attack energy of the Brutal Evil God unexpectedly had consciousness, resembling life itself.

This was originally a highly advanced realm, but under the Power of Pain, it turned into a flaw.

When this power has consciousness, it feels pain, and it will self-destruct!

Boom!

In the next moment, the divine body of the Brutal Evil God was again shattered by more than half!

It was shattered by the dark red rays it had emitted itself.

Following the dark red rays was the Self-Destruction Cannon fired by Su Yu, almost simultaneously hitting the divine body of the Brutal Evil God.

At this moment, the Brutal Evil God suddenly stopped moving.

"Not good!"

Seeing this, Su Yu's mind raced, instantly realizing something was wrong.

Sure enough, in the next instant, the divine body of the Brutal Evil God, all parts of it, began to emit blinding red light.

Seeing this, Su Yu, disregarding other matters, quickly released energy to protect the human cities below.

Then, a shocking explosion occurred.

The Brutal Evil God, seeing that it was impossible to win, directly took advantage of the situation and self-destructed!

After a long while, the remnants of the explosion dissipated. The outskirts of the city had been blown into a massive sunken basin, spanning over a hundred kilometers.

At the center of the basin was the human city.

And the aura of the Brutal Evil God had already vanished without a trace.

Looking at the state of this basin, Su Yu shook his head slightly: "The power is too small."

Su Yu knew that the Brutal Evil God had escaped by using the self-destruction.

If the true Brutal Evil God had self-destructed in a deathly struggle, the entire planet might have been blown apart; how could there only be a basin?

It must be a method the Brutal Evil God used to escape.

This place was originally past history; the Brutal Evil God who had just fought with Su Yu wasn't the true form but rather the Brutal Evil God from history.

The Brutal Evil God is not an Evil God of the Time Domain; it possesses some time abilities and can somewhat travel through time and space.

But whether in the past or the future, the Brutal Evil God cannot unleash its full power.

The true form always resides at the "present" time point as the Brutal Evil God.

So in the recent battle, the Brutal Evil God appeared so inadequate, it was quickly defeated by Su Yu's Self-Destruction Cannon.

By leveraging this past Brutal Evil God, Su Yu could follow the clues to locate the Evil God's true form deep within Subspace.

And the Brutal Evil God evidently understood this fact, thus allowing this past self to self-destruct, evading Su Yu's lock.

However...

"Can you escape?"

Su Yu focused on everything before him and suddenly activated his power:

"Retraction!"

With Su Yu's light incantation, an invisible force shot towards the void in front of him.

Struck by this invisible force, the void rippled like flowing water.

Like a video being "rewound."

Everything that had happened before began to reverse under Su Yu's power.

...Time began to flow backward! History started to re-enact!

In the blink of an eye, the Brutal Evil God who was about to self-destruct appeared again.

Taking advantage of this opportunity, Su Yu suddenly advanced, fully launching the Evil God Soldier Mecha, and grabbing the Brutal Evil God!

In the city below, everyone saw a human-shaped black hole grab a giant with thousands of hands and eyes. Seeing this scene, everyone was utterly shocked and couldn't comprehend what had happened.

Meanwhile, the terrifying Power of Pain was pouring into the Brutal Evil God, paralyzing its entire body, preventing it from even mobilizing its power.

It has been subdued by Su Yu!

The Brutal Evil God seemed somewhat surprised, emitting a voice: "You actually mastered the Power of Time to this extent..."

Su Yu had unexpectedly utilized a means to reverse time.

Actually, during the great battle years ago, Zhang Chenfeng left behind the Mechanical Council, which used the "Retraction Cannon" to rewind its own time, thus recovering from its injuries.

The Pain Evil God also possessed such means.

But whether the Mechanical Council or the Pain Evil God, this technique to reverse time was only ever used on themselves, never on adversaries.

It wasn't that they didn't want to use it, but they couldn't.

Nonetheless, moments ago, Su Yu used the power of time reversal on the Brutal Evil God, forcibly pulling it back from its self-destruction.

This technique even left the Brutal Evil God feeling astonished.

In fact, this ability wasn't Su Yu's own but the power of the Evil God Soldier Mecha, the power of the Pain Evil God.

In the past four years, not only had Su Yu been working on harnessing the power of the Evil God Soldier Mecha.

The Pain Evil God itself was also cultivating and enhancing itself; it was indeed a self-aware fifth-tier Evil God.

Though modified into the Evil God Soldier Mecha, the Pain Evil God thus came closer to Su Yu, the true form, than ever before.

Hence, throughout these four years, the power of the Pain Evil God also saw significant advancements. The immense power of the recent Self-Destruction Cannon was partly attributed to this.

Now, the "Retraction," capable of making the time of the Brutal Evil God flow backward, was naturally the result of the Pain Evil God's cultivation.

The developmental growth of this Evil God Soldier Mecha is indeed astounding; in just four years, it has made such progress that it hardly requires Su Yu's concern.

However, this isn't necessarily entirely a good thing, as the stronger the Pain Evil God's power, the greater the possibility of it breaking free from control.

Fortunately, up to now, there are no signs of it escaping control.

The Mechanical God thoroughly modified the Pain Evil God, and as its power grows stronger, the control over it simultaneously increases. Its cultivation enhancement will only make Su Yu's fighting strength more formidable.

Fully aware of these inner workings, Su Yu completely disregarded the Brutal Evil God's shock, instead focusing all his power to attempt fully controlling the Brutal Evil God.

Of course, the Brutal Evil God understood its situation; its entire body erupted with crimson glow once more as it roared angrily: "You dare to attempt controlling me?"

Su Yu sneered: "Why not?"

Simultaneously, he exerted all his strength, even beginning to draw upon the Power of Machine God sleeping inside the Evil God Soldier Mecha, actually trying to mechanize the Brutal Evil God's divine body!

He intended to forge this Brutal Evil God into an Evil God Soldier Mecha as well!

Realizing this fact, the Brutal Evil God's fury soared to an extreme.

It was a dignified fifth-tier Great Evil God, yet Su Yu dared to try turning it into a tool!

But it was only furious for a moment before its divine body suddenly slackened, no longer showing any movement.

"Escaped again?"

Su Yu gazed at the motionless Brutal Evil God, realizing this being had already fled.

It wasn't like the previous self-destruction but had directly severed its connection with this body.

The Brutal Evil God now in Su Yu's grasp was just an empty shell, no longer containing the awareness of the Brutal Evil God.

That means the Brutal Evil God has permanently abandoned this part of its power.

Even with time reversal, Su Yu couldn't feasibly pull the Brutal Evil God's consciousness back from thin air.

Previously during the self-destruction escape, the Brutal Evil God didn't lose too much, as it only managed to blow up a basin, and most of the power took advantage to flee.

However, this time, it genuinely lost all the power of this divine body, equivalent to gouging flesh from itself.

Earlier, the Brutal Evil God was already injured from battling Su Yu, and now, after losing so much power, the injuries must be even heavier.

"Decisive enough."

Su Yu slightly smiled, directly storing the body of the Brutal Evil God into the Manifestation Space.

Though the consciousness of Brutal Evil has fled, this divine body from past history holds a fifth-tier level.

While it merely bears the level without genuine fifth-tier rank power.

It remains precious, as a part of the Brutal Evil God stronger than ordinary fourth-order top.

Su Yu takes it back, even if unable to create a second Evil God Soldier Mecha, can perhaps attempt crafting a weapon for the Evil God Soldier Mecha.

Then, use this weapon to fight against the true form of Brutal!

Chapter 875: The Road Ahead—Su Yu's Career Transformation Plan

Su Yu is well-versed in the "application" of the Brutal God Body.

The Brutal Battle Armor he had relied on for so long depended on the Brutal Split Mind and the Evil God's Bone.

However, now the Brutal Battle Armor is no longer of any use to Su Yu; it's just like a piece of clothing he wears.

Honestly, Su Yu is a bit unaccustomed to it, since he used to handle the Brutal Battle Armor quite skillfully.

Fortunately, the newly acquired Fifth Rank Brutal God Body made up for Su Yu's regret.

Su Yu is confident that with this newly acquired Brutal God Body, he can forge a sufficiently powerful Evil God Weapon.

By using the Brutal God Body to forge a weapon, he could later use this weapon against the Brutal God's true form.

It has to be said, this is quite an insult...

If in the future he can completely defeat the Brutal Evil God and use the Brutal true form to forge a true Brutal Battle Armor, that would be perfect, though it's too early to think about that now.

Having acquired the Brutal God Body, Su Yu felt satisfied, feeling it was a worthwhile trip.

"Only used two shots of the Self-Destruction Cannon, not bad."

The battle this time had gains and losses.

The two shots of the Self-Destruction Cannon were the losses.

The Self-Destruction Cannon requires lengthy purification, compression, and encapsulation of Power of Pain.

Thus, the Self-Destruction Cannon is limited; using one means one less.

In four years, Su Yu could only purify one shot per year, making a total of four shots; this time, he used half of his reserve.

But the power is truly formidable, not in vain for Su Yu spending four years purifying and manufacturing it.

Originally, he was worried that the technique he crafted in isolation, without combat testing, might not be effective against the Brutal Evil God.

Now, it seems the effect is very good indeed.

However, Su Yu also knows that in this battle, the Self-Destruction Cannon has been exposed; next time, the Brutal Evil Shadow would be prepared and it wouldn't be so easy to hit it.

But that's okay; with experience, Su Yu will develop stronger techniques to give the Brutal Evil God some new surprises.

Besides the two shots of the Self-Destruction Cannon, Su Yu used the ability to rewind time once, accumulating quite a bit of Time Rebound, which needed to be resolved.

As his thoughts turned, Su Yu shifted his gaze to the planet beneath his feet, reached out, and grabbed a piece of earth and rock from the ground, holding it in his hand.

Su Yu could sense that this piece of earth and rock is essentially not normal matter but a solid formed purely by the solidification of Subspace Spirit Power.

The entire planet is composed of this Subspace Material!

"Sure enough, this planet... is actually a Subspace Domain Planet!"

Previously busy with the battle, Su Yu had no chance to observe this planet; now that the Brutal was driven away, there was an opportunity to observe it.

Su Yu immediately judged that this planet was actually a Subspace Domain Planet, entirely composed of Subspace Material.

This planet, like the one Su Yu nurtured the Mechanical Soul on, is formed after advancing to the Fifth Rank and the complete closure of the Subspace Domain.

The Pain Evil God has such a planet, so naturally, the Brutal Evil God has one too.

However, unlike the Pain Evil God's planet, which is relatively primitive with life only induced to maturity by Su Yu as Mechanical Souls,

the planet of the Brutal Evil God is evidently nurtured with great care, filled with abundant and diverse lifeforms.

Although most of the life forms are some dark and twisted entities.

"This is indeed the lair of the Brutal!"

Su Yu thought to himself.

Under normal circumstances, such Subspace Domain Planets are hidden deep within subspace, impossible for outsiders to locate.

But Su Yu, leveraging the Power of Time, directly descended here from the past history of that human city.

With this planet as a guide, locating the true form of the Brutal God should not be difficult.

At worst, directly destroying this planet would certainly inflict severe damage on the Brutal Evil God.

However, before Su Yu could take action, he discovered that the planet was becoming semi-transparent.

Or rather, it lost its "reality," appearing like a phantom.

Just like when Su Yu traveled to the future, since the future hasn't happened yet, it lacks "reality."

When Su Yu traveled to the future, if he didn't use the ability to "Determine the Future," everything in the future time-space appeared just as "unreal," semi-transparent to him.

Because the future is uncertain, its essence is nihility; only when time reaches the "present" does the future become real.

And now, this Subspace Domain Planet is in such a state.

"Looks like it's not going to work."

Seeing this, Su Yu knew that the Brutal Evil God used some sort of ability to hide this Subspace Domain Planet from past history.

It's unknown what method the Brutal Evil God used to make the Subspace Domain Planet of past history become as "future," elusive and lacking reality.

Even if Su Yu destroyed the planet right now, it wouldn't inflict any harm on the Brutal's true form.

Just like if Su Yu attacked an enemy in future time-space, it wouldn't affect the enemy at the current time point.

The Brutal Evil God used some unknown ability to make the "past" become "future," preventing Su Yu from attacking it in past history.

"What an interesting means."

"It seems the Brutal Evil God's mastery of the Power of Time is entirely different from mine."

It's clear that the Brutal Evil God also possesses some peculiar strengths in the field of time.

This peculiar strength is something even the Evil God Soldier Mecha with Fifth Rank Power of Time cannot accomplish.

Chapter 876: The Road Ahead—Su Yu's Career Transformation Plan

The Power of Time is not immutable.

The effects vary depending on the means used to obtain the Power of Time.

Back then, the Hatred Demon wanted to use memory to conduct time travel and master the Power of Time.

If the Hatred Demon succeeded, its Power of Time would certainly be different from the power Su Yu obtained as a Time Mechanic.

And as for the Brutal Evil God, it's unknown what means it used to master some eerie Power of Time.

However, Su Yu is certain that the Brutal Evil God's Power of Time definitely hasn't reached the Fifth Rank, which is why it doesn't dare to confront Su Yu directly and prefers to hide, using this power only for self-preservation.

Su Yu pondered for a moment and looked down at the human city below.

After thinking it over, he directly activated his ability to alter the memories of all humans, making them forget everything that had happened before.

Then Su Yu quickly circled around the entire planet, exploring its expanse.

Su Yu discovered that this planet is similar in scale to the Ruins Star.

The surface of the planet is littered with various twisted creatures, including the familiar Ghost Demons and Radiation Beasts.

Only in that city are there hundreds of thousands of normal humans surviving.

Moreover, Su Yu found that those twisted, dark creatures are composed of Subspace Material from this planet.

Meanwhile, the humans in that city are made of real flesh and blood, composed of materials from the Real Universe.

No wonder the humans in this city, despite developing for a thousand years, have only this population.

Their flesh and blood material is so limited that no matter how they develop, they can't increase much in number.

These people are quite similar to those Mechanic descendants in the Manifestation Space before, all trapped outside the Real Universe, subsisting on a small amount of real material.

In the Manifestation Space, most of the material is also Data Manifestation, with very little real material, surviving through recycling this scant material, enduring countless years of hardship.

The methods of the Brutal Evil God, however, are far more sophisticated, or should I say, "merciful."

These humans are completely unaware their material is being recycled, yet their lives are relatively decent.

No matter the true purpose of the Brutality, as an Evil God, it certainly shows "mercy" to the hundreds of thousands of humans in this city, despite creating twisted creatures to attack this city, only to come out and save them afterward.

One can only speculate why the Brutal Evil God left these humans here, probably only it knows its intentions.

After thoroughly exploring the entire planet, Su Yu didn't bother with the human city anymore.

He took the Brutal God Body he just acquired, along with the corpses of the twisted creatures on the ground.

Then Su Yu vanished from this time and space and returned to the [Now].

...

At the [Now] time node, Su Yu's consciousness returned.

He looked at the human city and nodded silently.

Although Su Yu and the Brutal Evil God battled in a past time-space, both sides tacitly refrained from altering the history of this human city too much after the battle to avoid unnecessary Time Rebound.

Before leaving, Su Yu had also modified these people's memories to ensure they were the same as before, not altering history.

After Su Yu left, the Brutal Evil God wouldn't seize the opportunity to harm these humans.

Therefore, the history of this city hasn't changed much; it was originally moved to the Ruins Star by the Brutal Evil God, and everyone in the city continued to live well.

The only difference now is that Su Yu fully understands the origin of this city.

Looking at the city full of Brutal believers, Su Yu shook his head. These people still believe in their brutal deity and continue to pray incessantly.

Su Yu didn't bother them nor was in a hurry to deal with the recently acquired Brutal God Body, instead, he lapsed into deep thought.

Su Yu was pondering what the Brutal had said earlier.

That Brutals fellow actually claimed to be the deity of humanity, that it alone was just and could protect humanity in the future.

Though the Brutal said this just before Su Yu thrashed it, even taking back the God Body.

But the words of Brutality are indeed worth pondering deeply.

From the matter of the Mechanical Soul, Su Yu already understands that in this Universe, due to the Subspace Tide, the normal Extraordinary Path is fraught with near-death.

Conversely, the path of the Evil God Demon is very smooth.

Combining this with the Brutal Evil God's previous words, Su Yu is forced to consider his future, as well as the future of humanity.

If, as Brutality said, Su Yu could achieve the Fifth Rank in the future?

And even if he did achieve it, how would the path continue after the Subspace Tide erupts?

Could he continue to advance?

And what about the rest of humanity? What should they do after the Subspace Tide?

Su Yu pondered for a moment, then suddenly looked up towards the Evil God Soldier Mecha hidden in the future's nihilism.

He had already thought of a solution!

Or rather, the solution was right in front of him.

If the normal Extraordinary Path is difficult to tread, then traverse the path of the Evil God Demon!

Of course, Su Yu doesn't truly intend to become an Evil God.

Rather, he plans to convert Evil Gods into machines like the Evil God Soldier Mecha, turning them into his power.

The path of the Evil God Demon is easier, meaning that after the Subspace Tide erupts again, those entities will grow increasingly numerous and powerful.

While this makes Su Yu and humanity's situation very dangerous, if the Evil God Demon is viewed as a type of resource, usable resource, then it's not a bad thing but a good thing!

Didn't Su Yu initially utilize the Radiation Beasts in just this way?

Of course, this assumes one has the capability to harness such "resources."

The Evil God Demon isn't something easily utilized — a moment of carelessness could lead to being eroded by its power, resulting in a dreadful death.

But Su Yu, precisely, possesses such an ability, transforming Fifth Rank Evil Gods into Mecha, who else has such expertise?

However, the Evil God Soldier Mecha remains an external power in the end.

Due to his relationship with the Pain Evil God, Su Yu essentially embodies the Evil God Soldier Mecha, meaning for Su Yu, the Evil God Soldiers aren't truly external power.

Other people can't learn this technique.

"Therefore, I need to develop new Extraordinary Professions, allowing others to genuinely obtain such power..."

Su Yu thought to himself.

He decided to transform the existing Extraordinary Professions to better suit future changes.

Demon Warrior, Data Ghost Demon, War Demon Mechanic, Evil God Soldier Mechanic...

A series of names suddenly sprang up in Su Yu's mind.

The so-called Demon Warrior was Su Yu's plan to transform the Galaxy Warrior profession into a new Extraordinary Profession powered by the Power of Demon, with Demon Flesh and Soul as its Battle Armor.

The Data Ghost Demon is a reimagined version of the Data Ghost profession.

The War Demon Mechanic was about transforming a large number of Subspace Demon Creatures into Mechanical Demons to dominate the battlefield as a mechanical profession.

The Evil God Soldier Mechanic was specifically for hunting Evil Gods and crafting Evil God Soldier Mechas from their bodies, forming a powerful Fourth-tier profession!

With Su Yu's intelligence, in mere moments, he had a slew of ideas and inspirations.

Simply transforming professions is not difficult for Su Yu.

The real challenge is how these professions allow individuals to retain their humanity and rationality after occupation.

Rather than actually turning themselves into twisted Evil God Demons.

In this area, Su Yu also has experience.

The Mechanical Souls Su Yu developed previously largely met these requirements; although born from the Domain Planet of an Evil God, they were purified by Su Yu, exhibiting not a shred of evil brutality, but rather a nature exceedingly mild.

However, the Mechanical Soul was a creature meticulously cultivated by Su Yu from its primal state, making adjustments relatively straightforward.

Humanity, however, is far more complex, adding to the difficulty.

Fortunately, Su Yu has another point of reference, which is the profession he previously occupied — Ghost Hidden Blade.

The Ghost Hidden Blade essentially represents the kind of profession Su Yu envisions!

The Ghost Hidden Blade allows one to wield Ghost Energy, usable only by Evil God Demons, while maintaining human reasoning.

Isn't this precisely the profession Su Yu wants?

The Human Empire indeed had similar ideas back then, and the Ghost Hidden Blade was the result of their research.

With the experience of Ghost Hidden Blade, Su Yu is confident that he can develop these new professions — Demon Warrior, Data Ghost Demon, War Demon Mechanic, Evil God Soldier Mechanic...

Chapter 877: Brutal Conspiracy, 20 Years!

Thinking of this, Su Yu immediately prepared to develop a new profession.

This matter is very important, as it concerns his future path.

However, before taking action, Su Yu pondered another question.

That is: What exactly is the Brutal Evil God up to this time?

The Brutal Evil God relocated that human city to the Ruins Star, but ended up letting Su Yu trace it and beat it up, even robbing the Divine Body.

The actions seemed to yield nothing, just losses.

Su Yu had been waiting for the Brutal Evil God to cause trouble, only for it to take action after four years.

But this time, the Brutal's move seemed merely to deliver population, power, and knowledge to Su Yu.

A city's population, the power of a Divine Body, and knowledge about the Transcendent path and Subspace environment, all seemingly handed to Su Yu.

As for the Brutal Evil God's rhetoric, claiming they are humanity's true gods and justice,

Su Yu regarded it as nonsense.

Now this is puzzling, why would the dignified Fifth-tier Great Evil God act just for such words?

Did it really rely on mere rhetoric to sway Su Yu to its side?

This guy shouldn't be that foolish.

Although Evil Gods symbolize chaos and distortion, being not too bright seems normal.

But at the Fifth Rank, the Brutal Evil God is definitely no fool.

After brewing for four years, its first move must be a well-considered result.

In this case, the reason behind Brutal's actions deserves pondering.

On the surface, Brutal suffered significant losses, but was it only losses?

Or did Brutal already achieve the desired results?

"Could it be... an imitation of ancient events from ten thousand years ago?"

Su Yu recalled the ancient battle between the Brutal Evil God and Zhang Chenfeng from ten thousand years ago.

According to the information recorded on the Giant God Soldier Command Fragment, it wasn't directly a battle between Brutal and Zhang Chenfeng.

Brutal used certain methods to erode the people of the Azure Second Empire and incited a great rebellion.

Amidst the chaos within the empire, Brutal then took action against the Radiant Mecha, causing erosion and ultimately forcing Zhang Chenfeng to death.

Su Yu had watched and pondered this information repeatedly before.

However, due to too many missing details, he couldn't gather more intelligence.

For example, how Brutal and Zhang Chenfeng fought, why Zhang Chenfeng suddenly died, Su Yu remained clueless.

But now, after revisiting the entire battle, Su Yu detected a different flavor, his heart filled with doubt.

The question is, how did the Brutal Evil God accomplish it?

Back then, Zhang Chenfeng was a Fifth-tier Extraordinary Mechanic with a Fifth-tier Radiant Mecha, and reportedly also led a strong Radiant Elite Force.

He died, the Radiant Mecha got destroyed, but even the remaining Mechanical Creations could lock the planet away for ten thousand years, preventing the Brutal Evil God from escaping the blockade.

With such powerful strength, how did the Brutal Evil God instigate a great rebellion back then?

How did Brutal erode the Radiant Mecha and force Zhang Chenfeng to death?

The more Su Yu thought about it, the more bizarre it seemed.

The powers of the Radiant Mecha should theoretically counter Brutal Evil God's powers, yet Brutal managed not only to incite rebellion but also erode the Fifth-tier Radiant Mecha.

Previously, Su Yu had little understanding of Fifth-tier powers.

Now he possessed the Evil God Soldier Mecha and had battled the Brutal Evil God, knowing exactly how difficult and incredible all this was.

How did Brutal accomplish it back then?

Even if the Brutal Evil God was at full strength ten thousand years ago, much stronger than now, wouldn't Zhang Chenfeng be even more formidable?

Su Yu couldn't figure it out.

The ancient battle, too distant, he couldn't use the Power of Time to go back and watch.

He could only speculate that the Brutal Evil God used some kind of bizarre conspiracy.

Now, it seems like the Brutal Evil God intends to apply this conspiracy to Su Yu!

Once Su Yu's civilization in the Mechanical City develops, a great rebellion might occur, just like ten thousand years ago! Then Su Yu dies, the Evil God Soldier Mecha disassembles.

Furthermore, the professions Su Yu wants to develop now, like Demon Warrior, Data Ghost Demon, War Demon Mechanic, Evil God Soldier Mechanic, could also be triggers for rebellion.

"I'd like to see what means you have..."

Having figured all this out, Su Yu hesitated not, and immediately started developing new professions.

Though the Brutal Evil God harbors unknown schemes, Su Yu would not cower in fear.

He would continue as planned, only being more cautious and vigilant.

Next, Su Yu began developing new professions, managing sphere energy, while meditating to refine himself.

He even diverted some of his Spirit towards researching that Brutal God Body, contemplating how to use it to craft weapons for the Evil God Soldier Mecha.

Juggling multiple tasks is nothing for Su Yu's capability.

Concerning the human city Brutal delivered, Su Yu, wary of conspiracy, did not contact those people.

Moreover, Su Yu sealed it with his powers, preventing those humans from communicating with inhabitants of the Mechanical City.

This is straightforward for Su Yu; anyhow, the city's periphery is an area of frequent planetary energy disturbances, Su Yu merely adjusted the energy, making the city surroundings perilous, deterring anyone from venturing out.

Meanwhile, the city's inhabitants, accustomed to such a closed environment, seemed unconcerned.

Chapter 878: Brutal Conspiracy, 20 Years! (Part 2)

In fact, because there was no threat of twisted creatures on the Ruins Star, it seemed that living conditions were even better. At most, they couldn't go out, but that was nothing. Their city had planting areas, breeding areas, and enough food sources. There was no need for outside reliance.

Outside, though dangerous, the city within was peaceful and safe, like a paradise.

Therefore, they all believed that it was the mercy of the Brutal Evil God that brought them to this god-given land without darkness and twisted creatures.

Their belief wasn't wrong; it indeed was the Brutal Evil God who sent them here.

So they prayed more devoutly to the Brutal Evil God.

These people were curious. Although they believed in an Evil God, they were not at all eroded by the power of Brutality.

Although they were full of a brutal aura, they couldn't perceive it at all.

Because of their strangeness, Su Yu didn't want them to come into contact with the people of the Mechanical City, to avoid spreading some kind of eerie contamination.

However, the traits these people possessed were quite valuable for research.

The key challenge Su Yu faced in developing new professions was how to use the power of Evil God Demons while maintaining humanity and rationality.

Although Su Yu had the Ghost Hidden Blade, it was only an isolated case and couldn't provide enough data.

The city had hundreds of thousands of people, enough for Su Yu's research.

And because of this, Su Yu became more convinced that the Brutal Evil God intentionally pushed forward Su Yu's research, wanting him to develop these new professions, thereby sending these people over.

...

Twenty years passed quickly.

During these twenty years, Su Yu achieved many results.

The development of new professions was successful, and the Demon Warrior and War Demon Mechanic were both developed!

These two third-rank professions took Su Yu twenty years, similar to Su Yu's initial development of the Time Mechanic.

The Time Mechanic was a fourth-tier profession, and it also involved the mysterious and powerful Power of Time.

These two new professions, however, were only third-rank, and had the prototypical Galaxy Warrior and War Mechanic as references.

It was enough to prove how difficult it was to develop a new path, a new profession.

To enable humans to master the Power of Evil God Demon while maintaining rationality and humanity was truly challenging.

This path had positive examples, such as Su Yu's Ghost Hidden Blade, a technological achievement from the Empire thousands of years ago.

The negative example was the former Ghost Tribe, where the entire tribe of a hundred thousand used Ghost Energy to refine themselves into neither human nor ghost.

Another positive example was the Ghost Emperor.

In this development, besides the Ghost Hidden Blade, Su Yu also referred to some of the technical experiences left by the deceased Ghost Emperor.

But even so, if it weren't for the city of brutal believers sent by the Brutal Evil God, Su Yu might still be stuck at some critical point.

After some research, Su Yu quickly discovered that the experiences of the Ghost Hidden Blade and Ghost Emperor were quite challenging to apply.

The Ghost Hidden Blade, in essence, still belonged to a normal Transcendent profession. In the beginning, Su Yu had to struggle through life and death to advance to the Ghost Hidden Blade, proving that this profession wasn't very adaptable to the current environment.

The experiences of the Ghost Emperor were pretty much similar.

But now, Su Yu's desire to develop new professions was to adapt more thoroughly to the current Subspace environment, making the Ghost Hidden Blade and Ghost Emperor's experiences insufficient.

Facing these difficulties, the traits of the brutal believers were of great help to Su Yu's research.

These brutal believers prayed to the Brutal Evil God daily yet maintained their humanity; it was simply miraculous.

With them as references and twenty years of effort, it finally paid off, and Su Yu, at last, succeeded!

Demon Warrior! War Demon Mechanic! These were Su Yu's achievements.

The profession of a Demon Warrior required capturing Subspace Demons, using technical means to refine them into Demon Seeds, and implanting them into humans.

The demon was a special Subspace creature, essentially equivalent to the larval form of an Evil God.

In the Subspace near the Ruins Star, there weren't many demons, but there were some, many of which were even Su Yu's believers, so capturing them wasn't difficult.

Su Yu could even use the Subspace Domain of the Pain Evil God to cultivate demons out of thin air, like nurturing a Mechanical Soul.

Once these demons were captured, their consciousness was erased, and they underwent mechanization transformation, becoming Demon Seeds.

Demon Seeds would fuse with humans, modifying and reinforcing their bodies. Overall, the effect was similar to that of a Galaxy Warrior but more sinister and powerful.

The key to this profession was the refining technology of the Demon Seed. Normally, fusing a human with a demon would result in a wicked and savage monster.

But the Demon Seed could manipulate demon energy without eroding human rationality, and even feed back to assist humans in advancing to the third rank!

And this sort of Demon Seed... can be mass-produced!

That's right, just like a Mechanical Soul, it can be mass-produced!

As long as Su Yu captured a top six-star demon, refined it into a Demon Seed, and fused it with a top six-star human, it was equivalent to completing an advancement ceremony, allowing it to advance to seven-star!

This matched the "justice" theory that the Brutal previously spoke of.

The power of the Evil God Demon, in this environment, was justice, so advancement was simple and could be mass-produced!

Just like a thousand years ago when the Human Empire could mass-produce Galaxy Warriors, Su Yu could now mass-produce Demon Warriors.

At the same time, Su Yu also developed matching Demon Armor for Demon Warriors, which was essentially a fusion of the Demon Seed and Mechanical Battle Armor.

The overall design concept was similar to that of the Galaxy Warrior; it could be considered a new era's Galaxy Warrior.

As for the War Demon Mechanic, it was a modification of the War Mechanic, controlling an army of Mechanical Demons to dominate the battlefield, a combat profession!

Mechanical Demons were combat units created by the War Demon Mechanic using Ghost Energy and other demon energy together with mechanical technology.

The War Demon Mechanic, while a profession, also included pre-professions like "Demon Mechanic" and "Evil Energy Mechanic."

These professions, in terms of combat power, were even stronger than the original Battlefield Mechanic and War Mechanic!

However, the mechanical creations that Su Yu previously controlled were things like cavalry.

These new professions controlled various Mechanical Demons.

In battle, it was very sinister, unlike any proper profession.

And this profession, too, could be mass-produced!

Compared to the ritual of the War Mechanic, the ritual of the War Demon Mechanic was much simpler, requiring just the accumulation of a thousand Mechanical Demon army troops to be considered successful.

No need to engage in wars involving hundreds of thousands of people.

The current War Mechanician couldn't be employed.

After all, everyone on the entire planet was essentially under Su Yu's command. You couldn't exactly start a civil war, or should you head to that city of brutal believers?

Moreover, wars always result in deaths, many deaths.

There was only one city of brutal believers; after the battle, it would be gone.

The advancement of the War Demon Mechanic was much more convenient, only needing to focus on creating Mechanical Demons to complete the ritual advancement and possess powerful combat capability.

After developing these two professions, Su Yu had to sigh at how difficult it was when he advanced to the third rank. If he had these two professions earlier, it would have been much easier!

After developing these two professions, Su Yu was somewhat hesitant about whether or not to disseminate these two professions and have the people of Mechanical City take up and train in them.

These two professions, though they wouldn't affect humanity or rationality, their appearance was rather sinister.

In fact, the sinister appearance wouldn't concern Su Yu too much; primarily, these two professions were developed with the help of the Brutal Evil God.

There was some conspiracy within which Su Yu had yet to fully understand.

If he rashly promoted these two professions, the consequences would indeed be hard to predict.

Before promoting new professions, Su Yu must figure out this conspiracy!

At that moment, Su Yu felt a stirring and sensed the brutal aura reappearing on the Ruins Star.

"Brutal, after twenty years of hiding, are you finally going to make a move again?"

Chapter 879: The True Terror of the Brutal Evil God

After all these years, Su Yu's spirit has permeated the entire planet, allowing him to observe every position on its surface at any time.

He could sense that this time the brutal aura came with extraordinary ferocity, present all over the globe.

Moreover...

"The aura is coming from those cities!"

Su Yu immediately determined that the source of the brutal aura was none other than the hundred-plus cities established by the people of the Mechanical City!

Su Yu immediately turned his gaze toward these cities.

Currently, on the Ruins Star, after more than twenty years of development, the number of cities remained the same—over a hundred, without an increase.

During these twenty years, Su Yu rarely interfered with these cities, allowing them to develop freely, only occasionally adding new items to the exchange system.

Although he didn't interfere, over these twenty years, Su Yu continuously observed the future of these cities using the power of time to guard against any hidden dangers.

With Su Yu's power, theoretically, he could see a future within a millennium.

However, due to the tides of subspace, Su Yu could only see up to the time node of the subspace tidal outbreak, approximately more than eighty years later, beyond which he could not see.

But during these eighty-plus years, Su Yu could see everything clearly.

And the future he could see for these eighty-plus years was one of peaceful development without any ripples.

Now, the sudden appearance of the brutal aura clearly exceeded Su Yu's observation scope.

This unexpected situation outside his observation was also within Su Yu's expectations.

He had long known that the future he saw could not be taken entirely as truth.

The future Su Yu saw was only a possibility, and it was impossible for him to see through all possibilities.

Especially those related to the brutal Great Evil God, he could not possibly see through them all.

The Brutal Evil God possessed a strange power of time, capable of hiding itself within the timeline.

Su Yu couldn't use the power of time to predict the actions of the Brutal Evil God, which remained a variable outside his vision.

Like before, when the Brutal Evil God delivered that city of brutal believers, Su Yu couldn't foresee it.

This kind of variable that Su Yu couldn't see through was not the only one.

The specific time node of the subspace tidal outbreak is also unreadable.

To this day, Su Yu doesn't know precisely when the subspace tide will erupt.

Subspace is time-space chaotic, and when the tide erupts, it will surely become more chaotic, with time-space distortions interfering with Su Yu's observation.

Su Yu only knows it is approximately more than eighty years later.

Moreover, whether Su Yu himself can genuinely ascend to the Fifth Rank, he also cannot see.

After all, he doesn't even know what his Fifth-Order Profession is.

Because that involves the profession panel, and since Fifth-Order Professions have not been unlocked yet, how can he see? This is also an unseen variable.

And now, this kind of unforeseen variable has gained another: this brutal aura.

Perceiving the sudden brutal aura and knowing that a variable has arrived, Su Yu took it very seriously.

He immediately activated the highest power of time, ready for battle at any moment.

Whether in the past or the future, as long as he sees the Brutal Evil God, it's equivalent to seeing its true form and battle can begin immediately!

In Su Yu's view, the entire planet's surface and its hundred-plus cities' past and future were all in full view; those cities were the source of the brutal aura.

"The brutal aura is actually emanating from them?"

Su Yu was somewhat surprised to discover that the brutal aura he had just sensed did not come from demons or the like.

Instead, it directly emanated from the residents within those cities!

That brutal aura was extremely intense, almost like... those brutal believers!

"Could it be that the Brutal Evil God polluted them secretly?"

Su Yu's heart sank.

Previously, he had deliberately sealed off those brutal believers to prevent them from contacting the citizens of the Mechanical City and regularly used the power of time to inspect each city.

It was to prevent contamination.

But now, it seems it was useless; what was destined to come has come!

Judging by the intensity of this brutal aura, it was simply shocking.

Although still not as intense as that brutal believer city, it was not far off.

Could it be that unknowingly, the entire civilization of the Mechanical City has already been eroded by brutality?

The civilization that Su Yu built single-handedly has turned into brutal believers?

Facing this terrifying situation, Su Yu did not panic, continuing to observe and search for traces of the Brutal Evil God.

However, he did not see the Brutal Evil God, only a series of normal cities and "normal" residents.

Currently on the Ruins Star, the number of cities has not increased, but the population has tripled.

More than twenty years of peaceful development have led to many people having children, and those children growing up to form new unions and have the next generation.

The total population now amounts to fifty million people.

Of these fifty million, aside from the elderly and weak, nearly everyone else is a Transcendent.

They are distributed across more than a hundred cities, making each city more advanced and prosperous.

Each city has its own customs, cultures, technologies, and more, rich and vibrant.

In every city, Second Rank individuals are everywhere, and those possessing Third Rank battle armor are also not few.

However, those who hold Third-Order Professions are fairly rare; most still rely on the power of mechanical battle armor, but that power is indeed Third Rank strength.

Among the hundred-plus cities, the Third Rank combat power exceeds three thousand!

Three thousand Third Rank combat power, something Su Yu never dared to imagine in the past, but now, there is still much room for development!

Chapter 880: The True Terror of the Brutal Evil God! (2)

As for the fourth-order combat power, it is still relatively rare, and strictly speaking, only Su Yu himself and those Mechanic descendants' fusion technology can reach the fourth order.

No one else can.

Actually, in these twenty years, Su Yu has been able to cultivate fourth-class mechanical soul battle armor.

Mainly because strong warriors like Tie Long at the third rank have not yet gathered enough energy coins needed for the fourth-rank battle armor, they can't find Su Yu to exchange, and Su Yu cannot give it to them for free.

Even without fourth-order battle power, these cities combined have already become a true human civilization, rather than a solitary Mechanical City as before.

These people have secretly called it the name Mechanical Empire, but without Su Yu's consent, they dare not hang the name out yet.

There is communication between cities, when the population reaches one billion, they will apply to Su Yu to establish an empire and restore the glory of humanity!

These twenty years have been years of development, years of hope, everyone's hearts are filled with hope for the future.

Yet, against such a flourishing, hopeful backdrop, these people exude an extremely rich brutal aura.

"How strange..."

The more Su Yu looked, the stranger he found it.

Because no matter how he looked, those cities appeared normal and flourishing.

Except for exuding a brutal aura, there was no difference from before.

The residents in the cities have not become violent or cruel because of the brutal aura; everything is just as it was.

They themselves seem unaware of this aura and continue with various productions, lives, cultivation, and tasks as usual.

They have not even prayed to the Brutal Evil God like those brutal believers, nor have they become brutal believers.

But the brutal aura appears just like that!

"What's going on?"

Su Yu felt serious and continued to observe.

"Su Yu, are you puzzled?"

At this moment, Su Yu heard a low, stern, yet ruthless and crazy voice.

Su Yu's eyes narrowed, and he said solemnly: "Brutality!"

Clearly, this sudden voice was that of the Brutal Evil God.

Upon hearing Brutality's appearance, Su Yu was actually glad instead of surprised in his heart.

The last time Brutality acted, he was given a beating by Su Yu, who grabbed a divine body back.

Now that divine body, after twenty years of transformation, has become the weapon prototype of the Evil God Soldier Mecha. Although not yet completely transformed, it has become somewhat powerful.

He was just worrying about lacking enemies to test against.

Brutality comes now?

Su Yu immediately fully activated the Power of Time, pursuing the source of that voice.

As long as Brutality's body is located, the battle will commence immediately!

Perhaps there is a chance to seize another divine body, or even suppress the Brutal Evil God's body, truly solving this major threat!

As long as Brutality, the Great Evil God, is dealt with, the strangeness on those city residents is a minor issue.

At this time, the Brutal Evil God spoke again: "No need to search, I am still deep in Subspace now, you cannot find me!"

Su Yu ignored it and continued to fully exert the Power of Time.

Just because Brutality said it was unfindable doesn't mean Su Yu would easily believe Brutality's nonsense.

Seeing Su Yu ignoring him, Brutality continued: "Su Yu, you must be puzzled, why do these humans have my brutal aura?"

"Because Brutality... is inherently a part of humanity! It originates from human instinctive emotions!"

"As long as human civilization reaches a certain scale, it will inevitably gather enough brutal emotions. I would only need to guide slightly, and these brutal emotions would turn into brutal aura!"

"I am now using these auras to converse with you, which is why you cannot find me!"

Brutality's tone carried a suppressed, cruel smile.

Su Yu, upon hearing this, felt his heart sink slightly.

He remembered that great rebellion a thousand years ago.

No wonder back then Zhang Chenfeng, being part of the Radiant Guard, couldn't stop humanity from being eroded by Brutality, eventually leading to that great rebellion.

That was why.

As long as human civilization develops to a certain point, Brutality will gather, and even Zhang Chenfeng couldn't stop it.

Furthermore... Zhang Chenfeng himself, might naturally generate brutal emotions.

Su Yu just thought of this, and the Brutal Evil God spoke again: "Su Yu, do you think you can be an exception? This includes you yourself!"

"The brutal aura on you is the most intense among all!"

In Its tone, that cruel smile became more apparent.

Su Yu felt even more burdened.

Does he himself also have brutal aura?

Though startled, after thinking about it for a moment, it seemed quite normal.

Does Su Yu have brutal emotions? Certainly, he does.

In battle, Su Yu is coldly emotional, fiercely effective, fully meeting the standards of brutality.

However, Su Yu cannot detect his own brutal aura; this might be some mysterious Subspace rule.

Those brutal believers and city residents, emitting brutal aura, aren't aware themselves.

Su Yu thought the Brutal Evil God had done something to them, but now he realized, he himself was not an exception either.

This brutal emotion is a human instinct, an instinct written in the genes from evolving from beasts to intelligent life, part of human nature, unerasable.

In the face of danger and natural enemies, brutal emotions fill one with fighting spirit and strength, ignoring pain and danger, enhancing survival capability.

In a certain sense, if controlled well, it is a positive emotion.

Even if not controllable, under normal conditions, no matter how strong the brutal emotions, at most, they create a madman.

However, with the existence of Subspace, a large amount of such emotions would breed a terrifying Evil God like Brutality.

In this universe, the birth of an Evil God like Brutality appears to be inevitable.

And the stronger the power, the stronger the brutal emotions.

These brutal emotions surely become fodder for the Brutal Evil God, aiding It in regaining strength, making It stronger.

Previously, the Brutal Evil God, being weak and chased by Su Yu, was possibly not because It just broke the seal but because in Ruins Star, the human civilization was down to just one Mechanical City, and they were all dead, providing little brutal emotions for It to absorb, thus naturally weak.

Now, Su Yu developing civilization and preparing the fifth rank ceremony is effectively helping the Brutal Evil God "heal."

No wonder the Brutal Evil God claims It is humanity's god, it really is a fact.

It is inseparable from human emotions, capable of using these emotions to heal and grow stronger.

It can even use these emotions to erode humanity, infecting humans.

No wonder Zhang Chenfeng and the Radiant Mecha couldn't resist the Brutal Evil God initially; they were likely eroded the same way.

Honestly, ever since the Brutal Evil God broke free, Su Yu has beaten It twice, and in his subconscious, he slightly underestimated this Evil God, thinking It was no more than this.

But now, Su Yu understands the true terror of this Evil God, which fundamentally isn't in direct combat.

It is this maggot-like erosion ability, unable to be rid of, defenseless against.

Truly fearful, these Evil Gods are!

Su Yu was silent for a moment, then asked for the first time: "Brutality, what exactly do you want to say?"

The Brutal Evil God let out a cruel laugh: "Su Yu, I want you to believe in me!"

Su Yu sneered at once: "Are you dreaming!"

Yet Brutality said: "Su Yu, your rejection is meaningless!"

"To tell you the truth, you can't ascend to the fifth rank! The stronger your civilization becomes, the stronger the brutal emotions! I grow stronger too!"

"By the time you ascend, I will fully erode your mind, plunging you into brutality, where you will surely die!"

"And not ascending to the fifth rank, both you and human civilization absolutely cannot survive the next Subspace tide!"

"Even if you have fifth-rank mecha, even if you have the Power of Time, without reaching the fifth rank, you will inevitably die!"

"You only have one path! Believe in me! Gain my protection."

Hearing this, Su Yu fell silent.

He knew that what Brutality said was the truth!

He remembered a thousand years ago when Zhang Chenfeng was eroded to death.

And twenty years ago when the Brutal Evil God sent an entire city of brutal believers.

The Brutal Evil God sent that city of brutal believers back then with one purpose, to tell Su Yu that believing in It leads to survival, potentially even preserving humanity alive.

Otherwise, all would die!
