

Infinite 911

Chapter 911: Similar Fates, the True Meaning of "Not Enough"

Whether the "Dark Emperor" truly exists, Su Yu has no evidence.

But through various clues, Su Yu still believes that his guess is highly likely to be true!

There really is a Dark Emperor! And he is currently eroding the Radiant Emperor, turning him into a mummy.

"Fortunately, although the Radiant Emperor's condition is not good, he still seems to barely suppress his dark side."

Su Yu felt somewhat relieved.

If the Radiant Emperor had completely turned dark, he wouldn't just be a mummy but a terrifying Dark Evil God Emperor.

Then in the moment Su Yu prayed to the Radiant Emperor, he would have already died.

The power of this Evil God Emperor is absolute destruction; under His power, there would be no chance of survival.

Fortunately, with the Radiant Emperor's strength and wisdom, he surely thought of a way to suppress the dark side.

Su Yu can seal the Pain Evil God, so the Radiant Emperor should also be able to do so.

However, the dark side of the Radiant Emperor must be much stronger, judging by his mummy-like appearance. It's likely the seal is not very stable.

At this moment, Su Yu thought of something else.

"Looking at it this way, my experiences are really similar to those of the Radiant Emperor!"

Su Yu recalled how he was eroded by the Pain Evil God, while the Radiant Emperor was eroded by the Dark Emperor.

When you look at it, there is indeed some resemblance.

It's likely Su Yu's "COS" succeeded in attracting the attention of the Radiant Emperor partly because of this reason.

He and the Radiant Emperor have similar experiences, which evoked a certain resonance.

And not just because Su Yu made himself look like a mummy.

Upon understanding this, Su Yu was greatly shaken, and more information appeared in his memory out of thin air.

This information was very chaotic, composed of disordered images.

Within them, Su Yu saw himself, his subordinates, the Brutal Evil God, and Pain Evil God.

And then, he saw Zhang Chenfeng, the Second Empire, the Great Rebellion...

Finally, Su Yu's perspective once again elevated, seeing the Radiant Emperor's experience of that great rebellion, seeing the mummified Emperor on the Mechanical Throne.

"What does this mean? Me, Zhang Chenfeng, Radiant Emperor..."

These chaotic images came suddenly.

Moreover, the amount of information was immense, Su Yu was unprepared, and was directly impacted by these images.

However, Su Yu immediately began analyzing these images.

Su Yu found that each of these images was not just simple information but a certain "perspective."

Similar to the perspective Su Yu uses when observing the future with the Power of Time, but with certain differences.

"Is this... destiny?"

Su Yu discovered that at this moment, his perspective seemed not just a simple Power of Time perspective, but a more elusive and ethereal destiny.

The so-called "destiny," Su Yu had already come into contact with.

Su Yu first foresaw the future by using the Subspace Analyzer to enter a quantumized state and foresaw the future.

But he found the future seemed unchangeable, everyone seemed to have a fixed destiny, and Su Yu's original destiny was to be killed by the Vengeful Devil.

However, in the end, Su Yu successfully changed his destiny by killing the Vengeful Devil.

Later, when Su Yu assumed the role of Time Mechanic, he could change the past and determine the future.

For him, the so-called destiny seemed to be meaningless.

But Su Yu was still certain that destiny exists.

Because the "Prophet" Zhou Qing once predicted that everyone would die except for Su Yu.

That prophecy image was destined to happen.

In the end, everyone in the Mechanical City really died once.

Although it was Su Yu who personally planned to kill them once.

But Su Yu's plan might be part of destiny.

Destiny seems to be even higher than the Power of Time.

True destiny seems not to be a complete timeline but a series of "nodes."

The destiny events at those nodes are destined to happen, unchangeable.

Even if Su Yu possesses the Power of Time, capable of modifying the past and future, destiny seems to still ensure certain events happen inevitably; this is destiny.

Unfortunately, that "Prophet" Zhou Qing only made that one prediction all these years.

Otherwise, Su Yu would really like to thoroughly study "destiny."

And now, the images that Su Yu sees are also "prophecies!"

Each image is like Zhou Qing's prophecy pictures from before, capable of being infinitely "zoomed in."

Zoomed in all the way to the quantum level and even further!

These aren't mere pictures but so-called "universal snapshots," containing an unimaginable amount of information.

Back then, just one prophecy image from Zhou Qing almost overwhelmed Su Yu's consciousness.

Now, Su Yu is seeing tens of thousands of images.

If Su Yu hadn't grown much stronger, his consciousness would have already been overwhelmed by this immense amount of information and turned into a fool.

"So, have I now awakened as a [Prophet]?"

Su Yu murmured to himself.

Being able to see prophecy images out of thin air should mean becoming a prophet.

His current perspective is indeed the Prophet's perspective, the perspective of destiny.

However, Su Yu is much stronger than Zhou Qing, able to instantly see so many destiny images.

It's just that there's something off.

Zhou Qing's prophecy images depicted destiny events that would occur in the future, such as the moment when the Mechanical City was annihilated.

But the images Su Yu sees now are all about the "past," they are events that have already happened.

What kind of prophecy is this?

Or rather, this is not a prophecy at all, just a mere observation of past destiny, a review of past history.

Chapter 912: Similar Fates, the True Meaning of "Not Enough" (Part 2)

Those histories are destined, so they will inevitably occur.

Even if Su Yu travels back to the past and changes history now, it would be useless.

With this in mind, Su Yu watches and analyzes those scenes with greater focus.

These scenes are absolutely real, unchangeable histories that can provide Su Yu with useful intelligence.

Soon, Su Yu made an unexpected discovery within the scenes.

He realized that Zhang Chenfeng seemed to have been not only eroded by the Brutal Evil God, but even he himself underwent some strange transformation!

Just like some future version of Su Yu transforming into Pain Evil God, Zhang Chenfeng also has a similar mutation! Another dark Zhang Chenfeng is coming into being, trying to erode his original self!

This dark side is extremely powerful, causing Zhang Chenfeng to lapse into frenzy from time to time.

When Zhang Chenfeng had just established the Azure Second Empire, he imposed a blockade on the planet, not allowing anyone to leave Azure Star.

This sparked widespread opposition, and Zhang Chenfeng cruelly suppressed the dissent, killing many, which later became the fuse for the great rebellion.

Although Su Yu always felt that, facing the threat of the Brutal Evil God, Zhang Chenfeng's approach was correct; he successfully confined the Brutal Evil God within the Azure Star area, preventing it from entering space and harming humans on other planets.

But now, it seems that Zhang Chenfeng's initial actions were influenced not only by reason but also by the dark side.

He could have taken a softer approach but chose brutal suppression!

This was due to the erosion by the dark side!

In the end, perhaps Zhang Chenfeng couldn't bear this erosion.

That's why Zhang Chenfeng, who was so powerful back then, suddenly died!

Yet the methods he left behind after death could seal the Brutal Evil God for ten thousand years.

If the Mechanical Creation left by Zhang Chenfeng was so strong, why did he die?

Now Su Yu understands, initially Zhang Chenfeng wasn't killed by the Brutal Evil God but committed suicide!

He perished alongside his own dark side!

This... is destiny!

"In these destinies, there is me, Zhang Chenfeng, and Radiant Emperor."

"So, am I, Zhang Chenfeng, and Radiant Emperor, sharing similar fates?"

"First it was Radiant Emperor, then Zhang Chenfeng, and now, it's my turn?"

"I thought the similarity in enhancing myself and Radiant Emperor stopped here? I haven't experienced the great rebellion yet, nor have I been truly eroded by the dark side."

Su Yu had a flash of inspiration, pondering a possibility.

Radiant Emperor founded the Human Empire, experienced betrayal, was eroded by the dark side, and turned into a mummy.

Zhang Chenfeng founded Azure Second Empire, experienced betrayal, was eroded by darkness, and ultimately died.

Originally, the gap between these two was too great.

Under normal circumstances, Su Yu wouldn't intentionally find similarities between the two.

But now, from a destiny perspective, Su Yu is extremely certain that Zhang Chenfeng and Radiant Emperor had similar fates.

They are destined to be betrayed, destined to be eroded!

Now, it's Su Yu's turn!

This is inevitable!

"Could it be that Radiant Emperor is also bound by destiny?"

"Or did Radiant Emperor influence destiny?"

Su Yu finds it hard to believe.

Even Radiant Emperor, who is so strong, is bound by destiny? Unable to change?

"No!"

"It should be after Radiant Emperor was betrayed and eroded."

"His experiences formed destiny, in turn influencing Zhang Chenfeng and me!"

"Perhaps, those affected aren't just Zhang Chenfeng and me but all of humanity!"

Su Yu's mind spins, considering another possibility.

It's not that he and Radiant Emperor have similar destinies.

But Radiant Emperor's experiences influenced Su Yu's destiny, even affecting the destinies of all humans.

Su Yu, as a ruler of Azure Star human, "approached" Radiant Emperor, hence inheriting such a destiny!

When Su Yu came to this realization, it seemed he broke through something, achieving clarity.

And those chaotic destiny scenes changed again.

Su Yu vaguely saw a majestic giant emanating boundless light, carrying a shadow of darkness behind him.

Ah!

Su Yu suddenly opens his eyes, realizing his entire body seems to be burning! Breaking apart!

Though moments ago he only briefly glimpsed at the Light-Cast Giant amidst chaos.

Yet that one glance was enough to kill him!

However, moments later, Su Yu discovered that the so-called burning, breaking, was just an illusion, nothing was wrong with him.

"The giant I just saw was Radiant Emperor's true form!"

Su Yu immediately concluded that the giant was Radiant Emperor! And the shadow behind Radiant Emperor was obviously the so-called opposite, Dark Emperor!

This Dark Emperor indeed exists!

"And I'm unharmed because I realized the inheriting of destiny, bringing me 'closer' to the Emperor, enhancing the similarity!"

Su Yu secretly noted that he is now extremely convinced that his analysis was true!

Radiant Emperor influenced his destiny!

"But I haven't experienced rebellion, nor truly been eroded by the dark side yet..."

"Is this what [not enough] means?"

Su Yu contemplated for a moment then put the matter aside.

Soon, Su Yu proposed the plan to utilize the Profession Panel trait to seize the Brutal Evil God's divine position.

Additionally, Su Yu deliberately opened the Evil God Soldier Mecha's seal beforehand to consult Pain Evil God's opinion.

Although he didn't manage to ask much, he used this opportunity to reveal the audacious plan to Pain Evil God.

Then, Su Yu proceeded with the so-called plan step-by-step, beginning to research spiritual power.

Attempting to erode the Brutal Evil God, seizing the divine position.

Then one day, while Su Yu was researching, he suddenly felt paralyzed.

Unbounded pain struck, the Power of Pain! Fifth-tier Power of Pain!

A moment later, the pain turned into extreme pleasure, making Su Yu feel utterly comfortable; such intense changes made his firm resolve somewhat shaken.

At the same time, Su Yu's body, which had just recovered, became shriveled again! Power of Desire! Also, fifth-tier!

Instantly, the pleasure vanished rapidly, reverting to unmatched pain!

Like falling from Heaven to Hell, the sudden shift shocked Su Yu, almost rendering him unable to hold himself together.

And then, yet another change, Power of Pain turned into Power of Desire again!

Within this short time, such extreme changes have occurred thousands of times, subjecting Su Yu's spirit to extreme torture.

"You were too careless!"

A cold voice echoed in Su Yu's mind.

It was Pain Evil God!

Without his notice, its power seeped out from the Evil God Soldier Mecha, eroding Su Yu!

It was due to Su Yu's last seal-opening that ultimately gave Pain Evil God a chance!

Moreover, this erosion wasn't merely by Power of Pain but also by Power of Desire!

Pain Evil God indeed deserves another title of Su Yu; Su Yu can reverse the Power of Pain, it can do the same.

Also, Pain Evil God's reversed Power of Desire is directly fifth-tier, significantly stronger than Su Yu's creation!

In a moment, Su Yu was under its control!

"..."

Su Yu ignored Pain Evil God's words, using his strong will to resist the erosion from Pain Evil God.

He knew Pain Evil God hadn't truly broken through the seal, only able to seep out a small fraction of power.

Despite Pain Evil God's continuous switch between Power of Pain and Power of Desire, increasing the harm dramatically on spiritual will.

But these powers were ultimately "insufficient in quantity," and Su Yu could still barely resist.

Yet, he could only resist indeed.

Su Yu at this moment had lost control over his body, sitting motionlessly in the main control chair, incapable of any further action.

In this state, he couldn't meditate, couldn't cultivate, forced to endure endless torment, watching Subspace tides erupt, then die within those tides.

Pain Evil God has already won!

However, Pain Evil God was unaware, Su Yu was inwardly acknowledging: "This is correct... just lacking one rebellion!"

Chapter 913: Tier 5 Power of Spirit! Praise the Emperor!

Although Su Yu was corroded by the Pain Evil God and turned into a mummified corpse, unable to move on his seat.

For him, this was part of his plan all along, he intentionally allowed the Pain Evil God to corrode him!

Previously, Su Yu deliberately unsealed the Pain Evil God and conversed with it, indirectly revealing his plan to seize the Brutality God position to the Pain Evil God.

In fact, Su Yu's intention was for the Pain Evil God to permeate its power and erode him.

This way, Su Yu's experience would more closely mirror that of the Radiant Emperor, both being eroded and controlled by their dark sides, becoming mummified remains.

Thus, his fate aligns more closely, becoming "nearer" to the Radiant Emperor.

So, after the Pain Evil God completed its erosion of Su Yu, Su Yu felt a sudden brightness before him, and a scene reappeared.

In the scene, the Light-Cast Giant, suspected to be the true form of the Radiant Emperor, became clearer!

This time, Su Yu stared at this giant for a second, and then the scene disappeared.

After the scene disappeared, Su Yu once again felt that burning illusion all over his body, but it wasn't severe.

This indicated that Su Yu's plan was correct, and by actively allowing the Pain Evil God to corrode him, he successfully drew closer to the Radiant Emperor.

If he experienced another rebellion, he would be even "closer".

Moreover, this time the gains were not limited to just that.

Su Yu quickly discovered that the burning illusion all over his body was not just an illusion; it was real!

Within his will, a powerful force emerged.

This power resembles the Power of Sunshine familiar to Su Yu, but it's of a higher rank, pure and immaculate, filled with the essence of supreme light and clarity.

The form of this power is unlike any energy form Su Yu had seen before, more akin to a concept, a supreme clarity and lightness concept, even a rule!

This power does not exist within Su Yu's body, nor within his soul, but exists as a concept.

The earlier burning illusion over Su Yu's body was caused by this power.

This power is just a sliver, but Su Yu felt as though it was endless.

This is the gift from the Radiant Emperor! It's also the harvest brought by Su Yu's "COS"! It's the power he obtained from the true form of the Radiant Emperor earlier!

The true form of the Radiant Emperor is like a solar fixed star. Su Yu basked in the "sun" for a while and then collected some "solar energy" from it, storing it in his body.

With such a power residing in his will, the torment the Pain Evil God brought to Su Yu was greatly weakened, becoming much more bearable.

The Pain Evil God alternated between the Power of Pain and the Power of Desire, tormenting Su Yu's spirit to a terrifying extent.

If it weren't for Su Yu possessing these two powers, having a certain degree of "resistance" against them, he would have long succumbed, collapsing mentally.

Even though Su Yu had resistance, he could only barely maintain his mental integrity; the torment was still there, with every second feeling as long as a hundred years, unbearably painful.

Su Yu considered himself strong-willed, but if such torment were to last ten or twenty years, whether he could maintain his consciousness then is truly uncertain.

But now, everything is no longer a problem.

The power of the Radiant Emperor has become Su Yu's greatest confidence.

The power of the Radiant Emperor didn't directly diminish the Pain Evil God's power in any way.

It merely ignited Su Yu's own will, ensuring his heart is forever filled with courage, perseverance, and hope, never collapsing, never losing the will to fight.

Su Yu's will and spirit were continually strengthened under the stimulation of this power from the Radiant Emperor!

In a short period, it had already been enhanced several times over!

Such a rate of enhancement is simply incredible.

At the same time, the power of the Radiant Emperor was also being continuously consumed.

As Su Yu's will grew stronger, that power was rapidly depleting as well.

Just like plants absorbing sunlight for growth.

Until, in the end, the power of the Radiant Emperor was consumed to a barely visible trace.

Su Yu's will and spirit were now enhanced to an incredible extent.

That was... the level of the Fifth Rank!

Mental will is an independent domain, completely different from energy, matter, data, time, memory... It's a very formidable and unfathomable field, difficult to enhance, with very few related professions.

The previous Ghost Emperor excelled in this domain. He once extracted a planet's spiritual energy, the "Power of Star Soul", from the planet's energy, which was a fifth-tier spiritual energy capable of launching fifth-tier spiritual attacks.

Back then, if it weren't for Su Yu possessing the Power of Time, allowing him to time travel and revive, he would have been hypnotized to death by the Ghost Emperor's "Power of Star Soul", proving its strength.

Now, Su Yu's mental will, under the catalytic stimulation of the Radiant Emperor's power, has reached this level as well.

Moreover, unlike the Ghost Emperor's "Power of Star Soul", this is entirely Su Yu's own power.

No usage limits, no limit on times!

If the Ghost Emperor were to resurrect now and use the "Power of Star Soul" against Su Yu, Su Yu could directly ignore it.

"Has my mental will actually reached the Fifth Rank first?"

At this moment, Su Yu found it unbelievable within his heart.

Normally, to truly master Fifth Rank power, one must hold a ceremony to ascend to the Fifth Rank.

Outside of that, there's no other way.

Neither the Ghost Emperor's Power of Star Soul nor Su Yu's Evil God Soldier Mecha were true Fifth Rank entities; they were external forces.

Chapter 914: Tier 5 Power of Spirit! Praise the Emperor!

Even though Su Yu had the Evil God Soldier Mecha, and the Ghost Emperor possessed the Power of Star Soul, both could rival the fifth rank in combat power.

However, things like spiritual will are difficult to rely on external forces.

So, if the two of them were eroded by a fifth-tier Evil God, they could only withstand it with a fourth-tier spiritual will, which wouldn't stand a chance.

But now, Su Yu has broken this rule.

Directly at the fourth class level, he possessed a fifth-tier spiritual will!

This was the Radiant Emperor's gift, an incredible power!

However, Su Yu speculated that his fifth-tier spiritual will at this moment could not be maintained forever.

The Radiant Emperor's power was like a strong "stimulant," forcibly elevating Su Yu's spiritual will to the fifth tier.

But once the "effect" wore off, it would likely fall back down again.

Yet, how long can this effect be sustained? Using the Power of Time, Su Yu briefly glimpsed into the future and discovered that he could maintain the fifth-tier spiritual will until the Subspace Tides erupted.

"The 'effect' is truly powerful, worthy of being produced by the Emperor, quality assured..."

"Praise the Emperor!"

Su Yu couldn't help but feel grateful, sincerely thanking the Radiant Emperor in his heart.

Now, his mood was very relaxed.

At this moment, the Pain Evil God's infiltration was nothing to Su Yu; he could completely ignore it!

Although the Pain Evil God was also fifth rank, the power it exuded was not at full strength, so to Su Yu, who possessed a fifth-tier spiritual will, it was already no threat!

Su Yu appeared as the same dried corpse, unmoving on the main control seat, but it was all a facade; he could actually move freely.

Yet, Su Yu did not reveal this and remained sitting quietly in the main control seat.

Currently, the Pain Evil God was unaware of Su Yu and the Radiant Emperor's matter; even using the Power of Time to observe the future would reveal nothing unusual.

Because Su Yu's change existed only in his spiritual will, which was comprehensible only to himself, it was undetectable from mere appearances.

The Power of Time's future observation can generally only view, but not delve deep into one's heart.

In addition, since Su Yu also possesses the Power of Time, observations of his future are inherently inaccurate.

After some targeted disguise, even though the Pain Evil God was fifth rank, it could not see through him.

Before Su Yu truly launched an attack with his fifth-tier spiritual power, no information of this aspect could be found among the possibilities of the future; only Su Yu himself could sense it.

Su Yu utilized this blind spot to his advantage, contemplating a bold thought!

Seize this opportunity to reverse-infiltrate the Pain Evil God and seize its divine position!

Indeed, the whimsical plan Su Yu had earlier could now truly be initiated!

Previously, Su Yu's spiritual will was in a disadvantaged position; the idea of reverse-infiltrating a fifth-tier Evil God was pure folly.

That plan was simply Su Yu deceiving the Pain Evil God.

But now, the situation was reversed; Su Yu's spiritual will had reached the fifth rank, an unrestricted fifth rank.

Conversely, the Pain Evil God was sealed by the Evil God Soldier Mecha, greatly restricted.

In the spiritual domain, the strength and weakness between the two had actually reversed!

Not only that, but a tiny "seed" of the Radiant Emperor's power remained.

This seed seemed like the final core; Su Yu could no longer absorb any energy from it.

In fact, the opposite occurred; it was absorbing Su Yu's spiritual power, continuously growing.

However, the absorption speed was very slow; it seemed Su Yu's spiritual power was not very "nutritious" for it.

Moments later, it stopped absorbing Su Yu's spiritual power and began absorbing Su Yu's Power of Pain and Power of Desire.

These two negative energies were torment to Su Yu, but to this "Radiant Seed," it seemed to be a great supplement.

Each bit absorbed made it grow rapidly, extraordinarily fast.

This trace of the Radiant Emperor's power, even if only the last core remained, was still very miraculous.

It seemed indestructible, comparable to the Evil God Undying, perhaps even more miraculous!

Su Yu quickly slowed down the Radiant Seed's absorption, lest the Pain Evil God discovered the anomaly.

Despite its wonder, the Radiant Seed was not resistant to Su Yu's control; instead, it was very "obedient," ceasing absorption at Su Yu's mental command, even sending out a wave of spiritual energy, seemingly somewhat favorable.

Su Yu sensed that the Radiant Seed was not an inanimate object but had some faint instinctual will, like a small animal.

Now, it seemed to regard Su Yu as its master? As the Radiant Emperor?

This was the advantage Su Yu gained by "cosplaying" the Radiant Emperor.

Otherwise, even if Su Yu was powerful, he wouldn't be able to command this miraculous Radiant Seed.

Observing how obedient the Radiant Seed was, a bold plan emerged in Su Yu's mind.

This Radiant Seed, after some nurturing, seemed usable to infiltrate the Pain Evil God!

Although Su Yu had fifth-tier spiritual will, the Pain Evil God was also fifth rank, making the infiltration challenging.

However, with this unknown-tier Radiant Seed, it should be much easier.

The Radiant Seed seemed to be the nemesis of the Power of Pain and Power of Desire; if inserted into the Pain Evil God, it could crazily absorb its spiritual energy. Su Yu could then launch an erosion attack with spiritual power, significantly increasing the success rate.

However, Su Yu did not act rashly.

He was not proficient in the spiritual domain, and although he had acquired the Ghost Emperor's legacy earlier, he had not delved deeply into it.

Now, having just gained fifth-tier spiritual power, he needed time to familiarize himself and practice the Ghost Emperor's inherited knowledge.

Additionally, the Radiant Seed needed some cultivation; otherwise, in its current "weak" state, directly inserting it into the Pain Evil God could backfire, causing huge losses to Su Yu.

Thus, Su Yu patiently laid low, appearing completely controlled by the Pain Evil God, while in secret, he was studying the Ghost Emperor's legacy diligently.

The Ghost Emperor had profoundly researched the spiritual domain, almost reaching the fifth-tier, only lacking a ritual.

Although Su Yu's profession differed from the Ghost Emperor, he could still learn from the latter's use of spiritual energy techniques.

For instance, the technique of extracting the Power of Star Soul was usable by Su Yu!

Essentially, this technique extracted fifth-tier spiritual power from planetary energy, compressing and purifying it into a powerful spiritual attack method.

It could even be used to hypnotize oneself, granting temporary, pseudo-fifth-tier power.

Through research on this technique, Su Yu could also compress and purify his fifth-tier spiritual power, gaining equally strong, or even stronger power.

This technique for purifying the Power of Star Soul was originally a fifth-tier spiritual combat technique, intended for purifying self-spiritual energy.

It was because the Ghost Emperor lacked the rank that he sought the Power of Star Soul as an external aid.

Now that Su Yu possessed powerful fifth-tier spiritual power, he was utilizing the technique as originally intended!

While studying, Su Yu also "cultivated" that Radiant Seed discreetly.

The seed fed on negative energies like the Power of Pain and Power of Desire.

To keep his secret hidden, Su Yu fed it with his cultivated Power of Pain.

He occasionally fed it bits of the Pain Evil God's power secretly.

The Pain Evil God could sense when its power occasionally diminished.

But it thought this was a result of Su Yu's resistance.

After all, Su Yu was its core, powerful and determined, and naturally wouldn't sit still, definitely resisting and consuming its power.

Or rather if Su Yu didn't resist at all, it would be strange.

Thus, Su Yu's occasional "feeding" did not raise any suspicion in the Pain Evil God.

So, as days and years passed.

Su Yu's research on the Ghost Emperor's technique for purifying spiritual energy deepened steadily.

Meanwhile, the cultivation of the Radiant Seed also reached maturity, restored to nearly its former scale.

"The time has come..."

Su Yu made up his mind.

Chapter 915: Activate! Spiritual Hypnosis, Rewriting Reality!

For this day, Su Yu had been preparing for ten years.

During these ten years, he has mastered the purification technology of spiritual power left by the Ghost Emperor.

At the same time, Su Yu has cultivated the Radiant Seed to "maturity," and cultivated it a total of thirty-seven times.

To cultivate the Radiant Seed to maturity means that Su Yu used the Power of Pain and the Power of Desire to nourish it from a weakened state to its initial strength.

Originally, Su Yu wanted to see if he could feed it to a stronger state.

Unfortunately, its growth seemed to have limits. Once it reached its original strength, it stopped changing, and no amount of Power of Pain and Power of Desire would help.

Su Yu could only absorb the strength of the Radiant Seed again to avoid waste.

After breaking through the Fifth Rank in spiritual power, absorbing the power of the Radiant Seed only enhances the "amount" of spiritual power, making it difficult to elevate its tier.

Moreover, increasing it was very challenging. It seems that Su Yu's rank had not reached the Fifth Rank, making further improvement tough, much like the Radiant Seed.

However, if spiritual power is depleted and then restored using the power of the Radiant Seed, it would be much faster.

Spiritual power is actually a special type of spiritual energy that can be depleted.

However, spiritual power involves abstract elements like thought, intention, and will, which are somewhat "idealist" and difficult to deplete.

As long as consciousness exists, spiritual power exists.

Spiritual power is actually equivalent to the so-called "soul."

Therefore, after extracting the spiritual power from the energy of the planet, the Ghost Emperor named it the "Power of Star Soul," meaning the soul power of the planet.

Using spiritual power for attacks, hypnosis, etc., wouldn't consume much spiritual power at all.

It's like using cold weapons to attack an enemy; as long as the enemy's strength isn't too outrageous, at most only some wear and tear occurs, rather than consuming the weapon directly.

It's also like an ordinary person using muscles to throw punches and kicks; at most, it consumes some physical energy, while the muscles are still part of the body, not consumed. It would be strange if a punch knocked off a piece of muscle.

Spiritual power is like the "cold weapons" and "muscles" on the consciousness level, difficult to deplete.

The spiritual power purification technology passed down by the Ghost Emperor can purify spiritual power, change its state, and turn it into an energy with strong attack power.

It's like reforging cold weapons into hot weapons.

Or using biotechnology to turn one's flesh and blood into biological bombs.

In this way, the power of purified spiritual power greatly increases, but it also becomes consumable.

Once this purified spiritual power is used, it's truly consumed.

Moreover, once consumed, it is difficult to restore, not something that can be recovered by simply absorbing energy.

It's like turning cold weapons into hot weapons, firing a shell and blowing everything up, making it hard to recover the materials.

Or like turning an ordinary person into a flesh bomb, directly losing their life, let alone recovering.

So when the Ghost Emperor extracted the Power of Star Soul, it wasn't just because he wasn't truly a Fifth Rank Transcendent, but also because he didn't want to consume his own spiritual power, which would weaken him.

Of course, all this was not a problem for Su Yu, who possessed the Power of Time.

Even if his spiritual power was completely depleted, or even if he directly died, he could forcibly recover with the Power of Time.

With the magic of the Power of Time, one can come back to life even after dying, let alone the mere depletion of spiritual power?

Of course, this would accumulate a lot of Time Rebound.

Using the Power of Time to restore Fifth Rank spiritual power, each accumulation of rebound would surely be astonishing.

And at this moment, Su Yu, in order to complete the plan of eroding the Pain Evil God, couldn't care less.

He directly purified and compressed all his spiritual power, consuming it completely.

But just as Su Yu was preparing to use the Power of Time to restore his spiritual power, he was pleasantly surprised to discover that the power of the Radiant Seed could help him recover his spiritual power.

This immediately delighted Su Yu, as it meant he wouldn't need to accumulate a large amount of Time Rebound.

Moreover, if the Power of Time was used, it could easily be detected by the Pain Evil God, who also possessed tremendous Power of Time and was sensitive in this respect.

And the Radiant Seed was a power outside the perception of the Pain Evil God, belonging to the power of the Radiant Emperor!

Thus, Su Yu kept using the Ghost Emperor's technology to purify and compress his spiritual power, then restored himself with the Radiant Seed.

Once the Radiant Seed matured, it could restore Su Yu's spiritual power more than twenty times.

In this way, through continuous ten years of effort, Su Yu purified and compressed his own spiritual power ninety-two times!

This purified spiritual power contained the spiritual power of a total of ninety-two Fifth Rank Su Yu's, terrifying in "quantity."

At that time, the Ghost Emperor's purified Power of Star Soul wasn't very much in "quantity."

After all, the Ghost Emperor wasn't truly a Fifth Rank Transcendent; extracting Fifth Rank Power of Star Soul was already very difficult.

He even divided the Power of Star Soul into many parts to use sparingly.

But the power purified by Su Yu was all compressed into one, which could only be used once.

It was intended to maximize the increase in power! To completely hypnotize and erode the Pain Evil God.

This purified spiritual power exceeded the spiritual power of the Pain Evil God by dozens of times in "quantity!"

In terms of "quality," because of the purification and compression, this spiritual power greatly enhanced in power.

Its power was immense.

For example, it could be used like the Ghost Emperor did to hypnotize himself, allowing him to possess the combat power of a powerful Fifth Rank.

Chapter 916: Activate! Spiritual Hypnosis, Rewrite Reality! (Part 2)

If Su Yu uses this spiritual power to hypnotize himself, he can elevate himself to the true Fifth Rank in a short period, even surpassing the power of the Pain Evil God.

In other words, if Su Yu uses this spiritual power now, he can defeat the Pain Evil God directly!

Realizing the power of this entity, Su Yu couldn't help but marvel at the talent of the Ghost Emperor, who was able to develop such high-level spiritual power technology at the Fourth-tier.

However, Su Yu's goal is to erode the Pain Evil God, not to confront it head-on, so he won't use it that way.

This highly purified and compressed spiritual power is only for eroding and hypnotizing the Pain Evil God.

But even with such a powerful weapon, Su Yu still felt uneasy.

Although this power is strong, it may not truly hypnotize the Pain Evil God.

The Pain Evil God is essentially Su Yu himself; he wouldn't underestimate himself.

So Su Yu kept another trump card: the Radiant Seed!

After Su Yu cultivated the Radiant Seed to maturity for the last time, he didn't absorb its power but kept it in reserve.

When the hypnosis is activated, he will embed this mature Radiant Seed into the Pain Evil God to help erode it.

Everything is ready now, so Su Yu will take action!

At this moment, Su Yu, resembling a dry corpse, is quietly seated on the Mechanical Throne.

The power of the Pain Evil God continues to erode Su Yu's body and spirit endlessly.

The Pain Evil God has been trying to completely erode Su Yu for ten years, to control his body and will, making Su Yu unseal the Evil God Soldier Mecha and release it.

Unfortunately, it never succeeded, only managing to loosen the seal on the Evil God Soldier Mecha slightly.

But it was still far from completely unsealing.

Initially, the Pain Evil God only needed to wait for the subspace tide to explode, and Su Yu would inevitably die, so there was no need for haste.

But with the Brutal Evil God nearby, it couldn't wait that long, fearing that things might change with the passage of time.

Thus, the Pain Evil God has been secretly preparing methods over the past decade.

The means it prepared was also spiritual power!

The Pain Evil God also knows the spiritual power purification technology of the Ghost Emperor.

It didn't learn it from Su Yu's memory, though.

After all, when Su Yu acquired the Ghost Emperor's technology, the Evil God Soldier Mecha had already been forged, and it had been sealed, unable to obtain Su Yu's memory.

It directly obtained it from the Ghost Emperor.

The Pain Evil God possesses Fifth-tier Power of Time, even capable of crossing time and space, to teach [King] the Power of Pain to plan in advance ten thousand years ago.

With such powerful means, peering into the secrets of the Ghost Emperor was simply effortless.

If it weren't for the Ghost Emperor's past involving the Brutal Evil God, maybe it would have been influenced by the Pain Evil God's planning long ago, cultivating the Power of Pain and becoming the "Pain Emperor."

Over these ten years, the Pain Evil God has been continually using the Ghost Emperor's technology to purify its own spiritual power.

The Ghost Emperor truly was a talent; his spiritual power technology, both Su Yu and the Pain Evil God praised after using it.

The Pain Evil God and Su Yu made the same choice to purify all their spiritual power, increasing its lethality as much as possible.

After all, they were essentially the same person.

However, the Pain Evil God doesn't have the Radiant Seed, so after its spiritual power is exhausted, it needs to consume Power of Time to recover.

Moreover, it has to bear the consequences of Time Rebound.

If not for the years during which Su Yu was eroded, loosening the seal on the Evil God Soldier Mecha significantly, the Pain Evil God would have no authority to activate Power of Time to restore its own spiritual power.

Even now, its use of Power of Time is greatly restricted by the Evil God Soldier Mecha.

Therefore, over the decade, the Pain Evil God only managed to purify its own spiritual power seven times!

At this moment, it believes that seven purifications of spiritual power are enough!

As a Fifth-tier Evil God and one who holds the dual domains of Pain and Time, its spiritual power is inherently formidable.

Having used the Ghost Emperor's technology to purify it seven times, wouldn't handling a mere Fourth-tier Su Yu be a piece of cake?

In fact, even one purification is more than sufficient to deal with Fourth-tier Su Yu.

Still, the Pain Evil God is cautious, fearing Su Yu has unknown trump cards, so it purified its spiritual power seven times, ceasing only when the accumulated Time Rebound reached its limit.

Now, it's ready to launch an attack!

In the next moment, the Pain Evil God directly used its seven-fold purified spiritual power to launch a spiritual attack on Su Yu!

It launched the attack even before Su Yu!

Su Yu was initially planning to adjust his condition for a month or two to launch the attack in the best state.

But the Pain Evil God preempted him!

The purification of the Pain Evil God's spiritual power was invisible and formless; there was no energy fluctuation at all as it invaded Su Yu's spirit!

Su Yu's spirit instantly blurred; at that moment, he seemed to forget even his own surname.

He dimly felt that he was part of a great existence, now returning to the origin.

The so-called great existence was naturally the Pain Evil God.

The Pain Evil God used its immensely powerful spiritual power, purified seven times, to hypnotize Su Yu.

This hypnosis was not merely a spiritual-level power but a [rewriting of reality].

Su Yu instantly fell under its influence, from body to spirit, all set to become part of the Pain Evil God.

If the Pain Evil God succeeded, then Su Yu would have never existed from the start, and there would have been only the Pain Evil God.

The Pain Evil God would be the true entity!

Su Yu is merely a later emergence, a human essence part split from the Pain Evil God, now yearning to return to the original.

In that case, the Pain Evil God would devour Su Yu completely, achieving perfection.

"Not good!"

At the critical moment, Su Yu awakened.

Under normal circumstances, the Fourth-tier Su Yu couldn't possibly resist the seven-fold spiritual power attack of the Pain Evil God.

But due to the stimulation from the Radiant Seed, Su Yu long possessed Fifth-tier spiritual power, thus demonstrating high resistance to such attacks!

Su Yu immediately became clear-headed, realizing it was the Pain Evil God's attack.

"It was quicker than me... as expected of myself."

In that moment, Su Yu even found it somewhat amusing.

He and the Pain Evil God had truly thought alike.

Fundamentally, they were the same person.

While the Pain Evil God was a Fifth-tier and Su Yu a Fourth-tier, placing the Pain Evil God at a huge advantage.

Su Yu's advantage was being human!

He can connect with the Radiant Emperor, receiving aid, something the Pain Evil God couldn't anticipate because it wasn't human.

Thus, Su Yu immediately launched a counterattack.

With a thought, Su Yu utilized his ninety-two times purified spiritual power.

This purified spiritual power was also invisible, even more concealed than the Pain Evil God's.

It seems that the more spiritual power is purified, the more concealed it becomes.

The ninety-two times purified spiritual power Su Yu wielded almost vanished from this world.

If not for its lingering connection with Su Yu, it would have been almost imperceptible to him.

As its master, Su Yu could barely sense it; how, then, could the Pain Evil God?

In an instant, this ninety-two times purified spiritual power dissolved the seven-fold spiritual power attack of the Pain Evil God and began a reverse erosion.

Instantly, the Pain Evil God was eroded and hypnotized.

Yet, the Pain Evil God's hypnosis on Su Yu was aimed at making Su Yu never exist, extremely ruthless.

Su Yu's hypnosis on the Pain Evil God couldn't do the same.

After all, this is a true Fifth-tier Evil God, one holding the dual domains of Pain and Time.

Moreover, having eroded Su Yu for ten years, it compensated for its imperfection, gaining a certain degree of Evil God immortality.

Even if Su Yu managed to hypnotize it through spiritual power, rewriting reality to make the Pain Evil God cease to exist, it would revive in the depths of subspace, which would be troublesome.

This being a Fifth-tier Evil God is truly hard to kill; despite Su Yu's carefully prepared trump cards, it's hard to achieve a definitive victory.

Therefore, Su Yu's hypnosis on it pertains to... destiny!

Chapter 917: Rewriting Fate, Hypnotizing the Pain Evil God!

The Pain Evil God unleashed spiritual hypnosis on Su Yu, rewriting reality.

However, Su Yu's hypnosis aimed further, at rewriting destiny!

Destiny is the fact that inevitably occurs.

Stronger than the Pain Evil God's reality rewrite.

Yet, Su Yu still found the nebulous concept of destiny elusive.

Although earlier, under the influence of Radiant Emperor, Su Yu seemed to awaken as a "Prophet," able to see inevitable destinies.

But the destinies Su Yu saw were mainly historical events that had already occurred.

Regarding future destinies, Su Yu hadn't seen a single one.

Su Yu was also unsure if he was a legitimate "Prophet."

As for rewriting destiny with spiritual hypnosis, he had no starting point; he couldn't see the real destiny, so how could he rewrite it?

Moreover, ninety-two times the concentrated spiritual power seemed far from enough for destiny rewriting.

Thus, Su Yu's notion of rewriting destiny was filled with tricks.

First, Su Yu used powerful spiritual hypnosis to let the Pain Evil God see some Destiny Images in that instant.

Those images were destinies Su Yu had seen before, including the destiny of Radiant Emperor, Zhang Chenfeng's destiny, and Su Yu's destiny.

However, Su Yu deliberately concealed the destiny of Radiant Emperor, letting the Pain Evil God see only Zhang Chenfeng's and his own destiny.

Due to the influence of Radiant Emperor, Zhang Chenfeng was destined to be eroded by his own dark side and betrayed by his subordinates.

This destiny now befell Su Yu, who was also doomed to be eroded by his own dark side and betrayed by his subordinates.

What Su Yu showed the Pain Evil God were these two destinies!

Yet, Su Yu made some modifications and disguises to them.

Su Yu let the Pain Evil God see... that Su Yu inherited Zhang Chenfeng's destiny, destined to be betrayed by his subordinates just like Zhang Chenfeng.

And then swallowed by his dark side, leading to complete death.

This is the set destiny, impossible to alter.

Until this process is complete, regardless of the Pain Evil God's plans, he cannot kill Su Yu or completely and truly fuse and devour Su Yu.

Only after the process is finished—which is when Su Yu's subordinates rebel, and personally kill Su Yu—can the Pain Evil God seize the opportunity to complete his thorough erosion of Su Yu!

Moreover, the Pain Evil God can use Su Yu's rebellious subordinates to kill himself and resurrect in the depths of Subspace.

Thus achieving true perfection.

Simultaneously, he can completely seize Su Yu's Profession Panel!

These destinies are disguised by Su Yu through modifying the original Destiny Images he saw.

Because they were originally true Destiny Prophecy Images that could be infinitely enlarged, they had extremely strong persuasive power.

Even the Pain Evil God found it difficult to decipher.

However, a disguise is still a disguise.

The precision of Su Yu's modification of the Destiny Prophecy Image definitely could not reach the true "infinite enlargement," surely leaving flaws.

But under powerful spiritual hypnosis, the Pain Evil God would ignore these flaws, believing these prophecy images were all true.

Fifth-tier spiritual power can already rewrite reality; rewriting thoughts through hypnosis is naturally simple.

Nonetheless, the Pain Evil God is ultimately a Fifth-tier Evil God, so modifications to His thoughts cannot be overly simple and direct.

Otherwise, He would notice something amiss.

Hence Su Yu needed to use the Destiny Images for disguise and deception, allowing the Pain Evil God to naturally and reasonably accept Su Yu's hypnosis.

If this hypnosis succeeds, the Pain Evil God would temporarily give up on completely killing Su Yu, instead choosing to promote this prophetic destiny, encouraging Su Yu's subordinates to launch a rebellion.

Su Yu "cosplaying" Radiant Emperor had an issue of insufficient similarity, still lacking one major rebellion.

And after completing the hypnosis, the Pain Evil God would help Su Yu fill this final gap.

Once the rebellion is complete, Su Yu would be even "closer" to Radiant Emperor, thereby gaining more powerful Power of Radiant Emperor.

Throughout this process, Su Yu would continuously use spiritual power to erode the Pain Evil God secretly. With the presence of ninety-two times spiritual hypnosis, He wouldn't notice.

Once the process is complete, Su Yu's "similarity" to Radiant Emperor would enhance again.

At that time, Su Yu would gain even stronger Power of Radiant Emperor!

Simultaneously, Su Yu would complete his erosion of the Pain Evil God.

Then, when the Pain Evil God thought He had eroded Su Yu, the reality was that Su Yu had eroded Him.

Su Yu, having Fifth-tier spiritual power along with ninety-two times purified spiritual hypnosis, naturally could complete the erosion of the Pain Evil God.

However, this erosion couldn't be perfect; the Pain Evil God remained the dominant godly position, forcing Su Yu to lie dormant and making total obliteration impossible.

If Su Yu attempted to completely erode the Pain Evil God and eliminate His consciousness, at the final moment of a life-and-death crisis, He would surely activate survival instincts and awaken from the hypnosis.

By then, it would depend on the power of the new Power of Radiant Emperor Su Yu obtains after completing destiny.

If things went smoothly, with spiritual hypnosis and Power of Radiant Emperor, Su Yu would completely take over the Pain Evil God's godly position, eradicating or suppressing the Pain Evil God's will entirely!

Then, it would be equivalent to Su Yu bypassing the ritual, breaking through the Fifth-tier!

He could even exploit this, resurrecting and reaching the depths of Subspace, launching a surprise attack on the Brutal Evil God!

This is Su Yu's plan, his written [Destiny].

Under strong spiritual hypnosis, the Pain Evil God will inevitably follow this path unwittingly.

Chapter 918: Rewriting Fate, Hypnotizing the Pain Evil God!

Su Yu wanted to know if the destiny he personally wrote could become reality?

All of this, however, was just in Su Yu's plan and hadn't become reality yet.

The current reality was that Su Yu had already hypnotized the Pain Evil God.

At this moment, numerous chaotic destiny images suddenly appeared in the consciousness of the Pain Evil God.

"Is this... destiny? Have I become a Prophet?"

The Pain Evil God was momentarily stunned, then quickly understood.

Even though as an Evil God, becoming a Prophet seemed quite unbelievable.

At His level, it was hard to determine whether a non-human entity could become a Prophet.

But being Su Yu's dark side, rounding up, He had a significant connection with humanity, and at this time He was devouring and eroding Su Yu, so maybe Su Yu awakened into a Prophet, affecting Him?

With Su Yu's ninety-two times spiritual power hypnosis, the Pain Evil God quickly accepted this "setting."

In the destiny seen by the Pain Evil God, Su Yu would not die from His erosion this time.

Instead, Su Yu would miraculously survive, even unleash potential, and his spiritual power would greatly increase, approaching the Fifth Rank level.

"How could such a destiny exist? I do not believe it!"

"Su Yu, is this your trump card?"

The first reaction of the Pain Evil God was disbelief!

He prepared for ten years, refining his own spiritual power seven times, compressing it together to hypnotize Su Yu, a Fourth Rank, how could it not kill him and instead arouse Su Yu's potential?

Just because of this so-called destiny?

This doesn't make sense at all, so the Pain Evil God simply did not believe it.

However, soon He believed.

Because Su Yu, who had been completely controlled by His spiritual hypnosis and was about to merge with Him, suddenly struggled.

Moreover, He could sense that Su Yu's struggle was very intense and increasingly stronger.

Su Yu's spiritual power was indeed rapidly increasing! From the Fourth Rank, in a short time, it had begun to approach the Fifth Rank!

If this continued, Su Yu's spiritual power would truly break through to the Fifth Rank.

This was Su Yu intentionally releasing some of his own spiritual power for the Pain Evil God to see.

Seeing this scene, no matter how indifferent, the Pain Evil God was still shocked.

Seeing Su Yu's spiritual power continuing to rise and about to break through to the Fifth Rank, the Pain Evil God hastily stopped rewriting reality.

Otherwise, if He stimulated Su Yu to possess Fifth Rank spiritual power, it would be difficult to erode and devour Su Yu afterward.

"How could such a thing happen..."

The Pain Evil God couldn't understand, Su Yu was clearly a Fourth Rank, how could his spiritual power suddenly soar and break through to the Fifth Rank in such a short time?

This was completely inconsistent with any Extraordinary Knowledge He knew.

"Could it be because while I was eroding and devouring him, he and I became essentially one in this moment, gaining the essence of the Fifth Rank?"

The Pain Evil God couldn't help but speculate, finding it reasonable.

The Pain Evil God and Su Yu were essentially different sides of one person, Su Yu liked to analyze and speculate, and so did the Pain Evil God.

Adding in Su Yu's ninety-two times spiritual power hypnosis, the Pain Evil God quickly firmly believed this speculation.

He couldn't help but believe it, Su Yu's spiritual power was upgrading on the spot, without falsity.

In this way, the Pain Evil God could no longer hypnotize and devour Su Yu. Otherwise, if Su Yu was stimulated and directly broke through to Fifth Rank spiritual power, what then?

"It seems I must fulfill the destiny to completely devour him..."

According to Su Yu's plan, the Pain Evil God began preparing to push forward with destiny.

However, the seven times spiritual power of the Pain Evil God had not yet been exhausted, since He hadn't completed rewriting reality regarding Su Yu.

Moreover, this was a one-time weapon, not used up and could not be recovered.

The Pain Evil God felt a slight regret, then he activated the remaining rewrite reality power to start the setup.

He wanted to rewrite reality and bring about the great rebellion in destiny sooner!

At the same time, He tried to perform spiritual hypnosis on Su Yu, to make him fall asleep and not interfere.

Even though He couldn't rewrite reality to kill Su Yu, spiritual hypnosis should still be possible, right?

Indeed it was, under the hypnosis of the Pain Evil God, Su Yu's spiritual power quickly weakened, seemingly entering a state of drowsiness, but never fully asleep, even faintly showing signs of a resurgence of spiritual power.

There was no other way, the Pain Evil God dare not stimulate Him again, barely putting Su Yu into a half-sleep half-awake state, as after all, in this state, Su Yu could no longer overturn heaven, only passively await the descending death destiny.

At this point in the progress, Su Yu's plan was actually close to success.

On the surface, it appeared the Pain Evil God had completely controlled Su Yu.

In reality, however, Su Yu had already completely hypnotized the Pain Evil God, making Him fully believe the destiny he fabricated.

However, Su Yu had not fully succeeded, because... the Power of Time!

Su Yu's spiritual hypnosis on the Pain Evil God was a full range hypnosis of the past, present, and future.

The Pain Evil Gods of any time and space were simultaneously influenced.

But, there was an exception!

In a certain future possibility, a human-shaped black hole suddenly awoke: "Not good!"

This future probable Pain Evil God was not affected at all and even discovered something was wrong!

He was the trump card of the Pain Evil God, rigorously extracted from the Evil God Soldier Mecha over ten years.

The Pain Evil God utilized powerful Fifth-Order Time Power, stripping this part of the power from within Himself, severing the connection, and hiding it in a future possibility.

This was His trump card. If something went wrong, He could use this part's power for rebirth, escaping the Evil God Soldier Mecha's control.

However, in doing so, He would fall from the Fifth Rank in strength, no longer the original Pain Evil God.

The original Pain Evil God would develop a new consciousness, unrelated to Him.

At least He could retain His current consciousness and not truly die.

At present, He discovered His main body was being hypnotized! Having His consciousness rewritten!

What destiny, what future, were all fabricated by Su Yu!

"How can this be? Why can Su Yu hypnotize Me?"

The Pain Evil God didn't understand, clearly, He should have been the one to hypnotize Su Yu, why did it turn out the other way, with Su Yu hypnotizing Him?

This was completely abnormal!

"Must awaken the main body quickly!"

No time for more thought, this Pain Evil God's avatar was immediately ready to take action.

Originally, this avatar was meant to abandon the main body, giving up that Fifth Rank strength.

But now, how could He willingly do so? He must awaken the main body!

Now, the main body of the Pain Evil God was like an ordinary person having a nightmare, unable to recall who He was.

As long as there was a power to awaken Him, He would slip free of the hypnotic state and counterattack!

A cold indifferent thought instantly crossed time and space, extending from that future to the "now!"

This thought instantly contacted the "now" Pain Evil God.

"What... is happening..."

The Pain Evil God, who was initially planning on how to propel the so-called destiny, suddenly had a slightly confused consciousness.

This was His avatar awakening Him.

The spiritual hypnosis and consciousness modification Su Yu performed were immediately on the verge of collapse.

Trying to spiritually hypnotize and alter the consciousness of a powerful Fifth-tier Evil God was truly challenging.

Even though Su Yu meticulously prepared, using ninety-two times Fifth Rank spiritual power, coupled with deliberate disguise and guidance.

But under the avatar's alert, it was about to be defied.

Moreover, that hidden future of the avatar was very concealed, making it difficult for Su Yu to locate at once.

This avatar could quickly awaken the main body through the connection with it.

This couldn't go on, the Pain Evil God would soon be fully awake!

"Hmm? I knew it wouldn't be this easy!"

Su Yu, having always monitored the Pain Evil God's condition, immediately sensed the anomaly.

He didn't panic, for this plan was never expected to go so smoothly according to Su Yu's original foresight.

The Pain Evil God was essentially a future aspect of Su Yu, so he was well aware of his own capabilities.

The Pain Evil God surely had a trump card, and wouldn't sit idly waiting for death.

Now he had finally forced out this trump card.

Su Yu immediately used trump for trump, following the spiritual power connection, and sent the Radiant Seed over.

This Radiant Seed, a power of the Radiant Emperor, was inherently able to devour the Power of Pain and Power of Desire.

According to Su Yu's order, the Radiant Seed, relying on instinct, instantly arrived at the hidden future of the Pain Evil God avatar.

Su Yu couldn't find the future where the Pain Evil God avatar was hiding, but the Radiant Seed could!

Chapter 919: The Mystery of the Pain Evil God's Birth, the Outcome is Set

From a transcendent perspective of time beyond ordinary biological thinking, countless future possibilities unfold from the [present], constantly shifting.

A stream of light rushes from the [present] time node swiftly towards the [future].

The future holds endless variations; a tiny change can create a new future possibility. If this were a path, moving forward would present an almost infinite number of "forks."

Even though Su Yu, as a Time Mechanic, can observe the future, he finds it difficult to exhaust all possible future outcomes.

Moreover, as a Fifth Rank, the Pain Evil God possesses Fifth-tier level Power of Time.

Its ability to grasp the future surpasses Su Yu's.

The future possibility where the Pain Evil God's clone exists is extremely concealed, hidden among countless futures.

Under normal circumstances, even if Su Yu is aware of the clone's existence and tries to forcibly locate it, it would take at least a minute.

Don't underestimate this one minute; it refers to the time node of [present], moving forward by one minute.

In the perspective of time, this one minute is magnified billions of times.

It's like when Su Yu previously cycled through twenty years of history thousands of times, the [present] advanced by only a few decades.

One second is enough for the Pain Evil God to awaken its original form from a hypnotic state and still have plenty of time to spare.

The Pain Evil God's ability to split off such a clone is indeed its trump card.

The strength of this clone does not lie in power but in concealment.

Its complete severance from the original form isolates it from the influence of Su Yu's ninety-two-fold spiritual power hypnosis.

"Su Yu, you truly have means, but alas, they are useless against me..."

The Pain Evil God's clone strives to awaken the original form while secretly musing.

Simultaneously, it can't help but ponder its own uniqueness.

This clone's origin is quite peculiar, a result of an experiment by the Pain Evil God.

This experiment is research concerning the Pain Evil God's own origin.

Actually, Su Yu has always been curious about how the Pain Evil God came into being.

Initially, Su Yu thought the Pain Evil God's birth resulted from researching the Power of Time, leading to a future version of him possessing Fifth-tier level Power of Time, capable of retroactively influencing the [present] and manifesting in reality.

This hypothesis holds some logic as Su Yu could possibly become the Pain Evil God. This future possibility with Power of Time traversing back makes sense.

However, as Su Yu's power deepened, he realized there seemed to be a problem.

Su Yu does have the potential to become the Pain Evil God but also to become a normal Fifth Rank. Why is it only the Pain Evil God that returned?

Moreover, any Fifth Rank would have a certain degree of time influence ability.

Like the Brutal Evil God, who could battle the Pain Evil God across past and future timelines, despite lacking the intense mastery of Power of Time.

By this measure, birthing the Pain Evil God doesn't necessarily require studying Power of Time.

It only requires a future possibility of reaching Fifth Rank; this possibility can transcend time and manifest in reality?

If that's the case, achieving Fifth Rank seems a bit too easy.

And there's still the question, why didn't a normal Fifth Rank Su Yu return? Must there only be this one future of becoming the Pain Evil God?

Considering there's no normal Fifth Rank Su Yu, if a Pain Evil God Su Yu can be birthed, then why not a Fear Evil God Su Yu or a Heavenly Punishment Evil God Su Yu?

Later, Su Yu suspected the Pain Evil God's birth related to some peculiarity of the Profession Panel, but there was no evidence.

Besides this, Su Yu even speculated if he experienced some clandestine corruption while employed as a Time Mechanic in that mysterious Dark Space-Time, leading to the Pain Evil God's birth?

For instance, that colossal Mechanical Star Core within the gaseous planet core, Su Yu still doesn't know its purpose or rank.

If that Mechanical Star Core did something covertly to Su Yu, it could be possible.

But again, there's no evidence.

Now, after emulating the Radiant Emperor, Su Yu obtained critical information.

Su Yu guesses that the Pain Evil God's birth might be due to the Radiant Emperor's "destiny" influence.

The Radiant Emperor, as mankind's supreme leader, was eroded by his own dark side, influencing Su Yu, who was also a human leader.

Thus, Su Yu's dark side inevitably emerged, and the Pain Evil God was destined to be born.

This is likely the main reason for the Pain Evil God's birth.

However, this information is unknown to the Pain Evil God.

It also wonders about its origin.

The Pain Evil God understands its birth is unusual.

As a Fifth Rank Evil God, the Pain Evil God has lost humanity, lacking normal human emotions and desires.

But some biological instincts remain, such as... curiosity, which is the instinct of conscious beings.

It puzzles over its origin, wanting to uncover this secret.

Therefore, besides wanting to erode Su Yu to perfect itself, it secretly conducts research into its own origins.

This isn't just to satisfy curiosity; if the Pain Evil God can thoroughly understand its origins, it might have the chance to study the principles and thereby gain the powers of the [future].

Although the Pain Evil God possesses Power of Time, it cannot receive assistance from its future selves.

Chapter 920: The Mystery of the Pain Evil God's Birth, The Outcome Is Decided (2)

For example, if the Pain Evil God had the opportunity to progress further in the future and ascend to a more mysterious Sixth Rank.

Then if He received power from His future self, wouldn't it be equivalent to possessing the power of the Sixth Rank?

Unfortunately, this is impossible. The future Pain Evil God and the current Him are no different; both are Fifth Rank.

Otherwise, if continuously borrowing power from one's future self in this way, wouldn't one become invincible?

Only when the current node reaches the future time node will His future self receive new power enhancements.

This is determined by the essence of time and space, constituting the fundamental constraints of this universe.

If not for these constraints, Transcendents with the Power of Time could arbitrarily extract power from the future, repeatedly stacking it, and I'm afraid the entire universe would face destruction.

The Pain Evil God knew this principle from His inception.

Yet, the existence of the Pain Evil God inherently defies this rule; He Himself is a powerful force born from the future.

Su Yu truly gained tremendous power enhancement from the future!

Su Yu was first endowed with the talent of the Pain Domain across time and space by the Pain Evil God, enhancing himself, which was already remarkable.

Later, Su Yu directly transformed the pain into an Evil God Soldier Mecha, equivalent to a meteoric rise, directly gaining Fifth Tier combat power from the future.

This is somewhat absurd.

The existence of the Evil God Soldier Mecha seems to be challenging the fundamental rules of this universe; Su Yu inexplicably gained Fifth Tier power from the future.

This profoundly impacted the Pain Evil God.

So a decade ago, after the Pain Evil God eroded Su Yu and infiltrated some power into the Evil God Soldier Mecha, He secretly initiated new experiments.

He also wanted to extract power from the future!

And this avatar was the result of His experiments!

The Pain Evil God paid a heavy price to turn a future into reality.

The future is merely a possibility, unreal, all illusionary, like a phantom.

To truly empower one's future self, one must separate part of one's power to traverse into the future.

But in doing so, the total power remains unchanged, which does not enhance strength, and splitting the power into two parts might even weaken it.

Though the Pain Evil God possesses the ability to Determine the Future, making the future real.

That Determining the Future essentially equates to a form of guidance.

It uses the Power of Time to guide the current time node towards the desired future.

When the current time node reaches that future time node, with the present and future overlapping, that future naturally becomes real.

In this way, the future becomes real within the current time node.

Before this, the future remains illusory.

In essence, whether past, present, or future, no matter how He utilizes the Power of Time to traverse, there is only one Pain Evil God; all else is illusory.

This time, however, the Pain Evil God utilized his research on His own essence, coupled with formidable power and wisdom, to make one future truly real.

Henceforth, there were two real Pain Evil Gods!

That Pain Evil God's avatar was born in the future, possessing real power.

The birth of this avatar was the research achievement of the Pain Evil God.

Even though the Pain Evil God did not uncover His own origin, He discovered His uniqueness.

He himself is a flaw in the time-space mechanism of this world, an entity incongruent with the rules of time and space.

He found a bizarre, self-conflicting force deep within His own power.

That force is very weak yet incredibly miraculous.

It is sometimes real, sometimes illusory, constantly in conflict and transformation, with a transformation frequency exceedingly rapid, occurring billions of times per second.

This makes it seem not to exist in this time-space, but a peculiar existence transcending reality and illusion, almost undetectable.

If not for the Pain Evil God's meticulous research into all His power, this sliver of peculiar power might have been overlooked.

The Pain Evil God extracted this peculiar power and sent it to a possibility in the future.

Sure enough, a separate avatar was cultivated with this peculiar power as the core.

This avatar's relationship with the Pain Evil God mirrors the previous relationship between the Pain Evil God and Su Yu.

The two are essentially one yet separate.

Moreover, as the Pain Evil God actively cultivated this avatar, it is under His control, unlike Su Yu, who initially didn't even know of the Pain Evil God's existence.

Therefore, Su Yu's ninety-two times Fifth Rank spiritual power for hypnosis cannot affect this avatar.

This avatar is still growing, actually.

If given enough time, the Pain Evil God might cultivate a Fifth Rank avatar!

Fortunately, Su Yu's plan was executed swiftly, not allowing the Pain Evil God this opportunity.

Currently, this Pain Evil God's avatar has yet to develop combat power and can only lurk in the future, providing assistance to the main body.

Meanwhile, the Radiant Seed, transformed into a radiant stream, is traversing endless future possibilities, instinctively seeking traces of the Pain Evil God's avatar.

And the current time node continues to advance.

The time remaining for the Radiant Seed is only one second, now halfway through.

Once one second passes, the Pain Evil God will awaken the main body, bringing itself to consciousness.

There are still 0.5 seconds left!

However, though only 0.5 seconds remain, time is abundant for the Radiant Seed.

Because according to the Radiant Seed's own time frame, it has been searching for thousands of years!

Ultimately, at 0.6 seconds, the Radiant Seed suddenly burst into a future possibility.

In that possibility, the Pain Evil God's avatar was concentrated on awakening the main body.

In the surprise moment, He was instantly struck by the Radiant Seed.

This avatar, despite its strange origin, possessing a trait transcending the foundational rules of time and space, its power itself isn't strong, only at Fourth Rank level.

While the Radiant Seed can stimulate Su Yu's spiritual power to Fifth Rank in such a short time.

Although it doesn't have Fifth Rank combat power, after all, it isn't a specialized weapon, its essence is exceedingly high.

Moreover, it is highly effective against the Power of Pain energy, capable of devouring the Power of Pain to replenish itself.

Once the Radiant Seed struck the Pain Evil God's avatar, it immediately commenced devouring.

"What is this...?"

Even with its cold disposition, the Pain Evil God's avatar was now astounded.

Before He could react, He was already half-consumed by the Radiant Seed, about to be completely devoured in the next instant.

"Is this... Su Yu's trump card? Does this mean I've lost?"

The Pain Evil God's avatar immediately realized that this time He had utterly lost.

This unknown entity was too powerful; the Pain Evil God had no means to counter it.

Soon, His consciousness would vanish.

At the last moment, He had an epiphany: "Is this... the Power of Radiance? Zhang Chenfeng... the Radiant Emperor?"

"I see, what a pity..."

In the final instant, the Pain Evil God's avatar seemingly gained understanding, comprehending His origin, but it was too late, having no chance to notify the main body.

He was completely consumed!

He only had Fourth Rank strength, lacking the capability to resist this divine artifact from the Radiant Emperor.

After the avatar was entirely devoured, the peculiar power that constituted this avatar, involving the foundational rules of time and space, wasn't devoured; even the Radiant Seed couldn't handle this entity.

The Radiant Seed disregarded that peculiar force, instead instinctively, through time-space connections, moving to devour the Pain Evil God's main body.

However, Su Yu halted it; despite the time-space distance, Su Yu still had control over the Radiant Seed.

He summoned this seed back to the present, simultaneously bringing back that peculiar force as well.

Without this avatar's awakening, the Pain Evil God fell back into a hypnotized state.

However, in His own perception, He awoke from a state of confused thoughts.

"Hmm? Another trump card?"

"Su Yu actually split part of his power, hiding it in the future? Attempting to awaken himself?"

"Quite a plan! Alas, overestimating oneself!"

At this moment, the Pain Evil God is again hypnotized by Su Yu, altering His perception.

He now believes that future Pain Evil God avatar is Su Yu's own avatar, a trump card cultivated by Su Yu.

And now, this trump card failed to function, casually eliminated by the Pain Evil God.

"The situation is settled!"

Su Yu and the Pain Evil God simultaneously thought in their minds.
