

Infinite 971

Chapter 971: The True Origin, Experimental Subject!

Actually, Su Yu has quite a bit of understanding about the memory of the Brutal Evil God.

Back then, Su Yu captured the Brutal Split Mind alive, and after some struggle, brainwashed it using the Power of Nihilism, and then used Fear Intelligence to invade it, thereby obtaining the memory of that split mind.

Thus, Su Yu learned a lot of information about the Evil God.

According to the Evil God memory that Su Yu previously obtained, tens of thousands of years ago, or perhaps even earlier, Brutality had already birthed awareness deep within Subspace.

When He first came into being, He was merely a thought of brutality, slumbering in the depth of Subspace.

The rise of humanity, the conquest of the Galaxy, and the wars that affected the entire Galaxy contained an astonishing brutal willpower, awakening the Brutal Evil God from deep within Subspace.

Not only did He awaken, but simultaneously awakened with Him were some even older, more powerful, sinister, and unimaginable beings.

For instance, Greed, Arrogance, Gluttony...

They feed on the nearly inexhaustible emotions, thoughts, and ideations of humans, never satisfied, endlessly growing stronger.

Until the Human Empire conquered the Galaxy, the wars ceased, and peace reigned throughout the universe, those fanatic emotions and thoughts subsided.

Thus, those powerful beings in Subspace became thirsty, discontent, and even furious; human peace represented their decline.

So they stirred up a terrifying Subspace storm, severing cosmic routes, breaking the Human Empire into fragments.

Simultaneously, they endowed power, luring humans, causing them to degenerate and fall into civil wars. They also created a multitude of Ghost Energy Radiation Beasts, becoming humanity's arch-enemies, keeping them perpetually at war.

Thus, wars broke out once more, setting the entire Galaxy ablaze with endless fire.

The intense emotions, thoughts, the agony of death, despair... once again filled all of Subspace, driving those powerful, wicked, and ancient beings to ecstasy...

Mankind's conquest of the galaxy awakened these ancient evil beings.

This is the origin of the Evil God that Su Yu previously obtained from the Brutal Split Mind's memory.

However, that split mind was merely a fragment; though it possessed memory, it was not complete.

According to the information currently known by Su Yu, the origin information of these Evil Gods isn't entirely the truth.

At least, it's not the truth for the Brutal Evil God because He referred to Himself as a "deity occupying the throne stealthily."

Considering this, the Brutal Evil God is not the original ancient and evil will of brutality but a thief of this power.

Now, Su Yu wishes to delve into the memory of Brutality's essence to see what the truth is.

To see who the Brutal Evil God truly is? Who has usurped the divine throne?

Meanwhile, Su Yu also wants to see what recent schemes the Brutal Evil God has been concocting.

What does He know about the Dream-Making Star Core, about that cosmic-level dream creature?

Although the Brutal Evil God before Su Yu may not be the entirety of His essence,

the memory is surely far more complete than before.

Soon, the Star Tower Navigation plotted the route.

The signal from the Star Tower, which could scan even that powerful cosmic-level dream creature, identify vulnerabilities, and guide navigation, allowing Su Yu to infiltrate inside multiple layers of dream realms and then safely escape.

Regarding the Brutal Evil God, naturally, the navigation wouldn't be ambiguous, and swiftly provided the route.

Following the guidance of the Star Tower Navigation, Su Yu began transforming his own state, turning himself into a state similar to those data forms tainted by the Brutal Evil God.

Soon, Su Yu vanished into the data form of the Dream-Making Star Core, entering the memory space of the Brutal Evil God's essence.

The Brutal Evil God seemed completely oblivious to this.

The memory of the Brutal Evil God's essence was far more twisted and sinister than the memory of the Brutal Split Mind that Su Yu previously obtained.

Countless extremely abstract concepts and thoughts constructed the memory space of this shadowy evil.

Ordinary Transcendents would go mad at a single glance.

And Su Yu, upon entering, felt somewhat dizzy, as if he were being contaminated by these memories.

As if he were about to be assimilated by this vast memory, becoming part of that ancient existence.

Fortunately, Su Yu possessed a powerful fifth-tier level of spiritual power, and given his current location within a vulnerability discovered by the Star Tower signal, he quickly regained clarity and began decoding these memories.

Having the experience of decoding the memory of the Brutal Split Mind before, Su Yu's process of decoding the memory of Brutality's essence this time went smoothly, and he swiftly extracted information.

Nevertheless, the information Su Yu deciphered was quite similar to what he previously acquired.

The same old story.

The Brutal Evil God, tens of thousands of years, or even further in the past, had already come into being but was always asleep until mankind's war awakened Him...

This time, Su Yu deciphered the information in more detail.

A complete memory of slumber spanning tens of thousands of years, recording the subtle changes within Subspace.

Not only this, but he also managed to decipher some records of how the Brutal Evil God fought Zhang Chenfeng millennia ago, how He was sealed.

These were the memories of the Brutal Evil God before His slumber, and decoding them was much more challenging, but not impossible for Su Yu.

Su Yu roughly decoded these memories, feeling the process went smoothly, and the memory was very complete.

Although Su Yu didn't decode every single detail to save time.

For instance, he did not fully decode all the details of the war from millennia ago, just a small portion, enough to understand the gist.

These memories had a clear timeline.

From slumbering tens of thousands of years ago, to awakening, to being sealed, very complete, very normal.

It seemed that the Brutal Evil God was indeed an ancient entity in the depths of Subspace, awakened by human war...

Chapter 972: The True Origin, the Test Subject! (Part 2)

But the Brutal Evil God himself said that he usurped the divine throne.

So how did he usurp it? What about the related memories?

"These memories are not right!"

Su Yu repeatedly watched the decoded memories and finally sensed a trace of discord in them.

Actually, those memories didn't seem problematic, but Su Yu instinctively felt something was off.

For a moment, he couldn't figure out what was wrong.

Su Yu stopped interpreting the memories of the Brutal Evil God and frowned in thought.

Quickly, he realized where that feeling of discord originated from.

It was... a disharmony at the level of time.

As a Time Mechanic, Su Yu had transformed the Pain Evil God, who possessed Fifth-Order Time Power, into an Evil God Soldier Mecha, borrowing his power for a long time.

Later, using a "paradox," he swapped identities with the Pain Evil God.

Additionally, Su Yu experienced the Chaotic Evil God Dream, which altered past history.

All of these made Su Yu instinctively sensitive to such things.

Su Yu keenly felt that the memories of the Brutal Evil God seemed to have a temporal discord.

These memories appeared to have been modified at a temporal level!

Just like the hundreds of millions of humans on Azure Star, their memories also contained similar dissonance.

Originally, those hundreds of millions of humans were members of the Mechanical Civilization established by Su Yu, living in peace under Su Yu's protection.

However, due to the Chaotic Evil God's dream, these hundreds of millions of people's "settings" were altered.

Everyone's past historical experiences were thus changed.

Since birth, everyone lived under the oppression of "Supreme Ruler Su Yu," in constant pain.

Their identities and memories were all modified.

This modification wasn't ordinary mental brainwashing but a temporal modification, akin to reality in a certain sense.

Now, the information Su Yu decoded from the Brutal Evil God's memories gave him the same feeling!

That feeling of being modified at a temporal level.

Although this temporal discord was extremely difficult to detect,

Su Yu, with his understanding of time power, vaguely noticed something.

Perhaps, the Star Tower signal contributed to this as well.

Su Yu utilized Star Tower Navigation to invade the memory space of the Brutal Evil God, finding himself in the "loophole" of his memories.

Inside the loophole, he could see more of the truth.

"So, does it mean that the past history of the Brutal Evil God was also altered? His true origin wasn't like this?"

"Is this what it means to usurp the divine throne?"

"What was his original identity, or rather, what was it really?"

Upon realizing this, Su Yu felt excited.

After contemplating for a while, Su Yu resumed navigation, attempting to traverse memory space to find those memories unaltered by temporal power.

Ordinary people, having their history modified by temporal power, would definitely fully accept the new "setting" and completely forget everything from before.

However, at the level of the Brutal Evil God, he surely reclaimed his pre-modification memories.

Su Yu's goal was to find those memories!

Memory space isn't truly a space.

But Star Tower Navigation allowed Su Yu to find and enter loopholes and traverse within.

The memories of the Brutal Evil God were vast, and the memory space was enormous too.

Su Yu, following the navigation route, traversed while searching for memories unaltered by time.

He didn't know how long he had been traversing, but Su Yu finally discovered ahead a set of memories that didn't have that altered feeling.

Su Yu's heart stirred, knowing he had finally found it!

Su Yu cautiously began interpreting these memories.

The dusty truth finally unveiled a glimpse in front of Su Yu...

In the memories, the "Brutal Evil God" had just awakened from slumber and opened his eyes.

At that moment, he, or rather he, wasn't an Evil God but... a human!

However, he was different from ordinary humans.

Upon birth, Brutal possessed the wisdom of an adult, power comparable to a powerful Transcendent, and vast knowledge.

All of this was written into his consciousness and body even before he woke up.

His entire body was immersed in a vertical transparent container filled with light green liquid.

The liquid contained powerful energy, enveloping Brutal, allowing him to survive without eating, drinking, or breathing.

Having just awakened, he was still a bit confused.

But he quickly, based on the innate knowledge in his mind, understood his origins.

He was an experimental subject, a product of the Human Empire!

Outside the container, numerous human researchers came and went, adjusting data on the container.

From the words of these people, Brutal understood he was not an ordinary experimental subject.

He had another noble title... Prince!

"Get out!"

Su Yu was at a crucial point when a furious roar suddenly echoed in his ear.

Those memories dissipated simultaneously, hidden away.

At the same time, the memories of the Brutal Evil God began to surge, turning into a huge vortex, seeking to swallow and assimilate Su Yu, turning him into a part of the memories.

"I've been discovered!"

Su Yu was startled, not expecting Brutal to be so sensitive as to detect his peeping.

Moreover, there were attack methods even within the memory space!

Luckily, although the Brutal Evil God discovered Su Yu's peeping, he apparently didn't lock onto Su Yu's position.

That memory vortex was a directionless, all-encompassing attack.

Taking advantage of the vortex not yet attacking him, Su Yu quickly retreated outside.

Soon, Su Yu followed the Star Tower Navigation path, exiting the memory space of Brutal, returning to the data body of the Dream-Making Star Core.

"Escaped?"

Su Yu discovered that the Brutal Evil God, who was previously eroding the data body of the Dream-Making Star Core, had disappeared.

It seemed Su Yu's act of peeping into Brutal's memories startled him.

So much so that he didn't bother with the Dream-Making Star Core and directly fled.

Now the Dream-Making Star Core was once again in an unclaimed state.

As long as Su Yu completes the erosion, he could control this Star Core.

However, Su Yu didn't act immediately, concerned that Brutal Evil God might return for a surprise attack, which would put him at a disadvantage.

Su Yu calmly hid within the loophole, staying put while contemplating the memories he had just seen of the Brutal Evil God.

Because the Brutal Evil God discovered his spying, Su Yu sped up the final stage of interpretation.

The information obtained was fragmented and incomplete.

Yet, even so, the information Su Yu acquired was astounding enough.

Evidently, the Human Empire's expedition across the Galaxy awakened an ancient being deep within Subspace, something the Radiant Emperor had long been aware of.

In response to the impending crisis, the Radiant Emperor led his subordinates in launching a plan.

The Brutal "Prince" was one of the plan's results.

Su Yu didn't know how the plan was specifically executed.

He only knew the Radiant Emperor and his technical personnel employed some technical means to let the man-made "Prince" Brutal substitute the identity of the ancient Brutal Evil God.

The aim was to use this method to control the originally mad and brutal Evil God.

Unfortunately, it seemed to have ultimately failed.

The Prince of Brutal lost his humanity, transforming from a human into an Evil God, escaping from the laboratory.

Zhang Chenfeng, this Bright Forbidden Army, came to the frontier of Azure Star to capture the out-of-control "Prince" of Brutal.

Thus, Zhang Chenfeng went to great lengths to seal the Brutal Evil God because this Bright Forbidden Army knew the experimental data and understood the terror of an out-of-control Prince of Brutal.

The Brutal Evil God initially didn't know his identity, assuming he was truly an ancient being awakened from deep within Subspace.

Yet, later, he gradually realized his origins, reclaiming his original memories.

To him, it was a humiliation to be demoted from an ancient being deep within Subspace to an experiment of the Human Empire.

Thus, he called himself the "usurper of the divine throne," a kind of self-mockery.

However, this also allowed the Brutal Evil God to see an opportunity; the technologies humans had imposed on him might be utilized by him as well!

Chapter 973: Advancement! Number God Mechanic!

The plan of the Brutal Evil God is to use the same method to steal the divine position of the Pain Evil God.

If He succeeds, Su Yu would naturally be no more, and there would be nothing left on Azure Star to stop the Brutal Evil God from breaking the blockade and heading to the Galaxy.

In fact, the Brutal Evil God can also head to the Galaxy by leveraging the dream of that cosmic-level dream creature.

The dream of that cosmic-level dream creature spans billions of light-years, and the seal set by Zhang Chenfeng certainly cannot restrict it.

According to the Brutal Evil God's memory, once the erosion of the Dream-Making Star Core is completed, it is very likely to use such a dream to bypass the blockade and directly head to the depths of the starry sky.

If not for Su Yu's timely arrival, perhaps He would have already escaped.

However, the Brutal Evil God doesn't seem eager to bypass the blockade.

His original plan was to first erode the Dream-Making Star Core, securing a retreat.

Then wait for the Pain Evil God's ritual to complete and steal the Pain Evil God's divine position.

He actually wants to use the method of stealing the Pain Evil God's divine position to change from the body of an Evil God back into a human!

The biggest difference between the Pain Evil God and the Brutal Evil God is not only the different areas of power but also that the Pain Evil God still retains the human body of Su Yu.

While the Brutal Evil God is completely a god, the original identity of the Prince has long disappeared due to experimentation.

If the Brutal Evil God's plan proceeds smoothly, He could steal the Pain Evil God's power and identity.

After He breaks the blockade and heads to the Galaxy, He can perfectly integrate into the Human Empire without being discovered.

The Radiant Empire still exists, so does the Human Empire.

The Brutal Evil God just wants to disguise and infiltrate the present Empire.

Of course, it's not that the Brutal Evil God still has affection for humans after being an Evil God for tens of thousands of years and wants to be reborn as a human.

The Brutal Evil God's plan is to steal the Pain Evil God's identity, transform into a human, and then go undercover to take revenge!

Even after all these years, the Brutal Evil God still harbors an intense hatred toward the Human Empire and that Radiant Emperor.

Obviously, being an experiment subject, becoming a Brutal Evil God is not a pleasant "life."

"I see..."

After understanding the true identity of the Brutal Evil God, Su Yu felt a slight sigh in his heart.

This formidable enemy all along actually has such a surprising identity, actually being a "Prince."

However, according to the information Su Yu received, although the Radiant Emperor has many Princes, He does not have spouses, no queens or consorts, etc.

All of the Emperor's Princes are products of the laboratory.

They are all cultivated using His bloodline genes supplemented with advanced technology.

Given the Radiant Emperor's rank, these Princes possess His genes, hence are born with immense power and potential, tasked with the mission to conquer the starry sky for the Empire.

And the Prince of Brutal is one of them.

His mission is to control the divine position of Brutality for the Empire.

Some Princes accept these inherent missions, but evidently, the Prince of Brutal does not accept them but chooses to rebel boldly and flee to the depths of the Universe.

The Brutal Evil God, who was once an Empire Prince, has a deep understanding of the Empire's various methods.

Just now, Su Yu used the Star Tower to scan and spy on Him, He discovered it unexpectedly.

For the Star Tower's terrifying power, the Brutal Evil God is very aware, so He fled resolutely.

Additionally, Su Yu obtained other information, which is that the real name of that cosmic-level dream creature is the Master of Dreams, truly a cosmically powerful divine being.

However, the Master of Dreams is not as dangerous as Su Yu imagined.

Not that the Master of Dreams is a Good God, He has devoured countless civilizations, clearly more ferocious than the Brutal Evil God.

But currently, the Master of Dreams is not "active," but in some dormant state.

It is said the Master of Dreams is very ancient. When He was active, He devoured vast amounts of civilizations, causing terrible nightmares across the Universe, leading countless Star Systems to desolation.

After devouring enough civilizations, the Master of Dreams' level has reached an unimaginable tier.

He ventured so deeply into the Dream Realm that the "distance" became too far from this Universe.

The Master of Dreams seems to want to escape the space-time universe through dreams, heading to the unknown beyond the Universe.

Regarding matters within this Universe, the Master of Dreams is not so keen, and His activity level has significantly decreased.

He still devours civilizations, but it seems driven by instinct without much self-will.

The inactive state of the Master of Dreams has persisted for tens of thousands of years, during which He is more like a natural disaster than a conscious Evil God.

All this knowledge was obtained by the Brutal Evil God during His time as a "Prince."

During the Master of Dreams' active era, even human civilization had not yet spawned; all this is the result of Human Empire's painstaking research through various clues.

Because of the Master of Dreams' inactive trait, as long as one masters enough dream-related technologies to shield Him, one can avoid His erosion and devouring.

One can even limitedly use the Master of Dreams' powers to achieve certain goals.

For instance, previously, the Brutal Evil God utilized the Dream-Making Star Core to elicit the Master of Dreams' powers, dragging all humans from Azure Star into the dream.

The dream of the Master of Dreams can be used to traverse the Universe, bypassing blockades.

The premise is that this use should not be too deep to court death, such as attempting to attack the Master of Dreams.

Chapter 974: Appointment! Number God Mechanic! (Part 2)

If the true will of the Master of Dreams is alarmed, survival would be impossible.

Su Yu pondered for a while longer, and seeing that the Brutal Evil God had yet to return, he realized that the creature had truly fled.

It seemed the power of the Star Tower had frightened it considerably.

Thus, Su Yu began to infiltrate the data body of the Dream-Making Star Core.

This Dream-Making Star Core is a powerful Mechanical Creation, and since the Brutal Evil God wanted to control it, Su Yu certainly wouldn't let it go.

The Brutal Evil God had been busy for a long time, only to have half-damaged the Dream-Making Star Core, breaking through many of its data defenses. Now that it's gone, Su Yu could exploit its progress.

Su Yu used the loopholes created by the Brutal Evil God's erosion, coupled with the scanning and navigation signals from the Star Tower, to quickly infiltrate the Dream-Making Star Core.

Within a short time, Su Yu had caught up to the Brutal Evil God's previous progress and even delved further.

Additionally, while infiltrating the Dream-Making Star Core, Su Yu was also devouring its data origins.

This is a ritual requirement for the Number God Mechanic, requiring the parsing and devouring of the data origins of the Giant God and Dream-Making Star Core.

The Giant God was a trophy from Su Yu's battle in the Manifestation Space, the main control intelligence of the Giant God Soldier Camp.

This intelligence had long been under Su Yu's control.

This entity was very incomplete, previously mastered by the Mechanical God, and later handed over to Su Yu.

It had never been put to great use, at most studied for its hardware components to enhance Su Yu's calculating power. Its data body had always been neglected by Su Yu.

Su Yu didn't even know that this entity was a Fifth-Order intelligent life until the profession panel notified him of the ritual.

It can now be used to complete the ritual.

With Su Yu also devouring the Dream-Making Star Core, it shouldn't be long before the ritual of the Number God Mechanic is complete.

Su Yu soon completed the devouring of the Dream-Making Star Core's data body.

[Ritual complete, would you like to assume the profession of Number God Mechanic?]

Upon Su Yu's completion of devouring, the profession panel immediately popped up a prompt.

"Yes!"

With Su Yu's confirmation, a strange power surged from deep within his body.

Data powers belonging to the Manifestation Mechanic rapidly underwent qualitative change.

The specialty of the profession panel made assuming the profession convenient for Su Yu.

Otherwise, even after completing the ritual, it wouldn't be as easy and fast to assume the profession.

After the Third Rank, each profession assumption is practically an elevation of the life essence, hardly an easy task.

[Profession assumed successfully!]

[Congratulations, Host, on successfully assuming the profession. Your current profession is: Number God Mechanic (Level 1: 0/100000).]

[Congratulations, Host, on successfully awakening the core ability: Data Reality]

[Data Reality: (Level 1), with powerful data abilities, it conducts manifestation of matter and space at a microscopic level. The manifested entities have nearly reached the true Real Universe! Meanwhile, Data Reality can also truly transform the matter, life, and energy of the Real Universe into data and adjust their "values."]

After assuming the profession of Number God Mechanic, Su Yu immediately felt a significant difference.

He had already walked out from the loophole in the Dream-Making Star Core, but the Dream-Making Star Core did not attack him because Su Yu was now the master of this star core.

In fact, this star core had long been without a master.

Previously, it was controlled by Fifth-Order intelligence. Although the self-awareness of the Fifth-Order intelligent life had long been devoured by the Master of Dreams, at least the data body remained, operating as the master control system for the Dream-Making Star Core.

Now that the Fifth-Order intelligence had been parsed and its origins devoured by Su Yu, the star core was just a big chunk of iron.

Equivalent to having only "hardware" without accompanying "system" software, it means this entity is already scrapped.

Its various components, which were originally operating in perfect order, had started to exhibit chaos.

Mere instants later, it would descend into complete chaos, possibly shutting down or exploding.

"Diameter forty thousand and one hundred sixty kilometers, composed of three trillion, six hundred seventy-five billion mechanical components..."

Data about the Dream-Making Star Core flashed through Su Yu's mind.

"Data Reality!"

Su Yu unleashed his ability on the Dream-Making Star Core.

Boom! Su Yu's data powers began to spread throughout the Dream-Making Star Core.

This star core, forged entirely from alien star alloy, started to transform, seemingly about to transition from tangible matter to intangible data.

Su Yu had a feeling that if he exerted more effort and spent enough time, he could even truly datafy the entire star core, store it, and package it up to take away!

Of course, the premise is that he expends a lot of time to datafy the entire star core while possessing enough powerful storage equipment to store this terrifying amount of data.

Su Yu certainly didn't datafy the entire star core but instead used the datafication to spread his strength throughout the interior of the star core, thereby replacing the original system intelligence.

All this happened extremely quickly; almost in an instant, Su Yu's power had replaced the original intelligence and began controlling the operation of the entire star core.

Now, this Dream-Making Star Core had entirely fallen into Su Yu's control.

"Indeed powerful!"

Su Yu marveled inwardly, considering the mass of the Dream-Making Star Core equivalent to an entire planet.

To affect the entire star core with abilities is akin to influencing a whole planet with them.

Such a feat belongs only to those with Fifth-Order abilities.

The Number God Mechanic is merely a Fourth-Rank profession, yet possesses similar abilities!

After all, devouring the origins of two Fifth-Order intelligent lives to complete the profession was indeed formidable!

"Still lacking a bit..."

Su Yu carefully contemplated his power, finding it slightly inferior to the Brutal Evil God and Pain Evil God, yet he had already crossed the threshold of the Fifth Rank.

Moreover, Su Yu had just assumed the profession, his Professional Level still at Level 1; leveling up slightly and he could stand shoulder to shoulder with true Fifth Orders.

A Number God Mechanic, combined with his Fifth-Order spiritual power, renders Su Yu a genuine Fifth-Order expert! A Planet-Level expert!

No longer just possessing Fifth-Order spiritual power, but truly standing shoulder to shoulder with a planet with a human's body!

While Fifth-Order spiritual power can obtain short-term Fifth-Order battle prowess through self-hypnosis to alter reality, it ultimately is not real and cannot endure.

Now, Su Yu has achieved Fifth-Order prowess in both power and spirit! Anytime, he owns Fifth-Order battle strength, without relying on Evil God Soldier Mechas, self-hypnosis, or similar methods, he can confront beings like the Brutal Evil God face to face!

Yet, he remains a Fourth Rank!

"Wow, the profession panel is truly formidable..."

Su Yu felt somewhat dazed, as if the Fifth-Order power he had longed for is now obtained?

The profession panel evolved tremendously after accessing the Star Tower signal, unlocking the Number God Mechanic, perfectly tailored for Su Yu, with a "simple" profession ritual and extremely powerful strength.

Su Yu couldn't help but anticipate what would happen when he completes the profession of another powerful profession, the Dream God Mechanic?

With this in mind, Su Yu looked towards the real world, towards the Chaotic Evil God Dream.

That Chaotic Evil God Dream can reverse time, and it's evidently a Fifth-Rank dream realm.

By devouring its origins, the Dream God Mechanic can also complete the profession.

This is another profession possessing Fifth-Order power with a Fourth-Rank body!

With two powerful professions at hand, Su Yu's strength would swell exponentially.

Now that Su Yu has already controlled the Dream-Making Star Core, he's understood the details of the Chaotic Evil God Dream.

The so-called Chaotic Evil God is actually the real Pain Evil God.

This Evil God, like the Brutal Evil God, is an ancient existence that slept in the depths of Subspace and was awakened recently.

The freshly awakened Pain Evil God had no self-awareness, more akin to a natural phenomenon, hence titled "Chaotic."

Then this Chaotic Evil God was hypnotized into a dream realm by the Brutal Evil God using the powers of the Dream-Making Star Core and the Master of Dreams.

Now this dream realm has fallen under Su Yu's control!

Chapter 975: The Mighty Number God Mechanic

Su Yu's thoughts stirred, attempting to use the power of the Dream-Making Star Core to manipulate the dreams of the Chaotic Evil God.

The first thing he needed to do was naturally seek the origin of the dream and then devour it to complete the Dream God Mechanic's ritual.

When the Number God Mechanic and Dream God Mechanic join forces, it would be akin to wielding the power of two Fifth-Order Professions, unimaginable in strength.

The origin of the dream is actually a thought, the fundamental spiritual power that sustains the operation of the Dream World.

It contains a series of "settings," much like the data system of a Mechanical Creation.

This abstraction is elusive, more so than intelligent data bodies, hard to locate under normal circumstances.

Su Yu, using the Dream-Making Star Core, managed to find the origin of this dream; after all, this Chaotic Evil God Dream was constructed through the functionality of the Dream-Making Star Core combined with the power of the Master of Dreams, so finding its origin was easy.

But Su Yu soon discovered that he was utterly unable to complete the devouring.

Because the dream's origin had already merged with the millions of humans within it, indistinguishable from each other.

These humans had become an inseparable part of the dream's "setting."

If Su Yu devoured the dream origin, he would also devour the spiritual power of those millions, essentially killing them.

Even if Su Yu truly had the heart to do it, it was still unfeasible.

Because this Chaotic Evil God Dream's origin was connected to another entity—specifically, the tentacles of the Master of Dreams within the Dream-Making Star Core.

And the connecting "pathway" was none other than the "Dream Realm Creation" known as Song Ming.

It seems that this Chaotic Evil God Dream is actually the "food" of the Master of Dreams.

Estimating that once the millions are entirely replaced by dream realm creations like Song Ming, the entire human civilization of Azure Star would be devoured by the Master of Dreams, becoming part of its body.

Just like those dozens of fragmented dreams Su Yu had seen before.

If Su Yu wants to snatch the dream origin, it might alarm this cosmic-level entity, triggering its predatory instincts.

Even if only a small portion is disturbed, it's exceedingly dangerous.

Luckily, the Master of Dreams hasn't started devouring Azure Star's human civilization yet, still seemingly waiting.

Considering this, Su Yu was somewhat puzzled.

According to his deductions, the tentacles of the Master of Dreams, eager to devour a civilization of mere millions, shouldn't need to wait so long.

Even if the tentacle's power is only a fraction of its main body, it's not resistible by mere millions of humans.

Even the current Pain Evil God might not withstand it.

Then the question arises, what is the Master of Dreams waiting for?

Suddenly, Su Yu had an inspiration, considering a possibility:

"The Master of Dreams, wanting to devour Azure Star's human civilization, would also consume the Pain Evil God, but the Pain Evil God hasn't truly been born yet."

"Does this mean the Master of Dreams is waiting for the fate ritual to complete, birthing the Pain Evil God, and then launching the devour?"

Su Yu believed he had guessed the truth.

Food varies in kind and quality.

Perhaps to the tentacles of the Master of Dreams, this civilization of mere four million is insignificant.

Only the soon-to-be-born Pain Evil God is worthy of its "bite."

Now, the Pain Evil God isn't fully born, meaning the food isn't "cooked," so the Master of Dreams' tentacles are waiting.

Moreover, to consume the "feast," the tentacles of the Master of Dreams would likely continue pushing the completion of the ritual.

The existence of Song Ming serves as a tool, utilized by the tentacles of the Master of Dreams to further the ritual.

Based on the knowledge Su Yu acquired from the Brutal Evil God's memories, all these complex actions are part of the predatory instincts of the tentacles of the Master of Dreams.

Including Song Ming's birth, dreamtime retrospection, etc., are instinctual, akin to humans salivating to soften food, requiring no strategic plotting or thought, all naturally occurring.

At the level of the Master of Dreams, even instinct is more thorough than the schemes of ordinary creatures.

No wonder the Brutal Evil God, knowing the terror of the Master of Dreams, still invited this entity's power.

Because before the ritual's completion, there's no need to worry about the tentacles of the Master of Dreams devouring; in contrast, its power becomes an immense force driving the ritual, ensuring it completes smoothly.

But once the ritual finishes, the Master of Dreams' tentacles will commence the devouring.

How the Brutal Evil God plans to resist then is uncertain; if it truly steals the Pain Evil God's seat, it certainly won't escape the tentacles, which would devour it too.

It's absurd for the Brutal Evil God to toil just to "cook" for the Master of Dreams' tentacles?

In Su Yu's previous spying on the Brutal Evil God's memories, no information regarding this was uncovered, leaving the Brutal Evil God's exact plans unknown.

"Regardless of the Brutal Evil God's methods of resistance, I plan to leverage the power of the Radiant Emperor, so there's little concern."

"For now, I must expedite the ritual's completion and then separate the dream origin from the masses at the moment it completes, thereby devouring the dream origin and assuming the role of the Dream God Mechanic..."

Su Yu resolved his plans.

Consequently, for the time being, Su Yu needed to do nothing but wait for the ritual to be completed through Song Ming's efforts.

And now, within the Chaotic Evil God Dream.

The majority of the four million humans have united around Song Ming, becoming members of the resistance.

Chapter 976: The Powerful Number God Mechanic (Part 2)

Then, through constant time retrospection, power was accumulated.

At this moment, Song Ming was giving yet another "speech," stirring the members of the resistance.

"Resist Su Yu's tyranny..."

Song Ming stood on the podium, waving his arms forcefully and shouting the slogan.

The crowd below suddenly erupted in a sea-like cheer.

Su Yu watched all of this, his expression somewhat odd; the slogan felt strange.

Then, he looked at Song Ming, slightly puzzled in his heart.

What exactly is this Song Ming?

Dream Realm Creation?

Does he have self-awareness, is he truly alive?

After mastering the Dream-Making Star Core, Su Yu's control over the entire dream realm was very powerful, allowing him to analyze Song Ming thoroughly in an instant.

No problem was found.

In Su Yu's observation, Song Ming was clearly human, showing no signs of being a Dream Realm Creation.

Then Su Yu attempted to scan him with the Star Tower signal, but couldn't detect anything.

Except for a "Dream Realm Creation" tag, there was nothing else.

It seems even the Star Tower signal couldn't probe Song Ming's true nature.

Originally, Su Yu considered deeply scanning Song Ming's spirit and memory, given Song Ming wasn't human, which wouldn't violate safety protocols.

But after careful deliberation, Su Yu decided not to take the risk.

This Song Ming was very mysterious and had a deep connection with the Master of Dreams.

Su Yu feared seeing something forbidden in Song Ming's memory, which would be troublesome.

In a sense, Song Ming was even more terrifying than the Brutal Evil God.

After focusing some attention on Song Ming, Su Yu shifted his gaze to the Pain Evil God atop the Dark Giant City.

The Pain Evil God still appeared as a dried corpse, diligently playing the role of "Supreme Ruler Su Yu," constantly issuing orders to trace the resistance's movements.

Even though the resistance's base was within the Pain Evil God's own Hell of Suffering and could be found at any time, it was all an act...

It must be said, the Pain Evil God was quite the actor.

"Not right!"

Su Yu was marveling at the Pain Evil God's acting skills when he suddenly realized the Pain Evil God seemed not to be acting!

It seemed the Pain Evil God had completely forgotten his identity, forgotten he was the Pain Evil God, and really considered himself the Supreme Ruler Su Yu.

He seemed to have forgotten his Hell of Suffering and his Power of Time.

Under time retrospection, he appeared unable to maintain memory.

"Has he been assimilated too?"

Su Yu shuddered inwardly, understanding the Pain Evil God had been assimilated by this dream realm, fully accepting the "setting."

This was somewhat terrifying.

It seemed that during Su Yu's exploration of the Dream-Making Star Core, the Chaotic Evil God Dream had undergone new changes.

Luckily, Su Yu had already freed himself from the shackles of the dream realm and hadn't been affected.

Otherwise, Su Yu feared he would unknowingly become part of the dream realm, completely forgetting his identity.

Thankfully, Su Yu's previous spiritual hypnosis erosion on the Pain Evil God still existed; otherwise, Su Yu wouldn't have noticed the Pain Evil God's anomaly.

"Who knows where the Brutal Evil God has gone..."

Su Yu searched for traces of the Brutal Evil God within the dream realm but found nothing.

The brutality-prone "Prince" had just been frightened by Su Yu's Star Tower signal and was probably hiding deep within Subspace.

However, Su Yu knew that Brutality wouldn't hide forever; once the ceremony was complete, he would surely appear and contend with Su Yu for the ceremony's outcome, leading to an inevitable battle.

"Next is just waiting..."

Su Yu understood that he didn't need to do too much next, just wait for the dream realm's progression and the ceremony's completion.

During this period, there was one thing Su Yu still needed to do: level the Number God Mechanic to level 100.

This wasn't difficult for Su Yu; compared to the Time Mechanic profession that involved the Power of Time, the Number God Mechanic was powerful but less difficult to upgrade than the Time Mechanic.

Su Yu used the Power of Time to adjust his state, ensuring he was always in the best state of "enlightenment," with the experience of the Number God Mechanic skyrocketing.

Simultaneously, he kept using the Number God Mechanic's ability to data analyze the entire Dream-Making Star Core.

Previously, Su Yu attempted to data analyze the Dream-Making Star Core but only completed half.

After all, the Dream-Making Star Core's mass was truly vast, comparable to a star, even more powerful than ordinary stars.

To fully data analyze it was like data processing an entire star.

This task was feasible for Su Yu, who possessed Fifth-tier power, but required a tremendous amount of power.

Data analyzing a star is more troublesome and difficult than destroying one.

Furthermore, after data analysis, storage methods are needed; the enormous data must be stored on devices like chips or carried by one's mind.

Otherwise, uncontained data will naturally diffuse, equivalent to star destruction.

Completing data analysis of the star—what immense data is that? Su Yu has yet to find a chip device capable of bearing such data.

If the hardware of the Giant God wasn't damaged, it might be possible, but not now.

Su Yu's own consciousness can barely manage such vast data.

In other words, if Su Yu wishes, he can data analyze an entire star and store it in his consciousness to take away!

Taking an entire star—that's incredibly powerful.

In the past, although Su Yu had the Manifestation Space with vast space inside, it couldn't fit a star or take one away.

Now, it's achievable!

Theoretically, Su Yu could directly data analyze the entire Azure Star and run away with it!

However, that would consume most of Su Yu's consciousness, leaving few resources for other tasks.

Fifth Rank power is equivalent to a star.

Data analyzing a star, storing it in consciousness, equals a person "digesting" something akin to their weight.

Even if not overwhelmed, mobility is hindered.

With an impending war, Su Yu wouldn't do such a thing.

Plus, within the Dream-Making Star Core are the tendrils of the Master of Dreams; data analyzing the Dream-Making Star Core could lead to unforeseen problems.

Hence, Su Yu kept the data analysis of the Dream-Making Star Core superficial, limited to certain components, without complete data processing.

After data analyzing a component, Su Yu quickly reverted it to its original material state, preventing interference with the Dream-Making Star Core's operation.

Su Yu used this method to train the Number God Mechanic's power.

Moreover, Su Yu released various Mechanical Creations he owned before, testing the Number God Mechanic's power.

With Fifth-tier combat power, the Number God Mechanic requires practice to exert strength in future battles.

"Truly powerful..."

Su Yu experimented while marveling at the power in his heart.

The data analysis power of the Number God Mechanic is simply terrifying.

The power of the Number God Mechanic has two parts: "Manifestation" and "Data Analysis."

Manifestation ability enables Su Yu to materialize previous Mechanical Creations, including Fourth Rank Giant God Soldier Mechas, fully.

Manifestations closely resemble their original forms in strength and intelligence, able to deceive almost thoroughly.

Of course, stronger manifestations consume more of Su Yu's power.

Su Yu even experimented with whether he could materialize living people, or even... Evil God Soldier Mechas.

Then there's "Data Analysis."

This ability is more than just converting substance to data; it adjusts its "parameters."

A six-star Cavalry's [Power Attribute] instantly multiplied over a hundredfold under Su Yu's data adjustment!

Chapter 977: Dual Tier-5 Power, Hunting Down the Brutal Evil God?

An essential ability of the Number God Mechanic is to convert Mechanical Creation into data and then adjust its "values."

The so-called "values" refer to basic attributes such as power, speed, defense, etc.

Without skills like Electromagnetic Fury applied to the Mechanical Creation, its basic attributes are determined by the materials, technology, and other factors used in its creation.

Unless the machine is replaced, or its rank elevated, these basic attributes are essentially fixed.

Battle attrition can even lead to a reduction in these attributes.

Six-star top-tier Mechanical Creation has actually reached the limits of conventional materials and energy.

The strength of the Mechanical Creation largely depends on materials and energy, being tightly restricted by these two aspects.

Materials determine body strength, while energy determines power output.

Ordinary material and energy technology makes achieving six-star top-tier in body strength and output power basically the limit.

For a six-star top-tier Mechanical Creation, further enhancement of its basic attributes requires a ritual, Mechanical Soul fusion, and promotion to Third Rank.

After promotion to Third Rank, the Subspace projection becomes an indestructible Subspace Imprint, allowing access to the Subspace energy door, using endless Subspace Energy to strengthen the body and materials, thereby gaining power far beyond before.

Alternatively, Su Yu can share his Subspace Imprint, allowing this Mechanical Creation to open the Subspace energy door without a ritual, possessing Third Rank power.

However, sharing of Imprints is limited in quantity.

But now, Su Yu has no need for such trouble.

By directly utilizing the Number God Mechanic's data manipulation to adjust the Mechanical Creation's values, the power attributes of this Cavalry are increased a hundredfold.

The original power value of the Cavalry was 1; Su Yu directly adjusted it to 100.

Then, releasing its data manipulation, the Cavalry returns to its normal material state, with its power increased by 100 times!

This enhancement actually defies the laws of common sense.

Theoretically, with the body strength and energy intensity of this Cavalry, it shouldn't sustain such powerful forces.

Upon operation, it would explode into fragments under its own power.

Moreover, its Energy Core doesn't have sufficient energy to sustain such a violent power burst.

However, Su Yu tried to let this Cavalry attack him, and the Cavalry had no problems whatsoever.

It indeed exerted hundredfold strength!

Given the materials have reached their limit, without rank elevation, Su Yu needs meticulous optimization and material refinement to slightly enhance the power output of this Cavalry, which at most would only increase by two to three times, making further enhancement difficult.

Even just increasing two to three times is a complex engineering problem.

Unless by "stacking materials," increasing its machine scale, but that, in reality, also has limits in strength and is constrained by materials, stacking won't achieve much.

But now, Su Yu just needs to adjust the "values," and the power output of this Cavalry mysteriously increases a hundredfold.

And it hasn't completed the ritual or become Third Rank; theoretically, it remains six-star.

"This ability somewhat transcends normal physical laws..."

Su Yu meticulously observed this Cavalry repeatedly, ultimately arriving at a conclusion.

The power of the Number God Mechanic has transcended some parts of physical rules, allowing this Cavalry to exert absurd power.

Though the Number God Mechanic is a Fourth-tier profession, it's remarkably unique, tailor-made for Su Yu after the Profession Panel upgrade.

With a Fourth-tier status, it holds powerful Fifth-tier level strength.

This power isn't merely simple energy.

It transcends normal physical rules to a certain extent, utterly absurd.

Previously, though Su Yu had Fifth Order spiritual power and controlled the Evil God Soldier Mecha, fully aware of Fifth Order power,

Spiritual power always differs from true Spiritual Energy.

The power of the Evil God Soldier Mecha originates from external forces, distinct from power truly belonging to oneself.

Now, as Su Yu truly assumes the Number God Mechanic role, holding Fifth-tier level Spiritual Energy, he profoundly realizes how astonishing the Fifth Rank is.

Su Yu again utilized the manifestation ability of the Number God Mechanic.

Instantly, another identical Cavalry appeared beside the original Cavalry.

This Cavalry is data manifested by Su Yu, wholly composed of Nihilism data, yet this manifestation is detailed to the micro-level, nearly indistinguishable from normal physical substance.

Furthermore, this manifestation, if not released or Su Yu doesn't die, can persist permanently like normal substance!

This isn't merely manifestation but creation!

Even, Su Yu attempted to perform "value adjustment" on this manifested Cavalry and succeeded.

This manifested Cavalry, under Su Yu's adjustment, instantly gained hundredfold power, reaching the Third-tier level.

Su Yu essentially created a Third Rank level Mechanical Creation from nothing, consuming only the energy to manifest a six-star level Cavalry.

The Fifth-rank power of the Number God Mechanic is indeed astonishing.

"Speaking of which, the Time Mechanic seems similar..."

Su Yu had an inspiration, considering a possibility.

Chapter 978: Power of Double Tier 5, Hunting Down the Brutal Evil God? (Part 2)

In a way, the Time Mechanic is also a peculiar profession similar to the Number God Mechanic.

The Time Mechanic can transcend rules, travel through time and space, and determine the future with a Fourth Rank self.

The power of the Time Mechanic actually transcends normal Fourth Rank, fundamentally not at the Fourth-class level.

Back when Su Yu was in the Dark Space-Time, he split countless historical timelines, then merged all historical timelines, and looped a decade of history thousands of times before completing the profession of Time Mechanic.

The difficulty of this profession's ritual is basically no less than the Fifth Order, even more challenging, nearly a ten-death situation. If not for Su Yu's unique Profession Panel, it would have been impossible to succeed.

Such a profession definitely surpasses the scope of the Fourth Rank.

However, the Time Mechanic is somewhat special, as, after taking the job, there isn't a change in energy equivalent to planet-level power for one person.

That's why Su Yu didn't notice earlier that the Time Mechanic was also of Fifth Order power.

But thinking it over carefully now, back then Su Yu relied on the Power of Time to defeat the Ghost Emperor, who possessed pseudo-Fifth Order power.

To defeat the power of a pseudo-Fifth Order, naturally, one must have a true Fifth Order!

The essence of the Time Mechanic's power is, in fact, Fifth Order!

No wonder this profession is so difficult to upgrade, Su Yu spent decades before leveling up fully.

Su Yu thought to himself: "It turns out, I actually already had Fifth Order power, the time power of the Pain Evil God is essentially the same rank as mine..."

Su Yu had come to understand that the Fifth-Order Time Power of the Pain Evil God, compared to his own Time Power, seemed only to be greater in "quantity".

But in terms of function, the time power of the Pain Evil God and Su Yu's time power actually have no significant differences, both can change history and determine the future.

Su Yu had always been a bit suspicious whether the Pain Evil God was hiding some ace up his sleeve.

Would there be any unknown usages for the Fifth-Order Time Power?

But after mastering the Evil God Soldier Mecha for many years, Su Yu found no further use.

For instance, the ability like Time Retrospection, Su Yu couldn't achieve it, nor could the Evil God Soldier Mecha, they were the same.

Now Su Yu understands that actually, the time power of the Pain Evil God and his own time power truly have no essential difference.

It's just that since the Pain Evil God is a Fifth Order, with a planet-level essence, using the same Time Power naturally has far greater power.

Thinking of this, Su Yu moved with intention, trying to mobilize the Power of Time.

Sure enough, this feeling was completely different this time.

The same Power of Time, Su Yu feels he can use it to exert greater power with more force, and also suffer less backlash.

After devouring the data source of the Dream-Making Star Core and taking up the job of Number God Mechanic, Su Yu also possesses a mighty essence comparable to a planet, even being able to data-fy an entire planet with full exertion.

With such essence, using the Time Mechanic's Power of Time is completely different, enough to equate to the time power of the Pain Evil God!

It's just that in terms of the "quantity" of Time Power, Su Yu still has a bit less, requiring long meditation to accumulate.

The Pain Evil God has a strange origin, possibly born in the future, naturally endowed with massive Time Power.

No wonder the unlocked [Time-Space Mechanic] for Su Yu requires the devouring of the Pain Evil God's Time Power to take up the job.

The Pain Evil God is a substantial "big package" of Time Power, accumulating enough on his own through meditation to meet the [Time-Space Mechanic]'s requirement, who knows when will happen.

"In this light, am I basically not inferior to the Pain Evil God now?!"

A bold idea popped into Su Yu's mind.

The Pain Evil God is [Pain] + [Time], while Su Yu is [Number God] + [Time].

In essence, both possess dual Fifth-Order powers, already on the same level!

Theoretically speaking, Su Yu could directly confront the Pain Evil God in combat, and it would be an evenly matched battle.

Who would win is uncertain, but surely they are on the same level.

In this way, fighting the Brutal Evil God head-on would be the same, possibly even stronger because Su Yu has the dual Fifth-Order power of Number God + Time!

This relies on no external forces like the Evil God Soldier Mecha, but purely on Su Yu's own power!

"Unknowingly, I have reached this point..."

Su Yu still finds it somewhat unbelievable in his heart.

Unconsciously, he has indeed become so powerful.

Back then, faced with the life-and-death crisis of the Astral Tides eruption decades later, Su Yu had to advance to the Fifth Order to pass safely.

But the Brutal Evil God and the Pain Evil God certainly wouldn't allow Su Yu to advance.

To advance to the Fifth Order and navigate the crisis, Su Yu came up with various methods.

First, he deceived the Pain Evil God, pretending to want to use the profession panel's specialness to seize the Brutal Evil God's divine seat.

In reality, Su Yu was secretly imitating the Radiant Emperor, attempting to fulfill "destiny," and gain the Radiant Emperor's power.

The plan was initially smooth.

But at the critical moment, the Brutal Evil God intervened, bringing in the Master of Dreams' power from the Dream-Making Star Core, creating a Chaotic Evil God Dream.

Due to the dream's "setting," Su Yu even temporarily lost power, leaving only Fifth-Order spiritual power while even the profession panel was temporarily blocked.

Fortunately, Su Yu ultimately relied on the Star Tower signal to fuse and upgrade [Holographic Perception], escaping the dream while simultaneously the profession panel also achieved a certain upgrade with the help of the Star Tower signal.

Then Su Yu fully leveled the Time Mechanic, unlocking a new profession.

Now Su Yu successfully took up the mighty profession of Number God Mechanic.

In a trance, Su Yu already truly possesses the power to stand side by side with the Pain Evil God and the Brutal Evil God.

Although the process was somewhat convoluted, Su Yu indeed succeeded.

Although he has not yet advanced to the Fifth Order, he possesses Fifth Order power, practically no difference.

In that case, the so-called crisis is essentially already nonexistent?

However, according to the Brutal Evil God, when the Astral Tides erupt, one must be Fifth Order to pass; Su Yu doesn't know if given his peculiar state, he can or cannot.

But at least, in terms of combat power, there is no lack! He possesses the capital to fight head-to-head with two major enemies!

Solving the two major enemies would allow Su Yu to peacefully perform the ritual, take up the true Fifth Order profession [Time-Space Mechanic], and then overcome the Astral Tides crisis.

In fact, only one major enemy is left now.

The Pain Evil God is overwhelmed by various erosions and has become merely a tool for performing the ritual now.

The real major enemy is only the Brutal Evil God, no idea where that guy has run off to now.

"Should I, pursue and hunt him down in the depths of Subspace?"

An impulse surged in Su Yu's mind.

Now with true Fifth Order power, he has sufficient qualifications to penetrate deep into Subspace and hunt down the Brutal Evil God!

The Brutal Evil God should have fled back to the depths of Subspace again.

In the depths of Subspace, in the so-called "deep sea," there remain only various abstract concepts, emotions, etc., "settling" there.

Those abstract concepts don't form into Spiritual Energy but exist in a primal state; even time and space don't exist there.

Because the Subspace Deep Layer is too abstract and too chaotically twisted, without Fifth Order, one fundamentally cannot touch or enter it.

Even with Fifth Order power, finding the Brutal Evil God lurking in such a chaotic, abstract place is as difficult as climbing to the sky.

And even if found, it's tough to kill or suppress this guy.

So before, Su Yu never had such a thought, merely passively waiting for the Brutal Evil God to emerge.

But now, with Su Yu having taken the job of Number God Mechanic, power surges, he has the ability to delve into the Subspace Deep Layer.

Meanwhile, with the fusion of the Star Tower signal into Holographic Perception, he should be able to navigate in the depths of Subspace and search for the traces of the Brutal Evil God.

Thus, Su Yu indeed has the capability to hunt down the Brutal Evil God in the depths of Subspace!

Thinking of this, Su Yu longed to set off immediately, rush into the depths of Subspace, and launch a grand battle against the Brutal Evil God!

Chapter 979: Su Yu's Upgrade Plan

Su Yu pondered whether to immediately take action and pursue the Brutal Evil God.

But after some deep consideration, Su Yu decided against it.

Because Su Yu had just taken on the role of a Number God Mechanic not long ago, still only at Level 1, in such a state, although eligible to fight the Brutal Evil God,

it was indeed unlikely to kill or suppress Him.

With one wrong move, He might escape again.

Su Yu needs to spend some time first to upgrade the Number God Mechanic and become familiar with this profession's power to be at ease in battle.

However, even if the Number God Mechanic is upgraded to full level, Su Yu feels that completely killing and suppressing the Brutal Evil God is not that simple.

Previously, Su Yu used an Evil God Soldier Mecha to press the Brutal Evil God, but couldn't prevent Him from escaping.

At the critical moment, Su Yu might need to modify the Dream Setting to turn the Pain Evil God back into an Evil God Soldier Mecha.

The power of the main body and the Evil God Soldier Mecha combined have a chance.

"First, upgrade the Number God Mechanic to full level, then resolve the Brutal Evil God before the Subspace Tide erupts, then take on the role of a Time-Space Mechanic, survive the crisis, break the blockade, and head to the Galaxy!"

After some contemplation, Su Yu set his plan.

After making up his mind, Su Yu immediately began to act.

However, upgrading the Number God Mechanic to full level is not that easy.

This profession can attain Fifth-tier level power as a Fourth-tier, and each level up is incredibly difficult.

Previously, Su Yu spent dozens of years upgrading the Time Mechanic to full level.

And the upgrade difficulty of the Number God Mechanic might not be lower than that of the Time Mechanic, possibly even higher.

After all, the Number God Mechanic's energy strength alone surpasses the Time Mechanic, truly reaching Planet-Level.

And now, there are only fifteen years until the "Destiny" moment arrives.

In just fifteen years, Su Yu is not confident that the Number God Mechanic can be upgraded to full level.

"However..."

Su Yu suddenly looked towards the Dream World.

Fifteen years is indeed a bit lacking, but... if you add the power of Time Retrospection, is it enough?

In the Dream World, Song Ming initiates Time Retrospection now and then.

And after Time Retrospection, although time reverses, the memories, strength, and resources of the Rebel Army under Song Ming remain, and they bring these things back to the past.

Through repeated retrospections, a year can be used as ten or a hundred years.

This continuous retrospection, this continuous accumulation of power, strengthens the Rebel Army more and more until they can overthrow the rule of [Supreme Ruler Su Yu].

Now, Su Yu wants to use Song Ming's Time Retrospection to meditate and upgrade in the Dark Giant City.

In this way, fifteen years can be used as a hundred or even several hundred years, enough to upgrade the Number God Mechanic to full level.

However, Su Yu is somewhat curious if now that he possesses Fifth-tier level power, Song Ming's Time Retrospection can still affect him?

Previously, Su Yu experienced that after Time Retrospection, one can bring an Energy Coin back from the future to the [present], equivalent to using the power of time for creation from nothing.

This time, however, Su Yu wants to take the experience and levels of the Number God Mechanic back to the present, which is somewhat difficult.

The Number God Mechanic is a powerful profession with Fifth-tier power, and each point of experience, when converted to Energy Coins, conservatively estimates to be equivalent to thousands, even tens of millions of Energy Coins.

And to fully upgrade the Number God Mechanic, billions of experience are consumed.

A quick calculation shows it's a terrifying astronomical figure.

After all, the energy of Star-Level, how vast is it?

The energy contained in one Energy Coin is equivalent to the total energy of a Fourth Rank Transcendent, extremely powerful, but compared to an entire planet, it's nothing.

Actually, Su Yu just ascended, although possessing the essence of Planet Level.

But the energy contained in him hasn't reached Planet Level yet.

It requires a gradual accumulation of experience and energy, advancing the level to truly compare to a planet with a single person.

To preserve the experience of the Number God Mechanic through Time Retrospection to the present is like using Time Retrospection for "creation from nothing," equivalent to the energy of a vast star.

Moreover, the Fifth-tier essence of the Number God Mechanic is far superior to an ordinary Energy Coin; it's not merely a matter of quantity that can be measured.

Su Yu is somewhat worried, is Song Ming's Time Retrospection viable or not, hopefully, it won't fail.

Thinking of this, Su Yu initiated a thought, directly manifesting a data avatar to remain at the Dream-Making Star Core, monitoring the Star Core.

This data avatar is concealed among the loopholes scanned by the Star Tower signal, extremely stealthy.

If the tentacles of the Master of Dreams act abnormally, or if the Brutal Evil God returns, Su Yu can immediately detect it.

Then Su Yu's main body once again activated Holographic Perception's navigation, returned to the Dream World, and then via the Dream World, returned to the Dark Giant City in the real world, to his small mechanical repair shop.

Previously, Su Yu accessed the Dream World from the real world using Star Tower Navigation, and then through the Dream World, found the Dream-Making Star Core, now it's just retracing his steps.

In the repair shop, the Mechanical Nightmare that Su Yu had created was still lying on the somewhat peculiar-looking "Dream-Making Machine."

The Mechanical Nightmare, wrapped in flesh and blood covering its alloy skeleton, was using the Dream-Making Machine's power to invade the Chaotic Evil God Dream, "acting" as Su Yu.

Chapter 980: Su Yu's Upgrade Plan_2

The Mechanical Nightmare sensed Su Yu's return and immediately uploaded the data logs from this period.

During this time, the Mechanical Nightmare played Su Yu honestly in the Dream Realm.

Occasionally participating in Song Ming's gatherings and listening to "speeches."

Then, under the power of retrospection, it accumulated resources and strength, everything par for the course, very low-key.

The people in the Dream World also accepted this companion with a name just like a major villain and paid him no mind.

After retrieving this data, Su Yu nodded, then recovered the Mechanical Nightmare and lay on the Dream-Making Machine.

Now Su Yu wanted to move with his main body, enter the Dream Realm, and try to benefit from mingling with Song Ming's resistance.

In fact, Su Yu could directly walk into the Dream World from thin air using the navigation function of the Holographic Perception.

Not just in spirit, even the physical body could enter.

In fact, Su Yu had just returned to the real world by passing through the Dream Realm.

Yet now he needed to use the Dream-Making Machine to return to the Dream Realm, which seemed a bit redundant.

However, this was actually necessary.

Because using Holographic Perception to enter the Dream World actually utilized the "loopholes" scanned by the Star Tower signals.

After entering the Dream World through these loopholes, one would be completely invisible inside, without "identity."

Without identity, Song Ming's Time Retrospection couldn't affect Su Yu, but Su Yu couldn't benefit from the retrospection either.

And entering the Dream Realm via the Dream-Making Machine counts as a "legitimate route."

After entering, it's with the identity of "Regular Person Mechanic Su Yu."

This identity is already part of Song Ming's resistance, able to benefit from Time Retrospection.

So using the Dream-Making Machine is a necessary step.

However...

Boom!

As Su Yu lay on the Dream-Making Machine, connecting various cables to the back of his head.

This strange steel chair-like creation immediately let out an unbearable sound, and in just a moment, shattered into powder, and in the next, even the powder was gone.

This device was created by Su Yu's Third-tier profession "Dream Demon Mechanic." Although the Dream Demon Mechanic is very powerful, comparable to the Fourth-tier, the materials of this Dream-Making Machine were ordinary, unable to withstand Su Yu's energy.

After all, it was like a planet's weight crushing this Dream-Making Machine; how could it bear it?

Fortunately, this Dream-Making Machine didn't have intelligence, wasn't a Mechanical Life, so it doesn't matter if it broke.

"..."

Su Yu still maintained his lying posture, floating in mid-air, with a slight laugh.

He had been so focused on thinking through various plans that he overlooked this small detail.

"Seems like I'm still not used to having become Fifth Rank..."

The power increase was so great that even Su Yu himself wasn't quite used to it yet.

Then, with a thought, Su Yu released various materials, quickly smelting and assembling them in the air.

He was manufacturing a new Dream-Making Machine.

This time, Su Yu used technology obtained from the Dream-Making Star Core.

The Dream-Making Star Core is now under Su Yu's control, and all its details have been reviewed thoroughly.

Though some technical details of this Fifth-tier Alien Star mechanism elude Su Yu, even just the parts he understands are enough to significantly upgrade the Dream-Making Machine.

Soon, a brand new Dream-Making Machine was manufactured. This time, unlike the previous electric chair design, it was styled like a hibernation pod, looking very exquisite.

This time, the Dream-Making Machine was made with very solid "materials." Once made, it was immediately at Third-tier Top, and after Su Yu used the Number God Mechanic to adjust its "values," it was instantly boosted by a hundredfold, elevated to Fourth-class.

Moreover, due to utilizing the technology of the Dream-Making Star Core, this new Dream-Making Machine has very powerful dream-making capabilities.

Then, Su Yu opened the door of this Dream-Making Machine and lay inside.

The Dream-Making Machine emitted an unbearable sound but ultimately didn't collapse.

A Fourth-class Dream-Making Machine was worthy of bearing Su Yu's power.

As the Dream-Making Machine activated, Su Yu immediately fell asleep, his spirit entering the Dream World.

In the Dream World, Su Yu opened his eyes to find that his Number God Mechanic power had been sealed, a "setting" constraint of the Dream Realm.

With a slight thought, Su Yu lifted the seal, restoring his powers as a Number God Mechanic in the Dream Realm.

For someone already possessing Fifth-tier power, the constraints set by the Dream Realm were hardly affecting him anymore.

"I wonder if it's possible to data-fy this Dream Realm too..."

Looking around, a thought suddenly sprang up in Su Yu's mind.

If he could data-fy the Dream Realm, it would be equivalent to using the power of the Number God Mechanic to manipulate this Dream Realm.

However, Su Yu didn't act rashly. Previously, having controlled the Dream-Making Star Core, he actually already possessed control over this Dream Realm, but he hadn't made any major alterations to it.

Because this Dream Realm is the "food" of the Master of Dreams' tentacles, if he acted recklessly, it would attract the attention of the Dream Master's tentacles, causing trouble.

It's better to be low-key before success is ensured.

"Three days from now, there's another gathering speech. Without accident, Song Ming will trigger Time Retrospection again."

"At that time, it will be clear whether the Time Retrospection can bring back the experience of the Number God Mechanic..."

Su Yu pondered while beginning his meditation.

Under the guidance of his "Number God Meditation Method," the experience of the Number God Mechanic gradually increased, bit by bit.

In one day, he could only accumulate a few hundred experience points.

This was with Su Yu using the Power of Time to adjust fate, allowing himself to always be at this speed, reaching only a few levels a year, while the Number God Mechanic was Level 100. The more experience was needed as he progressed.

Under normal circumstances, the remaining fifteen-year time was absolutely insufficient.

To reach Level 100, one still needs to rely on Time Retrospection.

"If only I could possess the power of Time Retrospection myself, or even Time Acceleration would do..."

Su Yu couldn't help but think.

His Power of Time, although it's Fifth-tier, still has flaws and cannot encompass everything.

Operations such as Time Retrospection or Time Acceleration are beyond the Power of Time Su Yu possesses.

"It seems that once I take the job of a Time-Space Mechanic, upgrading the Power of Time again might make it possible..."

Three days passed in the blink of an eye, during which Su Yu accumulated nearly a thousand experience points.

"The time is here."

Su Yu awoke from his meditation, waiting quietly.

After a while, Su Yu disappeared directly from the repair shop, and when he reappeared, he was already seated on a familiar chair, surrounded by many other people.

This was the headquarters of the resistance where Su Yu had been before, and today was the day of Song Ming's speech again.

Each speech not only inspired but also served to distribute resources and impart knowledge and technology.

Previously, when Su Yu went to listen to a speech, he needed to walk over.

Now he could "teleport" directly from home.

Clearly, after multiple Time Retrospections, the resistance had grown much stronger.

The members seated around Su Yu at this moment all had formidable auras, completely different from before.

Through repeated Time Retrospections, these members' strength had already skyrocketed.

They're even stronger than before the Dream Realm descended!

Before the Dream Realm descended, there were only about ten thousand Tier 3 experts across the entire planet.

Now, it has already increased to over twenty thousand!

The progressions in the Dream and Reality were synchronized, so their strength improvement in the Dream was mirrored in reality.

Not only did their strength improve, they also gained considerable battle experience from fighting directly against the Mechanical Forbidden Guards and Painful Monks under the command of Supreme Ruler Su Yu.

With their strength and sufficient confidence.

"When will Song Ming, the Great Commander, launch the full offensive?"

"Yeah! We've united hundreds of millions of brothers and sisters, and with Time Retrospection, increased our strength many times over. We should have long been able to overthrow the Tyrant Su Yu's reign!"

"I think so too..."

Song Ming hadn't appeared yet, and everyone was discussing excitedly.

"By the way, Su Yu, what do you think?"

A person sitting next to Su Yu suddenly turned and asked him.
