## **Chapter 101: Chapter 84 Spiritual Mutant, Arrival of the Black Fog\_2**

As for the joy, it naturally came from Su Yu's demonstrated repair skills.

Especially now that, after being summoned by the Administrator, Bai Hong almost instantly felt the oppressive aura of hierarchy from them.

Unlike the faint pressure that radiated from the Administrator before.

The Administrator, whose strength had now recovered, radiated an oppressive aura even when trying to restrain it as much as possible.

The mid-level Spiritual User's rank suppression still made the three-star Bai Hong feel breathless.

"Can Captain Bai rest assured now?"

Seeing Bai Hong's shocked expression.

Su Yu standing by the side couldn't help but tease.

Bai Hong, hearing this, felt a little embarrassed and smiled awkwardly. The Administrator showed understanding, patting Bai Hong's shoulder, saying, "Captain Bai, don't be embarrassed; in the past few years, it's been I who have let you down as a subordinate."

"However, now is not the time for us to let our guard down. We still need to rely on you, Captain Bai, to deploy personnel and investigate outside the Sanctuary."

"Master, rest assured, I understand what must be done!"

Upon hearing the Administrator's assignment.

Bai Hong snapped back to reality, responding solemnly.

Bai Hong had also been keeping a close watch on the situation with the Night Slayer Team during this period.

Previously, when the Night Slayer Team set out in force, they carried a significant amount of supplies.

However, the maximum those supplies could last was half a month.

But now, it had almost been a full month since the Night Slayer Team left the Sanctuary.

This long, with no sign of their return.

Anyone would have a looming question mark in their mind!

Bai Hong immediately took the order and left.

Su Yu also didn't linger any longer. After a quick farewell and agreeing with the Administrator that any updates would be communicated promptly, Su Yu returned to the Ninth Squad's base.

Although the Battlefield Mechanic's level had already reached the maximum.

The routine repair and maintenance of various machinery still provided Su Yu with some technical growth.

Though not much, Su Yu had not been helping the various hunting teams, especially his Ninth Squad, with maintenance and weapon care over the past ten days.

Now that Bai Hong had gone to investigate the Night Slayer Team's situation.

Once there was news, the battle with Li He would likely commence.

Before that, Su Yu naturally couldn't sit idle, helping the Ninth Squad and other allied hunting teams with equipment maintenance was the bare minimum task.

Besides maintaining these firearms and equipment.

Su Yu also took time to adapt to techniques like the Thousand-Handed Prosthetic and Ranger Combat Swarm.

Anyway, there were no longer Night Slayer Team informants in the Sanctuary.

Su Yu didn't mind making such a big commotion in the base's training ground, whether or not it would expose information to the Night Slayer Team.

Thus, amidst such intensive preparations.

Another three days passed.

Bai Hong finally brought back intelligence!

"Wants me and Uncle Yang to head to the management office quickly, there's important news?"

Su Yu and Yang Lie exchanged a glance, wasting no time; the two immediately set off and soon arrived at the meeting room of the management office.

When they entered, they found.

It wasn't just them.

Hu Yueshan, Luo Wang, Lang Yun, Hu Wen, Wang Jian, and the rest of the Sanctuary's hunting team captains were all gathered there, every expression as stern as could be.

Bai Hong stood next to the Administrator, his face particularly grim; only when Su Yu and Yang Lie walked in did the tense atmosphere in the meeting room ease slightly.

"Old man, Captain Bai, and everyone else, what's going on?"

Su Yu furrowed his brows, looked at the Administrator, and couldn't help but ask.

The Administrator gave a bitter smile, then looked at Bai Hong and said softly, "Let Captain Bai explain; he'll be clearer. To be honest, I'm still baffled..."

Saying this, the Administrator involuntarily rubbed his temples, with the veins on his forehead slightly bulging from worry.

After hearing the Administrator's words, the other captains nodded in solemn agreement.

It was apparent that the news Bai Hong brought back was far beyond their expectations.

After hearing the Administrator's explanation.

Su Yu's brows tightened, unable to help looking at Bai Hong before him.

Bai Hong didn't delay, directly passing over several photos to Su Yu.

"Mr. Su, you can take a look at these photos. They are images captured by my team members who went to gather intelligence on the Night Slayer Team."

"This is..."

Su Yu glanced over the photos in an instant, and immediately his pupils slightly contracted.

The photos depicted vast swaths of desolate desert, resembling yellow sand.

Such scenes weren't commonly seen around the Sanctuary.

Although the Sanctuary lay on the steppe, the steppe didn't imply barrenness; during the short spring of one or two months each year, those dried grasses would turn green again, and the radiation beasts on the steppe relied on those precious spring days to propagate their species.

But now.

In these photos, vast areas of desertification had already appeared around the Sanctuary!

"What's going on here?"

Bai Hong shook his head, giving a bitter smile, "I'm not sure either; I sent out a dozen or so team members to spread around the Sanctuary, probing into the depths of the steppe, but the further they went, the more desert they saw."

As Bai Hong spoke.

He unfurled a large map on the table.

### **Chapter 102: Chapter 84 Spiritual Mutant, Arrival of the Black Fog\_3**

With Shelter No. 73 as the center, within a thirty-kilometer radius of the surrounding wasteland region, at this moment, the large desert appeared like stars in the night sky, scattered densely in various sizes around the wasteland. It spread out in a fan shape, wide at the top and narrow at the bottom, continuously expanding towards the shelter.

"This is probably what the situation around the shelter looks like now."

"The desert... is moving?"

Looking at the markings on the map, Yang Lie couldn't help but exclaim softly.

Such a scene was beyond his imagination.

The other captains weren't much better off.

Even though they had seen the map Bai Hong provided before, each time they looked at it, they were shocked once again.

After all.

"Even if the wasteland shrinks, where is there such a pattern? This desert, at a glance, seems to be coming straight for our shelter!"

Lang Yun frowned and spoke in a heavy tone.

His voice was filled with seriousness: "Could it be the work of the Night Slayer Team?"

The desert's pattern of invasion was too bizarre.

Though unlikely, even Su Yu felt that there might be someone manipulating the desert's pattern of invasion; otherwise, it wouldn't show such a... regular moving path.

"Captain Bai, aside from this information, is there any other intel you can gather?"

Su Yu couldn't help but look at Bai Hong.

Bai Hong shook his head: "Currently, the only intel I have are these few photos. Fortunately, I've already sent a few of my team members who I could contact to investigate."

Bai Hong said, pointing to a region about five kilometers north of the shelter on the map.

According to the map, a sizable desert region had already appeared here. Though not large, it was the closest desert area to the shelter, and it was the furthest point that this mobile desert had reached.

"At most, it will take half a day to get some intel back."

Hearing Bai Hong's words, everyone present nodded slightly, but their expressions showed no signs of relaxation.

Before understanding the source of this mysterious desert.

Even Su Yu felt tense inside.

At this moment.

Suddenly, hurried footsteps resonated from outside the meeting room, causing everyone present to turn their heads involuntarily.

"Bang!"

Before they could speak.

The door of the meeting room was forcibly pushed open, and Eisen, sweating profusely, burst in, his voice trembling.

Seeing Eisen barging in, both Bai Hong and the administrator frowned, while Lang Yun and Hu Wen, who disliked the supervisor who had previously relied on the Night Slayer Team's power to bully others, were even more unimpressed with Eisen bringing any useful intel.

At such a critical moment, seeing Eisen barging in like that, the two immediately wanted to reprimand him.

But before they could speak, Eisen cried out first!

"Administrator, Captains, please, come out quickly!"

"The shelter... outside the shelter..."

Eisen spoke while trembling non-stop, his voice stuttering unrecognizably: "Outside the shelter, there's a fog, a massive fog!"

"Fog?"

"What's so scary about a fog..."

Lang Yun and Hu Wen were both startled, instinctively wanting to refute.

Lang Yun even wanted to step forward to question Eisen about what he had seen.

But before he could move forward!

"Bang!"

Su Yu decisively drew a simple handgun, aimed at Eisen's forehead, and fired a shot. Blood splattered as Eisen's brains exploded, causing Lang Yun and the other Hunting Team Leaders to turn pale.

Lang Yun couldn't help but shout: "Mr. Su, you..."

"No nonsense, retreat quickly!"

Before he could finish speaking, Su Yu interrupted him with a brusque shout!

Lang Yun was stunned and instinctively retreated, and just as he completed the retreat.

"Whump!"

The corpse of Eisen, whose head had already been blown off by Su Yu, suddenly exhibited an eerily strange force. It leaped up like a toad, with brains and blood, lunging toward the position where Lang Yun previously stood, and then!

"Boom!"

His entire body exploded!

However, strangely enough, his body contained no flesh or internal organs, only a large mass of grayish-brown, swirling, and swamp-like viscous gray mist.

Yet this mass of gray mist, after twisting a few times, dispersed quickly in the air like true fog!

"What... what is happening!?"

At this point.

Let alone the captains Lang Yun, Hu Wen, and others.

Even Bai Hong, the Rescue Team Captain responsible for gathering intel, couldn't help but cry out in surprise, with unconcealed horror and astonishment in his eyes!

Only the administrator and Su Yu could maintain basic calmness.

But both of their faces were extremely grim!

"This is... Spiritual Erosion!"

"This Eisen had long become the living dead!"

The Administrator, who hailed from Dawn City, and had once achieved the rank of a four-star top-level transcendent, was knowledgeable and well-versed.

As for Su Yu.

Though he did not possess the exaggerated insight of the Administrator, he did possess the Profession Panel. The moment he saw Eisen, he read his status panel!

[Eisen (Deceased)]

[Type: Human/Spiritual Mutant]

[Rating: One-star Beginner Level Extraordinary Life]

[...]

"Spiritual Mutant... Spiritual Erosion, Spiritual Pollution?"

Su Yu instinctively recalled the knowledge he had gleaned from the Empire magazines left by his teacher.

However, now was clearly not the time for analysis.

"Let's go to the shelter gate first and see what is exactly happening!"

### **Chapter 103: Chapter 85: Ghost Demon Cluster! The Administrator Makes a Move!**

"Is this the origin of the desert?"

On the watchtower of the Sanctuary gate, Su Yu and his group looked into the distance with heavy hearts.

At the far end of their vision, several kilometers away from the Sanctuary, a sprawling mass of viscous gray mist extending hundreds of meters was steadily advancing toward their location.

Even though it hadn't drawn near, just staring at the distant gray mist made one feel a wave of dizziness in the brain and an uncontrollable sense of nausea started to spread.

"Administrator, do you know what this is?"

Several Hunting Team Leaders were taken aback by the scene in front of them.

Some even had a look of fear creeping into their eyes.

It wasn't because they were cowardly.

With their strength and hunting experience, even if a four-star Radiation Beast Lord attacked, they wouldn't be scared to this extent.

But the threatening aura from this bizarre gray mist, whose origins and principles were utterly unknown, was in a different league than the threat from a Radiation Beast Lord!

Upon hearing the uneasy questions from the team leaders, the Administrator also felt a heaviness in his heart and put on a serious expression, "I have some suspicions, but I can't be certain yet... someone must go and investigate the situation!"

"I suspect this thing might be related to Ghost Energy!"

"What? Ghost Energy?"

Upon hearing the name.

The present Hunting Team Leaders were all stunned.

The name Ghost Energy wasn't unfamiliar to them.

In this area, the notoriously fearsome medium-sized settlement, the Ghost Tribe, wielded this kind of extraordinary energy.

The origins of Ghost Energy are unknown. Some say it's a creation of chaotic Evil Gods from Subspace, others claim it to be remnants of imperial technology. There are too many theories, and no one cares about the truth anymore. Only two bits of information are certain.

Firstly.

The last ruling entity on Ruins Star, the Ghost Empire, relied on this energy to establish its reign. Of course, this energy eventually turned this frontier planet into the current Ruins Star.

Secondly.

Among the various settlements nearby, only the Ghost Tribe has technology related to Ghost Energy.

"Could it be... this is something the Ghost Tribe concocted? Are they preparing to use it to annex us smaller settlements? But this gray mist doesn't seem like it's trying to subdue us!"

Hu Yueshan spoke, unable to hide the tension in his voice.

The Administrator was aware that the reputation of the Ghost Tribe was intimidating.

These Hunting Team Leaders all carried a significant dread within their hearts.

The Ghost Tribe's notorious reputation wasn't just due to their power. More importantly, over the years, anyone who crossed them, even by accident, whether they were mere ruins residents or ruined settlements, ended up in miserably tragic situations. Being directly killed by people sent by the Ghost Tribe was considered a relatively fortunate outcome.

The truly tragic ones would be captured and taken back to be used as test subjects for the Ghost Tribe's Ghost Energy technology, a fate worse than death!

Even the Administrator, who hailed from Dawn City, feared the Ghost Tribe immensely, let alone these Hunting Team Leaders?

Thus, even though he had a creeping suspicion that this gray mist was created by Ghost Energy, he refrained from confirming it outright. To maintain morale, he immediately declared sternly, "I can't be sure if this is Ghost Energy, so let's not scare ourselves for now!"

The Administrator spoke, preparing to issue orders.

"Bai Hong, gather the rescue team members and organize the Sanctuary residents. Open the armory, distribute firearms, and have them come to the front of the Sanctuary to assist us in repelling this gray mist!"

Even though the exact nature of this bizarre gray mist was unknown.

Sitting and waiting for doom was definitely not the Administrator's style.

When Bai Hong, also startled by the Ghost Tribe's reputation, heard the Administrator's orders, he snapped back to reality and quickly responded, "Understood, I'll go right away!"

Bai Hong turned to start assembling people but was called back by Su Yu before he could act.

"Captain Bai, don't gather the Sanctuary residents."

Su Yu said, looking at the Administrator, speaking in a deep tone, "Not only should we refrain from gathering the Sanctuary residents, but also, no members from the hunting teams below the two-star level should join the battle. I ask all the team leaders to deploy their forces, have them retreat to the back of the Sanctuary, and be prepared to evacuate at any moment!"

"The upcoming blockade can only be handled by those of us who are Transcendents above the two-star level!"

"Mr. Su, what do you mean by this?"

Upon hearing Su Yu's serious words.

The Administrator and others turned slightly pale.

The elder couldn't help but ask in a low voice.

Su Yu took a deep breath, his eyes fixed on the gray mist advancing steadily toward the Sanctuary, and spoke in a calm voice, "Sir, are you familiar with Ghost Demons?"

"Ghost Demons..."

The name made the Administrator freeze for a moment before his pupils shrank to the extreme!

"Are you saying, this gray mist is formed by Ghost Demons?!"

Ghost Energy.

Though its origin is untraceable, one thing is clear.

This kind of energy is extremely chaotic and impure.

Compared to the Spiritual Energy that Transcendents draw from Subspace, Ghost Energy is like the murky water of a swamp.

Even Transcendents with steadfast wills could initially make limited use of it.

But with increased frequency of use, Transcendents engaged with Ghost Energy become like travelers who step deeper into quicksand, getting more entangled until eventually, they are completely assimilated by Ghost Energy, turning into beings akin to a radiation source.

### **Chapter 104: Chapter 85: Ghost Demon Cluster! The Administrator Makes a Move!\_2**

This being akin to a source of radiation is what they call a [Ghost Demon].

Each Ghost Demon, after its birth, will continuously emit Ghost Energy Radiation around it.

If the surrounding people are Transcendents, it's not a problem.

But if they're ordinary people, under this intense Ghost Energy Radiation, they will be continuously assimilated and twisted into beings similar to [Ghost Demons].

Currently, on Ruins Star, those Radiation Beasts that roam, ravage, and proliferate in great numbers stem from such propagation.

And at this moment, before Su Yu's eyes.

As his gaze focused.

The detailed information of the gray mist also entered his view.

[Ghost Demon Cluster]

[Grade: Tier-2 Extraordinary Life Cluster]

[Type: Spiritual Mutant]

[Overall Strength Evaluation: Four-Star Intermediate ~ Four-Star Peak]

As the gray mist continued to approach the Sanctuary.

In Su Yu's eyes, even more, and more detailed information was reflected.

[Li Yao (deceased)]

[Grade: Tier-1 Extraordinary Life]

[Type: Spiritual Mutant · Ghost Demon]

[Overall Strength Evaluation: One-Star Beginner]

[Qian Wu (deceased)]

[Grade: Tier-1 Extraordinary Life]

[Type: Spiritual Mutant · Ghost Demon]

[Overall Strength Evaluation: One-Star Beginner]

[Radiation Hyena A (deceased)]

[Grade: Tier-1 Extraordinary Life]

[Type: Spiritual Mutant · Ghost Demon]

[Overall Strength Evaluation: One-Star Intermediate]

[...]

Lines of information entered Su Yu's eyes.

Even if Su Yu's reactions were slower, he now understood; this so-called Ghost Demon Cluster before him was evidently the Night Slayer Team that had gone missing in the wilderness and never returned!

He just didn't expect the Night Slayer Team to become this sort of ghastly sight!

"Is this due to the Ghost Tribe's technology?"

Su Yu instantly thought of some news he had heard back at the Sanctuary, like how Li He had always been in contact with the Ghost Tribe and that the two parties seemed to have a rather close cooperative relationship.

Back then, knowing this information, Su Yu didn't pay much attention to it.

Unexpectedly, it delivered such a grand gift here!

"Having a combat strength that's at most Four-Star Peak is still manageable... Are they hitting so hard right from the start?"

Su Yu gritted his teeth; his eyes showed frustration but also a fighting spirit!

"Old man! Arrange personnel to evacuate those Sanctuary residents; don't let them get close to the front line! Otherwise, not only will they not help, but they'll also become fodder for the Ghost Demon Cluster! Additionally, do you know how to deal with these Ghost Demons?"

The specifics of Ghost Demons were not known to Su Yu.

He only learned this term through the enemy attributes column provided by the Profession Panel.

But he knew that, even if this Ghost Demon Cluster had indeed reached a maximum strength of four stars top-tier,

even if it had truly achieved a five-star strength, there must be a battle first before saying anything!

According to the intelligence Bai Hong had previously collected, this Ghost Demon Cluster had likely started moving a little more than half a month ago.

Over the past half-month, its moving target had become more and more definite, and its movement speed was also increasing.

If Su Yu were to escape now, it could certainly ensure his survival for a short time.

But traveling from the Sanctuary to the next settlement point would take at least two or three days.

Meanwhile, this Ghost Demon Cluster would inevitably enlarge by devouring the residents of Shelter No. 73, and its movement speed would also further increase.

At that time.

He feared that before finding a suitable place to settle, they would be caught by the further mutated Ghost Demon Cluster!

Not to mention.

Even fleeing without fighting and leaving his teammates behind was something Su Yu, in both of his lifetimes, would not be able to do!

At once, Su Yu spoke in a deep voice, awakening the manager from shock.

At this moment, the old man had countless doubts in his heart.

He could not have thought that the Sanctuary would encounter an attack from a Ghost Demon Cluster.

When did Shelter No. 73 get into such a significant conflict with the Ghost Tribe, warranting the use of such extensive measures to launch an attack against them?

Without Su Yu's Profession Panel, the old man thought that even with Li He's bizarre methods, it was unlikely he could create a Ghost Demon Cluster of such scale.

But he also understood.

Now was not the time to be tangled over these matters.

Feeling the battle intent rising from Su Yu at that moment,

the old man also came back to his senses, immediately responding in a deep voice: "Understood! Captain Bai! Separate the Transcendent members of the rescue team who are below two stars and lead them out! Together with other hunting teams, those below two stars, go to evacuate the Sanctuary residents! Don't waste time, hurry!"

"Yes!"

Bai Hong also knew there was no room for hesitation at this moment, immediately responding in a deep voice and rushing off to assign personnel.

After arranging Bai Hong,

the old man also slightly raised his hand.

"Click!"

The mechanism fell, gears rotated.

The prosthetic components, originally hidden beneath the flesh, revealed themselves at this moment, transforming in an instant into a steel armor that wrapped the old man tightly, leaving only a pair of eyes. Then,

"Boom!"

The manager lifted his hand, grabbing hold of the massive Chain Saw that Bai Hong had previously helped carry in, which was the height of a person. The sight left several flesh-series Hunting Team Leaders nearby with twitching eyelids, while Hu Wen visibly breathed a sigh of relief.

## **Chapter 105: Chapter 85: Ghost Demon Cluster! The Administrator Makes a Move!**

**\_3**

Obviously, the old man had rarely taken action in recent years, which made Hu Wen, Lang Yun, and the others have some unpleasant speculations in their hearts.

But now, feeling the genuine four-star combat power displayed by the old man.

The previous doubts naturally dissipated like smoke!

As for ordinary Hunting Captains like Hu Yueshan and Luo Wang, there was no need to mention them.

Their strongest was only at a three-star top level.

Facing the twisted gray mist cluster formed by the Ghost Demons, they could only feel that the ghost energy radiation emitted by the cluster, condensed into a tangible gray mist, was extremely discomforting.

Besides, under the almost frenzied battle intent stirred by Su Yu, they didn't feel much fear.

And when the Administrator showed strength and activated prosthetic armor.

Apart from the fear, they were also motivated by the old man's displayed strength, immediately following the Administrator, preparing to jump off the watchtower to support Su Yu in intercepting the Ghost Demon cluster.

But at this moment, Lang Yun couldn't help but speak up.

"Administrator, and everyone... after all, this is a Ghost Demon cluster, shouldn't we send someone to inquire first, in case it's the Ghost Tribe, and there's some misunderstanding with us?"

Lang Yun's tone was filled with unmistakable tension and fear.

Before he joined Shelter No. 73, he lived in another small settlement, which was his real hometown.

However, that settlement was ultimately destroyed by the Ghost Tribe, and only he managed to escape, and since then, the Ghost Tribe had become his nightmare. Now encountering a Ghost Demon cluster likely related to the Ghost Tribe.

Lang Yun's nightmare resurfaced, making his heart beat rapidly, unable to muster any battle intent!

And sensing Lang Yun's fear, the other Hunting Captains also hesitated a bit.

Making the Administrator couldn't help but curse inwardly.

But, Lang Yun was also a four-star Transcendent, though an Extraordinary Physical Body, he remained critical combat power at this moment.

If he hesitated, it would undoubtedly heavily impact the upcoming battle!

As the Administrator quickly thought about how to alleviate Lang Yun's fear and persuade him.

Below the watchtower.

Su Yu, who had already jumped off the watchtower and was outside the Sanctuary gate, quietly spoke up!

"Captain Lang, don't you think it's too late to be afraid now?"

"If you were really afraid of the Ghost Tribe, Li He had always had close ties with them, why didn't you simply lead your Wolf Pack Team into Li He's camp instead of waiting until now or even previously cooperating with us against the Night Slayer Team?"

"Why were you not afraid back then that Li He might win or simply mess things up and join forces with the Ghost Tribe for revenge?"

Hearing Su Yu's unabashedly mocking words.

The Administrator's expression slightly changed, worrying that Su Yu's words might backfire and anger Lang Yun.

With the enemy at the gates, this wasn't the time for internal strife!

Indeed, Lang Yun's reaction was as worried.

After Su Yu finished speaking, his face turned unsightly, seemingly about to get angry, but the next moment, Su Yu's words choked his anger back down!

"Moreover, Captain Lang, since you fear the Ghost Tribe so much, you should be aware of their tactics."

"Do you think, if the Ghost Tribe truly intends to target our Sanctuary, they'll listen to us if we send someone now?"

Su Yu spoke.

Looking past Lang Yun at Hu Yueshan, Hu Wen, Luo Xuan, and the others, his voice was calm: "The rest of the captains should think about it too, do you think we still have a retreat at this point? Or do you think we can turn and flee now, escaping the ever-approaching Ghost Demon cluster's pursuit speed?"

Hearing Su Yu's piercing words.

Lang Yun and the other Hunting Captains, initially cowed by the Ghost Tribe's reputation, took a deep breath.

One by one, looking at the advancing Ghost Demon cluster, despite the fear still lingering in their eyes, there was now a resoluteness born from desperation!

Especially Lang Yun, in addition to determination in his eyes, there was an unabashed hatred: "Mr. Su is right, before... I overthought it!"

"At this point, never mind if it's likely the Night Slayer's doing! Even if the Ghost Tribe genuinely comes to kill us, so what!? They've attacked our doorstep! Shouldn't we dare to fight them!?"

Lang Yun said, with a low shout, he was the first to jump off the watchtower, arriving at Su Yu's side as quickly as possible!

"Mr. Su, next, it'll be up to you and the Administrator to command me, for I, Lang Yun, and our Wolf Pack's combatants above two stars, will follow your orders to the letter! No questions asked!"

With Lang Yun speaking up.

The remaining Hunting Captains, whose eyes still held doubt, now thoroughly dispelled it, one by one following Lang Yun to stand behind Su Yu, eyes blazing with fire at the ever-nearing Ghost Demon cluster!

The Administrator witnessed this process, his eyes becoming increasingly bright looking at Su Yu!

"This old bag of bones, when nearing death, actually got lucky!"

The old man shook his head with a sigh, then lightly stepped forward.

"Boom!"

The muscular old man clad in prosthetic armor crashed to the ground, standing beside Su Yu. Every one of them looked at the nearing Ghost Demon cluster, eyes burning with boundless battle spirit!

### **Chapter 106: Chapter 86 1000 Hands 1000 Eyes! [Brutal Evil God]!**

"Mr. Su, there are usually two ways to deal with the Ghost Demon cluster."

"The first is to cover it with heavy firepower, dispersing the substantive radiation mist that shrouds the body near the Ghost Demon, and then assault the body of the Ghost Demon. However, this method requires heavy firepower of sufficient intensity to be effective."

"The second is to penetrate the gray mist inside the Ghost Demon cluster and directly attack the leader of the Ghost Demon cluster! If the leader of the Ghost Demon cluster can be eliminated, the other Ghost Demons will disperse on their own, and their mist defense will cease to exist. Fighting them then won't be much different from dealing with regular Radiation Beasts!"

The old man's voice rang out heavily from beneath the prosthetic armor.

The most troublesome aspect of the Ghost Demons is the [Ghost Energy Radiation] that constantly envelops them.

When there is only one or a few Ghost Demons, their Ghost Energy Radiation at most affects the surrounding environment and causes some radiation damage to nearby ordinary individuals, inducing radiation sickness, which is its limit.

But if the number of Ghost Demons reaches a certain level,

they will form a Ghost Demon cluster,

and the Ghost Energy Radiation around them, previously imperceptible to the naked eye, will materialize and transform into the thick, swamp-like radiation mist that appears before everyone now.

Under the protection of this radiation mist,

both physical and spiritual attacks will be greatly weakened by the radiation mist before causing any harm to the Ghost Demons.

Therefore, to deal with the Ghost Demon cluster, regardless of the chosen method, the radiation mist surrounding the Ghost Demon cluster must be dispelled first!

"Must we use dense heavy firepower to disperse that radiation mist? That's probably not feasible..."

Su Yu shook his head.

He had sixty mounted cavalry,

but the Ghost Demon cluster before him spanned over a hundred meters.

Even if sixty mounted cavalry were to fire simultaneously, the firepower net they could create would indeed cover the entire Ghost Demon cluster, but such a wide area fire coverage would inevitably result in a single area not having enough concentrated damage to disperse the radiation mist.

Hence, only the second path remains.

"Let's first deal with the leader of this Ghost Demon cluster!"

Su Yu said in a deep voice.

"In that case, there's no need for the two-star Transcendents to accompany us. They should stay at the entrance of the Sanctuary and set up a firepower net. Although it won't harm these Ghost Demons, it can at least delay them and give us time to find and eliminate the leader of the Ghost Demon cluster."

The old man said softly.

Su Yu nodded.

Previously, he intended to fight a positional battle, trying to use long-range firepower coverage to defeat the Ghost Demon cluster in front of him.

If the distance could be kept, even two-star Transcendents could withstand the pollution of Ghost Energy Radiation carried by the Ghost Demon cluster.

But now, since they needed to penetrate the Ghost Demon cluster,

the Ghost Energy Radiation they had to endure would be even fiercer.

Even the top-star two-star Transcendents might not be able to withstand it.

Immediately, under the management's and Su Yu's deployment,

everyone quickly divided their tasks.

The two-star Transcendents, led by Lang Yun and Shanan, the two top-star two-star Scouts, were stationed at the front gate of the Sanctuary, using firearms and equipment to hinder the progress of the Ghost Demon cluster.

The remaining members, led by Su Yu, Yang Lie, and the manager, more than ten three-star and higher Transcendents, began to move toward the Ghost Demon cluster.

However, the original team of dozens was now reduced to one-fifth.

Even with the pre-battle mobilization conducted by Su Yu,

it was uncontrollable for people to exhibit nervousness on their faces.

Except for Yang Lie, who had always resolutely followed behind Su Yu.

Others, even someone like Lang Yun, who had been awakened by Su Yu's words to his traumatic childhood memories, aroused his hatred towards the Ghost Tribe and the Ghost Demons, found themselves inevitably nervous as they approached the sprawling Ghost Demon cluster of over a hundred meters.

Looking at the Ghost Demon cluster and comparing it to their own seemingly small group,

it was unavoidable for nervousness to surface in their eyes.

And understandably, even the manager was helpless about this.

At this time,

Su Yu laughed.

"Why so tense, everyone? Our team isn't just made up of us here!"

He said.

Su Yu raised his hand.

"Nuonuo, are all units in position?"

As Su Yu's words fell,

"Shhhhhh——!"

A dense rustling sound suddenly emerged from the otherwise silent dry grass!

Then, under the surprised gazes of Lang Yun and others, sixty mounted cavalry, in a wedge formation, slowly advanced from the dry grass, perfectly positioning Su Yu and his team in the center of the combat formation.

Nuonuo, with tracks moving, carrying a huge suitcase on its back, slowly approached from the rear, still lacking any emotional fluctuation in its electronic synthesized voice, but at this moment, it filled Lang Yun and others with an indescribable encouragement and confidence, "Ready for orders, sir!"

"Very good!"

Su Yu smiled slightly, his gaze sweeping over his teammates who had regained their fighting spirit and looking at the Ghost Demon cluster, now within reach, a glint of anticipation in his eyes!

His current strength did make dealing with this Ghost Demon cluster somewhat challenging.

But...

Su Yu looked at his Profession Panel.

## **Chapter 107: Chapter 86: Thousand Hands, Thousand Eyes! 【Brutal Evil God】**

**!\_2**

As the distance between him and the Ghost Demon cluster shrinks to within a hundred meters.

More Ghost Demon information came into Su Yu's view through the twisted radiation fog churning with bubbles in front of him.

From one-star to three-star, a vast number of mutated Ghost Demons, numbering in the hundreds, were waiting within the gray fog for Su Yu and the others to step in, awaiting to divide Su Yu and the others among themselves.

However.

In their eyes, Su Yu and the others were merely prey that delivered themselves to the doorstep.

But for Su Yu himself.

"So many mutated Ghost Demons, even though I don't aim to kill them all, shouldn't there be no big problem in taking down the majority while looking for that guy, Captain Li He, who leads this Ghost Demon cluster?"

His Wilderness Hunter, just started.

Is precisely lacking experience!

...

"The breath of the living..."

The Ghost Demon cluster, deep within the gray fog.

A hideous and dreadful voice whispers silently.

Amidst numerous Ghost Demons.

A figure no longer resembling human form, more akin to some kind of Radiation Beast, with limbs akin to tentacles, slowly raised its head.

His body, mostly covered in a substantial gray-brown Ghost Energy, leaving only a face to barely maintain a human shape.

If the residents of Shelter No. 73 were here, they would recognize instantly.

The owner of this face is the past's only three-star top-level psychic Transcendent of Shelter No. 73, Night Slayer Captain, Li He!

At this moment, as Su Yu and others intruded into the Ghost Demon cluster's interior.

Li He, who was in a dark slumber, also awakened from his sleep.

Feeling his current physical condition.

There was a flash of grim regret in Li He's eyes!

He wanted to become a four-star Transcendent.

But definitely not this kind of [Extraordinary Life]!

However luckily...

Li He raised his head, through the sight of the other Ghost Demons in the cluster, looked forward.

With the incredibly dense Ghost Energy support, he could even see kilometers away those who were holding guns, fully prepared before the makeshift fortifications piled at the sanctuary gate, waiting for the Ghost Demon cluster to come into range, ready to

pull the trigger and fire to block his steps, their faces showing the uncontrollable fear and nervousness!

This made the smile on his lips even more rampant!

"Devour everything! Destroy everything! Annihilate everything!"

"Destruction is ascension!"

Although turned into this bizarre form now.

But in his mind, upon consuming the Ghost Energy Potion, there was no longer the incessant whispering that made him want to tear off his ears, shred his brain, and pierce his eardrums, which was dense to the extreme.

Replaced by a grand and resonant voice, echoing in Li He's mind, making Li He faintly see a sacred tableau!

On that tableau, he stood with reverence beside the beloved scion of the benevolent figure, offering the most perfect loyalty to that scion!

And he, in return, received the generous reward from that beloved scion, which was like the perfect posture of life's evolution, akin to a deity!

"Honored master, your servant will do his utmost to awaken you! To return to the side of the benevolent figure!"

Li He muttered softly, his eyes on the tableau, filled with fascination and worship!

Yet, if at this moment, an ordinary person could appear in Li He's mind, could share the current spiritual world of Li He.

Then, they would be able to see the real picture of that "sacred" tableau.

It was a gray, desolate throne made up of countless corpses and countless decaying planets stacked together.

Upon the throne, there was no benevolent figure, only a gigantic black shadow, as if it could swallow the entire galaxy, its true form unclear.

The only unmistakable presence.

Was the towering figure standing before that shadow.

Its true visage was likewise beyond Li He's imagination, but compared to the visageless benevolent figure, the master Li He loyally served, Li He could at least imagine a slight outline.

It was an aberrant deity wielding a thousand unique weapons, with a body formed from corpses piled a thousand zhang high, having a thousand hands of different races, a thousand eyes of different races—

Thousand-Handed Thousand-Eyed—

[Brutal Evil God].

...

"Huff... Huff..."

The deepest part of the Ghost Demon cluster.

Li He suddenly broke free from that eerie state, panting heavily, with irrepressible delight in his eyes!

Though it was merely a fleeting glance.

He indeed saw his master's face!

The figure of the master who bestowed him the Meditation Technique... was so majestic and shining, making Li He almost desperate to dedicate his life to him!

Fortunately, his master was so merciful, rather than taking his life, he rewarded his loyal servant with an even more extravagant return!

"A sacrifice, I need more offerings to achieve ascension!"

"Only a life after ascension can please the great master!"

Li He's voice was leisurely, yet it carried an uncanny tone of madness!

And fortunately, right before him, lay a perfect place for sacrifice!

Should all those offerings be annihilated, he would undoubtedly transform again, taking a step further towards ascension!

### **Chapter 108: Chapter 86: 1000 Hands 1000 Eyes! [Brutal Evil God]!\_3**

Just as Li He was envisioning his glorious future after ascension.

Suddenly.

"Sizzle——!"

It was as if a scorching branding iron had been plunged into icy water.

Li He felt as if a few of the hundreds of "eyes" he had grown were suddenly seared away, causing a sharp loss in his field of vision!

"Who is it! Who? Who damaged my eyes?! Who entered my body?!"

Li He's voice was filled with ferocity, and his face spun furiously in every direction, looking peculiarly amusing.

But considering that his entire person now resembled a sculpture covered in solidified Ghost Energy Crystals.

Against this backdrop, a human face could turn to various angles.

This amusing scene became somewhat startling.

And soon, Li He discovered the presence that had invaded his "body."

"Su Yu? The Manager? Lang Yun? Hu Wen? Yang Lie?"

Looking at those familiar faces.

Li He's eyes were filled with joy rather than fear!

"This is truly... the most perfect sacrifice!"

Accompanied by Li He, with a beast-like shrill laughter.

"Rustle, rustle, rustle, rustle, rustle!"

Amid the dense gray mist, almost impeding normal movement.

Those Ghost Demons clustered around Li He, whether transformed from Night Slayer Team members or mutated from Radiation Beasts.

At this moment, all rose slowly at Li He's command, their pupils igniting with a blood-red light!

"Go for the slaughter! Go for destruction!"

"Bring those sacrifices here as the grand opening ceremony for my next metamorphosis!"

...

In the midst of the gray mist.

Su Yu and his team were steadily advancing forward.

However, although they had already prepared before entering the Ghost Demon Cluster.

Yet, truly entering the interior of the Ghost Demon Cluster and coming into close contact with the radiation gray mist.

Even Su Yu felt a slight, unbearable discomfort.

The emotions of the entire person became increasingly excitable and extreme.

"Ghost Demons, Ghost Energy... such creations are indeed extraordinarily bizarre. No wonder the Ghost Empire could rule this planet in the previous epoch."

If this technology could restrain its negative effects and be fully utilized, it could indeed exhibit considerably formidable power.

But, if unable to restrain the negative effects...

Su Yu shook his head.

He could somewhat understand how in the last epoch, before the fall of the Ghost Empire, the final battle that turned the entire planet into a radiated capital, and endless ruins came to be.

It likely resulted from the influence of Ghost Energy, causing the Empire's army and rebels to see red and lose their heads until they obliterated each other.

As Su Yu pondered over these thoughts in his heart.

Beside him, Yang Lie and the others constantly remained vigilant of their surroundings, guarding against the sudden onslaught of Ghost Demons.

Within this Ghost Demon Cluster, where the eye could see, all was shrouded by thick, gray-brown radiation mist, impeding their steps and severely obstructing their vision.

The few Ghost Demons they had previously killed only came into view when they were very near the formation.

If not for Su Yu summoning the cavalry squad to form a battle array protecting them and providing early warnings.

The Ghost Demons could have reached them before they even reacted.

Watching their highly cautious demeanor.

Su Yu was quite content to remain leisurely.

Though he had Core Specialization in Holographic Perception.

Activating it also consumed Spiritual Energy.

Since the team members could still maintain vigilance around them, and the cavalry lines had yet to show any breach, Su Yu naturally preferred not to waste too much Spiritual Energy, only sustaining the basic Perception of Killing Intent to monitor the surroundings within a few hundred meters.

It was at this moment.

"Swish!"

The Manager abruptly lifted his head, locking his gaze towards the southwest. With a clang, he set aside the Chain Saw in his hand, retrieved a small revolver from the armor by his waist, aimed it in that direction, and directly pulled the trigger!

"Bang bang bang!"

Three consecutive bullets fired from the magazine, tracing a line of fire in the pitch-black gray mist before breaking into the depths of the gray mist.

Yet, subsequently, it seemed like a clay ox entering the sea, with no further sound.

"Missed?"

A vice-captain of the Shan Lan Team couldn't help but speak softly.

"Silence, keep your guard up!"

Hu Wen gave a low shout, reminding him to shut his mouth.

However, Su Yu softly spoke: "No, it's a hit!"

At the moment the Manager fired the gun.

Su Yu also synchronized his focus, locking the Perception of Killing Intent in that direction. As the Manager's bullets were fired, that area immediately lit up with a few red dots, filled with malice and killing intent, attacking towards Su Yu's group!

"There are three Ghost Demons in total!?"

In the gray mist, three shadows suddenly leaped out, slightly changing the faces of the Manager and the others, as they immediately intended to engage.

But Su Yu directly turned his back!

Upon confirming possible enemy proximity.

Su Yu not only focused the sensing range of Perception of Killing Intent, but also simultaneously activated the Holographic Perception capability!

When it's time to save Spiritual Energy, it should indeed be saved, but in true combat, in such a situation where the enemy is in the dark, it's not saving to shut down Holographic Perception, but foolishness!

Within Su Yu's field of vision, under the dual overlay of Perception of Killing Intent and Holographic Perception.

Around Su Yu's Team, the first wave of thirteen Ghost Demons, called forth by Li He, was all fully revealed and unhid!

"Not three, but thirteen! Three in the southwest, five in the southeast! There are also two Ghost Demons in the northwest direction! Besides, above, there are two more!"

Su Yu took a deep breath, then subtly extended his hand, pressing downwards.

"Everyone, get down, let the cavalry deal with them!"

"Ha!?"

### **Chapter 109: Chapter 87: Li the Good Samaritan! Rapid Level Up!**

"Bend down? Now?"

Everyone was stunned for a moment, but instinctively crouched down, and just at the moment they bent their bodies.

"Rat-tat-tat-tat-tat——!"

Dense machine gun fire rang out at this moment in the gray mist!

Sixty Rangers simultaneously lowered their tracks and raised their gun barrels, each aiming internally to execute crossfire. The dense net of firepower covered over Su Yu and his team, while there was also a dull, bullet-like, flesh-piercing sound that occurred simultaneously!

Under the crossfire coverage of the Rangers.

The ten or so Ghost Demons that had silently lurked around Su Yu and his group, using the gray mist for cover, began their assault almost simultaneously as Su Yu ordered the attack, displaying their exceptionally sharp reaction speed.

Unfortunately, this extremely sharp reaction speed became the cause of their demise at this moment!

A second before they attacked, the net of firepower from the machine guns of the sixty Rangers directly shot and exploded them in mid-air!

[Ding!]

[You have successfully killed a Ghost Demon (One-Star Primary), and you have gained Professional Experience (Wilderness Hunter): 300 points!]

[Ding!]

[You have successfully killed a Ghost Demon (One-Star Advanced), and you have gained Professional Experience (Wilderness Hunter): 1000 points!]

[Ding!]

[You have successfully killed a Ghost Demon (One-Star Advanced), and you have gained Professional Experience (Wilderness Hunter): 1000 points!]

[Ding...]

The continuous prompt messages instantly refreshed at the bottom of Su Yu's Profession Panel.

In just this brief moment.

Su Yu directly harvested a total of 5,000 experience points, filling half of the experience progress bar needed to level up his Wilderness Hunter profession to the next level!

"As expected, these Ghost Demons are not just threats to me, but also great experience packs!"

Looking at the experience prompts refreshing on the Profession Panel, Su Yu grinned brightly.

The administrators and others were shocked by the heavy firepower displayed by the Rangers.

Even Yang Lie was no exception.

Although Yang Lie had previously witnessed the damage that could be caused by crossfire from the Ranger Battalion, at that time, the Rangers were still just a combat squad composed of only ten Rangers.

It couldn't compare to the current firepower net composed of sixty Rangers!

"With such firepower coverage, even a Three-Star Transcendent would probably be riddled with bullets, right?"

"A Three-Star Transcendent? Even a Three-Star Radiation Beast Lord would be eliminated on the spot if covered by this firepower net!"

Lang Yun and Hu Wen also sighed in amazement.

Yang Lie, having at least witnessed the strength of the Ranger Squad before, had some psychological preparation for the combat strength of the Ranger Battalion.

This was their first time truly cooperating with Su Yu on the battlefield.

At this moment, they were all stunned by the combat strength demonstrated by the Ranger Battalion.

And upon recovering,

their eyes were filled with undeniable joy!

After all, as allies,

the stronger Su Yu was, the higher their chances of winning this battle!

As for Hu Yueshan, Bai Hong, and Luo Xuan, there's no need to mention them.

Their strength was only at the Three-Star level of Extraordinary of Physical Body.

Although their perception was exceptionally keen, far beyond that of ordinary people, under the influence of the radiation gray mist, their perceptive abilities were also difficult to fully exert.

The disadvantage in battle naturally made them panic, hard to stabilize themselves.

But the strength Su Yu was displaying at this moment, to put it mildly, was like a solid guarantee, directly stabilizing their minds and remarkably boosting their morale!

"Everyone, it's not time to relax yet. This gray mist is still quite extensive! We've only just begun!"

Noticing the boosted morale among the group, Su Yu couldn't help but smile, but also reminded them.

"Understood! Don't worry, Mr. Su, we are all prepared!"

Everyone responded repeatedly.

A few of the more exuberant vice-captains even patted their chests and said, "If more Ghost Demons come later, Mr. Su can let your Rangers slow down a bit, so we can help out a bit too!"

Hearing their words, Su Yu couldn't help but shake his head with a smile, "Okay, I'll try to see if I can do that!"

However, he was just saying that.

If possible,

Su Yu would naturally prefer for all the Ghost Demons to be taken care of solely by the Ranger Battalion!

But this possibility is merely wishful thinking.

In Su Yu's holographic perception,

in this area, apart from the huge red dot hidden in the deepest part of the gray mist, likely representing Li He,

there were still hundreds of various-sized red dots representing the killing intent of the Ghost Demons!

Hundreds of Ghost Demons.

Unless Su Yu could now double the size of the Ranger Battalion, otherwise, he must rely on the help of other teammates to stand a chance of breaking through to the deepest part of the gray mist to target Li He, the mastermind!

"Rat-tat-tat-tat-tat——!"

As expected, just as Su Yu anticipated.

As they continued to advance,

the number and size of Ghost Demons appearing in front of them steadily increased.

Initially, only a few, at most a dozen or so Ghost Demons appeared together.

But later on, when a dozen or so Ghost Demons attacked together, there might be another wave of Ghost Demons coming from behind.

At the peak,

Su Yu's team even had to face attacks from nearly fifty Ghost Demons simultaneously!

### **Chapter 110: Chapter 87: Li the Good Samaritan! Rapid Level Up!\_2**

The only fortunate thing is that the strength of these nearly fifty Ghost Demons is still just at the one-star level.

Although their abilities are special and their attacks have considerable corrosiveness under the influence of distorted Ghost Energy.

Even a three-star Extraordinary of Physical Body engaging in close combat with them can suffer a difficult-to-heal wound if slightly careless.

But with the advantage in strength.

Su Yu's Team did not suffer any serious injuries. Even if a few vice-captains had bad luck and got hurt, they were only lightly injured and could continue fighting with simple bandaging.

And as everyone continued to advance.

Su Yu's level was steadily rising.

After again defeating a group of attacking Ghost Demons.

Su Yu was pleasantly surprised to find his job level of [Wilderness Hunter] had already risen to level seven!

"For a first-tier job, the difficulty of upgrading [Wilderness Hunter] is significantly lower than that of [Battlefield Mechanic]..."

Su Yu glanced at the experience bar of the Wilderness Hunter, somewhat surprised.

Previously, at level seven, the experience required for Battlefield Mechanic to upgrade to the next level was already approaching thirty thousand points.

Finally, going from level 19 to level 20 required nearly a hundred thousand experience points.

But now, [Wilderness Hunter] has already reached lv7.

But the experience required to upgrade to the next level is still only...

"Fifteen thousand points?"

Su Yu pondered for a moment and roughly understood this upgrade rule.

"There are also distinctions among first-tier jobs."

For a first-tier job, the enhancement effect brought by each level upgrade for [Battlefield Mechanic] is obviously more than that of [Wilderness Hunter].

Although [Battlefield Mechanic] mainly focuses on enhancing Spiritual Ability.

But during the upgrading process, Su Yu's physical body and stamina also received considerable amplification.

And as for [Wilderness Hunter]...

From lv1 to the current lv7.

The level has increased significantly.

But Su Yu mainly enhanced his strength in the physical body system, upgrading from a three-star junior level to a three-star intermediate level.

As for Spiritual Ability, it's not that there has been no increase at all.

But the increase was indeed not very substantial.

However, this is not entirely bad news for Su Yu.

In the long run, the overall amplification of [Wilderness Hunter] is indeed much less than that of [Battlefield Mechanic].

But...

Su Yu's gaze turned to the Ghost Demons swarming again in front of him. His eyes flashed like electricity as he raised his hand abruptly, ordering the cavalrymen to fire simultaneously, instantly killing those attacking Ghost Demons.

Looking at his experience bar rapidly rising again, Su Yu nodded in satisfaction.

"Long-term benefits are very important."

"But for me right now, the ability to quickly increase my strength is more important than some long-term benefits!"

After all, every bit of strength gained now.

Will give us more chances of winning in the next confrontation with Li He.

If we do not win this battle, I may not even be able to save my life, let alone consider any long-term benefits!

"Da-da-da-da-da—!"

Clearing his thoughts.

Su Yu commanded his cavalry regiment to continue advancing steadily towards the front.

But, just then.

"Crash!"

The previously calm grey fog suddenly began to roll and wreak havoc again, causing Yang Lie and others to slightly change their expressions!

"Has the grey fog become denser again?"

"I seem to have lost the perception of the Ghost Demons' presence!"

"Wait, where have we walked to?"

Taking Su Yu's Team as the center.

At this moment, the initially calm grey fog became increasingly dense, and the entire grey fog began to rotate!

This rotation was exceptionally swift, causing Yang Lie and others to lose their sense of direction almost instantly, unable to find the direction they originally locked on to!

"This is bad!"

Even the manager furrowed his brows tightly!

Their purpose of entering the radioactive grey fog was to quickly find Li He's location, capture the ringleader first, and kill Li He, the head of the Ghost Demons.

But now, whether Li He had already detected their preparation or felt threatened is unknown.

Anyway, through his maneuver.

Su Yu and his companions had completely lost their sense of direction.

They could only rely on luck to explore everywhere.

If their luck was bad.

They might even end up retracing their steps out of the radioactive grey fog, wasting the effort they had used to counter its influence!

"What should we do? Sir, Mr. Su?"

Bai Hong and others couldn't help but look towards the manager and Su Yu.

This unexpected situation exceeded their expectations, and they needed the manager and Su Yu to come up with a leader's solution!

Feeling everyone's gaze, the manager's expression was somewhat grave, but he couldn't come up with a solution immediately.

His prosthetic did indeed have night vision components.

But the problem was the current dim environment was created by Transcendent Spiritual Energy.

Even with night vision devices, it's still hard to detect and find the correct path!

At this moment.

Su Yu smiled and spoke up.

"Don't worry, everyone, just follow me!"

"I guarantee that you won't make a pointless run, nor will you lose track of Li He's position! At most, it'll just take a bit more time!"

Su Yu's mouth curled into a smile, looking at the pitch-black radioactive grey fog ahead, with a trace of undetectable mockery in his eyes.

There's no denying it.

The maneuver Li He just pulled off could indeed be described as highly effective.
