**Chapter 131: Chapter 94: Electromagnetic Fury! 100 Strikes in a Flash! Tail-biting Pursuit! \_2**

The filthy, chaotic, and corrosive ghost energy.

Upon landing on Su Yu's Thousand-Handed Prosthetic, it was instantly evaporated and purified by the arcs of electricity dancing on the prosthetic, not causing even the slightest substantial damage to it.

It only slightly slowed down Su Yu's charge speed.

However.

Even with a slight slowdown, Su Yu's strike was still full of impact.

"Boom!"

Under the nearly stunned gaze of the administrators and others.

Behind Su Yu, two mechanical arms equipped with chain saws roared with the sound of violent sawing, slicing down on Li He in an instant, directly splitting Li He's upper body from his lower body!

"Ah!"

A grey-brown liquid, resembling blood, spilled from the upper half of Li He that was thrown into the air, accompanied by his extremely shrill wails!

That half of Li He's body was cut and flown out of the radiation grey mist by Su Yu's strike, landing outside the mist!

Immediately.

"Sizzle, sizzle, sizzle, sizzle——!"

Away from the support of the radiation grey mist.

Li He's ghost energy, already diminished, fell even further at this moment, dropping directly from a five-star level down to a four-star level.

The wound at the waist spewed out large bundles of grey-brown fog, as if without the protection of the radiation grey mist, Li He could no longer be exposed to sunlight!

"Is it... over?"

Watching the scene in front of them.

The administrators and others rushed in, surrounding Su Yu in the middle, fearing that Li He might rise up again and harm Su Yu, carefully watching the distant Li He with his eyes tightly closed, the wound at his waist still emitting grey-brown mist, their voices tinged with excitement!

Even Su Yu couldn't help but relax a little.

But, in the next second.

Su Yu's eyes flashed sharply!

"No!"

"It's not over yet! This Li He isn't dead! He's escaping!"

"Escaping?"

Upon hearing Su Yu's words.

The administrators and others were taken aback, then rushed to the position of Li He's upper body, encircling it in the center, but seconds passed, two seconds passed... Li He's body still lay there quietly, eyes tightly closed, showing no sign of escaping...

"No!"

"It's the smoke! That smoke is the true form of Li He!"

After a brief moment of realization.

The administrators and others also realized the issue, attempting to stop the grey-brown mist constantly escaping Li He's body.

However, the mist's form was exceptionally bizarre. No matter how they tried to block it, even using firearms could only temporarily disperse the grey mist, making it difficult to completely eliminate it!

"Don't bother trying, this ghost energy grey mist is too special..."

Not far away, the radiation grey mist that came with the ghost demon cluster led by Li He.

After the ghost demon cluster, and even Li He himself, were thoroughly defeated by Su Yu and others, it also dispersed with the wind.

Su Yu emerged from it, dismantling the now-defunct Thousand-Handed Prosthetic as he walked, regrettably handing it to Nuonuo who came up behind him, looking at the lifeless Li He on the ground, then at the constantly dispersing ghost energy grey mist quickly flying towards the southwest of the Sanctuary, his gaze icy.

As Su Yu's eyes hardened.

The grey-brown mist dispersing from Li He's body also revealed lines of information.

[Ghost Demon-Li He (Ghost Energy Transformation)]

[Star Level:]

[Spirit System Four-Star Beginner/Five-Star Beginner (Ghost Energy Transformation, severely injured, body damaged... debuff combined impact)]

[Flesh System Three-Star Beginner/Three-Star Top Level (Ghost Energy Transformation, severely injured, body damaged...)]

[Trait:]

[Ghost Demon: A mutant creature transformed by out-of-control ghost energy, can ignore the negative effects brought by ghost energy, and ghost energy cultivation efficiency increases, but as strength grows, rationality will gradually decrease to zero, turning into a beast of slaughter that only knows destruction and ruin]

[Skills:]

[Ghost Energy Armor (damaged, unavailable)]

[Ghost Energy Beam (in ghost energy transformation, temporarily unavailable)]

[Ghost Energy Erosion (in ghost energy transformation, temporarily unavailable)]

[Summoning Followers (in ghost energy transformation, temporarily unavailable)]

[Ghost Energy Transformation: A limited ability; only four-star level and above Ghost Demons can master it, and it can only be used once, consuming massive ghost energy,

transforming oneself into a ghost energy form, moving at high speed, becoming immune to all physical damage during movement and greatly increasing spiritual energy resistance. The duration depends on the strength of the Ghost Demon, with a maximum of nine hours, after which it enters a weak state, reducing strength by 50%]

Perhaps because Li He's current state is quite miserable.

When Su Yu's gaze locked onto Li He, the detailed information of Li He was directly revealed to Su Yu.

And Li He's current form was also known to Su Yu.

"Ghost Energy Transformation... this escape skill indeed has a remarkable effect."

Su Yu said softly.

"Li He has now completely transformed into an energy form, not to mention physical damage, even spiritual energy can't inflict much damage on him!"

"Then what do we do, are we just going to let this guy get away?"

After today's battle, Li He has left an extremely deep impression on the Sanctuary's people.

If they really let Li He escape, who knows if he will come back for revenge in the future?

### **Chapter 132: Chapter 94: Electromagnetic Fury! 100 Strikes in an Instant! Tail-biting Pursuit!\_3**

Even the manager, despite his physical weakness, gritted his teeth and said, "I'll go chase him for a while longer. In my current prosthetic condition, I can hold on for at least another half hour!"

"No."

Su Yu shook his head, stopping the old manager.

Although the Profession Panel did not give a specific number for how long Li He could maintain this ghost energy form, Su Yu could roughly estimate it.

Li He's strength was directly assessed as five-star level by the Profession Panel, but now it only remained at a four-star introductory level.

Even if part of the ghost energy was consumed during the battle with him, the remaining ghost energy should allow him to maintain his form for one or two hours, maybe even longer.

The old manager's prosthetic armor couldn't hold on until then.

"Are there any other vehicles in the Sanctuary?"

Su Yu looked at the manager and asked solemnly.

"There's a motorcycle, but its kinetic core is already damaged, and it can only last for a day and a night at most."

The manager replied in a low voice.

"A day and a night? That's enough!"

Su Yu smiled slightly, then turned and called for Nuonuo.

"Nuonuo, you'll be responsible for collecting parts from the battlefield and assembling a batch of cavalrymen as quickly as possible. Once there are twenty cavalrymen, come to support me; you should be able to sense my location."

Nuonuo nodded immediately and continued to swing her mechanical arm to start assembling the cavalrymen.

The others also understood Su Yu's plan.

"Brother Su, are you going to chase and kill Li He alone?"

"Yes."

Su Yu did not hide it and nodded directly: "Li He is too much of a threat, and..."

Su Yu looked in the direction where Li He fled, his eyes extremely serious.

"With Li He able to convert so many ghost demons, who would believe he has nothing to do with the Ghost Tribe?"

If Li He could be sniped here, that would be ideal.

But if Li He escapes and joins the Ghost Tribe, that would be troublesome!

The Ghost Tribe may not start a war to destroy the Sanctuary for just one person, Li He.

But.

If the Ghost Tribe discovers that I can suppress or even defeat Li He,

They might target me as a prize.

In the battle with Li He, the technologies I displayed, whether it be the cavalrymen legion, the Electromagnetic Fury ability, or the Thousand-Handed Prosthetic,

are all incredibly valuable technologies to any settlement on Ruins Star.

So, Li He must die!

Su Yu did not voice these considerations, but anyone could feel his determination to kill Li He.

However, Yang Lie and others could not help but feel worried, "Brother Su, are you sure you can do it alone? Should I, or Captain Lang Yun, or Captain Hu Wen, go with you to help?"

"The motorcycle can carry passengers too!"

"Captain Yang is right! Mr. Su, why don't we help out too!"

Beside him, Lang Yun and Hu Wen couldn't help but speak up.

During the battle against Li He, although Su Yu sacrificed many cavalrymen, he had also established incredible prestige within the Sanctuary.

The remaining powerhouses at the Sanctuary, including the two four-star Transcendents, Lang Yun and Hu Wen, were already in awe of Su Yu.

At this moment, they all volunteered to assist, leaving Su Yu somewhat moved.

However, he politely declined their offers to help.

It's not that Su Yu wanted to monopolize the experience, but because Li He's moving speed was too fast.

"The speed of that motorcycle only barely keeps up with Li He in his ghost energy form, and may even fall short. Adding another person would likely make it too late!"

After all.

Su Yu's goal was not just to catch up with Li He, but to intercept and kill him before he reached the Ghost Tribe!

"Everyone should stay at the Sanctuary and prepare for defense. I can handle it alone. Besides, once Nuonuo is done assembling a batch of cavalrymen, she will join to help too."

With that said,

Su Yu wasted no time, and immediately took over the motorcycle Bai Hong had brought out from the Sanctuary. He inserted the key, and with the roar of the engine, he sped in the direction Li He fled!

Watching Su Yu's departing figure,

The manager and others couldn't help but take a deep breath, their eyes filled with anticipation, as well as a sense of relief.

Although Li He had not been slain yet,

At least, with today's battle, they had won, preserving the Sanctuary and their lives and future!

"Quickly organize the battlefield, rescue the injured, and remember to inventory all the supplies at the Night Slayer Team's base!"

"Wait for Mr. Su to return, and let him handle everything!"

The manager had just removed his prosthetic armor and felt a wave of weakness. It was only with Bai Hong's support that he didn't collapse, but he didn't bother resting and immediately issued orders, especially emphasizing leaving the spoils for Su Yu to distribute.

There was naturally no objection to the old man's decision, and everyone acted quickly.

Meanwhile,

With the help of the off-road motorcycle,

Over two hours later,

Although still several kilometers away and very blurry,

With the incredible eyesight enhancement from Spiritual Enhancement and the Wilderness Survival Elite, Su Yu could still distinguish the gray-brown smoke in the distance as the ghost energy fog Li He had transformed into!

Moreover, as Su Yu's gaze focused.

Rows of information began to appear on the fog.

Reinforcing Su Yu's judgment.

"Fortunately, I didn't let the old man come along, or he would have collapsed halfway."

Seeing the ghost energy fog still going strong even after nearly three hours, Su Yu couldn't help but murmur.

And in the distance, the frantically fleeing Li He also felt Su Yu approaching, and he was about to crumble!

"How the hell did he find my location!?"

### **Chapter 133: Chapter 95 Pull the Trigger! Electromagnetic Sniper Cannon! Ghost Wolf Riders! That's as far as you go!**

Li He's heart was in utter chaos.

His Ghost Energy transformation could only last for another thirty minutes at most.

If he continued at this high speed, the time would be even shorter.

But this amount of time was clearly not enough to escape to the location of the Ghost Tribe.

Thinking of this.

Li He couldn't help but growl in a low voice towards Su Yu's direction: "Su Yu, stop chasing me! I'm already within the usual hunting range of the Ghost Tribe, and their cavalry is nothing like the hunting teams from Shelter No. 73. Their alert range is much broader!"

"Once they find you within their hunting range, you're dead for sure!"

"Oh? Then let them kill me first."

Su Yu's voice was very calm.

As Li He began to flee, Su Yu had already guessed the direction of his escape and was mentally prepared for a potential conflict with the Ghost Tribe's team. He was not deterred by Li He's threats.

Anyway,

the Ghost Tribe didn't know his origin.

As long as he killed Li He before he could speak.

Of course,

there was a possibility that the Ghost Tribe might send people to Shelter No. 73 to investigate the situation afterward.

But the enmity between Li He and himself was irreconcilable, so what's the use of worrying about future troubles? It would only add to the hassle!

Things should be done swiftly and decisively!

"Damn it... this guy is determined to kill me here!"

Sensing the resolve in Su Yu's eyes.

Li He's heart was chilled to the core.

Seeing the distance between Su Yu and himself closing in.

Li He's heart was filled with increasing panic.

Although he was reluctant, he could only grit his teeth and continue to burn the Ghost Energy within him.

Immediately, the speed of the Ghost Energy mist he transformed into surged again.

The distance between him and Su Yu stretched from only two or three kilometers to about five kilometers, causing Su Yu to frown tightly.

"He really knows when to choose his moments..."

Su Yu gritted his teeth and silently retrieved the hand on his back, gripping the handlebar of the motorcycle.

On his back lay the electromagnetic sniper cannon, which had not been truly used since its initial repair. A round of electromagnetic ammunition was already chambered, ready to fire at any moment.

The maximum range of this electromagnetic sniper cannon, with the assistance of an electromagnetic field, could reach up to three kilometers.

And its power was formidable enough to instantly kill a four-star advanced Radiation Beast Lord.

Initially, Su Yu thought Li He's escape had reached its limit.

He was ready to shoot as soon as Li He emerged from his Ghost Energy transformation, giving no chance for further escape.

Within three kilometers, Su Yu was confident of hitting his target with one shot.

And the power of the electromagnetic sniper cannon, capable of heavily injuring or even instantaneously killing a four-star advanced Radiation Beast Lord, made Su Yu confident that if this shot hit.

Let alone Li He being in a weakened state at that time, even if he wasn't, with his physical body at most a three-star top tier Transcendent of Physical Body, he would still be vaporized into a pool of blood by the electromagnetic sniper cannon.

But it seemed now.

Li He could still escape for a while longer.

However, Su Yu was already prepared for this.

"Fine, let's see how much longer you can run!"

Seeing Su Yu relentlessly in pursuit,

Li He's heart fell into deeper despair.

And the Ghost Energy mist he transformed into also began to tremble gradually, starting to show signs of gathering.

This discovery greatly uplifted Su Yu's spirit.

Finally.

After another pursuit of over ten kilometers.

Under Su Yu's expectant gaze, the mist of Ghost Energy that Li He had become suddenly quivered.

Then.

"Clatter!"

The sound of gravel gathering rang out.

The mist of Ghost Energy that Li He had become coalesced into a humanoid form, heavily falling onto the wilderness!

At this moment, Li He was no longer his formerly high-spirited self.

He was utterly in a wretched state.

From head to toe, he was gripped by intense pain and weakness, nearly causing him to pass out.

But hearing the roar of Su Yu's motorcycle approaching from behind, Li He forced himself out of his weakness, stumbling away like a zombie, continuing to flee.

Watching Li He's sorry figure retreating.

There was not a trace of sympathy in Su Yu's eyes.

Not to mention anything else,

just during Li He's attack on Shelter No. 73, among the Ghost Demons he commanded, over a hundred were transformed from humans, from Sanctuary residents, from members of the Night Slayer Team!

Let alone the fact that Li He seemed to worship some evil deity behind it all.

For such a character, Su Yu naturally had no sanctimonious sentiments towards him.

With one hand controlling the handlebar, the other had already lifted the electromagnetic sniper cannon onto his shoulder, slightly squinting one eye to lock onto Li He in the distance through the sighting mirror.

Just waiting for the distance between himself and Li He to close within three kilometers to pull the trigger.

Su Yu didn't say a word.

But as a Transcendent, with the assistance of Spiritual Energy, or more accurately, Ghost Energy,

when Su Yu's electromagnetic sniper cannon locked onto Li He, Li He shivered instinctively, feeling the so-called pressure of death, causing his heart to involuntarily contract into a clump!

### **Chapter 134: Chapter 95 Pull the Trigger! Electromagnetic Sniper Cannon! Ghost Wolf Riders! That's as far as you go!\_2**

But, just at this moment.

"Awooo——!"

From afar, a series of sounds reminiscent of wolf howls echoed from the distant barren hills, causing Su Yu and Li He to be startled simultaneously!

As the wolf howls resonated.

Su Yu's brow instantly furrowed tightly, while Li He's eyes erupted with an indescribable elation!

"Hahaha! It's the Ghost Tribe! The Ghost Tribe's Wolf Riders!"

"The Ghost Tribe's Wolf Riders are here! Su Yu, you are ultimately a step too late! Ultimately too late!"

Li He's laughter carried a sense of madness, and looking at Su Yu, his eyes were filled with boundless hatred, coupled with the joy of surviving a disaster!

He no longer bothered to flee forward but instead shouted toward the direction from which the wolf howls came, "Wolf Riders of the Ghost Tribe! I am Li He! A friend of your tribe's priest!"

"I've come to join you! Take me to see your priest! He will surely reward you!"

As Li He's voice fell, in the distant barren hills.

One by one, "cavalry" donned in earth-colored leather jackets with standard machetes strapped to their waists emerged from around the hills.

The reason for the quotation marks.

Is because these cavalrymen were riding, not horses, but rather large radiation wolves.

On either side of the radiation wolves were leather pouches containing a row of ten sharp throwing spears, glistening coldly in the sunlight.

On the backs of these cavalrymen, they also carried a storage tank resembling an oil drum.

But, the gray-brown liquid energy in the storage tanks indicated that they were not carrying kerosene or gasoline, but rather that chaotic extraordinary power known as Ghost Energy.

And such equipment also proved their identity as the famed Transcendent legion on this planet, belonging to none other than the... Wolf Riders Legion of the Ghost Tribe!

There were about twenty Wolf Riders appearing in this wasteland, a small squad of Wolf Riders.

The leading Wolf Rider was frowning at his two subordinates behind him, with a puzzled look.

"Li He, have you ever heard of this name?"

"No, but he claims to be a friend of the priest? Then we should take him to ask the priest!"

The lieutenant of this Wolf Rider squad suggested.

Upon hearing this, the captain nodded, immediately gesturing for two Wolf Riders to go forward and bring Li He over.

The others, under his command, urged their radiation wolves toward Su Yu, preparing to capture Su Yu as well.

"There aren't many who would dare to trespass into our Ghost Tribe's hunting grounds now!"

Witnessing this scene.

Li He's eyes were filled with even more joy and relief.

The Ghost Tribe, being one of the few medium-sized settlements in this land, had strengths that little shelters like Shelter No. 73 could not imagine.

Even some large settlements did not dare to provoke them.

And this deterrent power.

Half of it originated from the Ghost Tribe's mastery over the Ghost Energy Technology left behind by the previous ruling power on this planet, the Ghost Empire.

The other half came from the Wolf Riders Legion cultivated by the Ghost Tribe.

These Wolf Riders not only mastered Ghost Energy Technology but also trained using the Ghost Tribe's unique method for extraordinary physical bodies.

With both aspects combined.

This Wolf Riders Legion, numbering up to five thousand, had every member at least two-star in strength.

The combat power of this legion, to put it bluntly, could cause even large settlements to feel troubled when confronting them.

However, due to the effects of the Ghost Energy.

Whether it's the Wolf Riders or other powerful Transcendents in the Ghost Tribe, their mental states aren't quite stable.

The Ghost Tribe, for this reason, established a tribal system different from other settlements.

The clan leader of the Ghost Tribe is assumed by the tribe's strongest Transcendent.

But the truly important role is still the priest of the Ghost Tribe.

Thanks to the priest's abilities.

Within the Ghost Tribe itself and in the surrounding area, within the hunting range.

The negative impacts of the Ghost Energy within the Transcendents of the Ghost Tribe can be somewhat restrained, allowing them to unleash their full combat potential.

But if they leave this area, the situation would become dire.

If too few were sent out, they might not even reach their destination due to the frenetic, murderous, bloodthirsty emotions induced by Ghost Energy, leading them to go completely mad and lose themselves in the wilderness, becoming beasts who only know slaughter.

If more were sent out, they might reach their destination.

But, during the journey, the side effects of Ghost Energy might cause them to engage in a few bouts of infighting before reaching their destination.

Sending out a hundred men could mean only twenty or thirty might make it to the destination—though, admittedly, those twenty or thirty would become stronger.

In short.

The existence of the Wolf Riders Legion and other Ghost Energy Transcendents within the Ghost Tribe.

The power of the Ghost Tribe was strong enough to make large settlements wary.

But also, due to the Ghost Energy, the Ghost Tribe found it very difficult to expand outward any further; becoming a medium-sized settlement was already their limit, and it wouldn't affect the status and control of those large settlements.

Moreover, due to the Ghost Tribe's location in the Steel Jungle region.

No large settlement was willing to deploy troops from afar, risking awakening those forbidden existences within the Steel Jungle, to occupy this place.

### **Chapter 135: Chapter 95 Pull the Trigger! Electromagnetic Sniper Cannon! Ghost Wolf Riders! This Is As Far As You Go!\_3**

The Ghost Tribe's position as the undisputed sovereign of this land originates from here.

Therefore.

When Li He saw these Wolf Riders willing to protect him.

He completely relaxed!

He even had the leisure to glance back at Su Yu, wanting to see Su Yu in a state of panic.

However, just as he turned around, he saw that at some point, Su Yu had already set up the Electromagnetic Sniper Cannon that had been strapped to his back, aiming the barrel directly at Li He's position!

"No——"

Instinctively, Li He wanted to dodge to the side.

But in his extremely weakened state, he barely managed to roll about half a meter to the side, which obviously was not enough.

The barrel of the Electromagnetic Sniper Cannon spat electric arcs as the bullet discharged.

The specially crafted heavy bullet, or rather shell, empowered by the electromagnetic force, erupted with near-supersonic acceleration in an instant, striking exactly where Li He had been standing, unleashing torrents of electricity and explosions. The terrifying kinetic energy tore apart Li He's body in an instant and also shattered the two Wolf Riders beside him who were attempting to capture Li He and take him back to the tribe to present to the Priest.

The detonation rang out.

The shrill whistle of the bullet slicing through the air came belatedly, leaving those Wolf Riders who intended to capture Su Yu dumbfounded, and by the time they registered what had happened, the fiery explosion had already dissipated, leaving only fragments of torn flesh scattered by the wind!

"Someone dared to strike at our Wolf Riders!?"

After a momentary daze.

The Wolf Riders finally realized what had happened.

With a sudden turn, they fixed their eyes on Su Yu, their rage and murderous intent almost palpable. Before their captain could issue an order.

"Awooo!"

One by one, the Wolf Riders spurred their Radiation Wolves into motion, charging towards Su Yu amidst the howls of wolves!

The power of Su Yu's Electromagnetic Sniper Cannon was indeed formidable, leaving even the leading Wolf Rider captain unnerved.

But after firing that shot.

The thin smoke curling from the cannon assembly assured the Wolf Riders.

The sniper cannon would not be capable of another attack anytime soon!

"Capture this man! Hand him over to the Clan Leader and Priest!"

"And also take that strange firearm he holds! If we present this to the Priest, he might forgive our failure to protect his friend!"

The Wolf Rider captain lingered at the rear of the formation.

While directing the Wolf Riders to encircle Su Yu, he also reminded them to focus on their strategic objective.

Even though they hadn't succeeded in bringing Li He to the Priest and hadn't confirmed Li He's identity, when they encountered Li He, his assertive claims had worried this Wolf Rider captain, prompting him to find a way to compensate for his failure to protect Li He.

Upon hearing the captain's orders.

The Wolf Riders' gazes grew even more fierce, each fixing on Su Yu, drawing out throwing spears to grip tightly in their hands.

Should Su Yu show any signs of using the Electromagnetic Sniper Cannon again, they would launch their spears to disrupt him.

But their concern was unnecessary.

After firing that shot, Su Yu had no plans to use the Electromagnetic Sniper Cannon again. Instead, he slung it on his back promptly, spun sharply, and sped down the path on his motorcycle, raising a trail of dust!

"Don't let him escape! Quick, chase him!"

Witnessing this.

The cautious Wolf Rider captain's face suddenly changed color!

Su Yu had been able to kill Li He with one shot; this level of power left him somewhat shocked.

So, even though it seemed Su Yu's electromagnetic cannon couldn't be used again in the short term.

He had no idea how long it would take for that Electromagnetic Sniper Cannon to recharge, only, from Su Yu's decisive action in killing Li He, the captain had instinctively assumed Su Yu would continue fighting.

Unexpectedly, Su Yu was so decisive, turning to flee.

However, Su Yu's escape convinced the captain that Su Yu was out of strength.

"Captain, should we call for reinforcements, ask more people to block him?"

An aide couldn't resist suggesting.

"Idiot! If we call others over, whose credit will it be if we catch him then? Don't forget, this is the guy who killed that Li He right in front of us!"

"Even if the Priest doesn't hold us accountable for our failure, allowing the man we were supposed to protect to be killed in front of us, the news spreading would make it impossible for us to maintain our standing in the regiment! Understand?"

Hearing the captain's fierce words, the aide quickly understood, lowered his head, and urged his Radiation Wolf to speed up: "I understand, I'll definitely catch that fleeing boy!"

Immediately, the Wolf Riders increased their speed, and the Radiation Wolves, sensing their masters' intent, joined in low growls as they accelerated, maintaining pace with Su Yu's motorcycle, never losing track!

Moreover, as time passed.

The Wolf Riders were pleasantly surprised to discover that Su Yu's motorcycle engine was shaking, its hum growing louder, even spewing black smoke, clearly reaching its limits!

The Wolf Rider captain sighed in relief, fearing only that Su Yu might escape unharmed, but now seeing Su Yu's sole means of escape failing, he relaxed.

Still, recalling the horrific destructive power of Su Yu's Electromagnetic Sniper Cannon, he dared not be complacent, urging speed while reminding his teammates: "Stay alert, don't let your guard down, always pay attention to that strange firearm of his!"

"Understood!"

"Don't worry, captain! That kid isn't getting away!"

One by one, the Wolf Riders whistled, their tone flippant.

Gazing at Su Yu, they saw him as a lamb surrounded, their eyes full of disdain.

But just at that moment.

"Screech——!"

Originally racing for his life, Su Yu suddenly slammed on the brakes, leaving a deep mark on the ground as he stopped the motorcycle, straddling it and facing the Wolf Riders with a faint smile on his lips.

"Sorry, I need to warn you about something first."

Su Yu said, pointing to the electromagnetic cannon behind him: "This thing is actually a sniper rifle, not artillery."

"Furthermore."

Su Yu clapped his hands lightly.

In the next second.

"Swoosh, swoosh, swoosh——!"

In the wasteland behind him, one Ranger after another, under Nuonuo's command, emerged over the hills, appearing behind Su Yu, constructing a Ranger defense line in front of him within seconds!

"Gentlemen, the chase ends here!"

## **Chapter 136: Chapter 96: The Three Laws of Sniping! Wilderness Hunter LV MAX! Core Specialization: Shadow Cloak!**

"Stop here? Kid, are you joking!"

Twenty Wilderness Hunters lined up, quickly forming a defensive line in front of Su Yu under Nuonuo's command.

Their arrival indeed startled the pursuing Wolf Riders, but that was all.

The Wolf Rider captain, in particular, took the lead, urging the Battle Wolf beneath him to leap to the front of the team, looking at Su Yu with undisguised contempt and disdain in his eyes.

"These Intelligent Mechanics might scare others, but to think they can scare us Wolf Riders? What a joke!"

Under the blessing of Ghost Energy.

These Wolf Riders also possessed astonishing perception.

Ordinary ruin dwellers might feel cold-hearted and weak-kneed when facing the gun barrels of those Wilderness Hunters.

But these Wolf Riders were an exception.

They could see clearly that these Wilderness Hunters, hastily cobbled together by Nuonuo, were all extremely crude.

Relying solely on those few heavy machine guns to seem intimidating.

Moreover, with careful observation, it's not hard to see that many of these heavy machine guns are just for show, subpar products clearly rushed into production.

Possibly, before a round is fully emptied, the gun barrel would explode due to overheating.

Do they dare to use such things to threaten them?

"Go! Capture that kid for me! But be careful, don't kill him."

The Wolf Rider squad captain let out a vicious laugh, not forgetting to remind his subordinates.

Although these Wilderness Hunters put forth by Su Yu looked of poor quality, such mass-producible Intelligent Mechanics were of considerable value.

Bringing them back to the Priest might even reward them with gifts instead of punishment!

"Awoo—!"

Upon hearing the captain's command.

All the Wolf Riders got excited, immediately urging the Radiation Wolves beneath them, with howls rising and falling, they charged towards Su Yu from all angles!

And Su Yu seemed startled by their reaction.

He appeared utterly bewildered, as if not expecting the Wolf Riders to be so brave, only remembering to order the Wilderness Hunters to start firing to intercept the approaching Wolf Riders when they were almost upon him.

But just as the Wolf Rider captain predicted earlier.

The strength of these Wilderness Hunters was indeed laughable.

At first, the firepower seemed quite fierce, but within just a few seconds, five or six machine guns exploded, and of the remaining two-thirds, although they didn't explode, they all had minor issues like jamming, ending the fierce firepower network abruptly.

"Hahaha! Bring that clueless kid to me! Quick! Don't worry about that heap of scrap metal, capture that kid first!"

Upon seeing this.

The Wolf Rider captain was completely relieved, waving to order his subordinates not to rush dismantling those Wilderness Hunters.

Capture the leader to capture the enemy; getting Su Yu in hand was the priority.

The Wolf Riders whistled in unison and fiercely charged towards Su Yu, reaching his proximity within breaths!

They no longer bothered with evasive maneuvers, just as their captain said, these Wilderness Hunters were indeed just scrap metal. By the time they are ready for a new wave of attack, their owner would already be captured!

Watching the Wolf Riders charging head-on, rapidly closing the distance with the Wilderness Hunters.

The corner of Su Yu's mouth curled into a mischievous smile.

"Nuonuo, get ready to retreat!"

Just as the distance between the Wolf Riders and the Wilderness Hunter defense line was less than ten meters.

Su Yu suddenly shouted in a low voice, followed by a running leap, jumping onto a simple support platform made by three mechanical arms behind Nuonuo, commanding Nuonuo to move at the fastest pace, with tracks rolling, carrying Su Yu quickly away from the defense line!

Seeing this, the pursuing Wolf Riders became frantic.

Those among them who were impulsive had already urged their Radiation Wolves to accelerate, intending to leap over the Wilderness Hunter defense line to chase Su Yu.

Now, even the more cautious Wolf Riders chose the quickest shortcut.

Instantly.

"Awoo!"

In the long howls of one tamed Radiation Wolf after another.

Each Radiation Wolf, carrying its rider, leaped into the air to cross the Wilderness Hunter defense line.

And just as they ascended, not far away, Su Yu suddenly waved his hand, stopping Nuonuo's movement, looking at the high-leaping Wolf Riders with a mischievous smile, then suddenly waved his hand!

"Boom!"

"Boom boom boom boom boom!"

Towering flames and ear-splitting explosions, at this moment, all twenty hastily assembled Wilderness Hunters self-destructed simultaneously, engulfing all the pursuing Wolf Riders!

These Wilderness Hunters, though hastily assembled.

Were all specially amplified with Electromagnetic Fury effects by Su Yu just one second before self-destruction, making their explosion unimaginably powerful even under Electromagnetic Fury amplification.

When the flames died down and the smoke dispersed, lying across the ground of the defense line were the Radiation Wolves and Wolf Riders, their internal organs shattered.

### **Chapter 137: Chapter 96: The Three Laws of Sniping! Wilderness Hunter LV MAX! Core Specialization: Shadow Cloak!\_2**

Even if by chance, the wolf riders and radiation wolves who didn't perish in that explosion were not in much better condition.

Each one of them, with vacant stares, looked around helplessly. In that astonishing explosion, their hearing had been temporarily lost.

Moreover, they hadn't even recovered from the bewilderment.

"Sssssss—"

A sudden, unbearable pain surged up from beneath their feet, causing these wolf riders along with their barely surviving mounts to howl uncontrollably!

In that explosion, it was not just their eardrums and the viscera of their unlucky companions that were shattered.

Their equipment, capable of providing them with ghost energy and enhancing their physical bodies and senses, the liquid ghost energy storage tanks, were also blown to pieces.

Having lost the constraints of the special storage cans.

This ghost energy directly turned the entire area into a radiation swamp capable of eroding any life that stepped into it into ghost demons!

"Ah!!"

Shrill wails echoed across the wasteland.

Fortunately, Su Yu had already prepared for such an outcome.

He directly pulled out the Falcon Sniper Rifle he had prepared in advance, aimed at those who survived the explosion but were in some ways worse off than being dead, those lucky souls and lucky wolves, and mercifully pulled the trigger repeatedly.

Blood flowers bloomed on their foreheads, ending their wails.

It also woke the captain of the wolf riders, who had witnessed the whole process from a distance, out of his shock.

"Run... Quick, run!"

Feeling Su Yu's gaze fall on him.

This wolf cavalry captain, who had been so arrogant not long ago, involuntarily shivered and then, without any hesitation, spurred his radiation wolf to turn around and dash back in the direction they came from!

Although Su Yu's rangers now seemed to be completely depleted.

But the terrifying damage caused by the simultaneous self-detonation of twenty rangers had thoroughly scared this wolf cavalry captain.

Rather than gambling on continuing the chase with Su Yu, this captain now only wanted to return to the tribe as soon as possible to report Su Yu's situation to the tribe's higher-ups.

This seemingly mild-mannered boy, he no longer had the courage to confront!

Watching the wolf cavalry captain decisively turn and run.

Su Yu couldn't help but lift the corner of his mouth into a smile.

"Quite a quick reaction, but unfortunately, it's a bit too late to think about escaping now!"

Su Yu said, raising his hand again.

In the spiritual world, the spiritual energy condensed from the Steel Meditation spread out instantly.

The wolf cavalry captain suddenly heard a rustling sound coming from the withered grass in front of him.

Before he could confirm where the sound was coming from, he saw gun barrels emerge from the clumps of wild grass, aiming at him and his radiation wolf under him, and then, under his despairing gaze.

From that withered grass, the thirteen advanced rangers, who had luckily survived two battles, one with Li He and one with the wolf riders, and were the only ones left in Su Yu's hand, had long since silently positioned themselves on the escape route of this wolf cavalry captain, completing the encirclement at this moment.

With the blessing of Su Yu's spiritual energy and the command given.

"Ratatatatata——!"

This captain of the wolf riders, whose physical body Transcendent abilities had already reached the Three-Star Level.

Didn't even have time to let out a scream before he and his radiation wolf were shredded by the ranger squad under Su Yu's command!

[Ding!]

[You successfully killed a wolf rider of the Ghost Tribe (Two-Star Primary), gaining 1,500 points of professional experience, and 3,000 points of skill experience (Master Gun Control)]

[Ding!]

[You successfully killed a wolf rider of the Ghost Tribe (Two-Star Intermediate), gaining 3,000 points of professional experience, and 2,000 points of skill experience (Master Gun Control)...]

[Ding!]

[You successfully killed the wolf cavalry captain of the Ghost Tribe (Three-Star Primary), gaining 6,000 points of professional experience, and skill experience...]

[Your accumulated professional experience is full, and your professional level has increased!]

[Your profession, Wilderness Hunter, has been upgraded to lv max]

[Your core ability, Hidden Kill, has also been synchronized and upgraded!]

[Hidden Kill (lv max): When you make an attack, if you are not in a concealed state, you can activate this ability to grant this attack a Spiritual Blessing, doubling the damage inflicted, putting Hidden Kill on cooldown for one hour. If you are in a concealed state, you can activate this ability to grant this attack a Spiritual Blessing, increasing the damage fivefold, with a base cooldown of 10 minutes]

[Because your core ability has been upgraded to the maximum level, you have obtained a core specialization, drawing in progress...]

With the final wolf cavalry captain also dealt with.

Su Yu couldn't help but take a long breath, feeling much more relaxed.

However, he didn't completely relax.

First, he threw his motorcycle, which was now falling apart after the long journey, into the radiation pool formed after the liquid ghost energy canisters carried by those wolf riders shattered.

### **Chapter 138: Chapter 96: The Three Laws of Sniping! Wilderness Hunter LV MAX! Core Specialization: Shadow Cloak!\_3**

Then, they threw the corpses of the wolf riders, along with their mounts, into the radiation pit.

After the liquid Ghost Energy corroded their bodies and Su Yu's motorcycle to ashes.

Su Yu once again climbed onto the simple support platform constructed by Nuonuo using a mechanical arm, commanding Nuonuo to slowly return in the direction of the Sanctuary, under the escort of the remaining patrollers.

At the same time, he finally had the chance to check the various notification messages refreshed on his Profession Panel over this period.

The battle, from the moment Li He attacked the Sanctuary to now, has lasted almost an entire day and night.

Even though Su Yu's physical stamina and energy far surpassed that of ordinary people, he couldn't help but feel immensely exhausted at this moment.

Nonetheless, although he was a bit fatigued and had spent more energy.

Su Yu's gains were indeed substantial.

Especially the experience points gained.

Not to mention the experience points Su Yu earned from hunting the Ghost Demons under Li He's command.

Just the experience from finally killing Li He alone amounted to thirty thousand.

In addition, the wolf riders Su Yu subsequently destroyed.

The experiences collectively successfully promoted Su Yu's level to the highest in the Wilderness Hunter profession.

Furthermore, the experience from Li He's defeat did not just provide professional experience.

Su Yu scrolled up the notification bar on the Profession Panel, and quickly saw the experience notifications refreshed during the destruction of Li He—

[You successfully tracked and killed a five-star Transcendent Life Form, earning an experience reward!]

[You gained professional experience (Wilderness Hunter): Thirty thousand points!]

[Current Wilderness Hunter profession level lv19 (39%)]

[You gained skill experience (Master Gun Control): Fifty thousand points!]

[You gained skill experience (Intermediate Sniper Skill): Seventy thousand points!]

[You gained skill experience (Wilderness Survival Elite): One hundred thousand points!]

[Your accumulated skill levels have reached the maximum, and your skill levels have increased!]

[Your professional skill-Master Gun Control has been upgraded to lv max]

[Your professional skill-Intermediate Sniper Skill has been upgraded to lv max]

[Your professional skill-Wilderness Survival Elite has been upgraded to lv max]

[You acquired three Professional Specializations, which are being drawn...]

Seeing the lines of notification messages appearing on the Profession Panel.

Su Yu couldn't help but take a deep breath to slightly alleviate the shock in his heart.

Needless to say.

Even though Li He's strength as a five-star Transcendent Life was somewhat discounted.

The experience rewards were indeed generous!

Thirty thousand points of professional experience were not a lot.

But the accumulated skill experience provided Su Yu with a total of two hundred and twenty thousand points!

What does this mean?

Even though obtaining skill experience is twice as easy as professional experience, combined, it still means that Li He alone accounted for a gain of one hundred and forty thousand professional experience for Su Yu!

"Indeed, the greater the difficulty, the greater the reward!"

Su Yu exclaimed with emotion.

At that moment.

The lower part of the Profession Panel flickered again, attracting Su Yu's attention, indicating that his Core Specialization and the three Professional Specializations had been drawn.

First and foremost, the three Professional Specializations that had actually already been drawn but that Su Yu had been too busy dealing with the wolf riders to check the equipment.

The Professional Specialization corresponding to Master Gun Control is [Quick Shooting]; under the influence of this specialization, whether it is a sniper weapon, single-action revolver, or shotgun, or any firearm in Su Yu's hand, the shooting speed and reload speed will be blessed with Spiritual Energy, shortening the time by twenty percent.

The Professional Specialization for Intermediate Sniper Skill is [Sniper Enhancement]; this specialization allows Su Yu's sniper damage to be further upgraded to a higher level—under the influence of this specialization, regardless of which sniper firearm Su Yu uses, his sniper damage will receive a fixed twenty percent bonus under the Spiritual Blessing.

Furthermore, this bonus effect will also apply to Su Yu's [Electromagnetic Sniper Cannon].

Indeed.

Although it's quite preposterous, in the identification of the Profession Panel, the sniper cannon personally repaired by Su Yu was also confirmed as a sniper weapon.

Moreover, the note appended under the specialization known as [Sniper Enhancement] also made Su Yu somewhat amused—

[Single-shot scope shooting hard, if you meet these three points, can you say it's not a sniper rifle?]

As for the third Professional Specialization, it is provided by the skill [Wilderness Survival Elite].

This specialization effect seems much more serious, despite its weird name, but the effect is indeed impressive.

[Food Healer]

[Through the long trials of living in the wilderness, your digestion ability has become stronger, gaining a kind of special blessing. Now, you can extract the maximum nutrition from all food, and obtain additional healing effects from it. Besides, every time you complete a meal, you can receive extra professional experience rewards. The amount of experience depends on the quality of your food]

This ability is undeniably strong.

Especially being able to gain extra healing effects through diet, which is an exceedingly precious trait for residents of Ruins Star, who lack medical resources.

Su Yu is no exception.

He certainly hadn't forgotten that if he hadn't awakened his Profession Panel in time.

That radiation sickness, which wasn't even that serious, might have dragged him to death.

Besides, the extra professional experience from completing a meal is also quite useful. Though the experience points might not be surprisingly high, accumulating over time they can provide significant gains.

After reading the introduction of these three newly unlocked specializations, Su Yu calmed himself and looked expectantly at the last newly refreshed specialization ability.

And upon seeing it.

Su Yu's eyes were filled with surprise!

"There is actually such a specialization ability?"

[Based on your professional characteristics, you have drawn the Core Specialization-Shadow Cloak]

**Chapter 139: Chapter 97: 2nd-Tier Profession - Mechanical Missionary! Core Specialization: Adaptability!**

[Shadow Cloak (Core Specialization)]

[By consuming spiritual energy for a certain period, you will receive blessings from the subspace. Extraordinary energy from the subspace will construct a shadow power upon you, allowing you to enter a perfect state of stealth. Even the finest mortal assassins can barely compare to you under the enhancement of shadow power, and only transcendent beings two or more levels above you can detect your whereabouts.

However, any attack movement during this state will end the effect of the Shadow Cloak once executed.]

[The cooldown for this ability is eight hours]

Shadow Cloak, conceal your tracks!

Seeing his newly awakened specialization, Su Yu was filled with immense joy.

The core ability of the Wilderness Hunter, the enhancement effect of Hidden Kill, is undoubtedly strong.

However, before Hidden Kill reaches the maximum level, the prerequisites to activate this ability are quite harsh; Su Yu must enter a state of concealment to initiate it.

During his battle with Li He, including the subsequent chase,

he never had the chance to perform any concealment actions.

The trait of Hidden Kill naturally couldn't be utilized.

Moreover, it can be foreseen that.

The future main development direction is manipulating a mechanical army for battle. Su Yu will likely find it difficult to find opportunities for stealth and assassination from the shadows.

But now, with this core specialization of [Shadow Cloak].

Su Yu's trait of [Hidden Kill] can finally be put to use.

Being able to use Shadow Cloak three times a day means Su Yu can complete three perfect [Hidden Kill]-style snipes.

Moreover, after Hidden Kill's ability is upgraded to the maximum level, it unlocks the effect of damage amplification without needing concealment.

Although the cooldown time is six times longer than initiating Hidden Kill after concealing, taking a full hour to cool down, at least this ability finally has its place.

"Not bad, not bad."

With these three specializations, along with the core specialization of [Shadow Cloak].

Although this time, a new second-tier profession wasn't unlocked, Su Yu's strength received significant amplification.

And, even though there is currently no new second-tier profession.

"But once I complete my employment as a Fighter, and upgrade this Foundation Profession to the maximum level, I should be able to unlock a new Extraordinary Profession, right?"

Su Yu thought to himself.

He then called up the Profession Panel and navigated to the employment section of the profession interface.

However, when Su Yu's gaze landed on the employment section, his pupils involuntarily constricted slightly.

In the selection branch available for employment, where normally only one choice, the [Fighter] option, existed,

beside it now appeared a new profession option, glowing uniquely, dazzling and heart-pounding!

[Second-tier Profession-Mechanical Missionary].

"Second-tier Profession!?"

Su Yu's eyes flashed with brilliance, but he soon calmed down.

Looking at the Mechanical Missionary choice, Su Yu took a deep breath and didn't immediately select it. Instead, he first opened the introduction panel for Mechanical Missionary.

Instantly, lines of dark red prompt messages surfaced in Su Yu's vision.

[Mechanical Missionary = Battlefield Mechanic + Steel Meditation lv max + Unknown Entity's Mark + Faith]

[Introduction:]

[Offer your faith to an unknown entity, convert Steel Meditation to Blood River Meditation Method, become a Messenger of the unknown entity, spreading the seeds of brutality upon the earth. Your mechanical creations will gain unprecedented vitality, becoming unique mechanical life forms.]

[Note:]

[Upon taking this profession, you must perform a sanity check daily. When the sanity check is passed, you can maintain an independent personality. If the check fails, your sanity -1 (Maximum value: 100). When sanity drops below 60, you must perform a sanity check every hour. Failing the sanity check results in sanity -5. When sanity drops to zero, you become a "shell" of the unknown entity, losing consciousness and rationality.]

[Note 2...]

Seeing lines of blood-red prompt messages,

even if Su Yu were slower in reaction, he understood how this option for a second-tier profession came about!

"After Li He died, the existence behind him has set its sights on me!"

Su Yu furrowed his brows, looking at the introduction of the [Unknown Entity's Mark], feeling a headache.

He knew that some peculiar presence was undoubtedly behind Li He.

But he didn't expect that, after dealing with Li He, that unknown existence would set its sights on him as well.

This gave him a real headache.

Su Yu would absolutely not change professions to become a Mechanical Missionary.

He's not interested in living a life of rolling dice and leaving everything to chance, nor in serving as a messenger for some unknown entity.

It's just that.

Su Yu was somewhat worried if this mark wouldn't affect his future if not removed.

At this moment, a thought suddenly flashed in Su Yu's mind. He gazed toward the profession panel and asked with intent.

"Profession panel, can I remove this employment path and not take on this profession?"

Even he hadn't realized this supposed [Unknown Entity's Mark].

But the profession panel could analyze it up.

This gave Su Yu some hope in his heart.

Maybe his profession panel could help him out by deleting this peculiar thing?

### **Chapter 140: Chapter 97 Tier 2 Profession: Mechanical Missionary! Core Specialization: Adaptability!\_2**

Hearing Su Yu's inquiry.

The prompt message bar on the Profession Panel froze for a moment and did not refresh.

This made Su Yu feel a bit disappointed.

But after a moment.

A new line of message emerged.

"Analyzing based on the host's request..."

"The host's current highest profession is a [Tier 1 Profession], which does not meet the authority qualifications to delete a Tier 2 profession path, but it can temporarily block this job path. Blocking this job path's key material [Unknown Existence Mark], when the host successfully takes up another Tier 2 profession, they can delete the key material of this job path (Mechanical Missionary) to complete the delete of this profession path."

"Would you like to block this job path?"

Looking at the prompt message emerging on the Profession Panel.

Su Yu's eyes were filled with surprise.

Without hesitation, Su Yu directly nodded and spoke solemnly, "Block it! Block it now!"

Although he couldn't delete it, being able to block that unknown existence's sense made Su Yu quite satisfied.

With Su Yu's command issued.

Immediately, in the selectable job direction panel, the previously dark red Mechanical Missionary job path gradually faded.

If you didn't observe carefully, it would be almost invisible, leaving only the [Fighter] as the Foundation Profession, remaining in place.

Seeing the Mechanical Missionary blocked completely.

Su Yu let out a long breath, his gaze returning to the [Fighter] job direction in front of him, a glint appearing in his eyes.

"I choose to take up the profession of Fighter!"

Although no new Tier 2 professions or other Tier 1 professions have been unlocked yet, it doesn't matter.

First, maximize the level of the Fighter profession, then new profession options should unlock!

[Ding!]

[Congratulations to the host on completing the profession, the current main profession is set to: Fighter (lv1/lv10)]

[Congratulations to the host for unlocking the professional skill: Basic Fighting Techniques!]

[Congratulations to the host for unlocking the professional skill: General Weapon Knowledge!]

[Congratulations to the host for unlocking the professional skill: Resilient Body!]

[Congratulations to the host for unlocking the core ability: Adaptability!]

A stream of profession information refreshed out, making Su Yu feel a bit overwhelmed, hurriedly checking each one.

[Basic Fighting Techniques lv1]

[You are already well-versed in those basic fighting techniques and have firmly memorized them. In battle, you can execute them seamlessly, delivering a heavy blow to your enemies.]

[General Weapon Knowledge lv1]

[As a professional Fighter, you are already well-versed in most melee weapons, the regular usage methods of martial arts, and can proficiently apply them in combat.]

[Resilient Body lv1]

[Years of fighting training have made your physique increasingly strong and resilient. Your ability to withstand blows and body flexibility are far beyond those of ordinary people.]

[Adaptability lv1]

[The core ability of a Fighter, every true Fighter is a powerful being that can maintain a resilient will and astounding combat power in any environment. Though they are mere mortals, they can use the honed techniques to awe transcendent beings.]

[Under the influence of this specialization, you gain a fixed additive of ten percent resistance to radiation, spiritual energy, physical, and other factors when fighting in any terrain. This additive will increase as the level rises.]

Four continuous lines of prompt information entered Su Yu's eyes.

Filling Su Yu's heart with inexpressible delight.

The Fighter, although a Foundation Profession.

The unlocked three professional skills and core ability can all be described as practical.

Though the bonuses are not high, their application range is much broader than skills and core abilities unlocked by professions like Wilderness Hunter, and if upgraded to the maximum level, the offered amplification damage is also quite considerable.

Putting away the four newly awakened skills.

Su Yu closed the Profession Panel, looking at his rejuvenated Attributes bar, with happiness emerging in his eyes.

[Name: Su Yu]

[Profession: Mechanic max, Gunsmith max, Battlefield Mechanic lv max, Wilderness Hunter lv max]

[Current Job Profession: Fighter]

[Skills: Omitted]

[Core Abilities:]

[Mechanical Affinity max (Core Specialization: Heart Blood Creation)]

[Perception of Killing Intent max (Core Specialization: Holographic Perception)]

[Steel Meditation max (Core Specialization: Electromagnetic Fury)]

[Hidden Kill max (Core Specialization: Shadow Cloak)]

[Adaptability Lv1 (Source: Foundation Profession - Fighter)]

Compared to the earliest Profession Panel.

The richness of Su Yu's current Attributes bar is vastly different.

Moreover, after leveling Wilderness Hunter to max and completing the Fighter profession.

Su Yu's Transcendent power also received a new amplification.

Although the strength of the spiritual category hasn't improved much.

But the physical category smoothly crossed that critical boundary, stepping into the four-star level.

[Extraordinary Level]

[Spiritual Power Star Level: Three Stars Advanced]

[Physical Star Level: Four Stars Initial]

Now, just discussing the Transcendent Star Level makes Su Yu already considered a mid-level Transcendent.

"Not to mention the Cavalry Legion, there are also Mechanical Creations like Nuonuo and Thousand-Handed Prosthetic that can give me a boost. Purely my current physical strength or spiritual energy's combat power is sufficient for me to go to any small settlement, and even many medium settlements would offer quite an amount of resources to recruit a talent like me!"

This level of strength also means Su Yu finally has the preliminary qualification to venture into ruins.

However, Su Yu is not preparing to explore the ruins now.

He is quite self-aware.

"Preliminary venture into ruins" is just a euphemism.

This level of strength truly going to the ruins might only "venture a bit" and become nourishment for those Radiation Beasts on the wastelands.

Additionally, after the battle with Li He.

Su Yu suffered significant losses to his Mechanical Creations and needs urgent repairs.

The various components and creations needed for these repairs aren't something a wanderer in the ruins can easily collect.

Relying on the Sanctuary for resource collection and integration to craft a more perfect Cavalry or even higher-level Mechanical Army is the truly efficient approach.

Thinking so, Su Yu wasted no more time.

"First return to the Sanctuary to bring everyone the news, Uncle Yang and the others must be impatiently waiting by now!"

...

The facts proved Su Yu was right.

When Su Yu hurried back to the Sanctuary.

Seeing Su Yu's return, Lang Yun and Hu Wen, the two temporary captains handling the Sanctuary's affairs, both let out a long breath, almost seeing him as a savior.

They do have ambitions, but not large; they were satisfied having enough status in a small settlement by managing their hunting team well.

The previous manager dared not expose his strength because he feared that once his weakness was revealed, small-minded people like Lang Yun and Hu Wen would choose to flee from the Sanctuary, making it even less likely to succeed against Li He.

But now, following Li He's escape and Su Yu's relentless pursuit.

The Sanctuary was filled with anxiety.

When Li He led the Ghost Demon Cluster to attack under the Sanctuary.

The entire Sanctuary's residents were mobilized to be sent to the edge, always ready for evacuation.

Now that Li He has been expelled.

But in the eyes of the Sanctuary's residents, including Lang Yun and Hu Wen, the managerial old man, who seemed like a leader, finally succumbed to the pressure and fainted after sending off Su Yu.

The major matters of the Sanctuary naturally fell to Lang Yun and Hu Wen.

Causing them to be extremely flustered while also extremely fearful that news might leak, attracting the coveting of other settlements—

Shelter No. 73's two production lines, for Healing Potion and Antiradiation Potion, were so valuable that many small settlements on this land would go crazy for them.

Previously, with the manager, a four-star top-level strong man overseeing, those small settlements dared not harbor any envy.

But now, the old man has fainted.

Only Lang Yun and Hu Wen.

These two four-star initial Physical Transcendents were in charge.

They had no confidence in being able to protect Shelter No. 73.

After all, under normal circumstances, a small settlement should at least have two to three four-star middle-level beings, or one to two four-star advanced strong men, to be considered qualified!
