Child of the Stars!\_2**

## **Chapter 151: Chapter 101 The True Reason Behind the Downfall of Dawn City! It's Not a Natural Disaster! It's Man-Made! Child of the Stars!\_2**

"After all, in the view of the people on the Ruins Star at that time, the Empire's existence was still in question."

"In the early days of the Steel Dynasty, everything thrived and prospered. But the good times didn't last long, and soon after, the upper echelons of the Steel Dynasty initiated a project named 'Dust,' starting a grand exploration of the Steel Jungle."

"The most outstanding technology of the Steel Dynasty was the Artificial Body Transformation. Initially, the utilization of this technology by the people of the Steel Dynasty was relatively restrained, not everyone chose to undergo Artificial Body Transformation."

"However, after exploring the Steel Jungle, for some unknown reason, the technology of Artificial Body Transformation suddenly became widespread in the Steel Dynasty. Among the upper echelons of the Steel Dynasty, there was even a person who mechanically transformed all organs except the brain."

"The exploration of the Steel Jungle progressed very slowly, and the elites who ventured deep into the Steel Jungle disappeared without a trace. In order to increase the outcomes of the exploration, the leaders of the Steel Dynasty proposed a new method, which was to mechanically replace even the final organ, the brain, thereby transforming humans into digital lives with uploaded consciousness."

Upload consciousness? Replace the brain as well?

Su Yu found it hard to believe that in doing so, the Mechanical Creation consisting of all organs including the brain fundamentally had no similarity to the previous life made of flesh and blood.

Can this still be considered the same life form?

"Due to this technology, the Steel Dynasty underwent some terrible change, and the entire dynasty perished in a short period of time. The process and reason for the extinction are unknown, only that after the Steel Dynasty's downfall, the population on the Ruins Star sharply reduced to less than a tenth of the original."

"After thousands of years and exchanges of several ruling powers, the situation on the Ruins Star gradually improved. Later on, the Ghost Empire emerged, and its wanton use of Ghost Energy and radioactive minerals turned the Ruins Star into its current state."

"The Ghost Empire was also the most mysterious and sinful among the three major ruling powers. Its birth process left no trace, and its destruction caused the Ruins Star to become a complete ruin."

"The Ghost Empire entirely abandoned its loyalty to the former Human Empire, establishing itself as an empire. Its ruler, known as the Ghost Emperor, was known for a brutal disposition, and engaged in massive slaughter. The fall of the Ghost Empire is inseparable from this person."

"The current state of the Ruins Star is also single-handedly caused by the Ghost Emperor."

Seeing this, Su Yu also noticed that the administrator's description of the history of the Ruins Star was about to end, with only a concluding sentence remaining.

"The scholars of Dawn City have also summarized a pattern based on this history: every time human development on the Ruins Star reaches its peak, it suffers a catastrophic disaster."

"And after the disaster ends, there is always a long period of respite for humans to recuperate and reproduce."

"It is as if an invisible force is controlling humanity on the Ruins Star."

"Human numbers should not be too high, nor should they be too low..."

"This pattern has become the best evidence for a small group of scholars in Dawn City who firmly believe that an invisible hand is controlling everything on the Ruins Star."

The words in the administrator's letter continued.

"Unfortunately, I didn't believe it at the time, and arrogantly thought that Dawn City could definitely escape that so-called historical cycle, becoming the first power on the Ruins Star in ten thousand years to venture into the Star Sea. The longing for the Star Sea had already deeply embedded into the heart of everyone in Dawn City."

"Even the eight-year-old children in Dawn City sing and recite a ballad called 'Child of the Stars.'"

"The first unmanned exploration ship was thus completed, and was about to launch."

"Until that day..."

Su Yu turned to the last page of the letter; at this point, only a few lines of text remained.

"That day, the young City Lord found me, his expression serious, as if he had discovered something, but he did not elaborate. He just instructed me to quickly lead a team out of Dawn City. Although I didn't understand, I immediately started on the road with a team and some resources, and I found out that it was not just my team."

"There were many teams fleeing in different directions from Dawn City."

"At the time, I felt anxious and uneasy, but could only flee as instructed by the young City Lord. Because time was short, there weren't many resources brought along, and I was the only top-level four-star transformed person in the team."

"And just as we escaped not far from Dawn City, meteors descended!"

"Countless fire meteors, bearing fierce flames, turned the entire sky blood-red, as if tearing the sky apart, descending from the heavens, annihilating Dawn City and all the escaping teams in all directions!"

"The reason my team was not destroyed was because of the young City Lord's timely appearance, who blocked a fire meteor with his own life."

"No... no..."

Su Yu noticed the handwriting of the administrator became a bit shaky at this point, even almost unreadable.

It was clear that when writing this, the administrator was in a poor mental state, perhaps reliving that tragic incident from years ago.

"No... that was not a fire meteor!"

"I... I saw it very clearly! Very clearly! I clearly saw the meteor the young City Lord blocked with his body, within the fiery shell, there was a mechanical sheen shining!"

"That was not a natural disaster, that was not a fire meteor."

"That was a man-made mechanical creation! That was man-made! —"

## **Chapter 152: Chapter 101 The True Reason Behind the Fall of Dawn City! Not a Natural Disaster! It is Man-Made! Child of the Stars!\_3**

When the manager wrote this sentence, his pen pressed so hard it soaked through the paper.

It was as if he couldn't control his emotions, as if writing this text brought back memories of past disasters.

"Was it man-made..."

Su Yu closed the letter, the truth the manager wanted to convey was completely written within it.

"Manager, is this the secret you've been hiding in your heart for a hundred years?"

Su Yu remained silent for a long time.

It took him a while to digest the enormous amount of information contained in the manager's letter.

Only then did he realize that Ruins Star was not as simple as it appeared on the surface.

Whether it was the unknown existence Li He believed in before, or the clouded history of Ruins Star described by the manager.

It all made Su Yu feel breathless, as if Ruins Star was being tightly controlled by invisible hands.

But quickly, Su Yu shook his head, forcibly suppressing these emotions.

"No matter what, whether it's the cloudy history of Ruins Star, the true cause of Dawn City's downfall, or the unknown existence Li He believed in."

"They are all too far removed from me right now."

"Currently, my urgent task is to receive the manager's legacy, take over the entire Sanctuary, and use its resources to upgrade my profession level, thus continuously gaining new professions."

"If a Second Rank profession doesn't work, then Third Rank, Fourth Rank, or even higher."

"With my Profession Panel, I can switch professions infinitely. Once I accumulate enough power, the truth about Ruins Star and the clouded history will be uncovered someday."

As Su Yu thought this, he took a deep breath.

He quickly composed himself, took out the black card that Bai Hong had given him earlier.

He went inside the manager's residence, arriving at the manager's bedroom.

Su Yu noticed that the manager's bedroom was extremely simple, with only a bed and a cabinet, nothing else.

It didn't match what a Sanctuary manager should have.

Su Yu walked to the cabinet, took out the small black card, and felt around the back of the cabinet, finding a card slot.

He inserted the small black card into it.

"Click."

The sound of mechanical gears turning immediately filled the room.

As the sound rang out, Su Yu noticed that the cabinet shifted.

Soon, the cabinet slowly moved, and a hidden door appeared before Su Yu.

Su Yu stepped forward, bent slightly, and looked at the hidden door.

The next moment, a slit opened on the hidden door, revealing a pupil scanner. Once Su Yu's pupil was scanned, the hidden door emitted a mechanical electronic voice.

"Beep, a new pupil sample has been recorded. Welcome, the new manager, Su Yu."

The hidden door opened with the mechanical electronic voice.

Su Yu entered the hidden door and found the space inside was not large, about five square meters.

In this five square meter secret room, there was only a table with three items on it.

A larger metal box, a black file bag, and lastly, a peculiar palm-sized Mechanical Creation that appeared to be an information recording device.

Su Yu stepped forward, first picking up the file bag. After confirming that the file bag contained general information about the Sanctuary and some instructions from the manager, he set it aside for now.

Then, he picked up the metal box.

He opened it.

Inside the metal box was a set of prosthetic armor left by the manager, along with its core—the Electron Furnace.

Su Yu carefully lifted it, held it in his hand, closed his eyes, and infused it with Spiritual Energy to begin assessing the state of the Electron Furnace.

A moment later, Su Yu opened his eyes with a hint of excitement.

"This Electron Furnace has outstanding quality, reaching the excellent grade. Although its wear level is as high as ninety percent, with my skills, I can repair it to a usable level in time."

"When it's installed on the Thousand-Handed Armament, it might even elevate the Thousand-Hand Level to the excellent grade!"

"By then, my power will undergo another transformation."

Su Yu placed the Electron Furnace back in the metal box. The prosthetic armor left by the manager, due to long neglect and previous intense battles,

was now, in Su Yu's view, difficult to repair, but he didn't mind.

"Although this set of prosthetic armor cannot be repaired, I can completely recycle it and conduct reverse research. I should be able to acquire a lot of new technologies, which would allow the Thousand-Handed Prosthetic to receive new technological improvements."

Afterward, Su Yu set the metal box and black file bag aside.

He picked up the last item: the palm-sized Mechanical Creation, the information recorder.

After exploring it a bit, Su Yu quickly found a raised switch on the side of the information recorder.

He pressed it down.

"Guard Captain of Dawn City, Ye Rufeng, welcome to use the Dawn City personal terminal·Guard Captain Custom Edition."

As the device powered on, a mechanical electronic voice sounded, accompanied by a poetic chant.

"The iron in our bodies comes from the brilliant explosion of supernovas."

"The zinc in our blood originates from the dust ejected into the Universe after two neutron stars collided."

"The trace amounts of copper in us witness the death of a white dwarf star, even the most insignificant cobalt comes from nebulae billions of light-years away."

"Longing to witness the limits of the galactic ocean, for we are inherently the Child of the Stars."

...

Listening to this poetic chant, Su Yu recalled the Dawn City described in the manager's letters, which never gave up on exploring the stars.

"This poetic chant, should be the one mentioned in the manager's letter, the one even eight-year-olds in Dawn City could sing."

"Child of the Stars, huh?" Su Yu's tone carried a sense of wistfulness.

"So, the manager's name was Ye Rufeng? It's quite a nice name."

In the Sanctuary, for all these years, the people referred to the manager with respect as the manager, and the manager never mentioned his own name, as if he wanted to bury his past along with the downfall of Dawn City.

Su Yu picked up the Dawn City personal terminal and quickly figured out how to use it.

This personal terminal had lost most of its functions.

Only the information storage function remained.

At that moment, Su Yu opened the stored information within the personal terminal.

He intended to see what information the manager had left for him.

With just a glance, Su Yu's eyes filled with delight.

"Manager, you've truly left me with a huge surprise!"

**Infinite Job Transfers Starting from Mechanic #Chapter 153 - 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body - Read Infinite Job Transfers Starting**

## **from Mechanic Chapter 153 - 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body**

### **Chapter 153: Chapter 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body**

In the Dawn personal terminal, there's not much stored information, only two blueprints and a map.

Both blueprints are mechanical blueprints brought back by the administrator from Dawn City, and each is extremely useful for Su Yu.

[Dawn I Type Basic Prosthetic Body: Dawn City basic prosthetic, for limb parts, low manufacturing cost, can be used to restore combat strength to disabled combatants.]

[Small Intelligent Chip Manufacturing Equipment: Can produce intelligent chips on a small scale.]

These two mechanical blueprints are the technological crystallization from the former Dawn City!

"These two blueprints came at just the right time, whether for me or for the Sanctuary, they are a huge amplification!"

Su Yu was immensely pleasantly surprised.

"These two blueprints are clearly meant for establishing a power base, but unfortunately, the Sanctuary has not had any mechanics capable of manufacturing these mechanical creations over the years."

"Dawn City was destroyed too quickly back then, there was no time to react, and these blueprints were presumably taken from Dawn City by the administrator."

"Over the years, the administrator couldn't even maintain his own mechanical body timely, let alone find mechanics capable of producing these mechanical creations."

Su Yu quickly understood why the administrator had kept these blueprints tucked away all these years.

"The basic prosthetics are easier to deal with. With some effort, the mechanics in the Sanctuary might barely manage to produce a simple version, but large-scale production and equipping all the disabled personnel in the Sanctuary was too difficult for the past Sanctuary."

"Moreover, the simple version they manufactured often couldn't withstand intense battles, offered no advantages, and even found it hard to deliver their own strength, making them a complete burden for combat personnel."

"Besides, on this Ruins Star, the materials to manufacture basic prosthetics are, to some extent, more expensive than human lives. Rather than making prosthetics for the disabled in the Sanctuary, it'd be better to recruit wanderers from the wilderness."

"There's no need to mention the small intelligent chip manufacturing equipment; the difficulty in making this blueprint is of an extraordinary level, even I am not completely confident right now."

"Moreover, the materials are extremely rare, so it was even less likely for the administrator to have the mechanics in the Sanctuary make such equipment before."

Su Yu quickly realized why the administrator hadn't used these blueprints before.

"However, neither of these problems exist for me!"

A gleam of brilliance flashed in Su Yu's eyes.

"The manufacture of basic mechanical prosthetics is extremely simple for me, and I can easily produce dozens simultaneously with the use of spiritual energy. Let alone me, even Nuonuo can produce these basic prosthetics on a large scale."

"Furthermore, during mass production, I can also reduce the cost of these basic prosthetics to the minimum."

"Also, I can manufacture different levels of prosthetics based on the user's strength, allowing them to display even stronger combat power than before their injury!"

"In this way, the disabled combatants in the Sanctuary can be utilized once again." Su Yu pondered, "There were quite a few disabled combatants from the battle with the Night Slayer Team and over the years in the Sanctuary."

"Once equipped with prosthetics, the combat strength of the Sanctuary will greatly improve!"

In Shelter No. 76, the probability of combat personnel becoming disabled is not low, and those who can stay in the Sanctuary after becoming disabled are either extremely strong beforehand or have made a significant contribution to the Sanctuary by utilizing their abilities, allowing them to consume contributions to survive there, though just barely.

Life was extremely difficult.

"Of course, providing them with prosthetics shouldn't be free but can take the form of loans, first manufacturing prosthetics for them, and then letting them hunt in the wilderness, collecting necessary materials and ores for me."

"Continuing the previous Sanctuary's contribution system, purchasing materials, and providing them with prosthetic upgrades and maintenance projects..."

"Maintenance can be handed over to Nuonuo and the repair robots to be built next. Among the harvested intelligent chips previously, aside from a hundred combat chips, there are also dozens of chips for other purposes that can be fully utilized."

A sparkle of insight suddenly shone in Su Yu's eyes.

"The mechanics in the Sanctuary can also be put to use. I can teach them the technology regarding prosthetics, though it shouldn't be free either, employing the contribution system to let them work."

"Mechanics in the previous Sanctuary always withheld some techniques, afraid of others learning them, but I don't have to worry at all. Anyway, with the profession panel, even if those mechanics can develop new technologies, it will all become mine."

"Moreover, due to prosthetics, combat personnel can reduce hindrances during battle, and offering artificial body transformations can entirely serve as a selling point for the Sanctuary to attract more wanderers."

"Different from the Sanctuary during the administrator's reign, the administrator, due to personal reasons, couldn't expand the Sanctuary. He could only control the number of people, whereas for me, the more people in the Sanctuary, the more materials I can obtain, and the faster my strength can improve!"

The more Su Yu thought, the brighter his gaze became.

"The strength of the prosthetics can be well designed, ideally in a way that doesn't affect normal combat but still requires maintenance after every fight. This way, contributions can be better recouped, and they can be continuously sent out hunting."

"If you want to become stronger quickly, breakthroughs at the Extraordinary Level are unstable, but here I have a stable path to becoming stronger, which is by changing to stronger prosthetics."

**Infinite Job Transfers Starting from Mechanic #Chapter

Prosthetic Body\_2 - Read Infinite Job Transfers Starting**

## **from Mechanic Chapter 154 - 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body\_2**

### **Chapter 154: Chapter 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body\_2**

"To replace prosthetics, you need to hunt; after hunting, they require maintenance. Even if you accumulate enough contributions after some time hunting, upgrading their prosthetics for them is just a piece of cake for me, effortless."

"And if they want to become stronger, they need to replace their prosthetics with better ones, thus endlessly repeating the cycle."

"In this way, I can obtain a continuous flow of resources, further elevating my professional level."

"If that's the case..."

"The entire Sanctuary will be working for me!"

"This is the path a capitalist... ah no, a Mechanic should take!"

Su Yu increasingly felt that taking over the Sanctuary was a brilliant move.

"Although it seems as if I'm making the entire Sanctuary work for me, on this Ruins Star, behaviors like this will definitely gain the approval of most people in the Sanctuary. They might even see it as a blessing."

"After all, on this Ruins Star, being physically handicapped often equates to a slow death, and the Sanctuary being able to provide suitable prosthetics is tantamount to granting them new life."

"Moreover, as long as the prosthetics are made by me, I can render them useless in an instant, without fear of any unrest in the Sanctuary."

After understanding the role of basic prosthetics, Su Yu immediately outlined the general strategy for the Sanctuary in his mind.

Then, Su Yu's gaze fell on that excellent-grade small Intelligent Chip manufacturing device.

"This blueprint is of excellent grade. I'm not confident in being able to manufacture it now, but it doesn't matter. Once I take over the Sanctuary and upgrade the Fighter level to the maximum, I'll naturally acquire a new profession."

After memorizing the two blueprints, Su Yu looked again at the last map stored in his personal terminal.

The map was, in fact, the map of over half the Ruins Star explored by Dawn City in the past.

All sorts of data and forces were marked in great detail on it.

Even though this map was created a hundred years ago, it was still extremely useful to Su Yu.

Su Yu compared the environment around the Sanctuary with the map from his memory, finding an accuracy rate of over eighty percent.

"This map comes at the right time. The original Sanctuary map only had data covering an area of a hundred miles, beyond which everything was unknown."

"Moreover, this map even marks the three major forbidden zones of Ruins Star."

"Steel Jungle, Radiation Ghost City, Land of Fallen."

As Su Yu looked at these three major forbidden zones marked in bright red on the map, along with warnings to keep out, he felt a bit puzzled.

"I learned the origins of Steel Jungle from the manager's letter. It used to be the capital of the Azure Second Empire that was destroyed."

"And as for Radiation Ghost City, I've heard of it in Sanctuary rumors. It was once the core base of Ghost Energy experiments of the Ghost Empire, and the most intense center during the Ghost Energy explosion, long since turned into a paradise for Radiation Beasts and ghost entities."

"Only this Land of Fallen, the people of the Sanctuary only know it's a human forbidden zone, but are unaware of why it is or how it came about."

Su Yu shook his head and quickly dismissed these thoughts from his mind.

Be it Steel Jungle or Radiation Ghost City, they are not something to explore right now.

Afterward, Su Yu stored away the terminal and metal box containing the Electron Furnace and Artificial Armor Set, then opened the Sanctuary's data to start examining it.

Moments later, Su Yu frowned as he finished reading through the Sanctuary's information.

"Indeed, the situation of the Sanctuary is worse than I imagined."

The data left by the manager showed that the total population of the Sanctuary was less than five thousand. Excluding members of the guard and hunting teams, fewer than four thousand residents remained.

These residents were remnants of the past Dawn City, unfortunately, due to the rapid destruction of Dawn City, the manager couldn't bring out too many resources, and these remnants had already reproduced for several generations.

Currently, few of these residents remember Dawn City, and most of them are ordinary people.

In their daily lives, sheltered by the manager, they survive within the Sanctuary, mainly responsible for sorting and processing the hunting team's spoils, planting and processing fast-growing plants, and mining and processing minerals.

To put it plainly, aside from the aspect of safety, it's all heavy labor.

Even the heads of management were mostly descendants of the former remnants of Dawn City.

As for resources, most are abundant in the Sanctuary, except for Mechanical Creations and ores, which had been used up nearly completely due to Su Yu's previous applications and usage.

Seeing this, Su Yu sighed.

"The manager is great in every aspect, just too indecisive. Those parasites in management even colluded with the Nightshade group, yet the manager could not bear to kill them for old times' sake."

"Moreover, even now that Nightshade is no longer, those people still hold positions in the manager's office. Perhaps it's no surprise, they probably think the manager is still alive, still the leader of the Sanctuary, believing no one would dare to touch them in this Sanctuary."

"But then, for these parasites on Ruins Star's wilds, running away means death, better to hide in the Sanctuary, hoping for the manager's leniency."

Su Yu thought of this, a hint of coldness flashed in his eyes.

He clearly remembered how those parasites in the management targeted him before and the mistakes they made regarding Team Nine.

"Not running away is good!"

Then, Su Yu gathered the items in the secret chamber and walked out.

He went to the entrance, where he found Bai Hong guarding the door at the time.

## **Infinite Job Transfers Starting from Mechanic #Chapter 155 - 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body\_3 - Read Infinite Job Transfers Starting from Mechanic Chapter 155 - 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body\_3**

### **Chapter 155: Chapter 102: Mechanical Blueprint, Dawn I Type Basic Prosthetic Body\_3**

"Captain Bai Hong, please go inform the leaders of each hunting team, the deputy captain of the guards, and those high officials in the management department."

"Tell them to gather at the council hall in the sanctuary, saying that the manager has something to announce."

"By the way, let the guard team take position, stay around the council hall and management department, ready to kill at any moment."

Bai Hong heard Su Yu's words and saw the unhidden killing intent in Su Yu's eyes, feeling secretly shocked in his heart.

He nodded and agreed, saying, "Alright, manager, I'll prepare right away."

Su Yu nodded, then walked towards the Ninth Squad's base, planning to first equip the Electron Furnace onto the Thousand-Handed Prosthetic, further enhancing it.

At that moment, Bai Hong watched as Su Yu's figure disappeared into the distance.

Bai Hong's eyes held a trace of reminiscence. Back when Bai Hong first followed the manager, the manager wasn't as indecisive as now. Yet with age, the old man increasingly indulged in reminiscing about the past, unwilling to harm the descendants of former companions.

"He really resembles the manager in his prime, no, to be accurate, even stronger!" Bai Hong murmured to himself, then turned to head towards the direction of the guard team.

He knew that blood would be spilled in the sanctuary today.

The Ninth Squad base.

Nuonuo was currently crafting parts for various positions of the mechanized cavalry.

After receiving a body with thirty-two mechanical arms, Nuonuo found that her repair speed had indeed increased significantly.

By now, she had crafted enough parts to assemble twenty mechanized cavalry.

Su Yu, returning to the base, immediately took out the Electron Furnace.

He began the repair process.

With the influx of spiritual energy, the furnace ignited.

Continuously, materials were melted and incorporated by Su Yu into the Electron Furnace.

Soon.

Su Yu stopped operating the Steel Meditation Technique, and the fluctuations of spiritual energy calmed down. He picked up the Electron Furnace, its sheen now brighter than before by twice as much.

Su Yu's eyes revealed a hint of joy.

"Not bad, I've improved my mechanical skills a lot. Just the initial maintenance has restored this Electron Furnace to seventy-five percent of its damaged state."

"It's already enough for initial use of the Thousand-Handed Prosthetic."

Immediately, Su Yu detached the Thousand-Handed Prosthetic from Nuonuo and equipped it on himself.

Su Yu took the Electron Furnace and installed it into the pre-prepared interface on the Thousand-Handed Prosthetic.

With the successful installation of the Electron Furnace.

The entire Thousand-Handed Prosthetic suddenly emitted a crimson glow.

The twenty-four tentacles now held a trace of crimson.

That was the energy transmission channel constructed by the Sea Blue Source Crystal, emitting light filtered through the Tungsten Blood Steel, resulting in the crimson glow.

Su Yu manipulated the Thousand-Handed Prosthetic, feeling the exhilarating sensation of easy control and the powerful energy contained within the mechanical arms.

Then he checked the panel of the Thousand-Handed Prosthetic.

[External Prosthetic Weaponry·Thousand Hands]

[Grade: Excellent (Semi-finished product)]

[...]

[Skills:...]

[Endurance Form·Nuonuo Form·Tungsten Blood Steel Enhancement: Loaded by repair robot Nuonuo, charges using Nuonuo's own heavy-duty high-energy batteries, greatly extending the endurance time of the Thousand-Handed Prosthetic]

[Spiritual Burst Form·Electron Furnace: Activates the Electron Furnace's overload state, causing all mechanical arms to add energy attacks. Capable of spiritual amplification, unleashing formidable spiritual damage. Can explode with five-star primary attack power when not considering load state, maintaining for three minutes]

Su Yu ignored the luxurious panel of the Thousand-Handed Prosthetic and only focused on a few attributes that he cared about the most.

"As expected, just as I anticipated, the Thousand-Handed Prosthetic now qualifies as an excellent-grade creation. Although it's still considered semi-finished due to the Electron Furnace's damage, its power is enough to sweep through the entire sanctuary!"

"Not to mention, under the Tungsten Blood Steel enhancement, it can withstand an all-out strike from a five-star top-tier attack."

Afterward, Su Yu put away the Thousand-Handed Prosthetic and operated the Steel Meditation Technique; the invisible spiritual energy instantly enveloped the entire repair room.

The materials crafted by Nuonuo for the mechanized cavalry were assembled autonomously under the control of the spiritual energy.

In an instant, twenty mechanized cavalry appeared.

Of these twenty mechanized cavalry, ten were melee types, while the rest were ranged and mobility types.

Su Yu noticed that this batch of mechanized cavalry had already reached the two-star top-tier in basic strength!

If they formed a cluster, under Su Yu's spiritual energy augmentation, these mechanized cavalry wouldn't be at a disadvantage even against three-star transcendents.

However, to truly assess the combat effectiveness of this batch of mechanized cavalry and the new model of cavalry overall, a battle is necessary for testing.

Then, Su Yu called for Nuonuo and re-equipped the Thousand-Handed Prosthetic onto Nuonuo.

Nuonuo had completely adapted to the repair speed increase brought by the Thousand-Handed Prosthetic.

Nuonuo's expression on the electronic screen appeared very happy.

"↘(≥▽≤\*)o"

"As expected, master didn't lie to me; this indeed was prepared to increase repair speed."

Su Yu felt a slight guilt as if deceiving a child upon hearing this.

Afterwards, Su Yu turned, leading the twenty mechanized cavalry towards the council hall.

At this moment, Yang Lie and others happened to return from outside. Seeing Su Yu heading out with the cavalry.

Yang Lie immediately asked curiously, "Su Brother, where are you headed? Going out to hunt to test the new cavalry's power?"

Then Yang Lie continued, "Captain Bai Hong just informed us of the hunting teams to go to the council hall for a meeting, as per the manager's instruction. Su Brother, you should come along."

Upon hearing this, Su Yu's expression was somewhat strange. He knew that after the manager's passing, only Bai Hong and he knew the news of him succeeding as the manager.

At that moment, Su Yu nodded and replied, "Alright, Uncle Yang, let's go together. Remember to bring the members of the Ninth Squad too."

"As for the new cavalry's power, it indeed deserves a test."

"Let them see blood, but no need to go hunting outside."

**Infinite Job Transfers Starting from Mechanic #Chapter 156 - 103: Who is in the hall? Why do you accuse this official? The astonishment of the crowd! - Read Infinite**

## **Job Transfers Starting from Mechanic Chapter 156 - 103: Who is in the hall? Why do you accuse this official? The astonishment of the crowd!**

### **Chapter 156: Chapter 103: Who is in the hall? Why do you accuse this official? The astonishment of the crowd!**

The council hall is located at the center of the entire Sanctuary, with a dusty exterior that doesn't draw much attention.

But for Shelter No. 73, this was the place where the former leaders would announce major decisions.

Unfortunately, as the old leaders aged, the council hall had not been used for a long time.

It wasn't far from the camps of several hunting teams and the management office.

At this moment, inside the council hall.

On both sides of the hall, two rows of symmetrical seats were set up, belonging to the Hunting Team Leaders and senior management.

And at the center of the hall, the highest point, there was a metal chair standing elevated, which was the seat for the leader, though it had not been occupied for a long time.

Several Hunting Team Leaders were present, sitting in their respective seats, conversing with each other.

The leaders of the Wolf Pack and Shan Lan Team, Lang Yun and Hu Wen, were both wrapped in bandages at this moment.

In the previous battle with the Night Slayer Team, although neither of them died, they were severely injured. Lang Yun and Hu Wen exchanged a glance.

Lang Yun, with a sense of relief, said, "Old Hu, you're also badly hurt. That beast Li He, turning himself into a monster to drag the Sanctuary down."

"This time, the Sanctuary has suffered a severe blow. We're lucky to have only been seriously injured, at least we're not disabled. Once we recover, we can continue hunting."

Hu Yun nodded in agreement and then said regretfully, "It's just a shame, both of my deputy leaders lost an arm. In the future, they probably won't be able to hunt again. Although the Shan Lan Team can support them temporarily, ultimately..."

"The number of old members in the team who can't fight is increasing."

For the Sanctuary's hunting teams, physical disability is a slow death.

Even if the hunting team cherishes old friendships and is willing to provide assistance, it is by no means a long-term solution.

Over the years in the Sanctuary, the Wolf Pack and Shan Lan, as the two strongest teams, naturally had many combat personnel who became disabled and unable to fight.

They became burdens to the team. However, in the eyes of Lang Yun and Hu Yun, these people could not be abandoned.

Not to mention the emotional burden, if they were to abandon the disabled members, what would the others in the team think?

"Speaking of which, the leader hasn't held a meeting in the council hall for a long time." Hu Yun sighed, "Although the Night Slayer Team has been eradicated, the Sanctuary's hunting teams have been reduced to only five."

"Moreover, the members of the teams previously absorbed by Night Slayer have all turned into Ghost Demons, which is a real reduction."

"If it weren't for Su Yu's strength being beyond our imagination, the entire Shelter No. 73 might no longer exist."

"I think the leader will discuss these issues with us shortly."

Hearing this, Lang Yun also nodded.

In the eyes of the two Hunting Team Leaders, although the Sanctuary had resolved its internal conflict with Night Slayer, the situation was not good.

The hunting and guard teams were severely understaffed.

The previous expansion actions of Night Slayer and the series of absorptions significantly reduced the number of combat personnel in the Sanctuary.

Now, the Sanctuary can barely maintain its daily hunting activities.

Let alone the fact that the remaining hunting teams are all either injured or disabled.

At this moment, the doors of the council hall opened.

A group of key management officials, led by Liu Tianzhang and Eisen, dressed in management office attire, walked in.

They were also shocked by the sudden disappearance of the Night Slayer Team.

When they learned of Night Slayer's demise, they were initially panicked, but after accepting this fact, they discussed among themselves and quickly realized one thing.

The Sanctuary was in disarray. Although Night Slayer had been dealt with, due to the reduction in combat personnel, the entire Sanctuary was already operating at a heavy load.

And this batch of management officials currently had no way to handle it.

"The leader, in the end, will consider my grandfather's old ties and let me off the hook. At most, I'll just obediently admit a mistake." Liu Tianzhang sat in his chair, looking at Lang Yun and Hu Wen, who were wrapped in bandages, feeling amused.

"Even if you've resolved Night Slayer, so what? The Sanctuary can't function without us, and the leader is definitely not going to take drastic actions against us. I'm still the head of the management office." Liu Tianzhang thought to himself.

Lang Yun and Hu Wen, looking at Liu Tianzhang, were not in a good mood.

Although a fence-sitter like Liu Tianzhang didn't pose much of a threat to the two top teams, even when Night Slayer was around.

However, seeing Liu Tianzhang sitting across from them like this, both felt as if they had swallowed a fly, disgusting.

At this moment, the doors of the council hall opened again.

Next to Liu Tianzhang, Supervisor Eisen instinctively looked over.

When he saw who had entered, he couldn't help but tremble slightly.

"Su... Su." Eisen's voice was trembling.

Liu Tianzhang frowned, feeling Eisen was too weak, and shouted, "What's going on?"

"Director Liu, Su Yu, he has arrived."

The management officials were not aware of the details of the operation to eradicate the Night Slayer Team.

But they knew that Su Yu was one of those responsible for eradicating the Night Slayer Team. As for the extent of Su Yu's role, they weren't sure.

"What about Su Yu? Just a mechanist with a bit of luck. Even if he helped to eradicate Night Slayer, I bet the leader was the one who took action, and Su Yu at most played a supporting role." Liu Tianzhang looked at Su Yu as he entered, feeling a bit uneasy, but he forced himself to appear calm, only his slightly trembling body betrayed him.

## **Chapter 157: Chapter 103: Who is in the Hall? Why Accuse Me? The Shock of the Crowd!\_2**

In terms of the Sanctuary, the one Liu Tianzhang feared the most was Su Yu right in front of him.

An Extraordinary Mechanic, a Spirit-type Transcendent, and a genius who, in just a few months, had risen from obscurity to eventually obliterate the Night Slayer Team.

Any one of these titles alone would fill Liu Tianzhang with fear.

Moreover, Liu Tianzhang had deeply wronged Su Yu before.

And at this moment, Su Yu walked into the council hall.

Seeing the hall full of people sitting on both sides, he nodded in satisfaction.

"Su Yu, you're here." Lang Yun and Hu Wen quickly stood up and greeted Su Yu.

"Earlier, due to severe injuries, we couldn't visit to thank you. This time, it's all thanks to you that we survived."

Upon seeing this, Su Yu just nodded slightly.

This scene immediately caught the eyes of Liu Tianzhang and Eisen, leaving them a bit shocked.

Wasn't it said that Su Yu only played a supporting role in eradicating the Night Slayer?

Then what is going on here?

Eisen screamed internally.

In terms of the management, no one had offended Su Yu more harshly than he did.

At first, Liu Tianzhang's words had offered him some solace, but now that solace was completely gone, replaced by endless fear.

Liu Tianzhang was in no better condition.

"Impossible, how could Su Yu save two four-star beginners in the previous battle? Then just how strong is Su Yu? How long has it only been? Surely he can't be stronger than the management, right?" Liu Tianzhang's terror was no less than Eisen's.

Liu Tianzhang's biggest reliance was that the management would consider old ties and their insufficient manpower to protect them.

But now, just through Lang Yun and Hu Wen's words, it was clear that Su Yu's strength perhaps far exceeded their imaginations.

With that, would the management really spare them?

At this moment, Su Yu turned his gaze toward Liu Tianzhang and the others.

He counted the number of people and found none missing.

Su Yu nodded in satisfaction, thinking, "Good, this saves the trouble of looking for them."

Immediately, Su Yu clapped his hands, and Yang Lie and Bai Hong led the members of the Guard and Ninth Team in.

This sight immediately entered the eyes of Liu Tianzhang and Eisen.

Their already tense nerves now grew even tighter.

Liu Tianzhang let out a chuckle, seemingly joking, "Su Yu, Captain Yang Lie, and Captain Bai Hong, why have you brought so many people to the council hall?"

"The manager only summoned us and the Hunting Team Leader, wasn't that enough? As for these people..."

Meanwhile, Lang Yun and Hu Wen exchanged a glance, acutely sensing something was amiss.

If Yang Lie brought the Ninth Team to the council hall, they could still understand.

But Bai Hong, the Guard Captain most loyal to the manager, how could he possibly lead the Hunting Team here without the manager's instructions.

Not to mention the manager's prolonged absence.

And the scene of Yang Lie and Bai Hong leading people inside right after Su Yu clapped his hands.

Suddenly, Lang Yun and Hu Wen were shocked, realizing a certain possibility.

Could it be?

Could it be that the Sanctuary has already been handed over by the manager?

Lang Yun quietly swallowed, feeling that his guess was quite likely true.

Hu Wen, at this point, silently lowered his head, fearing others would notice him.

He knew that no matter what, the Sanctuary was about to change drastically.

Su Yu didn't waste words now either.

"Captain Bai Hong, Uncle Yang, take them all down."

With that, Su Yu reached out and pointed at the group led by Liu Tianzhang and Eisen from the management.

Liu Tianzhang shouted in horror, "Su Yu! How dare you? Capturing the management's high-level personnel without permission is a serious crime, I'll report you to the manager..."

"Report me?" Su Yu heard this and seemed to hear a ridiculous joke.

"Alright, I'll wait for you to report me to the manager."

Eisen, meanwhile, was ashen-faced.

He was a bit smarter than Liu Tianzhang.

Upon seeing Bai Hong appear, Eisen knew that even if this wasn't personally instructed by the manager, it was at least tacitly approved.

Moreover, when Eisen saw Yang Lie and Bai Hong so obedient to Su Yu's instructions, his heart sank gradually.

To him, the most unlikely and unacceptable fearsome fact was about to be confirmed.

"Su Yu! You're just a Mechanic, just a refugee taken in by the Sanctuary." Liu Tianzhang was now hysterical; he dared not think or wanted to think otherwise.

"I'll report you, I'll report you to the manager!"

"I'll report you to the manager!!"

Liu Tianzhang was now like a drowning man, desperately clutching at the last straw, yearning to survive.

Yearning for the management to step in and protect them.

And Bai Hong had already controlled Liu Tianzhang and others.

For this group of parasites in the Sanctuary, Bai Hong had long been displeased with them.

But due to the manager, he had never been able to deal with these parasites.

Now that Su Yu had become the new manager, Bai Hong stepped on Liu Tianzhang's back.

Forcing Liu Tianzhang to kneel at the center of the council hall.

Then, Bai Hong sternly shouted, "Behave."

The Guard members and Ninth Team members also followed suit.

The parasite group in the management, led by Liu Tianzhang and Eisen, was now completely subdued.

Originally, a large part of the management's high level was diminished at once.

Only a few remained, those who hadn't collaborated with the Night Slayer or joined Liu Tianzhang's group, sitting in their seats.

## **Infinite Job Transfers Starting from Mechanic #Chapter 158 - 103: Who in the Hall? Why Accuse This Official? The Astonishment of the Crowd!\_3 - Read Infinite Job Transfers Starting from Mechanic Chapter 158 - 103: Who in the Hall? Why Accuse This Official? The Astonishment of the Crowd!\_3**

**Chapter 158: Chapter 103: Who in the Hall? Why Accuse This Official? The Astonishment of the Crowd!\_3**

Among those still seated, a member of the management was noticed by Su Yu.

This person was extremely robust, but his forearms were completely broken. His gaze at Liu Tianzhang was filled with deep disdain. When he noticed Su Yu looking at him, he offered a friendly smile.

"This person's strength is actually at top-tier three-star level."

Su Yu was slightly surprised, but quickly recalled the name of this person from the records left by the former manager.

This man was named Zhang Xiao, a former team leader of the hunting squad, known to have the potential to break through to four stars. Unfortunately, during a hunt, he lost both hands.

But due to his peak three-star strength, the Sanctuary allowed him to hold a position in management, and his conduct was completely different from Liu Tianzhang and the others.

He had never sided with the Night Slayer, and since the former manager placed him in the management office, he was extremely loyal to the former manager, grateful and reciprocating kindness.

Su Yu silently took note of him and then walked to the center of the council hall.

Looking at Liu Tianzhang and his group who were pinned to the ground.

Su Yu showed a playful smile.

Then, he turned around and sat on the chair symbolizing the position of manager of the Sanctuary.

"Liu Tianzhang, is it you who wants to accuse this manager?" Su Yu said indifferently.

"Accuse this manager—"

"Accuse this official—"

Su Yu's words echoed in the empty council hall.

The entire council hall fell silent.

Su Yu's final words were deeply imprinted in Liu Tianzhang's mind.

Accuse this manager.

Lang Yun and Hu Wen, although they had somewhat anticipated this in their hearts.

But when Su Yu sat in that manager's position, they were still deeply shocked.

How long has it been?

Three months?

No, to be precise, it's just over two months.

Su Yu transformed from an inconspicuous repairman in the shelter's repair shop to the manager of Shelter No. 73!

This contrast made Lang Yun and Hu Wen, who had personally witnessed Su Yu's strength, deeply astonished.

"No! Impossible! You must be lying to me! Where is the manager? I want to see him! I want to see him!" Liu Tianzhang screamed hysterically.

Behind him, the members of his small group had already lost all hope, kneeling on the ground.

"I want to see the manager..." Liu Tianzhang's shout was interrupted.

Bai Hong viciously stepped on Liu Tianzhang's back, slamming Liu Tianzhang's face onto the ground.

"What are you shouting for? Didn't you want to see the manager? To accuse Lord Su Yu?" Bai Hong leaned down and whispered in Liu Tianzhang's ear.

At this moment, Bai Hong's words sounded like a devil's whisper to Liu Tianzhang!

"Lord Su Yu was officially announced to succeed as the new Sanctuary manager by the previous manager!" Bai Hong stood up and said loudly.

"It was confirmed personally by the manager, I witnessed it myself."

"Subordinate Bai Hong, greets the manager."

Bai Hong tossed aside the now powerless Liu Tianzhang.

Kneeling on one knee, he showed loyalty to Su Yu.

"Greetings to the manager."

"Greetings to the manager."

...

Behind Bai Hong, Yang Lie and others imitated this, expressing their loyalty to the new manager.

The members of the Ninth Squad were also shocked and astounded at this moment.

Although they had already learned about Su Yu succeeding as manager beforehand.

But when Su Yu actually took that position, the shock in their hearts was still overwhelming.

Clearly, he was still a companion living and fighting together at the Ninth Squad's base not long ago; in such a short time, he became the new manager.

At this moment, Yang Lie looked at Su Yu's figure with great admiration in his heart.

Meanwhile, Lang Yun and Hu Wen and others.

Just as they were about to express their loyalty.

They were interrupted by a roar from Liu Tianzhang!

"I don't believe it! I don't believe it!"

Liu Tianzhang said frantically: "Where is the manager? I want to see the manager! What proof do you have that you're the manager?"

"Impossible! Absolutely impossible!"

At this moment, the doors of the council hall opened once more.

But this time, it wasn't a person entering.

But a "mechanical monster" formed by twenty-four mechanical tentacles.

Everyone stared blankly at the spectacle.

The next moment, this mechanical monster bypassed everyone and approached the center of the council hall.

"Thousand-Handed Weapon"

Su Yu thought silently in his mind.

"Clack clack."

Accompanied by the sound of mechanical operations.

The Thousand-Handed Prosthetic once again integrated with Su Yu.

At this moment, the core Electron Furnace lit up, the energy it emitted instantly turning the entire prosthetic a crimson red.

Everyone in the council hall naturally recognized this as the greatest symbol of the manager, the Electron Furnace.

Twenty-four terrifying mechanical tentacles enveloped Su Yu entirely on the platform's seat.

In the eyes of everyone in the Sanctuary at this moment, the pressure from Su Yu was far greater than that of the previous manager.

Lang Yun and others no longer hesitated.

Kneeling down in unison.

"Greetings to the manager."

"Greetings..."

Even the remaining members of the management, led by the armless Zhang Xiao, also knelt down at this moment, expressing their loyalty to Su Yu.

By now, Liu Tianzhang was utterly dumbfounded.

When the most impossible fact presented itself in front of him, he could no longer refute.

"No, you simply cannot kill me, I have committed no crime, you have no evidence..." Liu Tianzhang, accepting reality, said with difficulty.

And Su Yu, increasingly found Liu Tianzhang laughable.

"Director Liu Tianzhang, evidence is needed for investigation."

"For killing, only a position is needed."

Su Yu's tone was calm, yet no one dared to dismiss the intent to kill in Su Yu's words.

"Captain Bai Hong, proceed. Anyone colluding with the Night Slayer Team, or related to these parasites with Liu Tianzhang."

"Kill them all."

"Leave no one!"

**Chapter 159: Chapter 104: Subduing Everyone, Reorganizing the Hunting Team, Winning People's Hearts (10,000 More Subscriptions Needed)**

"Yes, my lord."

Bai Hong respectfully replied.

Then he directly took action, pulling out a small knife from behind and slicing Liu Tianzhang's throat.

"Ho ho..."

Liu Tianzhang clutched his throat in disbelief, struggling to make a sound, but ultimately it could only be a gasp from his ruptured windpipe.

He never imagined that Su Yu would actually kill them right here in the council hall, without hesitation or delay.

In his view, even if Su Yu wanted to kill him, he would have to wait until the Sanctuary was stabilized; otherwise, who would manage the Sanctuary once they were dead?

Liu Tianzhang's eyes were filled with despair, one hand covering the wound on his neck, the other soaked in blood trying to point at Su Yu.

But ultimately, it powerlessly fell to the ground.

The entire being was lifeless.

Yang Lie and others followed suit, executing Liu Tianzhang's group directly in the council hall.

This was something Su Yu had instructed beforehand.

On one hand, it was to set an example; on the other hand, Liu Tianzhang and his group of parasites were conveniently gathered in the council hall.

Since everyone was there, might as well send them off together.

"Captain Bai Hong, drag the bodies away." Su Yu looked at the grotesque corpses of Liu Tianzhang and Eisen, feeling indifferent towards them. After reading the administrator's letter, Su Yu only wanted to quickly develop using the resources of the Sanctuary.

However, these people had to die regardless.

Previously, these so-called high-ranking members of the management had obstructed Su Yu several times.

If it weren't for the job panel, Su Yu would probably be dead long ago.

"By the way, go search the homes of these parasites, and deal with anyone closely related to them." Su Yu said indifferently.

Bai Hong nodded again, then waved to the members of the guard, signaling them to follow.

Afterward, they took the bodies away and closed the council hall door.

Members of the ninth squad, including Yang Lie, then sat in the places of Liu Tianzhang and others.

The council hall once again fell into a deadly silence.

It was as if Liu Tianzhang and others' deaths were just an illusion.

Only the large, uncleaned bloodstains on the floor told everyone that a bloody scene had just occurred here.

Su Yu scrutinized everyone present, and no matter who it was, anyone who met Su Yu's gaze instinctively avoided it.

On one hand, it was because Su Yu's previous thunderous methods had frightened everyone.

On the other hand, the imposing presence Su Yu exuded under the encirclement of twenty-four scarlet mechanical tentacles was shocking.

"Too fast, too fast." Hu Wen's heart was bitter, not only because Su Yu became the administrator but also because as a four-star initial Extraordinary Physical Body, he could now feel an even stronger aura from Su Yu.

"Su Yu has grown stronger again; this Ruins Star still has geniuses." Lang Yun thought to himself, "If Su Yu becomes the administrator, I accept it. After all, the strength he exhibited was likely already stronger than the administrator, and now who knows how much stronger he is."

The Thousand-Handed Prosthetic emitting a scarlet glow, along with the mechanical tentacles several times more numerous than before, all indicated a significant increase in strength.

"The former administrator was heavily injured in a battle with the Night Slayer Team, leading to his demise." Su Yu broke the silence, "Before dying, the administrator entrusted the entire Sanctuary to me. Naturally, I will protect the Sanctuary."

Everyone had already accepted Su Yu's role as the Sanctuary administrator.

Even if there was dissatisfaction, seeing the yet-to-dry bloodstains on the floor and the menacing mechanical tentacles beside Su Yu, no one dared to speak.

"I have understood the Sanctuary's situation."

"I know the combat personnel and management are currently very lacking."

With these words, everyone was momentarily stunned.

So you know the Sanctuary currently lacks manpower.

But you still killed them so quickly?

At this moment, Zhang Xiao stood up from his seat, his empty sleeves flapping in the absence of arms.

"My lord, although Liu Tianzhang and those people deserved death, with their demise, the Sanctuary is now short on manpower, and it will take some time for ordinary residents to take over their work."

"Moreover, all hunting teams and guard teams need reinforcement, otherwise the Sanctuary's balance cannot be maintained."

Su Yu nodded; he was naturally aware of these issues.

However, compared to prolonged suffering, it was better to endure short-term pain.

With the death of Liu Tianzhang and his group, the Sanctuary would face some temporary issues, but if they continued to live, the problems would only multiply.

"For the positions of Liu Tianzhang and others, the original members of the ninth squad will temporarily assume responsibility." Su Yu looked at Yang Lie, "Uncle Yang is already an experienced Hunter, and they are already somewhat familiar with the Sanctuary's management. Having them take over the positions of Liu Tianzhang and others will only require a short time for full adaptation."

Upon hearing this, everyone in the council hall frowned.

Even Yang Lie and the members of the ninth squad looked a bit surprised.

Lang Yun thought to himself, "Although Su Yu has enough strength and ruthless methods, what is this about letting Yang Lie and the others take over management? Doesn't he know we're already extremely short of combat personnel now?"

**Chapter 160: Chapter 104: Subduing Everyone, Reorganizing the Hunting Team, Winning People's Hearts (10,000 More Subscriptions Needed)\_2**

Yes, although it is indeed as Su Yu said, Yang Lie and others are very suitable to become the new managers.

Yang Lie also realized at this moment that Su Yu's move was inappropriate.

Immediately, Yang Lie wanted to stand up and inform Su Yu of this point.

But he was preempted by someone else.

Only to see, Zhang Xiao said: "Administrator, the Sanctuary now has only five hunting teams left, and only three have combat capability, including Yang Lie's Ninth team."

"Originally, the hunting harvest in this period would have been very little, and now if Yang Lie and others are responsible for managing the Sanctuary, the Sanctuary's hunting activities will be greatly impacted."

"Even if we recruit refugees, in the short term, the hunting teams can't maintain the balance of resources in the Sanctuary."

Although Zhang Xiao did not explicitly say that Su Yu's way of doing things was wrong, every point was rebutting Su Yu's proposal.

Su Yu nodded, unconcerned.

Su Yu continued, "The shortage of combat personnel in the hunting teams, I have a solution, no need to recruit refugees."

As soon as these words came out, everyone looked at Su Yu with curious eyes.

Then, they only saw Su Yu controlling the mechanical tentacle behind him to stand up from his chair.

"In the Sanctuary, there are many combat personnel who are unable to fight due to injuries and disabilities, at least a hundred of them, and currently the number of guards is relatively intact, and a hundred of them can be converted to join the hunting teams."

How to replenish disabled combat personnel?

Zhang Xiao just wanted to refute.

But he quickly thought of Su Yu's identity as a Mechanic, connecting it to the decision Su Yu made, it was obvious he was not a reckless person.

He immediately realized something, and his whole demeanor became a bit excited.

"Administrator, you... do you mean..."

Apart from Zhang Xiao, the people in the conference hall did not think of anything, instead, they looked at the excited Zhang Xiao with some confusion.

Su Yu nodded and looked at everyone, saying, "That's right, just as you thought, I can create prosthetics for the disabled personnel that do not affect combat."

"Furthermore, restore their combat abilities." As soon as these words came out, everyone looked at Su Yu with delight.

It should be known, in this Ruins Star wilderness, disability is an extremely terrifying thing, how many combat personnel have been able to only slowly die due to their disabilities.

Among the hunting teams present, who does not have a few disabled members at hand?

And Zhang Xiao was even more excited, he was originally a three-star top Hunting Team Leader, known in the Sanctuary for having the potential to break through to a four-star Transcendent.

It was just a pity, due to hunting, both his hands were cut off, and now Su Yu could provide him with prosthetics.

Allowing him, a disabled person who could only wait for death in the Sanctuary, to regain combat abilities!

How could this not make Zhang Xiao excited?

Lang Yun and Hu Wen were equally delighted, their Wolf Pack and Shan Lan Team members, even themselves, who could guarantee not to be injured or even disabled during hunting.

And now in the Sanctuary, there was an added Mechanic who could create prosthetics!

This meant that they essentially gained a second life!

Su Yu observed everyone's excitement and took the opportunity to continue, "The prosthetics of the former Administrator were repaired by me. Although currently limited by material scarcity, I cannot create prosthetic limbs like that of the Administrator."

"But in the future, when the Sanctuary collects enough materials, the strength of prosthetics I can create will definitely not be inferior to the state of the Administrator's prosthetics."

"By then, if you cannot break through on the path of the Transcendent, you can also enhance yourselves by replacing prosthetics!"

Hearing Su Yu's words, although everyone knew it was just painting a rosy picture, they couldn't help but breathe heavily.

Lang Yun spoke directly at this moment.

"Administrator, please instruct us on what to do."

"We will definitely comply."

Zhang Xiao was also unable to suppress his excitement.

After losing both arms, even if others in the Sanctuary did not mention it openly, they treated him as a useless person behind his back.

"Alright, as this is the case, Wolf Pack and Shan Lan Team Leaders, listen to my orders." Su Yu said calmly.

His tone was extremely composed, but at this moment, in the entire conference hall, no one dared not to listen.

"The hunting teams will be reorganized into three teams, with two teams respectively comprising the original Shan Lan and Wolf Pack teams along with the recovered disabled combat personnel."

"The first Wolf Pack team will still be led by Captain Lang Yun, the second Shan Lan team will also continue to be led by Captain Hu Wen. The combat personnel in both teams will expand to a hundred people."

In Su Yu's view, the hunting teams formed by the original ten small squads of the Sanctuary were completely unreasonable.

Although fewer people in the teams made management easier for the Sanctuary, the same hunting yields would be low.

And with a hundred combat personnel in the hunting teams, Su Yu gained this experience from the previous Night Slayer Team, a hundred-member hunting team would not attract too strong Radiation Beast swarms.

It could also increase their hunting yields.

"Yes!"

Lang Yun and Hu Wen exchanged a glance and saw the joy in each other's eyes.

Although the hunting teams were reorganized, the two teams were not broken up, instead, their authority increased.

At this moment, Su Yu continued.

"Zhang Xiao, listen to my order."

"Count the number of disabled personnel in the Sanctuary, and inform them that the Sanctuary can create prosthetics for them, but prosthetics are not free, they need to be repaid in the form of future contributions. In addition, Zhang Xiao will be the leader of the third hunting team, its members comprising the original guard team and the disabled combat personnel."

"Regarding disabled combat personnel, the third team can be prioritized in selection."

Su Yu was relatively satisfied with Zhang Xiao, with Zhang Xiao's three-star top strength, if paired with suitable prosthetics, he would be a figure second only to the two four-star team leaders in the Sanctuary.
