Chapter 161: Chapter 104: Subduing Everyone, Reorganizing the Hunting Team, Winning People's Hearts (Requesting for 10,000 More Subscriptions)_3

Add the rich battle experience, naturally making him the candidate for the leader of the third hunting team.

As for Yang Lie's ninth squad, Su Yu understandably had some personal motives. Compared to hunting, obviously managing the sanctuary was safer and more rewarding.

Moreover, in Su Yu's view, such an important matter like managing the sanctuary should be entrusted to familiar and trustworthy people like Yang Lie and the ninth squad.

"Yes, Administrator!" Zhang Xiao's tone was extremely excited.

However, despite the excitement, Zhang Xiao still had some doubts.

He asked, "Administrator, if the security team joins the hunting team, what will happen to the daily defense of the sanctuary?"

Su Yu calmly replied, "For the daily defense of the sanctuary, Captain Bai Hong and a security team of over ten people are sufficient for the internal security, and as for guarding the sanctuary, I alone am enough."

In Su Yu's view, compared to the intelligent automated cavalry that needed control, these combat personnel in the sanctuary were more suited for hunting in the wilderness to gather ore and other valuable resources for him.

Moreover, defending the sanctuary did not require manpower. Once he manufactured hundreds of automated cavalry, their intersecting firepower would be enough to guard the entire sanctuary.

"Additionally, Captain Zhang Xiao, by tomorrow noon, complete the statistics of all the injured and disabled personnel in the sanctuary, and bring them to the ninth squad's base."

"Furthermore..."

Su Yu issued order after order to everyone.

Everyone shifted from initially underestimating Su Yu's governance of the sanctuary to deeply admiring him.

They found that every order from Su Yu was the optimal solution for the current state of the sanctuary.

Clearly, although Su Yu was just a young man, his ability to handle matters was as seasoned and skilled as the former administrator.

As Su Yu was finishing giving the last order.

Su Yu let out a long sigh.

In fact, Su Yu was not adept at handling sanctuary affairs; he was just making some adjustments based on the instructions left by the former administrator.

Except for the artificial body transformation and the restructuring of the hunting team.

The rest were just imitating the methods of the former administrator.

In the council hall, upon hearing all the orders issued by Su Yu, everyone responded, "Yes, we will do our utmost to complete the task given by the Administrator."

Subsequently, they all left the council hall.

They were going forward to carry out drastic reforms of the now faltering sanctuary as instructed by Su Yu.

Not long after everyone left.

Bai Hong returned.

At this time, Bai Hong was covered in blood.

Upon seeing Su Yu, Bai Hong knelt on one knee.

"Mission accomplished, I have dealt with Liu Tianzhang's relatives and all closely related associates as instructed."

Su Yu nodded, as this was naturally his order. Once started, it was necessary to eradicate the problem at the roots.

To avoid future complications.

"Furthermore, the three types of automated cavalry played a significant role in this operation for the Administrator."

The twenty automated cavalry of three models brought by Su Yu were taken by Bai Hong to hunt down Liu Tianzhang's associates to test their combat capabilities.

Su Yu also obtained combat data of the three types of cavalry based on Bai Hong's feedback and recorded videos.

"Good, Captain Bai Hong, your work satisfies me." Su Yu reviewed the combat data of the three types of cavalry and found that they indeed possessed the formidable abilities he had envisioned.

"These twenty cavalry are entrusted to Captain Bai Hong for use, responsible for maintaining the internal security of the sanctuary."

For Su Yu, the cavalry could be used by others with his permission.

But it was only usage rights, as the internal programs of the cavalry had already been set, ensuring they would not harm Su Yu, just like the artificial bodies being prepared for disabled combatants; any anomaly could be immediately controlled by Su Yu.

When Su Yu needed to use the cavalry or during wartime, he could also recall them at any time.

Assigning these twenty cavalry to Bai Hong, they could more stably maintain the sanctuary's security without requiring Su Yu to personally oversee it. What Su Yu wanted was to use the resources of the entire sanctuary to develop himself, not to act as a nanny for it.

Hearing this, Bai Hong was momentarily stunned; the demonstrated capabilities of the cavalry were each of two-star top level.

Twenty combined formed a formidable force in the entire sanctuary.

Immediately, Bai Hong promised, "I will assuredly safeguard the sanctuary for the Administrator."

Su Yu nodded, and after explaining some precautions to Bai Hong,

he returned to the ninth squad's base.

Yang Lie and the members of the ninth squad had already been waiting there for Su Yu.

Seeing Su Yu return, Yang Lie immediately wanted to express his gratitude to Su Yu but didn't know how to start.

Calling Su Yu "Little Brother Su" didn't seem quite appropriate anymore.

After hesitating for a moment, Yang Lie finally spoke, "Administrator..."

However, he saw Su Yu wave his hand.

"Uncle Yang, you don't need to do that. When I was just a repair shop technician, you took great care of me."

"Especially during the time after my teacher's death, when I myself hadn't awakened any transcendent abilities."

Su Yu knew Yang Lie and the ninth squad were very grateful to him, but in Su Yu's view, if Yang Lie hadn't supported him during his most powerless time, he might not have survived until the emergence of his transfer panel.

"Besides, having Uncle Yang in charge of the management position is not merely due to personal motives." As Su Yu spoke here, he paused and looked up at the now completely dark sky.

As if through the deep black night sky, he could see the brilliant stars.

"Shelter No. 73 is just a starting point for me; I am destined not to stay long at the sanctuary. And when I leave the sanctuary, I need someone trustworthy to guard the sanctuary as a stronghold." After speaking, Su Yu looked at Yang Lie.

Yang Lie saw the seriousness in Su Yu's eyes.

"Fine, then I will guard this stronghold for Little Brother Su! Haha!"

Su Yu returned alone to his repair shop.

More than a month had passed, and by now, the door of the repair shop was covered in dust.

Su Yu pushed open the door; he had been staying at the ninth squad's base all this time and hadn't returned here. At this moment, most of the furniture in the repair shop was layered with thick dust.

And now, after dealing with the Nightshade, the Sanctuary was officially under Su Yu's control.

"Nuonuo, tidy up a bit, please."

Su Yu said to Nuonuo, whose size had now increased several times over.

Nuonuo cautiously entered the repair shop and began using its numerous mechanical arms to clean the dust inside.

After Nuonuo finished cleaning, Su Yu lay on the bed to rest.

"Now that the Sanctuary is completely under my control, and after I craft basic prosthetics for those injured individuals tomorrow, the entire Sanctuary can begin a virtuous cycle."

"With the manpower of the entire Sanctuary, it shouldn't take too long to gather enough materials to create small intelligent chip devices," Su Yu thought while lying on the bed, contemplating the next steps.

"The Sanctuary originally had limited accumulated materials and mechanical creations, and after my multiple exchanges and usage, we've nearly exhausted them. But it doesn't matter; collecting these materials won't take much time."

"It's just that Ghost Tribe..."

Su Yu recalled the Ghost Wolf Riders he eradicated after killing Li He. Though he didn't find that wolf rider squad very strong, Su Yu knew that they were just a negligible squad of the Ghost Tribe, and such Ghost Wolf Riders numbered in the thousands in the Ghost Tribe.

This alone was enough to show the powerful strength of the Ghost Tribe.

"Though no traces were left after the huge explosion of the cavalry, and luckily, during the pursuit, no one was encountered or saw it, at least for a few months; the Ghost Tribe won't find the truth."

"However, the Sanctuary, the Ghost Tribe, and several nearby small settlements are all on the edge of the Steel Jungle. With the expansion of the Sanctuary and my improving strength, it's only a matter of time before we encounter these forces. I need to prepare in advance."

"And there's also that place that hasn't been explored yet..."

After resting for a while, Su Yu stood up from the bed and took out the personal terminal of Dawn City left by the administrator.

He opened the map recorded in it, which contained detailed map data of almost 80% of Ruins Star, excluding the three major scenic areas. Su Yu also opened a metal disc as he followed along.

It was the creation of the Giant God Soldier Army that Su Yu had acquired when he obtained his transfer panel!

With the opening of the metal disc, an electronic prompt sounded.

[Recruit, congratulations on passing the final assessment and becoming a proud member of the Giant God Soldier Army! I am your intelligent navigation device. Please proceed by placing me on your vehicle system, and I will guide you to report to the army!]

[According to the marching speed of the new recruits of the Giant God Soldier Army, it is estimated that from the current position, it requires a journey of thirteen thousand seven hundred and sixty-two kilometers, which will take approximately eleven days and seven hours. Please confirm whether to start navigation—]

Su Yu looked at the light and shadow projected from the metal disc and nodded this time, gently saying, "Confirm, start navigation!"

Immediately, the light and shadow projected a red route.

Su Yu compared this red route with the map left by the administrator.

Soon, Su Yu found the end of the red route, which was the stationing area of the Giant God Soldier Army from a thousand years ago!

"The Giant God Soldier Army is actually on the other side of the Steel Jungle? Very close to the Steel Jungle, no, or perhaps the base of the Giant God Soldier Army is right in the Steel Jungle, just at the edge." Su Yu was somewhat astonished.

Regarding the base of the Giant God Soldier Army and the splendid technology left from the Empire's great expedition a thousand years ago, Su Yu was bound to seek it. However, he planned to wait until he couldn't further enhance his strength in the Sanctuary.

"Crossing through the Steel Jungle is a fool's dream, but I could circumvent along the edge of the Steel Jungle, to the other side, and then search along the edge on the other side for the ruins of the Giant God Soldier Army."

Su Yu made marks on the map left by the administrator, and as for that disc symbolizing the qualification of a recruit for the Giant God Soldier Army, he carefully stored it away, in case it might be useful later when heading to the Giant God Soldier Army.

"But, if I want to advance along the edge of the Steel Jungle, I'll certainly pass through two medium settlements and one large settlement..."

"And as for small settlements, there are even more."

Su Yu traced the map of Dawn City left by the administrator, comparing it with the current map of the Sanctuary. Although it was data from a century ago, the locations of the settlements were relatively accurate.

"Leaving aside other settlements for the time being, the position of the Ghost Tribe happens to be on the nearest path." Su Yu frowned, "Even if I choose to circumvent it, I'd have to pass through other medium settlements, and the distance would increase significantly."

Ruins Star has three major forbidden zones: Steel Jungle, Radiation Ghost City, and Land of Fallen.

The Land of Fallen is too far from the Sanctuary, so let's not mention it for now.

But the other two forbidden zones, Radiation Ghost City and Steel Jungle, are very close to the Ghost Tribe, which survives at the intersection of these two forbidden zones, hence managing to survive.

Chapter 162: Chapter 105: The Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is this guy a Mechanic?

After bidding farewell to Yang Lie and the other members of the ninth squad,

Su Yu returned alone to his repair shop.

More than a month had passed, and by now, the door of the repair shop was covered in dust.

Su Yu pushed open the door; he had been staying at the ninth squad's base all this time and hadn't returned here. At this moment, most of the furniture in the repair shop was layered with thick dust.

And now, after dealing with the Nightshade, the Sanctuary was officially under Su Yu's control.

"Nuonuo, tidy up a bit, please."

Su Yu said to Nuonuo, whose size had now increased several times over.

Nuonuo cautiously entered the repair shop and began using its numerous mechanical arms to clean the dust inside.

After Nuonuo finished cleaning, Su Yu lay on the bed to rest.

"Now that the Sanctuary is completely under my control, and after I craft basic prosthetics for those injured individuals tomorrow, the entire Sanctuary can begin a virtuous cycle."

"With the manpower of the entire Sanctuary, it shouldn't take too long to gather enough materials to create small intelligent chip devices," Su Yu thought while lying on the bed, contemplating the next steps.

"The Sanctuary originally had limited accumulated materials and mechanical creations, and after my multiple exchanges and usage, we've nearly exhausted them. But it doesn't matter; collecting these materials won't take much time."

Infinite Job Transfers Starting from Mechanic #Chapter 163 - 105: Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is This Really a Mechanic?_2 - Read Infinite Job Transfers Starting from Mechanic Chapter 163 - 105: Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is This Really a Mechanic?_2

Chapter 163: Chapter 105: Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is This Really a Mechanic?_2

Otherwise, with the Ghost Tribe's insane modus operandi and the twisted, polluting power of Ghost Energy, they would've been exterminated by major settlements long ago.

But precisely because of this, Su Yu couldn't bypass the Ghost Tribe, who were wedged between the two forbidden zones.

"It seems like we'll have to confront the Ghost Tribe sooner or later. In that case, small-scale chip manufacturing equipment must be built as soon as possible, and the mass production of rangers should be put on the agenda."

Although the Ghost Tribe has a notorious reputation in this region at the edge of the Steel Jungle.

For Su Yu, though, the Sanctuary wouldn't have to confront the Ghost Tribe within months, providing enough time for Su Yu to amass a great army of rangers!

Su Yu put away his personal terminal and then lay down on the bed, sinking into a deep sleep. Because of the Night Slayer, Su Yu hadn't been able to rest properly for a long time.

...

Soon, it was early the next morning.

Su Yu was gently woken by Nuonuo's mechanical tentacle.

"Master, someone is looking for you outside the repair shop, saying they have something to report."

Upon hearing this, Su Yu got up immediately, washed, and opened the repair shop's door.

There stood two people outside. One of them was Zhang Xiao, whom Su Yu had appointed as the third Hunting Captain the day before. The other was an elderly man Su Yu also recognized as the permanent mechanic previously coerced by the Night Slayer Team.

His name was Old Mo.

Old Mo's condition was much worse than before. Not only was he in a poor mental state, but his left arm was also gone, leaving only one hand.

It's important to note that when Su Yu was still a mechanic, Old Mo was the top mechanic in the Sanctuary, but now he had been drained to such a state by the Night Slayer.

"If I hadn't refused the Night Slayer back then, I wouldn't be much better off than Old Mo now; Li He's Meditation Technique from the unknown entity was still very strange."

Seeing Old Mo's miserable state, Su Yu felt a mix of emotions in his heart but showed none on his face.

At this moment, Zhang Xiao gave Old Mo a glance.

Old Mo immediately handed Su Yu a document with his remaining right hand.

"Lord Administrator, here is the data of all injured combat personnel within the Sanctuary, totaling one hundred and twenty-three people."

"There are forty-seven Transcendents among them, sixteen are two-star Transcendents, and as for three-star Transcendents, there's only me and the deputy captain of the Mountain Wolf Pack, totaling three."

Zhang Xiao said respectfully. Although both his hands were broken, after serving in the Sanctuary's management for so long, he was still able to efficiently compile all the data on disabled combatants overnight.

Upon hearing Zhang Xiao's report, Su Yu began reviewing the document in his hand, one item at a time.

After skimming through the data, Su Yu was a bit surprised by the number of disabled Transcendents in the Sanctuary.

But quickly, Su Yu realized that it wasn't surprising. Those who remained in the Sanctuary after becoming disabled must either have rich combat experience and significant contributions or be Transcendents.

In short, the disabled combat personnel who remained were certainly not incompetent.

Su Yu nodded in satisfaction. These hundred-plus people were a fresh force, enough to compensate for the loss caused by the disappearance of the Night Slayer Team. In fact, once the Sanctuary's cybernetic conversion setup is operational, the combat power contributed by these disabled personnel might be even stronger than before.

"You did well."

"I will do my best to fulfill the Administrator's instructions," Zhang Xiao replied, "but I have one more thing to report."

"Go ahead."

"Well, during the statistical analysis..." Zhang Xiao began to answer but was interrupted by Old Mo beside him.

At this point, Old Mo raised his hand to Zhang Xiao and said, "Captain Zhang Xiao, let me report this matter to the Administrator myself, to show more sincerity."

"Lord Administrator, you should recognize me. I'm Old Mo, the permanent mechanic of the former Night Slayer Team." As Old Mo spoke, he fell to his knees, "The Night Slayer Team forced me to work as their mechanic, and I couldn't refuse, so I thought about joining and looking for a chance to leave later."

"As a result, once I joined the Night Slayer Team, it was as if I went mad, with only fear of Li He in my heart, desperately creating mechanical equipment for the Night Slayer, completely ignoring myself." Old Mo's voice was filled with deep-seated fear.

"Thanks to you, the Administrator, for annihilating the Night Slayer, I woke up from that controlled state, but my left hand was disabled due to the creation of equipment." Saying this, Old Mo bowed deeply in front of Su Yu.

Old Mo spoke with extreme sincerity, saying, "I know that my past actions, even though I was controlled, were a betrayal to the Sanctuary. Therefore, I surrendered to Captain Bai Hong during the cleanup of those collaborating with the Night Slayer, considering my special situation..."

"With Captain Zhang Xiao also counting the wounded in the Sanctuary, I came today to express my gratitude and apology to the Administrator."

"I will follow the Administrator's orders."

Upon hearing this, Su Yu was not surprised. He knew that Old Mo was part of the Night Slayer and was aware that Old Mo was controlled by Li He's Meditation Technique.

To Su Yu's mind, Old Mo was already luckier than most of the Night Slayer members. After all, those members who left the city with Li He had long since become Ghost Energy mutants, turning into corpses in the wilderness.

Infinite Job Transfers Starting from Mechanic #Chapter 164 - 105: Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is this really a mechanic? _3 - Read Infinite Job Transfers Starting from Mechanic Chapter 164 - 105: Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is this really a mechanic? _3

Chapter 164: Chapter 105: Ruins of the Giant God Soldier Army, Zhang Xiao's Shock! Is this really a mechanic? _3

"Well, Old Mo, since you didn't voluntarily join the Night Kill, and now that the Night Kill has been destroyed, there's no need to hold you accountable for any wrongdoing." Su Yu wasn't particularly concerned about Old Mo's situation, but Old Mo himself, along with the other mechanics in the Sanctuary, could all be utilized.

"I have something for you to do, consider it redemption. You need to compile a list of all mechanics in the Sanctuary and gather them to form a Mechanical Maintenance Department. From now on, the routine maintenance and repair of the mechanical equipment for the three major hunting teams in the Sanctuary will be handled by the Mechanical Maintenance Department."

"By the way, once this task is completed, your lost left hand could be replaced with a prosthetic."

At this moment, Old Mo, kneeling on the ground, showed a hint of excitement in his eyes.

For him, Su Yu, who had rescued him from the control of Night Kill, already held a very high position in his heart.

Moreover, Old Mo himself is an incredibly obsessed mechanic when it comes to mechanical technology; otherwise, he couldn't become one of the most outstanding in the Sanctuary.

In Old Mo's eyes, the extraordinary mechanical technology mastered by Su Yu was a lifelong obsession for him.

"I'll make it happen right away, I know all the mechanics in the Sanctuary!" With that, Old Mo stood up and left.

Meanwhile, Su Yu turned his gaze to Zhang Xiao, who had yet to leave.

Zhang Xiao looked hesitant at this moment. He had been without arms for several years, and now that he finally saw hope, he just wanted to replace his prosthetics soon to restore his combat capabilities.

Although Su Yu had already agreed to provide prosthetics for the wounded warriors in the Sanctuary,

Zhang Xiao didn't know how to bring it up.

Su Yu saw through Zhang Xiao's thoughts and spoke: "Captain Zhang Xiao, just stand where you are without moving."

"Wait a moment."

Zhang Xiao heard this, not knowing what Su Yu intended.

However, the next moment, Zhang Xiao noticed countless parts floating out of the repair shop.

Under the control of Su Yu's spiritual energy,

these parts assembled and transformed in the air, eventually forming the shape of two mechanical arms.

To Su Yu, creating such basic prosthetics did not require any tools; spiritual energy alone was enough to construct them.

Moreover, regarding the level of the prosthetics, Su Yu did not intend to upgrade them to the highest level for everyone initially; instead, he wanted them to earn it through hunting contributions.

The two mechanical arms before him, in Su Yu's view, were enough for a three-star extraordinary physical body to exert their strength, though they offered no additional benefits.

Zhang Xiao watched this scene, overwhelmed with excitement.

Once the prosthetic construction was complete, Su Yu used his spiritual energy to sever Zhang Xiao's healed arms, connect his nerves to the prosthetics, and fitted the prosthetics onto Zhang Xiao.

As the nerves connected,

Zhang Xiao's face turned pale, but his heart was filled with joy.

Finally.

He finally felt the long-lost pain coming from the stumps of his arms.

How many years had it been?

How many years since the people in the Sanctuary considered him crippled after losing his arms?

In the past, he was hailed as a potential breakthrough to four-star and even regarded as the second strongest under the top four-star manager.

He had been considered a cripple for who knows how long.

And now he could finally achieve his wish!

"I, Zhang Xiao, am no longer a cripple!"

Zhang Xiao shouted in his heart.

With his emotions surging, he broke through the barrier that had stopped him for years.

He achieved four-star status.

Then, Zhang Xiao knelt on the ground, pledging his loyalty to Su Yu.

"Master Manager, my life now belongs to you, whatever you command, Zhang Xiao will surely accomplish it!"

In Zhang Xiao's heart, there was only gratitude to Su Yu. The prosthetics crafted by Su Yu not only restored his health but also enabled him to achieve four-star status.

Su Yu nodded; in his view, the breakthrough was merely Zhang Xiao's own accumulation coinciding with a certain opportunity.

It was still early before noon.

The previously agreed time to provide prosthetics for those wounded in the Sanctuary was at noon.

Looking at the restored Zhang Xiao before him, Su Yu thought for a moment and said, "Captain Zhang Xiao, since you've broken through to four-star and equipped with prosthetics, why not test the strength of the prosthetics."

"See if it will affect combat."

The prosthetics Su Yu quickly made should be sufficient to support three-star level combat. But now that Zhang Xiao had already broken through to four-star, Su Yu thought the quickly made prosthetics might not suffice.

Zhang Xiao nodded; he also wanted to thoroughly test out the prosthetics in his hands.

"Yes, I'll go find Captains Lang Yun and Hu Wen to conduct a test."

Just then, Zhang Xiao was going to find the two four-star captains from the Mountain Ridge and Wolf Pack for sparring to test the prosthetics and his own strength.

But Su Yu stopped him.

"Captain Zhang Xiao, there's no need to find them."

"Just test here. After all, I need to see the usage of the prosthetics with my own eyes for further improvements."

Saying that, Su Yu walked over to the open space in front of the repair shop.

Zhang Xiao was stunned by this sight.

"Master Manager, should I test with your Mechanical Creation? Well, where is your Mechanical Creation?"

Zhang Xiao quickly adjusted his thoughts, recalling that Su Yu was a mental-type Transcendent and also an Extraordinary Mechanic.

But Su Yu shook his head and said, "Not with the Mechanical Creation, but with me."

Ever since the transition to being a Fighter a couple of days ago, Su Yu had been busy taking over the Sanctuary and didn't have time to upgrade. But now, to test the

prosthetics and have someone like Zhang Xiao, who just broke through to the four-star Transcendent level, assess his physical breakthrough to early four-star level strength.

And to use a four-star level Transcendent as a sparring partner to improve his own Fighter level, Su Yu naturally wouldn't miss it.

Zhang Xiao was stunned by this statement.

With you? Aren't you a mechanic?

However, the next moment, Su Yu rushed toward Zhang Xiao and swung a punch.

Zhang Xiao reflexively blocked, and immediately felt the terrifying power contained in Su Yu's punch. His face turned pale, and his heart was filled with shock beyond words.

This is a mechanic?!

Chapter 165: Chapter 106 Fighter lv max! Core Specialization: Undying Body! Change class to Mechanical Warrior!

"Bang!"

Zhang Xiao instinctively crossed his arms to block Su Yu's punch.

Su Yu did not use full force with this strike; it was only to test the strength of his prosthetic body.

But it still made the unprepared Zhang Xiao stagger back several steps.

"Isn't it said that the administrator is a spirit-type Transcendent? An Extraordinary Mechanic, so how is his physical body even stronger than mine?"

Zhang Xiao was incredulous. He hadn't participated in the operation to annihilate Nightshade and could only learn about Su Yu from the rumors in the Sanctuary.

In the eyes of most people in the Sanctuary, Su Yu's strength lay entirely with Mechanical Creation. Few knew that Su Yu's physical body was incredibly powerful!

However, even though he was visibly shocked,

Zhang Xiao instinctively began to counterattack. As a former Hunting Team Leader of the Sanctuary, Zhang Xiao's combat experience was extensive.

In an instant, the two exchanged several blows.

Yet, Zhang Xiao found it increasingly challenging and was more and more amazed during the fight.

Soon, as Su Yu landed another punch, Zhang Xiao stumbled back several more steps.

[Ding!]

[You engaged in combat with an Extraordinary Physical Body (Four-star Beginner), and you gained Professional Experience (Fighter): 3000 points!]

[Fighter Level Up! Adaptability Increased!]

[You gained 1500 Professional Experience (Fighter lv3)!]

[You gained 2000 Skill Experience (Resilient Body lv3)!]

[You gained 3000 Skill Experience (Basic Fighting Techniques lv3)!]

[...]

Su Yu noticed that, only after exchanging blows for a moment, his Fighter profession level and skills were rapidly rising!

The Fighter was a Foundation Profession with inherently low experience requirements.

Now, Su Yu was facing Zhang Xiao, who had reached a Four-star Beginner level!

The combination of the two led to Su Yu's Fighter level soaring rapidly!

"Administrator, I apologize, let's go again!"

Zhang Xiao was also slightly rebellious after being defeated. As a former Hunting Team Leader, he had now broken through to Four-star Beginner. In Zhang Xiao's view, the reason he was suppressed by Su Yu earlier was due to not yet adapting to his newly equipped prosthetic body.

Otherwise, he would not have been so embarrassed.

"Alright!"

Su Yu was also somewhat excited, not just because of the Fighter level-up but because he felt a visceral thrill in this hand-to-hand combat.

The two engaged in intense combat, their moves perilous.

Su Yu found the fight increasingly exhilarating, and with the Fighter level advancing, his physical strength was slowly but steadily rising, already close to a Four-star Intermediate level.

Several Fighter profession skills were also steadily leveling up.

However, from Zhang Xiao's perspective, Su Yu seemed to be growing stronger.

Initially, Su Yu appeared to Zhang Xiao as someone with a physical body strength of Four-star Beginner but lacking in combat experience.

"I can understand the administrator lacking close combat experience, but why does he keep getting stronger?"

Zhang Xiao found it hard to believe. If at first, he didn't react, the second exchange was when he used his experience to seize the initiative, only to be bewildered by Su Yu's quickly improving combat skills.

"Could it be that the administrator also has extraordinary talent in Extraordinary Physical Body?"

Soon, Zhang Xiao could no longer maintain any advantage.

His slight arrogance after breaking through to Four-star Beginner vanished as Su Yu continued to overpower him.

"The administrator is like the Dead Silence Wilderness at night, impossible to decipher." Zhang Xiao felt a growing fear towards the increasingly powerful Su Yu.

This fear, mixed with gratitude for the prosthetic body that Su Yu had crafted for him, transformed into an awe.

Deep awe.

"Exhilarating." Su Yu thought to himself, experiencing a thrill from the physical combat that surpassed controlling Mechanical Creations.

With Su Yu's final punch, Zhang Xiao could no longer hold on and stumbled to the ground.

At the same time, Su Yu's transfer panel chimed.

[Ding!]

[You defeated an Extraordinary Physical Body (Four-star Beginner), gaining 30000 Professional Experience (Fighter)!]

[Fighter Level Up! Adaptability Increased!]

[You gained 30000 Professional Experience (Fighter lv max)!]

[...]

In Su Yu's expectant gaze, the Fighter level quickly reached its maximum! His physical ability also seemed to break through a certain limit, becoming stronger.

Moreover, several Fighter skills, except for General Weapon Knowledge, also reached their maximum levels!

[Congratulations, you have upgraded a core ability to the maximum level. Drawing a Core Specialization based on your professional core... Drawing completed!]

"A Fighter's Core Specialization, should be an active effect as expected."

Having switched professions many times, Su Yu already noticed a pattern.

Specializations drawn from maxed out ordinary skills were passive effects, while only maxed out core abilities would provide an active Core Specialization!

Ignoring the passive specializations drawn from maxed-out professional skills,

Su Yu, filled with anticipation, focused on the bottom of the transfer interface. After a moment of tense waiting, a new message lit up in his slightly anxious eyes!

[Ding!]

[Based on your maxed-out core ability (Adaptability), you have obtained the Core Specialization (Undying Body).]

Chapter 166: Chapter 106 Fighter lv max! Core Specialization: Undying Body! Class Change to Mechanical Warrior!_2

[Core Specialization: Undying Body]

[Description: Every true Fighter is a strong individual who maintains steadfast will and astonishing combat power in any environment. Though they are mere mortals, they can use honed skills to shock the Transcendent beings. You are the best among them, having realized your core specialization - the Undying Body amidst countless dangerous environments!]

[Activate Undying Body to greatly enhance environmental adaptability, increase resistance to abnormal states (including but not limited to Ghost Energy, Radiation,

Virus, ...), by one hundred percent! Self-healing abilities increased by one hundred percent! Duration: One day. Cooldown period: one month.]

"This ability is outstanding!"

Su Yu's eyes showed some delight. The Fighter's adaptability itself offers a certain degree of resistance amplification to external hazardous environments, and now, with the activation of Undying Body, adaptability and resistance to abnormal states can be doubled.

If, during the fierce battle against Li He before, Su Yu had possessed this ability, merely activating the Undying Body would likely have allowed him to face the Ghost Energy Erosion without suffering any harm.

"Alright, Captain Zhang Xiao, I have understood the strength of the prosthetics. You should go back and rest first." However, Su Yu quickly put away his delight and let Zhang Xiao go back to rest.

"Yes! Sir!" Zhang Xiao nodded and said respectfully.

He now both respects and fears Su Yu.

After Zhang Xiao left, Su Yu immediately focused his attention on the Profession Panel.

"The Fighter is already at max level, and the new Foundation Professions will definitely unlock new Extraordinary Professions!"

Soon, lines of small text appeared on the Profession Panel.

[Congratulations Host, as the Fighter level is maxed, you can undertake a new profession.]

[Conditions met for the Host, new career paths are now open!]

With these two prompt messages appearing.

Su Yu's Profession Panel showed three career choices in the job column!

[Available Career Paths: 1st Tier Profession - Mechanical Warrior]

[Mechanic (Primary) + Fighter + Basic Mechanical Manufacturing + General Weapon Knowledge + Basic Fighting Techniques lv max = Mechanical Warrior]

[Description: An anomaly among Extraordinary Mechanics, skilled in melee weapon manufacturing, possessing unique amplification effects on their Mechanical Creations, excelling at close combat, proficient in close-quarter mechanical combat, possessing an

extraordinarily strong physique, adapting to various battlefields, king of special operations, can enhance combat prowess with Spiritual Energy.]

Upon seeing this profession description.

Su Yu's eyes lit up.

This Mechanical Warrior is too suitable for him. The Thousand-Handed Prosthetic can be considered a melee weapon, and if expected, the Mechanical Warrior's amplification should also apply to the Thousand-Handed Prosthetic.

However, Su Yu did not rush, instead continuing to look further down.

[Available Career Paths: 1st Tier Profession · Gunfighter]

[Fighter (Primary) + Gunsmith + Basic Firearms + Basic Fighting = Gunfighter]

[Description: Mastering Extraordinary Gun Skill, focusing on close-range gunfighting, bullets will curve...]

[Available Career Paths: 1st Tier Profession · Gunnery Expert]

[Gunsmith (Primary) + Fighter + Basic Firearms + Adaptability + Basic Mechanical Manufacturing = Gunnery Expert]

[Description: An Extraordinary Gunsmith with superhuman physique, yet they do not use their powerful bodies for close combat. They possess rich experience in firearm modifications, opting to enlarge weapons and calibers, using their body's maximum recoil tolerance as a transformation basis, wildly increasing muzzle caliber, serving as the battlefield's mobile firepower source!]

"Phew..."

Seeing the last two 1st Tier professions appear.

Su Yu was truly tempted.

The Gunfighter, evidently more suited for urban combat rather than wilderness operations, was put aside.

The Gunnery Expert and Mechanical Warrior both greatly tempted Su Yu.

"Switching to Gunnery Expert will undoubtedly provide me with extremely strong long-range firepower, while Mechanical Warrior would offer greater close-combat ability, and Mechanical Warrior is also a type of Mechanic."

"Both of these are very enticing."

"In that case, I choose both, since there's unlimited career switching. However, I still focus primarily on Mechanic for now!"

When Su Yu initially switched to the Mechanic Foundation Profession, he set a future development direction.

Bare-knuckle melee combat and gunfire suppression are both excellent, but only the Mechanic's Mechanical Creation army is Su Yu's favorite way of combat.

"I choose to undertake the profession..."

"Mechanical Warrior!"

[Ding!]

[Congratulations Host, successfully took the profession, the current profession is: Mechanical Warrior (lv1: 0/10000).]

[Congratulations Host, successfully awakened core ability: Heart of Steel (lv1), the exclusive ability of a Mechanical Warrior, creating a Spiritual Energy resonance with their Mechanical Creations, amplifying their physical attributes by one percent, ten percent when maxed out.]

[Basic Fighting advanced to Basic Mechanical Combat!]

[Gained Skill: Profession-level Basic Melee Mechanical Mastery Manufacturing!]

Accompanying the undertaking of the Mechanical Warrior profession, Su Yu's Spiritual Energy also experienced growth! Physical body strength grew slightly once more.

Su Yu called up the Profession Panel, gazing at his newly refreshed attributes, delight appeared in his eyes.

[Name: Su Yu]

[Professions: Mechanic max, Gunsmith max, Battlefield Mechanic lv max, Wilderness Hunter lv max, Fighter lv max, Mechanical Warrior lv1]

[Current Profession: Mechanical Warrior]

[Skills: ...]

[Core Abilities: ...]

[Extraordinary Level]

[Spiritual Power Star Level: Three-star Top-Level]

[Physical Body Star Level: Four-star Intermediate]

Chapter 167: Chapter 106 Fighter Iv max! Core Specialization: Undying Body! Class Change to Mechanical Warrior!_3

Looking at the system panel where his spiritual power had been upgraded to a three-star top level, and his physique to a four-star intermediate level, Su Yu's eyes flashed with a trace of joy.

"Although a Mechanical Warrior is a combat profession, it also provides a bonus to the manufacturing of melee mechanical weapons."

"Moreover, repairing or manufacturing melee weapons as a Mechanical Warrior also earns experience points." Su Yu felt the new Mechanical Warrior profession and quickly understood its abilities and how to gain experience.

Then, Su Yu revealed a slight smile, thinking to himself: "And prosthetics also count as a type of melee mechanic!"

"In this way, I only need to forge prosthetics for the injured combat personnel in the Sanctuary to quickly level up the Mechanical Warrior!"

"Once the Mechanical Warrior reaches max level, I assume I can unlock a second-tier profession."

Su Yu had already had the job transfer panel for some time, and he naturally had some experience.

In Su Yu's view, both the Battlefield Mechanic and the Mechanical Warrior belong to a type of Extraordinary Mechanic, so the possibility of obtaining a second-tier profession by combining these two is greater than that of a Wilderness Hunter.

"Moreover, this newly acquired core ability seems quite interesting."

Su Yu quickly discovered that his new core ability, named Heart of Steel, could amplify his mechanical creations.

At this moment, Su Yu called for Nuonuo.

As Nuonuo approached Su Yu, she immediately felt a unique and special Spiritual Energy Field flooding into her body.

"Master, what is this?"

"It feels so comfortable! Nuonuo feels a bit more strength in her body! (>d<)"

Hearing Nuonuo's words, Su Yu smiled and patted Nuonuo, whose head was now almost level with his own.

"As expected! As expected! The ability of the Mechanical Warrior doesn't limit to melee mechanics, but any mechanical creation I forge can get an amplification effect!" Su Yu was overjoyed, "The Mechanical Warrior, this job transfer was definitely the right choice!"

"If it were just a Mechanical Warrior, this ability wouldn't be strong, because the Mechanical Warrior isn't good at mass-producing mechanical creations."

"But for someone like me, who is already a Battlefield Mechanic, this ability is simply divine! All mechanical creations can benefit from one percent of my body's attributes, and at full core ability level, the amplification is ten percent."

"With the continuous improvement of my body level, this ability can also enhance accordingly. Since Nuonuo can get the amplification, it means cavalry can as well."

"The combination of Mechanical Warrior and Battlefield Mechanic, these two professions, is like a qualitative change!"

Su Yu quickly calmed down and then instructed Nuonuo to move away from the repair shop to see how far the power amplification would disappear.

Until Nuonuo was fifty meters away from Su Yu, the amplification effect of the Heart of Steel vanished.

"As expected, there's a range limitation, but with further level-ups, the range should increase. Even so, this ability is too powerful!"

Su Yu lowered his head, pondering how to maximize the effect of the Heart of Steel.

"Mass-producing cavalry, if the number of cavalry reaches hundreds, this ability can fully forge a powerful iron army."

"And at the same time, I should enhance my physique level, as long as my physique level is high enough, even cavalry made from the most basic materials can become terrifying under this amplification!"

Getting straight to work.

Nuonuo hadn't been idle during this period; she spent all last night crafting components for the cavalry, and the tools from Squad Nine had long been delivered by Yang Lie and others.

Now, the number of cavalry components is enough for Su Yu to forge the remaining eighty cavalry.

With the circulation of Su Yu's Spiritual Energy, a burst stronger than before instantly enveloped the entire repair shop.

"Let's begin crafting!"

With a single thought from Su Yu, countless parts floated up, assembling themselves under the control of Spiritual Energy.

Nuonuo also assisted timely from the side, using tools to help Su Yu craft.

Clang.

In the open space in front of the repair shop, there was only the sound of mechanical collision.

Soon, eighty brand-new cavalry were crafted by Su Yu.

Considering the defense of the Sanctuary, only thirty of these eighty cavalry were melee types, with the rest being ranged types.

Anyway, for Su Yu, assembling the cavalry had become extremely straightforward. As long as the core chip is intact, these cavalry can be modified or remanufactured at any time.

With the successful crafting of the cavalry, the level of the Mechanical Warrior also increased by two levels.

Although cavalry don't count as melee weapons, the chainsaws equipped on the cavalry do count as melee weapons.

Feeling both his spiritual power and physique boosted once again.

Su Yu then turned his gaze to the five chips floating in the air, controlled by Spiritual Energy.

"These five Intelligent Chips are of intermediate quality; it would be quite a waste to use them to mass-produce basic cavalry."

"Better to forge them into Elite Models!"

With this thought, Su Yu said to Nuonuo at his side: "Nuonuo, give me a hand!"

"(>д<)"

"Okay, Master!"

With the breakthrough in Spiritual Energy and the new Mechanical Warrior profession enhancement, Su Yu's ability to craft melee weapons reached a new level.

Therefore, Su Yu planned to forge all five cavalry into melee Elite Models.

On one hand, with Su Yu's current technology, crafting melee weapons became more effortless.

On the other hand, because of Su Yu's Heart of Steel, the range is only fifty meters, it's best to have the melee elite cavalry protect himself to better receive the Heart of Steel's amplification, and the Heart of Steel amplification fundamentally just increases the hardness and resilience of the cavalry, mainly benefiting melee, with no significant boost for ranged weapons.

For the crafting of these five cavalry, Su Yu used all the precious materials left over from crafting the Thousand-Handed Prosthetic.

Su Yu intended to craft an iron line of defense with these five cavalry!

Chapter 168: Chapter 107: Defender, Transcendent Spirit 4-Star Junior, The Shock of Sanctuary Residents!

"Since it's a close combat model, to maximize the amplification effect of the Heart of Steel, it's entirely possible to abandon long-range attack weapons and replace all the available slots with close combat weapons. Moreover, the effect of the Heart of Steel is merely to allow mechanical creations to gain enhancements from my own physical attributes."

"This enhancement is more applied to the mechanical creation itself, so this special model of cavalry can be equipped with a steel shield."

"The shields can fully integrate and overlap with each other. A combination of five elite model cavalry can build a full-angle defense without any blind spots."

Su Yu quickly constructed a design plan for the elite model cavalry in his mind.

Then, the Spiritual Energy operated, and a large amount of material was sent into the furnace, deforming and refining under the control of Spiritual Energy.

For Su Yu at this moment, crafting cavalry, even elite models, has become extremely simple.

Soon after, five brand-new elite model cavalry appeared before Su Yu.

With the completion of the five elite model cavalry, a system prompt sounded in Su Yu's ear.

[Ding!]

[You have successfully crafted close combat weapon: Chain Saw Blade, and gained 1000 points of professional experience (Mechanical Warrior)!]

[You have successfully crafted close combat weapon: Steel Shield, and gained 1000 points of professional experience (Mechanical Warrior)!]

[...]

[You have gained 2000 points of professional experience (Mechanical Warrior lv5)!]

[Mechanical Warrior level increased! Heart of Steel synchronously enhanced!]

[...]

With the increase of the Mechanical Warrior level, Su Yu felt his own spiritual power and physical attributes simultaneously rising.

Su Yu only felt that an invisible shackle was unlocked, and his Spiritual Energy had grown several times stronger than before!

"Four-star beginner, achieved."

Even without checking the panel data, Su Yu knew that his spiritual power had finally broken through to four stars.

Then, Su Yu turned his gaze to the five elite model cavalry aligned in front of him.

These five cavalry were designed by Su Yu with a black coating, with the Chain Saw Blades infused with Tungsten Blood Steel and Steel Shields showing a hint of crimson.

Under the embellishment of this hint of crimson, the five black cavalry had an even greater sense of heft.

Anyone with a keen eye could see that the massive Chain Saw Blade and the heavy Steel Shield were definitely not for decoration.

"These five elite model cavalry may no longer be called cavalry, whether in size or combat capability, they are incomparable to cavalry."

"How about renaming them to Defenders!"

Su Yu was somewhat satisfied; these five Defenders were more than three times larger than conventional cavalry models.

If a cluster of ten ordinary cavalry can kill a level three advanced transcendent.

Then each of these five Defenders can individually kill a general level three advanced extraordinary physical body transcendent.

The more Su Yu looked, the more delighted he felt, and the next moment, the Defender's data panel appeared in Su Yu's eyes.

[Intelligent Combat Machine-Defender]

[Maker: Su Yu]

[Grade: Special]

[Trait: Tactical Unit (When the number of Defenders reaches five, they can form a tactical unit, increasing the main brain's calculation power by thirty percent)]

[Equipment:]

[Close Combat Weapon: Chain Saw Blade · Tungsten Blood Steel Enhancement (Enhancement in tenacity, destructive power, lethality) X6]

[Close Combat Weapon: Steel Shield · Tungsten Blood Steel Enhancement (Enhanced tenacity, resistance strengthening) X2]

[Skills:]

[Steel Shield Elite Type · Tungsten Blood Steel Enhancement (Shield tenacity enhancement, hardness enhancement): Equipped with two giant shields, Steel Shields can integrate to form a semicircular steel defense barrier]

[Overall Strength Assessment: Three-star top-level-Tungsten Blood Steel enhancement]

"Moreover, these five Defenders still retain the cluster trait of cavalry, only strengthened. A tactical unit formed by the five Defenders will form an indestructible tactical defense line."

"If adding the Heart of Steel, Electromagnetic Fury, Spiritual Amplification, etc., perhaps each Defender can single-handedly face a four-star beginner transcendent."

"Even facing a four-star top-level transcendent, it can't penetrate the steel defense line formed by these five Defenders."

Then, Su Yu looked at the sky and noticed that it was not far from noon.

"I suppose Zhang Xiao has already gathered the disabled combatants of the Sanctuary."

At the moment, invisible Spiritual Energy controlled each intelligent machine on the vacant ground in front of him.

"Set off, to the Ninth Squad's station."

With a thought from Su Yu's mind.

The mechanized troop formed by eighty cavalry and five gigantic Defenders began its advance.

And Su Yu, at this moment, also donned the Thousand-Handed Prosthetic, controlling the prosthetic, walking at the center guarded by the five Defenders.

...

At this moment, the Ninth Squad's station.

The information about the change of Sanctuary's manager had also finally spread after yesterday.

The bloody means by which Su Yu immediately purged and replaced more than half of the management personnel had already caused everyone in the Sanctuary to live in fear, having unparalleled awe for Su Yu.

And at this time, Zhang Xiao gathered a large number of the Sanctuary's disabled combatants and arrived at the Ninth Squad's station.

To transport these disabled combatants and materials for prosthetic production, many of the Sanctuary residents were also mobilized and gathered on the open ground in front of the Ninth Squad's station—this was also Su Yu's deliberate instruction.

Chapter 169: Chapter 107: Defender, Transcendent Spirit 4-Star Junior, The Shock of Sanctuary Residents!_2

Most of the residents of the Sanctuary are not aware of the changes in the Shelter. In their view, living under the protection of the previous managers, growing fast-maturing food and working for the Sanctuary, is their only duty.

But now, the old manager is dead, and the new manager, Su Yu, is a young man who had been quite unknown, merely a repair shop mechanic, which inevitably causes some concern among the residents of the Shelter.

They worry that Su Yu will not be able to manage Shelter No. 73 well.

Moreover, the previous expansion of the Night Slayer Team and its subsequent destruction caused a series of upheavals, leading even ordinary residents to lose trust in the Sanctuary.

"The casualties at Shelter No. 73 were too severe, and now the manager is gathering the wounded fighters. Who knows what he's planning."

"Yes, it's strange how the old manager just died. I wonder how long this Shelter can hold on..."

"And that new manager, the first thing he did in office was to kill so many people in the management office, it's just too..."

The residents of the Sanctuary talked amongst themselves, not knowing what had happened before, but their words were filled with pessimism about the future of the Sanctuary.

They even found it difficult to accept the ascension of the new manager, Su Yu, as the management had always been under the old manager since the Sanctuary was established, let alone Su Yu's killing so many people upon taking charge.

Even the disabled fighters felt the same way. Their life in the Sanctuary had not been easy, and now, under Zhang Xiao's arrangement, they gathered at the Ninth Squad's base.

Zhang Xiao had given the explanation that the manager intended to help them replace their prosthetics.

But to these disabled fighters, it seemed unbelievable that the manager could replace prosthetics for all of them, over a hundred in number, all at once?

"Silence."

Zhang Xiao heard the discussions and immediately shouted.

Due to Su Yu, Zhang Xiao had replaced his prosthetic, breaking through to a four-star rank. His loyalty to Su Yu had reached a peak.

"The power of the manager is beyond your imagination. Replacing your prosthetics is your chance for rebirth."

Having witnessed Su Yu's operation of constructing prosthetics out of thin air and his overwhelming prowess in battle, Zhang Xiao had immense faith in Su Yu.

As Zhang Xiao's words concluded, the crowd's chatter gradually diminished.

Yet, the worry and sorrow in their eyes clearly indicated their lack of trust in the current state of the Sanctuary and its incumbent manager.

And just then.

From a distance, the clamor of mechanical operations arose.

"Ka ka ku ke ke—"

The rumbling mechanical noise startled everyone.

"What is that noise? It sounds like the operation of large machinery." Zhang Xiao hesitated, "Is there such large machinery in the Sanctuary?"

"Or is it the manager's new Mechanical Creation?"

In the next moment, Zhang Xiao's question was answered.

In the distance, dozens of cavalry forming a mechanical legion were advancing, and in the center of this mechanical legion.

There were five massive black Mechanical Creations.

The black Mechanical Creations had heavy shields and chain saw blade edges that looked incredibly sharp.

No one would doubt the terrifying destructive power of these Mechanical Creations.

And in the center of these five Mechanical Creations, stood a figure covered by twenty-four sinister mechanical arms; who else could it be but Su Yu?

"Gulp." Lang Yun involuntarily swallowed.

Lang Yun and Hu Wen were also at the Ninth Squad's base, intending to maintain order and witness Su Yu crafting prosthetics for everyone.

After all, although Su Yu had promised to build prosthetics for all injured fighters in the Sanctuary, they had yet to see it with their own eyes, causing them some unease.

But now, witnessing nearly a hundred Mechanical Creations forming a mechanical legion, all their concerns vanished instantly.

The previously murmuring Sanctuary residents were now dumbfounded, stunned by the fearsome deterrence of the mechanical legion, unable to utter a word.

Zhang Xiao appeared calm, as if he wasn't concerned, as though he knew of the mechanical legion crafted by Su Yu all along.

Yet unbeknownst to them, his shock surpassed everyone else's!

"How is this possible? Where did the manager get this mechanical army?"

"Just this morning, there wasn't any such mechanical army."

"Could it be that in a single morning, the manager conjured this entire mechanical army out of thin air?"

The tremor in Zhang Xiao's heart was unknown to others.

Meanwhile, Su Yu was not in the mood to care about what everyone was thinking.

He activated his Spiritual Energy, and every piece of cavalry accepted Su Yu's commands.

In the next moment, the eighty units of cavalry began splitting the chaotic crowd into two waves, organizing them into small squads.

Then, Su Yu commandeered the five Defenders to move along the cleared space to the center of the crowd.

At that moment, no one at the Ninth Squad's base uttered a word.

Silence reigned.

Su Yu glanced at the crowd.

With the Thousand-Handed Prosthetic, he slightly elevated his position.

Su Yu looked down at the crowd below and slowly spoke: "Residents of the Sanctuary, I am Su Yu, your new manager."

Chapter 170: Chapter 107: Defender, Transcendent Spirit 4-Star Junior, The Shock of Sanctuary Residents!_3

"The Night Slayer Team, with their wolfish ambition, their captain Li He, forcibly annexed several hunting teams through special methods. To further strengthen himself, he even attempts to annex the entire Sanctuary, turning it into nourishment for his growth."

Ordinary residents didn't clearly understand everything that happened in the Sanctuary before, only hearing some rumors. The previous administrator left too quickly, without time to reveal the truth to the people.

At this moment, hearing Su Yu's words and recalling previous rumors in the Sanctuary, they suddenly had a moment of clarity.

"I was wondering why the Night Slayer Team wanted to annex so many hunting teams before, turns out it was because of this."

"No wonder..."

Su Yu listened to the crowd's discussions but did not continue speaking, planning to give them some time to digest.

After a while, he continued.

"Fortunately, by sheer luck, I became a Spirit-type Transcendent, and by further luck, discovered the abnormalities in the Night Slayer Team and reported this to the former administrator. Moreover, I reached out to other hunting teams in the Sanctuary and, together with their captains, attempted to collectively resist the Night Slayer."

"However, it was too late—the Night Slayer had already become a force to be reckoned with."

"Not only that, to become stronger, Li He even turned himself and his subordinates into creatures neither human nor ghost."

At this point, Su Yu clapped his hands.

In the next moment, in the Ninth Team's camp, Yang Lie and others immediately dragged out several corpses.

These were the aberrant bodies of the Night Slayer Team members who died after transforming into Ghost Demons. Although the Ghost Energy had been extracted by Li He, the mutations on their bodies remained.

Members of the Ninth Team dragged these mutated corpses into the crowd for everyone to see.

Seeing these bodies, the crowd retreated a few steps in disgust.

Seeing this, Su Yu pointed at the mutated corpses and continued speaking.

"Residents, these are the bodies of the Night Slayer Team members, and you've seen their current state."

"At that time, Li He led them, attempting to completely annex the entire Sanctuary and transform everyone here into such monstrous beings."

With Su Yu's words, the expressions of the residents immediately changed.

They became somewhat frightened and anxious.

The rise of Su Yu, the fall of the Night Slayer Team, and all sorts of events happening in the Sanctuary.

To these ordinary residents, it was something they couldn't understand, and to them, it was merely internal conflicts among the Sanctuary's upper echelons.

But now, it was different, it had transformed into Li He and the Night Slayer Team attempting to drag the entire Sanctuary down, trying to turn everyone into these monstrous creatures.

The corpses of the Night Slayer Team were laid out right in front of their eyes, and this kind of visual shock left the crowd even more alarmed.

"At that time, the Cluster of monsters formed by the Night Slayer Team was only a few hundred meters away from the Sanctuary."

Su Yu continued: "Faced with such a crisis, I, along with the former administrator and other hunting teams in the Sanctuary, could only resist with our lives."

"Eventually, at a heavy price, the entire Night Slayer Team and Li He were killed outside the Sanctuary."

"And the former administrator, because of this, exhausted himself to death and sacrificed his life."

Su Yu's tone became solemn as he spoke here.

"I couldn't save the former administrator, nor could I rescue those innocent people who died at the hands of the Night Slayer. Before he died, the administrator entrusted this position to me and made me promise to protect the Sanctuary."

"I regret it very much and feel that I'm unworthy of the administrator's position. If I were a bit stronger, I could have killed Li He sooner and prevented the former administrator's death, as well as saving many lives."

With these words, the residents' gazes towards Su Yu changed.

In their eyes, the upheaval in the Sanctuary was originally caused by fights among the upper echelons.

But looking at it now, it wasn't any internal strife; it was a major crisis for the entire Sanctuary.

If not for Su Yu's timely intervention, the entire Sanctuary might have become nourishment for Li He, and they would have turned into those monstrous creatures.

Su Yu had saved their lives.

And Su Yu's words, filled with regret for not being able to save the former administrator, further raised admiration in the hearts of the residents.

Clearly, it was Su Yu who discovered the anomalies in the Night Slayer, and it was Su Yu who led the Sanctuary's teams to unite and take action, and it was Su Yu who personally dealt with Li He.

Yet now, Su Yu was deeply regretful for not being able to save the former administrator.

Such actions left the residents deeply admired.

At this time, a woman in the crowd stepped forward and spoke, "Administrator, please don't say things like that anymore. Without you, the Sanctuary would not be what it is now."

"Indeed, although you couldn't save the former administrator, you saved all of us. You taking the position of administrator is not unworthy; it is rightfully deserved!"

"Exactly!"

Emotions among the crowd were stirred up by Su Yu's words. In their eyes, Su Yu had saved their lives; he was the Savior!

Meanwhile, in the crowd, Lang Yun and Hu Wen exchanged glances, seeing the fear and awe in each other's eyes.

Could they not see the performative nature of Su Yu's speech? Yet, in just a few simple words, by recounting the events, he had changed how the Sanctuary's residents viewed him.

"The administrator's methods are truly endless. To us, he uses benefits and threats to persuade, gives hope to those injured fighters, and with just a few words, wins the full trust of the residents." Lang Yun thought to himself, feeling that Su Yu was several times stronger than the previous administrator, in both strength and methods.

And at this moment, Su Yu, watching the emotionally stirred residents, slightly curved his lips into a difficult smile.

Then, he waved his hand to indicate for everyone to quiet down.

In the next moment, the residents of the Sanctuary fell silent, watching Su Yu intently, waiting for his next words.
