Chapter 181: Chapter 111: Crystal Giant Scorpion Clan, First Battle, The Mighty Firepower of the Cavalry!_2

"Then, Hunting Team One and Two will ambush on both sides above the slope, and once the Crystal Giant Scorpions are in position, coordinate with the cavalry to suppress the Crystal Giant Scorpion Clan with firepower."

Su Yu instructed the two people.

"By the way, you can detonate this bomb in the mine. There's no need to worry about it collapsing the mine; I've already adjusted the power of this bomb. It will only create a louder noise and commotion, with very little power, and can be used to anger those Crystal Giant Scorpions." As he spoke, Su Yu handed them a mechanical bomb, which had been prepared in advance when Su Yu decided to exterminate the Crystal Giant Scorpion Clan.

The reason for using the two as bait is partly because both of them are four-star transcents, and their reaction speed is a notch faster than the cavalry controlled by Su Yu. On the other hand, the environment inside the mine is complex, and even if Su Yu controls the cavalry, it would be difficult to control them perfectly if they are too far away.

"Alright, Administrator, I'll prepare now." Lang Yun gritted his teeth and, together with Hu Wen, went to instruct the hunting members.

Soon, they finished relaying Su Yu's plan.

Finding Su Yu again, Lang Yun said, "Administrator, I've instructed the hunting team members to prepare. I'll go with Captain Hu Wen to lure the Crystal Giant Scorpions now."

Su Yu nodded and reminded them, "Remember, when you enter the mine, attract as many Crystal Giant Scorpions as possible to prevent them from hiding inside the mine; it will be difficult to exterminate them then. Don't worry, if things get bad, I'll step in early to save you."

"Yes, Administrator." Lang Yun and Hu Wen said in unison.

After that, Lang Yun and Hu Wen walked down from the slope.

At this moment, in the mine, a Crystal Giant Scorpion feeding at the entrance paid no attention to them, as if it didn't perceive Lang Yun and Hu Wen as any threat.

The two exchanged a glance and immediately devised a plan.

Lang Yun took the lead, quickly approaching the mine entrance, and with his firearm in hand, fired a burst of bullets at the Crystal Giant Scorpion guarding the entrance.

The bullets struck the Crystal Giant Scorpion's shell without causing harm, but it angered the Crystal Giant Scorpion.

And so, it started chasing after Lang Yun.

Hu Wen seized the opportunity, bypassed the Crystal Giant Scorpion, and dashed into the mine.

The Crystal Giant Scorpion didn't try to stop him, clearly not thinking Hu Wen could cause any harm to the mine.

Seeing this, Su Yu nodded with satisfaction. Although Lang Yun and Hu Wen were too indecisive in nature, they still had some battle experience as the four-star Hunting Team Leaders of the Sanctuary.

Quickly.

A loud noise came from the mine!

Boom!!

It was the sound of the bomb Hu Wen carried being detonated!

Despite the loud noise, the bomb's power was minimal, and even Su Yu, standing on the slope, barely felt any tremors.

As the loud noise echoed, the Crystal Giant Scorpion engaged with Lang Yun at the mine entrance paused momentarily.

Then, the scorpion's crystal pincers frantically attacked Lang Yun, clearly enraged.

A moment later, Hu Wen's disheveled figure appeared at the mine entrance. He looked at Lang Yun, who was fighting the Crystal Giant Scorpion, and shouted, "Captain Lang Yun, retreat quickly; there are too many of them, the entire clan seems to be enraged!"

Lang Yun heard this and immediately turned around to run.

The Crystal Giant Scorpion also decisively followed, angrily intent on killing the two.

"Rumble!"

At that moment, the sound of numerous massive creatures clashing came from the mine.

It seemed that a large number of Giant Scorpions had been enraged and charged out of the mine.

Lang Yun, while running, glanced back.

He suddenly discovered that nearly thirty Giant Scorpions had emerged from the mine, and it wasn't just Crystal Giant Scorpions.

Among them were a significant number of Steel Giant Scorpions, born from devouring Tungsten Blood Steel.

"That's way too many, and there are ten four-star giant scorpions in this clan!"

The two noticed that within the clan of Giant Scorpions, ten were notably larger than the usual Crystal Giant Scorpions. Among them, two were particularly large, clearly the Radiation Beast Lords of this mine.

Lang Yun and Hu Wen were terrified, realizing that the Crystal Giant Scorpions Zhang Xiao encountered earlier were only part of the clan.

"No idea how to deal with so many Giant Scorpions; we'll have to rely on the Administrator." Both thought simultaneously.

They could only run toward the slope, now solely depending on the Administrator's power.

At that moment.

Not only Lang Yun and Hu Wen.

The hunting team members on the slope, although not panicking, had trembling hands, betraying their current nervousness.

Only Su Yu remained silently watching the many Giant Scorpions below.

The strength of the Giant Scorpions was clearly perceived by Su Yu.

"Ten four-star scorpions, three of them mid-four-star, and two high-four-star. These two high-level Giant Scorpions must be the leaders of this clan." Su Yu silently analyzed the

strength of the Giant Scorpion Clan, though the strength was somewhat unexpected, it was still within Su Yu's control.

"A Steel Giant Scorpion Leader and a Crystal Giant Scorpion Leader, indeed, these forms of Giant Scorpions are a result of mineral consumption type but essentially the same kind of Giant Scorpion."

Chapter 182: Chapter 111: Crystal Giant Scorpion Clan, First Battle, The Powerful Firepower of the Mobile Cavalry!_3

Su Yu calmly contemplated, with no trace of panic or surprise on his face.

This composed demeanor was no different than a powerful moral boost for the numerous hunting team members present.

At this moment, Lang Yun and Hu Wen, accompanied by the Giant Scorpion Clan, were about to enter the ambush prepared in advance by everyone.

"Almost there, it's close, Administrator, take action quickly! We can't hold on any longer!"

Lang Yun shouted in his heart. He was just a four-star junior Transcendent. Although he was experienced in battle, at this moment, it was pointless and he could be caught by the Crystal Giant Scorpions at any time.

The hunting team members were already sweating nervously from their palms.

After all, this was a cluster of nearly thirty Radiation Beasts, and even the weakest among them was a three-star Giant Scorpion.

For the hunting team members, this was an unprecedented scene in their lives.

Unlike everyone's tension, Su Yu remained inactive, silently waiting.

Until the Giant Scorpion Clan entered the optimal shooting range.

Lang Yun and Hu Wen exerted all their force, lunging forward to avoid the crossfire zone.

Only then did Su Yu stand up, raise his left hand, wave it gently, and shout, "Fire!"

The two hundred hunting team members finally picked up their weapons and unleashed a torrent of bullets.

"Rat-tat-tat—"

The barrage of bullets and the spewing tongues of fire momentarily halted the Giant Scorpion Clan's advance.

Meanwhile, Su Yu activated the Steel Meditation, and the intangible spiritual energy instantly controlled all the Riders present.

The eighty Riders, boasting a foundational combat power of peak two-star level, surged to mid three-star level thanks to the cluster effect and Su Yu's four-star breakthrough spiritual energy enhancement.

At this moment, the power unleashed by the eighty Riders was as strong as mid three-star!

In terms of shooting precision and accurately targeting the Giant Scorpions' weak points, these Riders were significantly more powerful than before.

Moreover, with the amplification brought by Su Yu's Heart of Steel, although their power was not increased, their bodies became tougher, the recoil they could withstand decreased, and their shooting accuracy became even more stable!

"Rat-tat-tat—"

As the two hundred hunting team members poured their firepower, the Riders simultaneously unleashed their bullets!

Furthermore, the firepower unleashed by merely eighty Riders surpassed that of the two hundred hunting team members!

In no time, the originally aggressive Crystal Giant Scorpions were suppressed by everyone.

And Hu Wen, looking at the suppressed Giant Scorpion Clan, felt a flash of relief in his eyes.

He was well aware that his team's firepower wasn't this fierce.

"Such a level of firepower is only achievable thanks to the Administrator's Riders. These powerful Mechanical Creations were all made by the Administrator alone."

Hu Wen's respect for Su Yu grew even stronger.

But at this moment, Su Yu's attention wasn't on Lang Yun and Hu Wen anymore.

He was now solely focused on the two Giant Scorpion Leaders within the Giant Scorpion Clan.

You could see, the Steel Giant Scorpion Leader, angrily raising its pincers, ready to charge up the hillside. The barrage of bullets only caused minor scratches on its tough shell, unable to cause real damage, and in Su Yu's view, it seemed none of the bullets even penetrated its defense.

Not just the Steel Giant Scorpion Leader, but even the other Steel Giant Scorpions, also followed behind the Giant Scorpion Leader, charging towards Su Yu's group.

"Interesting, these Giant Scorpions seem to have inherited their property of devouring minerals; the exoskeleton grown by consuming Tungsten Blood Steel is even tougher." Su Yu observed the Steel Giant Scorpions charging towards him indifferently, knowing he still had five Defenders on standby.

Besides, Su Yu himself was far from weak.

Su Yu studied the Giant Scorpion Clan with interest.

The Steel Giant Scorpions, relying on their tough shell, incurred minimal damage.

On the other hand, the Crystal Giant Scorpions, whose shell toughness was far less than that of the Steel Giant Scorpions, were already heavily wounded, with several dead entirely.

Observing the Crystal Giant Scorpions hunt, raising their scorpion tails where a blue wave was apparent.

With the wave's flash, Su Yu noticed that this Crystal Giant Scorpion instantly vanished.

"So, this is the invisibility ability of the Crystal Giant Scorpions as mentioned by Captain Zhang Xiao? It indeed is a potent ability."

"These Giant Scorpion Clans, their shells, while inheriting the property of devouring minerals, also made this property even stronger. Thus, these Giant Scorpions' shells can completely be used to forge more powerful Mechanical Creations!"

As the Crystal Giant Scorpion Leader turned invisible, the remaining Crystal Giant Scorpions also disappeared from sight.

This scene instantly alarmed the hunting team members.

Although they tried shooting bullets into the Crystal Giant Scorpions' previous positions, no movement was observed, as the Crystal Giant Scorpions had already left their original spots.

For a moment, the shooting stopped unconsciously.

Only a few continued to suppress the Steel Giant Scorpions charging up the hill with firepower.

Lang Yun and Hu Wen had arrived at the hilltop when the Giant Scorpion Clan was suppressed by the firepower earlier.

Seeing the dozen Steel Giant Scorpions charging uphill and the abruptly disappearing Crystal Giant Scorpions, they knew things were bad.

"Administrator, the Crystal Giant Scorpions have turned invisible; what should we do?"

Lang Yun was anxious. The Crystal Giant Scorpions, led by their leader, vanished, but everyone was aware that the threat from these Giant Scorpions hadn't dissipated at all.

"No worries," Su Yu casually replied.

Su Yu, watching the Steel Giant Scorpions charging uphill towards him, mentally commanded his next move.

Behind him, five pitch-black Defenders, stood aloft, rushing downwards towards the Steel Giant Scorpion Clan on the hillside!

Suddenly, Perception of Killing Intent activated! Holographic Perception activated!

The vanished Crystal Giant Scorpions abruptly reappeared in Su Yu's vision.

"Rat-tat-tat—"

The sound of Riders' fire-tongues spewing lit up once more!

Chapter 183: Chapter 112: The Power of the Defender! Slaughtering the Steel Giant Scorpion! Sniping, Killing with One Shot! Mining Below!

Under the effect of holographic perception, the invisibility of the Crystal Giant Scorpions was rendered completely useless.

In fact, the invisible Crystal Giant Scorpion Clan appeared even clearer to Su Yu now than before.

"Da da da—"

The torrent of ammunition from eighty cavalry immediately intercepted the Crystal Giant Scorpions attempting to invisibly approach Su Yu.

The shell of the Crystal Giant Scorpions is inherently not as hard as that of the Steel Giant Scorpions; even the four-star Crystal Giant Scorpions were beginning to falter,

with their transparent shells fracturing constantly. Meanwhile, several three-star Crystal Giant Scorpions were killed again by Su Yu's cavalry.

The members of the hunting team reacted at this moment and decisively opened fire once more.

They fired in unison at the points targeted by the cavalry.

The leading Crystal Giant Scorpion Leader seemed to sense the danger.

At that moment, its crystal scorpion tail emitted another ring of translucent glow.

The remaining Crystal Giant Scorpions began to decisively retreat.

They seemed to want to escape back to the cave.

"Trying to escape now? A bit too late." Seeing this, Su Yu immediately ordered the cavalry to focus fire on the nearest four-star Crystal Giant Scorpion.

The cavalry continued to open fire relentlessly, showcasing their powerful firepower. Soon, a four-star Crystal Giant Scorpion had its shell pierced by the cavalry's bullets, losing its life and revealing its invisible body to the air.

That Crystal Giant Scorpion Leader, being an advanced four-star Radiation Beast, seemed not to lack intelligence. It relied on the glow emitted by its scorpion tail to command the three-star Crystal Giant Scorpions to block the front, while it led the remaining three four-star scorpions to slowly retreat.

Ultimately, all the three-star Crystal Giant Scorpions were killed by the cavalry, while the advanced four-star Crystal Giant Scorpion led the remaining three Crystal Giant Scorpions out of the crossfire zone of the cavalry.

Su Yu watched the retreating Crystal Giant Scorpions but did not pursue, as at that moment the Steel Giant Scorpions were already charging uphill amidst gunfire.

"No matter, the Crystal Giant Scorpions aren't strong by themselves, their only commendable trait is their invisibility, but that ability is completely useless against me."

"It's better to deal with these Steel Giant Scorpions first."

"The Crystal Giant Scorpions might have escaped, but you can't." With a thought, Su Yu enveloped five Defenders charging down the hill with Spiritual Energy, which also enhanced their performance.

Additionally, the Defenders' traits were thus activated.

The Defenders equipped with Intermediate Intelligent Chips are essentially upgraded versions of the cavalry, inheriting the cluster trait and enhancing it even further!

Defender Tactical Squad trait activated!

The black armored bodies of the five Defenders suddenly gleamed with two red lights.

The inherent strength of the Defenders reached as high as a top-tier three-star, and now with the Tactical Squad and Su Yu's Spiritual Energy enhancements, their combat power had already increased by several levels!

And that's not the end of it.

The effect of Su Yu's Heart of Steel, along with the level-up of the Mechanical Warrior, was also upgraded to level ten, and now the enhancement of Heart of Steel provided a five percent boost to Su Yu's physical attributes!

Do not underestimate this five percent.

Su Yu's physical attributes have reached the pinnacle of four-star, and even a five percent increase is a significant boost for the five Defenders.

Especially since the Defenders themselves are close-combat intelligent mechanized, they can perfectly maximize the enhancement of Heart of Steel!

At this moment, in Su Yu's view, the overall strength of the five Defenders already approached that of a four-star early to mid-tier level!

With the inertia from the downhill charge, the five Defenders revealed their ferocious steel chain saw blades.

The gears turned, and the chain saws on the five Defenders spun crazily. The chain saw blades, originally infused with a hint of Tungsten Blood Steel, now emitted a faint crimson glow as they spun.

At this time, the Steel Giant Scorpion Leader, leading the Steel Giant Scorpion Clan, also engaged the Defenders!

Buzzing—

Upon the first clash, the Defenders raised their shields mixed with Tungsten Blood Steel. Each Defender was equipped with two Steel Giant Shields, which were then layered together in front, easily blocking the attacks of the Steel Giant Scorpions.

Although the Defenders' Steel Shields were essentially only infused with a trace of Tungsten Blood Steel and comparatively weaker than these Steel Giant Scorpions, whose very shells bore the hard traits of Tungsten Blood Steel after a diet of it,

it couldn't match the crafting skills of Su Yu, nor the thickness of the shields!

The five Defenders formed a long line, like an unbreakable wall of steel!

They raised their shields, blocking all attacks from the front, while the six chain saw blades mounted on each Defender furiously cut into the Steel Giant Scorpions' bodies.

For a moment, the charge of the Steel Giant Scorpions was halted.

The members of the hunting team looked at the scene before them in disbelief, utterly stunned.

There were clearly thirteen Steel Giant Scorpions, among which five had reached four-star, yet now they were being easily intercepted by Su Yu's five Defenders.

Although the attacks of the Steel Giant Scorpions inflicted substantial damage on the Defenders' shields, they caused little disturbance to the Defenders as long as their bodies weren't hit.

Conversely, the Defenders' chain saw blades effortlessly sliced into the bodies of those Steel Giant Scorpions.

Chapter 184: Chapter 112 The Power of the Defender! Slaughter of the Steel Giant Scorpion! Snipe, One Shot Kill! Down to the Mine!_2

Only the Steel Giant Scorpion Leader, relying on the disparity in strength, could suppress the defenders before him.

Moreover, as the chainsaw blades cut into those Steel Giant Scorpions, even though the blades were not as hard as the shells of these Steel Giant Scorpions.

But what matters is that the blades are rotating; chainsaws are exactly the weapon Su Yu loved to equip on Mechanical Creations due to this rotational cutting ability.

At this moment, several three-star Steel Giant Scorpions were torn apart by the chainsaw blades!

And those four-star Steel Giant Scorpions were severely injured at this moment,

Their blood soaked the five Defenders, turning these deep black Defenders a scarlet hue, looking menacingly bloodthirsty!

"Not bad, the Defenders' strength is beyond my expectations. This is still because the tungsten blood steel content is insufficient. Once I kill these Giant Scorpions and occupy this resource point, I can forge Defenders entirely out of tungsten blood steel, even using the shells of these Giant Scorpions!"

"And the shells of those Crystal Giant Scorpions are just as useful; they can be used to create a batch of invisible intelligent mechanic special units."

Su Yu was quite excited.

This Giant Scorpion Clan is truly a treasure trove!

Lang Yun looked at the Defenders' massive slaughter in a daze; he didn't expect that Su Yu's power, after disposing of Ye Sha and taking over the Sanctuary, would grow so much in less than ten days.

"Is this the Administrator's new Mechanical Creation? Such power is too terrifying!"

Lang Yun even pondered that if Su Yu wished, these five Defenders might be enough to sweep through the Sanctuary!

Hu Wen was no better than Lang Yun.

Though the two had guessed before the hunt that Su Yu's ability to create those Mechanical Creations from the exchange list would certainly reflect an increase in his own strength.

But they never imagined that Su Yu's strength had improved to such an absurd extent.

It was simply a qualitative leap.

Only after a moment did the two come back to their senses.

They instructed the hunting team members to fire again.

By now, the hunting team members had already switched ammunition.

Even Su Yu's cavalry had replenished their ammunition.

The next moment.

"Rat-a-tat-tat——"

The sound of gunfire once again echoed across the battlefield!

And that leading Steel Giant Scorpion Leader, as early as when the Crystal Giant Scorpion Leader had left, already intended to retreat.

Now, it turned around and ran, not caring about its kin at all.

Lang Yun and Hu Wen, relying on their own four-star strength, attempted to pursue.

But discovered that neither their attacks nor the focused fire of the hunting team members could harm the Steel Giant Scorpion Leader.

Simply put, they couldn't penetrate its defense.

The Steel Giant Scorpion Leader was already exceptional among the Steel Giant Scorpions, and after consuming tungsten blood steel in this mine for an unknown number of years, its heavy shell wasn't something ordinary people could break.

"Hiss, this Steel Giant Scorpion's shell is really hard; I'm afraid even a five-star Transcendent can't break it quickly." Lang Yun tried for a while, then gave up pursuing the Steel Giant Scorpion Leader, sighing beside it.

"It's just a pity, Administrator, having already suppressed these Steel Giant Scorpions, if we let them escape, wouldn't it be a shame?" Hu Wen, having also tried by then, turned his focus to the remaining three-star Giant Scorpions and echoed.

"We can only hope the Administrator has a way to deal with that Steel Giant Scorpion Leader."

Su Yu, by then, had already killed several three-star Steel Giant Scorpions thanks to the Defenders. Alongside the cavalry's gunfire, the remaining three-star Steel Giant Scorpions were shot down one by one by everyone, leaving but a few.

The remaining four four-star Steel Giant Scorpions also couldn't hold on. At this time, relying on the thickness of the shell, they hoped to escape back to the mine following the Steel Giant Scorpion Leader.

In the minds of these Giant Scorpions, they believed that they couldn't win on the ground purely because Su Yu's forces were too numerous.

However, in the mine, relying on the terrain, Su Yu and others couldn't form an encirclement.

Thus, the Steel Giant Scorpions aimed to hide in the mine.

"Earlier I let the Crystal Giant Scorpions go because their abilities pose no threat to me; it's better to first focus and eliminate you Steel Giant Scorpions." Su Yu watched the Steel Giant Scorpions depart, remaining calm inside.

Subsequently, Su Yu retrieved a sniper rifle from his back, one left to him by his teacher, an excellent grade Electric Sniper Rifle—no, after Su Yu's transformation, it should now be called a sniper cannon!

Though it wasn't completely repaired yet, each shot required a lengthy cooldown, its power was enough to be considered an excellent grade creation.

"But your shell is too hard. If you escape back to the mine, it will take a tremendous effort to take you down. So now, obediently die."

Su Yu raised the Electromagnetic Sniper Cannon, aiming at the Steel Giant Scorpion Leader.

Relying on Holographic Perception, the Steel Giant Scorpion Leader's movement patterns and traces appeared vividly in Su Yu's mind.

The next moment, Su Yu's Wilderness Hunter core specialization activated.

Shadow Cloak!

Spiritual Energy from Subspace enveloped Su Yu, rendering his entire form invisible.

Simultaneously, the core ability of the Wilderness Hunter activated.

Hidden Kill!

[Hidden Kill (lv max): When you make an attack, if you are not in Concealment, you can activate this ability to bestow Spiritual Blessing on the attack, doubling the damage dealt. Hidden Kill enters cooldown, cooldown time is one hour. If you are in Concealment, you can activate this ability to bestow Spiritual Blessing on the attack, quintuple the damage dealt. Hidden Kill enters cooldown with a base cooldown duration (10 minutes).]

Chapter 185: Chapter 112: The Power of the Defender! Slaughtering the Steel Giant Scorpion! Sniping, Killing with One Shot! Mining Below!_3

This ability originally required invisibility to be triggered. Previously in the Sanctuary, Su Yu lacked the ability to become invisible, so he couldn't use it. But after reaching the highest level as a Wilderness Hunter, this ability lifted the restriction of having to be invisible to trigger it, turning into additional damage amplification when invisible.

Su Yu accompanied the activation of the ability.

Pulled the trigger in his hand!

The energy of the electromagnetic sniper cannon consolidated at the muzzle, while the blessing of Spiritual Energy from the subspace also attached to the bullet at this moment.

Boom!

Clearly a sniper rifle, at least that's what it seemed to Su Yu.

Yet at this moment, it exploded with a thunderous roar.

The speed of the gunshot spreading was far slower than the speed at which the bullet flew out.

Not far away, that Steel Giant Scorpion Leader, with its shell seen by everyone as incredibly hard and unbreakable.

At this moment, under Su Yu's shot, the head wrapped in the thick shell of the Steel Giant Scorpion Leader was punctured with a huge crack.

The entire skull of the Steel Giant Scorpion Leader was completely blown off with this shot!

Meanwhile, Lang Yun and Hu Wen, aided by the Defenders, dealt with the remaining several three-star Steel Giant Scorpions, subconsciously turning back to find the source of this immense noise.

But when they turned around, they only saw the muzzle of the electric sniper cannon in Su Yu's hand, still with a wisp of smoke.

Then, a thought emerged from the depths of their hearts that they found hard to believe.

Could it be?

The Steel Giant Scorpion Leader, whose defense even they couldn't penetrate, was killed in one shot by the master?

Lang Yun, puzzled, turned to look at the position of the Steel Giant Scorpion Leader.

He found that the head of the Steel Giant Scorpion Leader had been completely blown away, and that immense body, that incredibly hard shell, was of no use under Su Yu's shot!

"Gulp." Lang Yun swallowed instinctively, quickly realizing that for this hunting operation, even without their two teams, the master would likely just have spent a bit more effort to annihilate the entire Giant Scorpion Clan.

At this moment, Hu Wen also looked toward the direction of the Giant Scorpion Leader.

But, Hu Wen happened to be facing the Giant Scorpion Leader directly, and because the Steel Giant Scorpion Leader's body was extremely large, Hu Wen could only see the Steel Giant Scorpion Leader motionless, unaware of what had happened.

"Did the master heavily injure the Steel Giant Scorpion in the hunt? There's no way it was taken out with just one shot, right?" Hu Wen couldn't believe it; in his view, the Steel Giant Scorpion Leader's defense was probably comparable to a five-star Radiation Beast.

Subconsciously, Hu Yun walked some distance to the left, wanting to see what had happened to the Steel Giant Scorpion Leader.

When Hu Yun circumvented the visual obstruction of the Steel Giant Scorpion Leader's body,

he witnessed a scene he would never forget.

The ferocious head of the Steel Giant Scorpion Leader had vanished, with only vivid red blood continuously flowing from the broken neck.

"Is this the strength of the master?!"

The thoughts in everyone's minds, Su Yu did not care about. At this moment, Su Yu had already put away the electromagnetic sniper cannon in his hand.

"This gun, indeed mighty, but unfortunately, the cooldown time is too long. However, it doesn't matter. With abundant resources provided by the mining cave ahead, I can completely repair this gun successfully!"

Su Yu looked at the remaining few four-star Steel Giant Scorpions, not taking action, but letting the Defenders intercept them.

With the cooperation of the hunting team members.

In the end, five Defenders slew all the Steel Giant Scorpions under the steel chain saw blade.

Then, Su Yu found Lang Yun and Hu Wen.

"Captain Lang Yun, Captain Hu Wen, the corpses of these Giant Scorpions are useful to me. Please first send a team of hunting members to transport these corpses back to the Sanctuary in batches."

"Then hand them over to the Mechanical Repair Department's members for initial processing. The rest will be dealt with when I return to the Sanctuary."

"Who among you will be responsible for returning these Giant Scorpions first?" Su Yu asked Lang Yun and Hu Wen.

Lang Yun and Hu Wen exchanged glances, clearly both were reluctant to return immediately.

In their view, during this hunt, aside from initially drawing out the Giant Scorpion Clan, they hadn't been of much use, relying mostly on Su Yu alone.

If they were to return now, perhaps they wouldn't earn much contribution.

And now, after Su Yu demonstrated his powerful strength, this hunt was surely a sure win. They both realized that only cleanup was left in the hunt.

Lang Yun and Hu Wen were hoping to perform once they entered the mining cave later. At worst, they could at least present themselves more in front of Su Yu.

But escorting the Giant Scorpion corpses back to the Sanctuary would mean being irrelevant to the upcoming hunt, and the contributions they would receive would definitely be much less.

"Master, there might be dangers when entering the mining cave next." Lang Yun started speaking, "After all, the terrain inside the cave is complex. Although master has Transcendent strength, there might still be risks."

"And master's Mechanical Creations might have difficulty entering the cave."

At this time, Hu Wen chimed in: "Why not let us accompany you. Both of us are at least four-star Extraordinary of Physical Body. At a crucial moment, we can also protect the master."

Upon hearing this, Su Yu naturally saw through their intentions and found them amusing.

Although Su Yu's physical strength had long reached the pinnacle of four stars, except for Captain Zhang Xiao, who knew more, Lang Yun and Hu Wen were unaware.

Even though Su Yu had demonstrated impressive physical prowess during the battle with Li He, Lang Yun and Hu Wen believed that at that time, Su Yu was still a bit away from a four-star physical level.

Su Yu thought for a moment; the environment in the mining cave was indeed intricate. Defenders and Cavalry were not suitable for this terrain; manpower was needed.

Remembering the scene where these two lured the Giant Scorpions before, he thought they could be somewhat useful.

He nodded and said, "Very well, in that case, you will accompany me into the mining cave."

"As for those Giant Scorpion corpses, let the first hunting squad bring them back. As for the second hunting squad, rest here, replenish ammunition, and be ready to enter the mining cave for exploration at any time later."

No data found.

Chapter 186: Chapter 113 Mechanical Warrior lv max! Core Specialization: Steel Spirit!

Deep within the underground mining cave.

In a cave filled with sea blue source crystal ore, there was a stone platform formed by sea blue source crystals, atop which lay a dark blue piece of metal, seemingly a fragment of some kind of mechanical creation.

At this moment, this metal fragment emitted a ghostly blue light.

The sea blue origin crystal stone platform beneath it also appeared deeper due to this blue light. Upon close observation, one could notice that the amount of sea blue source crystal in the ore within the cave seemed to increase under the illumination of this light.

The Crystal Giant Scorpion Leader, along with the remaining three four-star level Crystal Giant Scorpions, was hiding here, relying on consuming the sea blue source crystal ore and the irradiation of that ghostly blue light to slowly recover from its injuries.

As the leader of the Crystal Giant Scorpions, a four-star high-level Radiation Beast, it already possessed a not-insignificant level of intelligence.

But the recent battle had completely drained the Crystal Giant Scorpion Leader of its confidence.

Recalling those strange metallic creatures, along with the presence of Su Yu and others, filled the Crystal Giant Scorpion Leader with deep fear.

In the Scorpion Leader's view, ever since that metal fragment suddenly appeared in the mining cave a few years ago, causing a significant increase in the number of sea blue source crystals,

it had relied on consuming the sea blue source crystals to become the first Crystal Giant Scorpion in the Scorpion Clan, even gaining the ability of invisibility, never encountering danger again.

But now, the mechanical creations controlled by Su Yu were nothing short of a strong blow to it.

The tail of the Crystal Giant Scorpion Leader emitted a circle of blue light, a communication ability it used with other giant scorpions and a symbol of its intelligence amongst the Scorpion Clan.

Over the years, the Crystal Giant Scorpion Leader had seen humans, but never a human like Su Yu, nor had it witnessed such a strange way of fighting with metal beasts.

However, in the life of the Crystal Giant Scorpion, it had also seen similar Radiation Beast clans, such as the Radiation Giant Ant clan, whose leader was the extraordinarily weak Ant Queen.

In the view of the Crystal Giant Scorpion, Su Yu was clearly the same!

"That strange human must be the leader of those metal monsters. Judging by the human, he only controls metal monsters to fight us, relying solely on human weapons to attack." The Crystal Giant Scorpion clearly conveyed its thoughts through the light on its tail to the remaining three Crystal Giant Scorpions.

"That human must have a weak body! In the caves, his metal beasts have difficulty moving; as long as we find an opportunity and kill that human, we can defend the cave!"

"Now, consume the crystals, recover, and find a chance to attack that strange human's body!"

The remaining three Crystal Giant Scorpions received the leader's message.

They all raised their crystal pincers in agreement with the leader's strategy!

...

Meanwhile.

On the ground outside the cave.

The first hunting team had already placed the carcasses of the giant scorpions onto trailers, intending to haul them back to the Sanctuary.

Soon, the first hunting team took away all the giant scorpion carcasses.

The Sanctuary, after all, was just a small settlement, and the available transportation machinery was not abundant, something Su Yu noticed as well.

"The Sanctuary doesn't have much transportation machinery yet, and once this cave is mined, we must prepare some transportation machinery to serve as tools for transporting ore."

"But for now, it's more important to resolve the remaining Crystal Giant Scorpions in the cave and find out how this Sea Blue Source Crystal came to be." Su Yu noted his thoughts on transportation machinery in his mind and then looked at the second hunting team, which was almost ready.

After a short break, the second hunting team was now fully recovered.

The previous battle hadn't been too costly for them, just some wasted ammunition.

And Su Yu's Cavalry and Defenders had also, with Nuonuo's help, all regained their combat strength.

Lang Yun and Hu Wen came up to Su Yu.

Lang Yun said, "Administrator, the first hunting team has returned and the second hunting team is ready."

Hu Wen also approached Su Yu, saying, "Administrator, when I entered the cave earlier, I roughly surveyed the environment. Most of the places have a complex terrain. The scorpions can climb, and we can get up there as well, but your mechanical creations might have difficulty moving through this terrain."

Su Yu wasn't surprised that the mechanical creations were hard to maneuver in the cave since, after all, the Cavalry and Defenders were designed for direct combat and are naturally not suited for complex underground caves.

Su Yu nodded and then instructed Lang Yun, "Leave half of the second hunting team to guard the cave entrance; the rest will follow me inside."

Then, Su Yu donned the Thousand-Handed Prosthetic brought by Nuonuo and instructed his mechanical army and the members of the second hunting team to jointly guard the entrance of the cave to prevent any unforeseen events on the ground.

He led the remaining members of the second hunting team into the cave.

Lang Yun and Hu Wen silently followed on either side of Su Yu, ready to deal with any sudden crisis.

Upon entering the cave not long after.

The light before Su Yu's eyes dimmed, and if not for the faint blue glow from the sea blue source crystals, it would have been pitch dark.

Infinite Job Transfers Starting from Mechanic #Chapter 187 - 113 Mechanical Warrior lv max! Core Specialization: Steel Spirit!_2 - Read Infinite Job Transfers Starting from Mechanic Chapter 187 - 113 Mechanical Warrior lv max! Core Specialization: Steel Spirit!_2

Chapter 187: Chapter 113 Mechanical Warrior lv max! Core Specialization: Steel Spirit!_2

The terrain in front of the mine cave had already become relatively flat due to the back-and-forth crawling of the Giant Scorpion Clan. Except for the exposed Tungsten Blood Steel Ore and Sea Blue Source Crystal Ore, there was absolutely nothing else present.

Su Yu took this opportunity to check the transfer panel.

He had killed quite a few four-star Giant Scorpions in the recent battle.

And the prompt from the transfer panel kept ringing incessantly.

[You killed a Crystal Giant Scorpion (four-star intermediate), you gained professional experience...]

[You killed a Steel Giant Scorpion (four-star advanced), you gained professional experience...]

[Mechanical Warrior level up! Heart of Steel synchronized upgrading!]

[...]

Ignoring the prompts about killing the Giant Scorpion Clan, Su Yu opened the panel directly.

He discovered that his Mechanical Warrior level had reached nineteen, just shy of a little bit of experience to max out the first-level profession.

"Looks like, after killing the remaining Crystal Giant Scorpions, I'll be able to level the Mechanical Warrior to the max and unlock a new profession."

Just then, a cry of surprise from Lang Yun, who was scouting ahead, drew Su Yu's attention away from the panel.

"Administrator, there are three forked paths ahead."

Hearing this, Su Yu controlled the Thousand-Handed Prosthetic and quickly moved forward.

At the corner of the path ahead, the main road of the mine cave ended, replaced by three deeper mine paths.

Su Yu decisively activated Perception of Killing Intent and Holographic Perception, but because the Crystal Giant Scorpions were too far from Su Yu's position, no presence of the Crystal Giant Scorpions was detected.

"Administrator, what should we do?" Hu Wen asked, coming up, "How about we split up to explore?"

Su Yu thought for a moment, pointed to the mine cave on the far left, and said, "Let's start from the leftmost one. The Sea Blue Source Crystal Ore is most plentiful here, so we'll explore along the areas with the highest concentration of Sea Blue Source Crystal Ore. Explore thoroughly without splitting up. Since the remaining Crystal Giant Scorpions are all four stars, we should proceed cautiously. Exploring one by one, we'll eventually find the remaining Crystal Giant Scorpions."

In Su Yu's view, only three four-star Crystal Giant Scorpions and a Giant Scorpion Leader were left, and they were all injured, posing no threat to them.

Instead of splitting up, it was better to explore bit by bit since they'd find them eventually. Spending extra time was still more prudent than splitting up.

As for the Crystal Giant Scorpions running away, Su Yu wasn't worried. After all, the entrance to the mine cave was guarded by Su Yu's Mechanical Creations.

Lang Yun nodded, then continued leading the team ahead, proceeding to scout.

Quickly.

The group proceeded along the path with the highest concentration of Sea Blue Source Crystal Ore.

And Su Yu kept Holographic Perception and Perception of Killing Intent active.

When they reached a cave filled with Sea Blue Source Crystal Ore.

Su Yu's Perception of Killing Intent finally lit up in his mind, showing a few glaring red dots.

It was precisely the four Crystal Giant Scorpions!

"They are here, Captain Lang Yun, Captain Hu Wen, be ready."

Through Holographic Perception, Su Yu clearly saw the four Crystal Giant Scorpions charging in from four directions of the cave.

Moreover, through Holographic Perception, Su Yu clearly saw that the injuries on these Crystal Giant Scorpions had completely healed.

While Lang Yun and the others could only guess the direction of the four Crystal Giant Scorpions through the ground trembling and the crushed Sea Blue Source Crystals.

"Open fire!" Hu Wen commanded, and the hunting team members all opened fire in the direction the Crystal Giant Scorpions were advancing.

However, most of the bullets missed.

Those that hit only inflicted minor damage.

The Crystal Giant Scorpions, clear in their targets, paid no attention to the hunting team members attempting to stop them, charging straight towards Su Yu!

"Protect the Administrator," Lang Yun shouted.

Then, along with Hu Wen, positioned themselves on either side of Su Yu, intending to intercept the Crystal Giant Scorpions.

However, in Su Yu's eyes, the Crystal Giant Scorpions, using their invisibility, bypassed the two and evaded the hunting team's gunfire.

Charging straight towards Su Yu.

This scene surprised Su Yu a bit.

"These Crystal Giant Scorpions are actually quite clever; they seem to have guessed that I'm the core of the team."

"They even plan to prioritize taking me out while my Mechanical Creations aren't around?"

Su Yu hadn't expected the Crystal Giant Scorpions to have such a level of intelligence.

"If it were an ordinary Mechanic or a Transcendent with only spiritual power, they might indeed fall victim to this tactic by the Crystal Giant Scorpions."

At this moment, the Crystal Giant Scorpion Leader, relying on its four-star advanced strength, had already reached Su Yu before the other scorpions.

Its invisibility was lifted, and the Crystal Armor began to emit a circle of ghostly blue light. Eventually, this light converged on the scorpion tail of the Crystal Giant Scorpion Leader, appearing as though it would strike Su Yu in the next moment.

This scene led Lang Yun and Hu Wen to feel uneasy.

They knew Su Yu was strong, but that was due to his Prosthetics and Mechanical Creations.

Even though Su Yu was wearing the Thousand-Handed Prosthetic, in their eyes, he might not fare well against a four-star advanced Radiation Beast at close range.

"Die! Human!" The Crystal Giant Scorpion didn't roar, but at this moment, the only thought left for the Crystal Giant Scorpion Leader was this.

Chapter 188: Chapter 113 Mechanical Warrior Iv max! Core Specialization: Steel Spirit!_3

That is to eliminate the humans in front of him, to eliminate Su Yu, who had killed countless of its kind, to eliminate Su Yu, who seemed extremely weak in its eyes.

As the scorpion tail emitting a dim blue glow descended, just as it was about to pierce Su Yu's body.

The Crystal Giant Scorpion Leader was shocked to find its scorpion tail couldn't move.

It subconsciously widened its eyes to see, only to find a human hand gently pinching its scorpion tail, effortlessly blocking its all-out blow filled with its entire strength.

And the owner of that hand was exactly Su Yu, whom it regarded as physically weak!

Lang Yun and Hu Wen also noticed this scene.

The shock in their hearts was beyond words.

To know, in their eyes, Su Yu was only a Mechanic, a Spiritual Energy-based Transcendent, with physical abilities, although Su Yu showed some in his confrontation with Li He, in their view, most of it was due to the prosthetic, Su Yu himself had not displayed a four-star level of strength.

And now, just a light palm had effortlessly taken the full-force blow of a four-star Advanced Radiation Beast Leader!

This terrifying physical capability left Hu Wen and Lang Yun extremely astounded.

"When did the Administrator's physical ability become so strong? This physical strength, it probably isn't far off from five-star, right? And the Administrator himself still is a Spiritual Energy-based Transcendent."

At the same time, the other three Crystal Giant Scorpions also approached Su Yu.

"Quite smart, but unfortunately, I'm not some physically weak Mechanic."

Su Yu chuckled to himself while pinching the tail of the Crystal Giant Scorpion Leader.

His original bodily level reached the peak of four stars, and after successive upgrades as a Mechanical Warrior, now it was just a step away from a five-star level.

"Alright, since you've come over on your own, let me turn you into experience for my upgrade."

In the next moment, Su Yu exerted force.

In the eyes of the Crystal Giant Scorpion Leader, Su Yu's somewhat lean body unleashed massive power.

Su Yu's palm applied force, and cracks began to appear on the Crystal Giant Scorpion Leader's tail.

"Pain! It's too painful!" The Crystal Giant Scorpion Leader couldn't scream, but the cracks continuously appearing on the tail's shell and its constantly twisting body unmistakably conveyed its agony to everyone.

With a firm tug, Su Yu forcefully tore off the tail end of the Crystal Giant Scorpion Leader.

Meanwhile, the remaining three four-star-level Crystal Giant Scorpions launched an attack on Su Yu.

However, mechanical arms appeared from behind Su Yu.

They easily blocked the tails of these Crystal Giant Scorpions, one by one.

But that's not all.

Twenty-four mechanical arms controlled the legs of these Crystal Giant Scorpions, firmly pinning the three Crystal Giant Scorpions in place.

In the next moment.

With the operation of Su Yu's Spiritual Energy, the Electron Furnace of the Thousand-Handed Prosthetic lit up with a red glow.

The twenty-four mechanical arms became shrouded with a scarlet light.

"Crack—"

In the shocked gazes of Lang Yun, Hu Wen, and the hunting team members.

The bodies of the three Crystal Giant Scorpions were torn apart by the twenty-four mechanical arms!

That wasn't the end.

Su Yu extended another hand and pinched the head of the Crystal Giant Scorpion Leader.

Applying slight force, he ripped off the entire head of the Crystal Giant Scorpion Leader.

"Phew." Su Yu exhaled deeply and casually tossed the head of the Giant Scorpion Leader aside.

He glanced at the three Crystal Giant Scorpions he had ripped in half effortlessly, feeling slightly disappointed.

"The shell of this Crystal Giant Scorpion is far inferior to the Steel Giant Scorpion; although they swallowed Sea Blue Source Crystals to gain invisibility, it also made their shells more fragile, even worse than a three-star Steel Giant Scorpion."

"It's somewhat regrettable; this reduces the utility of these shells significantly."

At this point, Lang Yun, Hu Wen, and the hunting team members were already petrified.

After a long while, a member of the hunting team finally mustered the courage to ask Hu Wen, "Captain... isn't our Administrator a Mechanic..."

"Still, an Extraordinary Mechanic awakened with Spiritual Energy, but does every Mechanic have such strong physical qualities?"

Hu Yun was at a loss for words to answer the hunting team member's question.

You ask me? Who do I ask?

The Administrator's strength is too terrifying.

Unlike everyone's astonishment,

Su Yu instructed Lang Yun, "Captain Lang Yun, gather the bodies of these Crystal Giant Scorpions and take them back to the surface, and let the hunting team members explore other corners of the mines."

Lang Yun nodded and then went to work with Hu Wen; the image of Su Yu in his mind had completely replaced the old Administrator and even made him more revered than before.

Su Yu wasn't concerned about everyone's reactions anymore.

He felt a surge of powerful energy within his body.

It seemed that his body had broken through some kind of limit.

After instructing everyone, Su Yu went to rest on the side, but in reality, he opened the transition panel.

[Ding!]

[You killed a Crystal Giant Scorpion (Four-Star Intermediate), you gained professional experience...]

[You killed a Crystal Giant Scorpion (Four-Star Advanced), you gained professional experience...]

[Mechanical Warrior level up! Heart of Steel synchronously enhanced!]

[You gained 100,000 points of professional experience (Mechanical Warrior lv max)!]

The Mechanical Warrior reached max level!

Su Yu, filled with anticipation, was very curious about how the core ability, already outstanding as the Heart of Steel, would evolve after reaching max level!

[Ding!]

[Based on your maxed-out core ability (Heart of Steel), you gained Core Specialization (Steel Spirit)]

[Core Specialization: Steel Spirit]

[Description: Every Mechanical Warrior is a master of Mechanical Weapons. Over years of combat, the Mechanical Creations that have accompanied them the longest have birthed a special spirit under the stimulation of Spiritual Energy—the Steel Spirit.]

[Enlighten the Mechanical Creations you've created, bestowing them with spirit. Enlightened Mechanical Creations will possess unlimited growth potential, capable of growing alongside the Creator. (Enlightenable quantity: 1)]

Chapter 189: Chapter 114 2nd Tier Profession: Legion Mechanic! Steel Resonance! Unknown Metal Fragment!

Seeing the description of the Steel Spirit, Su Yu's eyes flashed with surprise.

"It can actually enlighten mechanical creations, allowing them to have spirituality and growth potential. This way, the enlightened mechanical creations can always accompany me without being discarded due to my own strength improvements."

"Not only that, but the mechanical creations enlightened by the Steel Spirit are different from those I upgrade myself. Those upgraded by me are limited by materials and intelligent chips and ultimately have an upper limit."

"But the Steel Spirit is different, its enlightened mechanical creations have unlimited growth potential and aren't restricted by materials."

Su Yu realized the power of the core specialization of the Steel Spirit.

"However, for me, the mechanical creations I possess that have reached the excellent grade are only the Thousand-Handed Prosthetic and the Electric Sniper Rifle left to me by my teacher."

Su Yu frowned. In his view, these two mechanical creations are not suitable for enlightenment by the Steel Spirit because they can be completely repaired and enhanced using Sea Blue Source Crystal Ore.

"The mechanical creation that has accompanied me the longest..." Su Yu read the description of the Steel Spirit, "This ability is supposed to be the exclusive ability of a Mechanical Warrior to enlighten their mechanical weapons, but for me, even if a single mechanical weapon has growth potential, it's not much use."

"Because I don't plan to walk the path of a Mechanical Warrior alone."

And the mechanical creation that has accompanied Su Yu the longest isn't the Thousand-Handed Prosthetic or the Electric Sniper Rifle, but the repair robot that was originally small and is now a human-sized special-grade Battlefield Repair Robot, Nuonuo.

Su Yu recalled the repair robot that had accompanied him even before he obtained the Profession Panel, and he made up his mind.

Nuonuo's intelligent chip was already a special-grade chip, making it the most intellectually advanced robot in Su Yu's hands, and Nuonuo has shown thinking abilities beyond ordinary robots.

"Even if Nuonuo's intelligent chip weren't special-grade, Nuonuo is the mechanical creation that has accompanied me the longest." Su Yu quickly made up his mind. Nuonuo already held a special place in Su Yu's heart, and possessing the Steel Spirit, Su Yu naturally hoped Nuonuo would accompany him always.

After making his decision, Su Yu once again focused his consciousness on the Profession Panel.

His Mechanical Warrior and Battlefield Mechanic, the two first-tier professions of an Extraordinary Mechanic, were both maxed out.

[Congratulations Host, since the Mechanical Warrior level is maxed, you can now change to a new profession]

[Detected that the host meets the conditions, a new career path is now open!]

With these two notification messages appearing.

Su Yu's Profession Panel, in the job section, besides Gunfighter and Gunner, had two more profession choices!

He ignored the first-tier professions of Gunfighter and Gunner and turned his attention to the two newly appeared professions.

[Available Career Path: Second-tier Profession · Legion Mechanic]

[Battlefield Mechanic (Main) + Mechanical Warrior + Heart of Steel lv max + Steel Meditation lv max + Basic Mechanical Manufacturing lv max + ... = Legion Mechanic]

[Introduction: An advancement from the Battlefield Mechanic, the Legion Mechanic further maximizes the mechanical legion capabilities of the Battlefield Mechanic, possessing powerful mechanical battalion and manufacturing abilities, as well as an advanced meditation technique from the Steel Meditation. The spiritual energy of the Legion Mechanic can resonate with their mechanical creations! The resonance amplifies both sides, and the mechanical creations provide feedback for resonance amplification to the Legion Mechanic!]

Su Yu was overjoyed to see the emergence of the Legion Mechanic.

"Indeed, unlocking a second-tier profession requires two similar first-tier professions and certain prerequisites to succeed."

"The capabilities of this Legion Mechanic are perfectly suited to me!"

While thinking this, Su Yu wasn't in a hurry and continued to look at the other new profession.

[Available Career Path: Second-tier Profession · Mechanical Wanderer]

[Mechanical Warrior (Main) + Battlefield Mechanic + Heart of Steel lv max + Wilderness Survival lv max + Close Combat Mechanical Manufacturing lv max + ... = Mechanical Wanderer]

[Introduction: Elites among Mechanical Warriors, these powerful warriors have shown their formidable prowess through accumulated special operations, leaving a mark of terror on enemy troops, and are kings of mechanical special operations, wanderers of the night, emissaries of death! They further awaken powerful spiritual energy, enhancing close combat abilities, and their mastery of close combat mechanics reaches an extraordinary level.]

Seeing this, Su Yu had already made up his mind.

"The Mechanical Wanderer is certainly strong, but close combat isn't my focus, and moreover, the invisible threat of the Ghost Tribe is ever-present. Thus, I need large-scale mechanical manufacturing capabilities and mechanical legion combat abilities more than ever."

"So, I choose..."

"To take up the profession of Legion Mechanic!"

With Su Yu's decision, he felt a qualitative change in his spiritual energy!

This change is different from the enhancement of the Spiritual Star Level, where only the total spiritual energy increases with a slight improvement in quality.

But at this moment, after becoming a Legion Mechanic, Su Yu felt his spiritual energy become almost tangible.

If previously the energy from the Steel Meditation was like a gentle stream flowing through a small creek,

Chapter 190: Chapter 114 2nd Tier Profession: Legion Mechanic! Steel Resonance! Unknown Metal Fragment!_2

At this moment, after taking up the role of Legion Mechanic, the spiritual energy transformation is akin to rivers surging, irresistibly powerful and tumultuous!

Not only that, Su Yu also felt that his Spiritual Star Level had crossed another threshold!

[Ding!]

[Congratulations to the Host on successfully assuming the position of Legion Mechanic (lv1: 0/10000).]

[Congratulations to the Host, the Steel Meditation has advanced to Steel Resonance! Steel Resonance (lv1) further enhances the Legion Mechanic's unique spiritual energy, adept at using legion warfare. Once the number of Mechanical Creations under control reaches a certain quantity, the Legion Mechanic will gain a powerful amplification from the resonance effects induced by Steel Resonance!]

[Beginner Mechanical Manufacturing has advanced to Intermediate Mechanical Manufacturing!]

[Congratulations to the Host for acquiring a new skill: Legion Manufacturing!]

[...]

With the panel notification sounds, Su Yu had successfully become a Legion Mechanic.

"Display the panel." Su Yu silently recited in his mind.

Then, the panel appeared before Su Yu, who, ignoring other data, focused his attention on the newly added attributes.

[Name: Su Yu]

[Current Profession: Legion Mechanic]

[Profession Tier: Tier 2]

[Skills: ...]

[Core Abilities: ...]

[Steel Resonance: Your spiritual energy can resonate with the Mechanical Creations you create, further enhancing their power. Moreover, under the control of the Resonance, the Mechanical Creations will feedback resonate with you, improving your spiritual energy and physical fitness. This is the core ability on which Legion Mechanics rely to survive, often enabling them to greatly avoid being targeted by enemies on the battlefield.]

[Spiritual Power Star Level: Four Star Advanced]

[Physical Body Star Level: Five Star Novice]

Upon seeing the effects of Steel Resonance, Su Yu was thrilled.

"Steel Resonance truly deserves to be a Tier 2 profession; compared to Steel Meditation, it's not just a little bit stronger!"

"This ability of Steel Resonance, if my guess is correct, should be what Legion Mechanics use to guard against decapitation strikes from enemies. But for me, with multiple Transcendent professions and a Physical Body Strength already at Five Star Novice, combined with Steel Resonance, there's no threat of being decapitated at all."

"Under the resonance of a large number of Mechanical Creations, I can completely elevate another level. If I don't decapitate others, that would be considered refraining."

Su Yu quickly realized the power of his job transition panel.

Those numerous Transcendent professions, during the most glorious times of the Human Empire, were not absent, but for them, reaching the end of one Transcendent path was considered quite commendable.

However, for Su Yu, under the powerful functions of the job transition panel, the fusion of various professions would only make his strength grow even stronger, leading to a transformation.

Su Yu imagined a scenario where he manipulated a mechanical legion to fight the enemy, and when the enemy tried a decapitation strategy, after breaking through layers of Mechanical Creations, they found to their despair that Su Yu himself was the strongest entity within the entire legion.

"Who would think that as a Legion Mechanic, my own being is the strongest point of the entire legion."

Su Yu quickly cast aside these scattered thoughts, and after adapting to the strengthened spiritual energy, he planned to explore the mine once again.

Although the Giant Scorpions had been dealt with, the reason behind the birth of the Sea Blue Source Crystal had not been discovered.

As for the Enlightenment of Nuonuo's Steel Spirit, Su Yu was not in a hurry. Instead, he intended to wait until returning to the Sanctuary, using new mechanical technology and newly acquired materials to upgrade Nuonuo before performing the Enlightenment.

At this time, Lang Yun found Su Yu. He had seen Su Yu resting on the side and dared not disturb him until now when he saw Su Yu had finished resting.

"Master Administrator, under your service, I discovered a peculiar place that appears to be the source of the Sea Blue Source Crystal's birth."

These words surprised Su Yu somewhat.

At once, Su Yu spoke, "Then let's go take a look."

Su Yu was very curious about the Sea Blue Source Crystal and the changes within this mine, as the Sea Blue Source Crystal was a rare item for him now. Finding the cause behind its birth would mean Su Yu might possess nearly infinite Sea Blue Source Crystals.

Soon, Lang Yun led Su Yu to a cave.

At the cave entrance, two members of the hunting team were guarding.

Seeing Su Yu arrive, they immediately stepped aside.

Su Yu walked into the cave, and the scene before his eyes made his heart tremble.

He saw an abundance of Sea Blue Source Crystals. Unlike those exposed at the previous mine entrance, the Sea Blue Source Crystal Ore here surpassed in both content and quantity.

There were so many.

The entire mine was filled with Sea Blue Source Crystals.

With just a cursory glance, Su Yu knew that the quantity and quality of the Sea Blue Source Crystal Ore in this mine, after refining and purification, would yield no less than ten thousand pounds of finished Sea Blue Source Crystals.

Lang Yun had now caught up as well, pointing to an elevated platform in the cave composed entirely of Sea Blue Source Crystals.

"Master Administrator, this mine was discovered by a member of the hunting team. When he first came across this mine, he saw an unknown Metal Ore on that central platform emitting a faint blue light."

"Where the light passed, the Sea Blue Source Crystal Ore underwent changes. Although the area has not been tested with instruments, based on color changes, I speculate that the Sea Blue Source Crystal content might have increased."
