Unknown Metal Fragment!\_3 - Read Infinite Job Transfers Starting from Mechanic Chapter 191 - 114 2nd Tier Profession: Legion Mechanic! Steel Resonance! Unknown Metal Fragment!\_3**

## **Chapter 191: Chapter 114 2nd Tier Profession: Legion Mechanic! Steel Resonance! Unknown Metal Fragment!\_3**

Lang Yun pointed to the high platform and explained.

"That piece of metal ore should be some rare material, which has led to the increase of the Sea Blue Source Crystal Ore."

Meanwhile, Su Yu also focused his attention on the unknown metal atop the high platform. After scrutinizing it for a few moments, Su Yu realized something was off.

In Lang Yun's opinion, that piece of metal should be some kind of material, but in Su Yu's eyes, it was clearly a metal fragment dropped from some kind of mechanical creation!

There were obvious artificial marks on it!

This discovery shocked Su Yu inwardly, but he didn't show it on his face.

Lang Yun also began to explain: "The person who initially discovered this piece of metal ore, out of curiosity, attempted to approach it, but found that no matter what, they could not get close. Additionally, they were injured by an invisible force field emitted by this ore, and are still unconscious."

"My lord, upon receiving this information, I blocked the area, preventing anyone from approaching, and immediately informed you."

Su Yu nodded in approval of Lang Yun's actions. Although Lang Yun and Hu Wen's personalities might be lacking, their experience as old Hunting Team Leaders was indeed valuable.

"Where's the unconscious person? Bring him here," Su Yu instructed Lang Yun. He did not intend to try contacting the metal fragment immediately; facing a fragment capable of generating Sea Blue Source Crystals required some caution.

Soon, the unconscious person was brought before Su Yu on a stretcher by two members of the Hunting Team.

Su Yu noticed a faint trace of spiritual energy within this person. However, this spiritual energy was different from the one Su Yu wielded and from the one seen in other Transcendents he had encountered.

The nature of this spiritual energy was calmer compared to normal spiritual energy, akin to a placid pool.

It was this spiritual energy that had caused the member of the Hunting Team to fall into a coma.

"Another new type of spiritual energy?" Su Yu wasn't surprised. He had encountered other types of spiritual energy before, such as the ghost energy from Li He and the Ghost Tribe, which was essentially a form of spiritual energy, albeit extremely violent with strong side effects, but still spiritual energy in essence.

Su Yu's spiritual energy had also undergone a change in nature after being honed by the Steel Resonance, albeit not a significant one.

At this moment, Su Yu used the Steel Resonance to drive out the special spiritual energy from the Hunting Team member.

Soon, the team member regained consciousness.

Upon seeing Su Yu and Lang Yun, a trace of fear flashed in the team member's eyes.

Su Yu had previously instructed them not to act rashly upon finding anything unusual, but to notify him immediately.

Clearly, this Hunting Team member did not follow that directive.

"My lord, I..." The team member, realizing his mistake, was somewhat fearful.

Su Yu said, "No need to apologize. First, tell me what happened when you approached the metal ore and why you fell unconscious."

Hearing Su Yu's words, the team member immediately responded, "I don't know either. When I got close to the metal ore, I felt an invisible force wrapping around me, and then I seemed to see some kind of vision..."

"What vision?" Su Yu pressed for more information.

The Hunting Team member then painfully held his head, hesitated for a moment, and said, "I... I can't remember..."

"But I vaguely remember it was a battle, a very fierce battle, with many people dying in the vision..."

"However, I felt that the metal ore seemed to be trying to convey a message to me, but I wasn't able to see it clearly."

Su Yu didn't say much after listening and returned to the cave. Lang Yun was tasked with handling the mistake made by the Hunting Team member.

"What the member said is probably true, but what exactly is the mysterious metal fragment? What kind of mechanical creation did it fall from, and just a fragment of it can generate so many Sea Blue Source Crystals?"

"If the mechanical creation were still intact, how powerful it must have been."

"However, the danger doesn't seem to be that great, so it might be worth a try."

With that thought, Su Yu instructed Lang Yun to guard the entrance and prevent anyone from entering.

Then, Su Yu slowly walked towards the high platform where the Sea Blue Source Crystals were located.

As he approached within twenty meters of the platform, Su Yu felt wrapped in an invisible force field.

However, this force field made Su Yu feel inexplicably comfortable.

Moreover, Su Yu faintly sensed that this force field shared some commonality with the spiritual energy brought about by the Steel Symphony.

"Could it be that this metal fragment was created by a powerful Mechanic or even the Legion Mechanic's advanced profession, and this mechanical creation inherently possesses a special spiritual energy field, which is why the spiritual energy left on the Hunting Team member resembled a still pool?"

Su Yu felt that he was beginning to understand, and he continued to approach the metal fragment.

He didn't feel any harm, and instead, sensed a kind of resonance from the metal fragment, as if it had been waiting for him.

"No, it's not waiting for me. This metal fragment should be waiting for someone who possesses the series of spiritual energy Meditation Techniques related to the Steel Meditation."

Su Yu quickly recalled that, when he became a Battlefield Mechanic, the panel described it as one of the Empire's Foundation Professions.

"This means the metal fragment is likely a creation of the former Empire!"

"Even if it's not, this metal fragment has an enormous connection with the Human Empire!"

## **Chapter 192: Chapter 115: Command of the Giant God Soldier Fragment, The Civil Unrest 10,000 Years Ago, The Supreme Command**

This discovery left Su Yu secretly astonished.

It should be known that whether it is the Human Empire or forces related to it, it has been nearly ten thousand years since they were last on the Ruins Star.

Therefore, this metal fragment before him is at least a ten-thousand-year-old creation.

It has been ten thousand years, yet the energy waves lingering in this metal fragment can still give rise to a large cluster of Sea Blue Source Crystals!

"Although I have encountered other creations of the Empire, like that Giant God Soldiers new recruit qualification disc, that disc was completely intact without any damage. Even so, after ten thousand years, it only retains the pathfinding function."

"And now, this metal fragment is already broken to such an extent, yet it can still give rise to the Sea Blue Source Crystal of this mine."

At this moment, Su Yu had closed in to within ten meters of the metal fragment, his gaze firmly fixed on it.

The entire metal fragment appeared black, with an extremely rough exterior, full of pits and bumps, which is why Lang Yun and the others mistook it for a metal ore.

But in Su Yu's eyes, being a Legion Mechanic, the shape of this metal fragment looked like a triangular fragment of some metallic creation. It looked like...

"This fragment, why does it look like a metal token?!"

At this moment, the call of the metal fragment to Su Yu also reached its peak, an invisible spiritual energy field enveloping Su Yu entirely.

Although Su Yu could resist with his own spiritual energy, after contemplating for a moment, he chose to engage with this invisible force field using the spiritual energy brought by the Steel Symphony.

The spiritual energy field of the metal fragment began to interact with Su Yu's own spiritual energy.

The next moment, Su Yu saw an image.

An image from ten thousand years ago.

A flag bearing a blue planet stood atop a steel tower, burned by raging fire, soon turned to ash, scattering in the air.

"Celeste Second Empire." Su Yu recognized the origin of the flag.

That was when the Ruins Star was still called Azure Star, during the early tides of subspace, after Azure Star lost contact with the Human Empire, the first ruling power to emerge—Celeste Second Empire.

And the flag bearing a blue planet was the emblem of the Celeste Second Empire.

Behind the burning flag was a giant city of steel, an enormous city built entirely of metal.

In the immensely vast Steel City, every building was made of metal, and at this moment, the entire Steel City was engulfed in the flames of war.

Everywhere were collapsed metal buildings, everywhere were raging fires, the firelight reflected by those metal buildings dyed the entire Steel City crimson.

Amidst the collapsed metal buildings were countless people fleeing.

Shouts, cries, the sound of metal tearing as buildings collapsed, all formed a painful elegy at that moment.

Su Yu saw that many people fleeing stepped on paper cards with slogans printed on them.

"Resist Celeste tyranny, humanity belongs to the Star Sea!"

"The Celeste Commander has no right to stop us from exploring the Star Sea, the freedom of Azure Star belongs to each of us!"

"Lift the blockade, even the Giant God Soldiers have no right to blockade us..."

These slogans surprised Su Yu, but he quickly recalled the records in the letter left to him by the former administrator.

"Could this be the internal rebellion of the Celeste Second Empire, where they prevented the people of Azure Star from leaving Azure Star, and took bloody measures to suppress all resistance, leading to the downfall of the Celeste Second Empire?"

Su Yu watched every scene in the image, not wanting to miss any detail.

Because the letter from the old administrator mentioned that this rebellion was the beginning of the downfall of the Celeste Second Empire, which also led to the destruction of the capital of the Celeste Second Empire, turning into what is now one of the three forbidden zones of the Ruins Star, the Steel Jungle.

At this moment in the image.

In the sky above the fleeing crowds were countless warriors clad in Celeste mechanical battle armor, and countless giant mechs, tens of meters high, engaged in battle.

Their enemies were also warriors clad in Celeste mechanical battle armor and equally towering mechs, but the heads of their opponents' armor were painted red.

These two distinguishable groups, dressed in the same mechanical battle armor and wielding similarly equipped weapons, fought without mercy.

The roar of machinery, the metallic clatter of battle armor colliding, echoed throughout the entire steel metropolis.

When they struck, they paid no heed to the fleeing crowds below, only engaging in relentless battles and unceasing slaughter.

Just the aftershocks of their clash destroyed more than half of the steel buildings.

"The strength displayed by these mechanical warriors, each is at least above Star Five level. Moreover, the technical level contained in their battle armor far exceeds what I currently master."

At this moment, the image shifted again, starting to soar upwards infinitely.

Soon, Su Yu saw all the buildings of the Steel City becoming smaller and smaller, the wailing people on the ground, and the warriors in mechanical armor constantly clashing, all seemed like ants.

And Su Yu finally understood whose perspective this image came from.

The perspective of the image belonged to an enormous mechanical creation, a humanoid mech towering a thousand meters high, from whose view the entire Steel City and everyone in it appeared minuscule.

## **Chapter 193: Chapter 115: Giant God Soldier Command Fragment, The Civil Unrest 10,000 Years Ago, The Supreme Command\_2**

The previous scenes were just glimpses of the Steel City seen by this mecha.

As the view panned upwards, Su Yu also saw parts of the mecha's body, crafted from radiant metallic material like the sun. Yet, now, this originally resplendent mecha was covered in a black liquid substance, like a living organism, gradually corroding the mecha itself.

At this moment, the humanoid mecha, which was a thousand meters tall, slowly raised its right arm.

Su Yu, through the perspective of this mecha, saw the right arm covered in black liquid substance, slowly corroding the body of this thousand-meter-tall giant mecha like maggots.

A gentle male voice suddenly echoed from within the mecha, "Has it come to this already?" Su Yu immediately realized this was the owner of the colossal mecha.

"Have my attempts ultimately failed?" The gentle voice was exceedingly calm, as if unaffected by the chaos of the Steel City below and the corrosion of his own mecha.

"Yes, you have failed! Zhang Chenfeng, your Giant God Soldiers, your Radiant Mecha, the so-called Azure Second Empire you established, will all vanish." The same gentle voice continued, but this time the previously calm tone turned ominous.

When Su Yu heard this, he was slightly taken aback. Although it was the same voice, coming from within the mecha, to Su Yu, it seemed to belong to two different individuals, or even two different creatures.

"You can't stop me, you can't stop me! All your efforts to confine me to this planet, what good are they?" The sinister tone resounded again, "Look, take a look, all your painstakingly enacted laws to prevent people on this planet from fleeing, what use are they?"

"You can't reveal the truth to them, you dare not let the masses know of my existence, even if you violently eliminate everyone who knows of me, what good is it?"

"As the only remaining Planet-Level Transcendent on this planet, even if you can suppress everything with power for a short time, so what? What good is it?"

"You can't possibly kill me, as long as humanity exists, I will endure. You humans are nothing but my sustenance."

"Look at those innocent people, their deaths are so miserable, knowing nothing. And those ostensibly your subordinates, those who claim loyalty to you, with just a little manipulation from me, and I can draw out the greed buried deep within their hearts."

"You've obstructed me for so long, yet in the end, it's all for nothing, hahahaha."

"Look at your people, hear their wails, all of this is your doing; they didn't have to die."

The sinister voice turned somewhat agitated, seeming to take immense pleasure from the dreadful state of the Steel City. The black liquid substance on the thousand-meter-tall mecha was now increasing, having covered half of its body.

Su Yu, hearing these words, suddenly recalled the thought that he had after reading the administrator's letter.

The Azure Second Empire's intention to prevent any attempts to flee off this planet was indeed to isolate, to isolate something akin to a virus, as Su Yu had suspected after reading the Azure history from the administrator's letter.

And now, this speculation is evidently true. The Azure Second Empire was indeed meant to stop something from escaping this planet.

The ominous voice continued, "The nature of humanity is greed, so they greedily crave the so-called freedom, desire to escape this planet, and even covet your position."

"This is human nature, you can't stop it, nor can you change it..."

At this point, the sinister voice abruptly stopped, and Zhang Chenfeng's gentle voice spoke again, still in that calm tone.

Zhang Chenfeng said, "You're wrong, it's not greed. Humanity's longing to explore the stars is an instinctive pursuit of the unknown, a yearning that comes from humans themselves, like climbing a mountain, like the Human Empire's millennia-long exploration of the universe."

"When humans were stranded on the planet's surface, they explored fire, freeing themselves from a primitive lifestyle. Through the exploration of steam, they invented the steam engine, ushering in a new era. By exploring gravity, they escaped the confines of the planet's surface. Through the exploration of light, they broke free from the limits of light speed..."

"Gravity is a slope, light speed is also a slope, and even this vast universe, including Subspace, is a slope waiting for humanity to climb."

"I was wrong, but not because of so-called inherent greed, but because I vainly tried to stifle humanity's yearning for the stars with my own strength."

"As for you, born from Subspace, you came into existence due to humanity, yet you vainly seek to influence humans with your narrow mindset."

"I can't kill you, but I won't let you leave this planet, even if it means killing everyone on this planet, to prevent humans from becoming your spawning ground."

"Besides, I've never thought about relying on others, nor have I thought of depending on so-called subordinates to deal with you."

In Zhang Chenfeng's tone, there was a trace of reminiscence, as he said, "I have always relied on them."

### **Chapter 194: Chapter 115: Giant God Soldier Command Fragment, The Civil Unrest 10,000 Years Ago, The Supreme Command\_3**

The mechanical arm of the Radiant Mecha stretched out at this moment, emitting a warm light.

And under the illumination of this light, the black liquid substance attached to the Mecha's arm began to rapidly dissolve like snow under the sun.

At this moment, that eerie voice reappeared, this time with a somewhat panicked tone: "Zhang Chenfeng, what are you going to do!"

"What do you think I've been doing all these years? You can only try to influence this world from a human perspective, but you cannot see those who have always been in the shadows."

At this moment, the kilometer-high Radiant Mecha emitted a faint, warm light all around, and soon this light grew brighter and brighter, making the kilometer-high body become incredibly radiant.

At this moment, the Radiant Mecha was like a warm sun, illuminating every corner of the Steel City.

Su Yu saw this scene, feeling an unparalleled shock in his heart.

The light emitted by the Mecha was not just any ordinary light.

It was Spiritual Energy, nearly tangible Spiritual Energy! Tangible Spiritual Energy visible to the naked eye!

Nearly tangible Spiritual Energy covered an unknown distance, encompassing the entire Steel City!

Zhang Chenfeng's voice rang out once more.

"I, Zhang Chenfeng, Commander of the Giant God Soldiers, supreme leader of Azure Star, and in the name of the only Apostle Mechanic on this planet, command you."

"All Mechanical Creations on Azure Star, heed my command!"

The tangible Spiritual Energy, warm like sunlight, spread at this moment, enveloping the entire Steel City.

In the Steel City, the chaotic people stood there, dumbfounded, watching this scene, staring blankly at the Radiant Mecha as if it were a deity.

"In the name and authority of the Apostle Mechanic, I issue my first and only supreme directive in my life."

"Prevent all beings from escaping this planet, block all life forms trying to escape from this planet, including myself!"

With the issuance of Zhang Chenfeng's directive.

The Spiritual Energy that originally enveloped the entire Steel City spread once more, stretching toward the outside of the Steel City.

At the same time.

Su Yu, seeing through the perspective of the Radiant Mecha, witnessed a scene that he would never forget in his lifetime.

The Mechanical Creations within the Steel City, at this moment, disobeyed their original master's orders and halted under the influence of Zhang Chenfeng's Spiritual Energy.

In an unknown direction far from the Steel City, countless Mechanical Creations surged toward the Steel City at this moment.

Yet at this moment, Su Yu felt the sadness of the Radiant Mecha.

Yes, sadness.

This Radiant Mecha was itself alive, a living Mechanical Creation.

Obviously, as a Mechanical Creation, especially such a kilometer-high war machine, it shouldn't have such emotions even if it were alive, yet at this moment, Su Yu could feel these emotions of sadness through the perspective of the Radiant Mecha.

"Old buddy, thank you for accompanying me all these years and for accompanying me on this final journey." Zhang Chenfeng's words sounded once again.

And the warm, sunlight-like tangible Spiritual Energy expanded once more at this moment.

The liquid substance that once adhered to the Mecha disappeared entirely, replaced by cracks appearing on the Mecha's chassis.

In the Steel City at this moment, people had already ceased fighting, watching the varied Mechanical Creations, continuously surging into the Steel City under Zhang Chenfeng's supreme command.

These Mechanical Creations ignored everyone in the city, continuously surging toward the body of the Radiant Mecha.

Under the irradiation of Spiritual Energy, these Mechanical Creations climbed the chassis of the Radiant Mecha, continuously dissolving, and ultimately merging into one with the Radiant Mecha.

And at this moment, the body of the Radiant Mecha gradually grew larger.

The eerie voice no longer sounded, seemingly having left the Radiant Mecha itself, leaving this place.

And not far off, countless interstellar vessels belonging to humans launched at this moment, countless flames shooting toward the sky, seemingly the last struggle of the unknown presence.

However, in the next moment, the right arm of the Radiant Mecha gently pinched.

Those interstellar vessels exploded all at once at that moment.

At this moment, the humans within Steel City began to flee, though those Mechanical Creations themselves did not pay attention to humans, but their massive bodies and sheer numbers had long filled the space within the Steel City.

The body of the Radiant Mecha continued to fracture, though many Mechanical Creations used themselves to repair the cracks, it was ultimately just a drop in the bucket.

In the end, the entire body of the Radiant Mecha fractured, and the scene before Su Yu's eyes disappeared accordingly.

Su Yu broke away from the images brought on by the metal fragments.

The invisible force field that had enveloped Su Yu also disappeared at this moment.

For a long time, Su Yu finally emerged from the shock brought by the scenes from the metal fragments.

Su Yu's gaze turned to the piece of metal fragment.

At this time, the transition panel finally displayed some information about the metal fragment.

[Giant God Soldier Command Fragment]

[Producer: Zhang Chenfeng]

[Grade: Planet Legend]

[...]

"A fragment of the Radiant Mecha?" Su Yu looked at the broken Giant God Soldier Command he had picked up, finding that at this moment the metal fragment itself had lost its peculiar ability.

It seemed that after nurturing a large number of Sea Blue Source Crystals and conveying images to Su Yu, it exhausted its last bit of strength.

The metal fragment now held no peculiarity beyond the quality of its material, just an ordinary piece of metal fragment.

Su Yu put away the piece of metal fragment, began recalling scene after scene from the past images.

"That Steel City, it must be the realm the old administrator spoke of as Azure's Second Empire, which is also today's Steel Jungle."

"It's just that in the final images, even though the Mechanical Creations in Steel City, under Zhang Chenfeng's constraint, didn't harm those humans, only drove them away, why did Steel City still become one of the forbidden zones known as Steel Jungle today?"

Su Yu's doubts grew more and more.

### **Chapter 195: Chapter 116: Return, Encounter with a Scavenger, Nuonuo's Thoughts, Steel Spirit, Transformation Begins!**

"What can be confirmed now is that the Steel City from ten thousand years ago is the current Steel Jungle. Additionally, over the course of these ten thousand years, Steel City must have undergone other changes, resulting in its transformation into the current Steel Jungle."

"Also, if nothing else, Zhang Chenfeng should have succeeded in the end. Up until now, no one has been able to escape the constraints of Ruins Star."

Su Yu recalled the destruction of Dawn City, the old administrator's words describing the city destroyed by countless meteors.

"If you attempt to venture into the starry sky, will you be attacked by the Mechanical Creations left by Zhang Chenfeng?"

Su Yu quickly began analyzing the complex situation on Ruins Star based on the information in the images.

"The unknown entity from the Subspace that Zhang Chenfeng spoke of is likely using some form of symbiosis or more advanced methods to coexist with humans. Zhang Chenfeng blocked all attempts to escape into the starry sky to prevent such an entity from leaving Ruins Star."

"It appears that this method has at least been successful because even after ten thousand years, Dawn City still fell to the Mechanical Creations left by Zhang Chenfeng. But is it worth it?"

Su Yu recalled the old administrator's letters, the despair and unwillingness as he described the fall of Dawn City.

It seemed that the dark clouds in the history of Ruins Star were not dispelled by the images left by the Radiant Mecha, but rather, more questions arose.

"Similarly, that unknown entity from Subspace, even if it hasn't left this planet, would have tried other means to leave over ten thousand years. In fact, the history of Ruins Star, the fall of ruling forces after the Blue Second Empire, is related to it."

"Even..."

Su Yu recalled the oddity of Li He before, and after killing Li He, the mark left by the unknown entity, he suddenly had some ideas.

"Perhaps that unknown entity was the one Li He worshiped, the source of Li He's strange Meditation Technique!"

"Fortunately, after taking on the second-tier profession of Legion Mechanic, I successfully removed that unknown mark which could have led to transforming into a Mechanical Missionary."

"So if we assume that the unknown entity Li He worshiped and the one blocked by Zhang Chenfeng ten thousand years ago are the same, then the current state of Ruins Star is inevitably tied to that unknown entity."

"The mysterious properties of Ghost Energy might be related to that unknown entity."

Su Yu felt a slight panic in his heart, but soon, he calmed himself.

"There's no need to worry excessively. That unknown entity hasn't been able to nullify Zhang Chenfeng's methods over the past ten thousand years, indicating its strength isn't too formidable—at least its condition isn't great. Otherwise, it would have done more than leave a mark when I killed Li He. There's no need to think too much about it now."

Su Yu quickly put these doubts aside, understanding that there were too many questions about the history of Ruins Star over ten thousand years, not to mention the Blue Second Empire, which was just Ruins Star's first ruling force.

"By the way, Zhang Chenfeng's final method, the Supreme Command..."

"Apostle Mechanic?"

Su Yu recalled the scene he'd just witnessed, even after ten thousand years. The power to control the Mechanical Creations of an entire planet with a single command still shocked Su Yu.

"The Apostle Mechanic should be a high-level progression in the path of Extraordinary Mechanic within the Human Empire, possibly an advancement direction for the Legion Mechanic."

"Even if it's not, it doesn't matter. At least there's that possibility. And with my job transition panel, given enough time, I can achieve the level of an Apostle Mechanic myself—perhaps even more special due to the stacking nature of the professions."

Having thought these things through, Su Yu left the mine, finding Lang Yun, who was guarding the entrance, and asked, "Captain Lang Yun, has the mine exploration been completed?"

"It's already completed. All the caves in this mine have been thoroughly explored. Due to the presence of the Giant Scorpion Clan, there are no other traces of Radiation Beasts here, making it safe for mining."

Su Yu nodded, then said, "Good, in that case, let's return to the Sanctuary, organize some personnel, and commence mining in this cave."

Su Yu then proceeded to head towards the surface, carrying with him a metal fragment from the Radiant Mecha.

Upon reaching the surface, Nuonuo approached him immediately, showing a cute little expression on its electronic screen.

"(⌘\_⌘✧)"

"Master, you have returned safely."

Seeing Nuonuo, now as tall as a person and equipped with more than ten additional mechanical arms added by him, whose strange form no longer resembled a repair robot, Su Yu felt a sense of guilt.

Previously, in the Sanctuary, Su Yu needed this repair robot, Nuonuo, to take on tasks beyond its capabilities due to his own lack of strength. But now, with his increasing power, Su Yu no longer needed Nuonuo to carry out other tasks.

Su Yu patted Nuonuo's head and said, "Nuonuo, did my modifications make you unhappy?"

### **Chapter 196: Chapter 116: Return, Encounter with a Scavenger, Nuonuo's Thoughts, Steel Spirit, Transformation Begins!\_2**

Nuonuo hesitated for a moment, seeming to find Su Yu's question somewhat difficult to understand.

But soon, Nuonuo gave a reply.

"No way, master. Although Nuonuo wants to be a repair robot, as long as it's something the master needs, Nuonuo will definitely agree. As long as I can meet the master's requirements, Nuonuo won't be unhappy."

"(๑'₃•๑)"

Upon hearing this, Su Yu felt a warmth in his heart and already had an idea in mind, patting Nuonuo's head once more.

Then, he turned to the hunting team guarding the cave entrance and said, "Let's head back to the sanctuary."

At this time, Lang Yun and the others were also bringing out the bodies of the Crystal Giant Scorpion Leader and the three Crystal Giant Scorpions from the mine.

They placed them on a cart and headed toward the sanctuary.

The mine was only about five kilometers from the sanctuary.

Before long, Su Yu could see the shadow of the sanctuary's walls.

However, Su Yu noticed that at a spot not far from the sanctuary, a few hundred meters away from them, there was another group advancing.

"That's not the sanctuary's hunting team, are they Scavengers?" Su Yu frowned.

Encountering Scavengers in the wilderness is never a good thing.

If they were Scavengers forced into scavenging due to the destruction of their settlements, that would be somewhat acceptable. But it would be troublesome if they were the kind who lived off robbery and slaughter.

Although Su Yu didn't think that Scavengers in the wilderness could pose a threat to him, their target was clearly the sanctuary.

Su Yu carefully observed the Scavenger team. With his current strength, he could see the makeup of that group very clearly.

This group of Scavengers had over two hundred people, most of whom were in rags, consisting of all ages, and among them, only a little over thirty could be considered capable combatants.

"This is a group of refugees, but I don't know why they want to come to our sanctuary."

Su Yu pondered for a moment, and then instructed Lang Yun and Hu Wen behind him, saying, "Captain Lang Yun, take some people to make contact with that group of Scavengers. As for Captain Hu Wen, lead the rest of the members and the Crystal Giant Scorpion carcasses back to the sanctuary first."

Upon hearing Su Yu's words,

the two of them left to do as instructed.

Meanwhile, Su Yu mobilized his mechanical army, slowly advancing toward the Scavengers.

Though Su Yu did not think these Scavengers could pose any danger to him, after seeing the remnants of the Radiant Mecha, he knew that the dangers and hidden threats on Ruins Star weren't as superficial as they appeared.

"No matter their intentions, let's control them first," Su Yu said to himself.

In fact, Su Yu had already decided deep down to stay at the sanctuary for now, except for searching for materials needed for manufacturing Intelligent Chips, he intended to max out all professions he could improve, before considering anything else.

Meanwhile, as the Scavengers noticed Lang Yun and the others approaching, they became somewhat panicked.

When they saw Su Yu controlling the mechanical army to gradually approach them, their panic intensified.

Most of the Scavengers started to retreat, appearing extremely fearful. Only one young man remained calm and even took the initiative to meet Lang Yun.

"Who are you? What is your name?" Lang Yun asked as he approached with a few members of the hunting team, addressing the young man.

Although the young man's face remained calm, his trembling legs betrayed his unease.

After all, the mechanical army controlled by Su Yu behind Lang Yun was truly terrifying.

Still, the young man mustered the courage to speak.

"Sir, my name is Yu Ping'an. The leader of the Wandering Village was my father."

"Sir, we are from the Wandering Village. Some days ago, the Wandering Village was destroyed, and we are the only survivors. We were left with no choice but to flee here."

"Our Wandering Village once made several trades with the managers of Shelter No. 73, and my father was the Wandering Village's leader. Unfortunately, he died at the hands of the Ghost Tribe. Before he died, my father told me he had some connection with the managers of Shelter No. 73, asking us to flee here. We have come seeking Shelter No. 73's protection."

Yu Ping'an's tone was sorrowful, indicating that the destruction of the Wandering Village deeply affected him.

Hearing this, Lang Yun paused; he vaguely recalled that, under the previous manager, Shelter No. 73 indeed had some trade dealings with the Wandering Village. However, Lang Yun was unaware of the exact relationship between the two.

Meanwhile, Su Yu also surrounded this group of Scavengers with his mechanical army.

The conversation between Lang Yun and Yu Ping'an was clearly heard by him as well.

Seeing Su Yu, Lang Yun immediately spoke up, "Administrator, they are from the Wandering Village..."

Lang Yun was about to describe the situation when Su Yu waved his hand to stop him.

"I heard everything."

Then Su Yu looked at Yu Ping'an and said, "The old manager has passed on. I am the new manager of Shelter No. 73. As for the claims of a relationship with the old manager, those can't be verified."

Upon hearing this, Yu Ping'an's face changed dramatically, as if he had lost all hope, and he collapsed to the ground.

"However, if you wish to join Shelter No. 73, that's also possible. The sanctuary is currently in dire need of manpower." Su Yu smiled warmly at the dejected Yu Ping'an.

In the end, he was just a young man without hidden motives.

### **Chapter 197: Chapter 116: Return, Encounter with a Scavenger, Nuonuo's Thoughts, Steel Spirit, Transformation Begins!\_3**

However, Su Yu was not concerned about this group of Scavengers themselves, but he was quite interested in what Yu Ping'an had mentioned earlier, about how his father died after the Ghost Tribe's attack and the destruction of the Wandering Village.

At the moment, Su Yu instructed Lang Yun, "Captain Lang Yun, you're responsible for receiving this group and coordinating with the management office to settle them properly. Also, get detailed information about the destruction of the Wandering Village and report back to me afterwards."

Then, Su Yu, along with Nuonuo, walked towards the Sanctuary.

After returning to the Sanctuary, Su Yu issued orders regarding the extraction of the resource points and left it to the people at the Sanctuary, then returned to his own quarters.

...

Thus, a week passed.

Su Yu, looking at the information sent by Lang Yun and others on his personal terminal, couldn't help but smile a little.

"The extraction of the resource points has been proceeding smoothly. Every week, we can now mine ten thousand jins of Sea Blue Source Crystal Ore and Tungsten Blood Steel Ore. Even after smelting and removing impurities, the remaining Sea Blue Source Crystal and Tungsten Blood Steel amount to over a thousand jins."

"Not to mention the extraction at several other resource points. After preliminary refining by the Mechanical Repair Department, I'm not lacking any basic materials."

"The hunting team is also on track, and the Sanctuary's balance of income and expenses has been achieved. Moreover, the new addition of the remnants from the Wandering Village gave me quite a surprise."

The Wandering Village was originally a small settlement, a group of desolate Scavengers who organized themselves into a small settlement, even less formidable than Shelter No. 73.

And such a settlement was unfortunately very close to the Ghost Tribe. It would've been fine normally, but recently, something seemed off.

The hunting activities of the Ghost Tribe had become more frequent, as if they were searching for someone.

The Wandering Village was thus destroyed.

"The Ghost Tribe... remains of the Ghost Empire."

Had Su Yu not witnessed the scene left by the Radiant Mecha, he might have thought that the Ghost Tribe was seeking him because of the destruction of the Wolf Riders squad.

But now it seems the actions of the Ghost Tribe are likely related to that unknown mark.

Even Li He, merely exposed to Ghost Energy, could gain extraordinary Meditation Techniques and strength beyond the ordinary. So, the Ghost Tribe, inheritors of the basic Ghost Empire technology, naturally live off Ghost Energy.

The danger contained within it is far more terrifying than Su Yu previously imagined.

Shaking his head to clear his mind of distractions, Su Yu looked at the two blueprints laid out before him.

These were blueprints from the Wandering Village, presented to Su Yu by Yu Ping'an. One charted the transport crawler mastered by the Wandering Village, and the other depicted the key Water Cultivation Plant System that they relied on for sustenance.

"Although these two blueprints don't significantly help me personally, they are very timely for the Sanctuary. By making use of them, a lot of manpower can be freed up to go to the resource points to mine minerals."

"Moreover, the manufacturing difficulty of these two blueprints isn't high. Now, the Mechanical Repair Department already has the capability to produce them."

Su Yu further upgraded these two blueprints, reducing the difficulty of their production to make it easier for the engineers in the Mechanical Repair Department to manufacture.

Then, Su Yu collected the blueprints and went to the open area outside his residence.

Currently, the open space was stacked with numerous materials.

A thousand jins of Sea Blue Source Crystal, a thousand jins of Tungsten Blood Steel.

And even more of other materials, almost filling up the entire courtyard.

"Before taking over the Sanctuary, Sea Blue Source Crystal and Tungsten Blood Steel could only be counted by the jin, but now, the production of just one week yields a thousand jins."

"And all these materials are for my use alone. All I gave in return was to provide some Mechanical Creations for the members of the Sanctuary."

Seeing the materials piled up in the courtyard, Su Yu couldn't hide his excitement in his eyes.

At this moment, Nuonuo stood next to Su Yu, also showing delight as it looked at the materials filling the yard.

Su Yu said, "Nuonuo, we're going to embark on a big project next!"

"Okay, Master!"

"But before that, there's one more thing to do." Su Yu patted Nuonuo's head.

"!!!"

Nuonuo instinctively took a step back.

In Nuonuo's memory, every time Su Yu said so, he would do something terrifying to transform it, so even at this moment, Nuonuo's electronic display screen couldn't even show an expression.

Seeing Nuonuo's appearance, Su Yu was a bit helpless too, patting Nuonuo's head and comforting, "Don't worry, Nuonuo, this time it's a good thing!"

"π~π"

"Master, you always say that."

Su Yu felt increasingly guilty, yet he still said to Nuonuo, "Nuonuo, this time I won't make any transformations to you. Instead, you'll get to choose how to transform yourself."

In Su Yu's mind, Nuonuo's status far surpassed that of other Mechanical Creations.

And Nuonuo also had intelligence far exceeding that of other machines. Previously, in the mine, Su Yu had considered further enhancing Nuonuo and then empowering it through the Steel Spirit to make Nuonuo stronger.

But after a discussion with Nuonuo at the mine entrance, Su Yu decided against it.

Since Nuonuo's dream was to be a repair robot, he would fulfill it!

Nuonuo wasn't a cold machine but a little robot with the dream of becoming an advanced repair robot.

Su Yu also thought, if he continued to transform Nuonuo according to his own will, the effect gained after being awakened by the Steel Spirit would likely not be good.

If so, it's better to let Nuonuo follow its own ideas.

"You can transform yourself any way you like. This time, I will not impose any restrictions on you." Su Yu pointed to the heap of materials, "All these materials are for your use."

Then, without waiting for Nuonuo to respond, Su Yu placed his hand on Nuonuo's head once more.

Su Yu thought in his heart:

"Steel Spirit!"
