Chapter 199: Chapter 117 First Mechanical Apostle·Superpower Nuonuo, Mechanical Fusion_2

"???"

Seeing this scene, Su Yu had three question marks left in his heart.

"It's really an Electron Furnace." Su Yu's originally calm little heart felt even more heartache at this moment.

Su Yu kept comforting himself in his heart: "My own child, my own child, I can only spoil it."

"Moreover, the Thousand-Handed Prosthetic is indeed somewhat redundant for me now, after all, the external prosthetics cannot amplify one's own power."

"The shells of the Crystal Giant Scorpion and the Steel Giant Scorpion are excellent materials, and I can completely rely on these materials to create a brand new full-body Mechanical Battle Armor. The armor itself can also exert my own physical strength, which is far better than the Thousand-Handed Prosthetic."

"Though Nuonuo took the Electron Furnace, it merely helped me make up my mind."

"Besides, with my current mechanical manufacturing level, relying on the Sea Blue Source Crystal, I might be able to create an Energy Core similar to the Electron Furnace."

Su Yu constantly comforted himself in his heart, and thinking about it this way suddenly made him feel less heartached.

The Electron Furnace, originating from the former manager, was thus taken away by Nuonuo, who then picked it up and walked excitedly to Su Yu.

"Master is so good, I love Master the most."

Hearing Nuonuo's joyful voice, the little heartache in Su Yu's heart completely vanished and he pretended to be generous: "Of course, if Nuonuo needs anything else, feel free to take it."

Nuonuo, however, shook its head and then went to the pile of materials it had selected, starting to transform itself.

Nuonuo's speed was extremely fast, swinging those dozen or so mechanical arms, using a large amount of materials as if they were flowing water.

And Su Yu also noticed that the Spiritual Group with intelligence within Nuonuo was also expanding and enlarging at this moment.

Gradually forming a tangible white Spiritual Energy that enveloped both Nuonuo and that pile of materials together.

This white Spiritual Energy was visible to the naked eye, even Su Yu felt somewhat astonished.

"The effect of the Steel Spirit is so strong? However, it shouldn't be. Such anomalies with Nuonuo should be based on its own special spirituality, coupled with so many accumulated materials."

"Only after Nuonuo followed its instincts to transform itself can it so perfectly match the effects of the Steel Spirit, achieving a result greater than the sum of its parts."

Su Yu quickly understood the changes happening to Nuonuo.

This concrete white Spiritual Energy completely protected Nuonuo.

Forming a white Spiritual Cocoon.

Even Su Yu couldn't see the internal situation inside the Spiritual Cocoon and refrained from using Spiritual Energy to prevent disturbing Nuonuo's evolution.

Yes, evolution.

Su Yu could feel the activity emanating from the Spiritual Energy surrounding Nuonuo, as if carrying some kind of life breath.

Although Nuonuo itself is constructed of mechanical parts, at this critical juncture of evolution, it emits a breath of life.

"If I'm not mistaken, once Nuonuo successfully transforms, it will become a true Mechanical Life, able to grow strong together with me under the effect of the Steel Spirit, possessing infinite growth potential!"

Su Yu's joy was beyond compare at this moment.

"It's just eight hundred jins of Sea Blue Source Crystal and an Electron Furnace, in exchange for Nuonuo's successful evolution, it's a huge profit."

The joy in Su Yu's heart was not solely due to the wonderful effects of Nuonuo's transformation but also because of Nuonuo's special place in Su Yu's heart.

Soon, the white Spiritual Cocoon began to gradually shrink, and Nuonuo's evolution was almost complete.

However, Su Yu faintly perceived that Nuonuo seemed to be missing something.

It seemed to be just a step away from becoming a true Mechanical Life.

At this time, inside the white Spiritual Cocoon, Nuonuo began to think about Su Yu's previous words.

"What kind of machine does Nuonuo want to become?"

Only this one question remained in Nuonuo's mind.

If Nuonuo's dream of becoming an Advanced Repair Robot was merely a framework implanted in its Special Grade Chip when it was first created,

Then now, Nuonuo's dream had already changed.

"Advanced Repair Robot, it seems that Nuonuo has already achieved this."

"Nuonuo now not only wants to become an Advanced Repair Robot."

"Nuonuo wants to become a robot that can help Master while being an Advanced Repair Robot!"

As Nuonuo realized this, the white Spiritual Cocoon began to fade, but Nuonuo's transformation was still slightly lacking.

Su Yu sensed a weak Spiritual Energy Field being born from the white Spiritual Cocoon, and this new Spiritual Energy Field undoubtedly came from Nuonuo.

Moreover, this Spiritual Energy Field also conveyed a message to Su Yu, that it still needed something from Su Yu.

Su Yu quickly realized what Nuonuo needed. He took out a metal fragment from his waist, which was picked up from the mine, originating from the Radiant Mecha's fragment.

A thousand years had passed, and after conveying that image to Su Yu, this fragment had already exhausted its last energy, merely becoming a piece of particularly special material.

Su Yu kept this fragment partly because it was eventually a piece of the Radiant Mecha's fragment, with excellent material, and partly hoping it might come in handy in the future.

And now, Nuonuo needed it, so Su Yu would not hesitate naturally.

He resolutely tossed that metal fragment towards the white Spiritual Cocoon.
