Chapter 200: Chapter 117 First Mechanical Apostle·Superpower Nuonuo, Mechanical Fusion_3

With the metallic fragments tossed into the white Spiritual Cocoon by Su Yu.

The newborn Spiritual Energy Field of Nuonuo also stabilized at this moment.

"It should have succeeded, but I wonder what form Nuonuo will take after becoming a Mechanical Life Form."

Soon, under Su Yu's expectant gaze.

The white Spiritual Cocoon suddenly dissipated.

And the materials originally amassed by Nuonuo and its humanoid-sized mechanical body disappeared at this moment as well.

In its place was a pure white, floating, small round robot, resembling a ball.

On the head of the sphere were two small blue horns, and four devices emitting blue light surrounded it, maintaining its balance in the air.

"Superpower Nuonuo?" Su Yu subconsciously uttered this name.

At this moment, Nuonuo seemed like the superpowered nono from a game Su Yu played in his previous life.

Seeing Su Yu, Nuonuo flew over excitedly, circling around Su Yu and making sounds of excitement.

"Master, look! Nuonuo can fly now!"

"Nuonuo can fly! And finally, those weird mechanical tentacles are gone!"

Nuonuo's tone was like a child seeing their favorite toy, very happy.

Then, Nuonuo flew over Su Yu's head, affectionately bumping Su Yu's forehead.

Su Yu let Nuonuo mess around; now Nuonuo was completely different from before, not only in size but also in emotional character, more like a living being.

No, not more like; Nuonuo was now a completely new Mechanical Life Form.

After a while, Nuonuo played enough, obediently flying to Su Yu's shoulder and landing.

Su Yu picked up Nuonuo from his shoulder, holding it in his arms, eyes focused as Nuonuo's Attribute Panel appeared in front of him.

[First Mechanical Apostle: Superpower Nuonuo]

[Creator: Su Yu]

[Race: Mechanical Life Form]

[Core Ability: Mechanical Evolution (As the Mechanical Life Form you created, Nuonuo possesses infinite growth potential, its strength linked to your Spiritual Energy)]

[Skills:]

[Mechanical Fusion: Nuonuo possesses abilities beyond normal Mechanical Life Forms, with a powerful Energy Core and Spiritual Energy Field, able to fuse with any Mechanical Creation, enhancing the performance comprehensively and greatly amplifying the fused Mechanical Creations. In the Mechanical Fusion state, if the fused Mechanical Creations are damaged, they will also be slowly repaired.]

[Spiritual Energy Field: As a Mechanical Life Form, Nuonuo mastered the use of Spiritual Energy, possessing a unique Spiritual Energy Field; Mechanical Creations inside will also be slowly repaired if damaged.]

[Comprehensive Strength Assessment: Four-Star Advanced]

Nuonuo's panel wasn't lengthy, just a few lines, and only two skills.

This surprised Su Yu a bit.

But soon Su Yu realized the power of Nuonuo's skills.

"Not to mention the obvious effect of the Spiritual Energy Field skill, but this Mechanical Fusion..."

Su Yu read the description of the Mechanical Fusion skill again.

"Able to fuse with any Mechanical Creation and greatly amplify it?"

"This skill, without any limit, means that whether it's an ordinary firearm or an Intelligent Mechanic like the Cavalry Defender, Nuonuo can fuse with and amplify it?"

"Even a kilometer-high Mecha like the Radiant Mecha, Nuonuo can also fuse with it?"

Although Su Yu didn't yet know the exact amplification effect of Nuonuo, just the words 'great amplification' in the skill description indicated that Nuonuo's effects were considerable.

Then, Su Yu pinched the two small blue horns on Nuonuo's white round head and asked: "Nuonuo, how did you acquire such a skill and form? What happened when you previously transformed yourself?"

Nuonuo's childlike voice replied: "Nuonuo doesn't know either; Nuonuo just thought about transforming into a form that could assist Master, becoming an excellent repair robot and a robot that can help Master."

Su Yu felt a warmth in his heart hearing this from Nuonuo.

However, Nuonuo's skill needed to be tested.

Soon, Su Yu used Spiritual Energy to control a Defender and a Cavalry to come in front of Nuonuo.

Then, two firearms were brought over, one being the excellent Electric Sniper Cannon and the other the most common firearm in the Sanctuary.

"Nuonuo, try out your new ability and see what effect it has."

"Okay, Master," Nuonuo agreed, very eager to try out the new skill.

"Start with the Cavalry, activate Mechanical Fusion."

Su Yu instructed Nuonuo, and upon hearing Su Yu's words, white light instantly shone from Nuonuo's body.

In the next moment, under Su Yu's watchful eyes, Nuonuo split apart.

The white round body instantly transformed into countless tiny metal parts, constantly extending and reshaping, eventually turning the entire Cavalry white.

Su Yu checked the attributes of the Cavalry at this time.

[Superpower Nuonuo: Cavalry Form]

[...]

[Comprehensive Strength Assessment: Five-Star Initial]

"Five-Star Initial?" Su Yu was extremely delighted; Nuonuo was a Four-Star Advanced on its own, but after mechanically fusing with the Cavalry, it could raise the originally Two-Star Advanced Cavalry to Five-Star Initial strength.

Then, Su Yu and Nuonuo continued to explore the effects of this Mechanical Fusion skill together.

Nuonuo disengaged the mechanical fusion from the Cavalry and instead fused with the excellent Electric Sniper Cannon in Su Yu's hand.

Soon, the Electric Sniper Rifle in Su Yu's hand had also turned white under Nuonuo's fusion.

Su Yu noticed with joy that the originally excellent Electric Sniper Cannon, under Nuonuo's fusion, had its destructive power further enhanced to a Six-Star Initial level.

Soon, after Su Yu allowed Nuonuo to individually fuse with several dozen Mechanical Creations, a bit of fatigue appeared in Nuonuo, so Su Yu stopped the attempts.

The joy in Su Yu's eyes continued to grow.
