

Infinite Job Transfers Starting from Mechanic

Chapter 26: Chapter 26 Goals

Accompanied by a muffled sonic boom.

The alloy punching target in front of Su Yu was not only knocked over by his punch, but the target behind it was also affected by the punch force, shaking incessantly with a continuous clicking sound.

This left Yang Lie and others dumbfounded!

"Is this... a top one-star level?"

"Brother Su's physical strength has already reached the standard of a top one-star Extraordinary of Physical Body?"

Several fighters of the ninth squad couldn't believe their eyes.

In the past few days of hunting, although Su Yu displayed astonishing strength, it was mostly in terms of sniping skills.

The group could also sense that Su Yu's stamina was not lacking, even excellent.

But to what extent, they didn't have a clear estimate.

Even Yang Lie only thought Su Yu's physical condition was about at a mid one-star level.

But now it seems they have underestimated Su Yu!

"Good news! Good news indeed!"

Everyone was pleasantly surprised.

After all, Su Yu was now the core combat power of the ninth squad.

The stronger he was, the more likely it was for Yang Lie and the others to succeed in their revenge!

"The Night Slayer Team, besides Lei Wu, has two other two-star Extraordinary of Physical Body, one is Mo Yun, and the other is He Xiang."

"Among them, He Xiang's strength is the strongest, already at a two-star high level, Mo Yun and Lei Wu are both at two-star initial level."

During this time, as the captain, Li He, for unknown reasons, seldom personally led the hunting team outside.

Usually, He Xiang leads the team to complete the hunting targets designated by the Sanctuary.

And this is Yang Lie and their opportunity for revenge.

Without Li He, the three-star Transcendent leader.

With the ninth squad's strength, they might be able to cause considerable damage to Night Slayer.

However, Yang Lie was not prepared to take action immediately.

"There's another month, in one more month, my strength will peak under the influence of Ant Poison."

"By then, my strength should reach a two-star high level!"

By that time, with his strength, plus Su Yu's elite sniper support.

They would be enough to eliminate those two-star Transcendents of the Night Slayer Team, causing Li He to grieve for a long time!

Listening to Yang Lie's plan.

The members of the ninth squad all had their eyes lit up one by one.

But at this moment, Su Yu couldn't help but speak.

"Uncle Yang, is there really no way to solve your Ant Poison?"

Yang Lie's plan was good indeed.

But if it is carried out exactly as he said, he would undoubtedly die from Ant Poison.

But as Su Yu knew.

The potions produced by the Sanctuary, besides the Antiradiation Potion for radiation sickness, also include another kind of Detoxification Potion.

That Detoxification Potion has a considerable therapeutic effect on toxins from many below three-star Radiation Beasts on the wilderness.

"If we can exchange for that Detoxification Potion, then Uncle Yang's Ant Poison should have a chance to be cured, right?"

Su Yu voiced his doubt.

While Yang Lie and the other members of the ninth squad couldn't help but respond with a wry smile.

"Brother Su thinks too simply."

It's true that the Sanctuary produces Detoxification Potions.

But those Detoxification Potions, strictly speaking, are not just for detoxification.

Many diseases and injuries encountered on this wasteland, including radiation sickness, can be cured or at least greatly delayed under that potion, which is said to be a product of pre-war technology.

But how rare are these potions?

The materials required for production alone are astronomical.

If converted into contribution points.

"Even a hunting team at the level of the Night Slayer Team would need to not eat or drink, saving contribution points for half a year, to exchange for just one."

For a hunting team like the ninth squad, even if they have the guts and strength to grittingly accumulate enough contribution points.

The high-up members of the Sanctuary would be reluctant to allow such a precious potion to be open for Yang Lie and them to exchange.

Of course, if it's someone as strong as Li He, that's a different story.

Ultimately.

It's just that the ninth squad lacks the strength and status is too low!

"Is that so?"

Su Yu nodded, with no disappointment in his eyes, only a gleam of determination.

He wasn't afraid of harsh exchange conditions, only afraid that the exchange for the Detoxification Potion wouldn't even be an option.

Now knowing that Uncle Yang's condition is not entirely without hope of healing is enough.

"The ninth squad isn't qualified to exchange for that Detoxification Potion?"

No problem.

As long as the Night Slayer Team is completely defeated, this accomplishment should surely be enough to make those high-ups in the Sanctuary nod generously, agreeing to give the ninth squad the authority to exchange for the Detoxification Potion!

However, like Yang Lie, Su Yu also needed time to achieve this goal.

"The Falcon, as an advanced sniper rifle, its bullet damage roughly at a two-star level."

"If it can hit the vital point, even a two-star high-level, or even a top two-star Radiation Beast could possibly be taken down by a single shot."

But this damage is still insufficient.

Considering that Li He is a three-star Transcendent, his Spiritual Telekinesis is likely constantly surrounding his body.

Even though my Falcon has 100% shooting precision to resist Li He's Spiritual Telekinesis affecting the bullet's trajectory.

But the barriers formed by those Spiritual Telekinesis would greatly weaken the bullet's power as well.

And a three-star Spiritual Transcendent, once regaining their senses, could likely deal with me in an instant!

Chapter 27: Chapter 26 Goals_2

So, Su Yu needed more time.

"By leveling up [Gunsmith] and improving my mastery in firearms and sniping skills, these two skills, while not increasing the bullet's lethality, could speed up my reloading process, allowing me to fire twice or even three times in the shortest time possible!"

Besides that,

More time could also allow Su Yu to think of ways to design a new improved blueprint to enhance the lethality of the [Falcon] even further!

"As long as the Falcon's lethality can ensure hitting vital points, instantly killing a three-star Transcendent or Radiation Beast, I will be able to handle the Night Slayer Team!"

Li He was merely a three-star psychic Transcendent.

His physical defense could never match up to a genuine three-star extraordinary physical body.

As long as Falcon's lethality reached three stars, even if weakened by Li He's telekinesis, the remaining power would still be sufficient to take Li He down with one shot!

But these were not words Su Yu intended to say out loud.

It would sound boastful to mention them now; better to get all preparations done before speaking!

...

While Su Yu was carrying out all sorts of preparations to confront the Night Slayer Team,

At the same time, within the high-level meeting room of Shelter No. 73.

The captains of the Wolf Pack Team and Shan Lan Team stood with folded arms, their eyes coldly fixated on Li He in front of them, their gazes icy.

"Captain Li He, we need you to give us an explanation."

"How did the members of the Sixth Team, Seventh Team, and Tenth Team suddenly become part of your Night Slayer Team?"

"Captain Lang Yun, Captain Hu Wen, your questioning leaves me quite puzzled."

Upon hearing the Wolf Pack and Shan Lan captains' questions,

Li He's expression remained unchanged, as he spread his hands in a gesture of innocence: "The situation of those three teams is evident to everyone."

"They were reckless and suffered heavy losses during hunts; the Transcendents within their teams were either dead or wounded, leaving their members without a way out, facing eviction from the Sanctuary."

"My Night Slayer Team generously extended a helping hand by healing the wounded and compensating for those who perished, using resources from my Night Slayer Team. The Administrator may not commend me, but how come you two captains are coming at me instead?"

"Or is it..."

Li He smiled slightly, pausing before speaking with a tone of amusement: "You two captains also had your eyes on the remaining members of those three teams, but just didn't expect I'd step in first?"

"You..."

Caught off guard by Li He's retort and his final counterattack.

Lang Yun and Hu Wen's expressions changed slightly, yet their faces showed a hint of panic.

Clearly, Li He's words had a touch of truth, revealing their inner thoughts.

But at this moment, the hitherto silent Administrator in the meeting room spoke up: "Alright, the three captains should not argue about this anymore. The purpose of today's meeting is not to have you quarrel here."

The Administrator was an elderly man, already over fifty years old.

To live to such an age on the Ruins Star was rare, to say the least.

Moreover, under normal circumstances, residents of Ruins Star over fifty, even Transcendents, would generally be frail and aged.

However, the Administrator of Shelter No. 73 still appeared energetic, and when he spoke, his eyes seemed to carry a blade's edge, making the three captains present, including the always arrogant Li He, involuntarily straighten up, taking a step back, nodding slightly.

As they lowered their heads, the flash of anger in Li He's eyes was expertly concealed.

"Very well."

Listening to their responses, the Administrator nodded, not bothering to discern whether they were serious or just speaking for show, then fixed his gaze on Li He, and said in a deep voice.

"Captain Li, you are indeed the main subject of today's meeting. As you pointed out, it was indeed thanks to your generous actions that the members of the Sixth, Seventh, and Tenth Teams were able to remain in the Sanctuary."

"However, the thirteen hunting teams were not created arbitrarily. Each of these thirteen teams holds a significant role."

"The teams led by the three captains are to protect our Sanctuary from being overrun by Radiation Beasts, preventing it from becoming just another beast nest on this planet."

"Teams of intermediate strength provide substantial resources and materials for our Sanctuary."

"And the weaker, lower-ranked teams ensure that when residents of our Sanctuary fall ill or injured, or encounter other troubles, they always have somewhere to turn to, avoiding immediate eviction and becoming refugees."

As the Administrator spoke, his gaze rested on Li He, and while his tone was calm, the sense of pressure was undeniable.

"In my view, the position of the ninth-ranking team and the third-ranking Night Slayer may differ, but not so much that I would completely ignore the rules of the Sanctuary."

"Therefore, I will make this clear: occurrences like these, where a hunting team suffers debilitating losses and has no choice but to join another, should not happen again."

"Can the three captains provide me a definite answer?"

Feeling the pressure in the old man's eyes.

Lang Yun and Hu Wen both nodded immediately, while Li He's gaze flickered for a moment before he slowly nodded: "Agreed."

Chapter 28: Chapter 26 Target_3

"Very well, then I won't delay the affairs of the three captains any longer. You three must be very busy, so I won't see you off."

The administrator nodded and waved his hand, signalling that everyone could disperse.

Upon hearing the administrator's words, not to mention Li He.

Even Lang Yun and Hu Wen were stunned.

It wasn't until Li He got up, bid farewell, and left the conference room with a cold demeanor.

That Lang Yun and Hu Wen snapped back to reality, looking at the administrator with utter confusion in their eyes.

"This, Administrator, this is not what we agreed on before!"

The strength Li He displayed already made them feel immense pressure.

Coupled with Li He's notorious domineering style.

Upon knowing that Li He was about to break into four stars, neither Lang Yun nor Hu Wen could sit still.

Taking advantage of the fact that Li He suddenly expanded the Night Slayer Team, seizing the opportunity to annex three hunting teams in one fell swoop.

The two immediately contacted the administrator, hoping to strike at Li He using the administrator's influence.

It's true that Li He is a top-tier three-star extraordinary of the Spirit department.

But the two of them are also both at the initial four-star stage of the Physical Body extraordinary.

Adding the fact that the administrator, who is said to have reached the four-star level many years ago, was assisting, suppressing a not yet four-star Li He shouldn't be too difficult a task.

But they never expected.

The administrator simply brought over Li He, lectured and warned him a bit, and then just let him leave?

What use is such a lecture?

"Just as Li He said, strictly speaking, he hasn't violated the rules of the Sanctuary, and he even helped the Sanctuary by solving a big burden. This is also my mistake when formulating the rules of the Sanctuary back then. The point that hunting teams shouldn't annex each other needs to be specified."

The administrator spoke in a deep voice, but his words almost left Lang Yun and Hu Wen's brains completely delirious.

At this damn critical moment.

Is this the time to dwell on rules?

Although over the past few years, they have more or less experienced the administrator's stubbornness concerning rules.

But they never imagined, the administrator would be stubborn to this extent.

Could it be true, as rumors say, that because the administrator excessively mechanized his body when he was young, his brain has become mechanical too?

Lang Yun and Hu Wen thought to themselves, filled with pent-up frustration they dared not express.

Looking at their baffled expressions, the administrator's demeanor remained extremely calm.

"In short, as long as the Night Slayer Team hasn't breached the rules, I will not interfere, nor will I permit you to take action against the Night Slayer Team."

Listening to the latter half of the administrator's words.

Lang Yun and Hu Wen's expressions became quite intriguing.

Take action against the Night Slayer Team?

Without the support and approval of the administrator.

Lang Yun and Hu Wen, likewise, lacked the courage to strike against Night Slayer.

Not only because of Li He's own strength, but more importantly, due to the rumors surrounding the Night Slayer Team!

According to the rumors, the captain of the Night Slayer Team has some connection with the Ghost Tribe.

If they could decisively eliminate him with one strike, then it would be acceptable; after all, as members of a hunting team, dying in the wilderness is quite normal, and the Ghost Tribe wouldn't realistically trek miles just to avenge someone far off in another settlement.

However, without the administrator's involvement, and with other hunting teams not providing support.

Lang Yun and Hu Wen, let alone striking down Li He.

Not being slain by Li He in return, or even fighting to a draw would already be their limit, not to mention dealing with the Night Slayer Team.

"Phew..."

Frustratedly leaving the conference room.

Lang Yun and Hu Wen exchanged a glance, both appearing uncharacteristically dejected.

"What to do? If this goes on, that guy Li He might indeed be able to take control of the entire Sanctuary."

Hu Wen whispered, but his tone clearly showed that he wasn't holding out much hope.

Next to him, Lang Yun fell silent, but after a moment, a touch of coldness emerged in his eyes!

"What to do? What else can we do?"

"Didn't that old man say he wanted evidence? Then we provide him with evidence!"

"How to provide? What secret technique Li He practices in meditation is unclear, but it's obvious that the more subordinates he has, the stronger he becomes!"

"Now he's annexed three teams, making him stronger than before by more than just a notch. Breaking through to four stars won't take him long; how could he possibly show any more flaws?"

"Why wouldn't he?"

Lang Yun retorted, a cold glint flashing in his eyes.

"Don't forget, besides annexing the sixth, seventh, and those three teams, what's Night Slayer been up to these days!"

"Are you talking about... the Ninth Team?"

Hu Wen was startled, then swiftly reacted as a look of astonishment flashed in his eyes.

"Yang Lie and the others have yet to be annexed by Night Slayer?"

Whether it's the Ninth Team or the Sixth and Seventh Teams.

These are hunting teams ranked either lower or mid-tier.

Ordinarily, they wouldn't attract the attention of formidable individuals like Hu Wen and Lang Yun.

You can't entirely blame them for being indifferent.

The truth is, the turnover rate in these hunting teams is just too frequent.

Including the captain, often those who manage to survive two or three years are considered exceptionally lucky.

In the Ninth Team led by Yang Lie, besides Zhang Wu and Li Mao, who have been with him for two years.

The rest of the combatants have mostly only been with Yang Lie for a year, some even just surpassing half a year.

Chapter 29: Chapter 26 Objective_4

Such a hunting team, even if you go to the trouble of paying attention to it, the intelligence gathered is useless, merely a waste of manpower.

Therefore, upon hearing that the Ninth Squad was being targeted by the Night Slayer Team...

Hu Wen thought that the Ninth Squad wouldn't last more than half a month.

Now hearing Lang Yun say that the Ninth Squad was still holding on, how could Hu Wen possibly remain calm?

"This is really... unbelievable!"

Hu Wen couldn't help but express his amazement, with a hint of joy emerging in his eyes.

"If that's the case, then we might really be able to catch Li He's weak spot!"

Currently, the Night Slayer Team is in the limelight, but the more successful they are, seeing the Ninth Squad, led by Yang Lie and Su Yu, still actively operating in the Sanctuary...

Their achievements will conversely become stepping stones for the Ninth Squad's fame.

Of course, the Ninth Squad might not wish to gain such fame either.

But whether intentionally or not...

It is now undeniable that they have become a thorn in the side of the Night Slayer Team.

And as long as the Night Slayer Team takes action, there will certainly be an opportunity to find their flaws!

...

"...Thus, the Ninth Squad must be dealt with."

"But we cannot act rashly; we must proceed carefully, as I instructed earlier. Do not overdo it! Too obvious — understand?"

The Night Slayer Team's base.

As observers, Lang Yun and Hu Wen could easily see the Ninth Squad's impact on the Night Slayer Team's prestige.

The captain of the Night Slayer Team, Li He, was naturally aware of this as well.

Therefore, upon returning to the base, he immediately summoned his deputies, Lei Wu, Li Yao, and others, to speak with them directly.

Upon hearing Li He's instructions, Lei Wu and others nodded repeatedly.

But Li Yao had a trace of confusion in his eyes: "Brother, why must we fixate on the Ninth Squad right now?"

"After all, brother, isn't it likely you'll soon break into Four-star? Wouldn't it be more prudent to deal with the Ninth Squad and any obstacles in one go after reaching Four-star?"

Li Yao spoke.

Around him, Lei Wu and others also showed confusion, evidently sharing similar thoughts to Li Yao.

Li He glanced at them coldly and said indifferently: "It's simple, because even if I reach Four-star, I would be the strongest in the Sanctuary, but not invincible!"

"Do I really need to reach Four-star to eliminate such ants as the Ninth Squad? How would the Sanctuary view our Night Slayer Team by then, need I say more?"

Only then did Li Yao and the others understand.

Although they felt that persistently targeting the Ninth Squad seemed rather counterproductive, since their captain had spoken so clearly...

Under the influence of Li He's established authority, they dared not question further, obediently bowing and scrambling to commence preparations.

Watching Li Yao and others leave, a chill emerged in Li He's eyes as well.

"The Ninth Squad... Su Yu? Truly damnable!"

He whispered through clenched teeth, his voice filled with unrestrained killing intent and irritation toward Su Yu!

The opinions of the Sanctuary people about the Night Slayer Team were unimportant.

That reason was merely to deceive those like Li Yao.

The real reason for wanting to eradicate the Ninth Squad was that their existence affected the newly recruited members from other teams who had just joined the Night Slayer Team.

This was the root problem!

Li He's Meditation Technique, a fundamental method for boosting spiritual energy and enhancing strength, involved extracting spiritual energy from the mental world of his subordinates.

The more subordinates under his control, the more extreme their emotions...

The more spiritual energy Li He could harvest, making his strength naturally increase too.

Thus, Li He deliberately allowed Li Yao and others to act arrogantly.

Thus, upon realizing he was nearing the Four-star level, he decisively expanded and absorbed the Sixth, Seventh, and Thirteenth Squads entirely.

After all, in his plan, after completing this absorption...

He could flow into becoming a Four-star Transcendent.

Then, even if the semi-mechanical relic in the Sanctuary wanted to take action against him, it would be impossible.

But he never expected, at this critical juncture...

The Ninth Squad disrupted his grand scheme!

Due to the Ninth Squad's presence, the new members from those three squads lacked sufficient fear and respect for the Night Slayer Team and Li He, far below what was needed for Li He to break through.

"The Ninth Squad... must die!"

"And the more miserably, the better!"

Li He roared in his mind.

A cold glint surged in his eyes.

Yet, he knew he was already being watched by the administrators and Lang Yun.

If he acted directly...

The administrators wouldn't say, but Lang Yun and Hu Wen definitely wouldn't sit idly by.

Moreover, when lying to Li Yao earlier, he wasn't entirely dishonest, at least one sentence was true: even if he reached Four-star, his strength wasn't enough to single-handedly fight all the strong in the Sanctuary.

He could cross lines but not truly overturn the table.

Otherwise, even if he reached Four-star...

Under the combined efforts of the administrators and teams like Wolfpack and Mountain Mist, Li He would have no choice but to flee wretchedly.

Without his carefully built Night Slayer Team and the spiritual energy provided by his subordinates...

Li He's painstakingly achieved Four-star Transcendent status would likely regress to its original state.

And that was something Li He could not accept.

So, these matters could only be left to Li Yao and his men.

"Fortunately, the Ninth Squad should be at the end of their rope by now..."

Li He shook his head, dispelling his distracting thoughts, and entered seclusion.

Although he couldn't extract much spiritual energy from the new Night Slayer Team members yet...

He could use his captain status to influence their spirits and leave psychological suggestions.

This way, in critical moments, he could transform them using the implanted suggestions into Death Soldiers, serving as his human shields for a time!

While Li He entered seclusion...

Li Yao and Lei Wu took swift action following Li He's instructions.

Taking advantage of the intimidating aftermath of the Night Slayer Team's aggressive absorption of three squads...

Their operations progressed far more smoothly than Li He's.

Meanwhile, within the Ninth Squad's base...

Su Yu and the others received the latest news from the Sanctuary.

"The Sixth, Seventh... and the Tenth Squads have already been absorbed by the Night Slayer Team?"

Chapter 30: Chapter 27 Obstruction

Su Yu's brows furrowed, and Yang Lie's face was also filled with shock.

The few logistics personnel who came to report the news nodded with wry smiles.

"The news has been confirmed. During the days we've been out hunting, the rumor has spread throughout the Shelter, and I've even heard some have started betting to see when our Ninth Team will be completely wiped out by the Night Slayer."

Hearing this,

the few combatants behind Yang Lie laughed angrily.

Even Yang Lie laughed in exasperation.

"The Night Slayer's reputation is truly terrifying! So many of us in the Ninth Team, and yet people think we're doomed by the Night Slayer's hands?"

But after the anger subsided, Yang Lie had to admit that the Night Slayer's move to swallow three teams at once did indeed put a lot of pressure on him.

Su Yu, likewise, furrowed his brows and then, with a sudden thought, looked up sharply at Yang Lie.

"Uncle Yang, you should quickly head to the management office and submit our hunting targets for this month, and also pick up the hunting list for next month!"

"Why the rush? Shouldn't we first rescue Old Wang and the others..."

Yang Lie hesitated, then his face changed color as he too realized: "You mean to say that the people at the management office might be helping the Night Slayer make it difficult for us with the hunting targets?"

Su Yu nodded, his face also looking a bit grim.

Generally speaking, even if there is favoritism, the management would not be too biased or excessive.

But now, the situation is different.

The Night Slayer Team acted swiftly, swallowing three hunting teams at once, something unprecedented in Shelter No. 73.

With such momentum, it's hard to say whether the higher-ups at the management office might be intimidated by the Night Slayer Team, or even show goodwill to the Night Slayer by making things difficult for us!

After all, there was already one Eisen manager, and now it's not surprising for a few more to appear.

"I'll go right away."

Yang Lie dared not delay, immediately turning around to lead a few logistics personnel, taking this hunt's yields and starting to act.

Meanwhile, Su Yu headed to the exchange point at the management office to get the repair tasks released by the management.

He was running low on parts.

Whether making new design blueprints or improving the Falcon Gun, he needed to exchange Radiation Beast materials for contribution points and then buy the required mechanical parts from the exchange point.

The repair and manufacturing tasks posted by the management usually come with a few extra materials as compensation for losses, which is a bit of a perk for Sanctuary mechanics.

Plus, Su Yu had already reached the maximum level of Mechanic.

Coming and going, he could save a lot of parts and materials, enough for Su Yu to use for modifying the Falcon Gun in the upcoming time.

But before setting out, Su Yu pondered briefly and deliberately brought along his trophy bag.

The trophies inside were relatively precious Radiation Beast materials, which counted as Su Yu's extra share as a squad sniper and weren't required to be publicly distributed, allowing him to take them away himself.

These trophies, added together, could exchange for quite a few contribution points.

This was Su Yu's precaution.

If the Night Slayer Team were to make a move, they obviously wouldn't only trouble the Ninth Team as a whole; key members like him would surely be specially targeted.

He didn't want to make this trip in vain.

Just as Su Yu anticipated,

upon arriving at the exchange point, Su Yu unsurprisingly saw Eisen's repellent face.

After hearing Su Yu's request, Eisen's face immediately showed a playful smile!

"Oh, Mr. Su, I'm truly sorry, but since the higher-ups know you have joined the Ninth Team now, as per the register of Shelter members, you are considered a member of the hunting team."

"So, for the moment, you cannot take repair and maintenance tasks unless you withdraw from the Ninth Team. If that's the case, I'll report to the higher-ups immediately, and you can take on any tasks you want without delay!"

"What do you think about that, Mr. Su?"

Behind the counter at the exchange point, Eisen wore what seemed to be a sincere smile, though it was full of mockery.

Su Yu furrowed his brow, staring at Eisen, and after a moment, he smiled slightly: "Very well, then I'll go back and discuss it with my companions first."

Hearing this from Su Yu,

Eisen's expression visibly relaxed, and a scornful smile unconsciously curled at the corners of his mouth.

But he quickly realized that Su Yu had not actually turned to leave but stood there, looking at him with a knowing smile, causing sweat to bead on Eisen's forehead, and his voice stuttered slightly.

"Mr., Mr. Su, is there anything else? If not, perhaps you should head back. I do have a lot of work to attend to!"

No joking, Eisen had already heard about the Ninth Team's situation.

On this hunting trip, the Ninth Team brought back more bounty than they usually get from a seven-day hunt.

And the most significant change was Su Yu's inclusion.

Moreover, it's said that even the reckless Mad Wolf suffered a silent defeat at Su Yu's hands.

To Eisen and many ordinary residents of the Shelter, Su Yu had become a hidden expert.

If not for Eisen's backing from the Night Slayer Team, and the fact that Sanctuary regulations supported him this time, he wouldn't have had the confidence to say such things to Su Yu.

But facing Su Yu's fierce gaze, even with ample confidence, someone like Eisen, who's not especially courageous, felt some innate fear.

Seeing Eisen in fear, Su Yu smirked, not bothering to waste words with such a person, and simply lifted his trophy bag.

"No need to worry, I just want to exchange the materials in this bag for some parts and scrap machinery; surely that's not against the Shelter's rules, right?"

"Ex... exchange, this..."

Eisen hadn't expected Su Yu to come prepared with such things. Seeing the bag full of materials Su Yu placed on the counter, he wanted to refuse; however, the pungent bloody smell wafting from the bag,

combined with Su Yu's indifferent gaze from outside the counter,

eventually made Eisen lack the courage to make things difficult for Su Yu. He quickly inventoried the Radiation Beast materials from the bag and stuffed all the parts and scrap machinery Su Yu wanted into the bag, then cautiously pushed it to Su Yu.

Su Yu took the bag, glanced inside.

Although it was just a quick look, with his level 10 Mechanic and level 7 Gunsmith profession bonuses, he immediately saw that the materials in the bag were fair enough.

He didn't linger further and left the exchange point with the bag.

Watching Su Yu's figure disappear into the distance, Eisen couldn't help but heave a sigh of relief, vigorously wiping the sweat from his forehead, thinking furiously to himself.

"Let me see how long you can stay smug! The Night Slayer has poured considerable resources this time, so the Ninth Team surviving is truly an uphill struggle!"

Reflecting on what the Night Slayer's captain, Li He, said to the real management figures at the office,

Eisen's gaze at Su Yu bore a bit more pity.

"Poor kid, of all the people to cross, you chose to go against the Night Slayer, tsk tsk tsk..."

Eisen shook his head, clicking his tongue, then leisurely returned to his work.

Su Yu wasn't aware of Eisen's comments.

However, he wasn't surprised by the Night Slayer Team's targeting. Before coming to the exchange point to pick up repair tasks, he had already guessed that the Ninth Team, including himself, might be targeted by the Night Slayer again.

This time, the Night Slayer's attack was right on his sore spot.

Without the free parts and scrap machinery provided by the Shelter, he'd have to collect the materials and parts himself to improve the blueprint.

"Fortunately, my Mechanic level is maxed, so the efficiency of the improvements won't be delayed too long, but Uncle Yang Lie's side..."

Su Yu felt a bit worried as he quickened his pace back to the base.

When he returned to the base, he found the previously spacious place now a bit crowded.

All members of the Ninth Team, both combatants and logistics personnel, along with their families, had gathered, distributing rooms and beds.

Even some Shelter residents who had previously withdrawn due to injuries had gathered here.

Several combatants, along with the still-recovering Li Mao and Zhang Wu, were in the deepest part of the training ground at the base, surrounding Yang Lie, each with barely contained anger on their faces!

"Uncle Yang Lie, what happened?"

Su Yu couldn't help but step forward quickly.

Seeing Su Yu return, everyone's spirits lifted a bit, but soon, remembering the predicament of the Ninth Team, their expressions inevitably turned despondent once more.

Even Yang Lie couldn't do much better. Hearing Su Yu's question, he gave a bitter smile and handed the sheet in his hand to Su Yu.

This was the hunting list the Shelter management issued monthly to each of the Shelter's hunting teams, specifying the material quotas to be submitted by the hunting team to the management for the coming month.

Su Yu glanced at the sheet, and his gaze turned instantly icy!

[Ninth Team Hunting List]

[One-star Radiation Beast Kill Count: At least ten]

[Two-star Radiation Beast or one-star Radiation Beast Lord Kill Count: At least three]

[Ordinary Radiation Beast Kill Count: At least a hundred]

Just a few simple lines.

But it was enough to sentence the Ninth Team to death for the next month.

Not to mention the kill counts for one-star and two-star Radiation Beasts.

Merely needing to kill over a hundred ordinary Radiation Beasts was not a task achievable by the Ninth Team's current five combatants, Su Yu included.

Even adding Wang Shan and Wu Yue wouldn't help!

"Unless our Ninth Team still had its full strength, with Old Zhang and Old Li uninjured, then there might be a slim hope of achieving this target."

"But now..."

Beside him, a Ninth Team combatant clenched his fist, gritting his teeth.

Their eyes brimmed with boundless hatred and a hint of panic.

According to the Shelter's rules, hunting team members are already classified as the lowest tier among Sanctuary residents.

If the hunting team they belong to is disbanded, the rule states,

unless they can find another team willing to take them within three days, or offer enough contribution points or materials,

they'd be directly expelled from the Sanctuary, becoming drifters.

The thought of being drifters wasn't terrifying.

But the terrifying part was that the Night Slayer Team already had their sights set on them.

They're playing dirty tricks now because they're still officially Sanctuary residents, still members of the Sanctuary hunting team.

Once they lose this status protection,

the Night Slayer Team could directly attack them.

Then, not to mention Li He, that three-star Transcendent,

even if the Night Slayer Team's two-star and one-star Transcendent sub-captains and combatants banded together to openly attack them, they could easily annihilate the entire Ninth Team!
