## **Chapter 31: Chapter 28 Sacrifice**

"Do the higher-ups at the Sanctuary not care about these things? Are they just going to let the Night Slayer Team force us into such a desperate situation?"

A member of the Ninth Squad couldn't help but speak bitterly.

Yang Lie gave a bitter smile and remained silent.

Beside him, Zhang Wu let out a cold laugh: "Why would they care? In the eyes of the higher-ups, can we even be compared to the Night Slayer? Moreover, the hunting list they've provided is quite reasonable. Although we of the Ninth Squad are now injured and detained, the member roster registered with the management hasn't changed."

"At most, the management will merely be criticized for being inhumane. What impact does that have on them?"

Hearing Zhang Wu's words.

The members of the Ninth Squad present were momentarily silent.

Yang Lie also gave a bitter smile, clenched the list in his hand tightly, then released it futilely after a moment, and sighed: "Forget it, let's not think about this for now. I'll go and rescue Old Wang and Old Wu. With more people, we'll surely figure something out."

The group nodded in agreement, and Su Yu followed them to the Detention Center.

When Wang Shan and Wu Yue emerged from the Detention Center, both had become much more emaciated, and their eyes were bloodshot.

There was no need to ask—just one glance was enough to know what they had been through in the past days in the detention center.

Seeing their appearance.

Yang Lie's eyes immediately turned red.

The ominous aura rising from him scared the staff member who escorted Wang Shan and Wu Yue out, causing them to retreat a few steps with a face full of fear.

"Hoo..."

Yang Lie exhaled heavily, saying nothing more, but stepped forward and firmly grasped both of their hands.

Wang Shan and Wu Yue looked somewhat emotional as well.

But Su Yu noticed that both seemed to have something unspoken, causing a sinking feeling in his heart.

As expected.

After taking a short rest, Wang Shan and Wu Yue spoke decisively.

"Captain, I heard that our hunting list for next month hasn't decreased but is instead in the highest category—is that true?"

Hearing Wang Shan's question, Yang Lie was taken aback and instinctively wanted to hide the truth, but seeing Wang Shan and Wu Yue's bloodshot, serious eyes.

Yang Lie's Adam's apple bobbed for a moment, but he eventually did not conceal anything and nodded with a wry smile.

Wang Shan and Wu Yue's expressions changed slightly. Then they exchanged a glance, and a certain determination surfaced in both their eyes.

"In that case, we'll just stay here in the detention center for now!"

"Wh-why would you do that?"

Hearing this, Yang Lie and the others were startled.

Wang Shan and Wu Yue, however, seemed to have figured it out long ago and calmly said: "In our current state, even if we were released, we wouldn't be able to help the team. We'd just be a burden. In that case, it's better not to waste contribution points to bail us out."

"Though these contribution points may not be much, they are at least enough to cover a third of next month's hunting objectives. That way, the pressure on everyone will be slightly lessened in the coming month."

Saying this.

Both Wang Shan and Wu Yue forced a faint smile: "Although life in this detention center is a bit rough, the Night Slayer Team wouldn't dare to actually harm us in here. We might be safer inside than you are out there!"

Hearing Wang Shan and Wu Yue's words.

Yang Lie and the others fell silent.

Even a fool could tell that those last words were merely to comfort them, but even Yang Lie had to admit that Wang Shan and Wu Yue's suggestion was the best plan the Ninth Squad had at the moment.

"But..."

Yang Lie couldn't help but want to say more, but was cut short by Wang Shan and Wu Yue, who raised their hands to indicate silence and nodded to the other members of the hunting team. Finally, they looked at Su Yu, eyes apologetic.

"Brother Su, it seems we'll have to trouble you moving forward. It was our impulsiveness that caused this..."

Originally meant to join Su Yu in the roles of sniper and scout to fill the void left by Li Mao and Zhang Wu.

Now, all these responsibilities fell on Su Yu alone, leaving the two deeply apologetic.

Su Yu shook his head slightly: "No need to be so formal, brothers. It's not your fault..."

"Alright, are you bailing them out or not? If not, visiting hours are over. Let's go, let's go!"

The stern voice of a detention center officer interrupted their conversation, urging them from afar.

Without saying more, Wang Shan and Wu Yue gave Yang Lie a deep look: "Captain, about my family..."

Yang Lie nodded firmly, gritting his teeth, and after a moment forced out a promise: "Don't worry, I'll take care of them!"

Wang Shan and Wu Yue immediately smiled and said no more, following the officer back into the narrow, dark corridor of the detention center.

Seeing their thin frames, which seemed they might collapse with the slightest breeze.

Yang Lie and the other Ninth Squad members clenched their fists, and even Su Yu gritted his teeth, anger blazing in his eyes!

"Let's go back and prepare."

"In two days, we'll set out into the wilderness again!"

Yang Lie spoke without turning back, staring in the direction Wang Shan and Wu Yue had disappeared, only speaking softly once they were out of sight.

Without hesitation, Su Yu and the others responded in unison: "Yes, Captain!"

Over the next half-month, the Ninth Squad hunted like men possessed.

With Su Yu's assistance, their hunts were quite fruitful every time they ventured out.

Furthermore, as the number of hunts increased, Su Yu's accumulated experience also rose steadily, along with his level and skill proficiency, rapidly improving.

This improvement, in turn, made the Ninth Squad's hunts increasingly successful.

With about a week left in the month, the Ninth Squad had already completed their hunting targets for the month.

"With seven days remaining, we can hunt at least once more, and with the whole of next month, we can schedule intermediate hunts about five times within seven-day intervals."

"Even if we can't meet all the hunting targets imposed by the higher-ups, completing more than two-thirds will suffice!"

The remaining one-third shortfall could be compensated for with the contribution points left by Wang Shan and Wu Yue!

Assessing the recent harvest.

The members of the Ninth Squad showed delight in their eyes!

Su Yu, too, was invigorated.

His progress and gains were among the greatest for the Ninth Squad.

Although he hadn't yet researched improvements for the Falcon gun during these days.

He had acquired many new design blueprints nonetheless.

Most thrilling of all was the acquisition from an exceptional-grade Electric Sniper Rifle—a design blueprint for a Night Vision Lens.

"By adding this component, I can ensure shooting accuracy even in the dark of night!"

"Moreover..."

Su Yu's eyes gleamed slightly as he looked at the design blueprint in front of him.

According to the blueprint's instructions, he could even craft a simple night vision device using this Night Vision Lens.

In this way.

"Not only will I gain nighttime combat capability, but the other members of the Ninth Squad can also attempt nighttime hunting!"

## **Chapter 32: Chapter 29 Night Hunt**

In the wilderness under the night sky, the danger level compared to during the day will multiply.

At night, those powerful Radiation Beasts that slumber during the day will awaken, beginning to prowl and hunt in the wilderness.

Moreover, the pitch-black night will be their best ally in concealing themselves.

Even elite hunting teams like Night Slayer rarely opt to hunt at night unless absolutely necessary.

But, as it is said, risk and reward go hand in hand.

Hunting during the day, one might not encounter a single two-star Radiation Beast even after several days.

But at night, with good luck, an excellent sniper might take down one or even multiple two-star Radiation Beasts, possibly even a two-star Radiation Beast Lord!

"However, simply relying on a night vision device and night vision lenses isn't completely safe. Let's wait a bit longer..."

Su Yu looked at his profession panel.

Currently, his Gunsmith profession has been upgraded to level 8, and his Perception of Killing Intent range has increased to within a kilometer radius.

As for the other skills:

Both [Basic Gun Mastery] and [Basic Sniper Skills] have reached this level.

And the improvement of [Wilderness Survival] has been even more rapid.

Frequent hunting in the wild allows Su Yu to gain Wilderness Survival skill experience at a rate nearly two to three times that of his other skills, even more than his Professional Experience.

Setting up camp and cooking a meal in the wilderness both greatly boost Wilderness Survival experience.

As a result, Su Yu's current Wilderness Survival experience has reached level 9, with over 90% of the experience progress bar filled.

"Once these skills and the Gunsmith profession are upgraded to max level, with my physical fitness by that time, plus the bonuses from unlocking professional specialization and skills,"

"leading the Ninth Squad to attempt night hunting will be much safer."

Night hunting yields abundant rewards and equally rich experience points.

My efficiency in upgrading can thus be greatly accelerated, allowing me to enhance my strength quickly enough to rival and even take down the Night Slayer Team captain, Li He!

Just as Su Yu was pondering.

"Creak"

Accompanied by the sound of a door being pushed open, Yang Lie walked back from submitting the loot to convert them into contribution points with a grim expression.

Seeing Yang Lie's expression, the members of the Ninth Squad present all showed slight changes in expression.

"Uncle Yang, did something happen?"

Su Yu also stood up and asked.

Yang Lie nodded and handed Su Yu a card, the contribution point storage card for each hunting team.

Su Yu took the card and glanced at the current Ninth Squad's contribution point balance, immediately understanding the situation, and couldn't help but laugh coldly: "Night Slayer Team, their methods are truly extraordinary!"

The loot accumulated by the Ninth Squad during this period should convert to around three thousand contribution points.

After paying this month's due contribution quota, there should be at least five hundred points remaining.

But now, not only is the contribution point balance on this card completely empty, it even shows a figure of [-500].

This means the Ninth Squad can't even begin accumulating towards next month's contribution point target.

If they don't organize a new round of hunting soon, they might not even meet this month's contribution point requirement!

"How could this be?"

The other members of the Ninth Squad gathered around, looking at the contribution point card Yang Lie brought back, all showing expressions of shock!

"The people in the administration said our loot had too many rotting parts, and plenty of materials were either refused for collection or their appraised value was deliberately lowered!"

Yang Lie gritted his teeth, his eyes filled with humiliation.

He had tried to argue.

But the result of his efforts was being directly ridiculed by the managers at the administration, who even said things like if they're unwilling to stay, they could leave Shelter No. 73.

With the enmity between Night Slayer and the Ninth Squad,

leaving the shelter would surely lead to dire outcomes for the members of the Ninth Squad, evident without even needing to think!

"Captain, if we can't manage, let's fight them!"

A combatant in the Ninth Squad couldn't help but say, his tone filled with grief and anger!

"Fight, huh..."

Hearing his teammate's words, Yang Lie felt a surge of emotion too.

He wanted to prepare comprehensively and then fight to the death.

But it seems now that Night Slayer Team isn't going to give them that chance.

If that's the case, they may as well fight now to cause some trouble for Night Slayer Team.

If they wait any longer, they might be played to death in the wilderness by Night Slayer Team without even shedding blood!

"No."

At this moment,

Su Yu's voice quietly emerged.

His eyes gleamed as he looked at Yang Lie and the others, speaking solemnly: "Uncle Yang, everyone, could you give me half a day to make some preparations?"

"Perhaps we still have a chance to counterattack!"

Looking at Su Yu's serious demeanor.

Yang Lie and others were momentarily stunned, inclined to say that at this point, how could there be a chance for a counterattack?

But remembering the astounding things Su Yu had brought them in those past days, Yang Lie couldn't help but gulp and nod firmly: "Alright, after all, adding half a day won't make much difference."

"Let's listen to Su Yu and wait a bit longer!"

...

"Notes and insights from wilderness exploration?"

In Li Mao's dorm at the Ninth Squad's base.

After hearing Su Yu's purpose, Li Mao was baffled.

He had already heard about the troubles facing the Ninth Squad and felt extremely anxious and worried, yet he couldn't think of anything he could do to help.

When Su Yu approached him,

Li Mao was actually quite pleased, ready to exert all his strength to assist his teammates, but unexpectedly, Su Yu's request was to guide him through survival insights during wilderness exploration?

How could these things help solve the current predicament of the Ninth Squad?

Li Mao was full of confusion, but seeing Su Yu's earnest and sincere demeanor, he ultimately did not refuse and conscientiously recalled his years of exploration and hunting experience in the wilderness, sharing it with Su Yu in detail.

Su Yu, on his side, listened attentively, focused.

Listening and recording.

Until Li Mao had almost finished speaking, feeling that he'd shared all his insights.

[Ding!]

[Congratulations, you have upgraded a Professional Skill: Wilderness Survival to the maximum level. Based on your Professional Skill, a Professional Specialization has been drawn... Drawing completed!]

[Congratulations to the Host for obtaining the Professional Specialization: Wilderness Perception!]

[Wilderness Perception]

[Type: Professional Specialization · Passive]

[Effect: When in the wilderness, your perception of danger is enhanced, allowing you to detect crises earlier and find a correct path for yourself or your team!]

### **Chapter 33: Chapter 30: Launch an Attack**

Looking at the newly emerged professional specialization.

Su Yu's eyes were filled with a brilliant gleam!

"It's possible now!"

He suddenly raised his head, looked at the bewildered Li Mao, and thanked him earnestly, "Brother Li, thank you so much, you've really been a huge help this time!"

With the Wilderness Perception specialization, even if his other abilities were lacking, he was capable of leading the Ninth Squad to hunt at night in the wilderness.

And the bounty from night hunting.

Could surpass daytime by an unknown amount!

However, after unlocking [Wilderness Perception], Su Yu did not act immediately.

Back in the repair shop, Su Yu carefully dismantled the scope from his treasured Electric Sniper Rifle, thoroughly studied it, and compared it to the blueprint of the [Night Vision Goggles] he had previously designed and which had received system approval.

After pondering thoroughly, he began to make his move.

Soon, it was dusk as the sun began to set.

Su Yu returned to the base with a newly crafted set of night vision goggles.

At that moment, the atmosphere in the base was heavy to the extreme.

Wang Shan and Wu Yue's families had reddened eyes, clearly having just cried.

Upon seeing Su Yu arrive.

They all couldn't help but cast their gaze on him, a glimmer of hope in their eyes, though it was extremely faint.

Meanwhile, Yang Lie was frowning deeply, staring at the hunting map near the Sanctuary, pondering suitable hunting locations that could help the Ninth Squad overcome their current predicament.

However, he had been standing there all afternoon without any results.

It wasn't until Su Yu arrived that he snapped out of it: "Brother Su, you're back? Have you thought of any good ideas?"

Yang Lie asked casually, not expecting much.

But Su Yu's response startled Yang Lie and the other members of the Ninth Squad in the room, all of whom lifted their heads abruptly.

"I have actually thought of a way."

Su Yu spoke in a deep voice, looking at Yang Lie with burning eyes.

"Uncle Yang, we can try hunting at night!"

"Night hunting?"

Hearing Su Yu's words.

The joy that had initially appeared in Yang Lie's and the others' eyes quickly dissipated.

Night hunting wasn't an extraordinary proposal.

Under normal circumstances, hunting teams would have the logistics team set up defensive barricades similar to the camp in Su Yu's memory with trailers after dark.

Resting with the protection of the car camp.

Even a two-star Radiation Beast Lord couldn't easily break through the car camp's defenses and would be heavily injured or shot by the team members hiding behind the car camp.

It wasn't until morning, when the powerful Radiation Beast groups and their lords returned to their nests to sleep, that the car camp would be dismantled to resume hunting.

But there were always the strong who could ignore such rules.

The Night Slayer Team and the superior Wolf Pack Team were among those who could hunt at night.

But the Ninth Squad was obviously not among them.

"Night hunting has too many variables, and it's easy to encounter two-star Radiation Beasts or even two-star Radiation Beast Lords close to three-star power."

"Not to mention that our skills may not rival theirs, even if they do, under the cover of night, our shooting accuracy and vigilance range are far inferior to these Radiation Beasts."

"It's possible that before we even make significant gains, we've already been surrounded and ambushed by them!"

Yang Lie forced a bitter smile, assuming Su Yu had only recently begun wilderness hunting and was unclear about such common knowledge, so he explained it again.

The rest of the Ninth Squad members had already withdrawn their gazes, no longer expecting Su Yu to offer good advice.

Yet, hearing Yang Lie's response, Su Yu didn't show disappointment; instead, he smiled slightly and pulled out an item from his coat that reflected a faint light under the cabin light, resembling exploration goggles.

"Uncle Yang raised valid points, which is why I specially prepared this!"

"This is..."

Yang Lie was momentarily stunned, then seemingly realized something, instinctively took the night vision goggles that Su Yu handed over and put them on, looking around, his eyes suddenly brightening!

"This thing... has night vision? Wait... it also has zoom?"

Yang Lie's tone was filled with deep surprise.

Looking at the scene outside the window, his voice stuttered a little due to excitement.

"What? Night vision goggles?"

"And it also has ranging and reconnaissance functions?"

The Ninth Squad members present all stood up abruptly upon hearing this, one by one trying on the night vision goggles after Yang Lie, astonished by the joy reflected in their eyes!

"With this gadget, we can at least ensure the accuracy of our firearms!"

"Furthermore, as long as two or three logistics personnel wear this gadget, they can alert us early, greatly reducing the chances of being ambushed by those beasts at night!"

The Ninth Squad members eyes were all shining with excitement.

Even Yang Lie was thrilled!

Of course, relying solely on night vision goggles would not eliminate all the disadvantages brought by the night to the Ninth Squad.

Against the powerful Radiation Beast groups that only appear at night, the Ninth Squad still had significant deficiencies.

However, Yang Lie and the other members of the Ninth Squad either intentionally or unintentionally ignored this point.

Not because they were truly unaware.

But because the Ninth Squad, as it was, had no other option left.

With the addition of the night vision goggles provided by Su Yu, night hunting and using the formidable Radiation Beasts they hunted to silence the administrators deliberately manipulating contribution point exchanges would allow the Ninth Squad to meet their hunting targets and continue staying in the Sanctuary.

In Yang Lie and the others' view, it was virtually the only solution the Ninth Squad could find in their current situation!

Su Yu could naturally sense the thoughts running through Yang Lie's and the others' minds.

But he didn't say much more.

Anyway.

"Once the hunting begins, Uncle Yang and the others will know."

These night vision goggles and night hunting are not just the Ninth Squad's desperate measures.

But truly the best solution to lead the Ninth Squad out of the current predicament!

"With the support of the Wilderness Perception specialization and the high firepower of the Falcon Gun."

Su Yu was confident he could lead the Ninth Squad to conquer the nighttime scene in the wilderness near the Sanctuary!

...

"Bang!"

The Sanctuary, in the dead of night, appeared exceptionally tranquil.

The sanctuary's exit, which was bustling in the daytime with members of the sanctuary hunting teams, was now empty and much quieter.

But soon, the sound of hurried footsteps broke this tranquility.

"Is everyone ready?"

Led by Yang Lie, Su Yu, and the rest of the Ninth Squad's members nodded in unison.

"Then... let's move out!"

"Let those Night Slayer bastards know, we, the Ninth Squad, aren't so easily dealt with!"

Yang Lie gritted his teeth and said in a low voice.

Then, he led the Ninth Squad members into the vast wilderness!

## Chapter 34: Chapter 31 Crisis

"So, you mean the Ninth Squad set off that night, leaving the Sanctuary?"

Night Slayer Team's base.

A few sentries responsible for guarding the entrance and exit of the Sanctuary sat fearfully in the conference room of the base.

Opposite them, Li Yao's gaze was fierce, and he sat alongside Lei Wu, scrutinizing the sentries with an assessing look in his eyes.

"Was there anything unusual when they left?"

Until he scrutinized the sentries meticulously, causing them to tremble with fear and break out in a sweat.

Only then did Li Yao retract his gaze and casually continued to ask.

"Un-unusual?"

Upon hearing Li Yao's question, the sentries dared not be negligent, quickly frowning and recalling, but no matter how hard they tried, they couldn't think of anything particularly unusual about Yang Lie and his group.

"If I have to say, although they were tense, there wasn't much fear; they even seemed... a bit excited?"

After a moment of reflection, an older sentry carefully expressed his perception.

That was the third day after the Ninth Squad set out to hunt in the wilderness under the cover of night.

At this time, Li He had begun his final closed-door training, and all Night Slayer Team's affairs were left to his younger brother Li Yao and several deputy captains, including Lei Wu, to handle together.

In recent days, Li Yao and others had been busy preparing various Radiation Beast Materials needed for Li He's retreat, and only today did they take a short break when they received the news that the Ninth Squad had left the Sanctuary and re-entered the wilderness to hunt.

"It's one thing to go out hunting again after less than three days of rest, but to set off under the cover of night? Do they plan to try hunting at night?"

Li Yao's expression turned somewhat serious.

Lei Wu, on the other hand, seemed much more indifferent, and after hearing Li Yao's speculation, couldn't help but chuckle, shaking his head, "You think too highly of them, Young Master Li. Yang Lie and his team can hunt at night? You're overestimating them!"

Even the Night Slayer Team.

Without Captain Li He leading, night hunting requires at least three deputy captains, each reaching the two-star level, taking action simultaneously.

What about the Ninth Squad?

At best, they only have Yang Lie as a two-star Transcendent.

And he only reached the two-star level through Ant Poison; his strength may be strong enough, but when it comes to facing the same-level Extraordinary of Physical Body, Yang Lie, whose brain and spirit were affected by the Ant Poison, won't last long.

With such a lineup, night hunting in the wilderness is basically courting death!

"Don't underestimate Yang Lie and that... little mechanic!"

Li Yao paused, then gritted his teeth and brought up Su Yu, his eyes filled with deep resentment.

In his opinion, if only Su Yu had been wise enough to be his lackey.

He wouldn't need to go to such lengths to target the Ninth Squad.

Everything is caused by this troublemaker, Su Yu!

Upon hearing Li Yao mention Su Yu, a flash of iciness also passed through Lei Wu's eyes.

Recently, the Night Slayer Team has had a moment of glory.

Before closing off, Li He had instructed them to absorb and merge with several hunting teams ranked higher than the Ninth Squad.

Though the process had its twists and turns, the end result was satisfactory.

Of course.

It was only satisfactory for the Night Slayer Team.

Otherwise, if not for comparison, there would be no damage.

The members of these hunting teams became increasingly obsequious.

Lei Wu couldn't help but recall the day Su Yu held a gun and threatened him, intensifying his hatred for Su Yu, and he said coldly, "Young Master Li is right, hence I have a suggestion, not sure if Young Master Li agrees?"

"Oh?"

Upon hearing Lei Wu's words, Li Yao's eyes lit up with anticipation, "Please, Deputy Captain Lei, explain!"

"Simple."

Lei Wu confidently smiled, murderous intent evident in his eyes.

"They are clearly night hunting to kill more higher-star Radiation Beasts to silence those in administration and quickly complete their hunting list."

"Since that's the case, we'll happily assist them!"

"In this wilderness, higher-star Radiation Beasts drawn at night are not only numerous but far stronger than those during the day."

Lei Wu's smile grew colder, "Without the protection of a vehicle camp, I'm sure Yang Lie, Su Yu, and the others would be very 'happy' to see so many high-star Radiation Beasts coming for them!"

Imagining the high-star Radiation Beasts attacking at night and tearing Yang Lie, Su Yu, and their team apart.

A sick pleasure flashed in Li Yao's eyes, making him shiver all over, his eyes filled with infinite anticipation, nodding vigorously, "Good! According to Deputy Captain Lei's arrangements, whatever help you need from me, just say the word!"

...

In the wilderness.

While Li Yao and Lei Wu plotted against the Ninth Squad.

At the same time, Su Yu led the Ninth Squad, wandering in the wilderness, selecting suitable places to set up camp.

One drawback of night hunting is that their rest time must also be during the day, and finding a suitable campsite in broad daylight is not an easy task.

Of course, if they were less particular, they could camp directly in the wilderness, but without shade, even with special camping tents, a day's rest would leave the team severely dehydrated.

By then, forget about night hunting.

The whole team might have to return prematurely.

Although finding a campsite is also a busy task.

Members of the Ninth Squad, from Yang Lie to the logistical team, all wore smiles.

Because, in the past three days, the Ninth Squad had already hunted as many as ten star-level Radiation Beasts.

And half of those were two-star Radiation Beasts!

According to the Sanctuary's contribution point exchange rules.

Even if those in administration pressed on the exchange price of these Radiation Beasts, it would still be enough for them to fulfill this month's hunting targets and save up significantly for next month's goals!

They still had enough supplies to continue hunting for at least five more days!

"In five days, even with bad luck, we should be able to hunt at least another ten star-level Radiation Beasts?"

"By then, even if the Night Slayer Team tries to trouble us, they'll have to give up!"

Yang Lie clenched his fists, eyes bright with joy, subconsciously looking at Su Yu in the distance, who was scouting for a suitable campsite, his eyes shining even brighter.

At this moment, Yang Lie was incredibly grateful that he had invited Su Yu to join his team back then!

Yang Lie and others were incredibly excited.

And Su Yu, too, was in great spirits.

These past three days of hunting brought Su Yu not just a harvest far beyond the past.

The efficiency of gaining experience points had also significantly improved over daytime hunting.

At this speed, it might not even take a month—at most half a month—before he could upgrade his Gunsmith profession to the maximum level!

However.

That night, when the Ninth Squad woke from sleep and prepared to remove the vehicle camp to begin a new round of hunting.

Su Yu suddenly opened his eyes, looking southeast, with a cold gleam emerging!

"Uncle Yang, tell the logistics team not to remove the vehicle camp, maintain defensive posture, and send out a distress signal, light up the bonfire!"

"Hmm?"

Upon hearing Su Yu's words.

Yang Lie paused, and immediately, memories of leading the team during past wilderness hunts came rushing back—attacks by countless Radiation Beasts on their journey home, causing a chill to cover his eyes!

"Is it those Night Slayer bastards again?"

### **Chapter 35: Chapter 32: The Imminent Attack, Approaching Max Level**

Su Yu's gaze was indifferent, nodding slightly before shaking his head and said solemnly, "Whether it's the Night Slayer's doing, I'm not sure. However, there are indeed many Radiation Beasts in the southeast direction currently heading towards our campsite. That's a fact!"

Su Yu said.

His tone also carried a chill.

Although there is no conclusive evidence that these Radiation Beasts are the work of the Night Slayer Team.

It didn't stop Su Yu from blaming the Night Slayer Team for it.

However, although it was a bit troublesome, Su Yu wasn't worried.

With the camp's defenses, even if three-star Radiation Beasts arrive, they can hold out for a while.

According to the Sanctuary's regulations, as long as a rescue signal is seen, all hunting teams will come to aid as soon as possible.

The upper management of the Sanctuary will also dispatch a rescue team to come for rescue in the shortest time.

All hunting teams' rescue signals and smoke signals are the same.

Even if the Night Slayer Team has strong influence, it can't affect other hunting teams or rescue teams from coming to support!

"And before the rescue team from the Sanctuary arrives, this period is my perfect hunting opportunity!"

"Taking advantage of this time, I'll improve my experience further!"

In Su Yu's eyes, a cold light flashed as he directly took out the Falcon Gun and loaded it.

Meanwhile, the other members of the ninth team were learning from Yang Lie that a large group of Radiation Beasts was attacking the campsite.

One by one, they couldn't help but become anxious.

Even though they had already sent out rescue signals and raised the smoke signals for help,

Their hearts were still inevitably worried.

But soon, they couldn't care to worry anymore.

"Bang!"

"Bang bang!"

In the car camp, Su Yu lay on the fortress built from trailers, and once the Radiation Beast group approaching the camp entered range, he decisively fired!

After three shots were fired, there was no commotion in the distant darkness, causing the members of the ninth team to look slightly changed.

"Did he miss?"

Yang Lie couldn't help but walk forward, wanting to pat Su Yu's shoulder and reassure him, telling him not to be nervous.

But in the next moment.

"Awoooo!"

In the distance, a beast's howl, piercing to the extreme, echoed, followed by the dull thud of something heavy hitting the ground.

"Was that... the Radiation Wolf King?"

"Did Brother Su just shoot a Radiation Wolf King? And at such a great distance?"

Though they couldn't clearly see the details of the fallen Radiation Beast,

Based on the beast howl and the giant silhouette in the night, the experienced members of the ninth team recognized the type of fallen Radiation Beast, their eyes filled with shock and delight.

Even Yang Lie couldn't help but widen his eyes, full of disbelief!

Although during these days of hunting, Yang Lie and others had already come to realize Su Yu's outstanding sniper skills,

Being able to maintain such high precision at almost a kilometer distance at night with just three shots to take down a Radiation Wolf King,

Such an achievement was already extraordinary!

Feeling the excitement of his surrounding teammates, Su Yu couldn't help but lift a slight smile at the corner of his mouth.

However...

Su Yu looked at his Profession Panel at the newly appearing notification message.

[You successfully killed a Brown-striped Hyena Lord (two-star), earning 600 points of Professional Experience (Gunsmith), 1,000 points of Skill Experience (Basic Sniper Skills), and 1,000 points of Skill Experience (Basic Gun Mastery)...]

The Radiation Beast he killed wasn't the one-star Radiation Wolf King that everyone thought.

It was a genuine two-star Radiation Beast Lord!

Although the Brown-striped Hyena had less defense than a Radiation Wolf, it was still a two-star Radiation Beast Lord, close to the three-star Transcendent standard!

"Unfortunately, this level of strength isn't enough to threaten someone like Li He..."

Su Yu took a deep breath, suppressing his excitement, and aimed again at the approaching Radiation Beast group.

With the Hyena Lord shot by Su Yu, many Brown-striped Hyenas that came with it, intending to attack the car camp, tucked their tails and fled from the Radiation Beast group.

However, there were still quite a few Radiation Beasts left.

But with Su Yu setting the example and his sniping causing incredible damage,

The morale of the ninth team soared.

And Su Yu's eyes grew increasingly bright.

The Radiation Beast group attacking the car camp had an average level not low.

As levels increase,

Su Yu found it increasingly difficult to gain experience from ordinary Radiation Beasts.

Only star-level Radiation Beasts could provide a certain amount of experience.

And experience from two-star or higher Radiation Beasts was quite considerable.

Originally, Su Yu thought it would take at least half a month, or at least one more night hunt, to max out his Gunsmith level even while hunting at night.

But now it seemed.

"Tonight, I can at least level my Gunsmith to nine or even max it out tonight!"

Su Yu took a deep breath, suppressing his inner excitement, aiming at those swarming Radiation Beast groups.

With the blessing of the Killing Intent and Wilderness,

Su Yu easily captured those attempting a surprise attack hiding among ordinary Radiation Beasts, then shot them dead with a single shot.

But as time passed,

the ninth team's members gradually reached a physical limit,

Even Su Yu couldn't help but feel exhausted mentally.

But the number of Radiation Beasts surrounding the car camp kept increasing.

"Damn it, hasn't the rescue arrived yet?"

Yang Lie couldn't help but curse under his breath, while also shielding a logistics person filling a temporary combat role behind him, blocking an attack from a Radiation Beast, and worriedly glancing at Su Yu's position.

Despite Su Yu showing incredible prowess and psychological resilience during these past days and especially in previous battles,

His age was still against him, and the current situation was almost an insurmountable obstacle for the ninth team.

Yang Lie worried whether Su Yu could still hold on.

But at that glance towards Su Yu, Yang Lie stood stunned.

"Bang!"

"Splat!"

From the sniping position far away, Su Yu silently changed the magazine of the Falcon Gun, aimed, and swiftly and accurately pierced through the skull of a two-star Radiation Wolf King charging close, flipping its entire skull open!

After doing this, Su Yu decisively turned his gun, aiming at another star-level Radiation Beast rushing over, precisely blowing out its eyeball and part of its head at the back.

From beginning to end, his wrist never even trembled a bit!
