

# Infinite Job Transfers Starting from Mechanic

## Chapter 36: Chapter 33 Promotion! Battlefield Mechanic!

"Gulp..."

Watching Su Yu silently hunt.

Yang Lie couldn't help but swallow, looking at Su Yu with eyes full of shock and fortunate.

Fortunate that he truly had good luck, to have discovered such a... combat genius in Shelter No. 73!

[You have successfully killed a Radiation Wolf King (two-star), you have gained 800 points of professional experience (Gunsmith), you have gained 1,200 points of skill experience (Basic Sniper Skills), you have gained...]

[You have successfully killed...]

Su Yu was unaware of Yang Lie's shock.

At this moment, Su Yu was immersed in the joy of farming experience.

Originally, in Su Yu's estimation, he expected to raise his Gunsmith level to just above level nine tonight at most.

But now, Su Yu found that he underestimated the great gift the Night Slayer Team brought him.

His experience points, had already broken through the level nine threshold an hour ago.

And in just this short hour, his experience points had surged another 50%!

"Another hour, at most two hours!"

"I will be able to successfully max out the Gunsmith level!"

Su Yu's eyes gleamed with a sharp light.

Fatigue? Exhaustion?

The body just leveled up was now brimming with energy.

As for fear?

With the protection of the camp, it's perhaps impossible to hold on for a whole night, but holding on for another two hours is more than enough for Su Yu!

In fact, just an hour and a half later.

Su Yu's Wilderness Perception had already allowed him to sense the commotion of the rescue team arriving from afar.

But Su Yu didn't even have time to catch his breath and continued to focus on the battle in front of him.

"Bang! Bang! Bang!"

Until Yang Lie and others noticed the arrival of the rescue team.

Only then did Su Yu finally stop the firearm in his hands.

And on his Profession Panel, the experience bar for Gunsmith had finally been maxed out!

[Ding!]

[You have accumulated enough professional experience, your profession level has been upgraded!]

[Current Profession: Gunsmith (lv max)]

[Congratulations, you have upgraded a core ability (Perception of Killing Intent) to the maximum level, drawing a new core specialization based on your professional core... drawing complete!]

A series of system notification messages appeared at the bottom of the Profession Panel.

[Congratulations, you have maxed out a core ability (Perception of Killing Intent), you have gained the core specialization: Holographic Perception]

[Holographic Perception: Able to sense the position and specific terrain area of the opponent through their killing intent, with a maximum range of three kilometers]

As this message surfaced.

Su Yu felt a slight tremor in his brain, causing him to instinctively close his eyes and focus his attention on the wilderness ahead, immediately, Su Yu was amazed to discover.

In his mind, a clear image emerged of the Radiation Beasts swarming and fleeing from one kilometer away upon sensing the arrival of the rescue team.

This feeling.

It was as if he had activated a wallhack in a game.

All he needed to do was close his eyes, and he could generate a holographic map in his mind within a three-kilometer range, where all targets with killing intent towards Su Yu appeared as red dots on this holographic map, nowhere to hide!

Even the underground area was included!

"This ability is really... quite powerful!"

After familiarizing himself thoroughly with this specialization.

Su Yu withdrew from this state of Holographic Perception, continuing to browse through the remaining new specializations.

His Basic Gun Mastery and Basic Sniper Skills had both been smoothly maxed out after last night's battle.

Basic Gun Mastery at the max level provided Su Yu with the specialization of [Elite Shooter], which, during combat with firearm weapons, granted a Spiritual Blessing, increasing bullet velocity with a spiritual enhancement by fifteen percent.

While Basic Sniper Skills at max level provided Su Yu with the specialization ability [Sighting Mirror], where after concentrating to aim at a target for three seconds, it would gain a Spiritual Blessing, further enhancing the accuracy of this shot by twenty percent.

Apart from these two aspects.

Su Yu's [Basic Scout Skill] also smoothly maxed out.

However, the upgrade for this skill was unlocked before last night's battle began.

During the past nights of hunting, Su Yu had repeatedly pre-warned about the arrival of strong radiation beast packs, leading the ninth team to avoid numerous crises.

The experience acquisition efficiency of [Basic Scout Skill] was naturally quite remarkable.

And last night's pre-warning directly sent this skill to max level.

However, the professional specialization unlocked after maxing this skill, turned out to be of little use to Su Yu.

At least, it was of little use in last night's battle.

[Skilled Camouflage Artist: When you attempt to conceal and disguise, the success rate of camouflage increases by twenty percent]

However, compared to these three new specialization abilities.

What truly thrilled Su Yu was the appearance of the subsequent prompt messages.

[Congratulations to the Host, as the Gunsmith level has reached max level, you can now take on a new profession]

[It has been detected that the Host meets the conditions, and new profession options have been unlocked!]

With the appearance of these two prompt messages.

In Su Yu's Profession Panel, the job column which originally had only the [Fighter] option now displayed two additional new profession choices next to it.

However, compared to the dim and dull color of the Fighter option.

The icons of these two profession choices were glowing faintly, looking much more exquisite!

[Available Profession Path: Tier One Profession · Wilderness Hunter]

[Gunsmith (Main)+Mechanic+Basic Scout Skill lv max=Wilderness Hunter]

[Description: An excellent Hunter operating on the wasteland, capable of precisely sniping encountered opponents, able to use basic Mechanical Knowledge to recover materials, maintain equipment, and master basic Spiritual Energy techniques, capable of infusing Spiritual Energy into weapons to enhance their lethality]

Looking at this line of profession description.

Su Yu's eyes lit up.

But he didn't rush to choose; instead, he turned his gaze to the next profession path, immediately causing Su Yu's pupils to slightly contract!

[Available Profession Path: Tier One Profession · Battlefield Mechanic]

[Mechanic (Main)+Gunsmith+Basic Mechanical Manufacturing+Basic Mechanical Repair+Mechanical Affinity lv max+Wilderness Survival lv max=Battlefield Mechanic]

[Description: An Extraordinary Mechanic honed through iron and fire, they are one of the glorious cornerstones of the Empire's Legion; they've experienced the battlefield and understand better what kinds of auxiliary machines soldiers need on the battlefield, capable even of personally stepping into combat to provide mechanical creations for the legion on-site during large-scale operations, mastering a basic yet complete Spiritual Energy cultivation system, cultivating Spiritual Energy that possesses unique effects due to Mechanical Affinity]

"Hoo..."

Seeing the second Tier One profession emerge.

Su Yu's eyes were glistening with an unprecedented intensity!

### **Chapter 37: Chapter 34 Steel Meditation Technique, Extraordinary Mechanic!**

Su Yu didn't expect that after maxing out Gunsmith, he would trigger two new professions in one go, and both were tiered, truly starting to utilize and master Spiritual Energy professions.

"Could this perhaps be called... an Extraordinary Profession?"

Su Yu murmured softly, his gaze falling back on the two professions he could choose from, pondering slightly before making a decision.

"I choose to take the job of..."

"Battlefield Mechanic!"

[Ding!]

[Congratulations, Host, on successfully taking the job, your current profession is: Battlefield Mechanic (lv1: 0/10000).]

[Congratulations, Host, on successfully awakening core ability: Steel Meditation (lv1), initially mastering the Mechanic's exclusive Spiritual Energy, the foundation of an Extraordinary Mechanic, controlling war machinery, you can manipulate, enhance, and repair machinery...]

[Basic Mechanical Repair has advanced to Battlefield Repair!]

[Basic Mechanical Manufacturing has advanced to Junior Mechanical Manufacturing!]

With the onset of the Battlefield Mechanic job.

Su Yu felt as if certain shackles in his mind had quietly opened at this moment.

For the first time, Su Yu sensed the existence of his Spiritual Energy, as if it were an invisible hand that he could control.

The next moment, Su Yu subconsciously sensed the sniper rifle in his hand.

Under the effect of Steel Meditation, Su Yu seemed to see the entire interior of the sniper rifle.

The barrel, the body, the muzzle...

Every part of the sniper rifle in his hand was clearly "seen" by Su Yu, even the slightest wear on each component was visible!

With the effect of the Spiritual Energy, Su Yu discovered that he could control every part of the gun in his hands.

It's no exaggeration to say that if Su Yu wished, he could dismantle the sniper rifle into parts and reassemble it within ten seconds using his Spiritual Energy.

"Quick assembly, quick repair, you can even use this Spiritual Energy to enhance the mechanical parts' strength, making the machinery explode with greater power."

"When I equip a lot of mechanical weapons and configure controllable robots, under the effect of Steel Meditation, it can completely reach the level of forming an army by myself."

"Is this what an Extraordinary Mechanic is?" Su Yu was filled with great delight and then silently muttered in his heart, "Profession Panel."

[Name: Su Yu]

[Profession: Mechanic max, Gunsmith max, Battlefield Mechanic lv1]

[Skills: Battlefield Repair LV1, Junior Mechanical Manufacturing LV1, Wilderness Survival max...]

[Core Abilities: Mechanical Affinity max, Perception of Killing Intent max, Steel Meditation lv1]

[Profession Tier: One-star]

[Extraordinary Level: Spiritual Power two-star initial, Physical Body one-star peak]

"As expected, after taking the Battlefield Mechanic job, the Spiritual Power also broke through to two stars."

The star rating on the panel appeared after Su Yu tested his physical level, according to Su Yu's understanding, a newly emerged Extraordinary Level.

Fighter, Gunsmith, Mechanic.

These three basic professions only require level ten to be considered maxed out.

However, a one-star profession needs to be level twenty to be maxed out.

"Battlefield Mechanic is far more suitable for me than Wilderness Hunter!"

Su Yu did not forget what Eisen said back then.

'As long as you leave the Hunting Team, you can regain your identity as a Refugee Mechanic'.

Believing that when I really go to Eisen and tell him I want to return as a Mechanic, that Eisen manager and those higher-ups leaning towards the Night Slayer Team, their expressions will surely be incredibly wonderful!

However.

Before that, Su Yu still had one thing to do.

His gaze turned to the mess of Radiation Beasts' corpses lying on the ground outside the motorcade camp, and with a thought, he approached Yang Lie.

At this moment, Yang Lie and the other members of the Ninth Squad were all exhausted.

Watching the rescue team arrive, their faces showed an expression of surviving a disaster.

Seeing Su Yu approach, everyone's gaze naturally turned towards him, with deep gratitude in their eyes.

If it weren't for Su Yu tonight, even if Yang Lie and the others fought to the death, this convoy camp might have been breached by the Radiation Beast horde and become these beasts' feast!

"Brother Su, you worked hard tonight!"

A combat team member couldn't help but say, moved.

Su Yu waved his hand, "It's a small matter; we're all teammates, after all; it's just my responsibility."

Saying this, Su Yu looked at Yang Lie and spoke in a deep voice, "However, Uncle Yang and everyone, do you have any thoughts about these spoils?"

"Thoughts?"

Hearing Su Yu's words.

Yang Lie and others were taken aback, and Yang Lie shook his head, "What kind of thoughts can we have? According to Sanctuary regulations, first, take out twenty percent to give to the hunting teams who came to rescue us as a reward, and the rest will naturally be brought back to the Sanctuary and turned in to the management office in exchange for contribution points!"

Listening to Yang Lie's words.

Su Yu's mouth curled into a smile, "If that's the case, Uncle Yang and several brothers, why not listen to my suggestion first?"

With that.

Su Yu swiftly explained his arrangement.

Listening to Su Yu's suggestion, Yang Lie and the others' eyes gradually lit up, going from confused to pleasantly surprised!

"Great! We'll do it as Brother Su suggests! We'll all listen to you!"

...

A few minutes later.

"Da-da-da——!"

Under the heavy fire of the rescue team, the Radiation Beast horde immediately tucked their tails and fled in embarrassment.

And those additional hunting teams that came along with the rescue team to hunt in the nearby area found the battlefield of the Ninth Squad, each of their eyes wide open in disbelief.

"Woah, Yang Lie, how many Radiation Beast hordes did you provoke?"

A Hunting Team captain couldn't help but exclaim.

Judging by the carcasses scattered around the convoy camp.

It's feared that the Radiation Beast horde besieging the Ninth Squad's camp has surpassed more than a few.

With so many Radiation Beasts, the Ninth Squad was still able to hold on until their arrival; their strength is somewhat exaggerated.

Listening to that Hunting Team captain's remarks, even a physically exhausted and muscle-fatigued Yang Lie smirked coldly, gazing towards several members of the Night Slayer Team mixed in the rescue team.

Leading among these Night Slayer Team members were Lei Wu and Li Yao.

Feeling Yang Lie's steely gaze.

Their expressions were slightly unnatural.

But Yang Lie did not converse much with Lei Wu and others; after thanking the leading Sanctuary Rescue Team captain, Yang Lie immediately instructed the logistical team to gather the slain Radiation Beast corpses.

Looking at the various and sundry spoils, there were dozens of Radiation Beasts.

Many Hunting Team members present had bright eyes.

Even those Hunting Team captains had faces showing envy.

Being besieged by the Radiation Beasts horde is incredibly dangerous.

But if one can survive this ordeal, relying on the convoy's defense to resist the Radiation Beast horde, the number of Radiation Beasts hunted will, under normal circumstances, far surpass that of arduously searching for Radiation Beasts in the wilderness for active hunting!

As they were envying, Yang Lie, however, smiled and spoke up.

"To all who rushed to aid, we, the Ninth Squad, are deeply grateful. According to the Sanctuary regulations, we should take out two percent of this hunt to give to those who rushed to rescue as a reward, however, I still have a proposal; I wonder if you would like to hear it, esteemed captains?"

Hearing the words, everyone was taken aback, and their eyes all fell on Yang Lie, filled with curiosity.

While Lei Wu and Li Yao, seeing Yang Lie's calm expression, felt somewhat unsettled inside.

"My proposal is simple."

Yang Lie ignored the two of them and directly spoke.

"According to the Sanctuary regulations, we need to take out two percent of our spoils as a reward for all of you who came to assist, but I plan to use thirty percent of our spoils as compensation for your captains."

"And as a condition, we would like you captains to purchase the remaining materials from this hunt. Of course, our pricing will not be high, based on the management office's standard price and further discounted by twenty percent!"

"What do you esteemed captains think?"

Hearing Yang Lie's words.

The eyes of the Hunting Team members present instantly lit up.

While Lei Wu and Li Yao instantly changed color!

### **Chapter 38: Chapter 35 Success**

The management department's price suppression on the Ninth Squad's spoils, forcing them into an unfinished hunting target, was a scheme devised by Lei Wu and Li Yao.

And the effect was quite good.

But now, the suggestion put forth by Su Yu and Yang Lie directly breaks this deadlock!

With the current spoils in the hands of the Ninth Squad, even if they were all sold at a reduced price, the contribution points gained would be an astonishing number.

Moreover, they would earn even more than by selling to the management department.

The management department had already priced the materials for normal Radiation Beasts at only thirty percent of the usual price.

And according to Su Yu's suggestion?

The remaining seventy percent of Radiation Beast materials, even with a further twenty percent discount, would still account for nearly sixty percent of the contribution points.

That's nearly twice the contribution point returns compared to selling to the management department!

If Yang Lie and Su Yu succeed in this endeavor, not to mention the hunting targets for this month, the hunting targets for the Ninth Squad next month could be easily achieved!

Such a situation, how could Lei Wu and Li Yao possibly allow it to happen?

"This is unacceptable! The sanctuary has clear regulations that the harvests of each hunting team must be handed over to the management department, which then calculates them into contribution points. Teams cannot process them independently!"

"Yang Lie, you are blatantly violating the sanctuary's rules!"

Li Yao declared loudly.

And beside him, Lei Wu spoke as he glanced at the leader of the rescue team, his tone threatening.

"Captain Bai, you are also part of the management department. You must be aware of this rule, right? Surely I don't need to invite the supervisors from the management department to explain this to Captain Bai?"

The rescue team leader is a three-star top-level Extraordinary of Physical Body named Bai Hong.

Hearing the threat in Lei Wu's words, Bai Hong frowned.

Although he was also a member of the sanctuary's management department, he was not like those managing the hunting teams.

Bai Hong usually took orders directly from the sanctuary's managers.

He had heard about the conflicts between the Night Slayer Team and the Ninth Squad in the sanctuary and had no interest in getting involved in these matters.

However, he had heard about the Night Slayer Team's situation, especially the strength of their captain, Li He.

If forced to choose, he would prefer not to offend the currently prominent Night Slayer Team.

But...

Bai Hong glanced at the rescue team members behind him.

Upon hearing that the Ninth Squad was willing to sell their Radiation Beast materials at a high discount, the rescue team members' eyes lit up.

They were not concerned about such long-term matters. The immediate benefits were what mattered most to them.

Yang Lie's words had persuaded them, and even Bai Hong did not want to provoke public anger at this moment.

Moreover.

Feeling the unabashed threat in Lei Wu's words, Bai Hong's eyes showed a hint of discontent.

Could a mere two-star Transcendent threaten him?

Just as Bai Hong was in a bit of a dilemma.

Yang Lie smiled slightly, stepped aside, and let Su Yu come forward.

Seeing Su Yu step out with a calm smile on his face.

Li Yao and Lei Wu felt their hearts skip a beat, but they couldn't think of how to stop Su Yu from speaking. They could only watch as Su Yu leisurely said.

"Vice Captain Lei is right. Our Ninth Squad did indeed forget this rule, so I must thank both of you for the reminder."

Su Yu said this with a sincere look on his face, as if showing gratitude to Lei Wu and Li Yao.

But after speaking,

he looked around at everyone present and smiled slightly.

"In that case, we might as well take all the spoils from the Ninth Squad's outing this time as a gratitude gift to thank Captain Bai and all the hunting teams for their help."

"Of course."

Su Yu paused and continued with a smile: "After this battle, our Ninth Squad has suffered heavy losses, and preparing for the next hunt is quite difficult, but with the generosity of all the captains here, I'm sure you would offer us some help by donating some contribution points to help our Ninth Squad through this trouble, right?"

Hearing Su Yu say this.

The hunting team captains present, including Bai Hong, were slightly taken aback.

Then, they all looked at Su Yu with a gleam in their eyes!

"Yes, yes! This young man Su... Su Yu, isn't it? Brother Su is right! Everyone can see the plight of the Ninth Squad; it's only natural for us to help!"

A sturdy middle-aged man who was not inferior to Yang Lie in stature was the first to respond.

This was Wang Jian, the captain of the Eleventh Squad.

Although his team's number was eleventh, their strength far surpassed the Ninth Squad.

Despite not having a three-star Transcendent, they had five top-tier two-star Transcendents in their ranks, and their core strength was not inferior to the Night Slayer, Mountain Mist, and Wolf Pack teams.

With Wang Jian taking the lead, the other hunting teams also began to respond one after another.

After all, the price offered by the Ninth Squad was genuinely favorable.

And under the guise of "donation," they bypassed the sanctuary's rules.

Even Lei Wu and Li Yao found it hard to say anything further.

Seeing one hunting team after another respond,

Lei Wu and Li Yao's expressions grew increasingly grim.

In the end, their gazes fell upon Bai Hong, filled with coldness.

Other hunting team captains and members, as well as Yang Lie and Su Yu, also looked at Bai Hong with expectation.

As a representative of the sanctuary's upper echelon, if Bai Hong nodded, even if Lei Wu and Li Yao caused a scene, it wouldn't have any effect.

But if Bai Hong refused,

the Night Slayer Team might leverage this issue against them once they returned.

Even if Wang Jian and the others claimed to be "donating" contribution points to the Ninth Squad, it wouldn't necessarily prevent the Night Slayer Team from making an issue out of it.

"Captain Bai, you must act impartially..."

Watching Bai Hong, who was now the center of attention, Li Yao couldn't help but darkly remind him.

Hearing his words.

A flash of determination finally appeared in Bai Hong's eyes. He gave Li Yao a cold look, then decisively spoke under the expectant gaze of his rescue team: "Rest assured, Captain Yang and Brother Su, the Ninth Squad has been severely damaged this time, and as the rescue team captain, Bai Hong will certainly help!"

"Great! Thank you very much, Captain Bai!"

Hearing Bai Hong's words,

Yang Lie and Su Yu immediately clapped their hands and nodded, while Li Yao and Lei Wu's faces became utterly dark. They didn't even wait around to receive their share of the "rewards" but turned around and left with some Night Slayer Team members.

Their backs seemed rather disgraceful!

...

The next morning, as the sun rose,

The Ninth Squad, along with Bai Hong and a few other hunting teams preparing to return to the sanctuary, slowly made their way back.

Every member of the Ninth Squad had expectant gazes, occasionally looking back at the tent on the trailer where their captain was calculating their harvest, feeling excited and curious.

Even Su Yu had an expectant look in his eyes.

Yang Lie, of course, knew this as well.

After calculating the results and verifying them twice to ensure there were no errors, he decisively lifted the tent flap and stepped out. Under the watchful eyes of the team members, he announced a number!

"Six thousand... six thousand five hundred!?"

"Six thousand five hundred contribution points!?"

Hearing this result.

Even the rest of the Ninth Squad's members, including Su Yu, were surprised!

However, after calming down, Su Yu wasn't too astonished by this result, considering that he had been there last night as a sniper.

Just the five two-star Radiation Beast Lords he personally sniped exceeded five.

In normal circumstances, each of these two-star Radiation Beast Lords could easily fetch over eight hundred contribution points in materials.

Even at sixty percent.

Five two-star Radiation Beast Lords could provide the Ninth Squad with over three thousand contribution points.

Combined with the other two-star and one-star Radiation Beasts.

The final result wasn't too exaggerated.

But more than this surprising figure,

Su Yu cared more about this.

"With these contribution points, not only can we smoothly achieve this month and next month's hunting targets."

"We can even bail out Wang Shan and Wu Yue!"

### **Chapter 39: Chapter 36: Breaking the Game**

Yang Lie and the others were quite pleasantly surprised.

"If we could bail out Old Wang and Old Wu as well, our haul during the next hunt might be even greater!"

Several combatants voiced this opinion.

But Su Yu's expression remained much calmer.

Listening to their words, a thought flickered in his eyes.

Previously, before his professional transition.

For Su Yu, the best and only solution was to ally with the Ninth Squad, grow during the tussle with the Night Slayer Team, and eventually resolve the threat posed by them.

But now.

With Su Yu's successful transition to a Battlefield Mechanic.

Especially after witnessing the core ability of a Battlefield Mechanic, the Steel Meditation Method, and the special effects of the spiritual energy cultivated from it.

Su Yu began to entertain a different idea.

"Perhaps, I should try a different approach!"

Su Yu muttered softly, gazing at the faint outline of the sanctuary emerging on the horizon, a glint in his eyes.

He already had a rough plan and strategy.

But whether it would succeed or not needed verification back at the sanctuary.

With other hunting teams accompanying them, no Radiation Beasts came to disrupt their journey back to the sanctuary.

Upon entering the sanctuary, Su Yu temporarily parted ways with the Ninth Squad.

He needed to return to the repair shop to conduct some personal experiments.

Of course, before parting, Su Yu didn't forget to take with him the equipment from the Ninth Squad that urgently needed repair and maintenance.

As for the parts needed for those repairs, Su Yu wasn't worried.

During the past few days of hunting, the Ninth Squad had also ventured into the ruins of towns and gathered quite a few usable old parts.

Altogether, they had filled two whole boxes.

Although the grade wasn't very high, with Su Yu's current repair skills, the parts he could salvage were enough to repair and maintain the Ninth Squad's equipment, and also allowed Su Yu to complete some of his experiments.

As for Yang Lie and the others, they took their contribution points and hurried to the administration office to bail out Wang Shan and Wu Yue as quickly as possible.

...

With a light creak, Su Yu pushed open the repair shop door and returned to the room he hadn't seen in a while.

As soon as he entered, he saw the display of Nuonuo in the corner light up.

"Master, welcome back."

The electronic synthetic voice remained devoid of any emotional fluctuation, yet it made Su Yu feel a peculiar sense of concern. He smiled slightly and nodded, "Yes, I'm back."

With that, Su Yu set down the parts and equipment box in his hands, unplugged Nuonuo's power cord, and gave it the command to tidy up the workshop.

Su Yu himself then sat cross-legged and began to attempt to operate the core ability of the Battlefield Mechanic, which he had mastered upon taking the job.

"Steel Meditation Method!"

Su Yu murmured softly, his eyes filled with anticipation.

After taking the job, he had already tried to operate the unique mechanical spiritual energy of a Battlefield Mechanic.

But he hadn't truly gotten a handle on how to cultivate this spiritual energy.

After all, this Steel Meditation Method was considered a new trump card of his.

Although the mechanical spiritual energy cultivated couldn't be used directly in combat.

A meditation method that could be systematically cultivated in a place like Shelter No. 73 was already incomparably precious.

Su Yu wasn't naive enough to expose this trump card rashly; he only began attempting to operate it after returning.

"Buzz!"

According to the meditation method's description.

Su Yu began imagining a gear in his mind, as if a gear-shaped phantom appeared in his mind, a light orb.

As this gear gradually solidified.

In the unseen realm.

Su Yu felt as if a spark of spirit emerged in his mind.

This spark of spirit, with the gear's rotation, gradually expanded and solidified.

Finally, under Su Yu's guidance, it leaped out of his mind and appeared before him!

"This... is the mechanical spiritual energy envisioned by the Steel Meditation Method!"

Su Yu slowly opened his eyes and looked at the flickering spirit light before him, akin to a candle flame.

Though this spirit light seemed like a flickering candle in the wind.

But...

"Whoosh!"

With a thought from Su Yu.

The mechanical parts scattered within a five-meter radius around the spirit light began to float and hover around Su Yu.

With just a thought from Su Yu.

They transformed and assembled into different forms.

Moreover, if Su Yu desired, he could consume some spiritual energy to restore the flaws and wear on these mechanical parts.

Of course, this restoration had its limits.

Larger mechanical creations that required extensive repairs would still need hands-on repair and maintenance.

But general wear and damage could be fixed in a short time by consuming a certain amount of spiritual energy.

And this was just the mechanical spiritual energy condensed at level 1 of the Steel Meditation Method!

"With just the enhancement from this layer of spiritual energy, my daily repair and maintenance efficiency is boosted threefold!"

"And as I repair and maintain more equipment, both my Battlefield Mechanic level and the level of the Steel Meditation Method will rise rapidly."

"Then, my repair efficiency can improve even further!"

Su Yu's eyes grew increasingly bright!

He had already figured it out in the wilderness.

Going out to hunt Radiation Beasts, accumulating contribution points, fulfilling hunting objectives—all of these were methods for him and the Ninth Squad to protect themselves.

The ultimate goal remained to strengthen himself and completely eliminate the threat from the Night Slayer Team.

With the completion of the transition to the Battlefield Mechanic profession.

And today's verification.

Su Yu finally confirmed that, under the enhancement of this extraordinary profession, he had truly established a safer way to contend with the Night Slayer Team.

And that is.

"Stay in the sanctuary and become a repairman!"

But not just any repairman, rather... a transcendent repairman!

"Let Uncle Yang's Ninth Squad act as my representatives in the sanctuary to help me purchase equipment and mechanical parts from other hunting teams, and serve as my bodyguards to watch over my repair shop."

With just Su Yu alone.

The Night Slayer Team would find ways to get at him, even in the sanctuary.

But with the addition of the entire Ninth Squad.

Even if the Night Slayer Team wanted to act secretly, they couldn't do so covertly; they would inevitably expose themselves.

At that time, having already posed a threat to many formidable individuals in the sanctuary, the Night Slayer Team would surely be attacked en masse!

So, letting the Ninth Squad become his agents and bodyguards was not only to repay Yang Lie and others for their previous assistance but also a means of helping himself!

Su Yu could make transactions with other hunting teams and take orders from the higher-ups in the sanctuary.

The contribution points he earned would be enough to keep the entire Ninth Squad operational, preventing them from being expelled from the sanctuary.

Furthermore, staying in the sanctuary was much safer than up in the wilderness, where they could be ambushed by the Night Slayer Team at any moment!

"But before that, there's still one problem, which is..."

"Uncle Yang and the others must fully trust me!"

#### **Chapter 40: Chapter 37 Trust**

"No problem! Since you say so, Brother Su, you must have your reasons!"

An hour later, inside the repair shop.

Listening to Yang Lie and the others' responses, Su Yu was a bit dumbfounded.

"This, Uncle Yang, aren't you going to ask a few more questions?"

"What's there to ask? If it weren't for your decisive action and finding a way to trade with other hunting teams, our Ninth Squad would have been played to death by the Night Slayer Team long ago. How could we have lasted until now?"

"Exactly, if it weren't for your intervention, Brother Yang and the others, not to mention us, would have probably been locked up in the detention center and tortured to death!"

Yang Lie said with a smile.

Beside him, a few members of the Ninth Squad were supporting Wang Shan and Wu Yue, who had just come out of the detention center and were still quite weak, echoing in agreement.

Listening to their words, Su Yu couldn't help but take a deep breath.

According to Su Yu's plan.

The first thing Su Yu had to do now was to leave the Ninth Squad and regain his status as a refugee mechanic.

And as the core of the Ninth Squad, suddenly wanting to leave the team.

Were he in Yang Lie's place, Su Yu would find it hard to accept.

But Yang Lie and the other members of the Ninth Squad agreed to his proposal without hesitation.

Which made Su Yu feel quite moved.

However, this wasn't the time to dwell on such emotions.

He said seriously, "In that case, I first want to thank everyone for their trust."

"Now, let me explain my plan moving forward."

"The title of the Ninth Squad as a hunting team must not be discarded; it must be kept, because with this title, we can retain enough weapons and equipment."

"According to the regulations of the management office, each hunting team needs to submit a certain amount of radiation beast materials each month if they do not go out hunting. For us, this means about 4,200 contribution points every month."

Upon hearing this number.

Su Yu, along with Yang Lie and the others, all let out a sneer.

With the collusion between the administration and the Night Slayer Team, even if the Ninth Squad went out hunting normally, they would still need to provide an equivalent number of radiation beast materials each month just to remain in the sanctuary.

In that case.

What difference does it make whether they go out or not?

Shaking his head, Su Yu put aside his distracting thoughts and continued, "In short, according to the sanctuary's regulations, we need to pay up 4,200 contribution points every month. After bailing out Brother Wang and Brother Wu, and paying this month's contribution points, we have about 4,500 contribution points left, which will be enough for next month's payment."

"But, I need Uncle Yang and the others not to pay next month's contribution points yet, but to hold onto them and contact other hunting teams to purchase mechanical parts from them."

"Out of these 4,500 contribution points, spend 500 on essential food and daily necessities, and use the remaining 4,000 to acquire these mechanical creations!"

Upon hearing Su Yu's words.

Members of the Ninth Squad present were slightly taken aback, even Wang Shan and Wu Yue widened their eyes.

"Four thousand contribution points to buy mechanical creations, how much is that? Ten boxes? Twenty boxes?"

Everyone was a bit dumbfounded.

Even Yang Lie took a deep breath, calming his inner shock, looking at Su Yu with an intense gaze, "What happens after the acquisition?"

"After acquiring them, hand over these parts to me, and I will take charge of turning them into the Ninth Squad's assets!"

"I will also prepare next month's contribution points by the end of the month, so please trust me!"

Listening to Su Yu's words.

Yang Lie and the others exchanged a look and nodded emphatically, "No problem! We'll get to it right away!"

Watching Yang Lie and the others leave resolutely.

Su Yu couldn't help but feel a surge of excitement in his heart.

He really hadn't expected that this persuasion would go so smoothly.

"Don't worry..."

"I won't let you down!"

The toughest part of Su Yu's plan was resolved so smoothly.

Su Yu felt a great sense of relief in his heart.

"Next, it's time to go to the management office and reclaim my status as a mechanic in the sanctuary!"

Su Yu smiled slightly and murmured softly.

"I hope Eisen's expression won't be too colorful when he sees me again!"

...

Management Office, Exchange Point.

"You have already left... the Ninth Squad!?"

Inside the exchange point.

Eisen couldn't hide his shock.

He looked at the sanctuary identity card Su Yu handed over, and after inserting it into the computer for verification.

The information revealed that the identity of a hunting team member had indeed been removed, leaving Eisen's mouth gaping wide in surprise.

He had heard.

This time, Su Yu had made Lei Wu and Li Yao suffer a quiet loss.

He had managed to resolve the issue imposed by the management office on the Ninth Squad.

Originally, he thought Su Yu would continue proudly alongside the Ninth Squad and stand against the Night Slayer Team.

But now, Su Yu had surprisingly retreated, voluntarily exiting the Ninth Squad to become a mechanic again?

"What is he planning?"

Eisen's eyes kept darting around, staring at Su Yu to discern his true intentions.

But how could he see such things?

"Why, Supervisor Eisen, are you suggesting that my abilities are insufficient to serve as the sanctuary's mechanic?"

Su Yu spoke calmly.

His words pulled Eisen back to reality.

Feeling the chill in Su Yu's eyes, Eisen couldn't help but shiver and quickly grinned, "No problem, there's naturally no issue!"

With that, Eisen expedited the processing of Su Yu's paperwork while also notifying the Night Slayer Team of this development.

"Su Yu plans to leave the Ninth Squad and stay in the sanctuary as a mechanic again?"

Upon hearing this.

Members of the Night Slayer Team looked at each other.

Especially Lei Wu and Li Yao.

Both had an unmistakable bewilderment in their eyes.

This time, they suffered a significant defeat, and their planned suppression of Su Yu and the Ninth Squad was easily thwarted.

But now, Su Yu chose to leave the Ninth Squad.

This succession of actions left Lei Wu and Li Yao puzzled!

"What is Su Yu thinking?"

Li Yao couldn't conceal his curiosity.

At this moment.

Within the Night Slayer Team's base, a member seemed to have thought of something, with a gleam in their eyes: "Perhaps, that Su Yu is scared?"

"Scared?"

Li Yao was taken aback.

Then, both his and Lei Wu's eyes sparkled with delight!

"That's it! That's it exactly!"

Though Su Yu luckily managed to help the Ninth Squad gather the contribution points needed for their future hunting goals.

Last night's hunt was extremely perilous.

If the rescue team had arrived any later, no matter how powerful Su Yu was, both he and the Ninth Squad wouldn't have escaped becoming a feast for the radiation beasts!

After this battle.

Considering Su Yu's age, being frightened by the wilderness, and choosing not to hunt there again, but to return to the sanctuary as a more secure mechanic, makes sense!

"But, does he think that by leaving the Ninth Squad and becoming a mechanic, we'll spare him? How laughable and naive!"

Li Yao sneered.

Next to him, Lei Wu's eyes were equally sinister.

This time, Su Yu and the Ninth Squad thoroughly embarrassed him and Li Yao, and that too in front of Bai Hong and many of the sanctuary's elites.

This grudge.

Lei Wu had no intention of letting go so easily!

"Stay in the sanctuary and think everything is fine? Wishful thinking!"

Lei Wu sneered, contemplating how to deal with Su Yu.

Just then, the phone rang again, and a member of the Night Slayer Team in charge of answering it ran over with a blank face after receiving the message!

"Deputy Captain Lei, Young Master Li, Supervisor Eisen just sent over a message..."

"That Su Yu, after regaining his status as a mechanic, the first thing he did was to take on all the mechanical orders in the sanctuary!"

"Eighteen orders, all now on his shoulders! If he can complete them, he'll make at least... 17,000 contribution points in a month!"
