## **Chapter 41: Chapter 38 Cooperation**

"Someone took on eighteen orders by themselves? Are they trying to work themselves to death, or do they have some other plan?"

Eisen's words were heard.

The members of the Night Slayer Team present were all stunned.

Lei Wu and Li Yao even doubted their ears, wondering if there was something wrong!

The Sanctuary does not prohibit Mechanics from taking multiple orders at once.

But for every order, if it cannot be completed on time, contribution points will be deducted proportionally.

Moreover, the more orders you take.

The higher the deduction ratio.

Like Su Yu, taking on eighteen orders in one go, if successfully completed, he could earn over 17,000 contribution points.

But if he fails to complete them.

The penalty would be as high as 30,000 contribution points!

This penalty, relying solely on Su Yu, even with the help of the rest of the Ninth Squad, would be impossible to pay.

That is to say.

If Su Yu fails to meet the target this month, he will be directly expelled from the Sanctuary!

No.

"Even worse than being expelled from the Sanctuary!"

For those who owe a huge debt of contribution points to the Sanctuary.

The higher-ups are not kind-hearted.

If Su Yu has no skills, he will be directly traded to those slave traders roaming the wilderness by the Sanctuary.

And if Su Yu has a skill, he will have to work as a slave for the Sanctuary until he dies!

That is a fate truly worse than death!

But the problem is, as a resident of the Sanctuary, Su Yu couldn't be unaware of this, yet he still chose to take on so many Sanctuary orders.

"What on earth is he thinking?"

Lei Wu and Li Yao had confusion in their eyes.

But soon, they both realized.

"No matter what this guy is planning to do, we mustn't let him have his way!"

Previously, Su Yu led the Ninth Squad and repeatedly escaped the Night Slayer's traps, making Lei Wu and Li Yao incredibly wary of Su Yu.

Immediately, they had Eisen send over the details of the orders Su Yu took.

Eighteen orders, naturally not every one would have the Sanctuary supply parts and equipment for Su Yu.

A third of the orders require Su Yu to procure the parts himself to produce the necessary equipment for the Sanctuary.

Of course, the rewards for such orders are also higher.

Completing one generally brings in more than 2,000 contribution points.

"Whether it's Su Yu or the Ninth Squad, they might have some parts on hand, but definitely not enough to support Su Yu in completing all these orders!"

"He will definitely try to find a way to connect with other hunting teams to buy parts from them!"

After reading the order information sent by Eisen.

Lei Wu and Li Yao exchanged a glance, already having an idea in their minds!

...

"Su Yu, I heard from Yang Lie that you want to buy the old machinery our team has recovered?"

In front of the repair shop.

Captain Wang Jian of the Eleventh Squad stood with arms crossed, looking at Su Yu with an assessing gaze.

Beside him, the other hunting team captains invited by Yang Lie to the repair shop also curiously looked at Su Yu.

They all already knew from Yang Lie about Su Yu's intention to cooperate with them to buy the surplus mechanical parts in their hands.

For the hunting teams, the mechanical parts they recover from the wilderness often feel like a chicken rib.

Only top teams like the Night Slayer have a sufficiently skilled Permanent Mechanic.

Otherwise, a regular Permanent Mechanic in any team can't fully use up the old machinery they collect each month.

Moreover, not every old mechanical part is useful.

A big piece that seems like it could provide many useful items could end up, after a Mechanic inspects it back at the Sanctuary, providing less than one-tenth of its weight in usable parts for their team.

But, if they don't recover these mechanical parts.

When their team needs to repair equipment, they have to exchange for these old machines from the Sanctuary management at a high price.

The cost of doing that would be far more than recovering machinery from the wilderness.

So, after knowing Su Yu intends to purchase the mechanical parts stored by each team, without discrimination, willing to buy any Mechanical Creation, and offering a fair rate of contribution points.

Even those medium-sized hunting teams were attracted.

Even people like Wang Jian were drawn here.

Seeing the curious looks from Wang Jian and others, Su Yu smiled slightly and nodded, "That's right, I'm planning to buy the old machinery in the hands of each team, but I have to make this clear first."

As Su Yu spoke, he looked at everyone present, and a bright light appeared in his eyes.

"I'm offering a price that's twenty percent higher than what Uncle Yang said before! But as a condition, I need you all to make a contract with me that for the next three months, you sell all the mechanical parts you recover from the wilderness to me!"

"Twenty percent higher!?"

Upon hearing Su Yu's words.

Wang Jian and the others had not spoken yet.

Yang Lie and the others had their eyes wide open.

Under normal circumstances, the parts each hunting team temporarily does not use, if sold to the management.

The old parts a hunting team accumulates in a month would barely sell for seven or eight hundred contribution points, if that.

The price Su Yu had Yang Lie propose was already a thousand contribution points, which was quite profitable for the teams.

Now Su Yu says he'll raise it by twenty percent more?

A team would get twelve hundred contribution points?

They only have a balance of four thousand contribution points, and there are seven hunting teams gathered here, meaning they would need to come up with at least eight thousand contribution points.

Where would they get so much contribution?

Even Wang Jian, after hearing Su Yu's words, laughed.

"Su Yu, don't talk big, don't forget, we just cooperated recently."

Wang Jian said, his eyes shining as he stared at Su Yu.

"The Ninth Team, combined, has at most just over four thousand contribution points!"

"You're offering to raise it by twenty percent. It sounds encouraging, but tell me, how do you plan to pay us?"

Hearing Wang Jian's words.

The other hunting team captains behind him also started to stir, voicing agreement, looking at Su Yu with some displeasure.

"Su Yu, you're not playing us, are you?"

"Exactly! We're all busy, we don't have time for jokes!"

Hearing everyone's comments.

Yang Lie and the others couldn't help but feel a bit flustered.

However, Su Yu's expression remained calm, seeing the displeasure on people's faces, he smiled calmly and said leisurely: "How to pay, hasn't Captain Wang already mentioned it?"

"We, 'cooperated' before, haven't we?"

## **Chapter 42: Chapter 39 Provocation**

Su Yu looked at Wang Jian and the other hunting captains present, his gaze burning as he spoke in a deep voice.

"My technology is my guarantee for paying all of you!"

"The situation of the Ninth Squad in the past is well known to everyone, but it was such a team that experienced a massive boost in overall strength after I became the Mechanic of the Ninth Squad, as you all witnessed in the rescue battle the other night."

"Under such a siege of Radiation Beasts, we still held on until help arrived. I think that alone should be enough to prove my personal technical level."

Su Yu's tone was calm.

His words made Wang Jian and the others present nod slightly.

Although Su Yu's words sounded somewhat boastful,

there was no denying that the strength increase of the Ninth Squad during this period had indeed shocked Wang Jian and the others.

However.

"But what does this have to do with our cooperation with you?"

Wang Jian stared at Su Yu and spoke in a deep voice.

"It's simple."

Hearing Wang Jian ask about the details of the cooperation, Su Yu's smile widened.

"As all the captains said, our Ninth Squad currently doesn't have enough contribution points to acquire the Mechanical Creations retrieved by each hunting team in the future two months."

"Even the Mechanical Creations harvested by each hunting team this month, we can't fully acquire them."

"But I need you captains to sell your surplus Mechanical Creations from this month to me in advance."

Su Yu said, looking at Wang Jian and the others, a determined gleam in his eyes.

"I need the maximum trust from you captains. Of course, I'm not just talking big. For each captain willing to cooperate, I will pay half, that is, a deposit of six hundred contribution points; the remaining half will be paid to the captains after I complete the Sanctuary's orders by the end of next month."

"Moreover, if you captains are willing to nod, in the future, if there's any need for equipment upgrades, modifications, or major repairs and refurbishments in your teams, you can come to me, Su Yu, and I will not refuse!"

"Equipment upgrades and modifications?"

The major repairs and refurbishments didn't interest the hunting team captains present.

But when Su Yu mentioned equipment upgrades and modifications, everyone's eyes lit up.

Even Wang Jian was clearly tempted.

However, being the strongest among the hunting teams present, he quickly caught the key information in Su Yu's words.

"What level can the upgrades reach at most?"

"Simple Equipment can be upgraded to Basic, and Basic Equipment can be upgraded to Intermediate. Of course, all these modifications require the captains to provide the parts."

"Additionally..."

Su Yu paused and then said softly, "If you captains can provide enough parts or high-grade damaged machinery that can inspire me and give me new design ideas."

"I might even be able to design Advanced Equipment!"

"What!?"

This time, not just Wang Jian.

Even Yang Lie and the others were stunned.

Advanced Equipment, what kind of concept is that?

The entire Sanctuary might not even have a few pieces.

Though such high-grade equipment can't directly add Spiritual Energy to amplify power, its attributes and data already reach the limits of conventional weapons.

To give an example with firearms,

an Intermediate sniper rifle can at most threaten a two-star Basic Transcendent.

Against higher and stronger Transcendents, even if it locks onto a target,

by the time the bullet reaches them, the target may have already reacted and dodged the trajectory!

But an Advanced-quality sniper rifle,

if used well,

could potentially harm even a three-star Transcendent!

And Su Yu dared to say he could modify weapons of this grade?

Seeing the shocked gazes of everyone, Su Yu smiled slightly without much explanation, taking out his Falcon Gun and placing it on the counter.

"My gun is here. Feel free to inspect it, everyone."

Seeing Su Yu openly put out the Falcon Gun,

the hunting captains present exchanged glances, and finally, Wang Jian stepped forward to take the Falcon Gun, inspecting it carefully and trying to chamber a round, aiming.

Then, he exhaled heavily, looking at the eagerly watching captains around him and nodded slightly.

"Not bad, this sniper rifle's performance definitely reaches Advanced level!"

Hearing Wang Jian's confirmatory words,

the several hunting captains present,

including Yang Lie, couldn't help but widen their eyes in surprise and joy as they looked at Su Yu!

"Su, based on your conditions, our Eleventh Squad is willing to cooperate with you!"

Wang Jian was the first to speak.

Afterwards, the other hunting team captains also nodded one after another.

No kidding,

even if they couldn't provide parts for Su Yu to modify weapons of Advanced quality,

having Intermediate or Basic weapons for each fighter in their teams would significantly boost their hunting teams' strength!

Moreover, with Su Yu's Falcon Gun as a guarantee,

and the Ninth Squad's significant increase in combat power.

The hunting team captains present no longer doubted Su Yu's technical level.

With this level of skill, taking on a few more orders from the Sanctuary,

they could easily repay all the debts from the various squads!

And seeing Su Yu successfully persuading the captains from these squads,

the faces of Yang Lie and others also lit up with joy.

But at this moment.

From afar, Li Yao and Lei Wu's amused voices came.

"Mr. Su's technology is indeed solid. Who would've thought Mr. Su still had this card up his sleeve!"

"The captains really found a good deal!"

Hearing Li Yao and Lei Wu's words,

the hunting captains present slightly changed their expressions.

Yang Lie's eyes turned cold as he looked at the two, "Li Yao, Lei Wu, what are you two doing here?"

"What? This is a public area of the Sanctuary, Captain Yang. Are you so overbearing that you won't even let us come near here?"

Li Yao sneered, directly confronting Yang Lie with a retort.

And beside him, Lei Wu, looking at Wang Jian and the others, spoke with a sinister tone, "Captain Yang doesn't need to worry. We aren't here for the Ninth Squad; we're here to give Captain Wang and the others a little reminder."

"Mr. Su's eloquence was just as solid as his technology. It's just that you may not know."

"Mr. Su, previously took on as many as eighteen orders from the Sanctuary all at once!"

Lei Wu said, shaking his head with an exaggerated expression filled with mockery.

"Eighteen orders. If completed, Mr. Su would earn nearly twenty thousand contribution points in one go! Easily paying off the debts to all the captains, and the advance payments for the next two months of scrap machinery would be a breeze!"

"However, if he fails to complete them, the penalty fees Mr. Su would bear are heading towards fifty thousand, tsk tsk... Ah, I misspoke."

Seeing the instantly changing expressions of Wang Jian and the others,

Lei Wu, with his scheme successful, smiled smugly and raised his eyebrows at Su Yu, "Since Mr. Su dared to take on so many orders, he must be prepared. Surely he won't end up being penalized by the Sanctuary? It was me who misspoke!"

After finishing,

Lei Wu and Li Yao exchanged a glance and turned away.

And listening to Lei Wu and Li Yao's explanation,

the enthusiasm on the faces of the several originally interested hunting captains instantly faded.

Two hunting team captains, hesitating slightly, decisively stood up and left hurriedly, not even greeting Su Yu and Yang Lie, apparently having completely lost trust in Su Yu and the Ninth Squad!

### **Chapter 43: Chapter 40: The Trump Card**

"Why the rush, Captain Lin, Captain Hu!"

Seeing the two Hunting Captains preparing to leave,

Yang Lie hurriedly called out to them, hoping they would hold on a little longer.

But the two just shook their heads.

The captain surnamed Lin looked particularly displeased, shooting a cold glance at Su Yu, then dismissively said to Yang Lie, "Yang Lie, you're a veteran of the Sanctuary. How skilled can a Mechanic be?"

"Eighteen orders, can you honestly say, with confidence, that you believe the kid in your team can handle it?"

Hearing Captain Lin's words,

Yang Lie was momentarily at a loss for words.

Seeing Yang Lie speechless only made Captain Lin more convinced of his decision. He sneered, calling out to the others, "What are you all standing around for? Do you really think this kid can complete eighteen orders by himself?"

With that, the two left without looking back.

Seeing them leave, Wang Jian and the others' expressions changed slightly.

Each of them looked at Su Yu with suspicion.

Even Yang Lie appeared a bit flustered.

After all, he hadn't expected Su Yu to accept so many orders at once!

"Li Yao and Lei Wu might just be making baseless claims, maybe they're just talking nonsense..."

Yang Lie tried to defend Su Yu, at least to stabilize the current situation.

But before he could finish speaking, Su Yu interrupted with a smile.

"Uncle Yang, there's no need to say that."

Su Yu spoke, looking at Wang Jian and the others, smiling slightly, "Captains, the news brought by Lei Wu and Li Yao is true. I did accept the eighteen orders posted by the Sanctuary."

"If any captain wants to withdraw, you can leave now; I won't stop you."

"However, let me say this up front."

Su Yu's tone was calm, and his gaze indifferent, but his words carried a firm resolve.

"Those who leave today won't find it so easy to collaborate with our Ninth Squad in the future."

What Su Yu desired was not just mechanical parts from these small teams but to use this opportunity to select suitable allies from the remaining hunting teams in the Sanctuary and unite them with his technology.

A single hunting team can't withstand the pressure from Night Slayer.

But if these hunting teams unite,

they won't be easily targeted by not just Night Slayer, but even the higher-ranked Wolf Pack and Mountain Mist!

Therefore, the selection of these allies needs to be a bit stricter. At the very least, they shouldn't be the type to turn tail at the first sign of pressure!

Hearing Su Yu's words,

Wang Jian and the others were stunned.

They thought Su Yu should be begging them to stay and work with him.

But now, why did it seem like Su Yu was confident of winning?

Where did he get such confidence?

As Wang Jian and the others were puzzled, Su Yu continued speaking.

"Also, before the captains decide to collaborate, I need to clarify that I initially only asked each team for the mechanical parts they collected this month because we have a total of seven hunting teams that can provide parts."

"But now, due to the withdrawal of those two captains, I not only need the parts collected this month from the remaining teams but also the untouched parts from the previous months' inventory."

"Of course,"

Su Yu paused, speaking leisurely, "since I'm raising the stakes again on my side, I'll also present something to prove to the captains that I have the capability and won't waste the investment of the teams."

"You have the capability? Kid, stop bluffing!"

Hearing Su Yu's words,

members of the Ninth Squad were dumbstruck.

They trusted Su Yu's ability, but that didn't mean they blindly followed him.

Eighteen orders were a heavy burden.

Even if they racked their brains, they couldn't think of a solution.

If they were like this, the other captains would be even more dubious.

Angry hunting captains, not waiting for Su Yu to finish, were about to leave with a cold snort.

Just then, Wang Jian, who had been silent, extended his hand to stop them!

"Brother Wang, don't tell me you're really taken in by this kid's bluff!"

The hunting captain was stunned, his eyes widened upon seeing Wang Jian stopping him.

"Whether it's a bluff or not, since we've spent so much time here, why not let the kid finish?"

"Besides, can you really avoid Night Slayer's threat by leaving now?"

Hearing Wang Jian mention Night Slayer, the hunting captain's expression changed slightly.

Previously, the Night Slayer Team had swallowed three hunting teams in succession.

Although later, under a manager's warning, Night Slayer's actions in the wilderness had considerably restrained.

But restraint doesn't mean inaction.

The hunting teams recently noticed a rise in Radiation Beasts' numbers and strength in the hunting area around the Sanctuary.

Such an increase can hardly be called normal!

"Phew..."

Hesitating for a moment, the hunting captain named Luo Wang took a deep breath and decided to stay, albeit with a disgruntled expression, still eying Su Yu with distrust.

"Kid, let's see what card you're holding!"

"Captains, rest assured."

Listening to Wang Jian and Luo Wang's conversation,

Su Yu felt a surge of delight.

He hadn't expected Night Slayer to still target other hunting teams.

This way,

his plan could be realized even more smoothly!

"The Night Slayer Team is somehow becoming my lucky star!"

Su Yu mused silently, then calmed his mind and opened the door beside the counter.

"Since the captains are willing to hear me out, then please come into the shop."

With that said, Su Yu led the way into the depths of the repair shop.

Wang Jian and the others exchanged glances and followed him inside.

"What's so secretive about your trump card..."

Luo Wang still bore some disgruntlement, grumbling as he followed along.

But the next second, his words were cut off, his eyes revealing unmistakable astonishment!

It wasn't just Luo Wang.

Wang Jian, Yang Lie...

The present hunting captains all widened their eyes.

In their gazes,

Behind Su Yu, as the Steel Meditation activated,

The spiritual energy stored in his mind quietly spread, causing the prepared parts around him to float and rise, then—

"Ka-ka click-click—"

Amid the sound of gears turning and mechanisms clashing, within two to three minutes,

The parts scattered on the ground were assembled by Su Yu into two brand-new firearms!

"Trans..."

"Transcendent!?"

#### **Chapter 44: Chapter 41 Subdued**

Shock, incredible shock!

Whether it was Wang Jian or other hunting captains.

Including Yang Lie, they were all somewhat dumbfounded at the moment.

They never dreamed that Su Yu's trump card would be like this.

A transcendent of the spiritual ability type.

And...

Looking at the two firearms rapidly assembled by Su Yu, Wang Jian couldn't help but swallow hard.

As the captain of the Eleventh Squad, the permanent mechanic of the Eleventh Squad, although he couldn't compare to the permanent mechanics of the Night Slayer Teams,

his technical level could still be considered a veteran.

But even for him, assembling two firearms would take at least thirty minutes.

And Su Yu?

The time spent both before and after didn't even take three minutes!

The assembly speed alone was ten times that of an average mechanic!

"It's not just about assembly."

Just when everyone was dazed, Su Yu's voice rang out again.

"The task I took from the management office not only involved assembling a batch of firearms but also repairing a batch of weaponry and maintaining about three hundred sets of armor, among other things."

"And for these tasks, my spiritual energy can assist me."

As he spoke.

Su Yu snapped his fingers lightly.

The two assembled firearms were sent in front of Wang Jian and others by him.

Then his spiritual energy directly dragged several pieces of already damaged electric weapons that were almost inoperable to his side and started repairing them on the spot, in front of everyone.

And this time, it was still beyond imagination in terms of speed.

In just about an hour, five pieces of equipment, which theoretically could exhaust an old mechanic for an entire day and might still not be repaired properly, were as good as new in Su Yu's hands!

Moreover, there was also the upkeep of equipment.

The maintenance of weapons and such.

Su Yu didn't miss any, revealing them one by one.

This left Yang Lie and others dumbfounded!

And Luo Wang, who had been quite dissatisfied with Su Yu before entering the shop, now had his eyes wide open, and the shock was almost overflowing from his eyes when looking at Su Yu.

"This... this Su Yu, can replace several mechanics all by himself? Five? Ten?"

Upon hearing Luo Wang's sigh.

Wang Jian and others present all snapped back to reality, looking at Su Yu with eyes heated to the extreme!

Mechanics are not necessarily required for a hunting team formation.

But if a hunting team wants to become stronger and survive longer in these wastelands, cooperation with a skilled mechanic is absolutely essential!

No one doubts Su Yu's technical skills now.

And the work efficiency Su Yu demonstrated now utterly convinced Wang Jian and others!

Moreover, putting aside the identity of a mechanic.

Su Yu himself is a spiritual ability user.

Although this spiritual user seems to have no combat ability yet,

with Li He, the captain of the Night Slayer Team, "a true pearl" here.

To Wang Jian and other residents of Shelter No. 73, spiritual users inherently represent mystery and power, which further increases their trust in Su Yu!

"The cooperation conditions Su little brother mentioned earlier, our Eleventh Squad has no issue and is willing to accept them!"

"We the Thirteenth Squad as well!"

"Luo's Fourth Squad also has no problem!"

Luo Wang, Wang Jian... the remaining five hunting captains, all hurriedly said, fearing they would be misunderstood by Su Yu and kicked out!

Looking at them being so eager, the Ninth Squad members, including Yang Lie, were all dumbfounded.

It wasn't until Luo Wang and the others left to begin preparing the transportation of mechanical parts,

that Yang Lie and others snapped back to reality, and they all had undisguised shock and excitement in their eyes when looking at Su Yu.

Seeing Yang Lie and others' shocked looks, Su Yu smiled gently and jokingly waved his hand in front of Yang Lie.

"Uncle Yang, what are you still dazing for, wake up!"

Hearing Su Yu's tease.

Yang Lie and others finally calmed down a bit, though their eyes still contained deep shock and disbelief.

Yang Lie couldn't help but ask, "Su, Su little brother, how did you manage to do this? How did you suddenly become a spiritual transcendent?"

Upon hearing Yang Lie's question, Su Yu shrugged with an innocent look: "Well, I don't know either, I just killed many radiation beasts that night, and after recovering the next day, I found myself seemingly able to sense the presence of subspace."

Su Yu wasn't worried that this reason sounded far-fetched.

The awakening of spiritual transcendent inherently carries a strong randomness, at least on this technology-isolated Ruins Star.

Many spiritual transcendents achieved success through various coincidences and opportunities.

His situation is no different from the norm.

Sure enough, Yang Lie and others didn't have any doubts about Su Yu's explanation, only joy in their hearts.

"However, we still can't relax yet, there are still many things to do next, and first and most importantly, we need to move my repair shop to our Ninth Squad's base."

Su Yu stated.

Although in the Sanctuary, the Night Slayer Team dares not make any major moves.

No one can guarantee that they won't be driven to desperation.

Especially with his strength shown here, completing eighteen orders within a month.

Such an exaggerated achievement is bound to lead even the dullest person to think in the direction of a transcendent.

This is why Su Yu didn't ask Wang Jian and others to hide the fact that he is a spiritual transcendent.

Such a thing cannot be hidden.

Moreover, revealing this identity offers him a kind of protection.

Without the Meditation Technique, spiritual transcedents cannot train to a higher level.

In the Sanctuary, they hold a lower position than the average extraordinary of the physical body.

Just like the two unfortunate one-star spiritual transcedents in the Night Slayer Team, who were marginalized in Night Slayer.

But the reason for this situation lies in those two one-star spiritual transcedents not demonstrating their value.

If Su Yu could complete eighteen orders in one go.

Even if Shelter's high-level officials favored Night Slayer, they would still offer him some protection.

Appropriately demonstrating one's value is sometimes a necessary step.

Of course, exposing his identity means there will be new risks, like over time, someone will invariably guess that he might possess a complete Meditation Technique.

But Su Yu wasn't concerned.

The more orders he takes, the faster the rank of his [Battlefield Mechanic] will rise.

Just as Li He possessing a scroll of a Meditation Technique is not a secret within the Sanctuary.

As long as his strength is sufficient.

Even if someone can guess that he too has a Meditation Technique scroll, there won't be anyone daring to target him!

"Ultimately, it still all relies on one's own strength!"

**Chapter 45: Chapter 42 Turbulence**

"It's truly... unbelievable."

Su Yu arranged for Yang Lie and the others to help move his repair shop to the base of the Ninth Squad.

Meanwhile, Wang Jian, Luo Wang, and others left the repair shop with their minds still somewhat in a daze.

The extraordinary scene Su Yu displayed before them in the repair shop had quite the impact.

If they hadn't seen it with their own eyes.

They truly wouldn't have imagined that a Transcendent of the mental type could utilize spiritual energy to such an extent!

Initially, Wang Jian and the others cooperated with the Ninth Squad with a mindset of somewhat utilizing waste.

In their eyes, even if the Ninth Squad could escape a disaster this time, it was only a matter of time before they'd be completely overrun by the Night Slayer Team.

Cooperating with the Ninth Squad was essentially to prolong their resistance, buying time to come up with a way to counter the Night Slayer Team.

But now.

Wang Jian, Luo Wang, and the others felt that with Su Yu, the Ninth Squad truly had a glimmer of hope to withstand the Night Slayer Team's pressure and even counter them!

This way.

The hunting teams that placed their bets on the Ninth Squad early could really hit the jackpot!

Even if, in the end, the Ninth Squad fails, Su Yu's capabilities can at least help them hold on for two to three months or even longer.

And with this much time, it's enough for each team to recoup their investments placed on the Ninth Squad and Su Yu.

This is truly a win-win situation!

"Those two guys who left early would surely regret it if they knew Su was holding such trump cards!"

...

Su Yu didn't know about or care for Wang Lie and Luo Wang's sentiments.

He was currently moving house with the help of Yang Lie and the others.

With the members of the Ninth Squad assisting, it didn't take long for Su Yu to move all his belongings into the base of the Ninth Squad.

Su Yu's new repair shop was located in the Ninth Squad's former large storeroom.

This area was initially used to store various supplies and trade Radiation Beast Materials with other teams and Sanctuary residents.

But since the Ninth Squad no longer plans to go on hunts, the storeroom was freed up, making the perfect location for Su Yu's new repair shop.

As for the remaining scent of blood inside, it was completely overpowered by the smell of engine oil.

After completing the move, Su Yu did not waste time and directly started working on the orders at hand.

The needed parts could temporarily be sourced from the Ninth Squad's inventory.

Coming next, Wang Jian, Luo Wang, and their teams would gradually deliver the accumulated mechanical parts from the past few months.

These parts, along with those recycled monthly, averaged a value of about four thousand contribution points per hunting team.

In the end, five hunting teams have reached a collaboration with Su Yu, bringing Su Yu's current debt to them to about twenty thousand contribution points.

Even if Su Yu completed the eighteen orders in hand this month, he couldn't reach this target.

However, Su Yu wasn't worried.

When making agreements with Wang Jian and the others, he had already accounted for this, planning for installment payments.

Using four thousand contribution points from the Ninth Squad to pay each hunting team eight hundred as a deposit.

Then, every half month, pay each hunting team eight hundred contribution points.

Calculated this way, Su Yu only needed to earn eight thousand contribution points by the end of next month to cover this expense.

Also considering the four thousand two hundred contribution points the Ninth Squad needs to maintain their hunting team status with the management.

Adding it all, it's just over twelve thousand contribution points.

As long as Su Yu completes these eighteen orders, covering this expense is easy.

Thinking this.

Su Yu looked at his newly revamped workstation.

After moving, Su Yu also upgraded his workstation.

The space of the previous repair shop was too cramped.

But the current storeroom is spacious enough.

Su Yu even installed a robot transformation platform specifically for Nuonuo.

Although it's still quite simple now, it doesn't stop Su Yu from fantasizing about rolling out a set of Power Armor or Steel Giant Gods on this platform in the future.

Shaking his head, refocusing his mind.

Su Yu once again activated spiritual energy and started working.

The eighteen orders varied in difficulty.

Su Yu chose to tackle the easier ones first, planning to level up his Battlefield Mechanic rank before challenging the harder orders, which would be more efficient.

With the first installment due in half a month, finishing the easier orders first would provide some contribution points, easing any anxiety.

"Steel Meditation... activate!"

With that thought.

Su Yu wasted no time and activated the Steel Meditation.

With the spiritual energy forming steel gears in his mind beginning to turn.

Su Yu felt a grand and magnificent world opening its doors to him.

Ancient, mysterious, supernatural... indescribable energies intertwined and gathered behind that door.

Finally, guided by the gear he meditated, these energies descended into reality and entered Su Yu's body, invigorating his brain!

"Buzz—!"

A point of spiritual energy candlelight burst out from Su Yu's mind, leaping into the repair room.

Instantly.

Under this spiritual light, the void buzzed and trembled, forming a unique spiritual energy field around Su Yu.

At Steel Meditation level 1, Su Yu's spiritual energy could, within a five-meter radius, manipulate, assemble, repair, and maintain all mechanical parts, effectively tripling his work efficiency.

Moreover, if Su Yu was willing, he could increase this efficiency by about two more times through intense spiritual energy consumption.

However, Su Yu was not in a rush to do so.

According to Su Yu's estimation.

"Currently, the spiritual energy I gain from a night's meditation allows this field to last twelve hours. Running for one hour can gain about fifty professional experience points."

"While using spiritual energy burning doubles the experience points per hour, the field duration is reduced to three hours."

Calculated this way.

Under spiritual energy burning, Su Yu would end up losing three hundred professional experience points.

With ample time, Su Yu naturally preferred a steady and gradual growth in experience.

Thus, three days quickly passed by.

As the dawn of the third day shone into the repair room.

It was already filled with hundreds of different firearms and armor!
