

Infinite Job Transfers Starting from Mechanic

Chapter 46: Chapter 43: Surprise

[You have completed a major overhaul of an Intermediate Equipment. The difficulty of this task is assessed as: Moderate. You have gained fifty points of Professional Experience (Battlefield Mechanic), and you have gained one hundred points of Skill Experience (Battlefield Repair lv2).]

[Your Skill Experience has been met, and your Professional Skill-Battlefield Repair level has been upgraded to lv3.]

[Your Professional Experience has been met, and your Profession-Battlefield Mechanic level has been upgraded to lv3.]

[Your Core Ability-Steel Meditation level has also been upgraded to lv3...]

[Your...]

At the workbench, Su Yu raised his head and placed down the last firearm he had completed the overhaul on. Looking at the prompt message that appeared on the Profession Panel, he let out a heavy breath.

"To be honest, advancing in the first-tier profession is indeed much more difficult than the basic profession!"

Three days, after three days of almost continuous day and night work, he could barely rely on the trait of regaining energy after each upgrade to sustain himself.

But even with this level of intensity in his work.

After three days, the Professional Experience Su Yu acquired was just barely enough to raise his level as a Battlefield Mechanic to lv3.

Moreover, after this upgrade, the restored energy did not completely alleviate the fatigue in Su Yu's brain; in fact, he was still drowsy.

Clearly, his body had reached its limit.

But this was something to be expected.

Although the orders Su Yu took in these three days were relatively simple, even the simplest orders still required Su Yu to concentrate his Spirit to complete.

And during this process, using the Steel Meditation to recover Spiritual Energy was also quite draining for his Spiritual Body.

However, despite the exhaustion.

The rewards were considerable.

Apart from the upgrades in his Profession Level and Professional Skills.

Su Yu also managed to complete seven orders in a pinch!

"After delivering these seven orders, I can earn at least five thousand contribution points!"

Although not much.

It was enough for Su Yu to cover the advance payment for the first half of the month's deliveries.

Additionally,

Su Yu looked at his Profession Panel, noticing the Steel Meditation Law had already upgraded to Lv3, with a hint of a smile on his lips.

With the level increase, the Spiritual Energy condensed by the Steel Meditation became increasingly powerful.

Initially, the Spiritual Energy candlelight produced by the Steel Meditation could only form a field with a diameter of five meters.

But now, the affected range of this Spiritual Energy candlelight expanded to a diameter of eight meters.

And the efficiency greatly improved as well.

Now, even without burning Spiritual Energy, Su Yu's work efficiency was five times what it used to be!

As Su Yu had foreseen.

"As the level increases, my work efficiency will only get faster, the time needed to complete the remaining orders will become increasingly shorter!"

"Moreover..."

Su Yu thought,

Turning his gaze back to the Electric Sniper Rifle placed beside his bed, he tried closing his eyes, attempting to sense it using only his Spiritual Energy.

This was a new ability he had unlocked after his Steel Meditation Law reached lv3.

As the gears in his mind turned.

Su Yu vaguely sensed the existence of the Electric Sniper Rifle.

In the entire room, that excellent-grade Electric Sniper Rifle was like a blazing torch, while other guns and Mechanical Creations were like fireflies in comparison, a world of difference.

However, Su Yu was not only concerned about this.

In this room, ninety percent of the guns and Mechanical Creations.

As long as Su Yu wished.

In this state, provided Su Yu expended enough Spiritual Energy.

These weapons and Mechanical Creations.

Could transform from the firefly-like Spirit Light into solid entities at any time, allowing Su Yu to instantaneously reconstruct their internal structure in his mind, understanding and comprehending the design of every part.

"But..."

Su Yu regretfully turned his attention back to that Sniper Rifle.

No matter how hard he tried.

That Electric Sniper Rifle remained in the form of a torch.

The most Su Yu could do was consume Spiritual Energy to make this torch-like shape more real and clearer, barely recognizing it as a sniper rifle.

Going any further was out of the question.

However, Su Yu was not disheartened or disappointed by this.

After all, unlocking this new ability at least gave Su Yu a direction for his efforts.

"As long as my level keeps increasing, my strength keeps enhancing."

"Someday, I will thoroughly 'understand' this Electric Sniper Rifle!"

Su Yu slightly clenched his fist, taking a deep breath.

In his eyes, a fighting spirit emerged.

Coming back to his senses, he retracted his gaze, and prepared to take the equipment in hand to the management office, and submit the completed orders.

But at that moment, Su Yu suddenly noticed that within his field of vision, a new point of light had appeared.

A blazing torch-like, dazzling Spirit Light appeared in his repair shop, instantly making Su Yu freeze!

"What, what is going on?"

Su Yu felt bewildered in his heart, not caring to think further, he decisively withdrew his Spiritual Energy and opened his eyes, and when he saw the new torch's source.

Su Yu was dumbfounded.

"Master, Wang Jian and Captain Luo Wang have arrived outside with a batch of new parts, should I welcome them?"

"Master, outside there's..."

The source of the torch in front of Su Yu was Nuonuo, the repair robot left by his master, repeating the emotional mechanical electronic voice.

But Su Yu could no longer pay attention to the message it delivered.

His mind was filled with the blazing torch he had just 'seen'.

Although that torch was no match for the master's Electric Sniper Rifle in terms of brilliance.

It was equally dazzling, only slightly inferior!

"This... what is this situation?"

Su Yu's gaze couldn't help but fall back onto Nuonuo, scrutinizing it with wide eyes.

As someone with a Profession Panel, Su Yu also gained the system's Identification function as a bonus, except that Su Yu couldn't identify items with too high a level.

And no matter how he identified Nuonuo, it showed only a line of [Intelligent Auxiliary Robot-Nuonuo (Intermediate)] message, nowhere near the existence of a nearly excellent-grade weapon!

"Could it be my Meditation Technique has gone wrong? Can a Meditation Technique even go wrong?"

Su Yu felt somewhat dazed.

At this point, a flash of insight crossed his mind.

He immediately directed the Spiritual Energy in his mind to concentrate it onto his eyes.

Instantly.

An indescribable searing sensation spread from Su Yu's eyes, making Su Yu shudder involuntarily.

But he didn't linger on this peculiar feeling, stubbornly enduring the heat in his eyes, he opened his eyes wide to look at the Nuonuo in front.

After a moment of intense focus.

A new line of information came into Su Yu's view!

[Intelligent Auxiliary Robot-Nuonuo]

[Grade: Intermediate]

[Hidden Component-Intelligent Core]

[Grade: Superior]

"Sup..."

"Superior Core!?"

Chapter 47: Chapter 44 Hope

Special Grade Intelligent Core.

This discovery definitely exceeded Su Yu's expectations.

He never thought that this small robot in his hand would hide such a big gift.

Even the teacher who dug it out from the ruins back then probably never imagined that Nuonuo's core grade would be this high!

And now, thinking back.

Nuonuo's performance in various aspects of daily life indeed surpassed that of ordinary intelligent machines.

Although its voice was a rather stiff and monotonous electronic sound,

it could smoothly understand all of Su Yu's instructions and even hold complete conversations with him.

Originally, Su Yu thought that this was because the intelligent machines of this era all stemmed from the technology of the Glory Empire, hence the generally high quality.

Now it seems, he overestimated the level of the Empire's leftover technology.

It's not that the Empire's technology was advanced.

It's that Nuonuo's intelligent core was strong!

Also.

Su Yu steadied his mind and his gaze returned to Nuonuo.

Feeling its owner's gaze, Nuonuo humanely stepped back a bit.

The Special Grade Intelligent Core endowed this little helper with highly human-like intelligent thinking, instinctively sensing that something was off with its master's look.

"Master?"

"Don't be afraid, Nuonuo."

Su Yu showed a smile he thought was kind: "I'm going to help you with a little transformation!"

An excellent electric sniper rifle.

Even without being able to completely take apart, understand the technical blueprints, or design concepts, it provided him with numerous new ideas, allowing him to design the Night Vision Device and the [Falcon] Sniper Rifle.

But Nuonuo, in terms of its overall level, was only at an intermediate level.

So, Su Yu could directly dismantle and restructure it, extracting the Special Grade Intelligent Core for in-depth research.

Imagining the kind of technical blueprints he would gain, Su Yu couldn't help but feel his heart surge with excitement!

Moreover, when Su Yu talked about binding Nuonuo for an upgrade, he wasn't deceiving this naive assistant robot.

As Su Yu took the position of a Battlefield Mechanic, Nuonuo's technical level indeed couldn't keep up with Su Yu's capabilities anymore.

Previously, Su Yu's technical level was insufficient.

But now, as Su Yu's ability grows.

With a level 3 Battlefield Mechanic, along with upgraded level 3 Battlefield Repair and level 2 Basic Mechanical Fabrication, improving and upgrading Nuonuo's parts was now a feasible task for Su Yu!

...

While Su Yu was dismantling and modifying Nuonuo.

Outside the Ninth Squad station, within the past three days, news of Su Yu taking on eighteen orders in one go spread throughout the entire shelter, causing quite a stir.

Predictably, it also triggered a whirlpool of public opinion throughout the shelter.

The Ninth Squad had become quite the people of the moment in Shelter No. 73 during this period.

After all, the Night Slayer Team's domineering way of doing things was renowned throughout Shelter No. 73.

To stand up to the Night Slayer Team and still be thriving afterward was something that could be counted on one hand in recent years.

The Ninth Squad was not initially seen as qualified to join these ranks.

But now.

The Ninth Squad not only held firm but also managed to rescue the two members framed and detained by the Night Slayer.

This achievement alone made the Ninth Squad a major headline.

And consequently, Su Yu, who brought the Ninth Squad to this point, was well-known among the residents of the shelter.

However, before they could reflect on Su Yu's extraordinary abilities and talents,

Li Yao and Lei Wu released news that Su Yu quit the Ninth Squad and even took on eighteen shelter orders in one go.

Overnight, Su Yu's image shifted from a suddenly rising genius expert to someone seemingly driven mad.

Yet some believed Su Yu must have had some assurance.

After all, if Su Yu was truly deranged,

how could the Ninth Squad have held out for so long before?

Even though Wang Jian and others tried their utmost to hide the news,

their contract with Su Yu was overly strict.

Although they were captains of a hunting team, besides the Night Slayer Team,

not even teams like the Mountain Mist or Wolf Pack could truly reign solo; the opinions of their members and deputy captains still carried considerable influence.

In persuading their members to cooperate with Su Yu,

the news of Su Yu being a Spiritual Extraordinary inevitably leaked out.

However, many residents of the shelter were skeptical of this information.

Moreover,

even if Su Yu were truly a Spiritual Extraordinary, so what?

The shelter had seen Spiritual Extraordinary individuals before.

Except for Li Yao, the others ultimately faded into obscurity; they couldn't even find a footing in the Night Slayer Team.

Even with the assistance of spiritual powers, it's unlikely Su Yu could complete eighteen orders!

...

Management Office, the administrator's residence.

"Spiritual Extraordinary?"

Listening to Bai Hong's report,

the administrator's elderly face suddenly lit up, surprising even Bai Hong.

As the direct rescue team leader for the administrator, Bai Hong had more contact with the administrator than most.

In recent years, possibly due to age, the administrator seemed to care less about the shelter's matters.

Many regulations of the shelter became ineffective as a result.

Notably, when Lang Yun and Hu Wen, captains of top teams, suggested joining forces with the administrator to suppress the Night Slayer Team, they were rejected.

This filled Bai Hong's heart with worry.

However, he was different from others.

Earning the position before many current residents joined Shelter No. 73, Bai Hong had always been close to the administrator, serving as the Rescue Team Leader.

He had witnessed the administrator's prowess firsthand.

His trust and reverence for the administrator exceeded that of others.

Even under such circumstances, he still believed the administrator had the capacity to control the situation.

This was also why he dared oppose the Night Slayer Team in the wilderness.

And now, seeing the sparkle in the administrator's eyes,

an unusual gleam appeared in Bai Hong's eyes.

The last time the administrator was this excited was years ago!

"Bai Hong, please help me investigate this young man named Su Yu. Remember... quickly, understand?"

No time to ponder his subordinate's thoughts,

the administrator spoke softly, his tone as gentle as possible, yet the urgency was still apparent, causing Bai Hong to straighten promptly and nod: "Yes! Rest assured, I will find out as soon as possible!"

Saying this, Bai Hong decisively left the residence.

Watching his confidant leave,

the administrator's eyes were filled with expectation.

Ordinary Spiritual Extraordinary individuals, once awakened, remain just that.

Without a fitting Meditation Technique, their enhancement to the shelter or personal power might not match that of a two-star Extraordinary of Physical Body.

However, if Su Yu's Transcendence correlates with his acceptance of eighteen orders in one go,

the situation could be different!

"Perhaps this child... is no ordinary Spiritual Extraordinary, but in the process of awakening, has also awakened a Meditation Technique unique to himself!"

"Or even becoming an Extraordinary Mechanic..."

If that were the case,

Shelter No. 73's current predicament might indeed be reversible!

Chapter 48: After modification: Chapter 45 Light Cavalry

The situation with Li He, the administrators have seen it over the years.

His meditation technique is too bizarre.

Although Li He is trying hard to hide this, in the eyes of the administrators, Li He has too many flaws.

If he truly becomes the new leader of the sanctuary.

All the residents of Shelter No. 73 fear they would become Li He's puppets, becoming nurseries providing him with spiritual energy.

Such an outcome is definitely not what the administrators wish to see.

But...

The administrator slightly lowered his head.

His pupils quietly dilated, revealing the mechanical core within.

The crimson electronic eyeball emitted waves beyond the perception of the human eye, completing a scan and returning results in an instant.

[Current power core wear rate overview]

[Left arm power core wear rate: 85%]

[Right arm power core wear rate: 79%]

[Left leg power core wear rate: 69%]

[Chest power core wear rate: 82%]

[Waist power core...]

[Overall wear rate: 70%]

[Overall capability level: Three-star intermediate extraordinary of the physical body]

"Hoo..."

Looking at the data his intelligent chip finally provided.

The corners of the administrator's mouth couldn't help but curl into a bitter smile.

This was the fundamental reason why he previously refused the proposal from Lang Yun and Hu Wen!

He is not pedantic.

But rather powerless!

Moreover, this cannot be directly revealed to Lang Yun and Hu Wen.

After all, if it were revealed.

The administrator is sure that the two, whose personalities were not even firm to begin with, might leave Shelter No. 73 directly for their own safety, just to protect themselves.

And at that moment, Li He would truly have no restrictions in Shelter No. 73.

So, he chose to disguise himself as a pedantic old man.

Fortunately, his disguise was quite successful.

Although Lang Yun and Hu Wen were not satisfied, they didn't lose hope and still thought that as long as he agreed, the three of them together would have the capital to suppress Li He.

But actually, their perceived strongest combat power, his current real strength, might not even be able to defeat people at the deputy leader level of top squads like the wolf pack and the mountain mist!

"Really... so ashamed!"

The administrator chuckled bitterly, looking outside the door, with a glimmer of expectation in his eyes.

After arranging for Bai Hong to gather information on Su Yu, the administrator also learned some other information about Su Yu.

For example, this resident of the sanctuary has suddenly shown rapidly increasing technical skills over the past period.

And the news that he took on eighteen sanctuary orders in one go.

From these two points.

The administrator had a vague suspicion in his heart.

"This young guy's spiritual abilities, perhaps, are related to mechanics!"

This is the root cause of the administrator's excitement.

Just being a spiritual transcendent is not enough to make him happy, even if he awakened the meditation technique.

The situation of Shelter No. 73 and the speed of Li He's power growth already make it difficult to give Su Yu enough time to grow to the point of competing with Li He.

But.

If Su Yu might awaken spiritual abilities related to mechanics, the situation would be different.

Even if Su Yu doesn't have time to grow up, as long as he can help repair and maintain each mechanical part of his own.

There's no need for a complete overhaul; just reducing the overall wear rate below 50%, allowing himself to exert strength above four-star combat capability, plus Lang Yun and Hu Wen, who are both four-star extraordinary physical body leaders of top squads.

The administrator is confident of completely suppressing Li He!

"I hope... you won't let me down!"

The administrator murmured softly.

The voice was imbued with undisguisable eagerness!

...

The residence of the Ninth Squad.

At this moment, Su Yu is still unaware that he has been regarded by the administrator as the last lifeline.

His attention is presently focused on Nuonuo, who is lying on the robotic work table.

It's now the third evening since Su Yu reached a collaboration with Wang Jian and others.

After a morning of sleep, Su Yu's energy has returned to a perfect state, taking this opportunity to finally complete the transformation of Nuonuo after spending an entire afternoon.

It's just that, after the transformation, Nuonuo's size is now three times larger than before, where it was only up to an adult's calf in height.

Close to one and a half meters in height.

An additional eight mechanical arms have been added to the back.

In normal circumstances, an intelligent assistant with so many mechanical arms would certainly malfunction.

Not only would it not improve work efficiency, but there is also a possibility that due to the excess mechanical arms, the computational power couldn't be allocated properly, causing problems.

But with Nuonuo's special grade intelligent core, this clearly is not an issue.

Each mechanical arm is extremely flexible, capable of handling more than seventy percent of mechanical assembly, repair, and maintenance work.

Su Yu even feels that if it weren't for his own technical level being insufficient.

Nuonuo's special grade intelligent core might even be enough to support adding another eight mechanical arms to this little assistant of his.

Imagining the scene of wielding different tools, sixteen arms operating simultaneously.

The smile on Su Yu's face couldn't help but appear somewhat twisted.

"Master, I don't think this form can be called beautiful..."

Just then.

Nuonuo, already powered up and fully operational, saw the new exterior through the dressing mirror on the wall.

The display screen suddenly showed a lying down emoji, and the tone somehow revealed a sense of melancholy.

"You don't understand. For intelligent machines, the more weapons and equipment, the taller and bigger the size should be! The more gear, the more beautiful, the larger the size, the more spectacular it is!"

Su Yu advised earnestly, showing a fatherly expression, patting Nuonuo's head, completing the final upgrade procedure by installing an additional battery pack.

With this.

Nuonuo gained another new ability, similar to Su Yu, in necessary times, it can activate backup energy, doubling its work efficiency!

And with the completion of this battery pack installation, Nuonuo's upgrade was completed.

New prompt messages also surfaced on Su Yu's profession panel!

[Ding, you've successfully completed the transformation of an intermediate intelligent robot, this job's difficulty rating: Extremely Difficult]

[This job's result evaluation: Excellent]

[You have gained 3000 career experience points]

[You've gained professional skill experience (Basic Mechanical Manufacturing): 5000 points]

[Your skill experience is sufficient, and your skill level has increased.]

[Current Professional Skill: Basic Mechanical Manufacturing Lv3]

[Your...]

As the messages appeared.

Su Yu couldn't help but stretch lazily.

Although the career level didn't increase this time, having rested in the morning, Su Yu was still quite energetic at the moment.

"Just right, with the mechanical manufacturing skill also upgraded to Lv3, I should complete some more equipment order production tonight to gain some more experience."

Su Yu was just thinking this.

Suddenly, he noticed that in his profession panel, a new system prompt message had appeared.

[Through this job, you've gained additional inspiration]

[Based on the experience with Special Grade Intelligent Core and Advanced Intelligent Assistant Robot modifications, you have gained a new design blueprint]

[You've obtained the design blueprint for Intelligent Machine Cavalry I]

Chapter 49: Chapter 46 Confidence

"Intelligent machinery? Ranger?"

Looking at the prompt message that emerged on the profession panel.

Su Yu's spirit was lifted, and he quickly opened his design blueprint panel to carefully browse through the detailed introduction of the ranger, his eyes becoming increasingly bright!

[Ranger], according to the description given by the system, is a general auxiliary combat machine assembled by battlefield mechanics in the Empire's legion. Its form is similar to a smaller Nuonuo, roughly the size of a radiation hyena, but much more capable in combat than a radiation hyena.

The grade of a ranger, at the lowest, is primary, but at the highest, can reach a special grade level.

The specific level depends on the mechanic's technology and the quality of parts used during assembly.

And based on the system's description.

Even the lowest grade primary ranger's combat power is enough to rival a one-star primary transcendent.

Whereas radiation hyenas often only produce one star-level radiation beast out of a dozen.

Moreover, the ranger also has a trait called [Cluster].

"Each ranger's intelligent chip's computing power is not fully utilized. No matter how high the quality is, there will always be a couple of percentages of computing power left redundant and difficult to harness."

"However, if the number of activated rangers reaches ten or more and is commanded by a battlefield mechanic, it can use a certain amount of spiritual energy to cause the intelligent chips of the rangers to resonate, forming what is known as a [Combat Swarm]."

Under the influence of the combat swarm.

The computing power of each ranger can be shared, and the redundant computing power can be fully activated.

Summing it all up, once the combat swarm is activated, each ranger's computing power can increase by twenty percent.

Reflected in attributes, each ranger with [Cluster] support can increase its attack speed, evasion, movement speed, and other attributes by an additional twenty percent on the original basis.

Thus.

"Even if I'm unlucky, assembling ten rangers, each only at the primary level, the combat power of ten rangers forming a combat swarm would be enough to threaten a one-star peak... no, even transcendent beings at the two-star level would suffer a big loss in my hands!"

Moreover, Su Yu's technical level is quite extraordinary.

Plus, the boost from the design blueprints and the success rate amplification unlocked after raising [Basic Mechanical Creation] to the max level.

Su Yu is confident.

"Even if I can't produce a special-grade ranger, aiming to make ten rangers with two or three at an intermediate level or one at an advanced level shouldn't be too extravagant of a goal, right?"

Su Yu stroked his chin, murmuring to himself softly.

However, he didn't immediately start assembling the rangers.

Because ranger assembly, aside from the necessary mechanical components, also requires an [Intelligent Chipset].

These can only be exchanged from the Sanctuary's management office; it might take a year or two to find even one piece in the wilderness.

Moreover, such high-tech items come at a high cost.

A single basic intelligent chipset costs around two hundred contribution points, and if higher quality is required, the cost in contribution points will rise as well.

With such precious materials, Su Yu naturally needs to prepare thoroughly before using them.

"With about ten days until the deposit is paid, there's no rush to complete the order payment."

Su Yu raised his hand, summoning Nuonuo to help.

The current priority is to continue upgrading his professional level to improve his technical proficiency.

Secondly, to earn more contributions.

The contributions needed for the first deposit have been earned.

But now that the ranger's blueprint is unlocked, acquiring an intelligent chipset poses another expense, plus...

"Uncle Yang's injury, although it can be delayed for another month, it's best to eliminate ant poison as early as possible!"

Previously, Yang Lie was reluctant to remove the ant poison because the Ninth Team couldn't provide the contribution points to purchase the antitoxin serum.

Another crucial reason was that the ant poison acted as a double-edged sword for Yang Lie.

Without the stimulation of the ant poison, Yang Lie could not have broken through the shackles to become a two-star physical-type transcendent in such a short time.

But now, Su Yu has switched professions to become a battlefield mechanic, leading the Ninth Team so there's no need to hunt and take risks in the wilderness.

Therefore, Yang Lie doesn't have to endure the torture of the ant poison any longer.

However, Su Yu didn't explain this.

After all, he didn't dare to promise that he could earn enough to exchange for an antitoxin in just two weeks. Saying it prematurely could lead to disappointment if it didn't work out.

But soon Su Yu realized he had underestimated, somewhat, his current technology.

Or rather.

Underestimated Nuonuo's work efficiency after having eight mechanical arms, now resembling an octopus.

The advantage of the special grade intelligent core is finally being fully utilized by Nuonuo.

The eight mechanical arms danced wildly, allowing Nuonuo to overtake the situation.

A significant reason for upgrading Nuonuo was because Su Yu felt that as his tech level improved, Nuonuo as an assistant wasn't keeping pace.

But now.

Su Yu was bewildered to discover that in the repair room, with Nuonuo having eight mechanical arms, while he only had two human ones.

It seemed that he, the master, was becoming the one holding them back!

The only consolation was that Nuonuo, for now, couldn't handle the high-quality equipment orders.

If otherwise, Su Yu truly felt his repair shop might as well be renamed Nuonuo's Repair Shop.

"Cling clang—"

As Su Yu and Nuonuo busily worked at high efficiency completing the orders at hand.

On the other side, the administrator received detailed intelligence brought by Bai Hong!

"Let me see, Su Yu, joined Shelter No. 73 three years ago, then continuously learned repair technology from Bai Dashan. After Bai Dashan passed away last year due to radiation sickness, Su Yu's progress stagnated, maintaining a new mechanic level until he became infected with radiation sickness..."

The administrator looked at Bai Hong's report, his gaze fixed on the end of Su Yu's resume.

"After becoming infected with radiation sickness, Su Yu's tech level advanced rapidly, impressing the Ninth Team's captain, Yang Lie, becoming the Ninth Team's permanent mechanic, and completing multiple important Sanctuary orders... Subsequently, a conflict arose with the Night Slayer Team..."

The administrator raised his head, noticing Bai Hong's somewhat tense expression and couldn't help but ask quietly, "Sir, is there a problem with these reports?"

"Problem? No, no problem at all, Captain Bai, you've done well, thank you for your hard work."

The administrator collected his thoughts, and gave Bai Hong a gentle smile, "You can go rest now, I'd like to calm down a bit on my own."

"Oh... okay, sir, as you command."

Bai Hong was stunned for a moment, then quickly nodded and exited.

It wasn't until Bai Hong left that the administrator finally exhaled deeply, looking at Su Yu's resume details, especially at the part "rapid advancement after radiation sickness".

The administrator's eyes shone with an uncontrollable brilliance!

"It can't be wrong!"

"This little guy, possibly after becoming infected with radiation sickness, turned misfortune into a blessing, awakened a spiritual energy talent, became a mental-type transcendent, and his spiritual energy trait is absolutely related to mechanics!"

Chapter 50: Chapter 47 Waiting

Excitement, surprise.

A glimmer of hope in a desperate situation.

This is, at this moment, the truest reflection of the manager's inner feelings.

But, although immensely excited, the manager quickly calmed down.

Because he realized a serious issue, and that is time.

Although Su Yu's technical skills have seemingly advanced by leaps and bounds over these past days,

whether Transcendents of the spiritual or physical type,

their enhancement in spiritual energy level requires considerable time to be effective.

And in the manager's perspective,

from Su Yu's awakening of spiritual energy to now, it has been less than a month in total.

In less than a month, if he could stabilize his Spiritual Ability level at one-star, it would already be quite remarkable.

But, with a one-star level in Spiritual Ability paired with Su Yu's technical skills, can it really help solve the current predicament?

There is quite a question mark in the manager's mind.

Currently, the Night Slayer Team's influence in the Sanctuary is growing stronger by the day.

Although the Ninth Squad suddenly emerged as a suppressive force against the Night Slayer's arrogance, it is still not enough to completely balance out the Night Slayer's expansion momentum.

If he rashly seeks out Su Yu, and Su Yu isn't yet powerful enough to help, this would be problematic.

Once his current weak state is exposed, especially to Li He,

with the Night Slayer Team's already aggressive style, it would probably become unchecked, and Li He would act even more recklessly.

They would really have no opportunity to turn the tables anymore.

"Let's wait a little longer..."

After hesitating for a while,

the manager finally chose a more prudent approach.

Wait a while longer, no...

"Let's wait another half a month."

As long as Su Yu can successfully complete the orders he accepted this month,

it would mean Su Yu's technical skills have reached a considerable level.

Even if it can't fully restore his strength, it should be enough to restore seventy to eighty percent of it.

Not to mention completely suppressing Li He, making him cautious, and restraining himself, to buy more time for the Sanctuary, which would still be more than sufficient!

Thinking this way,

the manager temporarily suppressed his inner excitement.

The internal struggle within the manager's heart remains unknown to others.

But in the following time, the news of Su Yu taking on eighteen orders at once only intensified its impact.

Many Sanctuary residents were waiting to see how Su Yu would finalize these eighteen orders.

There's even quite a number of Mechanics with a schadenfreude attitude.

The so-called competitors are adversaries.

The higher Su Yu's technical level, the harder it is for other Mechanics to make a living in the Sanctuary.

With the help and encouragement of Li Yao, Lei Wu, and others,

Su Yu's image among the Sanctuary residents has somewhat become a source of amusement.

Even to the extent that,

members of the Eleventh Squad, and other members of hunting teams that had collaborated with Su Yu under their captains' leadership, began to doubt Su Yu.

Only captains like Wang Jian and Luo Wang still had full confidence in Su Yu.

After all, having seen Su Yu in action, channeling spiritual energy to repair and assemble machinery with their own eyes,

each would be left deeply impressed and not soon forget!

However, whether trust or doubt,

Su Yu at the repair shop didn't care either way.

After unlocking the "Ranger" Design Blueprint, for more than ten days, apart from necessary outings, Su Yu rarely left the team base.

And the variety and number of firearms and equipment stacked in his repair shop continued to increase daily.

Until the evening of the fourteenth day, Su Yu finally halted his work, raised his hand to wipe the sweat off his forehead, and looked at the shotgun in his hand, now upgraded to an advanced grade, his eyes shining with brilliance!

[Ding! You have successfully completed the modification of an intermediate weapon; the current weapon grade is: advanced, this job difficulty rated: hard, the outcome is rated: excellent]

[You have gained Professional Experience: 1000 points]

[You have gained Skill Experience (Basic Mechanical Creation): 1500 points]

[Your Professional Experience has accumulated sufficiently, your Professional Level (Battlefield Mechanic) has advanced, current level: lv9]

[Your Skill Experience has accumulated sufficiently, your Professional Skill (Basic Mechanical Creation) has upgraded, current skill level: lv7]

As these lines of notification messages emerged,

Su Yu only felt within himself, a peculiar energy quietly forming, instantly mixed into every part of his body, quickly restoring his energy.

His physical fitness and mind also gained further improvement.

The speed of brain operation, reflexes, etc., all increased incrementally with this upgrade.

In addition, Su Yu also felt the symbolic iron gear of his Spiritual Star Level in his mind expand once more, from originally the thickness of an index finger to the size of a thumb.

The spiritual energy he could channel also evolved from a faint candlelight to something that blazed as brightly as a small campfire.

With a light breath, Su Yu closed his eyes, meticulously contemplating his own bodily transformation. After a moment, he opened them again, eagerly looking at his Profession Panel, and in his mind's eye, a line of detailed attributes appeared before him.

[Name: Su Yu]

[Profession: Mechanic max, Gunsmith max, Battlefield Mechanic lv9 (1%)]

[Profession Tier: Tier 1]

[Skills:]

[Battlefield Repair lv7 (33%) (Professional Specialization: Skilled Mechanic)]

[Basic Mechanical Creation lv7 (2%) (Professional Specialization: Basic Creation)]

[Wilderness Survival max (Professional Specialization: Wilderness Perception)]

[Basic Gun Mastery max (Professional Specialization: Elite Shooter)]

[Basic Sniper Skills max (Professional Specialization: Sighting Mirror)]

[Steel Meditation lv9 (1%)]

[Transcendent Level]

[Spiritual Power Star Level: Two-star Advanced]

[Physical Body Star Level: Two-star Intermediate]

Indeed, a Tier 1 profession is different.

Even when the Battlefield Mechanic is described within the system as a kind of supporting role profession,

the increase in physical attributes brought by each level enhancement in the Battlefield Mechanic is notably substantial for Su Yu.

Even the amplification brought by each level increase in combat-related professions like the Gunsmith is a grade lower compared to the Battlefield Mechanic.

Moreover, aside from the growth in physical attributes, each level enhancement in the Battlefield Mechanic also brings a significant rise in Su Yu's spiritual power level!
