## **Chapter 81: Chapter 76 External Prosthetics·Thousand Hands (Requesting First Subscription)\_2**

"Oh? Then I won't hold back!"

Su Yu had been waiting for the manager's words, and immediately listed all the various materials and parts he needed, not forgetting to ask if the manager still had any reserves of combat-specific intelligent chipsets.

The manager was as good as his word and directly opened his private vault, handing over all twenty-five combat-specific intelligent chipsets to Su Yu for him to use as he pleased!

Before leaving, Su Yu made sure to take back an arm that had been disassembled from the manager to the repair room.

If Su Yu hadn't unlocked the Design Blueprint for the External Prosthetic Body·Thousand Hands, he might not have had the time to start repairing the manager's prosthetics right now.

After all, the prosthetics equipped by the manager, although not comparable in grade to the rare creation, Electron Furnace.

They were still genuinely top-tier mechanical creations.

Even a simple repair would take quite a bit of time.

Although the professional and skill experience gained in return was considerable, in the same amount of time, Su Yu could make his own cavalry or help the ninth squad maintain equipment to gain similar experience.

But now.

With the Design Blueprint for the External Prosthetic Body·Thousand Hands in hand.

Before starting the creation of the Thousand Hands.

Su Yu wanted to accumulate more experience in prosthetic design.

Looking around Shelter No. 73, the only source of this experience was the prosthetic equipment on the manager, the old man's body.

Moreover, he could also slightly increase the old man's favorability, strengthening the alliance relationship.

It was a win-win situation, and Su Yu was naturally happy to go with the flow.

"Then we'll rely on you a lot, Mr. Su."

The manager sincerely thanked Su Yu.

Su Yu slightly bowed in return: "Not a bother, it's something I should do, but..."

Su Yu spoke, looking at the prosthetic machinery in his hand, filled with curiosity as he turned to the manager and voiced a long-held question on his mind.

"I have a question for you, old man. Of course, if it's inconvenient to answer, it's perfectly fine, just..."

"Where did all your prosthetic equipment come from, old man?"

Su Yu had been curious about this question for some time.

Possessing a Profession Panel-rated [Rare] grade Electron Furnace, as well as various prosthetic devices of at least top-tier grade.

It's no exaggeration to say that just the old man's set of prosthetic equipment, even if not brand new.

With just seventy to eighty percent of it being second-hand, its price would be enough to buy the entire Shelter No. 73.

Such items, let alone in these small settlements struggling to survive near the Steel Jungle.

Even a medium settlement like the Ghost Tribe is unlikely to have such high-grade items appear.

Seeing Su Yu's puzzled expression, the manager smiled, not keeping it a secret, and pointed to the Electron Furnace that had been placed back in his chest, saying: "No need to worry, it's not a secretive issue, and even if I tell you where it came from, no one would know."

"This set of prosthetics is equipment produced by the official workshop of the Dawn City in the old days."

"Don't be misled by its power; in the past Dawn City, this was just standard equipment for a captain of the Dawn Guard!"

Hearing the manager's words, Su Yu's eyes widened.

Standard equipment that included a rare-grade power furnace?

What kind of place was this Dawn City?

And judging by the manager's tone, it seemed that Dawn City had fallen?

"A large settlement?"

"To be precise, it was a super-large settlement, it's just that..."

The manager spoke, his eyes reflecting a hint of nostalgia and memory, but this quickly shifted to fear, which he suppressed, waving it off: "Let's not talk about the past, we should handle the current troubles first, so I'll need your help, Mr. Su, to do some preliminary repairs on these old companions of mine who've followed me for so many years."

Su Yu nodded: "Don't worry, old man."

Although he was still curious about how the manager went from a super settlement to the remote and desolate Shelter No. 73.

But this story appeared to be not one that could be easily shared by the old man, so he wisely did not press further.

After waiting briefly, he followed Bai Hong, who had been specifically instructed by the manager, and under Bai Hong's guidance quickly arrived at the rescue team's warehouse, where he extracted five large boxes of parts he might use next, and with Bai Hong's help, returned to the base as quickly as possible.

Yang Lie and others had been waiting at the base for quite some time.

Seeing Su Yu return, they hurried to greet him with some relief in their eyes.

Although Su Yu had mentioned before leaving that he was going to see the manager to discuss acquiring additional parts support.

The ninth squad had just experienced an attack from the Night Slayer Team.

Although they had returned to the sanctuary, they were still inevitably a bit tense.

Seeing Su Yu not return for a while, they couldn't help but let their minds wander.

Now seeing Su Yu return, bringing back five large boxes of parts.

They were both surprised and delighted.

After thanking Bai Hong for the escort, everyone brought Su Yu back to the repair room, looking at the parts Su Yu brought back, eyes filled with awe and curiosity.

"Brother Su, how did you manage to get the manager to give you so many parts?"

### **Chapter 82: Chapter 76 External Prosthetics·Thousand Hands (Requesting First Subscription)\_3**

Li Mao and Zhang Wu were both shocked.

As the team leader, Yang Lie thought more about it and couldn't help but look at Su Yu with some concern: "Brother Su, you haven't taken on another high-difficulty task from the manager, have you?"

Feeling everyone's concern, Su Yu also felt a warmth in his heart. Hearing Yang Lie's worried question, Su Yu couldn't help but laugh silently and waved his hand, saying, "Uncle Yang, you're overthinking it. I'm just cooperating with the old man manager, that's all."

Su Yu thought for a moment and explained briefly: "Simply put, the old man has a high-difficulty order that no one has been able to complete. I told him I could help him solve it, and he trusts me. Some of these parts are used to complete that order, and the rest are my reward."

Hearing Su Yu say this, Yang Lie and the others all breathed a sigh of relief.

Su Yu's technical level speaks for itself.

Being able to complete eighteen Sanctuary orders in just half a month, such skills and efficiency are normal even if the manager has to ask Su Yu for help.

"So next, Brother Su will first complete the manager's order? We'll continue training and contacting other hunting teams as usual?"

"Hmm, let's just do it this way for now... but."

Su Yu pondered slightly, then looked up at Yang Lie with a burning gaze.

"Before that, I have one more thing to trouble you with, Uncle Yang."

"Uncle Yang, you're one of the Sanctuary hunting team captains. Do you know the situation of the Wolf Pack and the Mountain Mist, especially the personalities of their two captains?"

"I want to discuss cooperation with them!"

As Su Yu mentioned before.

Although the manager provided him with quite a batch of mechanical parts, after deducting the parts used to help the manager repair his various prosthetic body parts, the remaining parts would only be enough for Su Yu to make ten more Cavalries at most.

But now in Su Yu's hands, there are as many as thirty combat-use intelligent chips, plus an additional advanced universal chip set.

It's rare to have so many intelligent chips.

Su Yu naturally wants to put them to use as soon as possible to convert them into battle strength.

Thinking it over and over.

It seems that only by seeking cooperation with the Wolf Pack and Mountain Mist teams can he quickly acquire a large batch of parts.

"Cooperating with the Wolf Pack and Mountain Mist teams..."

Yang Lie's expression seemed a bit pessimistic.

"I can speak to the captains of these two teams, but it's just a few words. Brother Su, I should tell you upfront, the captains of these two teams are among the top three in strength at the Sanctuary. They entered the four-star level years ago and have always been quite proud."

"Even with Brother Su's current technical ability, it might be quite challenging to impress them!"

Yang Lie tactfully reminded.

Su Yu nodded and seemed quite relaxed.

"Don't worry, Uncle Yang. I know what I'm doing. Besides, since I want to seek their cooperation, I'm naturally prepared to persuade them!"

Su Yu spoke.

His eyes were filled with a confident glow!

Feeling that strong confidence in Su Yu's tone, Yang Lie couldn't help but be curious, but it wasn't the time to ask more questions.

"Since you're prepared, I'll get in touch with them now."

Yang Lie said, then hurriedly left the base. About an hour later, he returned with an excited expression.

"Brother Su, the time has been set."

"They will be waiting for you at the Wolf Pack Team's base to discuss the cooperation situation!"

### **Chapter 83: Chapter 77: Cutting to the Chase, Achieving Cooperation (Seeking First Subscription)**

Wolf Pack Team headquarters, inside the meeting room.

Lang Yun and Hu Wen stood with crossed arms, looking at Su Yu in front of them, their eyes carrying a scrutinizing gaze.

"Mr. Su, pleasure to meet you. We already heard from Captain Yang about your ideas. You mentioned wanting to cooperate with us. Could you clarify what specific areas this cooperation would cover?"

Lang Yun was the first to speak, getting straight to the point.

Seeing Lang Yun being so direct.

Yang Lie, who came along with Su Yu, couldn't help but look a bit flustered.

But Su Yu remained calm, unfazed by Lang Yun's direct approach, and openly stated his way of cooperation: "It's simple. I need the inventory of mechanical parts that the Wolf Pack and Shan Lan Teams have collected from hunting over the past few months."

"In addition, I also need the mechanical parts your teams collect in the coming months. After deducting what your teams need for your permanent mechanics, the rest should be handed over to me."

"In return, I will provide the Wolf Pack and Shan Lan Teams with appropriate equipment support, including gear refinements and upgrades. I can even create brand new

advanced equipment from scratch, although the materials will need to be provided by you."

Su Yu spoke in a deep voice.

His words left Lang Yun and Hu Wen momentarily stunned.

Yang Lie, on the side, was a bit dumbfounded.

Even though he knew Su Yu planned to cooperate with the teams before coming here.

But now, Lang Yun and Hu Wen's direct questioning of Su Yu's cooperation, without any courtesy or evasion, showed they weren't prepared to seriously negotiate cooperation terms with Su Yu.

In this situation.

Su Yu didn't lower his cooperation conditions or, at the very least, use more tactful language.

Going straight to the point like this, wasn't he afraid to anger Lang Yun and Hu Wen?

As expected.

Upon hearing Su Yu's response.

Lang Yun, after coming to his senses, showed a hint of displeasure on his face, and although Hu Wen didn't get angry, he couldn't help but let out a chuckle.

"Mr. Su, we respect your skills, so we took the trouble to come and chat with you, to see if we could become friends, but your approach is a bit too arrogant!"

"Equipment improvements, upgrades, and creating brand new advanced equipment—our team's permanent mechanic can also do these things. Using such terms to sway us is far from enough!"

Lang Yun was no longer interested in wasting words with Su Yu.

But Hu Wen, after chuckling, couldn't help but say a few more words.

After all, Su Yu's technical level, regardless of how high it is.

The terrifying efficiency of completing eighteen orders for the Sanctuary in half a month speaks for itself.

Working with such a mechanic, even if no deal is struck, shouldn't lead to tearing the relationship apart.

Seeing Hu Wen stepping in to mediate, Yang Lie also breathed a sigh of relief and was about to say a few words along with Hu Wen to ease the atmosphere.

But Su Yu just smiled.

"Captain Hu is right. Such conditions are, of course, insufficient to sway you both. What I mentioned earlier is just for you to tell your team members so they can accept this reality."

"Because if we do cooperate, in the upcoming time, I might not have the time to help you improve or build equipment. All my time will be spent on my own equipment upgrades."

"Hmm?"

Upon hearing what Su Yu said.

Even Lang Yun, who had been angry, had much of the displeasure fade from his face.

In his eyes, there was a hint of curiosity.

Given Su Yu's technical prowess, he wouldn't be some madman with such mechanical skills.

If he's proposing such collaboration terms at this time and seems confident they won't oppose him, the reason behind it is worth pondering.

Hu Wen, clearly realizing this as well, immediately said, "Mr. Su, what is your ace up your sleeve or what are your trading terms? Why not just tell us directly instead of dragging on with suspense?"

Hearing Hu Wen's urging words, Su Yu smiled slightly and finally stopped delaying, directly raised a finger, and spoke softly: "Alright, then let me be frank."

"I am seeking your cooperation to provide me with enough mechanical parts, and even all the combat-specific intelligent chipsets you have in hand, I need them."

"In return, I can join your ranks, offer assistance, and even take charge of dealing with the Night Slayer Team, specifically speaking, become the main force against its captain, Mr. Li He!"

The main force against Li He!

Upon hearing this phrase.

Lang Yun and Hu Wen both couldn't help but hold their breaths. In their eyes, there was a sharp gleam flashing as they stared at Su Yu!

"Mr. Su, did I hear you right? Although the Wolf Pack and Shan Lan have some friction with Night Slayer, it is merely friendly competition. But you, Mr. Su, are the one with an endless conflict with Night Slayer Team. How come it sounds like you're helping us by taking on Night Slayer?"

Lang Yun spoke softly, saying this while intensely staring at Su Yu, trying to catch any subtle expressions that might reveal Su Yu's true intentions.

He couldn't help but be cautious.

The Night Slayer Team, especially Li He, known as a top Transcendent in the spirit domain, with his unprecedented mysterious methods, unmatched in the entire Sanctuary.

### **Chapter 84: Chapter 77 Straight to the Point, Cooperation Achieved (Please Subscribe First)\_2**

The current attitude of the managers is ambiguous.

Even with Lang Yun and Hu Wen together, and including their team's combatants, Lang Yun and Hu Wen aren't confident they can handle the Night Slayer Team.

If they break ties with Night Slayer now.

Lang Yun and Hu Wen fear they might be the next to be annexed by Night Slayer.

So, even if on the other side is Su Yu, who has already irreversibly broken ties with Night Slayer and is almost in a fight to the death mode, they cannot give him their full trust!

Upon hearing Lang Yun's questioning.

Su Yu, instead of being alarmed, was delighted!

After all.

The more cautious Lang Yun and Hu Wen are, the more it means they are wary of Night Slayer and Li He.

This increases the likelihood of Su Yu's persuasive success!

Gazing at Lang Yun with a scrutinizing look without any concealment, Su Yu smiled slightly and met Lang Yun's gaze fearlessly, saying word by word, "Captain Lang, feel free to test as long as you need, but there's no need to ask childish questions like the ones just now."

"Li He's temperament and Night Slayer Team's expansion recently are clear to everyone. If Night Slayer continues growing, can Wolfpack or Shan Lan really withstand Night Slayer Team's expansion? Are the two captains truly willing to become Night Slayer's new deputy captains?"

After Su Yu's counter-question.

Lang Yun and Hu Wen's expressions became somewhat awkward.

Lang Yun coughed, adjusted his emotions, and spoke gravely, "Since Mr. Su is so forthright, we might as well lay it all out on the table."

As Lang Yun spoke, he stared intently at Su Yu: "Mr. Su, you came here seeking cooperation and claiming you can take on Li He as the main force. Forgive my boldness, but I truly cannot see what confidence Mr. Su has to say such words?"

"My answer to this question is simple."

"If the two captains follow me to our Ninth Team's station, everything will become clear!"

Su Yu smiled slightly, slowly stood up, looked at Lang Yun and Hu Wen, and made an inviting gesture.

Watching Su Yu's action.

Lang Yun and Hu Wen hesitated for a moment, but eventually, they both stood up: "Alright then, let's see what kind of trump card Mr. Su has prepared!"

...

Half an hour later.

At the Ninth Team station, inside the repair room.

"Captain Lang, Captain Hu, are you satisfied with my trump card?"

Su Yu raised his hand slightly.

Ten cavalry gathered in front of him, forming an arrow-like combat formation, locking in on Lang Yun and Hu Wen standing before them.

The dark muzzles locked onto them.

Causing Lang Yun and Hu Wen's breathing to become a bit heavy, their eyes held shock and amazement as they looked at the brilliance of these ten cavalry!

In the past ten minutes.

Su Yu didn't just show them the coordinated moves of the cavalry team, but directly engaged them with ten cavalry.

Although Lang Yun and Hu Wen both eventually won.

But know this.

Su Yu is currently controlling only a mere ten cavalry.

According to Su Yu, the number of cavalry he can control at the moment has already reached up to thirty!

Thirty cavalry, if deployed into a combat formation simultaneously, given the remarkable combat ability Su Yu demonstrated earlier.

Neither Lang Yun nor Hu Wen felt they could emerge victorious in front of a combat cluster formed by these cavalry.

Just escaping unscathed would already be the limit.

Not to mention.

Su Yu clearly stated that his strength would rapidly improve in the upcoming time, and the number of cavalry he could control would only increase, so by the time he fights Li He for real, the number he could handle would only be more than thirty!

With Su Yu's assurance with these words.

Lang Yun and Hu Wen had already completely believed Su Yu's previous claim that he could handle Li He's main force!

However, according to Su Yu's cooperation terms.

The number of components they need to pay Su Yu now is indeed quite a lot.

This time, Su Yu really made an outrageous demand.

Not only does he want the mechanical parts and intelligent chip sets that Wolfpack and Shan Lan Team collected in the past.

Many valuable materials, such as Tungsten Blood Steel and Sea Blue Ore, and similar rare minerals are also on Su Yu's list of demanded resources.

With such a large investment.

Even Lang Yun and Hu Wen were a bit hesitant.

"It's not that we don't trust Mr. Su, but this deal involves too many resources. We wonder if we can pay a part now and the rest in installments to Mr. Su. During this period, could Mr. Su provide us with a batch of improved equipment, regardless of how much, at least to give an account to our team members?"

Lang Yun couldn't help but speak up.

Hu Wen beside him chimed in supportively.

But Su Yu's response was equally firm.

"No, all the materials and components must be handed over to me now, and the sooner the better."

Su Yu spoke solemnly.

"Also, as I mentioned before, in the upcoming time, I might find it hard to spare time to help various hunting teams improve or maintain their equipment, even the teams of the two captains."

He thought for a moment, then simply and directly explained the situation regarding Li He.

About Li He's Meditation Technique, the ability to manipulate minds, and influence the spirit.

Lang Yun and Hu Wen had already speculated about this.

But speculation is no match for having real evidence in front of them.

Now, the original speculation was personally confirmed by Su Yu, who is also a Transcendent of the spirit type.

Adding to that, Su Yu directly stated that Lei Wu and his group had been eliminated by him, and whether his words were true could be confirmed once the Night Slayer Team returned.

With this piece of intelligence.

Lang Yun and Hu Wen naturally had more faith in Su Yu's words.

"Currently, Li He is leading the Night Slayer Team rookies, hunting and roaming in the wilderness."

"I have eliminated the members of Lei Wu's squad, causing significant losses for the Night Slayer Team, and Li He's strength is likely to be substantially impacted, but this is not enough."

Su Yu spoke solemnly.

"With those rookies who joined Night Slayer Team, as long as Li He can harvest enough awe and respect from them, his strength will definitely be restored, and further breakthroughs are very likely!"

"And this time won't be too late! At most, one to two months, and he might have accomplished it!"

"So, we don't have much time to waste, we must seize every minute and second!"

Listening to Su Yu's impassioned speech.

Lang Yun and Hu Wen both couldn't help but exchange glances, then silently nodded, no longer hesitating!

...

Ten minutes later.

After seeing Lang Yun and Hu Wen off, Yang Lie followed Su Yu back to the station, his eyes still filled with shock.

Even though he had learned a lot about the Night Slayer Team from Su Yu.

The idea that Li He will break through to Four-star in at most one to two months.

And they, consequently, would have no chance of turning the tables, was something Yang Lie was hearing for the first time, and he couldn't help but feel some anxiety and worry.

Noticing Yang Lie's emotions, Su Yu couldn't help but smile slightly, patting his old captain's shoulder and saying, "Uncle Yang doesn't need to worry too much. Actually, even if Li He really breaks through to Four-star, it wouldn't be so easy for him to directly dominate the entire Sanctuary!"

A Four-star spirit Transcendent, especially a Transcendent like Li He with a Meditation Technique trait so peculiar, naturally possesses formidable strength, vastly different from an ordinary Four-star Transcendent of the physical type.

But isn't there still me, the Extraordinary Mechanic?

"With me in charge, let's not forget Li He was just tricked by us; it's very likely that by the time we're fully prepared, he still hasn't broken through to Four-star. Even if he does, we still have quite a good chance of winning!"

Listening to Su Yu's reassuring words, sensing the strong confidence in Su Yu's tone.

Yang Lie couldn't help but be affected, nodding firmly, but in the next second, something else occurred to him, and new worries appeared in his eyes!

"However, there's still one more thing, little brother Su, shouldn't you also be paying attention to?"

### **Chapter 85: Chapter 78: Building Momentum, 50 Chips**

For Su Yu's strength, Yang Lie, who has watched Su Yu grow all the way, naturally has full confidence.

But Lang Yun and Hu Wen are not aware of this.

Even if they have witnessed the combat prowess of Su Yu's Cavalry Squad.

But with only one or two months of preparation time.

Whether they can maintain enough confidence in Su Yu, even Yang Lie is not certain.

"They both, are four-star Transcendents. Although they are only four-star beginner-level Extraordinary of the Physical Body, with such strength, even if they leave Shelter No. 73, they can quickly earn a place in other settlements."

Under Li He's threat.

Some people will choose to resist.

But for strong individuals like Lang Yun and Hu Wen, taking their own safety into account, choosing to leave Shelter No. 73 ahead of time, away from the center of the vortex, is not an impossible scenario!

Upon hearing Yang Lie's analysis, Su Yu smiled slightly and said softly, "Uncle Yang's concern is indeed reasonable, but isn't Uncle Yang forgetting something?"

"Hmm?"

Yang Lie was taken aback.

Su Yu gently reminded, "Uncle Yang, in the Sanctuary, I am not the only one who can fight against Li He!"

Hearing Su Yu say this.

After a brief moment of stupefaction, a sharp gleam appeared in Yang Lie's eyes!

"Brother Su means... the administrator?"

"Exactly!"

Su Yu nodded slightly.

The current physical condition of the administrator is already extremely poor.

To deal with Li He, no, not even Li He.

Even figures like Lang Yun and Hu Wen, these two four-star beginner-level Extraordinary of the Physical Body, can possibly defeat the current administrator in a one-on-one situation.

But this point, not to mention Lang Yun and Hu Wen, even Yang Lie is not aware of.

In their eyes, and in the eyes of the entire Sanctuary's residents, including Li He.

Although the administrator has aged.

His strength can still erupt with astonishing combat power when necessary.

Therefore.

When the moment finally comes where both sides tear apart their facade and meet in battle.

The allies Lang Yun and Hu Wen can rely on are not just Su Yu alone, but also the old administrator!

If they had only Su Yu as support, they might lack confidence.

But considering the old administrator, when Li He attempts to annex the entire Sanctuary to turn everyone into his slaves, will definitely stand up and fight alongside Su Yu and others.

Lang Yun and Hu Wen naturally will not give up so easily!

After listening to Su Yu's analysis.

Yang Lie's eyes were filled with a sense of understanding, and his heart grew even more excited.

"I'll go and prepare everyone, join forces with the Wolf Pack and Shan Lan, and start promoting our cause!"

The cooperation that Su Yu eventually reached with the Wolf Pack and Shan Lan Team is not limited to the supply of mechanical parts and materials.

After learning about Li He's foundation of Spiritual Ability came from his subordinates' esteem from Su Yu.

Lang Yun and Hu Wen also made another decisive decision, which is to directly merge the Wolf Pack Team and Shan Lan Team, forming an enormous hunting squad to enhance their pressure on the Night Slayer Team.

And on Su Yu's side, there will be cooperation in spreading and promoting, making himself known as a Transcendent of Spiritual Ability, and already a "three-star" level Transcendent of Spiritual Ability throughout the Sanctuary!

Li He's strength is not to be underestimated.

But after such promotion and fanfare.

Su Yu is confident that his strength will find it exceptionally difficult, not even to mention breaking through to the four-star level, but just maintaining a top tier of the three-star level.

In any case, he will not venture into the wilderness before the final battle begins.

No matter how desperate Li He becomes, hoping to make a move against him.

Being in the Sanctuary, he can call upon Lang Yun and Hu Wen, these powerful reinforcements, at any time.

Even if deploying all ten Cavalry units to self-destruct, while not guaranteed to defeat Li He, achieving a stalemate with mutual destruction is something Su Yu is quite confident of.

Let alone the concealed threat of the administrator whose strength has yet to be exposed.

The likelihood of Li He acting desperately like a cornered animal is quite low.

Under such premises, Su Yu no longer fears exposing his strength and talents.

However, as Su Yu previously mentioned.

His focus from now on would be on maintaining the administrator's prosthetic and producing new Cavalry units.

All work such as publicity and receiving components sent by the Wolf Pack and Shan Lan teams would be delegated entirely to Yang Lie and the others.

Yang Lie and others certainly won't refuse.

They are more than willing to have the opportunity to help Su Yu.

...

Thus, over the subsequent days.

The entire Sanctuary experienced another massive upheaval.

The merger of the Wolf Pack and Shan Lan teams was impactful, needless to say.

On the day this news was announced, Li Yao, the only member of the Night Slayer Team left in the Sanctuary, was so terrified that he couldn't sleep well that night.

Fearing that after the merger of Wolf Pack and Shan Lan, they would directly declare war on the Night Slayer.

Just as he managed to calm down, Li Yao encountered He Xiang, returning from the wilderness to gather information in the Sanctuary.

From He Xiang, he learned that Lei Wu's squad had been completely annihilated, which once again caused turbulence in Li Yao's heart for a long time before it calmed down.

## **Chapter 86: Chapter 78: Creating Momentum, 50 Chips\_2**

And He Xiang also learned from Li Yao about the merger of the Wolf Pack and Shan Lan.

The shock in his heart went without saying.

He was even more troubled about how to investigate who had wiped out Lei Wu's squad.

Another piece of news arrived, causing He Xiang and Li Yao to completely lose their composure.

"Have you heard? Su, the Mechanic from the Ninth Squad, has become a psychic Transcendent, and like the captain of the Night Slayer Team, he is also a three-star psychic Transcendent!"

"What? How old is that Brother Su? He's already become a three-star psychic Transcendent? Doesn't that mean the Ninth Squad can soon grow to rival the Night Slayer Team?"

"Exactly! And with Brother Su's talent for cultivation, given time, his future achievements might overshadow even the captain of the Night Slayer Team!"

Such rumors.

Soon spread throughout the Sanctuary, reaching the ears of He Xiang and Li Yao, leaving them utterly dumbfounded!

Once they regained their senses.

Before He Xiang could speak, Li Yao angrily exclaimed, "Impossible! Absolutely impossible!"

"A three-star psychic Transcendent? It's not that easy to train into! Even my brother took years of hard work to achieve it back in the day!"

"This is a rumor! It's definitely a rumor spread by that Su Yu to disrupt our formation!"

As Li Yao spoke, his eyes showed an unabated anger, but beneath the anger, there was also a trace of jealousy that could not be hidden!

Compared to Li Yao, He Xiang remained more composed.

At least he wasn't so enraged that he couldn't maintain basic rationality.

"Whether it's a rumor or not, the fact that Su Yu dares to showcase his power now means he must have considerable aces up his sleeve! We mustn't underestimate Su Yu! Also, we need to quickly report the situation of the Wolf Pack and Shan Lan to the captain!"

As He Xiang spoke, he intended to get up and deliver the message to Li He, but before departing, he was stopped by Li Yao!

"Wait!"

Li Yao stared at He Xiang, "The information hasn't been confirmed yet, the intel on the Wolf Pack and Shan Lan can be sent, but if we send the info regarding Su Yu over to my brother, it will cause trouble!"

"So are you saying not to send it? Besides, even if I don't take it over, when the captain returns with others to the Sanctuary, the team members will hear these rumors anyway, won't that still cause chaos?"

He Xiang couldn't help but argue back, his tone filled with irritation.

The propaganda battle by Su Yu was indeed effective.

Even diehards like Li Yao and He Xiang, who were loyal to Li He, felt a sense of fear at this moment. Their loyalty might not waver, but the fear and unease in their hearts were enough to affect Li He's spiritual foundation.

And this influence reflected back on both He Xiang and Li Yao.

It stirred their emotions, making them increasingly excited and intense.

"I don't care, in short, I don't believe Su Yu has broken through to three-star now! Absolutely impossible!"

Li Yao's tone showed signs of losing rationality.

At this moment, a sudden commotion outside caught the attention of Li Yao and He Xiang, causing them to instinctively turn their heads, filled with curiosity.

"What's going on? Why is there such a big commotion outside suddenly?"

Soon enough.

They understood the source of the uproar.

"It's that Brother Su Yu! He's going to demonstrate his psychic energy live!"

"What!?"

"Are you kidding!?"

Hearing this.

Li Yao and He Xiang exchanged a glance and couldn't sit still any longer, rushing out of the Night Slayer Team's base towards the open space in front of the Ninth Team's base.

When they arrived at the open space, both of their breathing slightly halted!

In front of them, nearly half of the Sanctuary's residents had gathered around.

Li Yao and He Xiang squeezed into the crowd, focusing their gaze on the center of the open space, just in time to see Su Yu manipulating his spiritual energy to levitate hundreds of mechanical parts around him, like planets orbiting a star, rendering their gazes utterly frozen!

Manipulating objects with spiritual energy.

This indeed is one of the markers of a three-star psychic Transcendent!

Only when spiritual abilities are refined to this extent can one move objects with them!

"The rumor isn't false... this intelligence must be reported to the captain immediately!"

He Xiang took a deep breath.

His eyes could not hide the shock and fear.

As for Li Yao, witnessing all this firsthand caused him to be completely petrified, and it was He Xiang who helped carry him back to the base!

"Looks like my plan is going well!"

As He Xiang struggled to drag Li Yao back to the Night Slayer Team's base.

Su Yu, who was performing, couldn't help but curl his lips into a playful smile as he watched them leave.

This performance was carefully prepared by Su Yu.

The purpose was to intimidate the members of the Night Slayer Team.

Although the majority of the Night Slayer Team was still out in the wilderness, not having returned yet.

But just based on Li Yao and the spectacular reactions of He Xiang, who came out of nowhere, Su Yu knew that his performance was undeniably successful!

"It's all thanks to the effect of the Steel Meditation Technique!"

Su Yu glanced at his profession panel, a hint of a smile appearing in his eyes.

On Su Yu's profession panel, the section for psychic ability level.

Su Yu's current psychic ability level was still labeled as [Two-star Peak].

The experience bar had grown to only 91%, still quite a way from reaching the three-star grade.

But, with the help of the Steel Meditation Technique.

Su Yu's spiritual energy was on par with a two-star peak level.

Even when he was only at a one-star level, he could manipulate various mechanical parts, performing rapid assembly and construction work.

And such a performance, in the eyes of the Sanctuary's residents and the Night Slayer Team's members, was indistinguishable from the capabilities of a three-star psychic Transcendent!

"With this, my propaganda assault can be considered a great success!"

Just as He Xiang previously argued with Li Yao.

Although the members of the Night Slayer Team were not in the Sanctuary yet, it didn't matter.

They would eventually return, and once they did, they would receive these two pieces of information.

When that happens, the impact on them would be more significant.

After all, returning exhausted from battles in the wilderness, thinking they would be safe in the Sanctuary, only to be hit with two devastating pieces of news. Even the most loyal and firm members, loyal to Li He, would be overwhelmed by immense frustration and possibly be crushed!

In any case.

No matter what measures the Night Slayer Team would undertake next.

The damage inflicted by Su Yu's planned propaganda assault was destined to be borne by the Night Slayer Team!

"However, these tactics are only auxiliary effects."

"To truly counter the Night Slayer Team, relying on these tactics alone is far from enough!"

After completing the last bit of promotional buildup.

Su Yu wasted no time and directly returned to the repair room, starting maintenance and repair on the prosthetic devices sent by the management.

During this period.

Mechanical parts from the Wolf Pack and Shan Lan Teams continued to be delivered to the Ninth Team's base.

Moreover, what surprised Su Yu even more was that among the Wolf Pack and Shan Lan Team's inventory of parts, there were actually twenty complete combat intelligent chipsets!

Although these twenty chips were only basic level.

Having this batch of chipsets along with the thirty chipsets originally owned by Su Yu.

Meant he could now assemble up to sixty Cavalry units, forming a Combat Swarm!

A Combat Swarm formed by ten Cavalry units was already sufficient to kill a three-star initial-stage Radiation Beast Lord.

The power of a Combat Swarm composed of sixty Cavalry units? Su Yu couldn't help but feel incredibly excited and anticipatory just thinking about it!

### **Chapter 87: Chapter 79: Ghost Energy Potion, The Grey Mist Appears**

However, he did not immediately begin the creation of the Cavalry. Instead, he prioritized the maintenance of the management prosthesis first.

He planned to level up his Battlefield Mechanic skills and acquire related knowledge about prosthetic technology, and then begin crafting his mechanical equipment [Thousand Hands] prosthesis.

Once these tasks were completed and his level sufficiently increased, he would then start crafting this new batch of Cavalry!

...

Just as Su Yu started repairing the prosthesis and making final preparations for the showdown with Li He.

On the wasteland, Li He finally received the news delivered by He Xiang.

Despite being in an extreme and irritable state, He Xiang, with his near-three-star level strength, forcefully suppressed his inner turbulence and disclosed the news solely to Li He without spreading it around.

Yet after delivering the intelligence, He Xiang couldn't hold back his concern: "Captain, what should we do next? Forget about the Su from the ninth squadron, even the threat posed by the coalition of wolf packs and Mountain Mist is not to be underestimated!"

"I know, don't worry."

After listening to He Xiang's report.

Li He remained silent for a long time before speaking faintly.

"Don't rest just yet. Run an errand to gather Mo Yun and the others. As for the intel you've gathered, there's no need to tell the team members for now. Let me organize my thoughts, and once Mo Yun and the others are all here, I will tell them personally!"

"Yes! I'll get right on it!"

He Xiang, without suspecting anything, nodded immediately.

As He Xiang left.

Li He didn't return to the makeshift vehicle camp of the squad instead stood outside it, his eyes struggling and filled with anger!

"Damn... Su Yu!"

Chewing on Su Yu's name, Li He gnashed his teeth.

If it weren't for the emergence of the variable that is Su Yu, Shelter No. 73 should have long been in his hands, and he should have already broken through to the four-star level without the current predicament.

The coalition of wolf packs and Mountain Mist could indeed pose a threat.

But Li He knew well.

The supreme prestige he was able to build among the -Sanctuary residents was not solely based on his prowess to defeat Lang Yun and Hu Wen, these two four-star Extraordinary of Physical Body. More importantly, he was the one and only true Psychic power Transcendent at Shelter No. 73 who could train and exhibit astonishing strength!

Because he was unique, he was mysterious and unpredictable; being mysterious and unpredictable made him appear even stronger!

This mysterious strength impression made it easier for Li He to imprint spirits and cast psychological shadows among his subordinates, especially those newly joined members of the Night Slayer Team.

But now.

With Su Yu showing capabilities comparable to a three-star Psychic power Transcendent, this impression no longer existed!

Li He took a deep breath, striving to calm the inner anger and regret.

The last hint of hesitation in his eyes was wiped away, replaced by firm determination and a murderous intent!

"Fortunately, this Su Yu is indeed a step short!"

At this moment, Li He was extremely thankful he had led the entire Night Slayer Team out of the sanctuary to establish higher prestige among the newly joined team members in the past few days.

Otherwise, if they had stayed in the sanctuary, it would have been impossible to keep this intelligence hidden from them!

As Li He thought.

He gently took out a small brown bottle from his waist combat backpack.

The test tube holding the potion was not long, roughly the size of a palm, with small bubbles surfacing as it tilted, making it exceptionally eerie.

Yet Li He's eyes were filled with fervor as he looked at the potion.

This was Li He's most precious card, named the [Ghost Energy Potion].

This was something good acquired by Li He from the Ghost Tribe!

If Su Yu were present, he would see at a glance that within this bottle of Ghost Energy Potion was not any medicine or material but Spiritual Energy, highly condensed into substance, forming this liquid potion!

However, the liquid Spiritual Energy in this bottle was in a state of extreme chaos and violence.

Whether it's a Psychic power Transcendent or a Physical Body Extraordinary.

During routine meditation and training, the Spiritual Energy drawn from the Subspace is relatively orderly and tranquil.

Yet, the Spiritual Energy contained in this Ghost Energy Potion is entirely different!

This kind of turbid and violent liquid Spiritual Energy, once consumed and absorbed, could even lead a powerful Psychic power Transcendent to be polluted by this Spiritual Energy, losing their sanity and turning into a beast driven solely by the urge to kill.

This was why Li He had never used it.

Given Li He's current strength, the likelihood of withstanding the potion's side effects upon consuming the Ghost Energy Potion was only seventy percent.

But if he could break through to four-star, becoming a mid-level Psychic power Transcendent, the side effects brought by this Ghost Energy Potion could be directly ignored!

But now, Li He couldn't afford to care!

Patiently waiting.

Once Li He's Spiritual Energy detected the presence of He Xiang, Mo Yun, and others approaching this vehicle camp.

Li He hesitated no longer and directly raised his hand, pulling out the cork, and downed the entire bottle of Ghost Energy Potion!

Immediately.

"Boom!"

Li He's aura began to soar rapidly!

Previously, Li He's aura had already plunged to the brink of three-star top level due to Lei Wu's death, on the verge of dropping to three-star high level at any moment.

## **Chapter 88: Chapter 79: Ghost Energy Potion, The Grey Mist Emerges\_2**

But now, with the Ghost Energy Potion fully consumed.

Under the influence of that spiritual energy contained within the Ghost Energy Potion, which, although turbid, violent, and chaotic to the extreme, is also incredibly refined and pure.

In Li He's mind, the blood pool that was originally shaky at this moment began to hum and tremble!

The part that had originally faded, instantly solidified.

Then, it began a difficult but extremely determined expansion!

In just a quarter of an hour.

Under Li He's expectant gaze, his blood pool finally expanded to a diameter of over ten meters, meaning—

"I finally... stepped into the four-star level!"

Li He couldn't contain the boundless delight in his eyes and unconsciously shouted in joy!

But just as he shouted with joy.

"Boom!"

Li He only felt a huge loud noise above the blood pool in his mind, like muffled thunder, or like a flood of countless whispers intertwined and played in his mind at this moment. Hearing that sound made Li He feel like his brain was about to explode, causing him to howl in pain!

"Ahhhhh——!!!"

"What is that sound?"

"What's happening!? What's going on outside the vehicle camp!?" Inside the vehicle camp, those members of the Night Slayer Team stationed here were originally puzzled by their captain being called out by Vice Captain He Xiang and not returning for a long time. They were hesitating whether to go out and look for Li He's location.

Suddenly hearing that ear-piercing scream filled with inexplicable madness, they all couldn't help but change their expressions and look towards the outside of the vehicle camp.

Not far away, He Xiang and Mo Yun and others also heard that piercing scream, and subconsciously quickened their pace, wanting to see the source of the scream clearly.

But.

Just as they approached the area where Li He was located.

"Rustling!"

In the withered grass where Li He was standing, suddenly a large mass of gray taupe, turbid mist leapt out from the depths of the withered grass like a swamp. In an instant, it expanded to a circumference of more than ten meters, directly engulfing those Night Slayer Team members who stood closest!

"What the hell is this!? What is this ghostly thing!?"

Even He Xiang couldn't help but cry out in alarm.

He was only stunned for a fraction of a second!

When he came to his senses, Mo Yun, who had originally come to investigate alongside him, also at the two-star level, was directly swallowed by the gray mist.

Not just Mo Yun.

Even several other Night Slayer members who came from the direction of the vehicle camp to investigate were all swallowed by the gray mist!

"Captain? Was this your doing?"

He Xiang subconsciously asked.

But what answered him was only the now even more surging and frenzied gray mist, which, in just a moment, enveloped He Xiang in boundless darkness!

...

Sanctuary, Ninth Team outpost.

It had been three days since Su Yu achieved cooperation with the Wolf Pack and Mountain Mist teams.

In these three days, Su Yu helped the administrator to fully replace and maintain his prosthetic parts.

Though not completing the repairs, it did improve the administrator's condition considerably, even restoring a much healthier spirit.

And with such recovery, the administrator's trust in Su Yu's abilities grew, as did his generosity.

He directly opened his personal storeroom, allowing Su Yu to freely select the materials he needed.

And Su Yu naturally did not hold back.

After completing the initial maintenance of the prosthetic parts.

Su Yu then prepared to start crafting his own [Thousand-Handed] Prosthetic.

It was precisely at a time when he was lacking advanced materials and equipment that the opportunity to obtain higher-grade equipment to arm himself was not something Su Yu would pass up on.

However, more than advanced materials like Tungsten Blood Steel or Sea Blue Ore.

Su Yu was more interested in the equipment within the administrator's private warehouse.

One reason for this situation was the material support provided by the Wolf Pack and Mountain Mist.

Su Yu currently had no shortage of ore materials like Tungsten Blood Steel and Sea Blue Ore.

The second reason was that the [Thousand-Handed] Prosthetic included additional weapon equipment for each mechanical arm to enhance combat capabilities.

Although the Wolf Pack and Mountain Mist also provided some worn-out mechanical weapons, most were mid-level in grade. Occasionally, there were high-grade mechanical weapons, but the resource consumption for repairs was quite high, and the compatibility with the [Thousand-Handed] Prosthetic wasn't that strong.

Although the [Thousand-Handed] Prosthetic is a heavy-duty prosthetic and each mechanical arm's maximum carrying capacity is quite impressive.

Su Yu didn't plan to equip the mechanical arms with heavy weapons like grenade launchers.

Never mind about whether it could be mounted or not.

While Su Yu didn't mind sacrificing some mobility for firepower and defense, he didn't truly want to turn into an immobile fixed artillery.

Therefore, the administrator's opening of his private warehouse at this moment was of great help to Su Yu.

With anticipation, Su Yu carefully selected from the administrator's grandfather's private warehouse.

And the harvest was extremely fruitful, leaving Su Yu utterly delighted.

"I really didn't expect that you, old man, still collected something like this!"

Su Yu heaved out a chain saw that looked quite heavy, wiped the sweat from his forehead, and teased the administrator.

Although the chain saw was left in the warehouse by the administrator, it was carefully placed on the weapon rack, unlike other worn-out equipment, which was mostly covered with dust. This chain saw was quite new, indicating it was meticulously cleaned by the administrator every so often.

Upon hearing Su Yu's words, the administrator also looked over, his gaze somewhat nostalgic: "I didn't expect you to dig out this chain saw, not bad, this little guy was a great assistant of mine when I was young! It's something to think about, the first time I met it was thirty years ago, time really flies..."

"Uh... Thirty years ago?"

Listening to the administrator's sentiment, Su Yu initially empathized, wanting to lament the passing of time together, but as he listened, something didn't seem right.

Thirty years ago?

"If you don't mind me asking, how old are you this year?"

"I'm one hundred and sixty-seven this year, why?"

Su Yu: "... No, nothing, just asking."

A one hundred and thirty-seven-year-old young guy... alright then.

After all, it's not unacceptable for a prosthetically enhanced person to live a bit longer.

Su Yu shook his head, suppressing his urge to tease, and couldn't help but say: "So, old man, maybe I should put this chain saw back for you?"

Su Yu originally took it out, thinking it was just a collector's item for the old man.

But unexpectedly, the chain saw seemed to have quite the gallant past with the old man, and Su Yu felt embarrassed taking it away to transform it into his own weapon.

However, the administrator was rather generous.

"Put it back? How could that be, you've already taken it out, it's fate for this little guy, besides, rather than eating dust in the warehouse, I reckon this boy hopes to be back on the battlefield!"

"But, didn't you see anything else you liked?"

Hearing what the administrator said, Su Yu chuckled wryly: "To be honest, I really did have my eye on a couple of things, but those two aren't in the warehouse..."

Su Yu said this while glancing at the assortment of weapons on the wall in the administrator's living room, his eyes wandering over two ray guns.

These two Thermal Energy Beam Guns had caught Su Yu's attention when he first arrived at the administrator's place.

Not only are these two ray guns of high quality.

But their damage levels aren't too high; one is still seventy percent intact, and the other is only about fifty percent damaged, so repairing them isn't too labor-intensive.

Moreover, the weight of these two ray guns isn't too heavy, adding them to his Thousand-Handed Prosthetic would allow him to maintain combat effectiveness while ensuring sufficient attack speed, making them perfect additions!

### **Chapter 89: Chapter 80: Special Grade External Prosthetics, Thousand Arms-Armed**

Noticing Su Yu's gaze fall on his collection wall.

The administrator chuckled silently, seeing Su Yu's focus was on those two Thermal Energy Beam Guns. After hesitating for a moment, he waved his hand, "Alright, these two guns are yours. However, if you take them, don't think about any other materials. If you want more benefits from me, you'll need to have repaired most of these parts on me first!"

"No problem, rest assured! Within a month at most, I'll help you solve these troubles!"

Hearing the administrator agree, Su Yu's eyes filled with delight. He nodded immediately, taking the two Ray Guns along with the Chain Saw he managed to grab from the administrator's warehouse, and rushed back to the repair room at the base, throwing himself into creating the Thousand-Handed Prosthetic.

At this moment, Su Yu's profession level had already been elevated to level 17.

The level of the Steel Meditation Technique had also been upgraded in sync. The area it could influence was already able to cover the entire repair room.

This was without consuming any Spiritual Energy.

If Spiritual Energy was consumed, before Su Yu's Spiritual Energy was exhausted, the entire base of the Ninth Squad would be covered by his Spiritual Energy.

Within this area,

Su Yu's cavalry, Nuonuo, and other Mechanical Creations could all receive computational power boosts and increased combat strength.

Furthermore, Su Yu could personally manipulate each mechanical part and Mechanical Creation to launch surprise attacks on enemies within range.

With his current accumulation of Spiritual Energy, the duration for maintaining such combat mode was quite exaggerated.

Though not enough to last for half a day or a full day continuously,

maintaining endurance for two to three hours was more than sufficient!

Additionally, once the Thousand-Handed Prosthetic in hand was completed, Su Yu estimated his profession level could further increase, and thereafter, fifty cavalry units awaited his crafting.

In short, amidst the numerous tasks, the source of experience was also quite abundant!

"Nuonuo, you handle the repairs on these two Thermal Energy Beam Guns. I'll try to adjust the weight of this Chain Saw and incidentally work on the design for the Thousand-Handed Prosthetic..."

Su Yu started up Nuonuo while picking up tools and began drawing and writing.

The Thousand-Handed Prosthetic could expand multiple mechanical arms, but the maximum bending angle, main purposes, and others could be set by Su Yu himself, providing considerable flexibility.

However, Su Yu was not entirely whimsical, allowing unchecked imagination.

Not to mention that a design created from unchecked imagination might not receive system approval, even if it did, the lack of materials at hand to produce it would render it futile.

In the end,

just as when he got the [Thousand-Handed] prosthetic, as Su Yu imagined.

The design he ultimately created was inspired by the movie's Dr. Octopus, except with double the mechanical arms.

Eight mechanical arms.

Four mechanical arms served as four legs, supporting his body for rapid movement, maintaining high mobility, and could raise up to about three meters high, enough to

traverse various complex terrains, providing remarkable adaptability surpassing most off-road vehicles.

And the other four mechanical arms were designated for combat purposes.

Among them, two mechanical arms were set by Su Yu to be transformed into weapon ports capable of firing Thermal Energy Rays, while the other two were equipped with two steel chain saws.

This Chain Saw was one Su Yu had opportunely obtained from the administrator old man as compensation.

The other was the Chain Saw originally used by Yang Lie.

After Yang Lie ascended to three-star level, the Chain Saw could no longer withstand his strength.

Compared to the Chain Saw, Yang Lie preferred using heavy weapons like a giant hammer in combat.

The destructive power of the three-star-level strength combined with a giant hammer infused with Tungsten Blood Steel was in some ways even more astounding than a Chain Saw.

Once that Chain Saw was retired, Su Yu didn't let it go to waste. He directly reforged it and added two basic level intelligent chip sets.

These were materials recovered during the last Ninth Squad's hunting in the wilderness. Not qualified for crafting cavalry units, but they could double the Chain Saw's rotation speed, enhancing its cutting power significantly.

Furthermore, after reforging, the Chain Saw blade integrated Tungsten Blood Steel and a small fragment of Sea Blue Source Crystal.

Su Yu successfully elevated that old Chain Saw to high quality, pairing it with the one generously provided by the old man, one on the left and one on the right, making them his close-combat weapons for the [Thousand-Handed] prosthetic.

As for the materials needed to craft these eight mechanical arms,

Su Yu did not hesitate to use all the rare metals that could be applied without causing property conflicts, throwing them into the furnace. Under Spiritual Energy's infusion, nearing three-star level, they were cast to completion, becoming the foundation of Su Yu's eight thousand-hand mechanical arms...

Thus, one weapon after another was maintained and repaired, one material batch after another was smelted and crafted.

Soon, three days had passed again.

The next morning, the seventh morning after Su Yu reached a collaboration with the Wolf Pack and Shan Lan Team.

Su Yu pulled back the curtains, watching the sunlight streaming into the repair room, his eyes were bloodshot from exhaustion but still shone brightly, and his spirit was exuberantly high!

He stretched his waist, moved his somewhat sore body.

### **Chapter 90: Chapter 80: Special Grade External Prosthetics, 1000 Hands-Armed\_2**

Su Yu took a deep breath and gently picked up an intelligent chip from the workbench, inserting it into his waist.

Around his waist, where his belt used to be, there was now a pale silver belt.

The belt was made of metal, with a width comparable to five fingers combined. In the center, a square iron buckle engraved with a spider pattern and tinged with faint blood-red veins from the Tungsten Blood Steel, featured a perfectly aligned connector.

As Su Yu gently pressed the intelligent chip.

"Buzz!"

The pale silver metal shell at the back of the belt instantly opened to the sides, revealing two rows of eight connectors that burst forth with scorching airflow, pulling the eight mechanical arms suspended not far behind Su Yu on the connection rack, in an instant.

"Clack!"

The mechanism echoed, gears turned.

The moment the eight mechanical arms completed the connection, the intelligent chipset was fully activated!

With the support of the advanced universal intelligent chipset.

At this moment, Su Yu felt his brain become extremely active.

The Thousand-Handed Prosthetic equipped with eight mechanical arms, although in the form of a belt, was equipped on Su Yu.

But at this moment, they felt as though they were Su Yu's very own flesh and blood!

With just a thought, Su Yu could freely mobilize and operate them!

As Su Yu's eyes focused.

A line of information about the [Thousand-Handed] prosthetic appeared in front of him!

[External Prosthetic Weaponry·Thousand Hands]

[Creator: Su Yu]

[Type: External Prosthetic]

[Grade: Special]

[Trait: Bionic Prosthesis·Spiritual Connection]

[Can establish a connective circuit through spiritual energy and intelligent chips, ensuring a highly synchronized spiritual link between the external prosthesis and the user, achieving a maximum sync rate exceeding 90%, allowing the prosthetic to act as an extension of the user's own body.]

[Trait: Bionic Prosthetic·Form Switching]

[Can establish a connective circuit through spiritual energy and intelligent chips, allowing the user to switch the prosthetic's form via spiritual intent. Different forms will possess different traits, which can be expanded by installing mechanical arms, modifying weaponry, and integrating rare materials, entering specific forms to gain certain amplifications; current unlocked forms: Combat Form, Defense Form.]

[Equipment:]

[Close Combat Weapons: Chain Saw·Tungsten Blood Steel, Simple Chip Enhancement·Advanced (toughness, destructive power improvement, rotation speed enhancement) X2]

[Mid to Long Range Weapons: Thermal Energy Beam Gun·Sea Blue Source Crystal, Tungsten Blood Steel Enhancement (fire rate amplification, magazine durability extension) X2]

[Skills:]

[Combat Form·Overload Firepower: Consumes spiritual energy to enter Overload Firepower mode, during which close-range weapon rotation speed increases, mid to

long-range weapon firing speed increases, and firing power moderately amplifies; after more than ten minutes, the equipped weaponry may suffer component damage.]

[Combat/Defense Form·Spiritual Shield Type II·Sea Blue Source Crystal Enhancement (shield toughness improvement, spiritual energy consumption reduction, durations prolongation): Consumes spiritual energy to condense a shield lasting for a definite time, capable of blocking a star-level four damage within the shielded area; in defense mode, using the Spiritual Shield can block up to a top-level four-star damage, with a ten-minute cooldown.]

[Defense Form·Unbreakable·Tungsten Blood Steel Enhancement (mechanical arm defense power boost, toughness enhancement, penetration resistance improvement): Consumes spiritual energy to attach a subspace spiritual blessing on the constructed defensive barrier, reducing damage received by 20% for the next ten minutes.]

"Phew..."

Looking at the attributes information reflected in his eyes.

Su Yu couldn't hide the joy in his eyes!

After painstaking preparations for nearly a week, having invested most of the rare materials at hand.

The return was incredibly rewarding!

A special-grade Thousand-Handed Prosthetic!

Not only achieving the highest grade that the first-level prosthetic weaponry, Thousand-Handed, could reach.

It even unlocked two different forms!

Compared to the gain of abundant experience after completing the crafting process, smoothly upgrading his profession level from 17 to 18.

Su Yu was more curious about the changes brought by the two different forms of the Thousand-Handed Prosthetic.

From the description in the profession panel, it couldn't be felt; it still needs hands-on experience!

"Combat Form!"

Su Yu's mind moved.

Instantly, the four mechanical arms used for movement clanked and slammed onto the ground, then suddenly elevated, a surging force supporting Su Yu and the other four armed mechanical arms, keeping them stably airborne; thereafter, beneath the four mechanical arms, each extended a metal plate, forming a small standing platform for Su Yu to stand upon, surveying the battlefield!

Since it was indoors, Su Yu's altitude was only one meter off the ground, not much to experience.

But as the designer of the Thousand-Handed Prosthetic, Su Yu knew these mechanical arms could elevate him over three meters, providing ample height to oversee the entire battlefield!

As the four mechanical arms landed.

The familiar mechanism rotation sound echoed.

The other four mechanical arms used for weaponry blossomed like flowers, arraying to Su Yu's left and right sides, each side equipped with a ray gun and a chain saw, while each armed mechanical arm had similar metal active panels, ready to deploy at any time.

These four metal active panels can be activated independently or simultaneously, forming a simple yet complete shield capable of protecting Su Yu's entire body, defending against long-range snipes while being incredibly responsive.

Under the Thousand-Handed Prosthetic's trait, [Bionic Prosthesis·Spiritual Connection].

It can even warn Su Yu of incoming crises before he even realizes them, initiating shield activation ahead of his command!

However, in terms of defense.

The various defense measures in combat form are more of a temporary expedient.

The true defensive strength of the Thousand-Handed Prosthetic relies on [Defense Form]!

"Defense Form!"

Su Yu shifted his mind once more.

Instantly.

The four mechanical arms originally supporting his body suddenly dropped a height, while the weapons of the other four mechanical arms all entered a dormant state, folding up like tired birds coming home!

Within just a few breaths.

The mechanical arms converged at a single point, forming a massive metal cocoon that enveloped Su Yu within.

However, Su Yu's spiritual energy could still penetrate the metal cocoon, sensing the environment around him with the four mechanical arms for movement beneath.

Whether for breaking through enemy fire cover or evading enemy pursuits, this mode is incredibly useful!

Moreover, in extreme cases.

Su Yu can even opt to sacrifice mobility, elevating the remaining four mechanical arms used for movement to join the metal cocoon for protection.

However, deploying this mode requires sufficient allies around Su Yu, such as being surrounded by a massive cavalry legion, to effectively use this mode.

With a wave of his hand, he released the protection of the eight mechanical arms.

Su Yu removed the Thousand-Handed Prosthetic, his eyes shimmering with uncontrollable joy.

Undoubtedly, the power boost brought by the special-grade Thousand-Handed Prosthetic far exceeded his expectations.

With the aid of the special-grade Thousand-Handed Prosthetic.

Su Yu was confident that with his current individual combat strength he could contend equally with a top-level three-star, even a low-level four-star Extraordinary of Physical Body!

An ordinary top-level three-star Radiation Beast Lord would flee in panic upon encountering him!

Building on this strength foundation.

Su Yu turned back, eyeing the fifty battle-use intelligent chips remaining on his workbench, with a gleam forming in his eyes!

"Once these fifty intelligent chips all transform into a cavalry army, to what level will my strength ascend?"
