Chapter 2071: Eating Fruits, Devouring Heavens

2071 Eating Fruits, Devouring Heavens “No doubt, this is a very rewarding victory!”

“Eastern Sea’s righteous path is no big deal.”

“I wonder if Qi Sea Ancestor died in battle? If he is dead, the whole of Eastern Sea will be ours!”

The variant human alliance Gu Immortals were extremely excited.

Fang Yuan detained the captives while commanding the variant human Gu Immortals to clean up the battlefield.

“Lord Fang Yuan, I am willing to follow you and offer my Golden Fur grotto-heaven!” Golden Fur Immortal Monarch suddenly knelt before Fang Yuan and proclaimed loudly.

The immortals were silent for a while before cries of pledging allegiance came from everyone.

The entire variant human alliance submitted to him without exception!

Wu Shuai was inwardly happy upon seeing this, while Fang Yuan was still indifferent.

This scene was within the expectations of these two.

If Fang Yuan forced these alliance members earlier, he naturally could suppress them even then, but it would not be like now when these people were willingly following him.

This arrangement that Fang Yuan and his two clones planned gave them a lot of gains.

One was the huge external pressure brought by the Eastern Sea alliance army’s attack. The members of the variant human alliance was forced to unite, they observed the dangerous external environment and the deep malice held towards the variant humans by the entire human Gu Immortal world!

The other was that Fang Yuan displayed his peak level battle strength, leading the variant human alliance to a massive victory. This gave a deep impression to the variant human alliance immortals that they could not oppose Fang Yuan, and also made them feel some sort of anticipation towards their future after submitting to Fang Yuan.

From the perspective of these variant human immortals:

One, all their grotto-heavens were facing the qi harvest fruit disaster. If they did not surrender to Fang Yuan, they would not be able to deal with it by themselves.

Two, the outcome of going against Fang Yuan was displayed in front of them, they could not do this if they wanted to live.

Three, although Fang Yuan was ruthless, he was strong. Following such an expert would give them a much brighter future than fighting alone.

Humanity had dominated the five regions for a long time, these variant human Gu Immortals of the two heavens swallowed their anger and bore with it, and were already habituated to their lowered statuses.

They lacked the spirit and state of mind that were possessed by the members of Heavenly Court and Longevity Heaven. This was already shown in many of the past battles. The variant human alliance's Gu Immortals had low fighting spirit and prioritized their own safety.

All these reasons made it almost certain that everyone in the variant human alliance would surrender to Fang Yuan.

After cleaning up the battlefield, Fang Yuan was not in a hurry to count his gains, he sent a command: "We will invade Soul Pacifying grotto-heaven and Night Wolf grotto-heaven!"

The immortals were shaken, once again feeling Fang Yuan's forcefulness and tyrannical character.

Even this large battle could not satisfy Fang Yuan's appetite, he still wanted to continue fighting and take down Soul Pacifying grotto-heaven and Night Wolf grotto-heaven.

Soul Pacifying grotto-heaven was a soul path grotto-heaven secretly controlled by Spectral Soul when he was alive. Now that Spectral Soul was dead, Fang Yuan was going to exploit the weakness and wipe them out.

As for Night Wolf grotto-heaven, its previous owner, Night Heavenly Wolf Lord, had surrendered to Heavenly Court, which was known by Fang Yuan and used to his advantage. Wu Shuai had killed Night Heavenly Wolf Lord in Dragon Palace, but to conceal the information, they had immediately invaded Heavenly Court and could not care about Night Wolf grotto-heaven at that time.

Now that Fang Yuan was free, he was going to take revenge and annex them.

Thereupon, the variant human alliance charged towards immemorial black heaven majestically.

The army drew closer, but before the battle even started, Night Wolf grotto-heaven opened its entrance. With Ye Zhi leading them, the grotto-heaven Gu Immortals moved out of their home and bowed to Fang Yuan, asking him to accept their surrender.

Fang Yuan did not start a slaughter, he took in all of them, then led the army towards Soul Pacifying grotto-heaven.

However, Soul Pacifying grotto-heaven was a scene of desolation.

After Spectral Soul had possessed Lady Cold Ash's body, he had placed An Xun behind in Soul Pacifying grotto-heaven to take care of the logistics.

After the pursuit battle against Fang Yuan, only Fairy Zi Wei and Ying Wu Xie escaped among the Shadow Sect members. After Fairy Zi Wei escaped, she immediately contacted An Xun and ordered him to flee.

An Xun fled, but naturally not with empty hands. Besides emptying out almost all the storage, he even detonated the qi harvest fruit before leaving, causing Soul Pacifying grotto-heaven to suffer severe damage.

The remaining Gu Immortals of Soul Pacifying grotto-heaven had just patched up the holes and not even rested for a few days when they were faced with Fang Yuan's army.

Against Fang Yuan's army, Soul Pacifying grotto-heaven did not have any strength to fight back and was conquered almost instantly.

The remaining Gu Immortals of Soul Pacifying grotto-heaven were led by An Chong. These people's souls were not tampered by Spectral Soul and they had fought An Xun before he left, they were all injured to some degree.

Fang Yuan did not reject anyone and took them in as well.

Now, it was time to create a new agreement.

Fang Yuan learned from his previous lesson, he did not establish a connection with other subordinates and let his clone Wu Shuai take his place.

This way, even if a powerful enemy captured these subordinates in the future, they could only deduce Wu Shuai's position through the clue from the agreement. Fang Yuan's main body would be secure.

Now, Fang Yuan had completely taken over the variant human alliance!

But this was not enough.

The qi harvest fruits in many two heavens' grotto-heavens had already become extremely large and were at the point of self-detonating.

Fang Yuan first went to Grand Swine grotto-heaven.

Under all the immortals' gazes, Fang Yuan raised his hand and released white light. The white light lingered around the huge qi harvest fruit and turned into vast fog.

The fog blocked investigative methods. Fang Yuan was still not assured, he ordered the immortals: "Get back, don't use any Gu worms or you might disturb my method."

The immortals obeyed.

White fog spread and shrouded Fang Yuan's main body, outsiders were unable to tell what was going on inside.

Fang Yuan opened his sovereign immortal aperture, from which the Qi Sea clone flew out.

The Qi Sea clone went up to the qi harvest fruit, his eyes glowed like he had seen the most exquisite delicacy.

The Qi Sea clone stabbed his hand deep into the qi harvest fruit and used his qi path method.

Immortal killer move — Qi Jue Revival!

Fang Yuan had learned Demon Immortal Qi Jue's qi harvest fruit revival method and modified it to create this method. He had used this move to create the Qi Sea clone previously.

Under the killer move Qi Jue revival, the qi harvest fruit started to shrink, turning into large amounts of qi path dao marks that were directly added to the Qi Sea clone's body.

"After devouring this fruit, I will gain about sixty thousand qi path dao marks." Qi Sea Ancestor estimated with a joyous tone.

This amount was very impressive!

On average, an ordinary grand tribulation gave about seven thousand dao marks, while an ordinary myriad tribulation gave about eighty thousand.

If it were just grand tribulations, a qi path Gu Immortal needed to undergo eight or nine grand tribulations approximately to accumulate sixty thousand qi path dao marks. (The new dao marks from the grand tribulation included dao marks of the Gu Immortal's main path as well as some dao marks of other paths.)

From another perspective: As long as Qi Sea Ancestor absorbed this qi harvest fruit, it was like passing half a qi path myriad tribulation without any risk!

So, Qi Sea Ancestor could make enormous gains by absorbing the qi harvest fruits.

Fang Yuan inwardly estimated: "The Qi Sea clone was made from Heavenly Court's qi harvest fruit, he possessed over eight hundred thousand qi path dao marks the moment he was born. After absorbing three qi harvest fruits like this one, the amount will cross one million. My own qi path dao marks is also at this level. When the Qi Sea clone absorbs all the qi harvest fruits in the two heavens' grotto-heavens, his qi path dao marks will surpass mine and accumulate to an unprecedented level!"

Fang Yuan's one million qi path dao marks were obtained from annexing Qi Sea grotto-heaven. The Qi Sea clone was starting anew and accumulating by himself. But by relying on the killer move Qi Jue revival and the qi harvest fruits, his accumulation speed became truly terrifying.

Clearly, for a long time from now on, the Qi Sea clone would become Fang Yuan's number one clone. Based on just battle strength, he would not be lower than the main body, and might even be stronger!

There were many factors that influenced a Gu Immortal's battle strength, for instance the Gu Immortal's individual battle attainment, the battle environment, the level of the Gu Immortal's Gu worms, killer moves, Gu formations, Immortal Gu Houses, and whether the Gu Immortal had an excellent combat system or not.

But the top of these factors would always be the Gu Immortal's cultivation level!

One thousand dao marks could grant a hundred percent amplification.

Besides freaks and monsters like Fang Yuan, Feng Jiu Ge, and the past venerables, on average: rank six Gu Immortals had zero to nine thousand dao marks. Rank seven Gu Immortals had ten thousand to thirty thousand. Rank eights had one hundred thousand to three hundred thousand.

So, the gap between the battle strength of rank seven and rank eight far surpassed the gap between rank six and rank seven. The gap between the latter stages of Gu cultivation would become increasingly bigger. Until they reached rank nine Gu venerable level where an individual could become invincible in the world, dominating everyone and everything.

Why was Northern Plains' Old Ancestor Xue Hu was the number one rank eight in Northern Plains' Gu Immortal world?

He was from the demonic path and lacked suitable Immortal Gu. The main reason was his ice and snow path dao marks far surpassed ordinary numbers.

"According to your estimation, how many dao marks does Demon Immortal Qi Jue have?" Inside the endless white fog, Fang Yuan asked the Qi Sea clone.

Qi Sea clone absorbed the qi harvest fruit while replying: "Maybe over five hundred thousand."

Fang Yuan nodded in agreement.

From the various traces in battles, Demon Immortal Qi Jue's dao marks were slightly lower than Duke Long's. It was very likely because of Fang Yuan and the Southern Alliance disturbing the revival process and causing Demon Immortal Qi Jue to hasten it.

But Demon Immortal Qi Jue had Xi Land.

Xi Land was a secluded domain of heaven and earth!

A complete secluded domain of heaven and earth was a rank nine level immortal material.

So, as long as the qi path killer moves used Xi Land as the core, they would gain terrifying strength, even Spectral Soul could not face them easily.

This was similar to how Fang Yuan had once used reverse flow protection seal to leave a group of enemies without options.

Demon Immortal Qi Jue's killer moves were outdated and he lacked Immortal Gu, the two pillars that allowed him to have pseudo venerable battle strength were dao marks and Xi Land. After Xi Land was damaged, his battle strength fell sharply and he was finally imprisoned by Divine Emperor City.

The Qi Sea clone fully absorbed the qi harvest fruit and returned to the sovereign immortal aperture.

Fang Yuan withdrew the endless fog, the alliance members rejoiced when they saw the qi harvest fruit was completely gone.

"We are saved, our homes are saved!"

"As expected of Lord Fang Yuan, he is truly unfathomable and all-powerful!"

"Lord Fang Yuan, my home is in imminent danger, please save it first."

All kinds of flatteries were thrown at Fang Yuan.

Although not even a few of these Gu Immortals were good at fighting, their boot-licking skills were deep and improving day by day.

Fang Yuan then smoothly annexed this Grand Swine grotto-heaven and merged it into Sovereign grotto-heaven.

Grand Swine grotto-heaven was a rank eight transformation path grotto-heaven, it produced boar type desolate beasts, ancient desolate beasts, and even immemorial desolate beasts.

Fang Yuan's transformation path attainment level was at great grandmaster, he naturally could annex it.

Why did he not annex it before?

It was naturally because this Grand Swine grotto-heaven had fused with a nine heavens fragment and had taken in heaven path dao marks, which invaded the heavenly spirit and caused it to become powerless and dull.

Fang Yuan could now refine heaven path dao marks, expanding the 'food option' of sovereign immortal fetus Gu. From now, all grotto-heavens could be annexed by Fang Yuan, even if they had fused with a nine heavens fragment. (As long as the corresponding attainment level was sufficient.)

[Reverend Insanity](#)

Chapter 2072: Easily Creating Killer Moves

2072 Easily Creating Killer Moves Fang Yuan began to create compound killer moves once again.

His divine sense was inside the sovereign immortal aperture, observing all sorts of mortal Gu.

He casually took out two wind path Gu worms from them.

Rank one clear wind wheel Gu and rank two jade wind wheel Gu.

When the former was activated, it would create a light green cyclone below each of the Gu Master's feet and increase their movement speed.

The latter was one of the possible advancements of clear wind wheel Gu. It could form a pair of jade green cyclones which circulated around the Gu Master's arms like armbands, and could increase the Gu Master's punching speed.

"I currently lack movement abilities in a large fight, why not use this as a base to create one?" Fang Yuan had an inspiration and fell into contemplation.

Ever since he fought the Qi Sea clone in immemorial two heavens, he had been thinking of this aspect.

Although it was a show to trick Eastern Sea's righteous path and the variant human alliance, Fang Yuan had truly fought with the Qi Sea clone.

If it were not real, how could there have been such terrifying phenomena? That fight had even cracked the sky and caused the powder of the heavens to scatter down!

In this friendly spar, Fang Yuan had used all kinds of killer moves, most of them put up an excellent performance. Even the worst ones were at ordinary level, at least their performance was up to par, there was neither surprise nor disappointment.

This spar made Fang Yuan understand his deficiency. Although he had already created many compound killer moves, they were mostly offensive or defensive methods, he lacked movement killer moves.

The two wind path Gu worms gave Fang Yuan an inspiration.

In his conceptualization, when he activated the wind path Gu worm, two cyclones would condense below his two feet and they would continuously rotate like two wheels. As long as some time passes, the wheels would rotate increasingly faster and thus increase Fang Yuan's speed continuously.

"Let me see how many wind path Immortal Gu I have."

Fang Yuan had very few wind path Immortal Gu on him, but the large battle earlier provided him many wind path Immortal Gu.

The variant human alliance members also had some.

If it was still not enough, Fang Yuan could also extort the whole of Eastern Sea's righteous path and demand wind path Immortal Gu.

Fang Yuan had too many options!

Soon, Fang Yuan obtained several wind path Immortal Gu from his subordinates and they were all of rank seven level.

After pondering over it and trying out many wind path Immortal Gu as well as referencing wind path killer moves, the initial form of Fang Yuan's wind path killer move was created.

After the first activation, two cyclone wheels formed under both feet which could move the Gu Immortal's body.

Fang Yuan frowned slightly after testing the killer move, he felt its greatest flaw.

Although this killer move would become increasingly faster, its initial speed was too slow and it would need some time for it to show even a slight improvement.

How to improve it?

This was actually a common issue with wind path killer moves. Be they a gentle wind or fierce gale, they both needed some time to reach their strongest state.

But there were naturally many methods to push their strength to the maximum at the very start. If one's wind path attainment level was high enough, the killer moves could be modified to be extremely exquisite. They could also sacrifice a lot of time to prepare the killer move in advance and let it erupt at once. It was also possible to expend much more immortal essence to increase the strength.

However, Fang Yuan threw these methods to the back of his mind!

Because those were all ordinary solutions.

Fang Yuan targeted fire path instead.

Fire path's explosive strength was far beyond wind path. Based on just burst potential, fire path was at the top one or two among all paths.

After choosing several suitable fire path Immortal Gu, this compound killer move's modification was completed!

"Let's name it fire-wind wheel." Fang Yuan casually chose a name.

The killer move fire-wind wheel had burst speed and could also become increasingly faster, the crucial points were that it consumed little immortal essence and also did not need much mental control.

Fang Yuan tried it once again and was rather satisfied with it. Fire-wind wheel was a rank seven killer move, but was at an extraordinary level that trampled upon at least seventy percent of all existing killer moves!

However, it would be a different situation if this killer move were in the hands of other Gu Immortals.

Almost no Gu Immortal with a clear mind would use it. Based on just the internal friction between wind path and fire path, this killer move's practical results were lowered to rank six level.

Expending immortal essence for a rank seven killer move but getting rank six effect. This killer move would be lower than low grade in other Gu Immortals' evaluation.

This was the advantage of over three thousand heaven path dao marks.

It greatly reduced the internal friction between different dao marks, giving hope to many killer moves in Fang Yuan's hands.

Most importantly, the difficulty of deducing compound killer moves had fallen greatly for Fang Yuan!

If they were ordinary Gu Immortals who primarily cultivated wind path and were to conceptualize a killer move like fire-wind wheel, they definitely would not foolishly choose to use fire path Immortal Gu as another core. At most, they would use some other paths' low rank Immortal Gu as supplementary, and the quantity would be few as well.

The most common result would be to use countless fire path mortal Gu to reduce the internal friction as much as possible. But with this, the killer move would include too many Gu worms; the difficulty of its activation would soar, the concentration required would increase, and the overall value of the killer move would also fall.

For a killer move to be practical, there could not be too many Gu worms, the immortal essence burden could not be too heavy, the effect had to be good, and there could not be an obvious flaw.

So, creating a killer move was an extremely difficult project!

But for Fang Yuan, he could conceptualize compound killer moves with not only dual cores, but three cores, four cores, and more. Wind path did not have burst potential, so he casually chose fire path.

Single path killer moves had limited space for modification.

Compound killer moves were even more so, because they had to consider internal friction, which caused the number of compound killer moves in history to be far fewer than single path killer moves.

Single path killer moves had always been orthodox, they were the most mainstream!

But Fang Yuan's current situation was completely different.

Because of the great reduction in internal friction, he had much more room than ordinary Gu Immortals when creating and modifying killer moves. In his situation, the more paths there were in this world, the lower the difficulty of conceptualizing killer moves!

Because of this, Fang Yuan could rapidly create a large amount of compound killer moves in a short period of time.

He had countless Gu recipes and killer moves, so even if his wind path and fire path attainment levels were not high, he could find references and easily conceive a killer move like fire-wind wheel!

When he sparred with the Qi Sea clone before, Fang Yuan used killer moves like sword feather bladewing, heartache crying blood, thunder note stream, and refinement butterfly. They were only a small portion of the outstanding ones in his collection.

Three thousand heaven path dao marks might be few but they truly opened up a brand new world for Fang Yuan!

Since ancient times, countless heroes and experts had only lightly dabbled in this new world. They could only explore a few steps before they were forced to halt helplessly.

But with the help of heaven path dao marks, Fang Yuan made over ten steps, or even one hundred steps, easily obtaining an unprecedented achievement.

“Heaven path is all-encompassing and emphasizes balance of all beings, it is truly wondrous beyond words!” Over the next few days, Fang Yuan secretly created and modified compound killer moves, while leading Qi Sea Ancestor and Wu Shuai to clean up every grotto-heaven.

Most of the qi harvest fruits of the variant human alliance members were devoured by Qi Sea Ancestor, while some were left behind to grow in the grotto-heavens.

Fang Yuan annexed three rank eight grotto-heavens: transformation path Grand Swine grotto-heaven, time path Time Difference grotto-heaven, and rule path Novelty grotto-heaven.

The three grotto-heavens were rich in resources and had deep foundations. They were located on the nodes of heaven veins and had been taken care of by heaven’s will for many years.

Fang Yuan made ample arrangements. He split up these three grotto-heavens and placed them all over the sovereign immortal aperture.

For instance, Grand Swine grotto-heaven’s two super resource points were rolling fall cliff and pin tree snowfield.

Rolling fall cliff was home to a large number of desolate beast jumping pigs. These desolate beasts did not know how to walk and could only jump. When they grew to a certain size and their bodies were fattened enough, they would move to the tallest cliff and jump down.

A majestic waterfall flowed down the cliff. The water of the waterfall was boiling, containing endless fire path and water path dao marks, creating hot steam all year round.

When jumping pigs jump into the boiling waterfall, ten percent of them would die from the corrosion of fire and water path dao marks, while the remaining ninety percent would receive severe burns as well as bone fractures from the fall, barely surviving.

But as long as these jumping pigs survive, they would breakthrough to become deadly fat pigs!

Deadly fat pigs were not desolate beasts, their life essence had broken through to another level, becoming ancient desolate beasts.

Rolling fall cliff had an impressive number of deadly fat pigs and jumping pigs. The scale of the deadly fat pigs produced every year was number one in five regions and two heavens!

And pin tree snowfield was home to grand swines. The grand swine was an immemorial black pig, even its bones were black. Its body was as large as a mountain and its movement was slow.

Pin tree snowfield was extremely vast. Fang Yuan put it in Mini Northern Plains, increasing the area of Mini Northern Plains by twenty percent.

There were over five hundred grand swines of all sizes and ages.

Fang Yuan had all of a sudden become the largest pig farm owner in the world!

As for Time Difference grotto-heaven and Novelty grotto-heaven, they each had one super resource point.

Fang Yuan's sovereign immortal aperture had suffered severe losses due to the myriad tribulation. But annexing these three grotto-heavens immediately showed an improvement, the development of the grotto-heaven even increasing to twenty-five percent!

This development was slightly higher than before the myriad tribulation.

Previously, the sovereign immortal aperture only had one super resource point, it was Dang Hun Mountain which produced guts Gu. Next was the dragonfish resource point, which Fang Yuan had invested a lot into and grown to a giant resource point.

On one hand, Fang Yuan's management of the sovereign immortal aperture involved seizing grotto-heavens like Hei Fan grotto-heaven and Qi Sea grotto-heaven, but how could these two grotto-heavens have the security of the variant human alliance's grotto-heavens! Heaven's will was even taking care of the latter.

On the other hand, Fang Yuan's management also included creating eerie fire dragon python, sand gull soil, and Five Light Mountain. They were all at the initial phase and the investment in them was also little, their growth could not compare to the resources in the variant humans' grotto-heavens.

Finally, Fang Yuan also focused on raising humans and variant humans but did not put his energy in investing resources on them.

After annexing, the follow-up arrangements were extremely diverse and numerous, Fang Yuan handed these to the humans and variant humans in the immortal aperture to deal with.

He started on refining the heaven path dao marks contained in these grotto-heavens!

As for Qi Sea Ancestor, he returned to Qi Sea.

Xia clan's surviving Gu Immortals were all in qi sea and cried tears of joy when they saw Qi Sea Ancestor.

Qi Sea Ancestor was still alive, this was the greatest news!

Eastern Sea's large and super forces had sent representatives to station in qi sea. The moment they received this news, they also let out sighs of relief.

Without Qi Sea Ancestor, they simply had no way to deal with Fang Yuan.

"This defeat is my fault." Qi Sea Ancestor took the responsibility, "Cough cough cough."

"Don't say that, Ancestor! It was my Xia clan who conceived the plan to attack the variant human alliance."

"Sigh, I am too ashamed to face those comrades who died in combat..." Qi Sea Ancestor looked up and sighed, his eyes were slightly red.

"Qi Sea Ancestor, please heal your injuries for now. Tell us whatever resources you need, the whole of Eastern Sea will support you with all our strength!" Eastern Sea's Shen clan Gu Immortal spoke, other super forces' representatives also nodded with no objection.

Under everyone's gaze, Qi Sea Ancestor coughed a mouthful of blood and sighed: "The important thing now is not my injury. Many of those in the two heavens who sided with me still have the qi harvest fruit problem in their grotto heavens. I need to get rid of these qi harvest fruits first!"

The immortals were immediately moved, the eyes of many Gu Immortals of the two heavens turned wet with tears.

"Qi Sea Ancestor, you are truly worthy of being the role model of Eastern Sea's righteous path!"

"Lord Ancestor, we, the two heaven's Gu Immortals, will follow your lead without question!!"

[Reverend Insanity](#)

Chapter 2073: Enthusiastic Cultivation

2073 Enthusiastic Cultivation Sovereign immortal aperture, Mini Central Continent.

A new time path immortal formation's activation had reached a crucial point.

"Go." Fang Yuan willed, a large lump of cactus honey shot into the formation.

This was a rank eight time path immortal material.

At the next moment, profound light erupted and turned into countless light specks, which then spread rapidly like silver-white fireworks.

The light specks dissipated rapidly without any indication, as if the formation that Fang Yuan had constructed with great effort had completely failed.

However, when Fang Yuan used his investigative killer move, he saw the phantom image of a pool in midair. This pool was similar to a year essence pool but it was not big, only about ten percent of the size of a year essence pool.

Fang Yuan observed for a while before nodding in satisfaction, this formation arrangement was a success.

With a thought, he opened the rank eight year essence pool in the mini nine heavens. A tributary of the River of Time flowed down and gathered into the newly constructed sub-pool.

When the water of the River of Time in the sub-pool had accumulated to a certain level, it started to operate on its own. The river water passed through the bottom and poured onto the ground below.

At the bottom of the year essence sub-pool was an area of white fog. The fog covered a marsh which had a large number of desolate plants — extreme marsh flowers.

Some of these flowers were in the shape of an erect bud that was the size of a house. Some were blossomed and looked like a trumpet with their petals connected, and strands of white mist constantly spread towards the outside from the pistil of the flowers.

This was the flower mist extreme marsh that Fang Yuan had constructed meticulously.

Rank eight Immortal Gu Regret's food was the fresh extreme marsh flower mist.

Under the irrigation of the tributary of the River of Time, the whole flower mist extreme marsh's time was sped up. The water of the River of Time continued to spread over the surroundings, but walls of blue translucent light appeared around the flower mist extreme marsh.

As such, the time acceleration was only limited to the range within the walls.

"Success, it can even be said to be perfect." Fang Yuan inspected several times and was greatly satisfied when he found no issues.

Fang Yuan had obtained the method of the light blue translucent walls from Time Difference grotto-heaven.

Time Difference grotto-heaven's large resource points were all like this, encapsulated by walls of light, the rate of time inside was many times faster than other areas. Thus, Time Difference grotto-heaven had an outstanding production of time path resources.

Fang Yuan added the year essence pool on top of the original foundation, every sub-pool was in charge of regulating the time of a time path zone. The rank eight year essence pool was the main dam and these year essence sub-pools were secondary dams. The tributary of the River of Time drawn from the River of Time was first gathered into year essence pool and its largest distributary was spread over the whole immortal aperture, while many sub-distributaries gathered into secondary dams and sped up the production of the resources.

Like this, Fang Yuan's resource production was accelerated by over ten times!

Naturally, this method was not just used to speed up the resource production, it could also be used on Gu worms.

When the Gu worms were placed in a slowed time path zone, their food requirement would fall sharply.

This method showed minimal effect in other Gu Immortals' hands, the reason was simple — dao mark conflict. The time path zones were a time path method in essence, if they were used on Gu worms of other paths, the higher their rank, the lower the effect they would have on them.

Fang Yuan possessed heaven path dao marks which could reduce internal friction. After he attempted this method, he found the effects were quite wonderful.

On one hand, it could reduce the food requirement of the Gu worms; on the other hand, it could increase resource production. The issue of food for Gu worms was resolved before it even became a problem.

Qi Sea Ancestor left, but Fang Yuan was not idle during these few days.

The blessed lands left behind by the dead Eastern Sea Gu Immortals were almost all annexed by him.

And regarding the two heavens' grotto-heavens, Fang Yuan intended to leave them alone for the moment.

First, the sovereign immortal aperture needed food and had to annex a grotto-heaven once in a while, it could also reset the countdown of calamities and tribulations, which allowed Fang Yuan to make arrangements flexibly.

Secondly, grotto-heavens were like flower pots that were growing the qi harvest fruits. Although there was not a big hope, if the qi harvest fruits could continue to grow, it would not only be a suppression towards the variant human alliance members, it could also nourish the Qi Sea clone.

As for the three grotto-heavens that Fang Yuan annexed before, they were necessary.

Fang Yuan urgently needed to replenish his immortal essence.

The efficiency of using immortal essence stones was too low in replenishing rank eight immortal essence, the main source was self-production.

But the immortal aperture's immortal essence production depended on the immortal aperture origin core. And whether the immortal aperture origin core was strengthened or not, it depended on the immortal aperture's development.

To increase the development, Fang Yuan had to annex those three grotto-heavens.

The fate war had consumed a large amount of Fang Yuan's immortal essence reserves. Afterwards, Fang Yuan did not have any time to rest, he ran around many places during the qi tides, searching for a way to deal with heaven path dao marks. After finding the method, Fang Yuan entered Heavenly Court, which immediately started the pursuit battle.

Over this period of time, Fang Yuan had fought too many battles and almost all the battles were against strong enemies who were at the peak of the Gu Immortal world.

By now, Fang Yuan's immortal essence reserves had already fallen below the warning line, he needed to rest and recuperate and could not fight anymore within a short period of time!

"Fortunately, I seized the year essence pool and have plenty of time path methods that are able to speed up my immortal aperture's time flow to the limits. Otherwise, my immortal essence would have already been exhausted."

“Such a pity that I don’t have rank eight Heavenly Essence Treasure Imperial Lotus, otherwise I would not have to be worried about this.”

Heavenly Essence Treasure Imperial Lotus could produce rank eight immortal essence, its owner, Genesis Lotus Immortal Venerable, had been the venerable with the largest immortal essence reserves! Since Genesis Lotus Immortal Venerable began his cultivation, he seemed to have never had to worry about primeval essence or immortal essence. On the contrary, his enemies would often fall into the awkward situation of using up all their primeval essence and immortal essence when fighting Genesis Lotus.

Fang Yuan lacked immortal essence currently and it was delaying his recovery.

To explore dream realms, he needed immortal essence.

To cultivate soul path, he needed immortal essence.

He had lost many of his Immortal Gu and they needed to be refined. He had many low ranked Immortal Gu which needed to be upgraded. The injured Immortal Gu needed to be repaired using refinement path methods, which also required immortal essence.

Because of the lacking immortal essence, he had to reserve the final bit of it for any unexpected situations, so Fang Yuan could only put these tasks aside for the moment.

Only because the difficulty of creating compound killer moves was very small, he was able to barely manage it. Testing new killer moves no doubt required immortal essence, but it was within an acceptable range.

Besides accumulating immortal essence and deducing compound killer moves, Fang Yuan was relocating resource points as well as sorting out the immortal materials.

The resource points of the two heavens’ grotto-heavens that could be moved were all relocated by Fang Yuan. After all, these grotto-heavens were in the immemorial two heavens, they had to defend a vast area and would not be able to defend against enemy attacks in time.

The countless immortal materials were sorted out and stored in several storages within the sovereign immortal aperture. Fang Yuan imitated Heavenly Court and constructed several large disclosed storages as well as several highly valuable hidden storages.

The variant human Gu Immortals enjoyed the favor of heaven’s will and were truly rich.

Among the resources, wood path immortal materials were most abundant. Because Xiao He Jian and Green Forest Great Sage were minimen, besides them, there were also two wood path grotto-heavens.

There were naturally many immortal materials of other paths as well, but what gave Fang Yuan a pleasant surprise was he was able to get luck path immortal materials, and at an astonishing scale at that!

For example, luck path ancient desolate beast rolling cat, after collecting all of them, Fang Yuan discovered he had gathered dozens.

This small cat was extremely exquisite and could roll around on an adult’s stretched palm.

The rolling cat looked extremely endearing with its snow white fur, tender claws, and large shiny black eyes. Its purring sound was also extremely delicate, meow meow meow.... the listener's heart would go wild.

There was also lucky jade, this was a rank eight luck path immortal material. It let out dazzling light from time to time and contained a dense number of luck path dao marks.

Tooth gap water was another luck path material. It looked no different from ordinary spring water, but if one drank it, it would get stuck in the gaps between teeth; it was not only extremely unpleasant, it even reduced the Gu Immortal's luck sharply.

"The variant human alliance does not have anyone cultivating luck path. But these people were able to develop a utopia away from the rule of humanity, they secluded themselves from the world and propagated, their luck naturally would be high. Let alone when they have the favor of heaven's will!" Fang Yuan carefully pondered, it made sense to gain these luck path immortal materials.

These luck path immortal materials were highly valuable to Fang Yuan and they came at the right time.

Because he needed to advance many luck path Immortal Gu but had only raised the rank of Cooking Luck Pot. Cooking Luck Pot's rank was somewhat too low for the current Fang Yuan.

Fang Yuan estimated he would earn a large amount of immortal materials and even Immortal Gu in the future.

Because those Eastern Sea Gu Immortal captives were still locked in the sovereign immortal aperture!

Fang Yuan's extortion letters were already sent to every large force of Eastern Sea.

After the heads of Eastern Sea's righteous path received the extortion letters, they sent them to Qi Sea Ancestor, hoping to listen to his opinion and ask him to decide.

Qi Sea Ancestor had just finished running around all the two heavens' grotto-heavens that had allied with him and absorbed all of the qi harvest fruits.

Currently, his qi path dao marks had broken through two million!

In less than half a month, the Qi Sea clone's strength rose explosively at a shocking rate.

The Qi Sea clone did not publicize and hid it for the moment, he would hide it however long he could.

"If those remaining qi harvest fruits could grow up again, it would be better." Qi Sea Ancestor secretly hoped, but he knew there was not much chance of this happening.

The qi harvest fruits were produced because of qi tides. Almost all the grotto-heavens were sitting on heaven veins, so they had major issues with this.

In the pursuit battle against Fang Yuan, the five regions' qi tides showed no movements, which signified the merging of the five regions' qi was near completion.

Qi Sea Ancestor was also pondering about his own cultivation.

He did not lack dao marks nor immortal essence, but killer moves.

Qi Sea Ancestor only had few presentable killer moves. Although he obtained Primordial Origin's true inheritance, Heavenly Court was too familiar with the killer moves in it and they needed to be modified.

Qi Sea Ancestor's ambition naturally was not limited to just this.

He wanted to create his own combat system!

His killer moves alone could bully some rank eight experts or the weaker pseudo venerables. But when facing people like Spectral Soul and Duke Long, he needed an excellent combat system.

The main factor that influenced a Gu Immortal's strength was cultivation level. But killer moves, Immortal Gu, immortal essence, favorable conditions, and so on also were influencing factors. For instance, special killer moves like reverse flow protection seal could allow the Gu Immortal to bypass ranks in battle. A combat system was also one of the factors.

To most Gu Immortals, a combat system was not necessary. Because the mentioned factors were enough to create a difference in battle strength and decide victory or defeat.

But to Fang Yuan and Qi Sea, a combat system was a must.

Because when cultivation level, killer moves, Immortal Gu and other common factors could not decide victory or defeat, it would depend on who had a mature and more outstanding combat system.

Fang Yuan's extortion letters made a round before finally arriving at Qi Sea Ancestor's desk.

Qi Sea Ancestor did not even take a glance at them, because he was aware of the content.

"My injuries are not light, I need to recuperate in closed cultivation." Qi Sea Ancestor's one sentence made Eastern Sea's righteous path lose the will to resist Fang Yuan. Even Qi Sea Ancestor did not stand up, who else could resist Fang Yuan?

Pay the immortal materials obediently to get back their clans' Gu Immortals?

Qi Sea Ancestor spoke once again: "I have already contacted Heavenly Court, maybe they will send their troops to reinforce us."

The Eastern Sea righteous path Gu Immortals felt complicated emotions and could not say anything.

After all, Qi Sea Ancestor was 'heavily injured' and he even contacted Heavenly Court for them, he did not act indifferent towards them.

As a lone cultivator who sided with the righteous path, Qi Sea Ancestor had already done what he could!

As for those Xia clan Gu Immortals, they rested and recuperated inside the Qi Sea formation. Their first supreme elder was already killed by Fang Yuan, the remaining few Gu Immortals became much more obedient.

They had been anything but obedient before, especially when the variant human Gu Immortals escaped from Central Continent. These Xia clan Gu Immortals had been extremely happy and thought the chance to regain their home had come.

The result...

The result was, the Qi Sea clone went along with and made use of their plan, their last Immortal Gu House was dismantled, their first supreme elder was killed.

Reverend Insanity

Chapter 2074: Contribution Board

2074 Contribution Board Eastern Sea, Hot Springs blessed land.

Ever since Fang Yuan subdued the variant human alliance, he had been in closed cultivation within Xia clan's headquarters.

And the dragonman clone Wu Shuai was representing him in handling the alliance's daily affairs.

"I have taken note of your contributions, you may leave now." Wu Shuai's voice rang in the hall.

"This subordinate takes his leave."

At the next moment, the palace door opened and two miniman Gu Immortals flew out; they were Xiao He Jian and Green Forest Great Sage.

After leaving the palace, the respectful expressions on their faces disappeared and were replaced by grief and helplessness.

The reason the two immortals were summoned was because Fang Yuan had taken a fancy to their wood path Immortal Gu.

Under Wu Shuai's persuasion, the two immortals could only offer their wood path Immortal Gu.

Green Forest Great Sage transmitted his voice that was filled with anger: "Lord Xiao, what do we do now? My forest Gu is the core for many of my killer moves, I have lost almost all my battle strength without it."

Xiao He Jian's expression was unsightly as well: "Hmph, you only lost rank seven forest Gu, I had to offer rank eight Gu myself."

The two naturally were not willing to contribute, but the situation was beyond their control, what could they do about it?

In fact, this situation had been happening often recently. Alliance members were all furious but did not dare to revolt.

"The list has been published!" Suddenly, an excited voice reached the two miniman Gu Immortals' ears.

The two immortals changed direction and arrived in front of an information path mortal Gu House.

There was a list pasted on this mortal Gu House, and there were two large words written at the top: Contribution Board!

Looking below that, Xiao He Jian was listed at the top, his contribution points as high as four digits. As for Green Forest Great Sage, although he was not among the top three, he was top ten as well.

Green Forest Great Sage became slightly happier: "Lord Xiao, look, you are in first place! Alliance Leader did not deceive us, he really remembered our contribution to the alliance."

He was depressed earlier, but now his mood had gotten much better.

Xiao He Jian snorted while commenting in his head: "This is just an exploitation method of the higher ups! I did not expect this demon Fang Yuan to have such political skills as well."

"Sigh, I don't have such indomitable strength like his and my headquarters still have the qi harvest fruit. In the current situation, what else can I do other than follow Fang Yuan?"

Xiao He Jian had outstanding strength and was not any weaker than a Heavenly Court expert. Unfortunately, even with his strength, he could only lower his head in front of Fang Yuan.

He was not willing to do so, but what could he do?

Circumstances often gave people no choice!

"Contribution board?" Soon, Ice Crystal Immortal Monarch and the rest also learned of this significant news.

"Over this period of time, alliance members were frequently summoned and pressured to offer Immortal Gu. Even Xiao He Jian was not exempted, what should I do?" Ice Crystal Immortal Monarch was worried.

"My name has not appeared on the contribution board, this is not a good thing as a vice alliance leader." Ice Crystal Immortal Monarch was feeling somewhat anxious.

But he was reluctant to part with his ice and snow path Immortal Gu.

"If so, I need to gather a batch of immortal materials and offer them. I have to be among the top on the contribution board!" Ice Crystal Immortal Monarch soon made up his mind.

Naturally, Fang Yuan could force all of his subordinates to hand over their Immortal Gu. But this action would be too unsightly. The tiny bit of unity gathered would dissipate. If this happened, Fang Yuan's previous efforts would have somewhat been in vain.

Although Fang Yuan was a demonic overlord, he was also deeply aware of the righteous path's tricks.

Putting up a contribution board could ease many conflicts and could also stimulate the enthusiasm of others.

Naturally, it was still the same in essence, the strong were exploiting the weak!

On the very day Fang Yuan put up the contribution board, a major event happened on Qi Sea's end as well.

The Gu Immortals of Eastern Sea's righteous path had gathered in the hall and appointed Qi Sea Ancestor as the alliance leader of Eastern Sea's Righteous Qi Alliance!

Fang Yuan led the variant human alliance which became a huge threat to Eastern Sea's super forces. Especially the miserable defeat not long ago, it had increased the wariness and worry of Eastern Sea's large forces regarding Fang Yuan's force.

Facing the bullying of the strong, the weak naturally had to work together.

Forced by Fang Yuan, every super force's intention to unite had never been so strong!

As for the alliance leader's position, there was no space for competition. All the clans jointly appointed Qi Sea Ancestor. Only Qi Sea Ancestor, who had pseudo venerable battle strength, could openly face Fang Yuan.

The Qi Sea clone did not pretend to be modest, this situation was within his expectations.

"Since I am the Righteous Qi Alliance's alliance leader, I will give commands for the overall situation, I hope everyone will not merely pretend to obey the orders." Qi Sea Ancestor said solemnly.

"We don't dare to." Eastern Sea's righteous path immortals responded.

"There are three major tasks presently." Qi Sea Ancestor went into details, "First is the creation of an alliance storage, every clan has to offer a certain amount of resources, including not only immortal materials, but Immortal Gu recipes, immortal killer moves, and so on."

"The second task is to immediately create a contribution board and mission board. It will be fair and impartial, anyone who contributes to the alliance from now on will have their merits known to everyone. The Righteous Qi Alliance's affairs should be handled by people who are qualified to take on the tasks."

"The third task is that alliance members should help and protect each other. If there is a traitor, other members must ally to get rid of the traitor, there must be no conniving."

"Reasonable, very reasonable." The immortals agreed.

They all knew that they could only create the foundation of the alliance by doing this. Otherwise, the Righteous Qi Alliance would only exist in name and would be better off not established.

Qi Sea Ancestor held the first group discussion.

The first topic was regarding the exchange of true inheritances and the communication of geniuses across various clans. Some clans had many refinement path Gu Immortals, while some were strong in wisdom path. Such collaboration could truly strengthen the whole Righteous Qi Alliance's strength.

The second topic was a discussion on how to negotiate with Fang Yuan and get back the captured Gu Immortals.

All the clans hoped Fang Yuan could return the intact Gu Immortals with their immortal apertures. For this, they were willing to make a concession in terms of ransom.

The third topic was to contact Heavenly Court openly with the Righteous Qi Alliance's name, hoping to ally with Heavenly Court and establish an even stronger alliance army to exterminate Fang Yuan and the variant human alliance.

After receiving this information, Wu Yong pondered quietly in the study room for an entire afternoon.

Recently, Wu Yong got rid of the Fierce Gorge Seven Ghosts, increasing his reputation even more. However, soon afterwards, news of the fight between Fang Yuan and Qi Sea as well as the defeat of Eastern Sea's righteous path was spread all over the world.

The following developments made Wu Yong feel like they were too much to take in.

Eastern Sea had split into two large alliances which entered the stage of confrontation!

“Lord.” Wu Ba Chong sought an audience.

Looking at Wu Yong’s solemn expression, Wu Ba Chong knew of the situation and his tone became much more gentle.

The changes in Eastern Sea’s situation were a heavy strike to Wu Yong’s ambition.

Wu Yong had intended to invade Eastern Sea after uniting Southern Border. But now, Eastern Sea underwent a complete change, let alone the matter of two large alliances, Fang Yuan was openly occupying an area of Eastern Sea.

Wu Yong’s great plan that was just about to start was showing signs of failure already.

“Lord, do we still attack Mushroomman Paradise?” Wu Ba Chong asked.

Wu Yong’s gaze flashed, he was too familiar with Wu Ba Chong and asked directly: “What happened this time?”

Wu Ba Chong handed an information path mortal Gu.

Wu Yong received and browsed it.

He crushed the information path mortal Gu and slammed his fist on the desk. Bang, the brushes and papers were scattered everywhere.

“These cowards, scoundrels!” Wu Yong clenched his teeth, his gaze carrying a trace of malevolent light.

The information stated that a large number of Southern Border clans had secretly contacted Lu Wei Yin.

Their reason for doing this was clear.

Fang Yuan displayed the might of the number one demon in the world, which struck fear in these super forces!

They might not want to be directly affiliated with Fang Yuan, but not long ago, Lu Wei Yin had collaborated with Fang Yuan and ambushed Spectral Soul. So these super forces secretly contacted Lu Wei Yin to ally with him.

This was the way of survival for these super forces.

On the surface, they could not tolerate the existence of demon Fang Yuan, but secretly, there was communication between them. In case something happens in the future, there would be a trace of friendship and an opportunity to survive.

“Lord, demonic forces are rampant currently. Since lord has the great ambition of uniting the world, why not endure for some time and wait for a good opportunity?” Wu Ba Chong persuaded.

Wu Yong fell into silence.

He was aware of his plan and knew its pros and cons very well.

In the Gu world, strength ruled above all! In ancient times, Primordial Origin Immortal Venerable led humanity in overthrowing the rule of the variant humans. And at present, pseudo venerables like Fang Yuan and Qi Sea Ancestor were leading the whole world. The result of their confrontation would influence the politics of all five regions.

An alliance of weaklings to fight the strong?

History proved that this would always end up badly!

The conflict of dao marks made numbers lose their advantage.

Since ancient times, it was not that no predecessors thought of putting effort in this aspect. Ancient battle formations and Immortal Gu Houses emerged at opportune timings, but what of it?

Look at the fate war, the main characters were Duke Long, Fang Yuan, Feng Jiu Ge and others. They were all Gu Immortals!

Even Demon Judgment Board, Dragon Palace, Di Zang Sheng and others only served as support.

Naturally, Wu Yong's plan was not making an alliance of weaklings to fight the strong.

He wanted to plunder enough resources through the alliance to increase his cultivation and battle strength to pseudo venerable and even venerable level!

Developing a force was only a method to grow stronger, it could gather resources and pressure enemies. In the end, everything depended on oneself.

Looking at the history of the five regions, super forces were no more than vassals of the strong. A super force's prosperity and decline was determined by the condition of their top experts.

After a long while, Wu Yong broke the silence and spoke: "Wu Ba Chong, your suggestion is reasonable. Alright, we will put off the attack on Mushroomman Paradise for the moment."

"We need to do several things now." Wu Yong said while tapping the desk with his finger.

"One, actively search and plunder all kinds of inheritances, strive to find venerable methods so that we can openly resist existences like Fang Yuan."

"Two, spread rumors boasting about Fang Yuan's strength, emphasize on the conflict between Fang Yuan and Heavenly Court, and try to make them fight each other."

"Three, secretly take part in internal affairs of other Southern Border clans. Assassination, instigation, temptation, no matter what methods are used, I want them to be more obedient!"

[Reverend Insanity](#)

Chapter 2075: Venerable Revival

2075 Venerable Revival Central Continent.

Flowing Silver blessed land.

"Spare, please spare me!"

“Retreat, she is demonic immortal Zi Wei! She is not someone we can fight.”

“Such bad luck, we just invaded and demonic immortal Zi Wei arrives!”

The Central Continent Gu Immortals sighed as they escaped everywhere in a hurry.

“Did I let you leave?” Fairy Zi Wei sneered, purple radiance spreading from her whole body.

The radiance shone upon half the sky, most of the Central Continent Gu Immortals died miserably, and only one escaped alive.

Fairy Zi Wei was a rank eight Gu Immortal and a wisdom path great expert. Against these rank six and rank seven Gu Immortals, she displayed absolutely despair-inducing battle strength.

After easily killing the Gu Immortals, Fairy Zi Wei waved her finger, the Gu Immortals’ souls were pulled to Ying Wu Xie.

“Master’s soul foundation will greatly increase once again after devouring them.” Fairy Zi Wei said with a smile.

Ying Wu Xie, however did not feel joy and was low-spirited: “Sigh, even if my foundation is stronger, so what? The main body is dead, I am merely a lingering split soul that is barely living.”

“Master, don’t lose spirit.” An Xun quickly persuaded, “I have brought almost all the soul path resources of Soul Pacifying grotto-heaven, they are food for your cultivation.”

During this period of time, An Xun had already joined with Fairy Zi Wei and Ying Wu Xie.

After urging Ying Wu Xie, An Xun said to Fairy Zi Wei: “Lady Zi Wei, did you intentionally let that transformation path Gu Immortal leave? Why did you do that? Are you hoping for him to bring in even more Gu Immortals?”

An Xun’s soul was tampered by Spectral Soul and had extreme loyalty towards Ying Wu Xie. He would object to anything that went against Ying Wu Xie’s benefits.

Right now, he was staring fixedly at Fairy Zi Wei with a questioning look.

Fairy Zi Wei sneered and did not respond.

Ying Wu Xie quickly lightened the mood: “If I am not wrong, that transformation path Gu Immortal should be Steel Rush Warrior. He is Fang Yuan’s subordinate, a Gu Immortal of Beast Calamity grotto-heaven. After the fate war, he has been drifting about in the outside world.”

An Xun frowned and felt indignant: “It was Fang Yuan who killed our master’s main body, he is our sworn enemy. There is even more reason not to let him leave!”

Ying Wu Xie sighed: “At present, Fang Yuan’s demonic might is overwhelming, he has completely subdued the variant human alliance and is occupying a region of Eastern Sea. When he fought Eastern Sea’s righteous path alliance, he displayed pseudo venerable battle strength and should have already broken free from the shackles of the heaven path dao marks. He is now calling his subordinates to return, do you think any super force will dare to block them? Even Central Continent’s ten great ancient sects are turning a blind eye to it.”

Fairy Zi Wei added: "Fang Yuan is crafty, despicable, sinister, and vicious. In his youth, he slaughtered his whole clan and relatives to increase his aptitude. He is cold and heartless, be it the fate war or the recent battle against Heavenly Court, he threw those subordinates away without any hesitation. Even if we killed this Steel Rush Warrior, can we inflict any loss to Fang Yuan?"

"Damn it!" An Xun clenched his fists as he realized: "This demon's dominance has been established, we cannot destabilize him indeed. Not only this, even killing his subordinates poses a huge threat should Fang Yuan decide to investigate it. Since this demon has already recovered his battle strength, why has he not gone to fight Heavenly Court?"

Fairy Zi Wei analyzed while looting Flowing Silver blessed land: "I have a suspicion, that is Fang Yuan's immortal essence reserves. It is very likely he lacks immortal essence currently. He may only have been putting up a front when fighting Qi Sea Ancestor, currently, he should be completely focused on recuperating."

"Are you sure?" An Xun's eyes shone: "Maybe we can make use of this!"

Fairy Zi Wei fell into silence once again.

Ying Wu Xie gave a bitter smile: "Do you know what our greatest gain in fighting with Fang Yuan is?"

"What?"

"It is that this person, Fang Yuan, can never be estimated with common sense. According to the previous battles' intensity and frequency, it is common sense for him to be lacking immortal essence now. But no one knows how many methods he has, how many venerables have provided resources for him, what miraculous methods he has brought back from his rebirth. Even my main body fell to his trap, it was not easy for us to escape, it is better if we don't try to provoke him." Ying Wu Xie explained.

Fairy Zi Wei frowned, Ying Wu Xie's words did not upset her, instead she felt somewhat worried about Ying Wu Xie's morale.

Fang Yuan showed astonishing performances so frequently that Ying Wu Xie was now filled with fear. This was not the disposition of the grand Spectral Soul!

Ying Wu Xie was not just a split soul of Spectral Soul, he was the master whom Fairy Zi Wei and An Xun had devoted their loyalty to, they were looking forward to his rise.

To lift Ying Wu Xie's spirit, Fairy Zi Wei pondered for a while and said slowly: "Fang Yuan is terrifying indeed. He has always been pressured by all forces. Be it the forceful push by great venerables or the pursuit of Heavenly Court when I led it, he had to keep on wandering around from place to place for a long time in a precarious state."

"According to my guess, Fang Yuan was only a chess piece, and the moment he destroyed fate Gu, the venerables who supported him abandoned him. Not only abandoned, they even want to get rid of him! Be it the shackles from heaven path dao marks or Spectral Soul's pursuit, they are both evidence of this."

“But now, Fang Yuan has escaped the shackles and killed Spectral Soul. He is free from the venerables’ arrangements and obtained freedom. He never had the time to develop himself properly, but now he has.”

“Currently, he is growing stronger with every moment of time at an unknowable speed. Even though I am a wisdom path great expert and have fought Fang Yuan many times, I am unable to estimate how strong he will be the next time he makes a move.”

“But, no matter how strong he becomes, as long as he does not become venerable, he is not invincible.” Fairy Zi Wei changed the subject.

Ying Wu Xie gave a bitter smile: “Who can say for sure, Fang Yuan might have already become a venerable the next time he makes a move.”

“No.” Fairy Zi Wei smiled, “The realm of venerable is not that easy to reach. Since ancient times, there have only been ten of them. Venerable ascension holds an enormous secret! All the clues point out that the venerables who helped Fang Yuan will not inform him of this secret.”

“So that’s it!” An Xun clapped and said excitedly: “This is too good. As long as Fang Yuan does not become a venerable, he will only be a pseudo venerable, no matter how strong he is, there will be limits. Be they Qi Sea Ancestor or Divine Emperor City, they both can fight him.”

Ying Wu Xie let out a breath of air: “That means, as long as Fang Yuan does not become venerable, we still have hope?”

Fairy Zi Wei nodded: “Although Fang Yuan is strong, there are many restrictions on him. Fate Gu is destroyed, the order of the world has turned chaotic. Since Demon Immortal Qi Jue revived, could venerables not revive as well? That would not make sense. Demon Immortal Qi Jue was only a pseudo venerable.”

An Xun’s heart shook: “Lady Zi Wei, you once led Heavenly Court, can it be that you have some clues on venerable revival?”

Fairy Zi Wei shook her head slightly: “This is only my guess, I have no evidence. But one thing is obvious; the stronger the Gu Immortal, the more difficult it is for them to revive. Demon Immortal Qi Jue consumed a grotto-heaven and also borrowed the help of the qi harvest fruit. Even so, because of the severe interference during the revival process, Demon Immortal Qi Jue’s strength was not consistent with Heavenly Court’s records, it fell after the revival. A venerable’s revival will be countless times more difficult than Qi Jue’s.”

As she said this, Fairy Zi Wei could not help but think of Genesis Lotus Immortal Venerable.

She already had many suspicions.

These last days, although she and Ying Wu Xie were pursued, Heavenly Court did not chase them intensely.

After carefully thinking of it, although Genesis Lotus Immortal Venerable’s arrangements showed up during the fate war, they clearly were not focused on guarding Heavenly Court.

Under the control of Genesis Lotus' will, Divine Bean Palace and Emperor City combined, forming Divine Emperor City. But during the fate war, it only stayed in Central Continent and did not move.

And the battle not long ago proved Divine Emperor City could move.

And after the bamboo tree painting that Genesis Lotus Immortal Venerable arranged at the topmost floor of Heaven Overseeing Tower absorbed many of Northern Plains' Gu Immortal experts, it flew out of Heavenly Court and left without a trace.

Genesis Lotus Immortal Venerable had left behind various methods, but Fairy Zi Wei all along felt Genesis Lotus Immortal Venerable's focus was on other things, and not on defending Heavenly Court and protecting fate Gu.

"Fang Yuan might have also sensed this so he did not attack Divine Emperor City, I assume?" Fairy Zi Wei gazed towards Eastern Sea.

It was unknown who released the rumor in treasure yellow heaven, but rumors that were luring Fang Yuan and Heavenly Court into fighting were spreading wildly.

There was only one discussion in the whole of the world of the five regions' immortals — the fight between Fang Yuan and Heavenly Court's Divine Emperor City would decide who was the ruler of the world!

Wu Yong only started it, Western Desert's Gu Immortals, Eastern Sea's Gu Immortal world, Northern Plains' Gu Immortal world, and even the two heaven's Gu Immortals had strong motives to secretly give momentum to this rumor.

"This plan is quite good, but what kind of person is Fang Yuan, will he fall for it?" Fairy Zi Wei sneered.

The world's game of chess that involved all living beings was decided by the fight between several people. Although Fairy Zi Wei did not have the strength to participate, as a wisdom path great expert, she had the ability to observe this game.

Flowing Silver blessed land was looted completely and Fairy Zi Wei successfully obtained the Flowing Silver inheritance as well.

This was a metal path inheritance created by Silver Horn, a rank seven Gu Immortal of Central Continent.

It did not have much value to Fairy Zi Wei. Ying Wu Xie and An Xun also cultivated soul path, so the true inheritance's value was not big. The useful part of it were the immortal materials in the blessed land.

After making sure they did not miss out on anything, Fairy Zi Wei and the group immediately left this place.

Immemorial black heaven.

Under Bing Sai Chuan's lead, Hei Lou Lan arrived in front of Luck Suppression Heavenly Palace.

"Longevity Heaven actually hid such a trump card!" Hei Lou Lan was inwardly shaken.

The rank eight Immortal Gu House in front of her was much larger than Calamity Luck Altar, its grand dark golden body revealed signs of vicissitudes that spanned across countless years, but had a disposition of being firm and unshakable.

“I brought you here to seek an audience with a person.” Bing Sai Chuan led Hei Lou Lan inside the depths of Luck Suppression Heavenly Palace.

“You, you are?!” Hei Lou Lan’s eyes widened as she saw Immortal Zombie Giant Sun, who was sitting cross-legged on a cushion mat.

The intense reaction from her bloodline and Immortal Zombie Giant Sun’s appearance made Hei Lou Lan quickly confirm the identity of this person.

She immediately knelt on the ground and bowed: “This unfilial descendant greets Ancestor Giant Sun!”

“Good child, get up.” Immortal Zombie Giant Sun smiled kindly.

A formless and gentle force lifted the agitated Hei Lou Lan.

She had just stood up when she heard Immortal Zombie Giant Sun continue: “You are my outstanding descendant, if we talk about who was unfilial, those Gu Immortals of Hei tribe were the unfilial ones. They are cowards who actually surrendered to an outsider — that junior Bai Zu.”

Immortal Zombie Giant Sun paused before continuing: “Hei Lou Lan, from today onwards, you will cultivate in Luck Suppression Heavenly Palace, in the future, you will go to Northern Plains and rebuild Hei tribe!”

Reverend Insanity

Chapter 2076: Earth Treasury

2076 Earth Treasury Bai Ning Bing opened her eyes and the first thing she saw was warm yellow light.

“You are awake.” A seemingly familiar voice resounded in her ears, but she could not be certain.

A few breaths of time later, Bai Ning Bing’s vision became clearer.

She saw Fairy Miao Yin and Black Tigress beside her.

Bai Ning Bing barely had any strength left, she used her hands to push her upper body up: “Where is this?”

She looked around and saw she was in a cave. The cave was extremely peculiar, its form was like a sphere, and Bai Ning Bing’s group was at the bottom of the sphere.

The spherical cave’s inner walls had large patches of scattered yellow soil. From time to time, red lights flashed, like they were flowing on the yellow soil which seemed to condense into blood veins.

“Wait a moment, these are...” Bai Ning Bing was bewildered. She saw immortal materials embedded in the inner walls at set intervals of distance.

The first material she saw was a piece of copper near her.

The copper was firm and dominant, it was inlaid in the soil and glittered with cold metallic light.

“Isn’t this rank seven immortal material domination copper?” Bai Ning Bing recognized it.

She then saw a pure white iron lump not far from the domination copper.

The iron lump’s aura was even stronger than the domination copper; it was the rank eight immortal material white snow iron!

“What’s going on here? In the production area of domination copper, there would not be other rank seven metallic materials. But just a brief look and I can see more than five types of rank seven metallic materials.”

“And white snow iron only appears in rooster iron mines, how could there be lone white snow iron here?”

“Looks like even you don’t recognize this place, Bai Ning Bing.” Black Tigress said with disappointment.

Fairy Miao Yin said with a smile: “We only woke up a while earlier than you and are also greatly puzzled about this place. This place is too fantastic, it seems to be a storage for immortal materials. Not only metal path immortal materials, there are also materials of other paths. Take a look over there.”

Fairy Miao Yin pointed towards the left of Bai Ning Bing.

Bai Ning Bing looked towards the direction and saw a small patch of soil where a dozen or so large round turnips were growing.

“I know, this is white wine turnip, white wine is produced inside it. Although it is only rank six, it is a rare food path immortal material.” said Bai Ning Bing.

“Now look here.” Fairy Miao Yin pointed again.

Bai Ning Bing discovered a lump of wind.

This wind had condensed into a lump, the size of a woolen ball, it was dark green and its sounds were low and deep.

Bai Ning Bing had obtained Bai Xiang grotto-heaven and followed Fang Yuan for a long time, she could be considered to be experienced and knowledgeable. After seeing this lump of wind, she narrowed her eyes as she thought of its relevant records.

“This is profound eerie wind, a rank eight wind path immortal material. It only appears deep in the underground, even Heavenly Court’s Gu Immortals have a huge desire for it.”

Metal path immortal materials like domination copper, white snow iron, and others; food path immortal material white wine turnip; wind path immortal material profound eerie wind. Besides these, Bai Ning Bing and the rest also discovered red snake iron, orchid vitality qi, dream soil and so on.

“What is this?” Bai Ning Bing and the group saw a small fox above them.

Its hairy tail and limbs were all trapped in the soil. When it saw Bai Ning Bing’s group had discovered it, it curled into a ball from fear and let out soft whimpers.

The three female immortals' eyes widened, they were dazed for a while before they said in unison: "Blue smoke fox child!"

This was a rank eight transformation path immortal material, even *The Legends of Ren Zuu* had records of it.

"What place is this?"

"Blue smoke fox child is already extinct, but this place has it."

The three immortals then discovered purple manor soil.

This was a rank eight immortal material which looked like a patch of soil with purple grains, purple smoke rose above from the ground. The purple smoke could only rise half an inch before it condensed back to even smaller grains that fell on the purple manor soil.

"This purple manor soil had long been completely extinct. Because its effect was too powerful, it only appeared for a brief moment in history." Fairy Miao Yin said with certainty.

Purple manor soil's effect was extraordinary. A strand of purple smoke, when put inside an aperture, could raise a mortal Gu Master's cultivation level. And when enough purple manor soil was put inside an immortal aperture, it could similarly raise a Gu Immortal's cultivation level!

The three immortals searched roughly for a while and found that there was many kinds of immortal materials here. Although the quantity of each material was slightly little, their overall value was enormous!

"Crystal essence is the highest in quantity here. Earth path crystal essence, water path crystal essence, lightning path crystal essence, and so on. Could this be the legendary secluded domain of heaven and earth — Hu Land?" Black Tigress guessed.

Fairy Miao Yin shook her head: "Although *The Legends of Ren Zuu* did not record it in details, since Hu Land is mentioned together with Xi Land, it should be similar to Demon Immortal Qi Jue's Xi Land."

Bai Ning Bing smiled: "It is really amazing and mysterious! There are even heavenly crystals here, aren't heavenly crystals a product of the nine heavens? We should be deep underground right now."

The three immortals continued to discuss and soon rejected the previous assumption.

"So crystal essence is not the highest in quantity here, it is the blood veins buried in the soil."

At every set interval of time, the earth blood veins would shine and flow like blood capillaries had grown in the ground. Because of them, Bai Ning Bing had discovered the flowing red light before.

Following the blood veins, the three immortals discovered its source, which was also their most important discovery.

A delicate little black-yellow heart.

With it as the source, the net-like blood veins spread out widely.

The three immortals looked at each other before shaking their heads, none of them recognized the history of this black-yellow heart.

“But this is clearly a luck path immortal material.”

“It is rank nine, the most valuable immortal material here!”

“There are no signs of humans here, the work of nature really leaves one dumbstruck.”

“The world is vast, it is truly mysterious and interesting, spectacular and exquisite. If us Gu Immortals don’t live a brilliant life, then we truly would have lived in vain, what meaning is there in such a life?” Bai Ning Bing was full of praise.

Fairy Miao Yin looked at Bai Ning Bing’s expression and sighed helplessly.

Bai Ning Bing was such a person, she concentrated on herself and pursued excitement, she did not care about life or death, let alone talk of any morals or ethics.

Fairy Miao Yin disliked Bai Ning Bing before, but if not for Bai Ning Bing risking her life to fight in the previous battle, Fairy Miao Yin and Lady White Rabbit would have been Heavenly Court’s prisoners.

Black Tigress said: “This is great, these immortal materials will definitely be of huge help to master.”

The master she was talking of was naturally Fang Yuan.

Fairy Miao Yin glanced at her, sighing helplessly in her mind once again.

She knew: Lady White Rabbit was not much different from Bai Ning Bing, she was also an abnormality. Lady White Rabbit’s true inheritance was extremely strange and was a top tier dual path cultivation technique.

Lady White Rabbit cultivated light and dark path, following the idea that light cannot exist without darkness and darkness cannot exist without light. When Lady White Rabbit’s cultivation was rank six, her transformation, Black Tigress, would be rank seven. When Lady White Rabbit possessed rank seven cultivation, Black Tigress would possess rank eight cultivation!

But this inheritance had a huge influence on the cultivator’s mental state.

Lady White Rabbit was pure and kind while Black Tigress was fierce and ruthless, both had extreme characters. Not only this, once the feelings of acknowledgement and reverence were accumulated in the depths of White Rabbit and Black Tigress, they were unable to be changed.

After the pursuit battle against Fang Yuan, Black Tigress was even more in admiration regarding Fang Yuan. Because even Spectral Soul was killed by Fang Yuan!

Hearing that Black Tigress wanted to offer these immortal materials to Fang Yuan, Bai Ning Bing’s face immediately turned dark. Her eyes let out a dangerous light as she took a step forward: “You actually have such a stupid thought?”

“Are you calling me stupid?” Black Tigress raised her brows and said furiously: “You really think I am afraid of you?”

“You two!” Fairy Miao Yin immediately stood between the two: “It was not easy for us to escape here. Our lives and freedom that we obtained by using all our efforts should not be used on strife between ourselves. What we need to consider is what we should do next!”

Bai Ning Bing and Black Tigress were persuaded as they stopped with a snort.

The three immortals continued to explore.

They dug a small hole and saw the raging earth qi outside the cave.

“We are still in the earth vein!”

“What do we do?”

“With just our strength, even if we collaborate, the risk is too high.”

This discovery worried the immortals.

Fortunately, this place did not restrict communication with the outside world.

The three immortals easily connected with treasure yellow heaven and quickly understood the situation after the pursuit battle against Fang Yuan, as well as the rising storm in Eastern Sea during this period of time.

Black Tigress was exulted: “Master finally broke free from his predicament and became the number one demon lord!”

Fairy Miao Yin was somewhat worried: “I did not expect Heavenly Court to still have a trump card like Divine Emperor City. Even the powerful Demon Immortal Qi Jue was captured. Sigh, Heavenly Court’s foundation is truly too deep.”

Black Tigress snorted: “What is a mere Immortal Gu House? Its methods are fixed and hard to change. As long as master probes all the methods of Divine Emperor City, it will be easy for him to crack this Immortal Gu House.”

Black Tigress’ eyes were shining as she said in a firm tone: “I am going to return, master has already sent the word and summoned his subordinates. I will immediately return and continue to follow master!”

Fairy Miao Yin nodded, approving of Black Tigress’s thoughts.

She knew the five regions’ regional walls were gone, fate Gu was destroyed, and it would be a chaotic world in the future. To survive in this chaotic world, it was best to rely on the strong.

Naturally, Fairy Miao Yin knew of Fang Yuan’s ruthlessness and coldness, but she had nowhere else to go now.

Compared to Black Tigress, Fairy Miao Yin had limited loyalty towards Fang Yuan.

What she cared about was mainly herself.

So, when Fairy Zi Wei captured Fairy Miao Yin, Fairy Miao Yin had cooperated.

But the current situation was different, Fang Yuan was now recognized as the number one demonic immortal in the world. Even Heavenly Court was vaguely suppressed by him! Even if Fairy Miao Yin wanted to side with other forces, who would dare to accept her? Would they not be afraid of Fang Yuan knowing about it and coming to settle the score?

Bai Ning Bing sneered at the other two: "Looks like you still want to follow Fang Yuan? Hehe, do you have a brain or not? Who do you think is the cause of our situation? Wasn't it Fang Yuan who abandoned you? He could abandon you once, he can naturally abandon you a second time, or even a third time."

"Why do you always want to rely on others? This is the best opportunity to gain freedom! Although our alliance agreement with Fang Yuan is still there, it has already been suppressed by Fairy Zi Wei. The world thinks we died in battle, even Heavenly Court is in the dark. You still want to return?"

Fairy Miao Yin sighed: "Bai Ning Bing, don't forget our status. We are wanted demonic immortals, listed on the Demon Judgment Board and hunted by the righteous paths of the five regions. What else can we do if we don't go to Fang Yuan? If we fight by ourselves, we will be discovered one day and be hunted for bounty by waves after waves of Gu Immortal experts."

Bai Ning Bing laughed loudly: "Running for our lives will definitely be exciting. Don't you have any anticipation towards it?"

Fairy Miao Yin rolled her eyes.

Black Tigress snorted: "Even if Lord Fang Yuan abandons me again, I am still willing to follow him!"

Bai Ning Bing and Fairy Miao Yin were speechless.

[Reverend Insanity](#)

Chapter 2077: Four Elements Square Regret Blood Refinement Pool!

Sovereign immortal aperture, Mini Central Continent.

Fang Yuan's months of arrangements (in the immortal aperture's time) had reached the crucial moment!

Within a square shaped pool, there was a small pavilion situated at the center.

Following Fang Yuan's will, a Gu worm slowly flew towards the pavilion.

This Gu resembled a round pearl, it was as large as a goose egg, the pearl had countless markings on it that were moving around, they were brilliant like a blooming field of lotuses, or the rumbling of clouds.

It was blood asset Immortal Gu!

This was a unique Gu created by Lang Ya land spirit by combining some blood path Gu recipes he bought in treasure yellow heaven.

Blood asset Immortal Gu's effect was to protect a portion of the immortal materials or Gu worms during refinement. If the refinement failed, some of these immortal materials or Gu worms could be restored afterwards using blood asset Immortal Gu.

Blood asset Immortal Gu was originally only at rank six, but not long ago, Fang Yuan had used the Long Hair refinement path formation to refine it to rank seven.

Blood asset Immortal Gu House slowly flew to the top of the pavilion where a golden seat was constructed.

Inside Fang Yuan's mind, thoughts surged like tidal waves. This step looked simple from outside, but in actuality, Fang Yuan spent one hundred thousand thoughts every second to complete this final step!

Splat.

With a soft sound, blood asset Immortal Gu finally landed on the golden seat.

Shortly after, as Fang Yuan transferred his immortal essence, the golden seat produced an attraction force that fixed blood asset Immortal Gu in place.

Blood asset Immortal Gu burst out with dense blood light.

The blood light was like water as it flowed down from the roof of the pavilion, dying everything in its path; the white jade-like pavilion was dyed crimson red.

After it dyed the pavilion, the blood light continued to spread and covered the calm pool.

The pool water became red like blood.

Slight waves appeared on the surface of the pool. Burble burble, waves struck the squarish rock walls surrounding it, but the waves immediately disappeared, as the pool became calm once again.

Four Elements Square Regret Blood Refinement Pool's construction was finally completed!

Fang Yuan wiped off the sweat on his forehead. After maintaining the tense state for over a month, he could finally relax.

He immediately felt an extremely intense exhaustion spread from his bones to his entire body.

"I consumed too much mental energy, a lot of immortal essence was also expended." Fang Yuan was aware of it, his mind was exhausted and he wanted nothing more than to fall asleep without caring for anything else.

He did just that.

This sleep lasted for two days and two nights.

Thereafter, he finally recovered his spirit.

Shortly after, Fang Yuan used his divine sense to inspect this Four Elements Square Regret Blood Refinement Pool.

After inspecting once and finding there were no mistakes, he nodded in satisfaction.

To construct this refinement pool, he had racked his brains and spent an enormous effort!

And after paying such a price, the constructed Four Elements Square Regret Blood Refinement Pool was without any doubt the peak creation of refinement path in the present world.

Fang Yuan's Four Elements Square Regret Blood Refinement Pool's was conceptualized by merging Immortal Gu Houses and immortal formations together, such as Regret Pool, Refinement Cauldron, and Long Hair refinement path formation.

Regret Pool was one of the three legendary pools of the world along with Heavenly Pool and Wine Pool, they were all famous in history. When Gu Immortals refined Immortal Gu successfully in it, they could leave an insignia behind. When the Immortal Gu was destroyed, Regret Pool could be activated, using the power of the tributary of the River of Time and the preserved insignia to refine the Immortal Gu again, the success rate was about fifty to sixty percent.

Sun Ming Lu, one of the seven extremities of Longevity Heaven, imitated Regret Pool and constructed a super Gu formation, fate reversing sacrificial refinement formation, to refine rank eight Fortune Rivaling Heaven for Old Ancestor Xue Hu.

Refinement Cauldron was the most proud masterpiece of Long Hair Ancestor, it possessed the ability to forcefully refine Immortal Gu. In the five hundred years of Fang Yuan's previous life, Lang Ya blessed land relied on it to defend against seven waves of enemy attacks. The Immortal Gu of the Gu Immortals who invaded the blessed land were forcefully refined, and countless Gu Immortals were captured like this.

Long Hair refinement path formation was even more so the strongest foundation of Lang Ya Sect, the essence of its trump cards. The formation was extremely outstanding and only hairy man Gu Immortals could control it. In history, Long Hair Ancestor had refined Immortal Gu for Giant Sun Immortal Venerable and Thieving Heaven Demon Venerable by using this formation. Before the fate war, Fang Yuan had refined many Immortal Gu by similarly relying on the grand might of this formation.

If Fang Yuan's refinement path and time path attainment levels were not at quasi-supreme grandmaster, he would never be able to think of such a design.

Just the design of this Four Elements Square Regret Blood Refinement Pool was unprecedented, and it was likely that no one in the future would be able to accomplish it as well. The price that Fang Yuan paid to construct this Immortal Gu House was shockingly high!

First of all, Fang Yuan dismantled the Long Hair refinement path formation that had a long history and was unparalleled; one of its cores, rank eight Immortal Gu Advance Refinement, was still used as a core, becoming a portion of the foundation of Four Elements Square Regret Blood Refinement Pool.

Secondly, Fang Yuan used rank eight Immortal Gu Regret, which was the essence of Regret Pool, to construct the pavilion in the pool.

Thirdly, Fang Yuan specially constructed a year essence sub-pool outside to lead a tributary of the River of Time into the square pool. To accomplish this step, Fang Yuan arranged three rank eight time path Immortal Gu; Early Autumn, Mid Autumn, and Late Autumn (from Three Autumn Yellow Crane Platform).

Finally, Fang Yuan even put the incomplete form of Refinement Sea into the pool. Lang Ya land spirit had heavily invested in Refinement Sea because he wanted to create a refinement path secluded domain of heaven and earth. To successfully put in the incomplete form of Refinement Sea, Fang Yuan had to use rank eight Immortal Gu Water Refinement as well.

The entire Four Elements Square Regret Blood Refinement Pool had four main cores; rank eight Immortal Gu Advance Refinement, Water Refinement, Regret, and rank seven Immortal Gu Blood Asset. Thus, it was named 'Four Elements'. There were over twenty supplementary Immortal Gu; rank eight Early Autumn, Mid Autumn, and Late Autumn were among the top ones. As for mortal Gu, there were over one hundred million, their types were as numerous as stars, this was simply unheard of.

Fang Yuan had used almost all his refinement path Immortal Gu in this, time path Immortal Gu, wisdom path Immortal Gu and other paths' Immortal Gu were also not invested in small numbers. Fortunately, he controlled the variant human alliance and also extorted Eastern Sea's Righteous Qi Alliance, only then did he have a sufficient number of suitable Immortal Gu.

With such an amazing investment without any regard for the cost, Four Elements Square Regret Blood Refinement Pool had the abilities of Long Hair refinement path formation, Regret Pool, Refinement Cauldron, Refinement Sea, and so on. It was infused with various refinement path techniques like flesh body blood refinement technique, seven kill blood path Gu refinement method, Bei Luo ice refinement method, and so on. It could utilize refinement path killer moves like slumbering lightning python, wind grind, reflect snow, muffled thunder stone drum, dragon-shaped blizzard, heavenly light ring, refinement snake lifespan flower, omnipresent four seas, and even 'one step back, sea and sky expands'.

As soon as Four Elements Square Regret Blood Refinement Pool was constructed, it became the number one refinement path Immortal Gu House in the entire history of Gu cultivation!

There was no debate, nothing could rival it.

"If news about it is spread, Four Elements Square Regret Blood Refinement Pool can absolutely compete with Divine Emperor City and Eighty-Eight True Yang Building for the position of the number one Immortal Gu House."

Divine Emperor City was a human path sacred land, while Eighty-Eight True Yang Building controlled Northern Plains, raising the Huang Jin bloodline to its height. And Four Elements Square Regret Blood Refinement Pool was as good as them.

It merged the essence of human style Gu refinement and hairy man nature Gu refinement. With it, not only could the cost of refining Immortal Gu decrease sharply, the success rate had also increased beyond imagination!

Whoever controlled this Four Elements Square Regret Blood Refinement Pool would have an unceasing supply of Immortal Gu!

"But, Four Elements Square Regret Blood Refinement Pool is not comprehensive. It is heavily focused on Gu refinement, and has almost no strength in other aspects like offense, defense, movement."

"Moreover, in this world, only I, Fang Yuan, can construct it. Even if other Gu Immortals get its blueprint, they can do nothing with it!"

If a Gu Immortal saw Fang Yuan's design, they would praise it endlessly at first. But when they started delving deeper, they would begin to curse and feel disdain, they would think this design was too naive and absurdly impossible.

Because the design of Four Elements Square Regret Blood Refinement Pool did not consider the case of conflicting dao marks in almost all the areas.

Only inside the sovereign immortal aperture, where there were no conflicting dao marks, could Four Elements Square Regret Blood Refinement Pool be turned into reality.

In fact, as long as Fang Yuan took out Four Elements Square Regret Blood Refinement Pool from his aperture, this Immortal Gu House would automatically collapse because of the severe internal friction and rejection of different dao marks!

In fact, it would not have been possible to construct this Four Elements Square Regret Blood Refinement Pool when Fang Yuan had three thousand heaven path dao marks.

It was because Fang Yuan annexed three rank eight grotto-heavens, Grand Swine, Novelty, and Time Difference, and refined their heaven path dao marks, that he was able to meet the lowest requirement for refining Four Elements Square Regret Blood Refinement Pool.

Each of these three grotto-heavens had merged with a nine heavens fragment before, and the nine heavens fragments contained heaven path dao marks.

Time Difference grotto-heaven possessed over seven hundred thousand time path dao marks and had over eight hundred heaven path dao marks.

Novelty grotto-heaven contained over one million and six hundred thousand rule path dao marks and had over one thousand nine hundred heaven path dao marks.

Grand Swine grotto-heaven had the most dao marks, with over three million and two hundred thousand transformation path dao marks and over three thousand three hundred heaven path dao marks.

At present, Fang Yuan's heaven path dao marks had already grown to over nine thousand!

[Reverend Insanity](#)

Chapter 2078: Targeting Luck Path Firs

2078 Targeting Luck Path Firs Most of the two heavens' grotto-heavens possessed a vast number of dao marks.

The main source of these dao marks were not tribulations but the contribution of generations of Gu Immortals.

For instance, Soul Pacifying grotto-heaven had over seven million soul path dao marks! With such an amount of soul path dao marks, the grotto-heaven contained a large number of super resource points.

At the start, Soul Pacifying grotto-heaven only had over one hundred thousand soul path dao marks. After it fused with a large nine heavens fragment, it was free from calamities and tribulations.

With the favor of heaven's will, Soul Pacifying grotto-heaven produced Gu Immortals generation after generations.

These Gu Immortals were humans, although they could casually choose their cultivation paths, most of them chose soul path.

Because the grotto-heaven had all kinds of soul path dao marks, it could be said they would enjoy a natural advantage in cultivating soul path. Even if Gu Immortals chose other paths, their number was extremely few and it was many times more difficult for them to obtain cultivation resources of other paths.

In fact, the two heavens were not places where ordinary rank six and rank seven Gu Immortals could explore.

Normally speaking, only a few rank seven experts and ordinary rank eights could take the risk to explore the two heavens to gather resources.

And after these soul path Gu Immortals died, almost all of their immortal apertures merged with Soul Pacifying grotto-heaven.

Although these Gu Immortals did not have the sovereign immortal aperture and there would be a lot of internal friction when merging immortal apertures, because their dao marks were mainly soul path dao marks, there was much more benefit than loss in merging.

As this continued for generations after generations, it had accumulated to the current number of over seven million dao marks!

Since the moment he started cultivating, be it in his previous life or now, Four Elements Square Regret Blood Refinement Pool was Fang Yuan's largest investment. He had thrown in all the resources of refinement path into it, even using time path, rule path, wisdom path, blood path, and other paths.

With Four Elements Square Regret Blood Refinement Pool, Fang Yuan's refinement path ability had a massive increase, becoming the number one in refinement path in the present world. Adding on his quasi-supreme refinement path attainment level, even over the long span of history, he was absolutely among the top three in refinement path.

But because he had invested many Immortal Gu of time path, rule path, and other paths, the relevant paths' foundation had subsequently decreased.

Over this period of rest, Peaceful Soil Heavy Mountain Fortress had yet to be repaired, immortal essence reserves had already returned to normal, many Immortal Gu were invested, but because of a massive surge in his major paths' dao marks, Fang Yuan's overall strength had not decreased but increased instead!

Fang Yuan's days were getting better.

Thinking of before, Fang Yuan had lived almost every day in a precarious state, he was forcefully pushed forward by schemes of venerables and hunted down everywhere by Heavenly Court. And now, Spectral Soul was dead, Heavenly Court and Longevity Heaven were recuperating, Fang Yuan no longer had a lot of external pressure and he could formulate his cultivation plan much more relaxedly.

From a long term view, constructing Four Elements Square Regret Blood Refinement Pool was absolutely a highly rewarding project!

"Now, it is time to refine and advance my luck path Immortal Gu to rank eight level." Fang Yuan looked at Four Elements Square Regret Blood Refinement Pool with pride, he already had a plan.

When fate Gu existed, the ratio of fate and luck in the world was about nine-to-one. Now that fate Gu was destroyed, luck path's influence had no doubt surged!

Especially when the five regions chaotic war was in accordance with the overall situation; the more chaos there was, the more effects luck path could display.

"My current immortal material reserves have already reached an unprecedented level, I have the capability to refine rank eight luck path Immortal Gu. But it is still not enough to construct a complete Refinement Sea. Hmm?"

Just as Fang Yuan was pondering, he suddenly received Black Tigress' message through treasure yellow heaven.

"They are still alive and trapped in an earth vein. Interesting, they are hiding in Earth Treasury. This is good, Earth Treasury is one of the ten earths, every Earth Treasury holds abundant immortal materials, especially the rank nine luck path immortal material, favored heart, it is perfect for my current usage!"

Fang Yuan could not help feeling happy.

Rank nine luck path immortal material could refine rank nine luck path Immortal Gu.

But just a single Earth Treasury's favored heart was far from enough.

Among Fang Yuan's luck path immortal materials, most were rank seven while a small portion were rank eight. He clearly did not have the foundation to try refining rank nine luck path Immortal Gu.

But using rank nine immortal material to refine rank eight Immortal Gu could slightly increase the success rate as well.

With favored heart, Fang Yuan was like a tiger who gained wings!

Southern Border, Chi clan headquarters.

Bam.

The current Chi clan first supreme elder slammed the table fiercely and said through clenched teeth: "Outrageous!"

This rank seven Gu Immortal, who looked rather young, had pale white skin and dark eyes that showed signs of excessive drinking, was furious at this moment.

It was Chi Bang.

He was Chi Qu You's son, Chi Qu You had greatly supported him and had internally appointed him as the next first supreme elder. Although Chi Qu You died in the fate war, because he had made sufficient arrangements, Chi Bang succeeded in inheriting the position.

After Chi Bang got the position, he sensed that the situation was greatly different from before.

Previously, he was under his father Chi Qu You's protection, there was Chi Qu You to shelter him from any trouble. But now, he had to face the pressure directly.

This time, Southern Border's super force Yang clan had given him a tough problem.

The cause of this was a sound path inheritance. This sound path inheritance was called Roar, it had a long history and its reputation was spread far and wide. It had been passed down since long ago.

The previous generation Roar inheritor was only rank seven but the one before that was a rank eight Gu Immortal.

That was to say this Roar sound path inheritance could let someone cultivate to rank eight, it had high value.

More importantly, this Roar inheritance was in Chi clan's territory, but was extremely close to Yang clan as well.

After Chi Qu You died, Chi clan lost its only rank eight Gu Immortal and Chi clan was weak internally. Yang clan decisively made its move, encroaching on Chi clan's border and surrounding the inheritance ground. At present, they were actively exploring that sound path blessed land.

Chi clan had to do something about Yang clan's conduct. Their territory was invaded and this concerned their reputation. If they did not handle this properly, Chi clan's reputation would drop to the floor.

But, what could Chi clan do to protect their prestige? Could Chi clan beat back Yang clan's invading force?

Could they fight? How would they fight? If they could not fight, what should they do?

This was the problem Chi Bang was facing.

"What do you three think?" Chi Bang inquired the three rank seven Gu Immortals in front of him.

Chi Da Pi immediately said with a loud voice: "Of course, we fight back and kill those scoundrels of Yang clan!"

"Keep your voice down." Chi Bang quickly shook his head and looked at Chi Gui.

Chi Gui frowned: "First supreme elder, we need to consider this properly."

"What are you afraid of!" Chi Da Pi opened his eyes wide, "Yang clan does not have a rank eight Gu Immortal, they only sent two rank seven this time. If our Chi clan does not fight back, we would be the laughing stock of all of Southern Border's righteous path."

Chi Gui heaved a sigh: "Even though they only sent two people, they are famous experts. Yang Yin Guang is proficient at freezing soul profound light, which is very hard to defend against. The other, Yang Wen Kui, dual cultivates wisdom path and information path, he is the brain of Yang clan."

"According to our investigation, Yang clan's other Gu Immortals are stationed in Yang clan's territory, but we cannot say for sure that Yang clan is not pretending and is secretly transferring their forces. Even if Yang clan is not pretending, we need to consider Yang clan's Immortal Gu House as well. Since Yang clan invaded our territory, it is very likely that they have mobilized their Immortal Gu House, and it is being stored inside the immortal aperture of one of the two Yang clan immortals, just that they have not used it yet."

"Yes." Chi Bang nodded then looked towards Chi Shang: "What do you think about this?"

Chi Shang wore a white robe, he was handsome but his gaze looked somewhat distant.

“Chi Shang? Chi Shang?” Chi Bang called out softly.

But Chi Shang seemed to have not heard anything, his eyes looked towards the front in a daze.

The three immortals looked at each other before sighing in unison.

Clearly, Chi Shang’s mind was wandering again. He was the most hopeful genius of Chi clan to become a refinement path great grandmaster, he was called the formation devotee and would often blank out. He would even forget to eat when he thinks of a formation path problem. If not for the clan’s care, he would have likely forgotten to eat and died while immersed in his thoughts.

Chi Shang did not pay attention to Chi Bang. Chi Bang was inwardly furious, but he had to treat him nicely.

Before participating in the fate war, Chi Qu You had summoned Chi Bang to the study room and said to him: Chi Shang is the perfect helper that I am leaving to you.

In fact, the three Chi clan rank seven Gu Immortals in the study were the trusted aides that Chi Bang relied on.

But these trusted aides were unable to help him resolve this issue.

Chi Bang had to make the decision himself.

Right at this time, an information path Gu worm was passed on through treasure yellow heaven.

After Chi Bang browsed with his divine sense, his eyes brightened in joy: “Excellent, Alliance Leader Wu Yong heard of this matter and is willing to cooperate with our Chi clan. After expelling Yang clan, they won’t take the Roar inheritance and will even send their Immortal Gu House to help us. But they want us to reach a further agreement with them, mainly wanting our clan to set up many immortal formations in Wu clan’s resource points.”

“There is such a good thing?” Chi Gui was greatly surprised. Wu Yong’s conditions were extremely good and he was inwardly moved.

“What do you two think?” This time, Chi Bang directly ignored Chi Shang, asking only Chi Da Pi and Chi Gui.

Chi Da Pi cupped his fists: “The decision is completely up to you, first supreme elder.”

Chi Gui hesitated slightly: “If we rely on Wu clan to beat back Yang clan this time, it looks as if we have profited greatly, but Wu Yong is a formidable character, why would he make an unprofitable transaction?”

Chi Da Pi said: “Did you forget? Back then when Wu clan was weak, Yang clan seized Wu clan’s poisonous waterfall and went after their corpse mountain. Lord Chi Qu You took an Immortal Gu House to drive them away, then Wu clan seized back poisonous waterfall. Wu clan and Yang clan have enmity.”

Chi Bang patted his forehead: “Right, Chi Da Pi is correct. Talking about it, Wu clan seems to have always been trying to rope us in. Back then when Yi Tian Mountain’s dream realms still existed, Wu clan

brought our Chi clan along whenever they did the immortal opportunity business. Wu Yong is a formidable character, and although my father has passed away, my Chi clan still has value. This time, let Wu clan work for us while we sit back and relax, haha!”

Chi Gui saw that Chi Bang had already made the decision and could only suppress the unease in his heart.

He thought for a bit and added: “This time, if we ally with Wu clan, we need to consider Ba clan’s feelings and thoughts.”

“Right, Ba clan...” Chi Bang felt a headache.

Super forces had been in power for a long time and had complicated relationships with each other. It was extremely troublesome to deal with them.

Ba clan wanted to get the position of overlord in Southern Border and wanted to replace Wu clan. There was a great deal of conflict between Ba clan and Wu clan.

And Ba clan had a close relationship with Chi clan, they were not merely allies, they had an alliance marriage!

Reverend Insanity

Chapter 2079: Rank Eight Dog Shit Luck

2079 Rank Eight Dog Shit Luck “My Chi clan is facing difficulties but Ba clan is not doing anything to help. They even tried to interfere and support Chi Xu Zhi when I was about to take my position. Ever since that damned Chi Xu Zhi married a female immortal of Ba clan, his ambition has been rising day by day.” Chi Bang’s tone was filled with hatred as he recalled.

He slammed the table: “I have decided to agree with Wu clan’s alliance, as for Ba clan... I will send a letter of explanation and hope they can understand.”

The news of Chi Bang’s agreement to cooperate reached Wu Yong.

Wu Yong laughed heartily: “This young Chi Bang is no cause for concern!”

Clearly, Wu Yong’s plan was working smoothly.

With Chi Qu You dead, Chi clan’s internal structure was weak. Ba clan had a change of leadership, the previous first supreme elder, Ba Shi Ba, was captured by Fang Yuan and lost his immortal aperture as well as his cultivation. After Ba De took his position, Ba clan became unstable.

Wu Yong intuitively sensed the crack in these two clans. The incident regarding the Roar inheritance was like a heaven-sent opportunity to Wu Yong, how could he not grasp it?

“Good news, I have good news.” At this time, Wu Ba Chong suddenly came before the door and sought an audience.

“Come in.” Wu Yong said: “What’s the news?”

He rarely saw the stable Wu Ba Chong express such joy.

Wu Ba Chong said: "When Wu Bei was exploring Space Comprehension Pit, he unexpectedly discovered a large amount of dry clear qi!"

Wu Yong was slightly dazed before applauding: "This is indeed good news."

Wu Du Xiu had three regrets in her life.

The first was the group, Fierce Gorge Seven Ghosts, that Wu Yong had already eliminated. Second was she was not able to refine eight-faced prestige wind Gu.

Wu clan had been gathering immortal materials for eight-faced prestige wind Immortal Gu for many years, and only lacked one main material: dry clear qi.

Wu Bei unexpectedly obtained dry clear qi this time, which was enough for Wu clan to refine eight-faced prestige wind Gu.

"Wu Bei is indeed my clan's lucky star. Reward him!" Wu Yong quickly thought before speaking.

"Eight-faced prestige wind Gu is a rank eight Immortal Gu, it is a major matter if we are to refine it, we must treat it seriously and make many preparations. Everyone in Wu clan needs to give their all for this refinement." As Wu Yong said this, he sighed: "Refining rank eight Immortal Gu is difficult, truly difficult! Even Fang Yuan, with Lang Ya blessed land's help, will struggle with refining rank eight Gu. This is a serious matter, we might have all the immortal materials but we need to consider this carefully."

Wu Ba Chong's excited state slowly calmed down.

"Lord is right, I was too rash."

Wu Yong was able to maintain calm and logic, Wu Ba Chong felt even more admiration towards him.

Wu Yong said: "We will put aside refining eight-faced prestige wind Gu for now. Chi Bang has already agreed to ally with us, what we need to do now is to pressure Ba clan and make them unable to interfere in this matter."

Wu Yong took precautions and thought of everything, he had already started to get rid of this future obstacle in advance.

It was another round of planning and arrangements.

Wu Ba Chong left the study room while praising inwardly: "Lord Wu Yong has both battle strength and a strategic mind, would my Wu clan even have to worry about not accomplishing great things under his lead?"

Days later, in the sovereign immortal aperture.

Fang Yuan's time path clone was controlling Four Elements Square Regret Blood Refinement Pool.

"Rise!" The time path clone shouted, rank eight immortal essence poured in crazily.

Boom!

The blood-like water in the square pool suddenly rose towards the sky like a reverse waterfall.

The whole Four Elements Square Regret Blood Refinement Pool began making noises, it was activated to its limit.

The blood waterfall rose in the air and formed a whirlpool at the top.

The whirlpool rotated rapidly while letting out brilliant radiance.

After the whirlpool absorbed a large amount of blood water, it gradually calmed down.

Finally, an Immortal Gu flew out of the whirlpool.

The whirlpool dissipated, the reverse flowing blood waterfall also fell down to the square pool; only some blood water remained in the pool.

Blood red light retreated like birds returning to their nest, to the top of the small pavilion in the pool. That was the position of blood asset Immortal Gu.

Fang Yuan's time path clone regulated his breath for a while before moving his will. The Immortal Gu that was floating in the air flew into his palm.

This Immortal Gu looked like a dung beetle.

Its whole body was golden yellow, it had three parts to its body; head, stomach, and tail. its head was like a crescent shovel which had paddle like tentacles in its sides. Its stomach had a horizontal ridge, and its tail was oval.

It had two pairs of legs and a pair of tails. Every tentacle was rough and thick, and had hard black barbs on their ends.

It was dog shit luck Immortal Gu; after having gone through Fang Yuan's refinement, it had advanced to rank eight.

Dog shit luck Immortal Gu was the core Immortal Gu of Cooking Luck Pot.

Giant Sun Immortal Venerable created luck path and left three great true inheritances: Self luck, all living beings luck, and heaven and earth luck. Cooking Luck Pot was the peak creation of the essence of self luck true inheritance.

Before the fate war, Fang Yuan had thrown in almost all his luck path Immortal Gu into Cooking Luck Pot.

This time, he dismantled Cooking Luck Pot and advanced the rank of all its luck path Immortal Gu.

Dog shit luck Immortal Gu was the primary target, but Fang Yuan succeeded in his first attempt at refinement.

Four Elements Square Regret Blood Refinement Pool had fifty to sixty percent success rate even when refining rank eight Immortal Gu. This was such a terrifying success rate that if news about it were to spread, it would shake the whole Gu Immortal world; it might even lead to crazed attacks by Longevity Heaven and Heavenly Court.

With rank eight Dog Shit Luck, Cooking Luck Pot's rank had already advanced to rank eight.

If one were an ordinary Gu Immortal, they would stop here. But Fang Yuan was far from being satisfied, he would now advance qi luck Immortal Gu, connect luck Immortal Gu, luck plan Immortal Gu, luck inspection Immortal Gu, and so on.

The time path clone maintained the activation of Four Elements Square Regret Blood Refinement Pool.

Following the rapid expenditure of rank eight immortal essence, the almost used up pool water began to fill up again.

This pool water was the refinement water of the incomplete Refinement Sea which was mixed with the water of the River of Time, and had gone through refinement path methods using water refinement Immortal Gu as the core, to form this wonderful creation.

The time path clone opened the hidden door of the Immortal Gu House's storage, the luck path immortal materials inside began to fall into the pool.

Among them was the favored heart.

Fang Yuan had already brought back Lady White Rabbit and Fairy Miao Yin.

What he used was a killer move involving Fixed Immortal Travel.

The killer move Jade flow pearl was no longer suitable for the current Fang Yuan because of his enormous dao marks.

But it was of no issue, Fang Yuan had created many compound killer moves and had already created the new heaven and earth travel killer move!

With the help of over nine thousand heaven path dao marks, heaven and earth travel directly sent Fang Yuan to the nearby Earth Treasury.

In the heart of the mighty earth vein, Fang Yuan withstood the strong pressure leisurely and stored the whole Earth Treasury into his immortal aperture.

Bai Ning Bing had already left secretly but Fang Yuan did not care about her. There was clearly no reason to waste time on her at this moment.

After refining dog shit luck Immortal Gu, rank nine luck path immortal material favored heart shrunk a little. Another layer of its surface was refined and merged into the pool water.

Such usage of immortal materials had already reached the peak of brilliance.

Blood red light once again spread from blood asset Immortal Gu and covered the whole pool.

The pool water billowed, the immortal materials inside it melted and mixed with the blood water.

After a while, everything was in place. Four Elements Square Regret Blood Refinement Pool's efficiency in processing immortal materials was astonishing.

The time path clone threw luck inspection Immortal Gu into the water.

The second round of refinement had begun!

Immemorial black heaven, Luck Suppression Heavenly Palace.

A tribulation had just dissipated in Hei Lou Lan's blessed land.

Hei Lou Lan revealed joy at the impressive gains of this tribulation. She could not have passed it alone, but with Giant Sun Immortal Venerable's guidance and Bing Sai Chuan's protection, she easily succeeded.

"It has not been long since I came to Luck Suppression Heavenly Palace, but over this period, I have already gone through many calamities and tribulations; my strength has been increasing rapidly day by day."

"My previous feeling was not wrong, it seems Longevity Heaven really wants to heavily nurture me!"

Hei Lou Lan inspected her immortal aperture.

After she came and met Immortal Zombie Giant Sun for the first time, Bing Sai Chuan used time path methods to increase her immortal aperture's time flow to an astonishing level.

At the same time, Longevity Heaven supported her with an endless stream of strength path immortal materials. There was simply no hidden threat of advancing too rapidly.

With such an abundant amount of strength path immortal materials, it would naturally attract strength path calamities and tribulations.

Longevity Heaven held the strongest luck path methods in the world which were extremely helpful in undergoing tribulations. Hei Lou Lan only had to sit back and enjoy the spoils.

With the support of the second largest super force in the world and being valued highly by Immortal Zombie Giant Sun, Hei Lou Lan deeply felt the advantage of relying on a force.

She did not need to worry about nurturing and refining Gu, and also did not need to go gather Gu recipes, killer moves and so on; someone would directly send them to her.

Even the management of immortal aperture and the arrangement of resource points were planned for her by specialized wisdom path Gu Immortals.

Hei Lou Lan only needed to ponder on the usage of Gu and train her killer moves.

Although she was a descendant of the venerable, her life was full of hurdles, and after meeting Fang Yuan, she had to endure even more hardship and face life and death situations many times. So, after obtaining the huge support, besides being extremely thankful, she cherished this opportunity even more so!

She was deeply aware of how precious such an opportunity was and how difficult it was to come by.

She cherished every minute and every second of her time, and besides the necessary rest, she cultivated hard every day.

Once in a while, Immortal Zombie Giant Sun would summon her to evaluate and guide her.

This time when he called for her, Immortal Zombie Giant Sun was no longer able to watch Hei Lou Lan train in such a self-damaging way, he urged: "Hei Lou Lan, my descendant. Don't be overly harsh on yourself, everything in the world emphasizes on balance between work and rest. Gu Immortal cultivation is also the same. If you carry on like this and stay in a tensed state all the time, it will instead be harmful."

Hei Lou Lan faced Giant Sun immortal zombie but still insisted on her thoughts: "Lord ancestor, the toughness I am experiencing is not too much to handle. In the past, I cultivated beside Fang Yuan and saw the effort he made. The world thinks he got his current accomplishments because of the help that venerables gave. But in my opinion, even if no one helped him, based on his character, he would still be able to stand out and wreak havoc in a region."

Immortal Zombie Giant Sun was slightly stunned before smiling, appreciating Hei Lou Lan even more: "Looks like you are regarding Fang Yuan as your enemy and the goal to surpass. Good, with such determination and spirit, you are worthy of being my, Giant Sun's, descendant!"

"But, it will be very difficult for you to surpass Fang Yuan, it is simply like a mortal trying to ascend to heaven. I won't conceal it from you, Fang Yuan's strength has been increasing rapidly in this period of time, the speed is extremely astonishing."

Hei Lou Lan looked at Giant Sun immortal zombie doubtfully.

Immortal Zombie Giant Sun explained: "Although luck inspection Immortal Gu is no longer with me, Luck Suppression Heavenly Palace contains similar luck inspection killer moves, moreover because it has been here for too long, all the luck of the five regions and two heavens are in my sight."

"Recently, I have been looking at Eastern Sea repeatedly, over at Xia clan's headquarters, the luck has been rising constantly and fiercely, even I have rarely seen such a case in my life."

"Spectral Soul, Heavenly Court, and my Calamity Luck Altar failed to kill Fang Yuan, finally giving him the chance to develop. He obtained the help of several venerables and has excellent character, as well as plenty of experiences from several rebirths. The more time he has, the stronger he will grow. If you want to catch up to him, you will only have a trace of hope if you make a desperate effort."

Hei Lou Lan's expression was serious as she asked firmly: "Please instruct me, Ancestor, what way is there?"

Giant Sun Immortal Venerable shook his head slightly: "It is not time yet, continue to cultivate hard for now."

Chapter 2080: Fang Yuans Luck

2080 Fang Yuan's Luck Over two months had passed in the sovereign immortal aperture, a brand-new Cooking Luck Pot finally presented itself before Fang Yuan.

Its whole body was shining in golden light. When observed carefully, a platinum light would occasionally shine inside and outside the pot, giving a strong sensation of richness.

The sides of the pot were as thick as a child's fist.

There were eight lifelike dragon statues around the outer edges of the pot.

These eight dragons' tails were all at the base of the pot, coiling around each other and extending their claws to become the legs of this pot.

The eight dragon tails pointed in eight different directions, towards the north, south, east, west, northeast, northwest, southeast, southwest.

Each dragon claw was attached to the surface of the pot, the dragon bodies moved upwards as the dragon heads hung on the edge, looking inside. The dragon eyes were shut as if they were sleeping.

Cooking Luck Pot was now a rank eight Immortal Gu House!

Compared to before, not only had its size increased, the eight dragon statues were clear and vivid, unlike the blurry and crude image when Cooking Luck Pot was rank seven.

The current Fang Yuan possessed over nine thousand heaven path dao marks, the difficulty in conceptualizing compound killer moves had decreased sharply. So, even though Fang Yuan's luck path attainment level was not high, he had the ability to modify Cooking Luck Pot and make it even stronger.

But after careful consideration, he gave up on this idea for the moment.

If Cooking Luck Pot were to be made like Four Elements Square Regret Blood Refinement Pool, then when it was used outside his aperture, its might would be reduced greatly. And Cooking Luck Pot needed to be used outside the aperture.

When Fang Yuan fought Qin Ding Ling before, Qin Ding Ling targeted Fang Yuan's luck, but at the crucial moment, rank seven Cooking Luck Pot appeared above Fang Yuan's head to block Qin Ding Ling's rank eight luck path killer move.

At Fang Yuan's level, because the enemies were too strong and had many methods, his defense had to be all-rounded. Fang Yuan not only needed to protect his body and soul, he needed to maintain his luck as well.

The strongest experts placed great emphasis and importance on their own luck.

Because it could affect a major part of their strength!

Even the recently revived Demon Immortal Qi Jue had such thoughts. Back when he fought Qi Sea Ancestor and Qin Ding Ling above qi sea, in order to preserve his luck, he chose to retreat wisely.

Fang Yuan raised the rank of Cooking Luck Pot to protect his luck. Cooking Luck Pot's structure and origin made it such that it was weak in offense and strong in defending the Gu Immortal's luck. Luck path offensive methods were mostly in the true inheritances of all living beings luck and heaven and earth luck.

The luck path Immortal Gu used in Cooking Luck Pot were all rank eight and were enough to defend his luck.

Naturally, Cooking Luck Pot still had Immortal Gu that were not rank eight.

For instance, food path Immortal Gu Cook was still at rank seven.

It was not that Fang Yuan did not want to raise its rank, he lacked the corresponding rank eight food path immortal material. Four Elements Square Regret Blood Refinement Pool's blood asset Immortal Gu's situation was also the same, it was still at rank seven due to the lack of rank eight blood path immortal materials.

Rank eight food path immortal material and blood path immortal material were not easy to gather in a short period of time.

This was greatly related to their paths.

The more flourishing the path was, the more corresponding immortal materials there would be. They would be easier to gather and there would be many more Immortal Gu. There would also be a lot of Gu Immortals cultivating that path.

In Gu Immortal cultivation, the more Immortal Gu recipes were created, the more immortal materials were cultivated which then added on to the prosperity of the whole path.

Food path and blood path were never truly prosperous, there were also few Gu Immortals who cultivated them. Compared to food path, there were more blood path cultivators, but most of them were only Gu Masters. There were few blood path Gu Immortals, which was not much help in making blood path popular.

On one hand, it was because of Heavenly Court's Demon Judgment Board. On the other hand, Blood Sea Ancestor, who created blood path, was only at rank seven.

Speaking of it, luck path was also never prosperous, but because Giant Sun Immortal Venerable had created and developed it, its reputation was spread far and wide.

Gu Immortals who truly cultivated luck path were not numerous.

After Giant Sun Immortal Venerable passed away, there were almost no luck path experts in history. Maybe only Qin Ding Ling could be barely considered one.

The main reason was because Giant Sun Immortal Venerable had hidden his three true inheritances deeply and did not spread them wantonly.

Qin Ding Ling could become a famous luck path expert because she had derived some foundation from Giant Sun Immortal Venerable, and later, she changed her original path and spent countless years in comprehension before she was able to reach the success of today.

So, Fang Yuan felt extremely fortunate for being able to raise the ranks of so many luck path Immortal Gu.

Because luck path was not prosperous, it was difficult to gather luck path immortal materials. He was able to loot so many luck path immortal materials from the two heavens' grotto-heavens, which was something that would not happen frequently.

Naturally, the success in refinement was mostly due to Four Elements Square Regret Blood Refinement Pool.

Without Four Elements Square Regret Blood Refinement Pool, then it would have been impossible!

Four Elements Square Regret Blood Refinement Pool had fifty to sixty percent success rate in refining rank eight Immortal Gu. This success rate was enough to mass-produce rank eight Immortal Gu.

A higher success rate led to lower expenditure of immortal materials, which saved Fang Yuan a large amount of luck path immortal materials.

If it were an ordinary Gu Immortal who had all of Fang Yuan's luck path immortal materials and they were able to advance just one rank eight Immortal Gu successfully, they would already be immeasurably thankful.

When ordinary Gu Immortals refined rank eight Immortal Gu, their expenditure of immortal materials would be at least more than ten times of what Fang Yuan used!

Old Ancestor Xue Hu was a good example.

To gather materials to refine rank eight Fortune Rivaling Heaven, he spent all of his accumulations and even squeezed his subordinates dry, finally leading to the collapse of the whole of Snowy Mountain blessed land.

This was still the case when Old Ancestor Xue Hu had captured Ma Hong Yun, which saved him a large amount of luck path immortal materials!

Forget about Old Ancestor Xue Hu, even Giant Sun Immortal Venerable and Thieving Heaven Demon Venerable had to cooperate with Long Hair Ancestor for Gu refinement.

With Four Elements Square Regret Blood Refinement Pool, Fang Yuan's refinement path strength was absolutely among the top three in all of history. This advantage was just brought into play and had already shown a frightening performance, the benefits it brought were unimaginable for outsiders!

At least, Fang Yuan was aware that even Long Hair Ancestor, who had once cooperated with Giant Sun Immortal Venerable, did not have as high of a success rate as him.

A new issue popped up in front of Fang Yuan, he was slightly worried of being too successful in advancing his Immortal Gu to rank eight; with too many rank eight, he would have to worry about their food.

The food of rank eight Immortal Gu was a lot more difficult.

Back then, to feed regret Gu, Fang Yuan directly created an enormous flower mist extreme marsh!

But Fang Yuan was already prepared in this aspect, his wisdom path attainment had always been supporting him silently.

Fang Yuan learned from Time Difference grotto-heaven and did not hesitate on spending a large amount of material resources and effort in constructing year essence sub-pools, which he spread over the whole of the sovereign immortal aperture, creating various time path zones.

With these zones and the help of over nine thousand heaven path dao marks, the problem of feeding rank eight Immortal Gu was alleviated to a huge degree.

Fang Yuan willed and activated rank eight Cooking Luck Pot to inspect his luck.

Cooking Luck Pot quietly floated above his head, it was slightly drifting earlier but was now stationary as it started to rotate slowly.

The previous Cooking Luck Pot's rank was lower than Fang Yuan's which led to Fang Yuan being unable to inspect all of his luck; every time, he could only inspect the portion inside the pot.

But now, Cooking Luck Pot could bear all of Fang Yuan's luck.

Fang Yuan could finally witness the complete form of his luck again.

His luck was like a pure silver pillar of light, even though it was slim, it was tall, shooting towards heaven, seemingly trying to pierce the sky.

At the bottom of this dense pure silver light pillar, there was a lump of yellow qi guarding it, looking like a dust cloud that seemed to support the pillar.

At the top of the pillar, there were three clouds, one was black as ink, one was golden and dazzling, one was shining with starlight.

Such a scene made Fang Yuan fall into contemplation.

After a long while, he collected his thoughts and observed the luck again.

But this time, he did not observe his own luck, but looked at his clones' luck outside Cooking Luck Pot.

Among the clones' luck, the most majestic and grand naturally belonged to the Qi Sea clone.

Qi Sea Ancestor's luck was like the ocean. Milky white qi currents flowed, becoming endless sea waves.

"The Qi Sea clone's luck fits his name, they are both a qi sea." Fang Yuan knew the reason.

The luck's appearance was tightly connected with the individual's condition.

Qi Sea Ancestor's qi sea luck not only originated from his name, but also because he took command of qi sea and controlled the qi sea formation. More importantly, several days ago, Fang Yuan had completely handed the killer move unlimited qi sea to the Qi Sea clone.

It was because the Qi Sea clone wanted to create his own combat system and wanted unlimited qi sea to be its core.

"The Qi Sea clone possesses over two million qi path dao marks, has many qi path Immortal Gu along with the complete Primordial Origin qi path true inheritance, and is also the Righteous Qi Alliance's alliance leader. All these reasons gave birth to such a boundless white qi sea luck."

"But although this white qi sea is enormous, the qi currents are moving in disorder and chaos, which shows hidden undercurrents and threats."

Fang Yuan thought carefully and felt this hidden threat originated from two aspects.

First, the Qi Sea clone was attempting to create a combat system which was causing his thoughts to be in chaos. If he succeeded, maybe the qi sea would recover. If he failed, this internal chaos might still continue.

Second was the Qi Sea clone's clone identity. The relationship of the Qi Sea clone and the main body was not exposed but there was the danger of it being exposed at any time. Demon Immortal Qi Jue already knew this but was suppressed by Divine Emperor City.

Once this secret was revealed, it would have a severe impact on Qi Sea clone, which was why there was a possibility of the qi sea luck falling apart.

"The Qi Sea clone is my strongest clone, he has rank eight cultivation and pseudo venerable battle strength. So, he has such a vast milky white qi sea luck. But it can be seen from this that the Qi Sea clone has a flaw; there is limited space to progress and grow."

Fang Yuan compared his own pure silver light pillar with the milky white qi sea luck, he could clearly see that the pure silver light pillar was shooting up towards the sky while the qi sea luck's foundation was unstable, it could only suppress his current situation.

"If the qi harvest fruit plan shows results, maybe the qi sea luck could reach the clouds as well. Unfortunately, the qi harvest fruits left in the two heavens' grotto-heavens are showing extremely slow growth. It will be very difficult for them to give any qi path dao marks to the Qi Sea clone anymore."
