

KRYPTONIAN: MAN OF STEEL

Chapter 10 Dragon Ball Cheats

As usual, Luther first studied the situation of his cells in the sunshine of the Dragon Ball world for a period of time.

Of course, in his daily life, he no longer dares to touch the sun like he did in the Marvel world. He has developed the ability to filter sunlight through a biological force field.

Research has found that his cells are more active when exposed to the sun in the Dragon Ball world.

I don't know whether this kind of activity is good or bad.

But it didn't matter, Luther quickly found the Crane Immortal.

Compared with Kame Sennin, Crane Sennin is obviously easier to talk to. As long as you pay money, you can learn Qi development from him.

Luther was very reserved when facing the Crane Immortal. Although the Crane Immortal did not have the Turtle Style Qigong that the Turtle Immortal could push away the moon, the destructive power of the Qi was terrifying, and Luther didn't know if he could bear it now.

At the same time, he also had to make sure he was still angry. If not, he would have to go find the Dragon Balls and make a wish.

With the Kryptonian's super brain and body control ability, Hexian didn't take Luther seriously at first. You spend money and I teach you, it's that simple.

As a result, Luther learned the Crane Senryu in less than an hour, and even further learned Chi!

This surprised Hexianren, and even made him feel astonished. He had never encountered such an unreasonable genius as Luther.

"Is this anger?"

After Luther learned to breathe, he instantly felt stronger.

This kind of energy fills the whole body and strengthens the body's feeling, which is very intoxicating.

"What a powerful energy, apprentice. Your strength has surpassed mine. Maybe even my brother is no match for you!"

Hexianren said excitedly, he could feel how powerful Luther's Qi was, it was a pillar of Qi rising into the sky!

And he didn't need to teach Luther how to control Qi, Luther could control this huge Qi by himself!

This is unquestionable genius, genius beyond imagination.

"Ah, thank you, Master, then our title of master and disciple will end here."

Luther dropped a bundle of bills.

"Wait...are you leaving now, Luther?"

He Xianren looked at the large bundle of banknotes. It usually smelled good, but now it didn't smell good anymore. He felt that Luther smelled better.

"goodbye....."

Luther bursts out of super speed and disappears.

He felt his own Qi continuously pouring out. The Kryptonian's Qi was so powerful that it was beyond imagination that Luther didn't even know what his current combat power was.

Anyway, when there is no awakening energy, he feels that Crane Sennin can barely compete with him, but he has retained his strength, so the combat power may be more than 100 points of combat power according to the calculation of Dragon Ball.

Now, I don't know.

Because with the strengthening of Qi, his current strength is beyond imagination.

"Let me think about it, is there anything else worth taking from the Dragon Balls, such as the Super Divine Water to stimulate its potential?"

Luther thought of super holy water. Super holy water is different from the previous super holy water. Super holy water is actually ordinary water, and super holy water does have unpredictable divine power just like its name.

Super Divine Water can activate one's own potential and greatly improve combat effectiveness. However, Super Divine Water is highly poisonous. People who drink Super Divine Water must first have a pure heart, otherwise they will be poisoned to death by Super Divine Water.

Super divine water is a treasure left by the gods of the earth. When humans drink it, they must first resist the toxicity in order to activate their potential.

There are also fairy beans. Needless to say, this thing is incredible. The problem is that it cannot be taken away because the passage is too narrow.

"If the potential inspired by the super divine water is Sun Wukong's gorilla, could the potential inspired by the Kryptonian be the Sun of Destruction?"

Luther thought thoughtfully, as for whether he would be poisoned to death, just kidding, when Kryptonians are basking in the sun, it is equivalent to other people eating enhanced versions of fairy beans all the time.

It would be weird if it could really poison a Kryptonian.

Finding Kalin Tower is very simple, Luther doesn't need to climb up, he can just fly up.

"Who are you?"

The Cat Immortal on the tower saw Luther suddenly appearing and immediately became alert.

Because it sensed Luther's aura, that constantly surging and majestic aura!

"I mean no harm, Cat Sage."

Luther said to the Cat Immortal.

"What brings you here?"

the cat fairy asked.

"I want super divine water."

Luther said with a smile.

"...Do you actually know about Super Divine Water? Did that guy Wu Tian tell you about it?"

The Cat Immortal was a little surprised.

"However, you have to think carefully. Everyone who has drank the super magical water so far has died."

"It doesn't matter, isn't there someone else who has succeeded?"

Luther shook his head.

"All right."

The Cat Immortal would not refuse. He turned around and took out a teapot with the word "神" on it from the room.

Luther breathed a sigh of relief. It was the comic version of the Super Divine Water. If it were an original animation, you would have to go to the Northern

Labyrinth and accept the test of inner darkness before you could meet a mountain god and get the Super Divine Water.

Luther didn't know if he had the patience to make such a trip.

"That's enough to drink."

The Cat Immortal poured out a cup, handed it to Luther and said.
