

Kryptonian 101

Chapter 101

"Damn, I didn't expect that Ge Xiaolun would be spoiled so quickly."

Luther read the entire dark plane information, which was equivalent to "watching" the process of the demon civilization and Ge Xiaolun.

This left Luther speechless, but it seemed to be normal. Ge Xiaolun originally had poor willpower, and with the "infatuation" gene, Du Qiangwei joined the demon civilization, and then had the reputation of protecting the earth with the help of demon civilization. exist.

Ge Xiaolun must have followed suit.

Of course, Ge Xiaolun did not do this in reality, but now the demonic civilization has subtly influenced Ge Xiaolun, making Ge Xiaolun have bad angels. When he sees an angel, he wants to go up and kill the other person's subconscious, and the demonic civilization has a negative influence on him. good.

There is also his happy life with Du Qiangwei on the Devil No. 1, where "lovers eventually get married."

I have to say that Heifeng is really good at playing, first rising and then suppressing. Without that period of "happy life", Ge Xiaolun would not have gone so completely crazy.

"With the addition of Ge Xiaolun, the angels will definitely suffer heavy casualties..."

Luther held a moment of silence for the following angels.

But they could be resurrected later anyway, so Luther did not observe silence for long.

Ge Xiaolun still has no way to exert his genetic ability, but just a "Silence" can subvert the dark energy and make all the angels lose control. In the original plot, Angel Yan was restricted by the dark energy, and was suddenly defeated by the sword demon Atuo. Counterattack.

Otherwise, even if Holy Kesha is disconnected, Angel Yan can still compete with the sword demon Atuo.

...

Grand Canyon, secret meeting.

The three permanent members of the United Nations are discussing via video conference.

The situation in the beautiful country is not good. Now they can only hide in the Pacific Ocean because there are too many demons and too many gluttons.

"Please see, about half a month ago, we observed a large number of black spots appearing in the outer reaches of the solar system. They slowly surrounded the entire solar system in a way that violated the motion of celestial bodies. After we zoomed in on the image through the super satellite, It is certain that they are spaceships..."

Hearing this, everyone present had unhappy expressions.

"Is it the spaceship of the Taotie civilization?"

One of the people with a hooked nose asked.

"Yes, judging from the shape of the images, they are consistent with the spacecraft of the Taotie civilization that once appeared on the Blue Star and are still invading and destroying it now, including Grand Cross ships, battleships, and floating gunboats. Our existing observation methods and technologies Their exact location cannot be detected."

Technicians enlarged the picture.

"Currently we can only judge their situation based on limited images. They don't seem to be continuing to move forward, but are establishing a front line. As for their number, the number of warships we observed alone is more than 300!"

This number gave everyone present a headache.

Not to mention the larger warships, the large cross-ships and floating gunboats alone were difficult for them to deal with, and the battle loss ratio reached 1:100 or more.

The beautiful country has lost most of its wealth, and even the Haters Alliance is gone.

Hearing that there were so many alien fleets watching eagerly, they all felt that Blue Star might not be doomed.

"Are they afraid of the Xiongbing Company?"

The representative of the Celestial Dynasty asked in confusion, what is the point of setting up a front in the universe?

It looked like he was afraid of something.

"No, according to the active detection reports of the Taotie civilization, they are afraid of the greatest evil in the known universe, the Demon Queen Morgana and her extremely evil civilization - the Demon Civilization, as well as the mysterious Krypton with unknown attitudes. Civilization, and angelic civilization."

Ducaao replied.

How could the Xiongbing Company be the object of fear of the Taotie Civilization? The Battle of Tianhe has already concluded. The Xiongbing Company could not defeat several large cross ships even after exhausting their efforts. If it were not for the special abilities of Di Leina and Du Qiangwei, The Xiongbing Company is probably gone.

The representatives of Blue Star didn't look very good-looking, and they had to rely on the intimidation of others to prevent the army of the Taotie Civilization from coming.

But now, compared with the fleets in the universe, the Taotie civilization on Blue Star seems like a small fight.

However, even such a small fight is not something humans can bear.

It is unimaginable that if the fleet of the Taotie civilization comes, it will probably be a disaster for mankind.

The meeting ended hastily. The beautiful country repeatedly asked China to disclose the super genetic technology of Xiongbinglian. Now at the time of human survival, China should not be so selfish.

Tianchao didn't bother to pay attention and refused politely.

"Hmph, I knew the people of China were unreliable!"

After the people from Beautiful Country ended the video conference, they said to their subordinates.

"So, join Queen Morgana's command, sir, Queen Morgana can protect us and give us eternal life!"

"...In this current environment, can't we catch up with the angel civilization?"

"No, the angelic civilization is not the god we believe in, and the City of Holy Lord has replaced God with the angel queen, but they have not received the protection of angels, and the City of Holy Lord has now become a land of demons. "

"Where's the Kryptonian civilization, that powerful god-king?"

"Kryptonian civilization is even harder to contact. We don't even know where they are."

"...If this is the case, then I have no choice. I hope the citizens of the beautiful country can forgive my decision!"

The beautiful country does not want to perish like this. After all, it is a joint-stock company disguised as a country. It is not surprising that there will be gangsters. They are capitalist countries and profit supremacists.

There is no point in the floating island that Holy Kesha transferred to. Next, we have to watch the growth of the power of the galaxy here, so of course there must be a good place to watch.

Hundreds of angel guards and soldiers are used to prevent the Kryptonian civilization from having any ideas, in other words, to keep track of it.

"Yan, Morgana dropped a demon warrior on Fraser, you go and destroy it."

Holy Kesha suddenly said to Angel Yan.

Naturally, Morgana's actions cannot be hidden from Holy Kesha.

"Yes, Queen!"

Angel Yan realized that Morgana planned to take action against Enisid, and he didn't know whether to kill Enixid or to use Enixid to draw the angel's attention.

"It is your old rival, Sword Demon Atuo, Morgana's general and a third-generation warrior. Be careful."

Holy Kesha warned Angel Yan.

This time she did not let Ge Xiaolun, the force of the Galaxy, follow her to cultivate feelings because she read Ge Xiaolun's dark plane information. Now Ge Xiaolun should hate angels and have murderous intentions towards angels.

Chapter 102 Powerful Black Hole Engine

But it doesn't matter, for Holy Kesha, it's just a lost opportunity to cultivate feelings.

There are plenty of opportunities like this ahead.

They have plenty of time.

Luther knew the news that Angel Yan was leaving for Fraser. In order to hold Angel Yan back, the sword demon Atuo would not show up at first. It would only appear after Holy Kesha went offline.

Even if the divine body is achieved, there is nothing special about the divine body of the demon civilization. It may be better at transporting wormholes, but it is simply impossible to be Angel Yan's opponent.

"Finally, we have waited for this time, waiting for the party's victory!"

Luther said.

Considering that there will be wars with the Triangle Civilization, the Sky Slag Legion, the Gluttonous Civilization, the Giant Wolf Civilization under the command of the God of Death, Carl, and other civilizations.

Luther is now working on producing the God-killing power that belongs to the Kryptonian civilization. After understanding what the God-killing power is and its technology, mass production will not be a problem.

And there is no need to rely on God-killing weapons to exert the God-killing power like the God-killing power of Promise Star. Now the Kryptonian vanguard soldiers with silver armor and silver wings created by Luther are all genetically equipped with God-killing power. Power, the super gene engine can drive the power of killing gods.

This allows them to add god-killing power even if they don't have god-killing weapons in their hands, displaying terrifying destructive power and pertinence.

All of them are third-generation super warriors. The ones with golden armor and golden wings have also been strengthened and upgraded, becoming third-generation divine bodies, not to mention the god-killing power, peak beast body, invincible body and god-killing martial arts.

As for the original ten Noxian Gods of War, they remained unchanged. Luther re-created two void warriors.

These two void warriors both use a large amount of void matter as the core of the void engine. Although it is not as high as the energy level of void particles, it is definitely stronger than Howl.

Anyway, Holy Kesha will be coming to an end soon, and the Void Warrior no longer needs to hide.

"The world of Super Seminary is really outrageous. Black hole algorithms can be developed. This is the key to the black hole engine..."

Even Luther himself built a black hole engine.

Study black holes, use supercomputers to calculate the formation of black holes, and then write algorithms, just like superpower algorithms. However, the algorithm of the black hole engine is too complex, and ordinary supercomputers and even celestial supercomputers cannot do it.

According to Luther, it only took him less than a day from calculation to completion. This super brain is also very useful.

His void engine is fully configured, and there are simply too many void particles to use up. Even if the deformed void particles consume more energy than anything else, Luther can recover more energy with one breath, so his void engine It's also incredibly functional.

If the God of Death, Carl, does not have more advanced void technology, then this black hole engine that combines the anti-void ability of the Galaxy Power with the void technology of the Void Engine Sword of the Super Seminary and the secondary biological engine technology of the Angel will be the super Seminary. The most powerful void engine ever created.

A full 500-frequency high-frequency black hole engine!

If you include Luther's own biomass computer engine and super brain...it's impossible to calculate.

At least with this black hole engine, Luther already has the ability to completely explode the computing power of large clocks.

It's just that Luther doesn't know how to exercise and train his super brain. Humans have developed various methods for exercising the brain and training the way of thinking. The super brain is now in a completely primitive state. Luther has tried to use human methods to train the brain. Exercise, but the effect is average.

The super brain adapts to these methods in almost microseconds, which means that even Yiduidi cannot touch the potential of the super brain.

"Black hole engine program activated!"

[The black hole engine has additional black hole drive algorithm, additional void controller, additional anti-void ability, additional void ability, super defined matter, super concept rewriter, super space definition, super gene rewrite definition!]

[Black hole driving algorithm: simulated black holes, miniature atomic black holes, medium-sized massive black holes, large supermassive black holes, galaxy-level black holes, the ultimate trick·black hole incarnation!]

Luther felt the changes in his body instantly. His body itself was the most powerful body with unlimited potential.

However, the Kryptonian gene and the Doomsday gene are both castrated versions. If you get the Code of Life, you may be able to make up for the defects of your own genes and go further. However, this is impossible, so now he has worked hard to research it. black hole engine.

The super gene definition function is activated!

[Start detecting the target. The target belongs to the Kryptonian civilization life form. It is an advanced fourth-generation divine body shell. It comes with the Doomsday super gene, the legendary Super Saiyan super gene, the mutated Kryptonian super gene, the Galaxy Power super gene, and the Nox star. Ares Super Gene!]

[Starting to analyze the target gene structure... The solution is extremely difficult, please apply for super brain computing power support...]

[The application was successful, redefining and rewriting the target super gene!]

[Defined as completing the Doomsday super gene, completing the Kryptonian super gene, and completing the legendary Super Saiyan gene!]

[Rewritten as three super genes fused into the super-destroying Kryptonian gene!]

Luther issued two consecutive command procedures.

[Complete and rewritten in progress, progress 0.00001%...]

Then the progress got stuck there.

"No way, can this be stuck?"

Luther pondered, he didn't know how difficult this thing was, but the computing power of the super brain was still stuck there, which meant that this project was beyond imagination. Now it has only made a little progress, reaching 0.00002%.

However, at least it is still moving forward, although slowly, but Luther can feel that his body is undergoing earth-shaking changes, and more powerful forces are constantly pouring out.

"My idea is not wrong. In the current situation, unless we can create a more powerful void engine, we can only waste time."

Luther was thoughtful.

More powerful void technology can probably only be mined from the power of the galaxy, if the Super Seminary and Shenhe civilization have not reserved it.

As for the Death God Carl, he has been suppressed by the Holy Kesha for too long, and has not yet obtained the full authority of the Great Clock, and it is estimated that he has not obtained any advanced void technology.

Luther can only study it by himself. Fortunately, he has a super brain, not a rigid big clock, so it is impossible for him to progress slower than the Death God Carl.

At the same time, Morgana, who was ready, finally couldn't help but attack the Great Canyon.

Dukao was teaching the super soldiers of the Heroic Company on the deck of the Grand Canyon, when suddenly a bullet blew his head off!

Chapter 103 The prologue begins

"Queen, we have successfully killed the war madman Dukao."

The demon on Demon One said to Morgana.

"Damn, a war madman can die so easily, it's like acting."

Morgana was furious, but she soon didn't care about it, because Tirena had already released a radiation-free micro-solar flare bombing attack on the detected wormhole, and the demon warrior was almost melted.

"Queen, Di Leina is too difficult to control. Someone needs to cause harm to her and reduce her current energy!"

Black Wind activated the malicious thought implantation program he left in Di Leina's genetic system, but it was not so easy to control Di Leina.

"Let Ge Xiaolun do it!"

Morgana said immediately.

Ge Xiaolun was looking at Du Qiangwei worriedly when General Dukao fell. Ge Xiaolun, who knew that the two were father and daughter, naturally became worried.

The next moment, Ge Xiaolun suddenly felt in a trance, his eyes darkened, and he mistook Di Leina in the sky for an arrogant and domineering angel, so his pupils shrank.

Angel is going to take action on the Grand Canyon?

"quiet!"

Ge Xiaolun yelled at Di Leina, and activated her anti-void ability. Di Leina suddenly felt that the dark energy in her body was out of control, as if there was a paradox in the algorithm, and she screamed uncontrollably and fell from the sky. on the deck.

With this interruption, Black Wind and Morgana successfully completed their control of Tireina.

"Blow up the Juxia and control the wormhole to disperse the super soldiers of the heroic company. Only when they are separated can we defeat them one by one!"

Morgana said.

All the gods want genetic resources, and Morgana is even more worried that her time rose will be targeted by God King Luther, so she plans to confuse the public.

"By the way, remember to broadcast first, the queen doesn't want to hurt my rose."

Morgana reminded her men.

"Yes, Queen!"

The demons all know how much Morgana attaches to Du Qiangwei, so naturally they won't care about this.

Then, Yuqin was directly snatched away by the devil. After Morgana controlled Di Leina to blast the Grand Canyon, she sent Di Leina to the designated place and handed it over to the God of Death, Karl.

"Seriously, Karl, this is your best chance. You can get rid of me and the sacred Kesana Bichi together. In this case, the known universe will be yours."

Morgana said to Karl, the God of Death.

"I will never do that, Liang Bing."

Death Carl said.

"It's up to you. I've already told you, Di Leina has also been sent over, and Luther has promised not to interfere."

Morgana said with a sneer.

"I understand, try to keep Holy Kesha from moving or looking back."

The god of death, Karl, did not have much confidence in using the big skull to capture the sacred Kesha. This was the first time that void technology was put into practice.

The Big Skull is a void weapon he created using a large amount of void matter. It can forcibly imprison people and move people to different spatial locations. It is much more convenient to use than wormhole transportation.

The premise is that the big skull can capture Holy Kesha. Otherwise, a strong man of Holy Kesha's level will react at the microsecond level. If he detects it and then avoids it, he will fall short.

In the original plot, Holy Kesha noticed it, but did not hide. She was probably still solving the big skull, or felt that she would not be taken away by the big skull.

After all, it is normal for Holy Kesha to have such confidence when she doesn't know about void technology.

The sacred body is absolutely impossible to transport with the computing power of Demon No. 1. In addition, nothing from the Death God Karl has been detected, so Holy Kesha naturally became careless.

"Dare to face me directly. It seems you have the confidence."

Holy Kesha saw Morgana appearing in front of her, and then said unexpectedly.

"let me see....."

Although Holy Kesha thought it was unlikely, she still wanted to read Morgana's data in case that one really intervened.

Although Hexi's true form was also there, after Morgana appeared, Holy Kesha asked Hexi to be wary of Luther.

It is said to be on guard, but in fact Hexi's current combat effectiveness is average. She did not learn from Holy Kesha and put the treasure trove of sacred knowledge into her dark plane, so it does not affect her strength anywhere. Hexi needs to put her heaven Only when the basic system is adjusted can it show its strength.

Otherwise, he would just be a more powerful fourth-generation king-level god.

Luther noticed that He Xi had a strange expression after he came to visit.

He never expected that in the end, he would help Morgana.

Otherwise, if Hexi's true body and Holy Kesha are here now, the God of Death, Karl, will probably give up on this plan, and Morgana will also run away and will not come here again.

Ge Xiaolun also appeared with Morgana at this time. His eyes were dark and he seemed to be completely under control.

This is not surprising. The nightmare has controlled him to dream of this scene tens of thousands of times. In addition, Ge Xiaolun can no longer distinguish between dreams and reality, so he thought it was a dream!

So not only did he become brothers with the demons, he also slaughtered angels on the battlefield, showing a bloodthirsty smile.

"Tsk, tsk, tsk, the devil really knows how to play."

Luther said with emotion that even if Holy Kesha banned Ge Xiaolun's angel gene wings, it would be useless. Morgana installed a pair of devil wings on him.

This makes Holy Kesha somewhat elusive.

"Is it too late to change to another Galactic Power?"

Saint Kesha looked at Ge Xiaolun's current appearance, and with a flick of her finger, several silver blades emerged from the air ripples around Ge Xiaolun, piercing Ge Xiaolun's body and nailing him to the ground.

In the end, Saint Kesha still did not decide to change the Galaxy Power. Since it has been born, no matter what, Saint Kesha will not easily change the Galaxy Power.

Who knows whether the Denor civilization and the Super Seminary still have the ability to cultivate a new Galaxy Power.

"Saint Kesha, you bitch!"

Ge Xiaolun roared at Saint Kesha without knowing whether he was alive or dead.

Then Saint Kesha frowned and forcibly closed Ge Xiaolun's mind, and Ge Xiaolun immediately fainted.

"We still have to let Yan come back to deal with the nightmare."

Saint Kesha was a little sorry that Ge Xiaolun could not get out of the influence of the nightmare. This is a good way to temper his spiritual will.

"Damn, Xiaolun!"

Morgana has regarded Ge Xiaolun as her trusted general. He is so powerful. The demon cooperated with him and directly slaughtered dozens of angels.

Holy Kesha couldn't stand it anymore, the whole army was about to be annihilated.

So she used a Dark Silver Archangel to easily defeat Morgana. When she was about to destroy Morgana completely, Holy Kesha was still nagging Morgana.

After all, this was the last time they met.

Chapter 104 Big Trouble

"Fuck, Karl, if your grandson doesn't take action, I'm going to die, Queen!"

Morgana saw that she was about to be killed by Holy Kesha, and she frantically exploded in the dark communication.

"It's done, you tell Holy Kesha not to look back."

Death God Karl said immediately.

However, Holy Kesha seemed to have noticed something and turned back, but she only had time to see a big skull swallowing her in one gulp.

"Karl..."

Holy Kesha came to a star that was about to explode.

"You can actually move me here?"

Holy Kesha said somewhat unexpectedly.

Karl, the god of death, appeared next to him.

"Theoretically, it's not moving, it's just changing your position in space."

Holy Kesha was thoughtful when she heard this.

"In other words, I am still near the moon?"

"That's right."

Death Cal doesn't mind explaining these things to Holy Kesha.

"Di Leina, the light of the sun, it seems that Pan Zhen and Lieyang Civilization are involved."

Holy Kesha looked at Di Leina in the distance who was redefining the Emerald Star, causing the star to rapidly reach the decay stage and enter a supernova explosion state.

She only needs to raise the knife with one hand to solve Di Leina's problem, and she can also solve her own problems.

But Holy Kesha hesitated.

"Queen Kesa, why don't you run away?"

The God of Death, Karl, knew that Holy Kesha had at least two ways to avoid the current death situation. The first one was to chop Di Leina with a knife.

By doing this, Death God Karl can use this to attack the righteous order of the Angel Civilization, and can also pull the Sun Civilization onto the chariot, and he has also taken precautions against this situation. Even if Holy Kesha does this, Can't run away.

The second is to leave here directly. The void barrier is currently not enough to prevent the wormhole transportation of Holy Kesha.

But on this point, the God of Death Karl also took precautions, and the Holy Kesha could not escape.

"Why should I run away? I want to see how you can destroy my order of justice."

Holy Kesha looked at the God of Death Karl calmly and said.

Death God Karl did not expect that to this extent, Holy Kesha could still maintain such a posture.

"Aren't you worried about the future of angel civilization?"

Karl, the God of Death, couldn't help but ask.

"I believe in my angels."

Holy Kesha said confidently.

...

"Your Highness Hexi, have you ever thought that if your Queen Kesha is really destroyed, your current situation will be very dangerous."

Luther suddenly said to He Xi.

"How is it possible, Queen Kesha..."

He Xi originally wanted to say something, but the next moment, she suddenly stood up with a look of shock on her face.

Because of Holy Kesha's reaction, she disappeared!

How is this possible, the man-in-law actually lost? ? ?

This is bigger news than the death of Holy Left Guard Nolan in the battle.

"Are you involved, Your Majesty the God King?"

He Xi suddenly thought of this possibility and looked at Luther in disbelief.

"No, if I want it, I can just do it myself."

Luther said with a smile.

"It seems that the matter has come to an end. Next, I will have to deal with something. His Highness He Xi, it is best not to run around."

Luther stood up and left.

Just as He Xi was about to say something, several war gods with black armor and black wings appeared, making no secret of their intention to keep an eye on her behavior.

Several gods of war with the power of killing gods were staring at him, as well as An Su Yinwu. Even if they couldn't destroy her fourth-generation divine body, He Xi was still intimidated.

The thing that Luther wants to solve is naturally Di Leina, the light of the sun.

After Morgana used her to destroy Holy Kesha, she threw her back to Earth.

After all, Morgana didn't want to offend Pan Zhen. There weren't many people in the Lieyang Civilization in the known universe who wanted to offend him. The main reason was that it was difficult to stop them from detonating other people's stars and destroying them together.

At this time, Luther took over Di Leina.

At this time, Di Leina almost didn't have much access to the gene lock. Pan Zhen had opened the access at the Tiandao Tower. Otherwise, no matter how awesome Demon No. 1 was, it would not be possible to directly unlock the access to the supernova explosion.

In that case, Pan Zhen and Lieyang Civilization would not let Di Leina leave Lieyang Civilization at all.

Luther's appearance here was a complete time lag. His super brain was able to unlock the super gene permissions that had obtained a complete backup of the power of the galaxy. Naturally, it was also able to unlock a complete light of the sun.

"Star energy drive, star drive, these two algorithms and technologies have finally been achieved..."

Luther didn't care that the last step of the incarnation of the sun was heavily encrypted. He already had the front-end technology and could develop it at any time if he wanted.

Di Leina was still in a coma at this time, and Luther quickly completed the analysis and pushed her into the earth's gravitational range.

Then Di Leina was captured by the earth's gravity and began to fall rapidly.

Luther returned to his supreme heaven.

He Xi was now under house arrest by him, but Luther later had her released.

"What exactly do you want to do, Your Majesty the God King?"

He Xi was puzzled and could not understand Luther's behavior at all.

"If you could understand, I wouldn't need to do this."

Luther replied with something very Riddler-like, and then asked He Xi to leave.

Although He Xi really wanted to know what Luther was going to do, she could only leave first in this situation.

The manly woman bowed out, and she didn't know how many things were waiting for her.

At the same time, the last words of Holy Kesha began to be spread throughout the angel civilization.

Through the Holy Knowledge Treasury, the shadow of Holy Kesha suddenly appeared in the dark plane of all angels.

"Confirm that Angel Yan will act as the new angel commander to protect our world for me. All angels and civilizations under his rule, please actively support and cooperate to assist Angel Yan to become the new angel king."

"Please understand that my state is no longer sharp. If one day I am disintegrated by the enemy, then our world of justice will need a new fighting god to regain what we have lost. Please also ask Angel He Xi to give her enough tests. He Xi, do you agree?"

He Xi couldn't help but swear when he heard this.

"I agree, you big-headed ghost, manly woman!"

After Holy Kesha fell, He Xi immediately let his space-based system start to connect to Holy Kesha's sacred atoms as soon as he left the Supreme Heaven.

But he found that he couldn't contact the holy atom of Holy Kesha.

"Big Clock, the God of Death Carl is also involved. That's right, only he can destroy the tomboy..."

He Xi looked at the mess in front of him helplessly.

"This is a big trouble."

Chapter 105 Dual Void Engines!

Holy Kesha fell, and the angels near the moon suffered heavy casualties. The demon civilization took revenge and complained.

Losing the connection and computing power bonus of the sacred knowledge treasure house, Angel Leng could only flee to Blue Star with her sisters.

Fortunately, the Kryptonian civilization did not stop them from going to Blue Star. Perhaps they thought that Blue Star was already a mess and didn't care about having more angels?

There were hundreds of angels and so many high-level guard angels, but only a dozen people died. Most of them died in the cooperation of Crocodile God Sodon and Demon Ge Xiaolun. If Holy Kesha hadn't shut down Ge Xiaolun's thinking, there would be more angels who died.

This is probably the biggest change Luther made to the original plot. He asked Morgana to take Ge Xiaolun in advance.

Especially when Du Qiangwei hadn't been subdued yet.

Luther didn't expect Morgana to be so straightforward or simply transplanted the demon gene to pollute Ge Xiaolun's underlying gene.

There are angel genes from tens of thousands of years ago in the bottom genes of the Galaxy Power. They were added by the angel civilization, so Ge Xiaolun has the original wings of the angel, but not the wings of time and space for time and space cruising.

That was after He Xi fully upgraded and abandoned the original angel genes, completely making the new angels and the scum of the sky two species.

And now, this part of the angel genes has been contaminated by the demon genes, which means that the bottom genes of Ge Xiaolun have become demon genes.

This is not surprising. Ge Xiaolun's willpower is very weak. The demon genes are most likely to arouse people's desires and emotions. After discovering that Ge Xiaolun is particularly obsessed with Du Qiangwei and has the desire to have ten school beauties, Morgana is surprised that the future of the angel civilization is this thing.

But she still let Ge Xiaolun fall according to this desire.

The demon civilization did not continue to hunt down these dozen angels. The hatred between them and the angels is not equal. After all, they can be resurrected, but the angels cannot be resurrected.

And Morgana only targeted the Holy Kesha, and didn't care about other angels. Of course, if they jumped in front of her, Morgana would not mind killing them.

He Xi did not stop and went back to Melo Heaven. She could not care about the life and death of these dozen angels. Melo Heaven was the most important thing now.

As for the future of the angel civilization of Galaxy Power... it is still a question whether the angel civilization can protect itself.

Although He Xi is also a king, she is not very confident in herself. After all, she does not think she can beat the tomboy.

Even the tomboy was destroyed, let alone her?

However, she still let her clone combat puppet on Blue Star go to Angel Leng and the others, as a protection.

Then He Xi thought of Luther, who was not in a hurry from the beginning.

Did he expect that the tomboy would be destroyed?

Luther returned to the Supreme Heaven with the super gene of the Sunlight and started to implement a Sunlight.

"Stellar energy drive algorithm, stellar drive algorithm, hasn't the Lieyang civilization been updated for tens of thousands of years?"

Luther was amazed. It even included planetary climate control technology, stellar light and heat regulation technology, etc. in detail.

The original design concept of the Sunlight was to illuminate the ultimate fear.

It is expected that when darkness cannot obtain matter and energy, Dilena will turn into the sun to illuminate the world.

Although Luther has not figured out how to make the law of conservation of energy and entropy reasonable.

Luther tried to drive the energy of the stars, and the nearby stars were naturally the stars of the Chiwu star system.

Suddenly, a ball of light and heat radiation energy appeared in Luther's hand.

"This thing is more promising than Dr. Octopus's thermonuclear fusion. After all, it is a real star."

Luther felt that his cells were greedily absorbing these stellar energies. Originally, his cell potential had reached its limit. Recently, due to the work of the black hole engine, it was getting stronger. At this time, after absorbing these stellar energies, his cells tore apart, and then quickly regenerated into more powerful cells to accommodate power!

"With the idea of the light of the sun, it should be possible to study the stellar compression technology and compress a star in my body!"

This is why Luther has always been obsessed with the light of the sun. The blue giant compressed energy gun in the black man is a similar concept, and the radiation of the blue giant is probably equivalent to a super power developer for Kryptonians.

The light of the sun can drive and ignite stars. As long as it is combined with space technology, it should be possible to compress a complete star.

At that time, Luther will be equivalent to having a continuously evolving promoter.

After all, stars are the real infinite energy furnace for Kryptonians.

Of course, the plot that has changed is probably Angel Yan.

The reason why Angel Yan's energy is insufficient in the original plot is that she spent energy to send Ge Xiaolun back to Earth.

Now, Angel Yan naturally does not need to send Ge Xiaolun away. After the sub-biological engine is activated and becomes a divine body, Angel Yan's energy is enough to recover the huge wound she was stabbed by Sword Demon Atuo.

Although Sword Demon Atuo does not have Ge Xiaolun's void engine sword, he still has the God Killing Weapon.

However, Angel Yan's condition is only much better than the original plot, which is not enough for her to return to the angel civilization.

So after Angel Yan made a judgment, he planned to fly to Blue Star to find Dilena to replenish and restore his energy.

From here, we can see that the angels do not have the technology to replenish stellar energy. Their stellar energy driving technology comes from the Flame Sword, and the Flame Sword's own energy reserves are also limited.

Angel Leng and his friends were beaten to the point of running out of energy when they were defending the North Star.

He Xi had studied in the Lieyang Civilization, but she did not solve the technical problem of replenishing stellar energy. I don't know if it is difficult to install or to avoid suspicion?

Or is it that the angels' own computing power is not enough to support them to calculate the stellar algorithm of the Chiwu star system?

No matter which one it is, it is a good thing for Luther.

"The light of the sun... has reached the extreme as a super gene, but since we have obtained such a precious algorithm and core engine, why not directly transform it into a stellar engine?"

Luther does not lack void particles, and the black hole engine cannot satisfy him. It is not said that there can be no dual void engines, right?

As long as the body can withstand it, two void engines are fine.

For Kryptonians, stellar engines are naturally better and more suitable. They can create stars at will. In this desperate situation, they can just create a sun to turn the tables.

"In that case, I can become a black hole god and a star god, provided that these two void engines are useful in other worlds."

Chapter 106 The King is pleased

After the destruction of Holy Ke'Sa, Morgana became more and more unscrupulous.

Of course, she was still afraid of Luther. This unreasonable god-king might turn against her and kill her, so Morgana did not show up and hid.

Although her hiding could only deceive him, didn't Luther still know where she would appear?

But now Luther has no time to care about her affairs.

After learning about Dukao's death and the destruction of Holy Kesha, Pan Zhen immediately came to Blue Star with the four guardians of Lieyang to look for Emperor Leina.

It's actually inappropriate to say that he was looking for her, because Pan Zhen didn't look for her seriously. He just wanted to avoid others coveting his goddess.

In Pan Zhen's view, all other sufferings are training for the goddess and will make Di Leina better in the future.

I have to say that the thinking of the God of the Super Theological Seminary is quite different. At least Luther would not think that letting his God be insulted is a tempering matter.

The Lieyang civilization of this world does not have the concept of a king humiliating his subjects and dying.

That's right, after all, it was a civilization that could make its goddess dance to please its courtiers.

Luther wanted to ask Di Leina if he wanted to help her clear the throne so that she could truly become Emperor Lieyang?

The Kryptonian civilization is willing to help others, and one hundred and eighty god-killing powers can probably equal the strength of the Lieyang civilization.

Di Leina had woken up at this time, and through her own super gene system, she knew what happened when she was controlled before.

This made Di Leina feel very painful.

She didn't want to go back to the Lieyang Civilization, and she had no way to go back to the Xiongbing Company. She could only wander around and become an evil god who went around fighting monsters.

"You seem a little confused?"

Luther knew that the space principal would find Di Leina, so he found Di Leina first.

"Are you... the god-king of the Kryptonian civilization?"

Di Leina had seen the opening scene between Luther and Holy Kesa on the Grand Canyon, so she immediately became alert.

She doesn't think she can deal with and threaten Luther. Even Karl, the god of death, needs to control her to detonate the star and create a supernova explosion to destroy the holy Kesha.

And if a large clock were not used to disperse the sacred atoms throughout the known universe, the sacred Kesha would be able to be resurrected after a while.

As a being of the same level as Holy Kesha, it is normal for Di Leina to be afraid.

"Don't be nervous, I don't have any ill intentions. If you have nowhere to go, Kryptonian civilization is willing to welcome you to join, the Empress of the Fierce Sun."

Luther extended the invitation seriously.

"You...invited me to join the Kryptonian civilization?"

Di Leina was a little at a loss.

"I just destroyed Holy Kesha, aren't you afraid that the angels will settle the score with you?"

"The angels no longer have Holy Kesha. Do you think I'm afraid that they will settle the score with me?"

Luther's words sounded completely innocent, and Di Leina paused.

"It's impossible for me to join other civilizations... What you want is the light of the sun, right?"

Di Leina shook her head and said.

"No, I'm not interested in the light of the sun."

Luther said righteously.

Di Leina didn't believe what Luther said. How could there be a god who wasn't interested in a super gene like the light of the sun?

"Because I have something better."

Then Luther raised his hand and made a small star appear above their heads.

Di Leina's pupils shrank and she stared at the small star in disbelief.

"How is it possible... that it's actually a real stellar object?"

She lowered her head and looked at Luther in disbelief.

"How is this done? Something like making stars..."

Di Leina couldn't wait to ask Luther, this is something that even the Lieyang Civilization has not been able to do. They have studied stars for so many years, and they can only drive stars and control changes in stars.

Although moving a star to attack or causing it to explode is a very powerful deterrent, it is definitely not as shocking as Luther's creation of a real star out of thin air.

This is not a concept at all. Just this time, Di Leina has already believed that there is really no need for people to covet the light of her sun. People who have thrown away the light of her sun have no idea how much technical gap there is.

"Want to know? Join the Kryptonian civilization. I will consider letting you know."

Luther said with a smile that the preliminary effect of using the stellar engine is not bad, but it is only preliminary and has not been completed yet, but it is enough to frighten Di Leina.

Although Luther can use magic to redefine Di Leina's thinking, the trouble is that this kind of technology god will stay connected to his own large database, and he can easily find problems and reset them.

It's like Angel Yan and Morgana deleted each other's friends, but when the connection was opened, both parties recovered.

Worse still, Luther thought that the Lieyang Civilization probably had the technology to resurrect Emperor Lena. They could resurrect Emperor Lena directly based on the dark matter data. Emperor Lena, who was firmly controlled by magic, would lose her identity as Empress of Lieyang.

"...Why do you want me to join?"

Di Leina couldn't help but start to doubt.

"The king is happy."

Luther's answer was very royal, and Di Leina looked at him enviously.

It's my pleasure to say this, how long will it take for her to do it?

"There's no way I'm going to join."

Di Leina shook her head and still chose to refuse.

"It doesn't matter, I welcome you to join us at any time."

Luther didn't think he could fool Dilena with just a few words. At least he had to wait until she was attacked by the Taotie civilization before he could save her.

Dilena, this little fool, would fall into his hands sooner or later.

"You..."

Dilena didn't know what to say. Luther had better technology that was far superior to the Sunlight, so naturally he didn't want to join because of the Sunlight super gene, and the Lieyang civilization was probably nothing to Luther.

The technology of creating stars out of thin air, the Lieyang civilization is no match at all.

Dilena therefore had a bold idea, that is, Luther wanted her to join because of her.

This was the kind of attention Dilena had never received. It wasn't that Pan Zhen and the others didn't pay enough attention to her, but their attention was only because of her genes. Others could also get such attention.

On the contrary, no one cared about her own opinions. Pan Zhen always said that he would cover for Dilena for a thousand years. During this thousand years, no matter what mistakes she made, Pan Zhen would help her deal with them. After a thousand years, Dilena would deal with them herself.

Dilena was very dissatisfied with this treatment. She felt that she was mature enough now and did not need a thousand years of growth and experience.

As a result, the top leaders of Lieyang Civilization treated her like a child.

Chapter 107: Deception

"What is your purpose, to compete with Xiao Lun for the position of the main god of the galaxy?"

Di Leina couldn't help but ask.

Ge Xiaolun is the main god of the future galaxy. This is something that all super-god civilizations know.

Of course, Di Leina wouldn't know it either.

However, she didn't think Ge Xiaolun was anything powerful, but Super Seminary, Angel Civilization and Lieyang Civilization all thought so. Although Pan Zhen didn't say anything, he also had a feeling that his own goddess could control the galaxy. The idea of power.

Look at what Lieyang Civilization has paid for?

A lot of resources and materials needed to cultivate super soldiers, and then they just asked for the insignificant position of captain of the heroic company, and sent their main god and empress to play house with a group of super soldiers and future gods.

This is actually similar to the future of angel investment, except that after Lieyang Civilization understood Blue Star's culture, it made a targeted investment in human relationships.

Angels are much worse in this regard. Angels are basically playing tricks to invest in the future. Guardian angels live and die for each other, fight for each other all their lives, and also protect the loved ones of each other...

The Lieyang Civilization judged that the Taotie Civilization had thoughts about Blue Star, and its own goddess could use this opportunity to train herself, and also build relationships and favors with future gods and super warriors.

It is not impossible to even use this to allow the Lieyang Civilization to enter the game and take control of Blue Star.

The theocratic meeting in the original plot to carve up Blue Star was actually carving up the genetic resources on Blue Star. Otherwise, how could anything on Blue Star be considered theocratic?

"Ge Xiaolun has joined the demon civilization, don't you know about this?"

Luther said lightly.

"What? This is impossible!"

Di Leina's eyes widened, how could Ge Xiaolun join the demonic civilization? Although he was a little timid, had been a deserter, was a little lustful, and stared at Du Qiangwei's big butt all day long, but Ge Xiaolun was the power of the galaxy, Deno The civilization and super seminary would have to go crazy to let him join the demon civilization, right?

"When you were attacked by nightmares, Ge Xiaolun was also attacked by nightmares. The difference is that Morgana brainwashed him, and the maliciously implanted thoughts made him evil and full of desires. He has fallen and is genetically infected. With the devil gene, he is no longer pure, and the angel civilization will not care about him. "

Luther said.

Every word made Di Leina tremble.

"If Holy Kesha was still there, they might have found a way to eliminate his demonic genes and give him abstinence for 10,000 years. But now that Holy Kesha has been destroyed, the angelic

civilization has no time to take care of itself. It was provoked by Holy Kesha when she was in power. There are countless enemies."

"As for the Deno civilization and the Super Seminary, although the death of the war madman Dukao seems very strange, but Cheng Yaowen disappeared, leaving only Du Qiangwei. They were dispersed by the demon civilization, and then changed into Blue Star's The natural environment such as electromagnetic waves, etc., without figuring out the parameters of the new environment, it is impossible for them to communicate, and they may not know that Ge Xiaolun has become a demon. "

After Luther finished speaking, Di Leina covered her head. She never thought that the situation would be so bad.

That is the main god of the future galaxy, the power of the galaxy with the highest hopes among the three major god-making projects, and he has just degenerated into a demon?

"It's all because of me..."

Di Leina said painfully.

"No, all the misfortunes in this world are only due to the lack of ability of the person involved. If Holy Kesha is strong enough, then she will not be destroyed. Ge Xiaolun will not be tempted and degenerate into a devil. If Ge Xiaolun is strong enough, he will not be tempted to become a demon. The civilization is strong enough, and the demons don't dare to invade Blue Star..."

Luther put his hands on Di Leina's shoulders.

"It's not your fault, Lena, it's just that they're not strong enough."

Di Leina was shaken when she heard Luther's words.

This is actually a kind of escape psychology of people. Luther cleverly took advantage of this, coupled with the art of discourse.

Of course, this is because Di Leina's mental age is not enough to successfully deceive her. Otherwise, there is no possibility of success when facing an older person like Angel Yan.

Di Leina has been sleeping and undergoing adjustments since she was born. She is actually very old, but the age when she is truly sensible is only that of a teenager or twenty-year-old. Di Leina's resistance in this regard is almost zero.

It is not that she has not received the education of being a god and an emperor, but those things cannot be used at all times.

At the very least, Di Leina didn't think of this now. She was blinded by Luther's sudden care and tenderness.

"Really? Is it really not my fault?"

Di Leina couldn't help but ask Luther.

"Actually, you are also at fault, Lena."

Luther said, Di Leina looked confused, what's going on, didn't you say I was not wrong?

"You are wrong, you are not strong enough either!"

This sounds a bit strong...

Di Leina wanted to say this.

"If Pan Zhen and the others hadn't blocked your gene lock and authority, would Morgana and the others have been able to invade your mind so easily?"

"If you hadn't been able to exert all the genetic power of your sun light, would the Hero Company have been destroyed? No, Morgana would be afraid of you, and the God of Death, Karl, would be afraid of you, and even the angelic civilization would not be under your control. Arrogant in front of me."

Luther's words were very tempting. Dilena was very dissatisfied with this kind of distrust. However, if a powerful solar flare was used on Blue Star, the radiation caused would be very troublesome and easy to cause accidental injuries, so Dilena used this point to convince herself.

Now, these have been shaken.

"Think about it, Rena."

"I will keep my expectations for you."

Luther left after saying that.

He was hinting and inducing Dilena's thoughts. Maybe Dilena would suppress these thoughts after thinking about it, but it didn't matter. The attack of the Taotie civilization would teach her a lesson. At that time, she would think about what happened today again.

Then there was an uncontrollable psychological collapse, like a big avalanche!

"Qilin is safe now..."

Luther began to think about what to do next. Should he take over the current situation of Blue Star's erosion?

But to be honest, Luther didn't want to enter the market now, because the benefits of entering the market now were not great. With Ge Xiaolun joining the demon civilization, Blue Star had no hope. If the Denor civilization and the Super Seminary did not give up, they could only hold on for a while at most.

Anyway, the original plot is almost the same whether Ge Xiaolun is there or not. Ge Xiaolun rose to prominence when he developed the Xiongxin void controller. Before that, Blue Star maintained stability regardless of the cost of casualties.

Chapter 108 Situation

This is also the reason why I look down on Ge Xiaolun.

Having been a deserter, it can be said that he has never experienced a war. Then he has experienced a war. Blue Star is devastated, with no retreat and no escape. What is he doing when others are sacrificing their lives?

Luther thought it would be better to give this kind of thing to Morgana.

At worst, someone else could be responsible for the power of the galaxy, and Xin Zhao would be good.

Liu Chuang's words are too extravagant. How heroic is it to give two top super genes to one person?

Luther even thought about resisting Ge Xiaolun and Morgana, for example, to prevent Du Qiangwei from joining the demon civilization and not being acquired by the demon civilization.

Also, tell him in front of Ge Xiaolun.

"Watch out, Ge Xiaolun, this is what Du Qiangwei uses..."

But this went against his reputation as the nemesis of justice... no, the nemesis of sin, so Luther hesitated.

However, Luther still tried to send a signal to the remaining Black Wall base of the Deno civilization.

"Chief Lianfeng, we have received contacts from the Lieyang civilization and the Kryptonian civilization."

The Black Wall Base was activated after the Great Gap was destroyed.

The Mangdangshan spaceship made of dark alloy is also here, but it has no energy to start. At the same time, Sun Wukong's eighty-eight sets of dark alloy armor are also here.

It can be said that if some of these dark alloys are used to arm ordinary soldiers into a black-armored armored force, the casualties will not be so large.

Taotie, giant wolves, and little devils can all be killed by guns and cannons. What ordinary people lack is just armor that can withstand their attacks.

You must know that even tanks can be penetrated by these alien individual weapons with one shot.

"Kryptonian civilization?"

Lianfeng didn't expect that the Kryptonian civilization would send them a message. The only information that could be used at this time was dark communication. However, even if it was dark communication, not everyone could use it in the face of the blockade of Devil No. 1. .

The devil himself can use it, and anyone with a celestial computer can use it, but the Deno civilization... cannot.

Deno 3 is still far away. Morgana was already able to come and go freely on the Great Gorge before she teleported Demon 1. She could also invade the database of Deno 3 at will. You can imagine the gap. How big.

"What message did they send?"

Lianfeng asked quickly.

After Dukao died, she became the top person in charge of the Deno Civilization and Super Seminary. Lianfeng could be said to have been very busy recently, especially since she found that Dukao had too many things that he had not told her. .

"The information from the Lieyang Civilization indicates that if we are willing to become the subordinates of the Lieyang Civilization and join the Lieyang Civilization, Pan Zhen is willing to lead the heavenly soldiers and generals of the Lieyang Civilization to wipe out all the monsters and monsters in Blue Star!"

The staff of the Black Great Wall said quickly.

"General Du has already explained before that Lieyang Civilization is so ambitious that we cannot believe their lies. The Taotie Civilization at least made it clear that they want to destroy us, but Lieyang Civilization is doing one thing overtly and another secretly. They always want to To enslave us and experience in us the feeling of God's sovereignty..."

Lianfeng sighed and said.

The conditions of the Lieyang Civilization seem to be very good, but Dukao has never believed in the Lieyang Civilization. After all, it is a civilization that can threaten Sun Wukong by massacring the city. Deep down, they want to enslave Blue Star.

"Where is the information about Kryptonian civilization?"

Lianfeng asked.

They still maintain a neutral attitude towards the Kryptonian civilization. After all, Dukao has not yet found any information about the Kryptonian civilization.

"They ask us to become the people of the Kryptonian civilization. In that case, the Kryptonian civilization will lead the magic weapons and generals to clean up all the monsters and monsters on the Blue Star."

The staff then said.

"Isn't this no different from the Lieyang Civilization?"

Lianfeng complained.

Well, now, a Sun civilization and a Kryptonian civilization both want Blue Star to join their ranks, and then they will definitely be able to keep Blue Star. The question is, what is the cost?

Logically speaking, they have no choice.

But from the perspective of the Deno Civilization and the Super Seminary, they have a choice, which is to use hundreds of millions of people as a melting pot to refine a true god, and then they can ignore the Lieyang Civilization and the Kryptonian Civilization.

As for these sacrifices, they are all worth it.

Luther kindly asked people to set up a broadcast to broadcast the conditions of Kryptonian civilization to humans all over the world.

Demonic civilization naturally cannot intercept or block the broadcasts from the Supreme Heaven. When Morgana found out, she just cursed a few times but said nothing.

If the Kryptonian civilization really fell in love with Blue Star, Morgana would have to find another place as her new home. Anyway, she didn't have the guts to provoke Luther.

Although it is not impossible to cooperate with the God of Death, Karl, to continue to destroy God King Luther, the problem is that Morgana's trust in the God of Death, Karl, is very limited. After solving the Holy Kesha, who was a serious problem, Morgana started to show off.

Can't you hide if you can't afford to offend?

Luther is not like her sister who would hunt her down across the universe.

Of course, before leaving, Morgana must take Du Qiangwei away.

After the Blue Star people heard the broadcast of the Kryptonian civilization, they became excited and wanted to join the Kryptonian civilization.

However, those who have the decision-making power are those who can contact the Kryptonian civilization, and even if the Black Great Wall Base knows about this, it is impossible to contact the Kryptonian civilization.

Luther didn't care either, he was just causing trouble for the people of Deno Civilization and Super Seminary.

In the original plot, Blue Star had no choice but to follow Denor Civilization and Super Seminary all the way to the end. Now, Luther just gave them a chance to choose.

Luther has always maintained his attention and care for Qilin, and has not been distracted by anything. Anyway, the super brain can operate multi-threaded easily.

He let his clone do other things, and only the one who accompanied Qilin was the real body, even when he went to find Dilena.

The situation in Juxia City is not very good now. When Morgana manipulated Dilena to destroy Juxia and the South China Sea Fleet, Juxia City was affected by the war between angels and demons. In the original plot, there was a shot of an angel falling from the sky and falling on a high-speed car.

Then the angel was killed by the demon who followed closely.

When the Holy Kesha was destroyed and the Kryptonian civilization seemed to not want to care about Blue Star's affairs, even the Celestial Empire inevitably fell into the situation of the original plot, or even worse, because the demons of the island country and several nearby small countries have spread over.

The demon destroyed the communication system, causing the stationed troops and weapons that needed signal calibration to lose signal, and the situation that was barely able to hold on collapsed instantly.

A large number of small demons poured in, and Luther and Qilin escaped with difficulty.

Qilin didn't expect Luther, an ordinary citizen, to be so powerful.

Chapter 109 Demand Relationship

Although it looks similar to the original plot of Liang Bing staying next to Du Qiangwei and pretending.

But at least Luther would not be like Liang Bing, who killed his father, destroyed the Grand Canyon, destroyed the Blue Star, caused so many casualties and still stayed with Du Qiangwei with peace of mind.

Luther has never done any of the above. At most, he chose to stand aside when he had the ability to intervene.

Anyway, he doesn't think that he is a Blue Star person in this world, so naturally there is no psychological pressure.

Luther also kept leading Qilin to run in the opposite direction of the Xiongbing Company. The most important thing was to prevent Qilin from falling into the hands of the Deno civilization.

He planned to choose a city at random when the Kryptonian civilization came. At that time, he and Qilin would become survivors in this city and accept the protection of the Kryptonian civilization. Then he could leave and do other things with peace of mind.

Although Qilin was worried about her parents' safety, there was nothing they could do under the current circumstances.

They can only barely protect themselves.

Of course, in order to avoid any bad emotions caused by Qilin knowing her true identity but not saving her parents, Luther still sent someone to protect her parents.

From the current point of view, Qilin's father is really brave. I can only say that like a daughter, like a father.

Luther was worried that Qilin would try her best to save people when she had the ability, and then Qilin and her old father would try his best to save people.

Fortunately, there are two gods-killing powers to protect him, otherwise he would have died long ago.

...

Morgana is annoyed now.

Ge Xiaolun clamored every day for Du Qiangwei to join the demon civilization. He felt that the order was wrong. It was obviously Du Qiangwei who joined the demon civilization first, and then he joined the demon civilization, but now he joined first.

Fortunately, Ge Xiaolun was controlled by desire and had no other brain space to think about this issue. He thought it was very simple, so just let Du Qiangwei join the demon civilization.

Their demon civilization will protect the safety of Blue Star from the invasion of the Taotie civilization and angel civilization!

How could Morgana make such a big show of asking Du Qiangwei to join? She couldn't guarantee anything.

So he could only appease Ge Xiaolun, and then look for opportunities to go to Du Qiangwei's side.

She has already thought about it. If things go wrong, she will immediately capture Du Qiangwei, and then spend thousands of years slowly polishing Du Qiangwei.

I don't believe that Du Qiangwei cannot be softened.

Therefore, under this situation, Du Qiangwei remained unnoticed for several months. Angel Yan's search for Di Leina was not found, so he was looking for Du Qiangwei instead.

Luther thought that Morgana couldn't be cowarded. There was only one possibility, and that was that Morgana hadn't found Du Qiangwei yet.

In the original plot, it seemed that it took a long time for Demon No. 1 to locate Du Qiangwei's existence.

Then Angel Yan flew back to Earth and located Du Qiangwei.

Angel Yan had been dead for a long time, and lush green grass had grown out of the original wasteland, forming a meadow, and he was resurrected at this time.

Considering that the time estimates between Fraser and Earth are not consistent, a conservative estimate is that it will take more than half a year or a year.

Du Qiangwei has been keeping in touch with the Black Great Wall Base. There is a very magical plot where Du Qiangwei goes to the Black Great Wall Base in the morning and rushes back to the team heading to Yellowstone City in the evening. You must know that Du Qiangwei is riding a motorcycle. .

Is it possible that this Black Great Wall Base followed the team?

Can I use some snacks? ! !

After thinking about it carefully, Luther simply gave up on this idea. Why did he think so much? The original plot has now become unknown to his mother. In this case, he has nothing to worry about.

If you have strength, you will be willful. It's better to see if you can save a few short skirts, and maybe get a few guardian oaths.

Du Qiangwei has become accustomed to this kind of life in recent months, running around with survivors to build a defense line.

What is different from the original plot is that due to the large-scale invasion and proliferation of little devils, the defense line of the Celestial Empire was very small. Not to mention Yellowstone City, the angels on the North Star side were also affected, and Angel Leng had to bring Let the surviving angels find a place to hide, waiting for contact from the angel civilization.

She didn't know where her hope for the future lay. She couldn't contact Ge Xiaolun or anyone else. Du Qiangwei could only rely on her own efforts to protect her.

While she was collecting supplies, Du Qiangwei saw a man walking leisurely in the ruins and empty city, and then she also saw several little devils appearing.

"Danger!"

Du Qiangwei immediately judged this, and she quickly used the wormhole to transport the black armor, and launched an attack on the little demons.

But then Du Qiangwei saw the man wave his hand, and the little devils screamed and turned into ashes.

"Who are you?"

Du Qiangwei was startled, and then her eyes changed when she looked at the man.

She recognized who this man was.

A few months ago, in the sky above the Juxia, the God King and the God King were facing each other.

In addition, the Kryptonian civilization broadcast to the world a few months ago, saying that as long as Blue Star is willing to join the Kryptonian civilization, the Kryptonian civilization can protect Blue Star and so on. Du Qiangwei's first reaction when seeing Luther was to relax her vigilance.

After all, she knew subconsciously that she could not be this person's opponent. This person's money-throwing attack method was beyond Du Qiangwei's reach.

It's also the wormhole transport technology (what Du Qiangwei thinks of it as), what did they lose? God-killing weapon, flaming weapon, and the dark silver weapon that even the Denor civilization couldn't recognize. The latter one was not known until she looked up the information in the Super God Academy.

Anyway, no matter which one, she, who throws dark alloy flying knives, can compare.

"God King... Your Majesty, what do you want to do by appearing here?"

Du Qiangwei couldn't hide her excitement and asked Luther.

Luther looked at Du Qiangwei. The demand relationship was different. After the demand position and value changed, Du Qiangwei became like this.

He didn't even need telepathy to know what Du Qiangwei was thinking now. This performance was too obvious.

"Wandering around, I remember, you are the Time and Space Rose Super Soldier?"

Luther said with a smile, and he didn't look at all the majestic momentum he had seen before.

Du Qiangwei didn't expect that such a great god like Luther would appear in such a place, and she didn't know what to say for a while.

"I am."

She could only answer and think along with Luther's words, which led her thinking again, and at the same time decided that her brain would be led by Luther for the time being.

Luther felt that it was not difficult at all.

Of course, it was impossible to make Du Qiangwei agree to anything just by leading her.

Chapter 110 Everyone is struggling

Du Qiangwei regained her composure.

When she saw Luther, she subconsciously wanted to "tie" Luther.

Without him, Luther's strength, as well as the favorable conditions of the Kryptonian civilization towards Blue Star in the previous broadcast, gave Du Qiangwei a preconceived concept, that is, the Kryptonian civilization is friendly to Blue Star. With the Kryptonian civilization, The strength can completely help Blue Star solve the crisis of the Taotie Civilization and the Demonic Civilization.

This kind of thinking is naturally very easy to bias Du Qiangwei's behavior and thoughts.

However, as they chatted, Du Qiangwei regained her sense and calmness. It was mainly because of Luther's indifferent attitude that Du Qiangwei realized that if she wanted to get the power of Luther, the god-king, It wasn't as simple as she thought. The things she was insinuating were completely worthless to Luther.

Originally, what could Blue Star be so attractive to in the eyes of the mighty God King?

Luther looked at Du Qiangwei with interest. He knew Du Qiangwei's character, so he appeared at this time to deepen Du Qiangwei's impression and leave a thought for her.

Since Du Qiangwei had no choice but to try to control the Demon Queen to help Blue Star, with the addition of the Kryptonian civilization, it was almost certain that Du Qiangwei would not fall to the demon civilization.

Du Qiangwei is very distressed now and doesn't know what she should do.

She thought for a while, and then chose to go back to the Black Great Wall Base to ask Aunt Lianfeng for her opinion.

"You mean, God King Luther appeared near you alone?"

Lianfeng was a little surprised. She felt that this matter was not that simple. What kind of figure was God King Luther? Hearing what Du Qiangwei said, it felt as outrageous as if Holy Kesha had met a second-generation little warrior by chance.

Of course, Lianfeng didn't think Luther came for Du Qiangwei, that was impossible.

Lianfeng himself didn't know the potential of the Time and Space Rose, but Dukao knew the potential of the Time and Space Rose, but he didn't say it or tell anyone.

Therefore, even Angel Yan felt that Du Qiangwei was just an ordinary second-generation warrior who could not live for a thousand years.

Lianfeng's instinct was the same as Du Qiangwei's, wanting to get Luther's help, but after all, she was a fan of the authorities, and she soon realized that they actually had nothing to impress the great god Luther.

"This is too difficult to handle."

Lianfeng couldn't help complaining that such a great god was like a mountain of gold visible to the naked eye, especially when the other party faced off against Holy Kesha, who knew how many people saw it.

Lieyang Civilization also knew such things through Di Leina's background data and Mao Shen who accompanied Di Leina to the earth.

Therefore, God King Luther is at least a great god who is not inferior to Holy Kesha on the surface. Now that Holy Kesha has been destroyed, it is no exaggeration to say that the entire galaxy depends on the mood of this God King.

Of course, if Luther now showed the power to destroy the galaxy, he would have the final say in the entire known universe.

But that is unnecessary, as it will only arouse everyone's fear and targeting, just like the Holy Kesha before.

Although Luther is confident that he is invincible now, even the era of Carl Company behind Death God Karl cannot be his opponent, but that is when he has not been targeted and studied.

God knows how far the void ability, which has not yet been fully exposed, can be achieved if it is targeted for research?

After all, even I now rely on void ability to repair and strengthen my own genes. I have to say that the Super Seminary is really powerful in this regard.

It is normal for Du Qiangwei to covet her own power. Even Luther knew very well that if he proposed any favorable conditions, Du Qiangwei would not be able to withstand such temptation.

Du Qiangwei didn't care at all about sacrificing herself for Blue Star.

In this regard, she and Qilin are two extremes. Qilin also doesn't care about her own sacrifice. She only wants to do it if she has the ability. The greater the ability, the greater the responsibility. This is why Luther dare not give her the ability. .

As for Du Qiangwei, Luther doesn't have the same feelings for her as Qilin, so he doesn't mind giving her abilities as long as she can afford the price.

"I think so too."

Du Qiangwei said with a headache.

"According to the information you told me, this God King's attitude towards you is pretty good. Maybe we can communicate with him through you..."

Lianfeng didn't have the confidence and confidence of Dukao, so he instinctively wanted to find a big partner.

It's true that the super gene can protect Blue Star when it grows up, but now the most important galactic power has rebelled and become a demon.

Others didn't know about this yet, Lianfeng still knew about it, but she didn't dare to say it.

The main reason is that after saying it, Blue Star, who has been insisting, is likely to collapse.

Now she can only hope that Du Qiangwei can attract Ge Xiaolun back, and then find a way to clean up the demon genes in Ge Xiaolun.

But Morgana's move is simply wonderful. Maybe Morgana's original idea was just to dislike the angel gene and pollute it.

However, you must know that Ge Xiaolun's undying infatuation for Du Qiangwei comes from the angel gene. He is even so infatuated that even Angel Yan has no choice but to wait for Du Qiangwei to die of old age.

Now, Morgana has been contaminated and turned into demon genes. Even if the demon genes can be eliminated, it is difficult to say whether the angel civilization will accept such galactic power.

At the beginning, He Xi and Holy Kesha were on guard against Luther because he was not a Galaxy Force with angel genes. Luther did not copy angel genes at all. The original angel genes and the angel genes that He Xi had upgraded to become two species were different, and they were not worth studying.

So, it is not that becoming a Galaxy Force will get the favor of angels, but a Galaxy Force with angel genes at the bottom of the genes.

However, if there is no choice, the Angel Civilization will naturally have no choice but to accept it.

After all, the Angel Civilization is now in decline, and it is no longer the time when Holy Kesha was still there and had the final say.

Now there are two Galaxy Forces in the open, one is the Demon Gene Galaxy Force, and the other is the God King Luther who cracked the Galaxy Force and copied the Galaxy Force. God knows whether the other party will mass-produce the Galaxy Force. No one will think that the Krypton Civilization does not have the ability to mass-produce the Galaxy Force.

The Denor Civilization is so poor that it can take out two super genes of the Galaxy Force.

If the Krypton Civilization lets go, there should be no problem in doubling this number by one hundred, right?

What will the angel civilization do then? Will they arrange a blind date and marriage with the Kryptonian civilization?
