

Kryptonian 131

Chapter 131 Prepare to be humiliated

Tony thought that even if Hydra got his Mark I and improved it, it would not be very advanced.

From the fact that Obadiah needed his own Ark reactor, they had not solved the energy problem.

According to the energy output power of the previous Ark reactor, the Iron Man suit given to Obadiah by Hydra was estimated to have not surpassed the Mark III.

That being said, Tony's logical thinking direction was not wrong.

It was just that he did not expect that Hydra gave Obadiah not an Iron Man suit, but an Iron Mech!

The agents of SHIELD chased Obadiah, or SHIELD. Hydra was very interested in the Ark reactor in Obadiah's hand, so Coulson asked them to evacuate. They did not choose to evacuate, but agreed verbally, but planned to take Obadiah away.

They had thought of the reason, saying that Obadiah was taken away by a group of people, and they had left because they received the order to retreat, and they did not have time to stop it when they found it.

Hydra was already very skilled in this set of procedures.

However, they did not expect that their greed tonight would cause the Hydra Action Team to lose another batch of loyal Hydras.

After all, the action team must be Hydras, and they must be loyal Hydras, and lethal force must be in their own hands.

In view of this, the Hydra audit of the action team is much stricter than that of other departments.

This also led to the fact that if there was a loss, even Alexander Pierce would feel distressed for a long time.

They were already close to Obadiah, and the leading Hydra agent was very confident. He was a superman who had been transformed by Compound No. 1. Except for the super bodyguard of the Imperial Company and the superpower of the Lord Black Caesar, he could not think of anyone who could deal with him.

So he rushed in without hesitation.

"Obadiah, you are..."

Just as he was about to issue an arrest declaration, he saw a behemoth standing up from the darkness, with energy lights in his eyes and a huge searchlight on his chest.

"What did you just say?"

Obadiah's proud voice came from inside the armor.

Damn it!!!

But no one told us that we have to use flesh and blood to fight against steel!

Moreover, even the super bodyguard of the Emperor Company can't fight against such steel!

"Mr. Obadiah, calm down, we are S.H.I.E.L.D..."

Then he immediately said softly, such steel, no matter how Obadiah made him move, but Obadiah himself was fragile, avoiding its edge was the most correct tactic.

"S.H.I.E.L.D?"

Obadiah didn't expect that he was still targeted by S.H.I.E.L.D., of course he knew what S.H.I.E.L.D. was, and while he felt very troubled, Obadiah felt that it was fortunate that he had obtained the Iron Man suit and the Ark reactor.

And he also became a member of Hydra, although he was controlled.

For the benefit of him, America would definitely protect him.

So, Obadiah activated the shoulder cannons on Steel King's shoulders without hesitation.

"Boom!"

A plasma molten energy ball hit the target, instantly coking the opponent.

The boiling point of steel is only more than 2,000 degrees Celsius, and this loyal plasma cannon that never overheats can produce a plasma energy attack with a maximum temperature of 5,000 degrees Celsius.

Normally, in order to save energy, the temperature is above 900 degrees Celsius.

"This is power!"

Obadiah was excited and raised his arm. A Gatling cannon was installed on his arm. Five thousand rounds of 7.62 mm caliber bullets were enough to destroy most enemies, especially in a combat environment like a city block.

The SHIELD agents were quickly wiped out, and the huge robot came to the ground.

"Sir, Obadiah's location has been searched."

Jarvis said to Tony at this time.

"Is this... Hydra's iron suit?"

Tony stared at the behemoth in front of him in amazement. It was three meters tall, and the thick alloy armor made Tony feel desperate at a glance.

The main reason was that he had not produced a new Ark Reactor. The Mark IV, which originally needed three Ark Reactors for energy, now only had one Ark Reactor for energy. Even at full energy, it could not sustain the Mark IV for too long.

After all, the imaginary enemy of the Mark IV was Luther. Tony was worried that the three reactors would not be enough.

Moreover, he had originally thought that at most he would see a patched-up Mark I with weapons installed. Who could tell him what the relationship was between this behemoth in front of him and the Mark I?

"Tony?"

Obadiah was a little surprised to see the Iron Man suit fall to the ground. He knew this kind of Iron Man suit, and he also knew that only Tony had the authority to control this Iron Man suit, so it was unbelievable that Tony actually survived the attack of the fragmentation bomb.

That was the fragmentation bomb called the living dead. After being hit, even if you are still alive, you are no different from a dead person. With a 100% mortality rate, how did he survive?

"That's it, Obadiah!"

Hearing that it was really Obadiah's voice, Tony finally perked up and fired a palm energy cannon. He could only pray that the alloy used by Hydra to transform Obadiah's iron suit was not a very good thing.

As a result, after this full-power palm energy cannon hit Colossus, Colossus just took two steps back and was unharmed.

"See, Tony, this is my current power. You did a great job in inventing such a weapon..."

Obadiah raised his machine gun and fired at Tony, but Tony did not dodge, but charged instead.

He dodged the hail of bullets with Jarvis and his own superhuman nerve reflex speed. The few that he could not dodge did not make him retreat, after all, the thrusters behind him and under his feet were already at full fire!

Obadiah was knocked to the ground by Tony's punch.

The heavy body was completely unable to stop Tony's fist. When hitting Obadiah's visor helmet, Tony's arm expanded, and the armor arm armor and fist armor were thickened to complete special structural changes, increase hydraulic output, and add energy burst to push.

It enables a very fierce punch to burst out in an instant!

Tony looked at Obadiah's cracked helmet and was surprised by Hydra's material science technology.

Then he was grabbed by Obadiah's feet and smashed to the ground.

After Obadiah found that the machine gun was useless against Tony, he threw the machine gun aside and switched to hand-to-hand combat.

Anyway, since he is so big, his strength will definitely crush Tony's small stature!

Chapter 132: Hydra is the world's number one in science and technology!

Tony and Obadiah fought in the street. Obadiah grabbed Tony and refused to let go. He used the Hellfall, Hulk Return, and the Porter Club President's Gate of Heaven, and the Giant Crushing Kill.

Tony never expected that Obadiah would completely crush him in terms of strength.

"Two superhuman ace pilots, both have nerve reflex speeds far exceeding that of ordinary people, but Tony has successfully developed his own brain area, while Obadiah has not, but wisdom cannot close the gap between tools..."

Luther watched with great interest. Tony seemed helpless and could only let Obadiah ravage him.

The huge inertia when being swung made it impossible for Tony to break free even if he turned on the power of the thrusters.

Fortunately, the shock absorption technology of the Iron Man suit is very black technology. In the original plot, the Mark I, which was so simple as Iron Monger, did not shock Obadiah to death when it fell from the sky. Tony fell from high altitude many times without any shock injury.

Otherwise, if Obadiah threw him, Tony would probably die.

Obadiah hit him more than a dozen times wantonly, and then stepped on Tony.

Tony's Iron Man suit uses a special pressure-resistant structure, and the damage caused by his trampling is not as great as the damage caused by the smashing just now, but Obadiah didn't know that seeing that the paint on Tony's Iron Man suit had all been worn off, Obadiah thought he had caused enough damage to Tony.

"Goodbye, Tony."

The plasma molten cannon on Obadiah's shoulder was aimed at Tony.

"What kind of weapon is this, Jarvis?"

Tony looked at the hole and felt very bad, and asked hurriedly.

"Analyzing and testing... sir, no similar weapons were found."

Jarvis quickly analyzed it and said to Tony.

"Is it a Hydra weapon?"

Tony briefly analyzed it and found no structure such as a magazine, so it was an energy weapon?

"Sir, the surrounding temperature is rising."

Jarvis immediately reminded Tony, and then Tony saw the shoulder cannon on Obadiah's shoulder light up blue, in line with the data analyzed by Jarvis.

"Plasma weapon???"

Tony's pupils shrank, and he turned his head quickly. The next moment, the high-temperature plasma group hit the ground next to his cheek, causing an explosion!

Tony even felt that his cheek was splashed with boiling hot water inside the Iron Man suit!

If Obadiah hadn't lowered the power for fear of hurting himself, this shot would definitely be able to melt Tony's helmet, and Tony would definitely not be much better at that time.

Tony gritted his teeth, and the heat transfer caused the Iron Man suit to have a high temperature. Tony sweated in a short time. Fortunately, his body quickly adjusted itself and the coolant inside the Iron Man suit was released to cool down.

The energy in Tony's chest condensed, and then a chest energy cannon rushed Obadiah out!

"Sir, there is only 50% energy left!"

Jarvis reminded immediately.

"I know, but the current situation..."

"Mr. Luther's phone is ready, do you want to call it?"

Jarvis is still so considerate and sensible.

Tony looked at Luther's communication displayed inside the mask and gritted his teeth to refuse!

"No, I can still do it!"

Tony has not used any weapons yet. Even if Obadiah is a solid big iron block, he can blow it to pieces!

Then Tony raised his hand and fired an anti-tank missile at Obadiah who was getting up. This anti-tank missile, which was modified by Tony for the second time and aimed at a flying kid, has a secondary thruster, which can make its flight speed break through supersonic speed, and the safe distance of the trigger fuse has been modified by Tony.

Even if it is within a one-meter range, hitting the target can cause an explosion!

Obadiah's nerve reflex speed allows him to identify the missile launched by Tony.

The reaction speed of a normal person is about 300 milliseconds.

It will decrease after the age of 30.

After specific training, athletes can shorten their reaction speed to specific stimuli (starting gun) to 150-180 milliseconds. The scientific community currently recognizes that the limit of human reaction speed is 100 milliseconds.

In a running competition, if the reaction time from the starting gun to the start is shorter than 100ms, that is, 0.1s, it will be judged as a false start.

After the transformation of Compound No. 1, even if Obadiah did not develop his brain like Tony, he could reach a terrifying reaction speed of more than 0.1 seconds. At this reaction speed that exceeds the human limit, Obadiah can clearly see the supersonic missile.

Then Obadiah has been involved in arms trading for so long, of course he can recognize that this is an anti-tank missile, which is much more powerful than the Hellfire missile on the Apache attack helicopter, and a Hellfire missile can scrap a house and destroy a tank with one shot.

The Stark Industries anti-tank missile, which is worth \$100,000 per piece, can completely scrap a tank.

This complete scrapping means complete destruction, and there is no possibility of repair.

Obadiah didn't know if his steel armor could protect him from the anti-tank missile, but he still chose to dodge.

So, with Tony's disbelieving expression, Obadiah dodged the anti-tank missile with a nimble dodge.

"Boom!!!"

An anti-tank missile hit an innocent apartment, followed by a violent explosion and a flash of fire, and a large hole was blown out of the entire wall.

"Biu!"

Obadiah dodged and counterattacked. The plasma fusion cannons on his shoulders were locked through the helmet movement, and two high-energy plasmas flew out, and the air was visibly distorted.

"Sir, the temperature has reached 3,000 degrees!"

Jarvis said immediately.

"How can his mecha be so flexible?"

Tony was stunned, but he quickly exploded the thrusters and left the ground.

Obadiah followed closely behind, firing high-energy plasma crazily.

"Damn, where does he get so much energy?"

Tony's own energy was not enough, and Obadiah was using the reactor he had stolen from him. As a result, Obadiah could use it so wantonly?

He flew as high as he could, but Obadiah could also fly, and he was propelled by rockets and the same thrusters as him, double flight acceleration. Tony was stunned when he saw it. Hydra's science and technology was so exaggerated?

"Tony, you can't escape!"

Obadiah caught up with Tony, and Tony had no choice but to dodge Obadiah flexibly.

There were too many places and angles in the sky to dodge, and Obadiah couldn't catch Tony no matter what.

At this moment, Obadiah suddenly raised his hand and aimed at Tony.

Chapter 133: Invincible

Tony didn't know why. Obadiah's steel suit didn't have palm energy cannons. What was he planning to do?

The next moment, two rounds of high-energy plasma blocked Tony's hiding space, and then Obadiah's arm mechanical claw flew out!

Tony did not expect such a change. His pupils shrank, and the nerve reflex speed allowed him to react, but the transmission to the body and electrical signals were not that fast. Then he was caught by the mechanical claws, and the mechanical claws interlocked with each other. Together, lock his torso firmly!

"Goodbye, Tony!"

Obadiah planned to sacrifice his mechanical claw. Anyway, Hydra must still have a steel suit, and even if it didn't, he could produce it himself.

The two plasma strong melt cannons lit up with blue light.

Tony quickly planned to activate the chest energy cannon to destroy the mechanical claw, but the energy was no longer enough.

"Sir, there is still 10% energy left..."

Jarvis reminded that the chest energy cannon generated by 10% of the energy was not enough to shake Obadiah, let alone maintain him landing safely from high altitude.

But if you don't try, you will definitely die.

Tony is going to give it a try!

There was a blast from the energy cannon on the chest, but only the surface structure of the mechanical claw was destroyed, while the main frame still held Tony firmly.

Seeing that Obadiah had fired two rounds of high-energy plasma, with the terrifying temperature of five thousand degrees, I guess it would be difficult to preserve the body, right?

Peppa...

At this moment, the only thing Tony could think of in his mind was Pepper Peppa Pig.

Suddenly, a figure as fast as lightning appeared.

"Bang!"

The mechanical claw suddenly broke apart, and Tony felt his eyes blink, and the next moment he appeared at Obadiah's eight o'clock direction, avoiding two rounds of high-energy plasma.

"Need any help, Mr. Stark?"

A voice full of teasing.

"Sir, a high-speed UFO has been detected. According to the records, it is Mr. Luther."

Jarvis's tip came belatedly.

"It seems I have to upgrade your sensors and systems..."

Tony breathed a sigh of relief.

"Luther, are you sure?"

Tony then asked Luther. Although he was very tough, in this situation, Tony couldn't be tough.

But there is also the possibility that Tony doesn't want to argue with children. After all, Luther is just a child in his eyes. Although he is not as lovable as Spider-Man, people can't help but want to throw money at him.

"Mr. Stark, if it were you, I would say I'm not sure, but if it were him, I would like to ask, if I cut him into pieces, wouldn't you blame me for destroying your company's property?"

Luther said with a smile.

"Hmph, it's just worthless stuff. Anyway, I still have a lot of it, so you can tear it down as you wish."

Tony still couldn't figure out what Luther meant. In other words, this annoying kid actually didn't pay attention to his steel suit from the beginning.

"Luther! Why are you here?"

Obadiah was surprised, and he naturally recognized Luther.

"This is a good question. After all, the place where you two fought is under surveillance, and ordinary citizens have already called the police."

Luther said easily.

"This is a Stark Industries matter. Do you, an outsider, want to get involved?"

Obadiah said quickly. He didn't see Luther's speed clearly just now, and he didn't even know when his mechanical claw was destroyed by Luther and in what way.

"I'm not an outsider, Mr. Stan. I'm the majority shareholder of Stark Industries."

Luther said.

"I don't remember seeing you in the boardroom?"

Tony said strangely.

"Oh, that was before you came back. I acquired the shares of those shareholders of your company. Now I own 25% of the shares and am the second largest shareholder of the company."

Luther said.

Tony was speechless. He didn't expect Luther to take such a big advantage. You must know that although he did not plan to launch a steel suit, he did plan to launch a new energy Ark reactor. This thing is basically an infinite market and a steady stream of money. That kind of thing.

Luther threw Tony aside, and Tony flew up. Then he saw Luther's eyes turn red, and a dazzling red light shot out from his eyes, hitting Obadiah.

Tony's pupils shrank, is this?

Emit energy from this part of the eye?

Obadiah's surface alloy was cut directly, which caused Obadiah to quickly fight back.

"High-energy plasma is useless to me."

Luther watched two high-energy plasmas flying towards him, and then knocked them away with his bare hands!

Tony, who originally wanted to warn Luther of the danger, was shocked when he saw this scene.

Are you kidding? That is a thing with a temperature of 5,000 degrees. What is the structure of your body that can be exposed to such energy?

Obadiah was even more surprised. Ever since he used this plasma cannon, he had never seen one that could ignore the attack of this thing.

"Goodbye, Mr. Stan."

Luther released a Qigong wave with one hand, and an attack comparable to a 105mm howitzer bombarded Obadiah.

And because the destructive power of Qi was even more pure, Obadiah fell apart in the sky and fell directly to the ground!

Coulson and his team witnessed Obadiah falling from the sky, as well as explosions and light bombs flying everywhere in the sky. In the original plot, the American military did not react at all to the two flying objects flying in the sky.

Now it is different. If S.H.I.E.L.D. had not intercepted the military's actions, Tony and Obadiah would have been bombed down by a Jericho missile.

"Director, Tony is no match for Obadiah... Wait, Luther has appeared!"

Coulson saw Luther bombard Obadiah with an energy wave, and then Tony and Luther fell to the ground.

Obadiah is not finished yet. The technical quality of Hydra is still very strong!

However, Obadiah, who climbed up, has not reacted yet, and Luther appeared in front of him without knowing when.

This is the horror of Kryptonians. With the biological force field, supersonic speed has no physical effect. They are as elusive as ghosts.

Obadiah subconsciously swung his mechanical arm, and the mechanical arm with hundreds of tons of output was held down by Luther with one hand.

Then Luther clenched his other hand into a fist.

"Boom!!!"

With a roar comparable to the sound of thousands of cannons firing simultaneously, the upper body of the Steel King was completely destroyed, and the ace pilot inside also lost his upper body.

Metal fragments and bloody fragments splashed hundreds of meters away, leaving Tony, Coulson and others dumbfounded.

Tony sadly discovered that his Mark IV had to be remade again after it was just out of the oven!

Chapter 134 I am the Iron Man

Tony only calculated in his mind how powerful Luther's punch was, and he felt extremely desperate.

"How could a human being do such a thing? This guy is not actually a human body modification technology, but a superpower himself!"

Tony thought so, but thinking of Luther's thermal vision and energy attack just now, plus the ability to fly and super strength... If he is a superpower, he is also a superpower with unique abilities.

"Do you like Superman so much?"

Tony couldn't help but complain to Luther.

First he flew, and now he even has thermal vision.

"Of course, who doesn't want to be Superman?"

Luther knew that Tony was referring to the fact that he had just used thermal vision. Superman's thermal vision is not as obvious as Homelander. Rather than thermal vision, it is better to say thermal waves or thermal radiation.

There are several versions of the movie where thermal vision is colorless and only air distortion can be seen.

However, in order to reflect the oppressive feeling of thermal vision, the new era has become a high-red, high-heat, and high-brightness ray, just like Henry and Doomsday's thermal vision.

"Really?"

When Tony heard Luther's words, he suddenly remembered how he felt when he read Superman comics.

It's just that he had gotten rid of that fantasy when he was a teenager, and now he has become a scientific version of Superman with his own wisdom.

In fact, if Howard hadn't been telling him about Captain America, maybe Tony would have moved on to the path of super soldier serum, and then, maybe he could see a Superman version of Tony Stark.

It can only be said that Howard really doesn't know how to educate children.

Now Tony saw Luther's appearance and heard what Luther said, and suddenly felt that he was old.

Luther chose his dream, and then really became the god of the world, the body of steel, through his own research.

It's like looking in a mirror, the same talent, the same youthful vigor, the same handsomeness, the same tall and mighty...

Luther's face is weird, the same handsomeness? Tall and mighty?

Mr. Tienan, do you want me to remind you, how tall are you?

Don't think that the iron man's suit is really tall because of the inner height increase!

"Mr. Luther!"

Agent Coulson came over quickly, not missing any opportunity.

"I'll go first, Mr. Stark."

Luther said to Tony.

"Let's go."

Tony knew that Luther didn't want to deal with agents like Coulson, so he said.

This kid has no experience in dealing with such things, so let him handle it.

Luther nodded, and then flew into the sky.

Coulson looked up at the sky, and he suddenly felt that he was really envious of Luther. This kind of flying and infinite power experience must be the happiness that countless people want but can't get, right?

Nick Fury looked at the screen with a complicated expression. Luther and Obadiah fell to the ground and started fighting. Everything in those few seconds looked so shocking, making Nick Fury feel as if he saw Carol again...

Of course, Luther is definitely not as powerful as Carol!

According to Coulson's questioning of Tony, Nick Fury knew that Tony almost died tonight, and then there was Luther's flying ability.

"Tony actually developed such a powerful weapon..."

Nick Fury looked at the Iron Man suit on the screen. He could see the great value of this weapon, especially that it could fly, and it could fly at supersonic speed, which was outrageous.

Both Tony and Luther's performance made Nick Fury feel that his plan might be ready to start.

"Hydra..."

Nick Fury's face was solemn. He only knew at this time that Tony was kidnapped by Hydra, and the Iron Man suit was made by Hydra by replicating the Iron Man suit abandoned by Tony when he escaped. From this, we can imagine how outrageous Hydra's technology is.

The key is that Hydra has mastered the technology of Tony's Iron Man suit!

Luther violently destroyed the Iron King with a punch, just because he didn't want the technology of the plasma strong melting cannon to fall into the hands of SHIELD or Tony.

This thing was made by him casually, and it was very powerful. If the two of them got it, SHIELD might not be able to research anything, but Tony might not be.

Tony handled it very well, even though many people took videos and uploaded them, and SHIELD arranged for them to testify.

However, Tony still announced very willfully that he was Iron Man in the end!

Of course, the term Iron Man originated from someone calling him Iron Man on the Internet. Tony complained that his iron suit was not made of iron alloy, but still accepted the nickname Iron Man.

Nick Fury was very troubled, but not surprised.

"If Tony didn't do this, he wouldn't be Stark, and their family is like this."

Nick Fury could only comfort himself in this way, the Stark family had a headache that was passed down from generation to generation.

However, Nick Fury was no longer going to wait, since Tony showed his value, then of course Nick Fury would hurry up.

Especially from Coulson, Tony found evidence that Obadiah colluded with Hydra, and the advanced weapons of Stark Industries were sold by Obadiah to the terrorist organizations supported by Hydra!

Hydra even kidnapped him to Afghanistan. Nick Fury suspected that Hydra's base was in Afghanistan, or at least there should be a branch of Hydra in Afghanistan!

After knowing the possible traces of Hydra, Nick Fury could not sit still!

In the original plot, he didn't know about Hydra, so he took advantage of Tony's palladium poisoning.

Now Nick Fury wants to completely crush the resurrected Hydra!

So, after Tony announced that he was Iron Man, Nick Fury entered his home that night and sat on his sofa waiting for him.

"I am Iron Man? You are conceited and think you are the only special person? Then how about meeting the One-Eyed Man?"

After Tony walked in, Nick Fury spoke.

But he didn't see Tony's panic expression.

"Sorry, although you have camouflage, my visual nerves only need a little bit of light to see things clearly, so your camouflage is useless."

Tony found Nick Fury when he came in, but before he could speak, this black man who came from nowhere spoke.

He didn't lie. His eyes and visual nerves also adjusted themselves. Even if there is moonlight, ordinary people will be pitch dark if there is no light. But now, even if there is no light or moonlight, Tony can see things clearly in the dark with a little starlight.

Chapter 135 Luther and I kill each other

Nick Fury couldn't help but like this kind of scary plot.

In the blink of an eye, Tony was already thinking about multiple possibilities.

After all, his home had a security system, and the other party came in safe and sound.

"So, you're Hydra?"

Tony asked looking at Nick Fury.

"No, Tony, I'm Nick Fury, the Director of SHIELD."

Nick Fury said immediately.

"Are you the boss of Agent Coulson? What do you want to do when you sneak into someone else's house?"

Tony frowned. In the original plot, Coulson saved Pepper Peppa Pig. There was a favor, but there is no such thing now, so Tony is very dissatisfied with Nick Fury's behavior of sneaking into his home and plans to complain.

"We are not under America's control, so you can't complain about us. Don't worry, I have no interest in your suit."

Nick Fury said calmly.

"Not under America's control? The intelligence organization of the United Nations?"

Tony understood, no wonder, he asked how could America's official department be so bold and break into the owner's house, not afraid of the castle law?

"Hmph, you're not interested in my suit, so why are you here?"

Tony didn't believe Nick Fury's lies, so could he believe the agents' words?

Even if you don't have to be deceived by agents and go bankrupt.

"I'm just curious, why do you want to reveal your identity?"

Nick Fury knew by looking at Tony that he didn't believe his words.

This really makes people...cannot be angry, mainly because Nick Fury really covets the technology of the Iron Suit, but he knows that it is impossible to get it.

Tony was not Luther. Luther would sell Compound No. 1 and the Superman drug. Tony seemed to be aware of the dangers of the steel suit and had no intention or intention of selling it.

In addition, after seeing that Hydra actually obtained the weapons produced by itself, Tony was naturally even more unlikely to sell the steel suit.

He even closed the weapons department, because without Obadiah's obstruction and the second largest shareholder Luther having no objections, if the two of them joined forces, other shareholders would naturally have no choice.

Although Stark Industries' stock market fell to its lowest level ever, Tony believed that he could reverse the situation soon.

Luther believed in himself so much that Tony didn't say anything, but in order to show his life-saving grace and support, he split Obadiah's shares and gave Luther 5% of the shares, and the rest was naturally It's Tony's own.

He plans to take advantage of this stock market crash to recover his shares.

Now Luther holds 30% of the shares, and Obadiah has a total of 13% of the shares. After giving Luther 5% of the shares, Tony's own shares have reached 40%. And the shares are still being recycled.

The absolute power of Luther's Imperial Corporation, without the restrictions of other shareholders, makes Tony very envious. In addition, he has become aware of the problems within his company. This time the closure of the weapons department is intended to restructure Stark Industries' business. scope.

When most listed companies go public, they do not solicit investment and sell shares for the purpose of raising funds, but rather for the investors' personal connections.

Stark Industries used to be mainly in the arms business. Now if Tony wants to transform, these connections will not be needed, and keeping them will hinder his transformation of Stark Industries.

"Then why should I hide my identity? That guy Luther didn't hide his identity either."

Tony said with a smile.

He admired Luther's approach very much and felt that there was nothing wrong with him.

"Am I going to be like those tight-fitting perverts, hiding behind the scenes and being a playboy on the surface and a Dark Knight secretly?"

Tony said to Nick Fury disdainfully.

"I refuse. I am Iron Man, and Iron Man is Tony Stark. There is no such thing as a playboy or a dark knight. The role of a hero is to stand up and inspire mankind and let the whole world know that I can protect world peace! "

Nick Fury paused.

"What about Hydra?"

he said.

"Hydra is nothing special. Those superpowers don't know how to use and develop their own superpowers. Just do some research and you can target them."

Tony said confidently.

"Yes, a single superpower won't cause much trouble, but how do you know that Hydra only has these superpowers?"

Nick Fury said.

"What's the meaning?"

Tony frowned.

"Hydra is now back again, and each of their attacks is very precise and can be called a scalpel. You should know what this means."

Nick Fury said to Tony.

"It means they have a complete and huge intelligence network, and it is deeply rooted in America?"

Tony said.

"Yes, in this case, if you fight alone, you will only do what you said. Once it is thoroughly studied, you will be finished!"

Nick Fury's one eye widened.

"I don't do this alone."

Tony said.

"You mean, Luther?"

Nick Fury was a little surprised. Didn't these two guys have a bad relationship? Could it be that Luther saved Tony last night...

Because the two traded shares privately, Nick Fury didn't know that Tony gave Luther the five percent share.

If he knew, he would understand that the relationship between Tony and Luther was no longer the kind of mutual criticism and blackmail before.

"Yes, although Luther needs Hydra to develop his business, it does not mean that Luther does not want to clean up Hydra."

Tony nodded. He felt that if he and Luther joined forces, Hydra would be no problem at all.

"Hydra is not as simple as you think, and the world is not just a threat from Hydra, whether it is the increasing number of superpowers or some super-standard accidents."

Nick Fury said hurriedly. If Tony and Luther really joined forces, the two of them would definitely be able to solve more than 90% of the problems. How could Nick Fury carry out his deception plan?

So he said immediately.

"For example?"

Tony really didn't believe that there was any trouble that he and Luther couldn't solve. Just kidding, the two of them were killing people.

"The military once hunted a green monster and even used a small nuclear warhead, but the monster was unharmed, while the entire army was wiped out."

Nick Fury immediately brought up the Hulk to explain the matter.

Tony was thoughtful, he really didn't know about this.

When he appeared at the end of the film when the Hulk fought the Abomination and asked General Ross to lock up the Abomination, it was almost the first Avengers.

Chapter 136 Tony dislikes the Avengers

"The Avengers Project."

Nick Fury took out a plan and showed it to Tony.

"What's that, your band?"

Tony said nonchalantly and did not take it. He would not take anything other than what Pepper, Pepa and Happy handed him.

To say it's a band is actually to make badmouth about Nick Fury's identity as a black man, a black band or something like that.

"No, this is a team that brings together all the elites in the world to fight threats. This universe is very big. Tony, decades ago, there was an alien fleet that invaded the earth, but it was stopped by a woman at that time. Yes, she is our world's first superhero."

Nick Fury said very seriously, and even in order to increase the attraction and the background of SHIELD, he did not hesitate to expose Carol and the Kree fleet.

There is no way, they are all forced. Luther is so good and powerful, and Tony himself can develop a powerful steel suit. If the two of them join forces, is Nick Fury going to bring out Black Widow and Hawkeye to tell them that they are team members? ?

Even if it weren't for being ignored by Tony and Luther.

Therefore, Nick Fury must develop a character with enough weight to restrain Tony and Luther.

"Why didn't I know about this?"

Tony said with some disbelief.

"How could this matter spread? Do you want to tell everyone that they were almost destroyed by alien invasion?"

Nick Fury said calmly.

Tony hesitated for a moment and picked up the files on the table.

"Who are the members?"

Tony looked through it and couldn't find any meaningful terms, so he asked.

"It's being kept secret for now. I won't tell you until you pass it."

Nick Fury pretended to be profound and said that in fact, the only team members he could give Tony now were Black Widow and Hawkeye. Captain America was still being salvaged, and it was impossible to release him now.

"That guy Luther is also your target, right?"

Tony thought for a moment and said.

"We are also evaluating him."

Nick Fury nodded. There was no need to hide his desire for Luther and Tony.

"That's good. If that brat Luther joins, I will too."

Tony dropped the file and said with a smile.

Nick Fury suddenly frowned. This was not a buy-one-get-one-free deal. Instead, it made it more difficult.

Because Tony is very conceited, and Nick Fury knows this very well. How could such a conceited person leave his choices to others?

Unless, he already knows something that Nick Fury doesn't know.

It was certain that Luther would not join them.

What information is the question?

After Nick Fury left with full of doubts, Tony became interested in investigating SHIELD and what Nick Fury had said before about alien invasion of the Earth and Earth's first superhero.

The concept of superheroes naturally does not need to be explained. DC comics are very popular in this world, so they all know the concept of superheroes.

"How many decades ago was the first superhero capable of dealing with an invading alien fleet?"

Tony pondered this question as he investigated.

He then also investigates what Nick Fury said about the Green Beast.

Of course Nick Fury knew that Tony would definitely investigate these things, but Nick Fury knew very well that he would not be able to investigate anything.

Pierce didn't even know Nick Fury could summon Carol back, let alone Tony?

Nick Fury's confidentiality measures are very outrageous.

For example, he hid a lot of things about the Skrulls that no one on earth knew about, which led to the fact that even after Rhodes was replaced, no one knew about it.

All I can say is that it is outrageous.

Tony also contacted Luther.

"What is it, Mr. Stark?"

Luther asked with a smile.

"Boy, please stop calling me Mr. Stark. I allow you to call me Mr. Tony."

Tony laughed too, and then said.

"Is this really okay, Mr. Tony?"

Luther remembered that the little spider seemed to have always been called Mr. Stark.

Of course, he was joking by calling him Mr. Stark, and Tony knew this, so he asked him to change his words.

"By the way, has a black man ever come to see you?"

Tony ignored Luther's teasing and asked directly.

"What black man?"

Luther asked rhetorically.

"That's the guy who claims to be the director of S.H.I.E.L.D."

Tony explained to Luther about Nick Fury.

"I understand, Mr. Tony, do you have any ideas?"

Luther nodded. Nick Fury hadn't come to him yet, so maybe he didn't have the confidence to convince him?

Also, Black Widow has resigned. Probably something happened that prevented Nick Fury from continuing to evaluate him. Under such circumstances, it is difficult to say that Nick Fury will continue to look for him.

"I want to hear your thoughts."

Tony is still very patient with people he recognizes, especially since Luther is so much younger than him.

"This really surprises me, Mr. Tony. We should all be confident people and not listen to other people's opinions."

Luther said.

"This is not about listening to other people's opinions, boy Luther. This is just communication. Will you change your thoughts and decisions because you listened to my thoughts?"

Tony scoffed.

"Of course not, Mr. Tony, no one can influence my thoughts and decisions."

"You're more conceited than me."

"Nowhere, far worse than Mr. Tony."

Tony felt like he saw his younger self, arrogant, but he was not so arrogant.

Luther: I'm afraid you have some misunderstanding about yourself.

Tony didn't care about Luther's pretentious attitude. He still had a high tolerance for people he recognized.

Moreover, it is necessary to let this brat Luther know that Mr. Stark is much more talented than him!

"Of course I have the idea, Avengers plan? Who to take revenge on? It's meaningless."

Luther said.

"That's right."

Tony said in agreement, feeling that it was inexplicable or difficult to understand, not to mention that now Tony has been improved by Luther's worldview, unlike the original plot where he was led by the nose.

So in Tony's opinion, Nick Fury's Avengers plan is a little petty, and he doesn't like it.

"Kid Luther, although this Avengers plan is not very good, the situation at SHIELD is very wrong. Have you heard of the Pegasus plan?"

Tony said to Luther.

Luther was a little surprised that he actually found out about the Pegasus Project. Should I say that Tony is really powerful or a metaphysical person?

"I haven't heard of it, but I can investigate."

Luther said.

"According to the information I have investigated, the Tianma Project is a plan from the last century..."

Tony said directly.

Chapter 137 Who else but me?

Of course Luther knew what the Pegasus Project was.

The information Tony told was only a very superficial part.

It seems that Nick Fury is not idiot enough to put the information in the database.

The Pegasus Project must start from the end of Captain America 1: 1. Stark accidentally discovered the Cosmic Cube while searching for Captain America. Soon after, he and Carter, who was still an agent at the time, established S.H.I.E.L.D., with Carter as the The first director of S.H.I.E.L.D.

With the support of the American military, Stark Industries, together with NASA, the American Air Force and S.H.I.E.L.D., launched the Pegasus project, also known as P.E.G.A.S.U.S. important research object.

The name Project Pegasus first appeared in "Iron Man 2", but its specific content was not mentioned. Therefore, the earliest mention of its specific content on the timeline was at the end of "Captain America 1".

At the same time, the specific content of Project Pegasus has become a hidden plot throughout the entire series of "Iron Man", but there is still a hint, that is, Tony discovered the research notes about the Cosmic Cube left by Howard.

"That guy Nick Fury said that there was an alien invasion on Earth and it was stopped by the first superhero, who was also a female superhero."

Tony said.

This was the reason why he contacted Luther.

If it's just a matter on Earth, Tony is confident that he can solve it alone without relying on others. The same is true for Hydra's superpowers. Their superpowers will not change, that is, they will not increase variables.

And they don't know how to develop their own superpowers. It's equivalent to chimpanzees getting firearms. They can only pull the trigger, but they don't study the principles and how to improve them to make the weapons more deadly.

As long as Tony is given time, he can completely eliminate all Hydra superpowers!

But when it comes to issues outside the Earth, Tony doesn't have that confidence, and he even feels like he doesn't know where to start.

So at this time, he subconsciously contacted Luther, the guy he currently thinks is the strongest man on earth.

"Alien invasion?"

Luther would indeed grasp the key points, and Tony nodded.

"This thing should be true. SHIELD and the American military blocked an area for a long time. The locals said they saw huge burning things falling from the sky, but these reports disappeared soon. It took a lot of effort to find out."

Tony gave his statement and evidence, but it could also be a rocket experiment by the American military or something. However, he investigated the military records at the time and it showed that it was a "military exercise."

However, such a long military exercise is obviously abnormal.

Afterwards, the military blocked the area for a long time before evacuating.

"If it's an alien invasion issue, this is the key for you to find me, Mr. Tony."

Luther said with a tone of understanding.

"Yes, Luther, let's cooperate."

Tony said directly.

"Rather than working with Nick Fury, that mysterious agent leader, and joining his band of Avengers, it's better for the two of us to work together and use our wisdom to solve all problems!"

Tony continued.

Got it, the Illuminati, right? Do we need to get Mr. Fantastic Richard too?

Luther complained.

The Illuminati is the plot of the comics. Tony and several geniuses united to form an organization to solve all problems, and then the very classic Green Hulk was created by the Illuminati, beating the Sentinels into ordinary people.

But it seems pretty good?

Because Luther is too lazy to play with Nick Fury about joining the Avengers.

"Mr. Tony's idea is very good, so is it just the two of us?"

Luther said.

"Of course not. If there are suitable candidates, I will find them and invite them to join our team. We are not restricted by the government or the spy chief. We can do whatever we want."

Tony said shaking his head.

Luther thought that Tony's idea was actually quite normal. It was the daily operation of people in America not to trust America's government, let alone the capitalists who regarded America as a housekeeper and watchdog.

In the original plot, Tony's behavior was abnormal. According to the capitalist's operation, he should leave them alone and go it alone.

Just like the later real-name system plan, Tony fell out directly with Captain America.

It's outrageous. Captain America should be on Tony's side, and then Tony should be on Captain America's side.

The result was completely the opposite.

"Tony, you should know that the world will not allow a group of so-called superheroes to be above their laws. Batman does not exist in reality."

Luther said.

"But we have Batman and Superman."

Tony shook his head. Batman alone was certainly not enough, but what if they also had Superman?

"Besides, the law is just our toy, Luther."

Tony had already mentioned this, and Luther thought about it, and it seemed that it would be interesting for them to cooperate.

"So, what is the name of our team? If people join us, we can't be said to be the Emperor Stark team, right?"

Luther said.

Tony is a genius, so he has a conceited attitude towards the world.

After Luther and Tony no longer had the gap in wisdom, they actually had something in common, that is, if I want something, I will find a way to get it, instead of relying on others.

Maybe there will be differences in details and handling methods, but this commonality makes it okay for the two of them to chat.

"Illuminati, how about this name?"

The name Tony gave was full of lofty style, perhaps related to the education he received, geniuses guide the direction of human evolution and progress.

"Parliamentary system?"

Luther raised his eyebrows.

"Of course it's a parliamentary system. Can you accept my leadership? Impossible, so we will set up an organization that is above the government, not regulated and controlled by the government, and completely self-made by heroes, just like the round table meeting, which is a completely equal organization for heroes."

Tony rolled his eyes and said.

"That's true, after all, I still have a little confidence in my wisdom."

Luther smiled.

Illuminati.

The meaning of this word is "inspirer", or it represents those who light the way for people in the dark.

"That's it, so, do you agree?"

Tony leaned forward, and even through the projection, one could see Tony's attitude, and he was very serious now.

"It's a crazy idea, but it's just right for me. After all, who else can bring peace to this world? It's none other than me!"

Chapter 138: Powerful Alliance

"So, we are the same people."

After Tony received Luther's answer, he leaned back on the sofa.

That's right, who else would save the world and maintain world peace?

Besides them, who else can take on this important task?

"Our first target is Hydra."

Tony told Luther seriously that he felt they should not waste time and kill Hydra first!

Obviously, because the biggest threat in the world right now is Hydra.

This threat and super-powerful terrorist attack created by Luther made Hydra far more powerful than any previous terrorists, much more powerful than any in its own history.

It's just that everyone thought it was the resurgence of Hydra, and no one thought it was the new Hydra.

The old Hydra or the real Hydra are very confused now. They have been searching for so long and have searched all over the world, but they have not found the Black Caesar part of the Hydra.

The strength shown by Hydra headed by Black Caesar makes the real Hydra salivate. They really want Black Caesar to join them. Even if he is not from Hydra, it doesn't matter. After all, he directly challenges the current Hydra. The most powerful country on the planet.

It's okay if he's not Hydra. Being so rebellious and unscrupulous, isn't that what Hydra needs?

"I have analyzed all the targets of Hydra and found that they have nothing in common."

Tony said to Luther.

If I had to say something in common, it would probably be the invisible rich.

But there is no need. Although the invisible rich are very rich, it is also very troublesome to collect information about them.

"Hydra cannot be for money. They have never touched the property of those attacked from the beginning to the end. There is no extortion or transfer. Their purpose seems to be only to cause terror!"

Tony enlarged the picture and said to Luther.

"It's a very professional technique, and it's aimed at those damn rich people. In this case, they have a lot of fans at the bottom."

Luther nodded and said.

Tony paused, tempted to say that both of us were what you'd call damn rich people.

"I just expressed my hatred for the rich, ordinary people, so you don't need to look at me like that."

Luther shook his head.

I saw what Tony was thinking.

"Okay, in short, so far, according to what you said, Hydra doesn't want to cause terror to the general public. What they want to create is terror to the upper echelons. Why?"

Tony was a little puzzled. After all, he was from the upper class, so he knew the upper class very well. Most of the resources in this society and the world were in the hands of the upper class. It seemed a bit thankless for Hydra to do this.

"Is it possible that Hydra is helping its supporters to fight against its competitors?"

Luther proposed a new direction of thinking, and the main purpose was of course to guide Tony's thoughts.

"Combating competitors?"

Tony's eyes lit up. He hadn't thought of this idea yet, but the unexplained feeling was a direction.

After all, the intelligence capabilities of Hydra are indeed a bit outrageous. However, what if the intelligence of these invisible rich people is provided by their competitors?

In that case, everything seems to make sense!

"This is a good idea. If this is the case, you might be able to find Hydra's collaborators or even subordinates!"

Tony immediately asked Jarvis to follow this route to check.

Not only did the two people establish the Illuminati, but on the surface, Stark Industries and Imperial Corporation also launched a powerful alliance to jointly develop the new energy market!

As soon as this news came out, it can be said that public opinion was in an uproar.

Stark Industries and Imperial Corporation were already giants, and now they are joining forces. Although they are entering the new energy market, this is enough to make people desperate.

They have shown their intention and intention to have the two companies dominate the new energy market, but the Rockefeller family, which can compete with them, cannot compete with the two giants.

The Rockefeller family made their fortune from oil, and the famous Mobil Trust was created by them.

They must have ideas about the new energy market, which is a huge market. But now, in order to avoid trouble and benefit Luther at the same time, Tony plans to cooperate with him to develop new energy markets and projects.

Of course, Luther is a happy-go-lucky person who fears that the world will be in chaos. Even if he knows that the development of the new energy market will trigger the attacks of those old energy tycoons, and will lead to a situation where the food and clothing of millions of tankers will be affected, but what does those things have to do with him? He was just there to have fun.

The main responsibility is Tony.

Putting aside the complicated feelings of the Rockefeller family, Nick Fury also has complicated feelings.

It can be seen from the cooperation between Stark Industries and Monarch Corporation that Tony and Luther have probably left him to do things on their own.

This makes Nick Fury very anxious. Tony and Luther are his two most important candidates for the Avengers.

Coupled with the fact that Captain America has just been salvaged and is about to be thawed, that is the Iron Triangle of Avengers.

Nick Fury feels that it is most appropriate for Captain America, a representative of justice and a righteous man of God, to be the leader and captain of the Avengers. He can definitely lead everyone well. As for Luther being a foreigner, how strange it is. , Black Widow or Agent Bear.

As a result, there has been such a big change now, and Tony and Luther have to do it themselves.

Then what is the meaning of his Avengers?

Let Black Widow, Hawkeye and Captain America be the Avengers?

The problem is that now that Hydra has powerful superpowers, can the three of them deal with those superpowers of Hydra?

Nick Fury himself feels desperate.

In addition to Nick Fury becoming anxious and planning to talk to Luther about the Avengers plan.

The fact that Iron Man Tony Stark and Emperor Luther joined forces was also cheered by the people.

They felt like superheroes came to reality.

DC comics are a big hit in Marvel, just like Marvel comics are also a big hit in the DC world, so when Luther first took action to deal with the attack of Hydra, everyone regarded Luther as a superhero.

The nickname is extremely domineering - "Emperor".

Originally, someone wanted to call him Superman, but it was refuted that Luther was not the embodiment of kindness and justice like Superman. Luther is a damn rich man, which is different from Superman.

So Luther's nickname is "Emperor".

Of course, he doesn't care whether his nickname is Superman, Ancestor Man, Almighty Man or God on Earth, but the title of Emperor is still very good.

Chapter 139: Illuminati Recruits New Members

Therefore, Luther became the first superhero in reality and had a large number of fans.

After Tony Stark announced his identity as Iron Man, he became the second superhero in the minds of the public.

And the public was surprised to find that Tony Stark's personality was very similar to Bruce Wayne. They were both rich and talented. The only difference was that Batman tried his best to hide his identity and separate the relationship between Batman and Bruce Wayne.

Tony Stark did not hide at all and announced in a high-profile manner that he was Iron Man and Iron Man was Tony Stark!

But this did not prevent them from thinking that Tony was the real version of Batman.

After all, they thought that how could a normal person hide his identity as Batman? Obviously, Tony was normal.

This was the mainstream thought of America. She had a strong desire to express herself. She did not have the restraint and modesty of the Yan Dynasty people. She believed that there were always people and heavens beyond people.

Batman's hidden behavior made them very disliked and felt too awkward.

"The real Batman, Tony Stark?"

Tony looked at the report and sneered. What's Batman? I'm Iron Man. How can a character in a comic compare to me?

As long as Tony wants, he can buy DC. He can draw a plot where Batman fights Iron Man and then gets trampled by Iron Man.

Tony smacked his lips when Luther was called the real Superman. That kid was not a kind-hearted fool like Superman. The nickname of Emperor showed his character, which was the absolute confidence and talent.

"To be honest, I'm beginning to regret admitting the identity of Iron Man."

Tony said to Luther.

"Really? I think it's not bad. Are you going to call yourself Super Stark, Mr. Tony?"

Luther said jokingly.

"The nickname of Iron Man is not enough to show my charm and strength."

Tony said.

"But Mr. Tony, you are only good at the battle suit. Are you going to be called the Battle Suit Man?"

Luther hit the nail on the head very straightforwardly.

Tony rolled his eyes. It was annoying to talk to this kid. It was just like meeting his younger self.

"Kid, the American military has been taking unusual actions recently. I have found out something. Are you interested in meeting a violent green beast?"

Tony said to Luther with ill intentions.

"Are you talking about the Hulk?"

Was Luther a little surprised that Tony had established an intelligence network so quickly?

It had only been a few days since the Illuminati was established. There were only two super geniuses among the members, and Tony had already found out about the Hulk.

Although General Ross had never thought of hiding it, at least the American military knew that his action was to capture the Hulk, and that he spent so much money every year but achieved nothing.

Especially after the emergence of the Monarch Company, Ross's funding was greatly reduced.

This also made Ross have a lot of opinions about the Monarch Company. However, the Monarch Company had a powerful background and held the human body modification technology such as Compound No. 1. No one dared to take action. Ross was not brainless. Naturally, he knew that the Monarch Company was not easy to mess with.

So even though he had a lot of complaints about the Monarch Company and was envious of Luther's human body modification technology, he had no choice but to endure it.

"You know?"

Tony was even more surprised.

"After all, I am studying human body modification, Tony."

Luther used only one sentence to explain why he knew about the Hulk.

Tony understood, so Luther was not honest, and he had also found someone from the military?

Or did the military reveal it to him on their own initiative?

"How much do you know?"

Tony asked curiously.

"The Hulk, called Hulk by the military, is the product of General Ross's experiment. He is very powerful. Currently, no military weapons, including nuclear warheads, have caused any harm. According to records, the person who transformed into the Hulk is a genius doctor named Bruce Banner, who has multiple doctoral degrees."

Luther briefly talked about the information of the Hulk.

"Not bad, what do you think of this person?"

Tony nodded, it was similar to what he knew, and there were details that Tony didn't know. That green giant couldn't even be harmed by a nuclear warhead?

Is he so powerful?

Tony plans to give it a try. His Mark series has been updated to Mark VI!

The imaginary enemy of the data is Steel King, and the long-term target is Luther. After all, Luther's punch that smashed Steel King directly destroyed Tony's ambitions.

Although Tony quickly regrouped, he was also clearly aware of the gap between himself and Luther. At least, before Mark X, Tony did not intend to fight against Luther.

However, no matter how powerful Luther is, he can't take a nuclear warhead without injury, right?

However, he can catch up with the flying speed of his iron suit. Then, after flying out of the center of the nuclear explosion before the nuclear warhead explodes, the remaining attacks will not hurt him.

Subconsciously, Tony is unwilling to believe that the Hulk is really a monster that can take a nuclear warhead explosion without injury. How is it possible? How can there be such an outrageous carbon-based creature in the world?

"You want to win him over to join us?"

Luther was a little surprised. After all, the first thing the Illuminati did was to expel the Hulk and exile the Hulk. Later, the Hulk transformed into the Hulk and came back for revenge, which only made them realize that the consequences of their actions were not the real consequences. Wants to kill all the Illuminati and superheroes.

But now the Illuminati wants to recruit the Hulk to join?

"Yes, he is a genius, and he also has strength!"

Tony nodded calmly and said.

What do members of the Illuminati value?

Got talent and brains!

It doesn't matter if you are weak, anyway, they have Luther, the strongest man on earth, in the Illuminati.

It doesn't matter if you don't have a brain, anyway, they have the smartest brains on earth!

But if you don't have brains and strength, then the Illuminati certainly won't want it.

This is what Tony thinks. After all, they are fighting against the threat of Hydra and more dangerous aliens!

The Illuminati cannot have shortcomings, it must be the elite among all the elites, only in this way can it become the savior of mankind!

"Indeed, I have read Dr. Bruce's papers and works, and I feel that he is different from those doctors who fish in troubled waters."

Luther nodded.

"As for strength, I haven't competed with the Hulk, so I don't know."

"I have asked Jarvis to investigate and locate him, and he is in New York now!"

Tony laughed.

Chapter 140 The Director of SHIELD is detained by security guards

At this point in time, Bruce Banner can only come to New York to look for Mr. Blue.

In other words, Hulk vs. Abomination soon?

Luther mused.

"Listen, Luther, I won't stop you from competing with that crazy green beast, but winning or losing is not that important..."

Tony said suddenly.

Luther could tell that Tony was trying to persuade him not to be young and arrogant. The main reason was that Tony didn't know much about the Hulk's details and intelligence. He didn't know how strong the Hulk was, and he was worried that Luther would not be a match for the Hulk. , the result is that we still have to hold on.

It will be bad then.

"I am not the kind of person who is so confident that he is so confident. Don't worry, Mr. Tony, if I am not his opponent, I will not be persistent."

Luther answered.

"That's good. Of course, in my heart I still hope you can win. After all... you are more sensible."

Tony shrugged.

...

Luther's home is in the Imperial Company. He used to say that a worker's home is the company. Unexpectedly, now that he is the boss, he has realized that his home is the company.

Of course, this was certainly much nicer than his previous home, and homes in other worlds.

"Well, Hulk, Abomination can be lured into Hydra, so you can't kill him, knock him down, and then Ross will definitely demand Abomination by force according to his character, and then arrange for Hydra to rob people, and then let Ross take the blame. , he's not afraid of taking the blame anyway."

Luther thought about it and realized that Ross's background and connections were outrageous. After the Abomination Incident, he became Secretary of State not long after. He didn't even go through the process of being promoted overtly, but was promoted directly!

How outrageous is this?

All I can say is, you are worthy of being my America!

In addition, Nick Fury came to visit. He originally wanted to learn the same operation at Tony's house, but he was pinned at the door by the security guard and the police were called.

"Are you serious???"

Nick Furifac said something and showed his FBI ID. The security guards were skeptical, and then they contacted an FBI department director.

Imperial Corporation has business dealings with many government departments, including the FBI and CIA, as well as the IRS, its big brother.

The big brother of the IRS definitely needs Compound No. 1 and Superman Drug to violently collect taxes, and the other two intelligence organizations are naturally indispensable.

The bodyguard team of the Black Palace also enjoyed the provision of superhuman medicine.

Nick Fury also did not expect that Emperor Company could directly contact the head of the FBI department, and then the other party said that there was such a person.

SHIELD has impersonated the FBI and CIA not once or twice, and of course it must have been allowed.

It's just that this time it was the FBI disguised as the director who was caught, which made the FBI department director a little surprised and ecstatic.

This would give the director an excuse to criticize the director of S.H.I.E.L.D. for wasting resources and taxpayers' money while doing the same thing, and was detained by security, even if it was Imperial Company security.

Nick Fury had a dark face, but the key was that Luther hadn't seen him yet.

Luther was not interested in meeting Nick Fury. Just what happened in the secret invasion later was enough for Luther to have no good impression of Nick Fury.

To put it bluntly, he is another troublemaker like the DC Eye Bureau, and he is an answer in his own right.

In this case, why is there any need to meet?

Nick Fury didn't expect that he wouldn't even be able to see Luther. The main reason was that Tony's villa was not equipped with any security guards, otherwise he wouldn't be able to get in. As for Luther, he is a member of the entire Imperial Company, and everyone knows it. The boss is in the company, so of course you have to perform well and don't dare to relax.

In this case, let alone Nick Fury being an FBI agent, even if he said he was the FBI director, he still wouldn't be able to get in.

Luther has the confidence to ignore the FBI, and the FBI cannot offend a big capitalist.

So in the end Nick Fury had no choice but to leave.

This was the first time that he suffered such a huge defeat. If he had known better, he would not have transferred Black Widow. By using Black Widow's authority, he could directly enter the company to see Luther.

Instead of being like now, you can't even get in.

Trouble is, if he can't even meet Luther, how can he convince Luther and then drag Luther and Tony into the Avengers?

Luther also saw Nick Fury's deflated expression through Galvatron's video, which was very interesting.

"The location of the Skrulls has been found."

Galvatron said to Luther, after all, there was a secret invasion TV series, Luther could naturally find the refuge of the Skrulls, but Luther had no idea of taking action against the Skrulls. He himself was afraid of the world. How can a happy person who is not chaotic care about the things the Skrulls do.

Apart from anything else, the Supreme Mage Ancient One didn't care!

The Supreme Mage must be seriously ill if she does this!

Of course he followed the wise man.

Bruce Banner sneaks back to New York.

He didn't know that he had been targeted by two groups of people.

One group is S.H.I.E.L.D., and Nick Fury pays a lot of attention to the Hulk. Although they tried their best to persuade the military not to conduct human experiments to avoid any accidents, General Ross refused to listen, and then there was the Hulk. The appearance of the Giant Hulk.

After being defeated, General Ross tried to ask for help from SHIELD, but was refuted and rejected by SHIELD with "Why didn't you do that earlier?"

However, after that, Nick Fury kept paying attention to the Hulk. After all, he is the most powerful creature on earth after Carol. Even if he told the military that he and SHIELD didn't care, it would be strange if someone believed an agent.

Moreover, Bruce Banner's way of covering his whereabouts was very rough. He didn't carry any electronic products on his body and thought he could avoid being tracked.

In fact, in the plot of Avengers 1, Nick Fury immediately sent Black Widow to find Bruce Banner accurately, which means that Bruce Banner has been under the surveillance and attention of SHIELD.

I just don't know why Hydra didn't take action against Bruce Banner.

The other group is naturally the Illuminati. To be precise, only Tony is paying attention to Bruce Banner. Luther asked Galvatron to pay attention to the hateful Emil Bronsky.

Tony's Jarvis locked Bruce Banner, who had no electronic equipment on him, through body shape, gait, and bone comparison.

Bruce Banner didn't know he was being targeted yet, and Tony was still planning to contact him and bring Luther as a bodyguard.

He found Mr. Blue as promised.

Mr. Blue was very excited to see Bruce Banner.

"Hello, Mr. Green!"

"Hello, Mr. Blue, how am I doing?"
