

Kryptonian 161

Chapter 161 Getting ready for trouble

After Luther learned that Nick Fury arranged for Steve to meet Tony, he immediately felt that he could take this opportunity to rescue Red Tank and Blonsky.

By then, Tony and Steve might be suspicious of each other, after all, they both have criminal records.

Otherwise, Luther can actually arrange for Hydra to rob the prison once, but Luther doesn't want to compromise his own identity. He and Black Caesar must have a relationship where the king does not see the king, and then only in this way can the two identities be maintained. .

Any dishonest behavior can only be attributed to his subordinates and Tony.

Of course Tony disagreed at first, but when he heard that a special person wanted to meet him, Tony agreed out of curiosity.

Anyway, he was very determined not to let anyone who was not the Illuminati come into contact with the two Hydras, and he would not tell them where the prison was.

Tony was surprised when he found out that the person he met was actually the American soldier his father had been talking about.

"Did you, SHIELD, find an actor to trick me?"

Tony looked at Steve across from him and felt that it was not as perfect as his father had described.

"Stark, I met your father Howard, and you don't look much alike."

Steve said.

It looks like a very explosive opening.

"Oh, this soldier, don't you know that you have been eliminated now? Do you know the No. 1 compound, do you know the superman drug, do you know the suit?"

Tony raised his eyebrows and then began to speak.

He still doesn't know that Steve is not an ordinary super soldier, and feels that he can easily deal with Steve now.

"It seems you are very confident. Do you want to try it?"

Steve is serious about his words and plans to educate his son for his good friend.

He actually yelled "Long live Hydra", how rebellious this is, we must educate him!

"Come."

Tony said to Steve confidently, how strong can a backward super soldier be?

They came to the specially designed ring. Nick Fury said that you should not fight, and he was looking forward to Steve giving Stark a lesson.

He had tested it, and several agents injected with Compound No. 1 were no match for Steve, which showed that Steve was not a soldier who should be eliminated. On the contrary, Steve was very strong.

It's just that Steve shouldn't be as good as the super bodyguard created by Compound No. 2.

Sure enough, Tony was suppressed by Steve just after the fight, and after three rounds, Steve knocked Tony down.

"I thought you would fall faster."

Steve was keenly aware that Tony seemed different from other super soldiers.

Tony stood up with a bruised face. He didn't expect that he had entered the overclocking state and only managed to dodge a few of Steve's punches. Then, due to the gap between experience and prediction, he was quickly KO'd by Steve.

"Old things also have their benefits, don't they?"

Steve said to Tony.

"Come again!"

Tony said to Steve without admitting defeat.

"Stark, we are not here to fight today. We also want to find traces of Hydra. No matter what you think, Hydra is not that simple. If they can be so arrogant and hide so well, they must be What force is helping them?"

Nick Fury immediately stopped the two from continuing to fight, otherwise?

The winner has been decided. If we continue fighting, wouldn't it be garbage time?

Nick Fury still has a lot to do, and he doesn't want to waste his time on this.

"What do you want to say?"

After Tony lost the fight, he didn't refuse so firmly.

"We have people, we're S.H.I.E.L.D., we're International Intelligence Organization, so we want to get access to those two Hydras."

Nick Fury said.

No matter how talented you Stark, Luther, and Banner are, there is no way that you can match a world-class intelligence organization in terms of intelligence network!

Tony thought for a moment.

"I can't decide this matter alone."

Tony said.

The Illuminati does not belong to him, it belongs to him, Luther, and Banner. Luther also proposed the idea of the Illuminati's three giants. By the way, Luther also recommended a guy named Doom to him, who I heard is also a genius. .

So, Tony couldn't make his own decision.

Whether those two Hydras belonged to the Illuminati, or whether Luther could capture them only after defeating them, he could not decide by himself whether they were public or private.

Of course Luther agreed, otherwise how could he pass the blame?

Dr. Banner had no objection. He said that Luther and Tony could make their own decisions. He just wanted to be an ordinary member of the Illuminati and had no other ideas.

As a result, Steve and Nick Fury also met the Blonsky and Red Tank they wanted to see.

Luther is not in a hurry to arrange the Hydra prison robbery. This kind of thing must be done as reasonably as possible, with a few mistakes made. Only in this way can they make up their minds and believe in their findings.

Someone who wants to tell everyone everything will definitely make people suspicious.

Now Luther informed Norman that the research has yielded results.

The Emperor Company doesn't want anything, just samples of lizard serum and Green Goblin serum and all the data.

Norman naturally agreed. Even though the Green Goblin serum was close to success, it seemed that as long as the problem of side effects was solved, it could surpass the No. 1 compound.

It can improve human body function and brain thinking ability eight times. Compound No. 1 is nothing, Compound No. 2 cannot compare with it.

The Lizard Serum is also about to succeed. Although this thing was developed by Dr. Connors, Norman has learned it well after the miraculous operations of Peter and his wife. The most Dr. Connors can get is dividends and naming rights. In fact, Lizard The serum is owned by Osborne Industries.

In this case, Norman can naturally decide whether to keep the lizard serum or not.

"There is only one spider serum and one bat serum left to complete the Hodgepodge Serum achievement."

Luther looked at the two serums in front of him with satisfaction.

The lizard serum has been given to Hydra in a reasonable manner. There is nothing strange about Hydra even if lizardmen appear.

The Emperor Company can also launch a lizard serum enhancement project, which has its own transformation effect and can transform back into a human form. It is stronger than the No. 1 compound. It is very suitable for those who do not intend to become human. By the way, it can also strengthen the strength of a wave of super villains. .

Not to mention the Green Goblin serum, it's a good thing, and it's eight times more effective on a mouse than eight times more effective on humans. The Green Goblin is going head-to-head with Toby, the fleshiest and most powerful Spider-Man. None of them were killed.

"Hydra can't always go out with just a few people. Let's just make a big scene this time!"

Luther said.

Chapter 162 Clairvoyant wants to change jobs

All kinds of serums in Marvel are products of super soldier serum, but most of them are original serums that are biased towards animals and insects.

As for spider serum, Osborn Industries has backup data, otherwise the super spider would not have been created later.

However, the spider serum was genetically locked by the Parkers with their own DNA. Other people who were injected with spider serum would inevitably fail. Only Peter Parker could be injected with spider serum and successfully merged.

This wave of operations is simply amazing.

Only Norman is a good person, otherwise, Ben Parker and May Parker would have been arrested and settled without knowing anything.

Luther thinks that the Parkers' operation is very confusing. Either they cooperated with Hydra, or they did not care about the safety of Ben and his life at all, so they challenged the moral bottom line of a capitalist.

If you were Luther, Ben and his wife and Peter Parker would be arrested by him to threaten the Parkers.

Bat serum comes from Morbius, the vampire Morbius.

Michael Morbius, whose real name is Michael Morbius, is a world-renowned biochemist and Nobel Prize winner. He has a promising future but suffers from a rare blood disease. In order to cure the disease, Dr. Michael uses bats and electric shocks for experimental treatment.

I don't know how this brain circuit grew, but he caught a group of vampire bats for experiments.

Unexpectedly, the side effects turned him into a "vampire" who constantly needed to suck blood to survive. From then on, Dr. Morbius called himself the vampire Morbius.

After becoming a vampire, Morbius began to suck the blood of others and became an opponent of Spider-Man. Later, in order to suppress this situation, he became a vigilante and joined the superhero group Midnight Sons.

This character is quite unpopular, but he appeared in the animated series "Spider-Man" from 1994 to 1998.

In the Spider-Man animation, he had a relationship with Felicia Hardy (Black Cat). When he tried to turn Felicia into a vampire, he was stopped by Spider-Man, and Felicia also dissuaded Michael at the same time.

However, he accidentally obtained all the genes of the bat because of the gene recombination device, and he could never turn back into a human, but his love for Felicia remained unchanged.

In the animated series "Ultimate Spider-Man" from 2012 to 2017, he appeared in the fourth season.

This version is a member of Hydra, helping Doctor Octopus to make anti-venom, and after successfully making anti-venom with Doctor Octopus, he was used by Doctor Octopus to become a bat, which can absorb energy from any creature.

However, this is the Marvel Cinematic Universe, so the bat serum and Morbius here are the versions in the movie "Dr. Morbius".

Luther has asked people to find the bat serum and this Dr. Morbius.

Nick Fury is careful enough.

Under Tony's dissatisfied opinion, he did not dare to bring many people from SHIELD here. Only a few people he trusted the most could come to interrogate Hydra.

Coulson, Black Widow, and even Hawkeye, who was free because of the disappearance of the Cosmic Cube, and Garrett.

Garrett came here by himself. After all, he felt that the Hydra of Black Caesar represented hope.

As a mysterious clairvoyant, Garrett was actually just an ordinary person whose life was like a candle in the wind. For this reason, he placed his hope on various strengthening drugs. Although the No. 1 compound of the Emperor Company was a bit expensive, Garrett could feel that his terminal illness was cured after the injection.

After the examination, the doctor told him that his terminal illness had not been cured. It was just because of the No. 1 compound that his body functions recovered and got the illusion of strengthening, and the terminal illness was also strengthened.

He had more time, but when the disease broke out, he would die more painfully.

Compound No. 1 is not a special medicine. It passively stimulates the potential of the human body and strengthens the human body mechanism. Then the viruses and bacteria that the human body has reached a symbiotic relationship will naturally be strengthened.

This is a problem that humans in this world have not yet realized. As more people inject Compound No. 1, super viruses and super bacteria will soon be born.

There is no way, Garrett can only think of finding other people to solve the problem.

Hydra, undoubtedly has such ability.

Especially the recent emergence of Black Caesar, so many superpowers, it is a bit too outrageous to say that all of them are mutants.

Because mutants are ordinary people before awakening their abilities, and it is impossible for them to be silent after awakening their abilities.

A few of them can be said to be the excellent intelligence ability of Hydra, but these are ten superpowers, and there is no movement at all, and their identities cannot be traced?

So, either someone in Hydra is covering up, or Black Caesar and his team have mastered the method of creating superpowers.

Garrett also knows about the attack on Captain America. It is said that the attacker has an immortal body, although he was killed by a bomb in the end.

But Coulson is his comrade-in-arms and a long-time friend, so he did not hide the fact that the attacker shouted the slogan of Long Live Hydra before he died.

Although it has not been made clear yet, for Garrett, Black Caesar's hope is undoubtedly greater.

He will naturally not miss this opportunity to contact Black Caesar.

Before, he said that he wanted to switch to Black Caesar and asked Pierce for help. However, Pierce said that he didn't know any information about Black Caesar. How could this be possible? How could there be no communication and intelligence between the snakehead, the supreme leader?

Garrett immediately understood that Pierce did not want his power to join Black Caesar. Although Garrett did not become one of the supreme leaders of Hydra, the power of SHIELD owned by Garrett was not much worse than that of Pierce.

It can even be said that Pierce turned Garrett against Hydra to make Hydra develop to this point.

If he switched to Black Caesar, Pierce's control over SHIELD would not be the same as it is now.

Therefore, he would refuse his job change.

However, it doesn't matter if you refuse, as long as you can cure me. The problem is that if you can't cure me, isn't that going to kill me! ! !

Garrett was very angry, so he planned to come by himself.

"The Clairvoyant is here too, so it seems that today is a good opportunity."

Luther was thoughtful. He couldn't let Hydra invade after Coulson came, right?

Wouldn't that be a trap for Coulson? Anyway, Nick Fury is definitely not honest, and there might be Skrulls coming. Of course, it is better to invade directly when there are more people.

This way, Tony probably won't believe Nick Fury's lies anymore.

Chapter 163 Prison Break

"I want to know how to contact Black Caesar."

Garrett said to Red Tank and Blonsky.

The two of them turned a deaf ear.

"Damn it, when I get out, I'm going to tear you in half!!!"

Red Tank was already a little crazy. He was being tortured. When Bronski saw it, he felt that these people were crazy and came up with such a torture method. Fortunately, he was very cooperative, so he did not receive such treatment.

"I already said, we don't know anything."

Bronski smiled and then said.

They really don't know anything. The leader has the ability of telepathy and can contact them directly without arranging any contact information.

"We're in this together, Hi Hydra!"

Garrett had no choice but to say this secret word. Fortunately, his people had already supervised the place, and what he said would not be known to others.

"What's that?"

Blonsky looked at him like a fool. Shouldn't he think that he would believe you just by shouting like this?

"Get ready, I'm here to save you."

Suddenly, a voice sounded in the minds of Blonsky and Red Tank.

"leader!"

Blonsky's expression changed slightly, and he hid it just right.

The red tank couldn't do it, and he suddenly laughed loudly.

"Hahahahaha, I knew it, I knew it!"

Garrett looked confused, but thought he had gotten their recognition by saying this secret word.

Until he heard the gunfire outside, it sounded like he encountered a large number of enemies. The gunfire suddenly became dense and deafening.

Of course, Tony couldn't trust the people from SHIELD, so he arranged the most advanced weapons system, including not only automatic machine guns, but also high-energy laser weapons. This was Luther's suggestion, saying that a laser channel should be designed to prevent enemies from breaking in.

Although Tony felt it was a bit cruel, he still did it with dignity and integrity.

"Does the movement outside have anything to do with you?"

Garrett realizes this.

"You are dead!"

Red Tank laughed wildly.

Outside the prison, Tony's prison has not actually been completely built. Because he wants to maintain high confidentiality, he cannot use ordinary workers and can only use omnis to complete it.

As for the location of the prison, Tony had a sudden idea and planned to build a mobile prison.

Of course it's not a prison that moves on the ground, that would be too troublesome. This is a semi-suspended prison that has no fixed location, just like ghost flights and space carriers.

Just complete the anti-radar and signal coating of the mobile prison, and this prison can become a "Bastille" that will never fall!

But now it seems that it couldn't wait until it was finished, and a large group of "lizard men" rushed in!

These lizard men were all subordinates that Luther randomly captured from drug lords, and then injected them with lizard serum, allowing them to carry large-caliber 12.7 mm automatic rifles with drum magazines.

The Lizardmen are naturally much stronger than Compound No. 1. Such a large group is fully armed, wearing super-heavy body armor and five-centimeter-thick steel helmets that are as heavy as

Russia. They are invulnerable. In addition, the Lizardmen have the ability to regenerate. , you can recover quickly even if you are injured.

So, Hydra agents... no, SHIELD agents suffered heavy casualties. If it weren't for the weapon system designed by Tony, they would have been attacked by this group of lizard men.

"Two losers still need me to take action personally."

Obsidian and a big steel man said dissatisfiedly.

This big steel man is called "Colossus", not the mutant Colossus, but a copy of the Colossus that Luther made at random.

It is stronger than Obsidian and Bronsky after mutating again, and is on par with the red tank, provided that the red tank does not charge.

The advantage of lizard soldiers is that they are strong. One of the lizard soldiers carried a modified anti-tank gun. For him, this was barely a heavy weapon.

"Bang!"

After a loud noise, the automatic machine gun of the weapon system was exploded.

No matter how hard the alloy is, it cannot be an opponent of the anti-tank gun.

"Bang! Bang!"

The door was also forcibly broken open by the lizardmen using this method, and then the lizardmen filed in, killing everyone on sight.

"It's a lizard man!"

"Hydra can actually mass-produce lizardmen?"

They saw that the body armor on these lizard men had a hydra pattern.

Then Tony rushed over, taking Banner with him.

"Fly slower, Stark!"

Banner said quickly.

"I'll try my best, Banner."

Tony complained that he really shouldn't trust those people from SHIELD, but fortunately, he was already prepared.

Steve was naturally here too. When he heard the prison's alarm, he immediately picked up his shield and rushed out.

"team leader!"

Black Widow and Hawkeye hurriedly followed and were surprised to see the lizard soldier.

"Hydra!"

Steve saw the Hydra pattern on these lizard men. It was because the enemies were extremely jealous when they met, and rushed towards them without saying a word.

Hawkeye raised his hand and shot a few arrows to cover Steve, but these arrows were naturally unable to penetrate the protection of the thick alloy baffle on the lizard man's body.

"Damn, the body armor these lizardmen wear is too exaggerated!"

Hawkeye complained, this is equivalent to the armor of an infantry fighting vehicle, right?

Even the helmets have bulletproof glass goggles. Even if he can accurately shoot their eyes, he can't break through the defense so quickly.

It was the first time that Steve fought such a monster. The lizard man fired at him crazily, all hitting the shield in front of his body.

The shield was sparking, and Steve was completely unaffected by the stopping force, because the vibranium absorbed all the kinetic energy!

After getting close, Steve swung the edge of the shield to cut the lizard man's legs. The edge of the shield made of vibranium was also very sharp, but Steve didn't use it like this normally. There was no such thing in World War II. He just shot directly.

The lizard man was caught off guard and the alloy baffle on his leg was cut open, cutting his flesh and blood. After feeling the pain, he slapped his claws on the shield, which knocked Steve out and hit the wall.

Fortunately, Steve's physical fitness was far superior to that of ordinary people, so naturally nothing happened.

The Black Widow was chased by two lizard men and ran around. Her weapons couldn't break the defense, and there was nothing she could use in the surrounding environment.

Hawkeye was still okay, he could specifically attack the unprotected parts of the lizardmen, after all, even the alloy shields had gaps.

But this was only a drop in the bucket, not to mention the appearance of the big guy.

Chapter 164: Phishing and Anti-Phishing

When the Lizardmen soldiers couldn't advance because of Steve and Black Widow, Obsidian and Colossus fiercely tore through the defense line.

"What kind of monster is this?"

Steve saw Colossus and Obsidian, one was a stone man, and the other looked like an iron man, and they were so powerful that they almost demolished the wall of the prison. Even if it was alloy welding, it couldn't stop these two guys.

Luther liked these big, muscular men the most, so that he could have a good reputation. You are a skinny guy like Ebony Maw, can you do anything?

Just by looking, you can tell which side has higher morale, right?

The appearance of Obsidian and Colossus made Coulson and Garrett at a loss.

"Go to hell!"

Obsidian was ruthless and didn't say much. He was going to send Coulson and Garrett to heaven and hell with one punch.

Garrett didn't know whether to expose his identity as Hydra, after all, Coulson was still here.

But when he saw that Obsidian's basketball-sized fist was about to hit him, he finally couldn't help it.

"Nine..."

Just when the first word was about to pop out, a tin can fell from the sky!

"I knew you were unreliable!"

The tin can blocked him in front of him, and by the way, opened a special shield to block Obsidian's punch.

The kinetic energy was transmitted to the inside of the shield, deflected and reflected by tens of thousands of nanorobots, and finally the terrifying power of this blow was completely eliminated!

Then Tony Stark's voice came out.

"Mr. Stark..."

Garrett pretended to be innocent.

Coulson didn't know what to say.

"Mr. Stark, I believe in our SHIELD people."

He could only say this.

"So you mean there is a traitor in my people?"

Tony complained, and then his arm armor expanded, and he punched Obsidian away.

"This..."

Coulson naturally couldn't say that, otherwise he wouldn't be Coulson.

"Could it be that Hydra's intelligence capabilities are excellent?"

Tony rolled his eyes.

Everything was fine before you came, but after you came, something went wrong. There was indeed something wrong with that guy named Black-skinned Egg, who actually brought so many people here.

Tony had silently asked Jarvis to register everyone's information, intending to investigate thoroughly this time.

In fact, Tony already had a plan for this attack, and he also notified Luther and Banner to be prepared, because he wanted to fish!

It was okay for Red Tank and Bronski to be stubborn, and there was nothing they could do, but fishing was something that everyone could do.

So when Black-skinned Egg arranged so many people to come, Tony only resisted a few words.

Now he caught it as expected.

You know, not many people know the location of his mobile prison, only people from SHIELD and the Illuminati know it. Do you want Tony to suspect the three people from the Illuminati?

Or do you want Tony to suspect that Jarvis has been invaded and controlled?

"Where's Mr. Luther?"

Facing Tony's expression, Coulson could only say awkwardly.

"Hydra probably arranged people to intercept..."

Tony has contacted Luther, but Luther said that he couldn't come for the time being, and met a very powerful guy.

Tony didn't dare to imagine how terrifying Hydra's background was, as Luther was the most terrifying and powerful man he had ever seen.

"In other words, we can only rely on ourselves?"

Coulson quickly called for support from SHIELD.

Banner turned into Hulk after getting off Tony's private plane.

"Hulk!!!"

Hulk picked up a huge heavy sword and put on nano armor.

After all, Hulk is now a formal member of the Illuminati, so Tony naturally couldn't fail to prepare weapons and equipment for him. Hulk himself doesn't like these things, he only believes in his fists, but Luther said he could try, so Hulk obediently tried.

This made Tony speechless. Hulk obviously listened to Luther the most, then his, and finally Banner.

Wielding a heavy sword of terrible quality, Hulk slashed Colossus with one sword.

Colossus raised his arm to block. Although he was the product of Luther's bad taste, he was more like a metal version of Hulk than Colossus, so he attracted Hulk's attention the most.

"Bang!!!"

The reaction force of this sword made Hulk retreat several steps, and Colossus had a scar on his arm.

"What a strong arm!"

Tony was a little surprised, and then he unfolded his nano suit, and the newly installed floating gun sprayed out blue dreamy light, but it was deadly dangerous.

A lizard man was accidentally brushed by the blue light, and then half of his body was gone!

Even the protective suit on his body couldn't save him.

Plasma jet!

Similar to the plasma shoulder cannon of the Predator, but the lethality is concentrated on melting the target instead of blasting at close range.

Theoretically, there is no target that cannot be solved by plasma jet, except that the floating gun may overload and overheat.

Plasma and plasma are different names for the same thing. One is translated from the principle, and the other is translated from the appearance. Both translations are translated by the same translator.

As for why lasers are not used?

Under the same energy source, the temperature generated by the laser is higher, and the ablation and shock wave effects are stronger. In theory, the laser is indeed stronger.

However:

Take ceramic steel as an example: under the same joule unit.

The greatest ability of the laser is to melt molten iron like hot melt.

The flame can only burn red and bright.

Plasma has the ability to vaporize ceramic steel.

The larger the size of the laser, the greater its power. The power of a large laser cannon can far exceed that of a plasma of the same size, but only a vehicle can pull it away.

Plasma plasma weapons fire a mass of high-energy real plasma.

If you are hit by a shot, you will run two steps directly, and it can also burn you through!

No matter how powerful the laser is, it still fires one shot at a time.

The single-shot damage is much poorer than that of plasma.

Remember that individual laser weapons are just enough to deal with light infantry units.

If you change to heavy infantry and super heavy infantry, you will be collecting heads with mecha vehicles.

The lizardmen looked miserable, but in fact, they could regenerate as long as their heads were not damaged. However, the high temperature and heat plasma carbonized their body wounds, and they could only cut off the carbonized parts if they wanted to regenerate.

"Damn, has Hydra already realized the production plan of lizardmen soldiers?"

Tony felt it was outrageous to see so many lizardmen rushing in.

His four plasma floaters fired continuously, and the weapon system of the nano suit was fully activated, but he couldn't stop the attack of this group of lizardmen.

Chapter 165 Failure

As for the laser channel, it only cut a few lizardmen, and then they blew them up with C4.

The laser channel is obviously only good for killing at the first sight. It obviously doesn't have much effect in the face of this kind of attack!

Tony noted this down, not thinking at all that Luther knew the situation.

Hulk was entangled by Colossus, and Tony was also entangled by Obsidian. However, Obsidian did not dare to attack the plasma jet, but the plasma jet could not continue to fight. The cooling device prepared by Tony could only sustain ten rounds at most.

Steve, Black Widow, and Hawkeye tried their best to prevent the Lizardmen from rushing in to save Blonsky and Red Tank.

Garrett thought this was a good opportunity to vote for his own certificate.

"What should I do?"

Garrett thought quickly.

Free Blonsky and Red Tank?

No, no, that would be too obvious.

Garrett thought about it, and then his eyes were set on the defense line established by Steve and the others.

Let there be a flaw in this line of defense and let the lizardmen come in?

No, this is too subtle. Maybe after Red Tank and Blonsky come out, they will kill him immediately.

Garrett racked his brains.

How about taking action on the power supply system?

Unfortunately, Tony had already anticipated such a situation. Each repulsion cage was powered by a separate micro-reactor. It could be said that there would be no need to worry about power supply problems or power outages for at least hundreds of years.

Before Garrett could think about the result, he heard "boom"! ! !

He lost consciousness and a big hole was blown in the wall!

Then a group of lizards came in, and Bronsky and Red Tank were very excited.

These lizards have installed bombs to blow up the repulsion cage without worrying about harming the people inside.

Amidst the billowing smoke and flames, the huge body of the red tank stepped through the flames.

Blonsky also transformed into a fluorescent green Abomination and appeared.

"Don't be obsessed with fighting, leave quickly."

Black Caesar's voice sounded in their minds again.

This made the red tank who originally wanted to cause a scene pause, and could only give up the idea in frustration.

He doesn't dare to disobey Black Caesar now. After being beaten by Luther and knocked to the ground time and time again, and after completing the containment, Red Tank has clearly realized that even if there is the Lord of the Crimson Dimension behind him, , but his strength is not invincible.

Black Caesar and Luther are both stronger than him!

Of course Tony and Hulk would not let them leave so easily, but the lizard man who couldn't stand Hydra was so crazy that he died with them holding a bomb.

Moreover, the power of this bomb was so exaggerated that the prison was blown to pieces.

"Jarvis, what's the result of the Angel of Peace tracking?"

Tony didn't give up, even if a large part of the nanobots were blown up, and his whole body became disgraced.

"Sorry, sir, Angel of Peace was disturbed and unable to detect the whereabouts of the Hydras."

Jarvis's answer made Tony very unwilling.

How could the Angel of Peace be disturbed?

How is this possible? You must know that Angel Angel is no longer just a satellite and surveillance camera. Any device that can transmit signals will become part of Angel Angel surveillance network.

Luther came later.

"How are you?"

Tony asked when he saw that Luther was spotless and didn't look like he had been through a battle.

"I encountered a very troublesome superpower who trapped me in a different dimension. I finally escaped."

Luther said without changing his expression and his heart not beating.

Tony was startled. He thought Luther had encountered some powerful superpower, but this is what happened?

But thinking about it carefully, I have to admit that this ability is really restrained for Luther.

"Don't worry, I have calculated the data of the different dimensions and you can come out immediately next time you go in."

Luther's next words made Tony put aside his worries about this superpower.

Can we only say that he is worthy of Luther?

"My eyes now can see wavelengths, colors and light that humans cannot see. Different dimensions may look very powerful, but in my eyes there are many places that can be used."

Luther continued.

Tony paused, he couldn't imagine what it felt like, but it must be very...unimaginable?

"Feel sorry."

Tony said to Luther.

"Why are you apologizing?"

Luther looked like he didn't recognize Tony.

"Because of my reasons, Bronski and that guy were rescued."

Tony said with some embarrassment. He felt frustrated. Ever since he confronted Hydra, it was as if Hydra had seen through every step he took, and he was constantly frustrated.

He even doubted his ability.

"It turns out it's because of this. There is no need to apologize. I agreed at the beginning. Is it that our Illuminati cannot accept a failed organization?"

Luther shook his head and said.

When Tony heard Luther say this, he immediately didn't know what to say, but he was very moved.

Of course, as a tough-tongued person, Tony would definitely not say words of thanks, he would just bury it deep in his heart.

"First meeting, Mr. Luther."

Steve and the others came over.

This is the first time Steve has seen Luther, and he feels that Luther is a very good young man.

"Why are you still here? Let that black-skinned braised egg take you away!"

Tony said unhappily.

"I told you in advance that I will keep an eye on each of you and find out the identity of each of you. No matter who among you is Hydra, I will not let it go. You should know my strength very well. !"

After Tony finished speaking, he stared at the group of agents in front of him.

Of course, it's impossible for the Hydra agents to reveal any clues or changes in their expressions just because of his words. In that case, wouldn't their agent school be in vain?

"Stark..."

Steve wanted to say something, but Tony didn't give them a chance to say that and drove them away.

Next is the Illuminati's own private meeting. What are these people still doing here? There are no more Hydra members. They have lost the basis for cooperation and trust.

Steve could only say goodbye to Luther.

Luther didn't seem to have any special feelings for him.

Nick Fury was also very serious and annoyed about what happened this time.

He really wanted to put a pound of confession water in each person and see if he could force out the Hydra people.

But of course you can't do this. Confession water can still damage the human brain, especially the kind of confession water used by S.H.I.E.L.D.

Nick Fury felt that many of them were S.H.I.E.L.D. agents, and doing so was completely nonsense.

Chapter 166 Chimera Bronsky

No. 1 Bronski

Little did he know that if Nick Fury really did this, ten SHIELD agents would have to find out at least nine Hydra agents for him.

When Pierce knew that Garrett had secretly "interrogated" the two Black Caesars, he was going crazy.

This guy, why are you doing this to me?

Pierce was about to call Garrett over and scold him, accusing him of doing this and exposing their Hydra. Black Caesar didn't contact them, and they could slowly find opportunities to contact Black Caesar through these two Hydras.

But Pierce suddenly stopped.

This person is afraid of being suspicious. Suspiciousness will lead to overthinking, and overthinking will lead to who knows where.

Now Pierce is just a little suspicious.

Why did Black Caesar's people come here less than a day after Garrett went there?

"Garrett... Could it be that he has reached a cooperation with Black Caesar, or did he directly help Bronski and others escape from prison?"

Pierce thought about it, and he felt that this matter seemed not so simple, and there were things hidden in it that he might not expect.

The key point is whether Garrett has contacted Black Caesar!

If Garrett has contacted Black Caesar, can he still trust his part of Hydra?

If he helps Bronski and others escape without contact, then Garrett's move is undoubtedly a betrayal, and he also puts him, the head of Hydra, on the fire!

Who knows what Black Caesar is thinking? He has not contacted them for such a long time, and they can't find the Hydra of Black Caesar.

"Temporarily stop all connections with Garrett's part of Hydra, don't expose this."

Pierce immediately found his confidant, the bald man with glasses Sitwell, and said to him.

"What happened, sir?"

Sitwell asked in surprise.

He felt that something big was going to happen, otherwise why would his boss do this?

"Don't ask if you shouldn't ask."

Pierce frowned and said.

"Yes, sir."

Sitwell bowed his head and admitted his mistake.

"Garrett may have betrayed us."

That's what he said, but Sitwell was his confidant after all, so Pierce finally told him.

"What?"

Sitwell was really surprised. He knew very well that Garrett and Pierce were not in a superior-subordinate relationship. In the Hydra of SHIELD, the two were the top leaders, and they could also be called the two heads of the snake.

If Garrett betrayed, would they be okay with the Hydra?

"It's not betrayal of Hydra, but it's possible that he jumped to Black Caesar. In this case, Black Caesar would have a reason to intervene in SHIELD."

Pierce said with a headache.

"So that's how it is."

Sitwell breathed a sigh of relief. It's okay if he didn't betray Hydra. As for Black Caesar, Sitwell himself wanted to jump to Black Caesar, because there are so many Hydra gangs now, and Black Caesar's gang is the most powerful!

They can rob people and kill anyone they want, unlike them who have to hide and hide, and dare not come recklessly when encountering things.

Black Caesar has achieved what is called unscrupulous.

Hydra envies Black Caesar's attitude and behavior. More importantly, he is not unscrupulous without a brain. He knows how cautious he is. All the supreme leaders have not found any information about Black Caesar.

So, who doesn't like such a powerful and capable boss?

That is, Sitwell knows that Pierce and others can't contact Black Caesar, otherwise he would have secretly filled out the application form.

Bronski and Red Tank returned to Black Caesar's base.

"Bronski, do you want to become stronger?"

Then Bronski was questioned by Black Caesar.

"Of course, BOSS, as long as I can become stronger, I am willing to do anything!"

Bronski agreed without saying a word.

"Your body is very special, Bronski. Not everyone can accommodate so many human body modifications like you. What you lack now is a regeneration ability and improvement."

Luther looked at Bronski with satisfaction.

Bronski's physique is indeed a bit special. It feels like anything can be added to it. If Luther hadn't been able to get Captain America's super soldier serum yet, he might have added it to him.

But now at least he has got the lizard serum, the green goblin serum and the spider serum.

It was a little troublesome later. The Parkers added a gene lock, but for Luther, it only took a few hours to unlock it. There was no need to specially cultivate super spiders to bite Bronski. Just inject it directly.

"After this injection, you are no longer Hulk, but Chimera."

Luther said to Bronski.

The Chimera here refers to the Chimera in a broad sense: chimera, an individual with two different DNAs can be called a chimera.

In medicine, there is a phenomenon called the Chimera phenomenon, which means that a person has four sets of genes.

This phenomenon is called the Chimera phenomenon.

"Chimera?"

Bronski naturally didn't know about the Chimera phenomenon, nor did he know the concept of chimera. He might know the Chimera in myths and legends, so he didn't quite understand why he was described as a Chimera.

"You still hate it, but... forget it, you don't understand these things either."

Luther saw Blonsky's confusion and shook his head, feeling that he was playing the piano to a cow by saying this to him.

"Let's start. Let's take a look at the lizard serum first."

Luther discovered that Blonsky had the potential to become a container or universal lytic body, but he did not know what the upper limit of Blonsky's gene carrying capacity was. The gene regeneration ability of the lizard serum helped to strengthen this gene carrying capacity.

Just like the things he did in the Super Seminary, if Bronski went to the world of the Super Seminary, his innate genetic carrying capacity would be able to accommodate two different super genetic engines at least.

Blonsky felt the green liquid injected into his body, and then Blonsky felt pain.

There was something inside his body that was biting, tearing, and drilling into him with a knife.

Even though Bronski has experienced hundreds of battles and been injured countless times, he still feels unbearable now.

"The genes are starting to conflict, but we can still hold on."

Luther could see clearly and did not need any instruments to monitor the situation inside Bronski's body.

Blonsky's body began to change. Hulk's blood was very overbearing. Not to mention that he didn't do anything at the time and just injected it directly. Blonsky was special. Another person would have been dead.

Chapter 167 Triple Serum Enhancement

Now Hulk's blood has been activated by the invading lizard serum.

The effect of the lizard serum in the original plot is to implant reptile genes from the blank fragments of human genes. Now, Bronski's genes already have a lot of things, and the lizard serum is equivalent to activating these things.

"It would be better if we get the Extremis virus?"

Luther looked at Bronski who was struggling in pain, and even grew another pair of arms, turning into a hideous four-handed abomination!

The Extremis virus is a good thing. It can modify genes and add genes according to your own ideas. Theoretically, if you get Thor's genes, you can fuse Thor's genes, and if you get Hulk's genes, you can fuse Hulk's genes.

However, Luther looked down on the Extremis virus, and did not think that the Extremis virus could modify and fuse Broly and Doomsday, which could only be accomplished by the Reality Stone. The Extremis virus is still a little bit worse.

Moreover, the Extremis virus is Tony's enemy. Luther is eager to make the Extremis virus incident more serious and the scene more spectacular, so he is too lazy to look for the Extremis virus now.

Bronski quickly adapted to the lizard serum, and his body surface also had a layer of lizard scales, full of reptile coldness.

"Power!"

Bronski's reason was lost due to the pain, but he could still maintain consciousness, but his consciousness was only the pursuit of power.

"The lizard serum has only improved you very little, except for strengthening your regeneration ability. Congratulations, you are now stronger than the lizard man, and you will not die if your head is smashed, unless you are completely reduced to ashes."

Luther looked at it and said.

Bronski, who was awakened by Luther's telepathy, felt his body.

"However, you should also avoid having your head smashed, because the regenerated brain tissue may not have your memory, and then it will be considered as killing you."

Luther said.

Bronski is not Wolverine after all. Wolverine's brain is protected by an adamantium skull, and there is no possibility of damaging the brain tissue.

But even so, after being shot in the head by Agent Zero with adamantium bullets, his memory was affected, causing him to lose part of his memory.

The regenerated brain tissue is new brain tissue, but it does not include one's own memory.

So those things that can be remembered after the damaged head grows out are generally not materialistic things, but mysterious forces.

Bronski originally thought that he could do whatever he wanted in the future, but now he felt a chill when he heard Luther say this.

Wouldn't that be equivalent to formatting the brain?

No, the whole person was formatted. At that time, he would not be himself.

"I understand, BOSS."

Bronski said hurriedly.

"The next thing I'm going to inject you is spider serum, which can make you more sensitive."

Luther used telekinesis to control the spider serum and injected it into Bronski's body.

Bronski's genes, which had already stabilized, began to conflict again.

Luther did not synthesize a super spider, so he just selected a spider for Bronski and used its venom and formula to make this spider serum. Maybe there will be some side effects, such as allowing Bronski to spin silk.

The spiders randomly selected are of course the most common jumping spiders. As for wolf spiders and black widows, Bronski doesn't kill people with venom, so it's useless to have those. It's better to have a more flexible spider.

The spider serum merges very quickly, and it may also be the help of the lizard serum. After Bronski merged with the spider serum, he could easily jump his tons of body to a very high and far place, almost equivalent to flying.

"Finally, there is the Green Goblin Serum. I think this thing should be strengthened according to the physique, or it may be due to the dosage."

Luther said to Bronski.

The Green Goblin Serum is at the end for this reason, but Luther has not conducted specific experiments, so he can't figure out the upper limit of the Green Goblin Serum, but it can stimulate the potential of living organisms.

Theoretically, the Green Goblin Serum can even create biological weapons such as Hulk Dog. The white mice have been strengthened eight times in physical function and intelligence, let alone other creatures?

There are really too many things that defy the heavens in the old comics.

So this time Luther prepared a full 1,000 liters of Green Devil serum, ready to be directly atomized for Bronski to absorb.

The absorption effect of drinking it directly like Norman did is not as strong as the absorption effect of atomization, nor is it as strong as the effect of injection.

Luther planned to take a two-pronged approach, atomization absorption and injection together.

In order to become stronger, Bronski did not care about the possible gene collapse at all, and injected three times a day. Only he dared to do this.

After making sure that Bronski was ready, Luther directly started the device.

Suddenly, a large amount of green mist was seen being inhaled by Bronski through the respirator. At the same time, the twelve needles pierced into his body were injected with Green Devil serum.

Then, in Luther's eyes, Bronski's cells began to change violently, first broken, and then gave birth to more powerful cells!

"2 times, 4 times, 7 times, 8 times,..."

Luther calculated the degree of Bronski's enhancement, and Bronski had lost consciousness at this time.

Until Luther saw that Bronski could no longer absorb the Green Goblin serum and his body began to collapse, but was held tightly by the effect of the lizard serum, he stopped the experiment.

Afterwards, Bronski woke up after thirty hours.

This time when he woke up, Bronski felt that he had become different. With a light grab, he crushed the metal bed railing into pieces.

"Your current physical strength has increased by more than fifteen times, and it is estimated that it will be more than ten times stronger after the transformation."

Luther's voice sounded in Bronski's mind.

"Fifteen times?"

Bronski looked at his hands excitedly. Is this his current strength?

"Yes, now even if you don't transform, the shells can't hurt you."

Luther said.

But he didn't expect Bronski to apply to compete with Red Tank and the newcomer Steeler who had just emerged.

After Red Tank came back, he also thought about fighting with Steeler, a strange guy, to determine his status.

But Luther knew Bronski's character, so he postponed it until Bronski's experiment was successful, which could save trouble.

After a fight between the three, Red Tank and Colossus were evenly matched, but Bronski crushed them both.

Chapter 168: Stimulate the world x, want to see the world burn

Of course, if the red tank charges, he is still unstoppable with infinite power, even Bronsky, who has become so much stronger, can only avoid his edge.

However, Bronsky no longer looks hateful now, but more like a thorough reptile that walks upright, and even grows a tail that is longer and heavier than his height.

This tail is used to maintain balance, and the weight is very exaggerated, but Bronsky can swing his tail flexibly, and even use supersonic tail whip attacks. After calculation, Luther concluded that if Bronsky swings his tail with all his strength, the air blade created can even split the tank's armor!

He even suspected that Osborn Industries had added ingredients to the lizard serum, such as... Godzilla or something.

After all, the current Bronsky looks like a Godzilla after the transformation, which looks very scary, and... he has become greener.

"Each creature has different genes and body sizes, so when making serum, the parameters in the decay rate formula need to be adjusted."

Luther didn't need to ask Peter Parker about the decay rate formula. It was probably a question whether this little spider knew it or not.

His super brain had learned all the knowledge of mankind, and it took only a few minutes to solve the decay rate formula.

Many serums in Marvel are animal serums. The most classic and well-known ones are spider serum and lizard serum. The less popular bat serum is basically unknown. The scientific version of vampires created by this thing is very powerful. It is not a problem to beat the traditional Blade series of vampires.

Even pure-blooded vampires are probably not opponents.

Luther did not check which reptile lizard the lizard serum came from. Osborn Industries couldn't have dug up Godzilla's remains and extracted DNA to make it. How to calculate the decay rate formula?

And the person in charge of this cross-species gene transplantation project is Dr. Connors, and he himself did not become Godzilla.

The fact that Hydra has mastered the production technology of lizards has made SHIELD restless. Nick Fury has no choice but to tell the Security Council about this, because he can no longer use SHIELD to solve this problem alone.

This matter has indeed attracted the attention of the Security Council, but they can't solve it.

A terrorist organization that can mass-produce lizard soldiers?

This terrorist organization also has a large number of superpowers who can destroy cities?

The Hydra of the past is back!

Even the five major mobile weapons dealers can't ignore the threat of Hydra now.

Because except for the five of them, no country can compete with Hydra, and the other party is not a national force, but just an organization. It is simply unimaginable that such a ridiculous thing will happen in this era.

Even except for the top three, the other two gangsters probably can't deal with the attack of Hydra.

Even though Tony has a lot of opinions about Nick Fury, he has no resistance to providing information about Hydra.

Tony knew very well that with the current scale and strength of Hydra, the Illuminati could not deal with Hydra alone. Their strongest card was only Luther, and the others, including himself, were not strong enough to fight against Hydra.

Hydra, too powerful!

This made Tony eager to get stronger power and help. The five major mobile weapons dealers were the best partners. Even Hydra would find it difficult to resist them, after all, they were the most powerful existence on the planet.

Then Luther spread the video of Hydra attacking the Illuminati prison. He wanted to use this video as a product promotion video.

As for what product it was, of course it was lizard serum. Could it be Hydra?

After the video was leaked, it soon caused an uproar. It was not that there were no people who saw through Hydra's ideas. For example, the underground emperor Kingpin asked for a lizard serum.

"I want a lizard serum. No matter who it is, as long as they can bring it to me, I will give him 5% of the annual drug trade in New York City, which is equivalent to \$100 million in annual income."

Kingpin's words excited many people, and also surprised Luther that Kingpin knew how to behave.

Is he bidding before there is a market?

It is certain that lizard serum is more expensive than compound No. 1. It is stronger than Captain America. The hard scales on the surface of the body can withstand bullets from small-caliber automatic rifles. It also has very strong regeneration ability. Dr. Connors's broken palm can grow back at a speed visible to the naked eye.

It is this metabolic rate that is a bit scary. Luther estimates that if he is constantly injured or often injured after injecting lizard serum, it will accelerate the aging of cells, which is equivalent to every lizard man being a potential patient of progeria.

Selling lizard serum will increase confusion, but Luther doesn't care, just like he doesn't care about money and intends to make most people able to afford lizard serum.

Otherwise, how can it become more chaotic?

"Let the world burn... I hope to see news about a group of lizardmen robbing a bank tomorrow."

Luther knows that what he is doing is strengthening the power of the earth!

In the face of the threat of the upcoming invasion of the Chitauri and the invasion of Thanos, what are the mere lizardmen and Hydra?

The earth is too peaceful, so it has become a stagnant pool. Now, he is the killer whale in the fish school, activating those dead fish!

He is definitely not doing this for fun.

I believe that Master Gu Yi can definitely understand his good intentions!

Hell's Kitchen!

The most chaotic and the worst place in New York, because the community has no money to pay taxes or pays less taxes, the police have no tax revenue, and naturally there is no way to guarantee the police force. If someone dies on the street for four or five hours, it is estimated that no police will come, and this is still during the day.

If it is at night, then the police really don't even bother to go out.

There is an underground emperor of New York, the ruler of the dark world, nicknamed "Kingpin" Wilson Fisk.

Kingpin saw the idea of Hydra or someone with ulterior motives to release that video, so he shouted in the underworld for lizard serum.

However, Jin Bing did not expect that the express delivery service of Hydra or someone with ulterior motives was so advanced. He just called out last night, and tonight, Jin Bing received a box of lizard serum in an incubator. He didn't even know how the box got to his home, and his bank account and the hidden vault were missing a sum of money.

"Hydra?"

Chapter 169 Jin Bing: My little money!!!

Kingpin counted the money he was short of, and it just matched the ten bottles of lizard serum in the box.

A billion dollars is gone.

I feel so distressed that I can't breathe! ! !

The key is, that's the money he just laundered! ! !

Forget it if you take black money, how much is the money after laundering?

The commission for money laundering is 50%. This is because Jinpin has connections, connections and channels, and has recommended several district councilors, and uses their connections to help him launder money.

Some people have to grit their teeth and wash their teeth 60% of the time.

So the Kingpin can be said to have suffered a heavy hemorrhage.

"It doesn't matter. With these ten lizard serums, I can earn more!"

Jin Bin could only comfort himself in this way. Fortunately, Hydra didn't ask him for 50% of the drug transaction share. After all, he thought this thing was very precious before, so he shouted out such a sky-high price. Who knew Hydra? Ten bottles of lizard serum were sent directly.

Especially this kind of sneaking into a deserted place, he didn't even notice that anyone had entered his office!

When he thought of this, Jin Bin stopped thinking about it. He was not at a disadvantage anyway.

Although a lizard serum of US\$100 million is a bit expensive, it shows how rare this thing is. In other words, he does not need to worry about this thing becoming obsolete soon, just like the No. 1 compound.

When it first came out, Compound No. 1 was still a luxury product, but now it has become something that most people have.

After all, this is New York, the place with the most wealthy people in the world.

As for places like Dubai?

Those places were nothing more than America's.

As for the lizard serum, not so many people can afford \$100 million.

Meanwhile, another part of Hell's Kitchen.

“Loan robbery???”

A group of criminals who had just been released from prison and soldiers who had done nothing but kill people after being discharged looked at the boastful man in front of them with their mouths open.

"Yes, this is a way for our Hydra to withdraw funds. You must all be short of money. Those who are in debt, those who simply don't want to work and just want to have a lot of money to spend, those who are short of money, do nothing but kill people. It will work, so we at Hydra will generously provide you with lizard serum and loan services."

The man wearing an iron mask smiled and said to them.

It is really convincing to be surrounded by a group of two-meter-tall guys with explosive muscles, and these guys are not dead muscles in the gym, they are the kind of muscles that are very suitable for fighting.

What's more, who doesn't know how terrifying Hydra is now? Even the prisoners in prison know that Hydra is now the largest terrorist organization in the world, no one!

Such a high-profile person has not been suppressed, but he is doing things in America unscrupulously. He is much more majestic than all kinds of terrorists in history and now.

"What are we going to do?"

Lizard serum is a good thing. Even if they don't know about it, after watching the promotional video of lizard serum just now, they all know what it is.

It can turn into a big lizard, and when the time comes, it can walk like flying in a super-heavy body armor like a rogue warrior, and it can be carried out with a Gatling gun in one hand. With this kind of firepower, ordinary police and SWAT are looking for death.

However, because Hydra is too active, coupled with the recent prison attack, in the face of riots, public protests and demonstrations caused by successive super-terrorist attacks, the capitalists feel that they have no control over the country. Control is getting out of hand!

America deeply feels that ordinary police officers and SWAT are powerless to fight against these endless superpowers, mutants and terrorist organizations. In order to maintain the peace of America, in order to reassure their masters.

The military has stationed a battalion of the Rapidly Deployable Joint Task Force and some Air Force units in New York City!

They have a considerable arsenal of heavy firepower, as well as Humvees and Stryker armored vehicles belonging to the Army.

Ordinary small arms cannot threaten those with super powers, and the Stryker armored vehicles of the Joint Task Force are equipped with MCT-30 unmanned turrets.

The turret is equipped with a machine gun, which can penetrate 110 mm thick average armor when firing armor-piercing discarding sabots!

And they were also authorized to request the support of three helicopter formations, which were armed helicopters that could destroy all the buildings in five or six streets when all the ammunition was used up.

As long as it is not fortified, everything will be destroyed under their attack.

Luther had anticipated their reaction, but he didn't take it to heart. He just thought they were an eyesore.

The invisible rich people killed by the Hydra attack were not just rich. They had shares in major consortiums. Mutual shareholding is a characteristic of this country, which makes the forces between them very complicated and intricate. The roots of a century-old tree are the same.

They are one of America's ruling classes!

After the first invisible rich man was killed, America's war machine was already in action. The subsequent attacks and blatant slaps in America's face made America operate with unprecedented efficiency. stand up.

Without holding each other back, the FBI, CIA and other privileged intelligence organizations have exerted an effect that scares countless people.

After all, in this country, their president can be assassinated, but the men on Wall Street are untouchable.

If anyone dares to violate this, these greedy hyenas and vultures will not let any provocateur go!

"I like a saying very much. Risks and returns coexist. We also have risks in investing in you. Gentlemen, so after you are injected with the lizard serum, each of you will have to repay our debt of 100 million US dollars, and you will have to repay 100 million U.S. dollars in debt every month." Ten thousand US dollars in interest, we only accept repayment within two years. If you think you can't do it, you can give it up, but if you accept it but can't..."

Iron Mask didn't say what would happen when the time came, but they all knew that their end would definitely not be much better.

"I do...I've had enough of my current body."

A tall man with a skinny body, a sallow face, deeply sunken eye sockets, and a very excited-looking man with orange hair and a full beard stood up and said.

After he retired, he got into drugs because it could relieve the mental trauma caused by his killings. As a result, he became an addict and his body collapsed.

He had had enough of his weak body.

As for the fastest way to get money?

There is no second way in America, especially for people like them from the middle and lower classes.

That is, rob him! ! !

Chapter 170 Lizardman Attack

After Gall injected the lizard serum, he felt the changes in his body.

No matter how heavy the weapons and equipment all over my body were when I was young, I still have the strength to carry the weight and walk more than ten kilometers!

And it got better, he saw his familiar muscles becoming tighter, stronger and bigger!

"My body has recovered!!!"

Gore said very excitedly.

After seeing Gower's miraculous return to health, others were already undecided, but now they all have made up their minds.

Who doesn't want to have a good and healthy body.

Immediately afterwards, Gao Er had a feeling, as if he was unhappy if he didn't vomit. He couldn't hold it back and burst out directly.

But instead of vomiting, his body tore his clothes, expanded rapidly, and finally turned into an upright, two-meter-tall giant green lizard man!

"Ahhhhh!!!"

Even if they have watched the video, as the saying goes, Mr. Ye loves dragons, of course they will be panicked when they suddenly see such a huge lizard man appear in front of them.

Goyle looked at his sharp claws, and he was also a little panicked. He didn't want to be like this forever.

"Calm down, Mr. Gower, you can control yourself. After all, this is your instinct."

Iron Mask said with a smile.

Goyle then obediently tried to calm down and control the feeling. Then he returned to his human form, but now he was naked and watched by everyone.

He didn't think it was anything. In military life, he was used to bathing together in large bathhouses. This level of exposure was just that.

Even Goyle could despise their size.

The others followed suit and chose to inject the lizard serum without saying a word.

They are all people who have already suffered the hardship of not having money. Compared with not having money, other things are nothing at all!

In this way, the people gathered in the Iron Mask were only part of the group, but there were hundreds of thousands more lizardmen in New York and even across the United States.

Kingpin's lizard serum has rapidly depreciated before it created much value for him.

After all, he asked for the lizard serum himself, and the price was still so high. Of course Luther had to satisfy his customers.

Over the next few days, New York looked like a lizard.

"No, lizard men are robbing banks!"

"A group of lizardmen robbed a bank in Brooklyn!!!"

"The bank in Queens was hijacked by a group of lizardmen!!!"

The New York City Police Department is completely incapable of handling these sudden robberies.

Each of those lizardmen were wearing heavy bulletproof suits. These were weapons and equipment provided free of charge by Hydra.

A thick body armor like plate armor protected most of the torso, and there was a heavy alloy helmet on the head.

The weapon is a 14.5 mm caliber automatic rifle + drum magazine. Even if the problem of barrel cooling is taken into account, they can change the weapon at any time.

The specially made huge automatic rifle is specially designed for lizardmen. In addition, most of these lizardmen are retired soldiers and patients who have no money to wait to die. With such a terrifying caliber and a full-power charge, what can the police do? Can it handle such firepower?

The New York police and SWAT who arrived were even shot to pieces by a few lizardmen.

So many lizardmen and lizardman attacks suddenly appeared in New York, causing chaos in New York. In this case, the newly established "anti-super-terrorist force" was dispatched urgently, and the wheels of the Stryker armored vehicle were already rolled over. Main road.

Then the army's firepower suppressed the lizardfolk.

After all, this is a reinforced battalion.

Hundreds of soldiers used tactical formations to fire intensively. This was not a police attack. This was anti-terrorism.

So they can bring out any weapons because they are the military!

Their weapons include automatic rifles, light and heavy machine guns, frag grenades, rocket launchers, and even artillery and tanks.

The lizardmen were just suppressed by firepower. If it were other people or other troops, even if their numbers were multiples of these soldiers, it would be impossible to fight them in position. This is the strength of America's soldiers.

Use absolute firepower to destroy all targets.

America's big men are angry, so they plan to use the power of thunder to destroy all the guys who show their teeth and provoke them, even if they use heavy weapons in New York. Anyway, rebuilding New York after the fight is not that difficult, as long as Just have money.

You can also "borrow money" from a few younger brothers.

The exaggerated equipment of the Lizardmen is also the reason why they can persist. They wear armor-like body armor, fifty millimeters thick, and the material used is the armor plate of the main battle tank, which is of course not reactive armor.

This results in small-caliber automatic rifles not being able to break through defenses at all, and light machine guns having difficulty breaking through defenses.

Although there is such a thing as metal fatigue, this is a tank armor with a thickness of 50 mm. How many bullets do you need to penetrate it?

Coupled with the lizard man's strange strength, the light machine gun fired without feeling anything.

Of course, Luther couldn't give them the lizard serum and let them go on their own. In that case, no matter how many lizardmen there were, they wouldn't be able to die. It would be great if they could think of giving themselves a heavy-duty body armor and a bag of weapons.

In reality, with America's current level of seriousness, it probably wouldn't take a week to clear out all the hundreds of lizardmen.

After all, this is America's territory, and they definitely know how to fight and where to hide, unlike places like Afghanistan and Iraq, where they will be ambushed.

The tactical master sent by Hydra even instructed them on what to do.

The underground sewer system in New York, America has a long history and is complicated. Even if the original designer is resurrected, he probably won't be able to recognize the way. They can completely play hide-and-seek with the American military and hide in the sewers after robbing money.

Try to avoid exposing the true face of the human form, so they can fight guerrilla warfare and tunnel warfare with America.

In particular, they have another advantage in the sewers. The military's heavy weapons cannot enter, and they cannot blow up the sewer system.

Even if the lizardmen force them to a corner, it will be the same if they rob hundreds of banks a day.

"It's just like what the instructor said. The firepower of the anti-super-terrorist force is too fierce. Our automatic rifles are no match at all!"

The lizardmen were shocked by the fierce firepower, so they also need more fierce firepower!

Several lizardmen opened a large box and took out a large-caliber heavy machine gun from it.

M60 squad machine gun, with a belt of 500 armor-piercing bullets, this is their real weapon!

Not only that, each of them also carried two ammunition base bullets, 20 high-explosive grenades, and a single-soldier anti-tank gun.
