

Kryptonian 211

Chapter 211: Martian Empire

To learn Luther's magic, you must sign a contract. After signing the contract, the soul belongs to Luther.

After they die, the soul will go to Luther. This is the power of the rules. No one can bypass the power of the rules to snatch these souls, but they can snatch them from Luther.

The premise is to be stronger than Luther.

A month later, a piece of news shocked the world.

Emperor International has realized the Mars immigration plan. Emperor International is deserted, and human countries have discovered a city on the surface of Mars at the observatory observing Mars!

"Mars immigration? It has been realized? It's terrible."

Nick Fury looked at the high-definition photos taken by the satellite. A city appeared on the surface of Mars. This kind of thing is absurd, but it doesn't seem impossible.

After all, it was that man who did this.

"Does Stark know about this?"

Nick Fury asked Black Widow.

"Stark already knows about it, and he said he wants to go up and take a look."

As an agent lurking beside Stark, Black Widow knew about the appearance of a city on Mars earlier than S.H.I.E.L.D.

The question is, how did Luther do it?

"How did he do it? With so many resources, Emperor International has no recent procurement plan, and the previous procurement quantity does not match, and smuggling is even more impossible. Being watched so closely, the key is, how did he get around the satellite?"

Nick Fury was puzzled, and so were all the other countries. Their satellites have been staring at the space recently, but they still haven't found any spaceships, but the city has been built.

If it weren't for an observatory studying the gas state of Mars, it would probably take several months or even years to discover this.

However, the city observed alone is ridiculously large. You know, this is a satellite picture, and you can actually see the city, although it is judged to be a city based on the outline.

After all, this change is still too obvious.

It is said that the Pentagon, Congress, and Wall Street bigwigs are now incompetent and furious.

They claim that they have already controlled the world, and there is no way that any resources can be hidden from them, unless someone has reached an agreement with Luther in private to do such a thing.

Damn, they didn't even include me in this matter!

We are all businessmen, there is no hatred to speak of. As long as there is profit, it's embarrassing, but you can't not include me in this good thing!!!

So now they started the criticism meeting and review, trying to find the traitor.

"Who is it that is so shameless to find Luther? It must be you, Lar, you don't have the spirit of America at all!"

"Fuck, what are you talking about, I still suspect it's you, Fisk, you are definitely the most suspicious, after all, you have the resources that Luther needs, you betrayed us, betrayed America!"

"I swear in the name of the family, this matter has nothing to do with me, I didn't do anything, it must be someone else among you!"

They quarreled endlessly, spitting and leather shoes everywhere, quarreling until their faces were red and their necks were thick, and everyone looked like a guy who betrayed his own people.

Of course, finding the traitor is just to ask him to help make connections.

The problem is that the traitor does not exist at all, so this matter has not had a result until now.

Nick Fury also thought so. He estimated that someone had secretly sought cooperation with Luther, and there might even be more than one or two.

Didn't he know the details of these gentlemen? On the one hand, he said that this was in the interests of all mankind and Luther could not stop it, and on the other hand, he sought cooperation with Luther in private. This was a basic operation.

Going to Hollywood one by one, the little golden men were pulled home in trucks for acting skills. The key is that they are shameless. They only care about interests, and face is secondary.

I just don't know who it is. It should be possible to find out, but is it meaningful to find out at this time?

The matter is done.

All they can do is probably to send people to land on Mars and contact Luther now.

The environment on Mars is not very good, lacking water resources needed for life.

But after Luther turned part of the Martian soil and rocks into a city, water resources are no longer a problem.

Then it is to rebuild the atmosphere of Mars to prevent the Earth from continuing to explore Mars. Luther doesn't want face, and the Empire doesn't want face. Someone can land on Mars casually.

And the first generation of one thousand Martians have been born. Under the condition of free mating and reproduction, these one thousand Martians will soon double.

As for why more Martians are not created, of course it is because Luther is too lazy to do so. Martians are just a beginning, and Venus is Luther's goal.

The memories of these one thousand Martians have been programmed, and they are the people of the Martian Empire.

Each of them is two meters tall, which is not the same size as the earthlings. In addition, the body density is five times that of the earthlings, so it is impossible for the earthlings to combine with them.

After all, they don't have a biological force field.

Not only are the Martians tall, but they are also handsome men and beautiful women who meet the aesthetics of the earthlings, especially those who are more than two meters tall. The long legs of women and men are particularly attractive.

They do not have a mechanism to store fat energy, so they will not get fat no matter how much they eat, and their genes will not degenerate. They are perfect humans.

In addition to the Martians, Luther also created a lot of Martian creatures with Earth genes, and their strength is naturally stronger than the creatures on Earth.

A dangerous environment can keep the Martians fighting.

Finally, Luther pressed one hand on the ground and turned one-third of the surface of Mars into the sea!

This obvious change could not be hidden from the Earth's satellites. They couldn't understand how Mars suddenly had so many water resources. How did Luther do it?

This is unscientific!

The Hydra on Earth has not been disbanded, and Black Caesar still exists, because Luther intends to have fun and make trouble.

This can stimulate the Avengers to become stronger, how good is it?

But now it should become the Illuminati. Nick Fury has changed his mind. It doesn't matter if he is not an Avenger, so he has been asking Black Widow, Hawkeye and Captain America to find opportunities to join the Illuminati.

Captain America was also arranged to be injected with Compound No. 1. It is impossible for him to be injected with Compound No. 2, after all, he is an American citizen.

Captain America should have refused, but the threat of Hydra is imminent, and the world's environment has become so complicated that Steve can only accept it.

The compatibility of Compound No. 1 and Super Soldier Serum is surprisingly good. Luther can see that Steve is now at least as strong as Spider-Man.

Chapter 212 The True Use of Space Gems

In the subsequent battles, Steve might be able to really fight to a 50-50 victory.

Luther then rebuilt the atmosphere of Mars, increasing the thickness of the atmosphere and the refraction of light radiation.

This makes Mars isolated from various radio wave signals and detection methods, unless the atmosphere of Mars is broken through.

However, the atmosphere of Mars is full of fire storms and a lot of gravel, which seriously affects and interferes with any invasion methods.

Unless you are not invading by science but by mysticism.

Even if it is an invasion by mysticism, Mars is not a place that can be invaded. Luther used the power of the space gem to set up a barrier for the entire space of Mars. With this barrier, as long as the strength and space attainments do not exceed the space gem, there is no way to invade.

Even the dimensional demons can't invade Mars!

In this way, there is no need to be as troublesome as on Earth, and there are temples on three magic nodes.

The reason why the dimensional demons always keep an eye on the earth when invading the real dimension is because they can't beat other places in the universe.

Just like Asgard, they can't beat it, and there is no life on the nine planets. There is no use in invading.

Now that Mars has life, it is hard to say that the dimensional demons will not have ideas.

So Luther's space barrier isolates all space-type abilities. If it weren't for the power gem to charge the space gem, it really wouldn't be possible to do this.

It's not that the space gem doesn't have the ability to do it, it's that Luther can't use the space gem to do this.

The only one who can fully understand how to use all the power of all the infinite gems is Thanos, who has been to the Well of Eternity!

If he wants to use it, he can only forcibly use the power gem to strengthen and charge it to make it fly.

The earthlings soon found that they couldn't observe Mars. Mars had a new atmosphere, which blocked their observation. Now they don't know the situation of the Martian Empire.

How to describe this feeling, it's very complicated.

It's like a neighbor has become rich, and then all the glass in his house has been replaced with an electric control film, so that you don't see that his family has money, so as not to borrow money or something.

Such a feeling, they never thought it would appear on themselves.

That's Mars, that's the resources of an entire planet. Compared with this, those who repeatedly use resources on Earth are like beggars.

Beggars want to beg on Mars? No way!

But if they want to attack Mars, their soldiers can't go there.

Space technology is not that advanced now.

Yes, even if the Earth in this world discovered aliens decades ago, it has never thought about developing space technology.

This led to their desire to send troops to attack Mars, but it was impossible to rob Mars. After all, the strongest man on Earth has now become the strongest man on Mars. The American soldiers probably won't have any morale when they hear that they are going to go to war with Luther.

However, Luther's immigration to Mars still stimulated the people on Earth. They felt that Luther could complete the immigration to Mars alone. With so many people in the world added together, it is impossible that they can't even compare to Luther, right?

Tony was also aroused by this pride. Luther failed. He chose to solve the problem with magic instead of science, so Luther gave up using science to solve the problem.

But Tony is different. He insists on using science to solve the problem.

It has absolutely nothing to do with the fact that he went to Kamar-Taj for three days and three nights and no wizard Luther said came to the door!

He himself is just curious about magic!

The only thing that can really solve all the secrets of this universe is science, because science is methodology, whether it is magic or something else, it will eventually become science!

In this regard, Luther can only say that Tony, you are happy.

In addition to these changes, Luther also had a sudden idea to use the power of the space gem to search for those possible unowned dimensional spaces!

That is where the dimensional demon is. Anyway, there is a space gem, even if he runs to an owned dimensional space, Luther can leave safely.

If it is an unowned dimensional space, then Luther will make a lot of money.

"This should be the use of the space gem, the key to all worlds!"

Luther looked at the space gem in his hand.

However, even if it is a space gem, it is not so easy to retrieve the dimensional space outside the multiverse.

The dimensional demon, a group of gods and demons outside the dimension, is actually an existence outside the material plane and the real dimension. Asgard is a dimensional space, Jotunheim is also a dimensional space, and the underworld where Hela is imprisoned is also a dimensional space, and it is even suspected to be one of the fragments of the hell dimension.

So, there are differences between dimensional spaces. Dimensional spaces like Asgard are undoubtedly closer to the real dimension and material plane, unlike Dormammu, which needs a location to invade the real dimension.

Luther originally thought that it would take a long time to find it, but the space gem suddenly lit up with a blue light.

"Found it? So efficient?"

Luther was very surprised.

He didn't know that although the dimensional demon also wanted to find other dimensional spaces to assimilate and strengthen his own dimension, it was difficult to find both the ownerless and owner dimensional spaces, even harder than finding a needle in a haystack.

This kind of thing is like finding a different grain of sand in the desert.

With such a large base, no matter how different it is, it is still sand, and it is also very difficult to find it ! !

However, the space gem is different. After all, it is the rule of a universe and a singularity. Even if there are restrictions on the numbering system, the infinite gems with corresponding numbers cannot be used in other numbered universes and become ordinary gems.

But in the current universe, it is the absolute authority!

Luther entered the dimensional space found by the space gem, and then found that this dimensional space was unexpectedly small.

"It's only a dimensional space the size of an island, but it's ownerless."

The space gem in Luther's hand has been shining, just worried that he won't be able to escape in time. As a result, he turned around and found that this dimension is ownerless, and it is not that kind of energy dimension and dimension, but a dimensional space with matter.

Like Dormammu's dark dimension or dark dimension is a simple energy dimension space, which is full of dark energy, no matter what it is, it is dark energy.

This kind of dimensional space with mountains and water is a relatively complete and sound dimensional space. In simple terms, it has greater development potential than the energy dimension!

"Although there is no special energy of my own, the advantage of perfect rules is that I can borrow rules."

Chapter 213 The Birth of a Divine Artifact

Luther was quite satisfied. The advantage of the energy dimension is that it can borrow endless special energy. This material dimension can use the rules.

For example, Hela is immortal in Asgard and will become stronger and stronger. This is why she uses the rules of Asgard.

In his own dimensional space, the dimensional demon/demon lord is an omniscient and omnipotent existence!

Even if he leaves his own dimensional space, he can use his relationship with the dimensional space to obtain the bonus of the dimensional space.

It's just that the bonus is not as strong as in the dimensional space.

Luther became the lord of this material dimension, and immediately felt that the various power bonuses he obtained were much stronger than his original power.

"I just don't know if I have touched the edge of the single universe level?"

Luther is very self-aware. His current power is still too weak. Even if he becomes the lord of a dimensional space, it is impossible to say that he can immediately become a demon at the level of a single universe. That is not scientific, not to mention that his dimensional space is still so small.

There is nothing much to say. Luther immediately used the power of the material dimension to build himself a set of artifact equipment!

Just kidding, artifact equipment is time-consuming and labor-intensive. Even if Luther knows the magic of transformation, he can't bear it. Now he doesn't need it. With the omniscience and omnipotence in the material dimension, Luther directly has a set of artifact equipment, and it will not lose its effect even if he runs to other worlds.

After all, dimensional space is like this.

He also threw the Destroyer Armor into the material dimension, allowing the material dimension to digest the power of the gods on the Destroyer Armor!

That is a lot of great gods at the level of the father of heaven, from the multiverse level to the star-level. If the material dimension can digest all of them, it may become a lot stronger.

Before, when Thor was about to smash the Destroyer Armor into Mephisto's hell with the Hellfire Gravitational Star Hammer, Luther snatched the Destroyer Armor and planned to study it, and suppressed all the reactions on the Destroyer Armor with the biological force field.

But he didn't know if he could hide it from Odin. Now, this hot potato finally came in handy.

With the two king-level artifacts, the Eternal Spear and the Thor's Hammer, plus the Destroyer Armor, Luther has obtained the technology to create the strongest artifact, although it is in the Asgard style.

Then Luther fell into a happy trouble, not knowing whether to drive a Gundam or transform.

Considering that he likes to show up and show off in front of people, he finally decided to make himself a set of artifact-level armor. The helmet is transparent, which does not affect his appearance and can also protect his head, making others think that his head is his weakness.

It is called armor, but it is actually more of an aesthetic design, so there must be a decoration like wings on the back!

What kind of cloak is rubbish, wings are the king.

The armor designed by Luther is more ancient, not the iron battle suit. Although the iron battle suit is also very handsome, Luther thinks this kind of armor is more handsome.

Especially after seeing the handsome armor that everyone in the Super Beast Armor has, such as the armor of the Whale Shark King and the armor of Hades.

The material dimension separated the runes, the world tree and the Destroyer armor given by Luther. It digested the Destroyer armor at an astonishing speed, and then these materials melted. Luther also threw out the hardest metal in the Dragon Balls and precious metals such as dark iron, dark silver, and vibranium.

In front of the power of a world, all these metals easily turned into liquids, and after throwing out the impurities, they quickly took shape.

Shaped into firmware of different shapes, shoulder armor, chest armor, and helmet.

It looks like the divine clothes of Hades, the king of the underworld, especially the three pairs of arrogant black wings behind him!

Luther's mind moved, and the already formed armor immediately turned into light and gathered on his body, a transparent helmet, a black and gold chest armor and shoulder armor, armor on the arms and legs, and black and gold plump metal wings spread out behind him, wantonly and wildly releasing the aura!

Luther could feel the armor on his body close to him, as light as nothing.

The main body is dark black, with gold as the line embellishment, full of the nobleness of gold and the majesty and heaviness of black.

The shape of the armor is full of streamlined and angular characteristics, which is perfectly combined and wonderful.

The extensions of the armor such as shoulder pads and leg guards are sharp and slender, giving people a visual experience of sharpness.

Proud, luxurious, and mysterious, for a guy like Luther who likes to show off in front of people, it is simply too handsome to have friends.

The reason why it is not completely black is that Luther is not Hades, why should he make it so serious, heavy and majestic?

As for silver, he thinks that the silver-black armor of Super Beast Hades doesn't seem to look good, lacking a bit of domineering, and black and gold is just right.

The nobility of gold is matched with the solemnity of black, black and gold is the kingly way!

Even the kingly way + domineering coexist!

Moreover, this armor is not only good-looking, after all, it is the product of the material dimension digesting the Destroyer Armor. The power of the gods is understood and absorbed by the material dimension, allowing the material dimension to reproduce these powers in its own way.

Luther can feel that after putting on this armor, his strength has doubled again, and there are bonuses in various aspects.

Even if he doesn't know whether he may temporarily lose his strength in the future due to the red sunlight, with this armor, he is not afraid of any enemy.

"Just call you... the God of Destruction."

The armor of the God of Destruction!

Luther even blessed or enchanted this set of armor with his own power.

He wanted to prevent himself from losing power in any accident, so he could regain power with the help of the God of Destruction, so he almost poured all his power into this set of armor without reservation.

This made the God of Destruction's armor transform again, becoming more powerful, and even a halo like the sun appeared behind it, dazzling and blazing!

With the material dimension, Luther's lost power came back in a breath. Even if there was no material dimension, the passive activation of Doomsday could also be restored in a breath, even more than before.

Luther continued to study how to use the material dimension. He felt that the material dimension might be able to completely turn himself into the ancient Doomsday and Broly, instead of the current one that was extremely powerful, but still not as good as the original.

Of course, he is stronger than Broly now with the three-in-one, but if he can make the original Broly, then he will be a dimension stronger.

The effect of the reality gem + the power gem is indeed very strong, but the material dimension should be able to be more detailed.

Chapter 214: Crazy Sheep-grabbing from the Dark Dimension

This material dimension is called "Empire" by Luther.

The plane where the real empire is located can completely abandon Mars.

However, Luther thinks that the existence of the Martian Empire is still necessary, and not everyone can enter the Empire dimension.

"With the Empire, I can directly travel through the world with other people and things in the future."

Luther is very satisfied. As a portable space, the dimension space is definitely much more advanced than any storage type of space, and the dimension space will not lose its effect like the space gem.

"It's time to capture Broly into the Empire and let the Empire digest it, so that I can become the real legendary Super Saiyan."

Luther couldn't catch the Ancient Doomsday, but Broly is ready.

There is also Mystic Gohan and Beast Gohan's Son Gohan, the strongest single warrior in Dragon Ball.

In addition, Luther also plans to try to use the power gem to transfer energy to the material dimension. Can it make the material dimension stronger?

In order to make his own dimension space stronger, the dimensional demon used everything.

Their purpose is energy, soul and other dimensional space.

After Luther found a material dimension, the Space Gem never stopped searching for the dimensional space, but it was impossible to find it again for a while.

Luther felt that he was possessed by the emperor of Europe for being able to find one so quickly.

So he could only use the next-level method to make his dimension stronger.

The Power Gem can easily mobilize the cosmic energy. The cosmic energy here is not the so-called radiation or something like that.

The cosmic energy in Marvel is basically the standard ability of the god-level bosses. If they can't perceive and control the cosmic energy, at most they are the limit of ordinary things like the swordsman who is invincible below the god level.

The upper limit of cosmic energy is very high. In Marvel comics, Thanos absorbed a lot of cosmic energy and then broke through to the multiverse level, so this setting is really confusing, but if it is replaced by Thanos absorbing more than 900 million primordial purple qi and chaos qi, it is probably not difficult to understand.

The highest level of cosmic energy is the energy that can help people break through the upper limit. It is the most essential part of cosmic energy born from the Big Bang. However, this part of cosmic energy can't be counted on, as it has been divided up by the god-level bosses.

Unless Luther can kill these god-level bosses and throw them into the empire dimension for the empire to absorb, there is no need to count on these cosmic energies.

The second-level cosmic energy is the energy in the dimensional space of the dimensional demons of various dimensions, that is, the original energy of the energy dimension.

These energies also have very powerful characteristics, otherwise why would the Ancient One cheat Dormammu's dark energy to make himself immortal and have power far beyond others? The Ancient One is not completely dependent on the Eye of Agamotto to make Odin ignore Midgard, the nine realms within his rule.

She is the most capable supreme wizard besides Agamotto. At the world's first wizard conference held by Vishanti, the Ancient One was re-elected as the Supreme Wizard for N consecutive terms.

This wizard conference has all kinds of evil gods. After all, becoming a supreme wizard and obtaining this title can get the bonus of Vishanti's power.

In this competition, the Eye of Agamotto cannot be used. It can be said that the Ancient One won completely by relying on hard power.

Doctor Stephen Strange is much worse and often loses.

The Power Stone can control all power and energy, but it cannot create something out of nothing, even if it has endless energy and power.

Fortunately, Luther can steal... no, he can borrow.

At this time, he has to find the Space Stone again. His study in Kamar-Taj is not in vain. He memorized the contracts of the demon gods of various dimensions.

These contracts have the breath of the demon gods of dimensions. Although it is not enough to locate their dimensional space, Luther has the Space Stone!

The Space Stone can forcibly locate the coordinate space of the demon gods of dimensions according to the breath.

At that time, just borrow energy to get it done.

"Dormammu should not mind, after all, he has been fleeced by the Supreme Sorcerer for so many years."

Luther decided to pick the soft persimmon first, such as Dormammu.

Luther can't find other dimensional demon gods as weak as him.

If he finds them, do he still need to borrow energy? They came to the door to rob the dimensional space directly.

The space gem opened a vortex with a blue edge and a black main body, and then Luther felt it.

On the other side was an endless dark void.

Luther did not rush in, even though he had been teasing Dormammu, but in the dark dimension, Dormammu was a god, and only the multiverse-level bosses could compete with Dormammu in the dark dimension, well, the kind of competition that pressed Dormammu to the ground and rubbed him.

"Power Gem!"

The power gem in Luther's hand lit up with a purple light, and then a large group of terrifying dark energy came out from the dark dimension.

Dark energy has an owner, not to mention the dark energy in the dark dimension. If Dormammu does not nod, Luther can't drag it over even if he pulls it hard with his hands, but once the power gem is lit, the dark energy will come over obediently.

An ominous and cold breath came from the dark dimension, and the terrifying dark energy was wantonly rampant with evil, destruction, corrosion, depravity, and a sense of oppression of fear!

"What a powerful energy."

Luther touched his chin. Such a ball of dark energy made Luther feel that Dormammu was difficult to deal with. With such a dark dimension, Dormammu was the God of the dark dimension!

Time, space, matter, energy, cause and effect, fate, death, life... These rules are meaningless in front of Dormammu. Unless he can surpass the level of a single universe, even if the single universe demon who has mastered these rules enters the dark dimension, he will not get any benefit.

The Empire Dimension greedily absorbed and decomposed the ball of dark energy in front of Luther, and then Luther found that his Empire Dimension had actually become one tenth larger!

"This trick really works!"

Luther nodded.

If the Empire Dimension itself becomes stronger, it is estimated that it will not increase by one cubic centimeter in tens of millions of years, but it has increased so much just by absorbing a ball of dark energy equivalent to the planetary level from the dark dimension...

So, the power gem inlaid on the chest armor of the God of Destruction by Luther shone again. This time the purple light was particularly dazzling, almost rendering the Empire Dimension purple!

Then, the dark dimension sent over enough dark energy to drown the entire empire dimension!

Even if the empire dimension was madly digesting it, it couldn't keep up with the amount of dark energy controlled by the power gem!

Chapter 215 Return

But Luther thought of a way to let the space gem collect the surging dark energy into a space.

Then he used the superpower of compressing space to compress the space into the size of a mustard seed.

Of course you have to do this job quickly, otherwise Dormammu will be dead before he reacts.

Although with three Infinity Stones in hand, Luther should be able to enter the dark dimension to compete with Dormammu, but he is not someone who is willing to take risks, so it is better to borrow power this way.

This lasted for less than an hour before Dormammu came to the door.

"Who! Who dares to steal the energy of the dark dimension!!!"

Dormammu is going crazy. Who the hell is this person? Is that bastard Ancient One here again?

In the blink of an eye, the dark energy equivalent to a solar system in the real dimension is gone.

Even if the dark dimension is comparable to the real dimension universe, it is only a negligible amount of energy that is worthless, but for Dormammu, it is no different than killing him.

God knows how long it would take him to deceive and kidnap him to make up for his losses, so he came directly to find him.

However, Dormammu who came over also noticed something was wrong. This space door didn't look like Karma Taj's style, and Ancient One was not such a rough person. He would not take things by force so directly. She flattered him. The name says "borrow", and then just use magic.

It's not like this space gate, which is sucking in the surrounding dark energy like a whale swallowing the sea, and the stars formed by the dark energy are sucked in.

Dormammu was annoyed and tried to stop him, but he found that he could only control the dark energy to stagnate for a moment, and then he felt that the power of swallowing suddenly increased by more than ten times, and then more dark energy was swallowed. past.

Luther felt that the Power Stone seemed to have stagnated for a while, but after he increased the output of the Power Stone, more dark energy was sucked in.

Now Luther has packed several mustard spaces.

At this moment, a terrifying dark energy wave passed from the other side of the channel.

Silent fluctuations exploded in space, shaking the entire empire dimension.

"Dormammu found out?"

Luther raised his fists and faced off against the dark energy fluctuations head-on.

“Boom, boom, boom!!!”

There was a terrifying movement that was unprecedented in the world. After Luther defeated the dark energy wave, he closed the door in one breath! Kick people! hang up!

Dormammu looked confused. After a tentative blow, the space gate disappeared without a trace. It couldn't even find the target based on its dark energy.

"Who is it!!!"

Dormammu was very angry.

The Imperial dimension exploded into chaos, and the physical dimension almost collapsed.

"After absorbing so much dark energy, I still can't withstand the aftermath of the battle."

Luther shook his head. He didn't feel anything about his own punch. On the one hand, he had the gauntlet of the God of Destruction, and on the other hand, he was already strong enough to beat a god-level boss to death, so there was nothing wrong with him at all.

But it's okay to be like this now, break and then build.

He released the dark energy in the compressed space, and then reshaped the material dimension according to his own ideas.

The material dimension after reshaping is already the size of a planet, and this planet is still several times larger than the earth.

This is the difference between the material dimension and the energy dimension. The material dimension formed by huge energy generally does not have the breadth of energy.

Being able to reach the size of a planet is already pretty good, and Luther's strength is soaring like a rocket.

"Yes, it should be the weakest single universe now."

Luther nodded. Although he was at the bottom of 0.000... I don't know how many zeros there are in the single universe level, but because he is the lord of gods and demons in the material dimension, his strength is still acceptable.

If Asgard hadn't been backed by the World Tree, Odin would definitely not be as brilliant as Luther now. After all, the material dimension of Asgard is only the size of a piece of land.

Now the two are considered equals. Luther may kill Odin, and Odin may kill Luther.

Luther also suffered from the same troubles as Odin. Divine power will continue to grow stronger over time, never ending, as long as the empire dimension remains.

The difference is that Luther's body can always withstand stronger divine power. As the divine power becomes stronger, Luther's body will evolve and become stronger, never ending, and there will never be a body like Odin. A situation that cannot bear the divine power.

As for Luther's divine power, his divine power was already formed the moment the material dimension was finalized, and he had no choice at all.

destroy! destroy! sun! strength! war!

This is the attribute of his divine power. The divine power created in the material dimension based on Luther's origin. Luther is naturally omniscient and omnipotent in the imperial dimension. He can grasp all the rules at his fingertips. But after leaving the imperial dimension, he can only rely on divine power.

However, Luther himself does not rely on divine power. Without divine power, he still has his own body, but the energy level of divine power is high, has a high priority, and is easier to use.

"I wonder if Igo would become stronger if I threw him into the empire dimension and absorbed it?"

Luther began to think about how to make his empire dimension stronger. The long-term goal was naturally to continue to harvest the wool of the demon gods in all major dimensions and find other dimensions. The short-term goal was to fight against the autumn wind and defeat all kinds of powerful enemies and send them into the empire. The dimension is swallowed up by the empire and contracts are signed with people everywhere.

The world of super seminary!

Luther didn't go to Ego and stayed there.

Now that he has the ability, of course he plans to take Qilin away.

The Empire Dimension is a world of its own, and Qilin can live safely in it.

In the future, he doesn't have to worry about the safety of people and things when traveling through the world.

He tried it, and he was relieved that he could still open the Empire Dimension in the world of Super Seminary.

Before he left, Qilin was arranged by him to a city far away from Xiongbinglian, and this city was protected by Kryptonian civilization.

Qilin's parents are also here.

"Qilin."

Luther's clone has been with Qilin, so Qilin didn't have any special reaction when she saw Luther.

"What's wrong?"

The relationship between the two has heated up rapidly during this period of time.

If it weren't for the clone, Qilin would have matured.

"I have something to tell you."

Luther said to Qilin. He has protected so many Blue Star people, and he has explained to Qilin.

"What's the matter?"

Qilin asked with a smile, thinking that it might be a proposal, what should I do, I haven't put on makeup yet.

"Actually, I am Luther, the God King of the Kryptonian civilization."

Chapter 216 God Clan Qilin

21 Qilin

"Isn't today April Fool's Day?"

Qilin said with a strange expression.

Although you have the same name as God King Luther, Qilin doesn't think Luther is God King.

Apart from anything else, would a god-king accompany an ordinary little policewoman to live her daily life in such a place?

Is it a novel? Lord God King falls in love with me?

"I was afraid that you wouldn't be able to accept it at first, so I didn't tell you."

Luther hugged Qilin's slender waist, and then led her to spiral upward at a slow speed. The ceiling failed to block them and they passed through.

Qilin stared at the scene in front of her with wide eyes, she couldn't believe it.

At the same time, Luther also used his divine power and energy to transform Qilin like a "reborn" and "marrow-cleansing and bone-cleansing".

The super warriors and divine bodies in the world of Super Seminary are all "artificial perfection" created by technology.

Naturally, there are no parasites, mites, dirt or the like. However, compared to artificial ones, Luther still prefers the perfection of this kind of flesh and blood.

Qilin didn't know what had happened to her, and she couldn't come back to her senses for a long time. It wasn't until Luther took her to fly over the city and stopped that Qilin realized it.

"Such a vulgar plot could actually happen to me?"

Qilin said dumbfounded. She really didn't know what expression she should make now.

Just like Luther said, if Luther revealed his identity from the beginning, would he be able to accept it?

"Luther, since you are the God King of Kryptonian civilization, can you help Blue Star?"

Qilin's first reaction was this, and Luther had expected it.

"No, I don't have that obligation. After all, I still have to think about the Kryptonian civilization."

Luther shook his head.

Qilin nodded and did not force it. Luther protected the people of a city. Survivors around him came here every day. The Kryptonian civilization had done enough. Luther would probably be restricted even as a god king. Bar?

He also had to consider whether the people of the Kryptonian civilization were willing to unconditionally help a backward civilization.

Qilin is very sensible, and it is precisely because she is sensible that she realizes this clearly, instead of thinking that since Luther is the God King and still loves her, why can't he help her.

She is not the kind of woman who is arrogant and unreasonable.

This is the result of looking at the problem from the perspective of people on earth. Of course, it is also related to information asymmetry.

Luther's use of Kryptonian civilization as an excuse is the best way to deal with it. When Qilin understands what the theocratic order and theocratic civilization are in the future, she probably won't care about what happened today.

"So, you confessed to me today because you can't pretend anymore?"

Qilin found that her feet were not empty. The feeling of being grounded made Qilin feel at ease, and then she asked.

"After all, it took a long time."

Luther nodded. He is the God King, so this kind of thing is normal.

"It's really difficult for His Majesty the God King to pretend to be an ordinary person for so long for others."

Qilin said.

Luther didn't hide anything, nor did he care about him, which was enough for Qilin.

This shows that Luther's usual appearance is not fake, and it is impossible to pretend for such a long time. If he can really pretend for such a long time, it will be no different from the real thing.

Qilin was really worried that after Luther became the God King, he would be different from before, and then she didn't know what to do.

"Your Majesty the God King, why do you like me?"

Qilin asked in confusion, she was just an ordinary human being. In comparison, weren't Du Qiangwei and other super warriors in the super seminary star show before the cataclysm better than herself?

"Eye match? Love at first sight?"

Luther said with a smile.

"You are the King of Gods. You have a whole civilization that you can pick and do whatever you want. I can grab a lot of them, let alone ones that are prettier than me. Are you used to eating delicacies like birds' nests and shark's fins and want a change? Just try some home-cooked food..."

Qilin didn't continue talking because Luther was chewing on her.

"Who am I, the king, that I can pretend to be a mortal for so long just for vegetables and tofu?"

After Luther finished chewing, he said to Qilin.

"Okay, don't be unsure, I have transformed you, and now you are also a super soldier."

Qilin's eyes lit up when she heard Luther's words.

"Super soldier? But I don't feel anything."

Qilin looked at her hands in surprise.

"Then what do you think, like in science fiction movies, locking you in a transparent glass cabin, and then rendering you with liquids of various colors? How about giving you a golden skin?"

Luther said teasingly.

"I'm really sorry that our Blue Star's imagination is limited to this."

Qilin complained.

Although, she did feel that way too.

"Come on, try it."

Luther conjured a piece of cement and placed it in Qilin's hand.

"Is this...cement?"

Qilin is not sure whether this is cement from Blue Star or a precious gift from Kryptonian civilization.

"You can also call it concrete by its scientific name, and you can now crush it like tofu."

Luther laughed and said.

"real?"

Qilin tried it and found that she could really crush the cement easily.

It's not even as good as tofu. It feels like there is no obstacle and I can get a lot of dust easily.

How can an ordinary person break cement with bare hands? It is even impossible to make cement fall off.

Qilin can only say that she has really become stronger and become a super soldier.

"Here, this is steel."

"This is titanium alloy..."

Qilin tried them one by one and found that the metal alloy was soft in her hands. Even if she held it tightly, she didn't have to worry about the broken sharp metal parts hurting her palms. They were like plasticine, and she could mold them into any shape she wanted.

It's just easy to crack.

Luther's divine power itself is a very high-level energy. The bottom of the single universe level is still a single universe!

Only Qilin has such treatment to use this kind of divine power to transform a person in detail.

Now Qilin has become a god like the new gods in the DC universe.

Luther used his power to make Qilin a female war god.

Compared with the world of Super Seminary, Qilin is equivalent to ascending to heaven in one step and becoming a great god comparable to the God of War of No Star.

It's just that she doesn't know how to use her divine power yet, so she is only comparable to the God of War of No Star.

Although Luther could also turn Qilin into Lightning Qilin like Black Adam and Lightning Shazam, Luther thought it was too weird, so he didn't do it.

On the contrary, Qilin is better now that she has become a god.

Chapter 217: Success

"This is the most advanced god-making technology of our Kryptonian civilization. Now you are already one of the few great gods in the known universe. You can at least be ranked in the top ten."

Qilin was surprised by Luther's words.

"Top ten great gods in the known universe? Really or not, you want to give me this kind of technology?"

Qilin didn't know what to say, she felt so shocked.

What is the concept, family members, who understands that from an ordinary and humble member of the Blue Star natives to all of a sudden, he suddenly became one of the few great gods in the known universe?

Who can tell her if she is dreaming? Could it be that when I woke up, I traveled through a female-channeled novel in which I was the main character? Originally, Qilin was only joking in her mind about the plot of herself turning into a domineering god king and falling in love with me, but now she seems to be feeling that way more and more.

This is even more shocking than Luther confessing his identity as the King of God.

It almost made Qilin crazy.

"Old... Master, if you give me this technology, the people on Krypton won't have any objections, right?"

Qilin was very embarrassed and called her husband for the first time. It was such a great kindness that the little girl had no way to repay her, so she could only pledge herself to him. Moreover, after knowing each other for such a long time, this was the first time Qilin called her husband. Luther did not express his position before. Qilin had that idea, but was embarrassed to say it.

"I thought you wouldn't call me husband."

Luther felt refreshed all over. Although he could make as many of these gods as he wanted, Luther did not intend to wholesale the gods. Rare things were more valuable.

So Qilin can be said to be the first in every aspect, whether it is the first time to chew or the first time to create her own god.

"Husband, I know I was wrong."

Qilin dared to love and hate, and she was also very coquettish, which made Luther irresistible, so he hugged Qilin sideways.

"etc....."

Qilin panicked, she was not mentally prepared yet.

But Luther knew that if the woman said wait, it would be right away! immediately! Without delay!

Imperial dimension!

Qilin lay in Luther's arms.

"You bad guy..."

"How can I live my life like this?"

Qilin felt that she had lived in vain for so many years, and felt a little lost. She knew that it was wrong for her to indulge in this feeling, but who could resist such an experience?

"Wouldn't it be nice to live with me?"

Luther said with a smile.

That is to say, only in the empire dimension can such a thing be done. If you put it outside, Luther would have to use a lot of magic and superpowers to achieve such a scene.

In the imperial dimension, all it takes is a thought.

Everything here, the rules and laws are under your control.

"You are the superior God-King, and the only thing I can interest you about is the Blue Star people..."

Qilin is not stupid, nor is she naive. She knows that eternal love does not exist. The so-called respecting each other as guests and treating each other as equals is just a nice thing to say. Living like that, is it really love? True life and death, love that lasts forever is rare.

"That's all for the future. Why are you talking about this?"

Luther said helplessly, Luther himself doesn't know what will happen in the future. He has not become the only one on the timeline, and he doesn't even know if he has a timeline. Who knows what will happen in the future.

What's more, Luther can't help but hide his beauty.

He also knows that Qilin is not confident, but it doesn't matter. Things like feelings can be cultivated.

Qilin felt that Luther was right. No one could say clearly what would happen in the future.

"Then, do I need to recognize my sisters?"

After Qilin put down the burden in her heart, the little clever came up. She felt that it was normal for a god-king like Luther to have a harem of three thousand beauties. Maybe he already had a queen and a group of princesses, so she was lucky enough to join the team. , in the future, it is estimated that we will have to identify sisters based on seniority.

"What sisters?"

Luther asked rhetorically.

"That's your queen and princesses."

Qilin said matter-of-factly.

"I don't have those things. You are my first woman."

Luther lifted Qilin's chin and said.

"...This is impossible, don't coax me, I won't care, even if you have 18,000 concubines."

Qilin's eyes wavered for a moment, and then she felt it was too ridiculous.

"Do you think this king is so sentimental, or do high-level super-god civilizations value reproduction and the relationship between two surnames so much?"

Luther shook his head. The strength of the super-divine civilization was corrupted by Hua Ye and his ilk, but it is not surprising that the Blue Star people would think so.

After all, the supreme ruler of a super-divine civilization is a combination of royal power and divine power. The supreme royal power plus divine power can enjoy the power that the Blue Star people can imagine.

It's like imagining that the king cultivates the land with a golden hoe.

Qilin's beautiful big eyes became even bigger. She now felt as if she had accidentally won the lottery jackpot... This is wrong, cross it out.

It was as if I accidentally discovered a piece of gold nugget on the roadside. I originally thought it was the biggest harvest, but it turned out that underneath the gold nugget was a whole rich gold mine.

Originally, it was already a very dreamy novel plot that the god-king, the supreme ruler of an alien civilization, fell in love with a mortal, but in the end, this god-king was still a virgin! !

What is the difference between this and the plot of those novels where beautiful wives who have children insist that they are raising the children for their brothers and sisters, but they themselves are still perfect?

It's all science fiction!

Qilin couldn't do it.

"Then why are you so skilled?"

Qilin couldn't help asking.

"What you experience means to me is just a trivial information. It only takes a femtosecond to learn it."

Luther said with a smile.

Qilin suddenly hugged Luther.

"Do you want to drown me in your arms?"

Luther knew that Qilin couldn't help herself. He smiled while chewing the rabbit head.

"Yes, how is it, is it delicious?"

Qilin said emotionally.

"It's okay, but I think it's better to chew the butt."

After another end, Qilin said that she wanted to go back to see her parents.

"Husband, do you have any arrangements for my parents?"

Qilin asked. If it was before, she would be cautious, after all, this was an occasional favor, but now that she knew that she was Luther's first woman, Qilin dared to be bolder and act coquettishly for benefits.

Seeing that Qilin had already said it, she asked directly about the arrangement instead of asking if she could give him anything. Luther didn't care and took out two tubes of silver liquid.

"This is the super soldier gene. Inject it into your parents and they will become super soldiers."

Chapter 218 Get One

"Honey, you are so kind!"

Qilin then started chewing with Luther again.

She didn't mind that Luther had just chewed her ass.

Even if Luther told her, after becoming a god, there is no dirt left to speak of. Breathing comes with its own air purifier, and no dust can enter the body, let alone needs such as excretion and impurities such as food. It will be directly obliterated by the powerful stomach.

However, it was impossible for Qilin to accept such a change all of a sudden.

Then Qilin went back with two bottles of super genes.

These two bottles of super genes have no special characteristics, they just live longer. Luther knows that Qilin's father and Qilin have the same temperament, or Qilin just follows him. After she has the ability, she will definitely deal with aliens.

So these two bottles of super genes that can directly utilize dark energy saved their lives.

As for whether extending his life span would hinder him and Qilin...

Although Luther likes Qilin, he can't guarantee that he can accompany Qilin wholeheartedly. That's impossible.

So Qilin still needs someone to accompany her. When Luther is not around, the best companions are her parents.

Then Luther went to find Di Leina.

When he left last time, he left Di Leina with the words of a psychological trap. Now that Di Leina was captured by the Taotie Civilization for research, Di Leina finally stepped into this psychological trap.

"It's all because I'm not strong enough, and it's all because Pan Zhen and the others refused to let go of my gene lock authority, so I was treated like this."

The fire in Di Leina's heart was raging, and the treatment of the gluttons made Di Leina feel that she had been unforgivably insulted.

She swore that after she got out of trouble, she would definitely destroy the Taotie civilization and turn the Styx Nebula into nothingness!

"It's really embarrassing, Lena."

Luther's appearance made Di Leina stunned, and then turned into surprise.

"You...Luther, how did you know I was here?"

While Di Leina was filled with joy, she was also a little confused.

"Don't think about it, just as you thought, I have been paying attention to you. After all, I have fallen in love with you."

Luther walked in front of Di Leina, and without seeing what he did, the absolute vacuum container that bound Di Leina fell apart. Di Leina watched helplessly as Luther stretched out a hand.

"Don't....."

Di Leina is naked now, only wearing underwear.

But Luther's hand just fell on her cheek.

"As the Lieyang Civilization treats you, the Taotie Civilization treats you like this. Join the Kryptonian Civilization. I will not let you be restricted, and this situation will not happen."

Luther said with a smile.

"...Can you put me down before you say this?"

Di Leina said helplessly.

"No, if you don't agree, I will leave. I never do anything that harms myself or others."

Luther spoke righteously and matter-of-factly.

"Then you are really realistic. Can't you let me go and gain the friendship of Empress Lieyang or something?"

Di Leina complained.

Of course she knew that this was the correct thinking of God, but Di Leina still wanted to see what she wanted to see.

"What's the use of gaining your friendship? It's worthless, it's better to gain you as a person..."

Luther's hands gradually became more and more unrestrained.

"Hey, hey, hey, don't move, you, you are taking advantage of others!"

Di Leina panicked and said quickly.

"How about it? In three seconds, Taotie is about to come in."

Luther didn't care about Di Leina's verbal obstruction. Even if she blocked it with her hands, she could still succeed, let alone words?

Doesn't this make him more excited?

"Don't, don't move, I promise, isn't it okay if I promise?"

Di Leina panicked.

The main reason was that Luther went down this way, picking at the grass and looking for snakes.

No snake was found, and the grass was a mess.

Di Leina agreed without saying a word, so Luther directly liberated her.

Then Di Leina naturally fell down weakly and was held in Luther's arms.

"Your engine was shut down. Was it caused by an intrusion?"

Luther said with a smile.

"gloat....."

Di Leina's voice stopped suddenly, mainly because Luther had already held her big butt with one hand.

This special, unprecedented touch made Di Leina's heart tremble suddenly, and her whole body seemed to be out of body.

"you....."

Di Leina was weak and didn't know what to say.

"I want to call you Your Majesty, really."

Luther patted Di Leina to reassure her, but Di Leina trembled with every pat.

"Although I have joined, you...you can't mess around!"

Di Leina quickly summoned up the courage to say.

She was really scared, especially when Luther came up and went straight to the point. The little girl had never seen such a battle, or in other words, she had never been treated like this.

He didn't look at her like a child, but like Xin Zhao and others, with the same wolf-like behavior and eyes.

"I'm just kidding. I keep my word in my own civilization and do whatever I want. Since you are already my subject, of course it is the same. Otherwise, wouldn't I be just like you? Or should I say, yourself Want to bring what you did in the Lieyang Civilization to the Kryptonian Civilization?"

Luther casually destroyed the incoming Taotie, then destroyed the entire spaceship, and took Di Leina into the imperial dimension and said.

"I..."

Dilena didn't know what to say for a moment. No, this is the CPU itself!!!

Dilena didn't stay in Blue Star for nothing. She would watch some short videos when she had nothing to do. After all, she didn't need to do anything. She was too idle.

"I am a god, the goddess of the sun, the future sunlight. I should get due respect!"

Dilena said quickly, straightening her frame.

It's just that Luther didn't look so serious when he held her on his lap, especially when she was naked, with only two small pieces of cloth.

"You talk tough, but it's useless. You know that my star technology is more advanced than the sun civilization. What's the sunlight? I want it, and I have a lot of it. To me, you are just a special goddess. Have you ever seen anyone bargaining for respect with Pan Zhen, Morgana, Karl the God of Death, and Holy Kaisha?"

Luther said.

Dilena had no way to refute it. She had witnessed with her own eyes that Luther created a real star with just a wave of his hand. Even if that star was very small, it was still a real star. Once it was untied, it would madly devour the surrounding matter and grow.

The strong gravity captured and gathered matter, and eventually grew into a real star!

This thing was much more powerful than the Sunlight of their Lieyang civilization.

Chapter 219: Two

The ultimate move of Light of the Sun, Sun Incarnation, only turns itself into a star and illuminates the darkness.

Luther made the stellar object with his bare hands. No matter in which aspect, the light of the sun was completely exploded.

However, Di Leina certainly didn't want to hear this.

She looked at Luther.

Little girls need respect and comfort.

Otherwise, she would worry that one day she would tire of Luther, and would she lose her value and sense of existence?

To put it bluntly, Di Leina felt unprecedented respect and care because Luther did not value her genetic engine but valued her, which made her very happy.

On the other hand, it was because Luther did not value her genetic engine that Di Leina, who had always been proud of her identity as the Light of the Sun, felt the emptiness of being unable to put her feet on the ground.

How long can you please someone with your beauty?

Luther and Di Leina looked at each other. Di Leina tried to see from Luther's eyes and expression that he had a little bit of what he wanted. However, Luther's expression was calm and there was nothing in his eyes that she had ever seen. What are the emotional distribution maps in various novels.

"You should know that this king has no such thing as love for you."

Luther told the truth, very candidly.

For Qilin, he really has this kind of throbbing. Superman can also fall in love with an ordinary, unsightly mortal, and Luther is no exception. He has solved the flaws and limitations of his genes and restored his emotions. .

He can honestly say that he likes Qilin and loves Qilin.

But for Di Leina, she just likes and lusts after her body, and for Bulma, she has the intention of taking advantage of her, but lusty body doesn't.

I like Di Leina's little fool's character and covet her beautiful body.

Whether you will fall in love or not will only depend on how long it takes.

Di Leina was a little disappointed.

"So you're just greedy for my body?"

Di Leina said.

"Of course, otherwise, why would I be greedy for your genetic engine? I don't like that thing."

Luther doesn't care about Di Leina's depressed mood. He really can't give the little girl the expectations and hope she wants, so he might as well let the little girl recognize the reality!

"...You are really a good and honest person."

Di Leina was speechless.

"I have no feelings for you, but that's all for now. If you work hard and make me fall in love with you, won't I have feelings for you?"

Luther moved his hands and feet and said.

“You’re at KFC me again!”

Di Leina said angrily, but when she turned around and thought about it, this seemed to be a solution?

Let Luther fall in love with him?

"How many princesses and queens do you have?"

Di Leina and Qilin both thought of the same question.

"There is only one, and she is the queen."

Luther was also very honest and did not hide Qilin's existence.

"Queen, there is only one? Really or not."

Di Leina couldn't believe it, just a queen like Luther?

"Do you think anyone can make me lustful?"

Luther asked with a smile.

Di Leina couldn't handle these words. How did she know? She had only met Luther a few times, and this was the first time she saw Luther's words and actions that were as aggressive as a wolf and a tiger.

However, Luther's frank words just now had an effect, making Di Leina doubtful.

If this is true, then... Di Leina feels good too.

Even if she is a goddess, it is impossible for a male god or even a god-king to have no other women. That is impossible.

Therefore, Luther's behavior exceeded Di Leina's expectations.

Luther felt that his identity setting was so good that both Qilin and Di Leina misunderstood it. Although it was not a misunderstanding, Luther also looked down on the nameless and beautiful woman.

"Is your queen easy to get along with?"

Di Leina felt that her last cover was gone, and she gave up her struggle.

"Of course she's easy to get along with. You will probably become good sisters."

Luther said that he was in a hurry now and had problems such as slurred speech and incoherent speech.

Di Leina also gradually became confused and incoherent.

The imperial dimension became dark, the strong wind blew the strong grass, and the rain and dew washed the earth.

Di Leina nestled in Luther's arms.

She thought she could resist, and she could resist, but after everything was over, Di Leina fell.

"Luther..."

Lena called out tenderly.

"Here."

Luther knew that what women needed most at this time was companionship, so he didn't just pick up his pants and leave.

"You will never ignore me from now on!"

Reina's tenderness disappeared within half a quarter of an hour, and she said to Luther fiercely.

"My time management is very good, so this will not happen."

Luther said with a smile.

Lena doesn't know about this.

But Lena thought it was about dealing with the Kryptonian civilization and time management between the queen and herself.

Looking at it this way, Luther is still quite busy, although he does not have a harem of three thousand beauties.

"Over there with the Lieyang Civilization..."

Lena thought of this.

"I will give Pan Zhen a message."

Luther nodded.

"It's better not to."

Reina lowered her head. What if the Sun civilization fought with the Kryptonian civilization? The Sun civilization would probably disappear. When the time comes, Reina would be caught in the middle, and she would be in a dilemma.

"What are you afraid of? I saved you in a dignified manner, and you should also pledge your love to me in a dignified manner. If Pan Zhen and Lieyang Civilization have objections, I will at most stop after we reach Tiandao Star for the sake of your mother's family."

Luther's words were so straightforward that Lena couldn't help rolling her eyes. You want to take down the entire Tiandao Galaxy, right? You want to stop after you reach Tiandao Star, and then Lieyang Civilization will only have one... oh, half of Tiandao Star left.

But Lena didn't question whether Luther and Krypton Civilization could do it. With the power that Krypton Civilization has shown so far, it might be doubtful to reach Tiandao Star, but if they take down the Tiandao Galaxy, it would probably be no problem.

Pan Zhen is going crazy now, because he was originally planning to talk to the God of Death Carl, but Lena disappeared.

Pan Zhen had been keeping his eyes on Reina. The fact that the Sunlight Engine was hacked and forced to shut down also alarmed Pan Zhen. However, after discovering that it was the "private" work of the Taotie civilization, Pan Zhen planned to have a good chat with the God of Death Carl.

Before this person arrived at the Death Song Academy, Reina was gone, and so was Taotie.

Pan Zhen couldn't even lock Reina's whereabouts, and the Heavenly Dao Tower couldn't calculate it.

The seriousness of this matter immediately made Pan Zhen feel very passive.

However, after thinking it over again and again, Pan Zhen still went to the Death Song Academy to find the God of Death Carl.

The only person who has the ability and possibility to do such a thing is the God of Death Carl.

As for Luther, the goal of the Kryptonian civilization is unclear, and the direction is also unclear, so Pan Zhen didn't think about Luther.

Chapter 220 New Threat

Unlike Pan Zhen, the God of Death Karl could already guess who had attacked Di Leina.

Although he didn't understand, the big clock calculated that the possibility of Luther taking action against Di Leina was very slim, but now that Di Leina was gone, the only person that Karl, the God of Death, could target was Luther.

Holy Kesha has been destroyed by him. He Xi rushes back to Angel Nebula to take charge of the overall situation. It is impossible to come over and attack Reina at this juncture.

Therefore, Luther is the most suspect.

It happened that the God of Death, Karl, knew about Luther's blowing up the black hole to obtain void particles, and he also harvested a lot of void matter. This thing is the rarest, rarest, and most rare resource in the Super Seminary universe.

A large amount of void matter can be compared to the frequency of a portion of void particles.

And the frequency of one void particle is at least fifty.

This makes the God of Death Karl even more unable to understand why Luther wants to attack Rena. He can blast black holes and obtain void particles himself, and he can't find the void particles using the big clock. They have probably been captured by Luther. Taken away.

The god of death, Karl, felt aggrieved that he had collected the void matter that Luther didn't want and was questioned by Holy Kesha about whether he had conducted experiments on exploding black holes. He was just collecting rags at most.

Pan Zhen came to the Death Song Academy very domineeringly. In the original plot, Pan Zhen seemed to refuse to give in, and his words and deeds were all that of a super-divine civilized god. After all, he was the regent.

But later, Karl sent a few people to destroy the Lieyang Civilization, and Pan Zhen was still vulnerable, which made people feel like that.

Although it is not impossible to understand that this is emphasizing that if you fall behind, you will be beaten, not to mention that the Sun civilization has been closed to the country for tens of thousands of years. They feel that they can sit back and relax if they have unlimited light energy. The ability to explode stars similar to nuclear deterrence is enough to make them Countless people stayed away.

Then he was crushed to death by the frontier of the Void Era.

The torrent of the times has drowned the light energy of the stars. In the face of the power of the void, the light energy of the Sun civilization has infinitely lost its meaning.

They have unlimited resources, unlimited energy, and unlimited rapid construction, just like the cheat codes in Warcraft, StarCraft, and Red Alert. Except that void matter and void particles cannot be created out of thin air, you can completely pile up resources to death. Yang civilization.

Pan Zhen failed to get the whereabouts of his goddess from Karl, the God of Death, but Karl, the God of Death, gave a hint.

It is not just the Death Song Academy that can do this. Angel civilization, demon civilization, Kryptonian civilization are all possible, and a civilization called "New Deno" has recently emerged.

Pan Zhen left with the answer, but he still reached cooperation with Karl, the God of Death.

After all, Pan Zhen felt that Lieyang Civilization should also make some changes, especially now that the situation in the known universe has changed so much.

The cooperation with Death Song Academy is just the beginning.

Luther and Reina had a great day playing.

Lena herself has a personality that has been suppressed for many years. Now that it is released, if Luther's physical strength is not the strongest in the dimension, it is probably impossible to conquer Lena, but there is a danger of being conquered by Lena.

"No wonder angels only have one spouse. Their relationships can easily be conquered if they are not careful..."

Luther thought that the strength of the divine body of the goddess was naturally superior to that of the male god. Just like in the period of ordinary people, women could come back countless times, but for men, they would only have water.

It's probably not much different after becoming a god. Looking at it this way, that guy Hua Ye is really powerful.

Reina herself was also puzzled. She originally wanted to defeat Luther in this regard so that she could gain dominance and status. For example, she was the empress and had to be on top, and then Luther was tit for tat with her in front of five million words. No matter who wins or loses.

In the next five million words, she has been defeated, lost, and lost.

That's it, Luther thinks it's boring because she has no ability to resist, otherwise it feels like Luther could have written another 10 million words of content.

What is the structure of this guy's divine body?

"Get some rest."

Luther patted Reina on the high ground, then left with a smile.

The two purposes of returning to Super Theological Seminary have been completed. After all, the value of Super Theological Seminary to Luther is now only this.

Even if there is a hidden void and ultimate fear behind it, it is nothing worthy of attention for Luther.

"The next thing is..."

Luther came to Du Qiangwei.

There is no trace of the Black Armored Company now, and Blue Star's hope of resistance is gone because of Ge Xiaolun's betrayal and joining the demonic civilization.

Although Ge Xiaolun was thinking that the demonic civilization could deal with the demons and monsters on the Blue Star, Morgana had her own ideas and naturally could not be influenced by Ge Xiaolun to change her mind.

Even Ge Xiaolun was subtly influenced by Morgana to change his mind.

He now feels that it is actually a good thing that Blue Star suffered from these things, because Blue Star has evolved and grown.

Du Qiangwei struggled to support herself, surrounded by a demon queen and an angel queen.

It can only be said that this configuration is worthy of being the protagonist of this period.

And Luther's Kryptonian civilization protected the city of Blue Star, which not only gained the favor of Qilin, but also gained the favor of Du Qiangwei.

Now Du Qiangwei's mission has changed. Instead of gathering the rescued survivors to places like Northern Star and Yellowstone City, she will send them to the "City of Krypton."

This is the only way. Now there are all kinds of evil spirits on Blue Star. Taotie and giant wolves are rampaging in the sky. If you dare to show up, you will be chased by a lot of floating gunboats and flying motorcycles. There are also a lot of small demons and flying demons on the ground.

Yellowstone City and North Star do not have the ability to protect.

So they can only be sent to Krypton City.

This makes Morgana very unhappy. She thinks this is aiding the enemy!

In addition to super genes, population and faith are also part of genetic resources. Most of the genetic resources in the known universe have been divided up. Blue Star has not been divided up yet because of its special nature.

However, looking at the appearance of Krypton civilization, it seems that they want to catch them all in one fell swoop.

Morgana is not idle either. She did not recover the demon factor because she planned to gather troops to deal with the threat of Krypton civilization.

After the destruction of Holy Kesha, Morgana and Death Karl found that Luther had become a new threat, even more dangerous than Holy Kesha.

Morgana then had the idea of using the genetic resources of Blue Star to create a large number of demons.

With so many genetic resources on Blue Star, it can at least produce millions of little demons and hundreds of second-generation demon warriors!
