

Kryptonian 231

Chapter 231 Resurrection

Luther had a strange expression when he heard Angel Leng's words. No way, at this point, you still want to drag Angel Yan into the water?

How good is the relationship between you two sisters? Is it a fake sisterhood or a sisterhood of sharing weal and woe?

"Her name is Yan. She is the left-wing guard of Queen Kaisha. She is much more beautiful than Lingxi and Yitian."

Angel Leng said to Luther very calmly.

Throwing Angel Yan out to attract Luther's attention was a last resort for Angel Leng, but Angel Yan was not here anyway, and Angel Leng completely regarded Angel Yan as a cover.

"Continue."

Luther looked interested and listened attentively. Seeing this, Angel Leng breathed a sigh of relief.

Little did he know that Luther had already turned on the dark plane data recording. When he sent this dark data to Angel Yan, he didn't know what Angel Yan's expression would be.

Angel Leng felt only a little guilty about Angel Yan, and then put it behind her. The most important thing now was to divert Luther's attention from his sisters!

It took Angel Lingxi, Angel Yitian and three other little angels five whole days to see Angel Leng.

"Sister Leng!"

They were so nervous that they couldn't help but greet her.

"It's okay..."

Angel Leng's eyes were tired but her face was rosy and she looked refreshed.

Angel Lingxi and the others knew why Sister Leng was gone, so after seeing Sister Leng's current appearance, they all knew what had happened. She hadn't appeared for five whole days, which meant that Sister Leng had been sacrificing herself to feed the tiger! ! !

At this moment, the sisterhood between the angels reached its peak.

On the other side.

Hua Ye couldn't find Su Mali no matter how hard he tried. He also tried to read the dark data of Blue Star, but Hua Ye couldn't do it at all, so he gave up helplessly.

Then Hua Ye thought about waiting for Ruoning to come back to see if he could find Su Mali. It had been several days, and there was no news from Ruoning and the scum he had sent out.

In addition, the planetary parameters that Blue Star's communication technology relies on have been destroyed, and the dark plane communication has been locked and blocked by Demon No. 1. Of course, now that Demon No. 1 is ready to run away, this blockage will be unlocked in a short time.

But if it is not unlocked, Hua Ye and his team will not be able to contact Ruoning.

If Hua Ye knows how to play, his powerful black hole engine can completely invade Demon No. 1 and seize control of Demon No. 1. With the current terrifying frequency of 60 frequencies of the black hole engine, Demon No. 1 is no match at all.

But Hua Ye doesn't know.

This is like begging with a mountain of gold.

Hua Ye, who didn't know that Sumali and Ruoning were killed, just waited stupidly, or the death god Carl saw that he didn't move, so he asked him what happened.

"Sumali has disappeared, and Ruoning was decomposed by the God King Luther."

After knowing what happened, the death god Carl used the big clock to read the dark data of Blue Star, and then told Hua Ye the answer.

"What? Ruoning has been decomposed? When did it happen?"

Hua Ye's eyes widened. Although Ruoning's status plummeted after he obtained the powerful void engine black hole engine, it didn't drop too much. At most, Ruoning went from being at the top and unquestionable to being at the bottom now.

Hua Ye also knew that anyone around him could be gone, but not Ruoning. If Ruoning was still there, he still had hope of attacking Melo Heaven. If Ruoning was gone, then if he relied on himself, there would be hundreds of brainless scums. How could he beat Melo Heaven?

What scared Hua Ye even more was that God King Luther killed Ruoning without saying a word.

What kind of evil god is this? Ruoning died silently. If Death God Karl hadn't said anything, Hua Ye wouldn't have known that Ruoning was dead. What about himself?

If he met God King Luther, would he die directly?

Thinking of this, Hua Ye quickly took the remaining scums away from Blue Star and scolded his grandson, Death God Karl.

Death Karl also knew the seriousness of the matter. Sumali was still okay, but if Ruoning was gone, Huaye would be a hopeless case.

With Ruoning, she could help Huaye learn how to develop and use black hole engines.

If Ruoning was gone, Death Karl couldn't calculate that Huaye's chance of attacking Melo Heaven was more than one in a trillion.

The big clock only needed one femtosecond to complete trillions of calculations, and the results were all failures. Huaye couldn't rely on himself and the black hole engine to take down Melo Heaven. Instead, more than half of them were captured by He Xi to study the black hole engine.

"I will arrange for Ruoning to be resurrected, provided that I have Ruoning's dark data and Sumali."

Death Karl said.

"What is dark data? I don't know."

Huaye said unjustifiably.

"..."

Death Karl couldn't say that he had collected Ruoning's dark data the last time Ruoning came. If that happened, Hua Ye would probably think that Death Karl had bad intentions even if he didn't turn hostile.

Not to mention, the black hole engine was still copying Hua Ye's dark data. It would be OK to extract Sumali's dark data from Hua Ye's dark data, or from Blue Star's dark data... Oh, that wouldn't work. Sumali's dark data was gone.

It is hard to say that the person who was resurrected through dark data is the one. If there is a part of dark matter, it is easy to say. The problem is that Ruoning was directly decomposed. Her dark matter and dark data are gone. Even if she is resurrected, she probably doesn't know that she has been decomposed.

However, for the Death God Carl, this is also good, then they will not be too afraid of Luther.

"I will solve this matter. I will resurrect Sumali and Ruoning. King Huaye does not need to worry."

Death God Carl said.

Hua Ye's eyes flashed, and he touched his chin.

"Is the current technology so powerful that it can be resurrected at will? Then this king should be able to resurrect too, right?"

Hua Ye asked Death God Carl.

"It's better not to die."

Death God Carl said calmly.

"If you say so, this king will know."

Hua Ye smiled, if they can be resurrected, then there is nothing to be afraid of!

Ruoning and Sumali were soon resurrected by Death God Carl and sent to Hua Ye's location.

"I'm actually dead, but how did I die?"

Ruoning and Sumali both had similar questions. Sumali was completely blank. After all, Luther had directly destroyed his dark data and blocked the dark plane. After Hexi came, he also modified the dark plane information.

This made it impossible for Sumali to even be resurrected. If she had not been extracted from Hua Ye's dark data by the God of Death Carl, Sumali would have been dead.

Chapter 232 Feeling Fear

For an old man like Sumali, dying out of nowhere was really shocking.

Even though he is resurrected now, Sumali still feels that he cannot understand it.

Not to mention Ruoning, even though she knew that the method used by Karl, the God of Death, to resurrect herself was more of a replication than a resurrection.

It is much lower-end than the resurrection used by demon civilization, but even if you know it, so what, if you would rather not deny it, you will not be yourself.

Because Luther did not block the dark data this time, Ruoning's own dark data and dark matter were destroyed. After Death Carl read Blue Star's dark data, he gave her the dark data of the entire process of being killed by Luther. Ruoning.

Although Ruoning was experiencing it from a third-party perspective rather than an immersive experience, he still felt Luther's unparalleled domineering attitude.

This is not to say that Luther is so cool and awesome, but that Luther is unscrupulous, and coupled with his strength, of course he is full of domineering when shown.

Ruoning had never seen this kind of self-confidence, this kind of arrogance, this kind of tyranny, this kind of feeling that the divine authority is mine and treating other gods as if they were nothing.

Holy Kesha you say?

Holy Kesha also pretends to respect other gods, so she doesn't seem as domineering and royal as Luther.

Luther didn't care at all.

I am the only one who looks down upon the world.

He didn't care what her identity was, so he just decomposed and destroyed her.

Ruoning frowned, and they could see how troublesome Luther was just by looking at him. It was not that they had never seen the confrontation between Luther and Holy Kesa, but now they could clearly feel the pressure of facing Luther head-on.

This guy is definitely a self-confident person who has won countless battles and gained countless victories.

In this regard, Hua Ye was completely crushed and crushed into the dirt.

No discerning person would think that Hua Ye has the possibility of victory. Even if the conditions are the same, the possibility of Hua Ye's failure is far greater than the possibility of victory, not to mention that Luther has a super-divine civilization that is not inferior to the peak of the angel civilization. support.

"What's wrong, my Ruoning?"

Hua Ye reached out and hugged Ruoning. He felt that something was wrong with Ruoning. Could it be that something went wrong during the resurrection?

Of course, with Hua Ye's character, he would definitely be suspicious of the resurrected Ruoning and Sumali, but Hua Ye would not show it.

In the king's city for tens of thousands of years, Hua Ye still doesn't show signs of joy or anger.

He just buried this suspicion deep in his heart, and secretly began to test Ruoning and Sumali.

If they were really manipulated by Karl, the God of Death, Hua Ye... there was nothing he could do.

After all, Grandpa Hua is illiterate. If he had learned a lot of knowledge, he probably wouldn't be alive today.

"nothing."

Ruoning shook her head. She couldn't say that she felt there was no hope of fighting Luther. Otherwise, she would have to fight with those short skirts and fight a war that would last for tens of thousands of years. By then, Holy Kesha would probably be gone. Resurrected.

It was only ten thousand years old. With the development of Holy Kesha's brain, it would be easy to catch up.

"Okay, anyway, Sumali is back. It's time to gather the others and attack Merlo Heaven."

Ruoning said to Hua Ye.

Hua Ye didn't say anything. He didn't ask Ruoning if her little idea was successful. She was gone, so it must have been unsuccessful.

"King Hua Ye, with our current strength, I'm afraid not many people will be willing to respond to our call."

Sumali said.

It is inevitable that Hua Ye will not get much support when he comes back. The scumbags are not stupid. They will not do anything that will lead to death.

We have to let them see hope.

Hua Ye also knew this. Wasn't the Heavenly Palace so useless back then? But these male scumbags didn't expect the female angels to be so ruthless.

Do you really think that He Xi and Sheng Kesha alone, plus a rookie Liang Bing and a group of female angels, can overthrow Tiangong?

"Don't worry, we can find as many as we can. Karl's grandson said that both the Taotie Civilization and the Giant Wolf Civilization will support us."

Hua Ye said with a smile.

With the Taotie Civilization and the Giant Wolf as cannon fodder, Hua Ye would be sure of conquering the Merlot Heaven.

"Taotie and Giant Wolf? What's the use of two aerospace-level civilizations? There is no shortage of these aerospace-level civilizations under the Angel Order."

Ruoning doesn't think highly of it.

"Didn't you say you want to test Liang Bing's strength?"

Then Ruoning looked at Hua Ye.

"Isn't this what I didn't encounter?"

Hua Ye looked innocent. He couldn't do anything without Ruoning, not to mention that Liang Bing had the support of Devil No. 1. It was strange that he could find Liang Bing.

Ruoning looked at Hua Ye speechlessly and understood why he couldn't meet him.

Blame her for thinking too much about Hua Ye.

Ruoning always felt that the Void Engine was very strong, mainly because it came from Holy Kesha and He Xi, but she forgot that no matter how strong the Void Engine was, Hua Ye would have to have enough knowledge to develop the ability of the Black Hole Engine.

"Forget it, I will teach you how to develop your own void engine next."

Ruoning originally did not plan to teach Hua Ye how to develop the void engine so quickly. She was still very afraid of the void engine. After all, Ruoning was not with Hua Ye for love, she just wanted to use Hua Ye.

Hua Ye also knew it well.

On Blue Star, the Kryptonian civilization launched a massacre against the Taotie civilization, the Giant Wolf civilization, and the Demon civilization.

The Taotie King Shihao asked his subordinates to send messages to the Death Song Academy more than once, but nothing happened at the Death Song Academy.

It could only stay in a Taotie civilization's main ship far away from the Chiwu star system, silently watching its own warship being blown up by the Kryptonian civilization's heavenly soldiers and generals with an unchangeable fact! Destroy! Destroy!

All the Taotie commanders and captains in the command room were silent, with no time to dodge or retreat, and the ambush was easily wiped out.

From the surface of Blue Star to the Chiwu star system, the speed of the fall was so fast that no one answered the Taotie civilization's orders.

They didn't know what to do, because this was the first time they faced a god of this level! A civilization of this level! A super soldier of this level!

They had always thought that the super-god civilization was nothing special, and that gods could be destroyed. But when tens of thousands of third-generation super warriors controlled the Dark Silver Blade, chopped up their warships like cutting melons and vegetables, and slaughtered their warriors and soldiers.

All the Taotie felt fear.

"We must never forget what happened this time!"

The Taotie King Shihao suddenly spoke, interrupting the silence of his subordinates. He knew that he had to say something at this time, otherwise, the Taotie's attitude towards the Death Song Academy might change, which would be bad.

Chapter 233 Liang Bing pretends to be pitiful

Even if the Death Song Academy ignores their life and death, they cannot resent the Death Song Academy or be dissatisfied with the Death Song Academy.

Because it is they who need the Death Song Academy, not the Death Song Academy who needs them.

Without Taotie, there are still many civilizations to choose from, and there are civilizations as numerous as the Ganges River that want to be dogs for the Death Song Academy.

In many civilizations, there is no way to become a dog.

The words of the Taotie King Xihao brought the commanders back to their senses.

"Yes, we have to remember!"

Their simple brains and wisdom haven't figured out why their king said such things, but it doesn't matter, they will definitely remember the shame of this time.

They don't want to experience such powerlessness and fear a second time!

The Taotie King Xihao nodded with satisfaction.

"When my god Karl gives me the power of the void, I will definitely make the Kryptonian civilization pay the price!"

The Taotie King Xihao's eyes revealed the light of ambition.

In the light, countless debris turned into space junk and scattered.

Strictly speaking, Luther's attack was completely a dimensionality reduction attack, which is why the Taotie civilization seemed so powerless.

With the assistance of the God of Death, Karl, the Taotie civilization can be said to be more powerful than most aerospace-level civilizations and even god-making civilizations. They are not afraid of death because they do not have much brains and wisdom.

Their beastly bodies are powerful enough to compete with first-generation super soldiers and even second-generation super soldiers in hand-to-hand combat.

If paired with a mecha, the Taotie mecha warriors even had the record of suppressing the Xiongbing Company, but they were soon chopped down by the rising Liu Chuang with an axe. However, except for Liu Chuang, even Reina was almost killed by a Taotie. MechaWarrior kills solo.

If it weren't for the difficulty in producing the Taotie Mecha Warriors and their limited number, they would not be a space-grade civilization.

And these Taotie mecha warriors, who can rival or even crush three generations of super warriors, are vulnerable to the Ansu Silver Blade.

In addition, the person who controlled these dark silver blades was still a third-generation super soldier. Everyone was silent when they saw it. The God of Death, Karl, was silent because it was not worth it for him to come up with something that could deal with this kind of battle, so he just gave Taotie one. Orders to retreat were ignored.

The Kryptonian civilization shocked all civilizations in the known universe with just a small show of its strength.

Tens of thousands of third-generation super soldiers, with such a family fortune, maybe they have conquered the unknown universe in the edge space, right?

So they are actually welcoming Master Wang?

Liang Bing was so greedy that she drooled and took the initiative to find Luther for the first time.

"I want the silver blade!"

Liang Bing said to Luther eagerly.

"no."

Luther has long known what would happen if the silver blade was exposed, but he no longer cares about this issue. Just kidding, I can destroy the existence of the Milky Way just by being in a bad mood. Does the silver blade have any meaning?

Even the weakest single universe level is not comparable to the world of Super Seminary. The ultimate fear may have that possibility, but it has never been seen before.

Liang Bing simply sat on Luther's body, her graceful and graceful figure fully revealed. It was a charm that her clothes could not block.

A long black hair, which was very attractive to Luther, hung straight down, vaguely concealing some beauty.

There is also that strange and strange fragrance, which is the scent prepared by Liang Bing himself. He was once famous for controlling a civilization with this scent.

"Ten thousand silver blades at a time."

"This king needs your consent?"

Luther said that Liang Bing was too pushy and Liang Bing knew his attitude towards Liang Bing.

"But it can unlock more postures."

Liang Bing started to clearly mark the price. If you can't resist, just enjoy it. Now maybe you can get a deal. For Liang Bing, it's not a good deal.

Although she also has Ansu Silver, Liang Bing knows very well what the consequences will be if something like the Silver Blade spreads, so she will only use it herself.

After An Su's silver blade is used, killing three generations of gods is just fun.

The Noxing God of War is all a matter of one sword.

You said that Kryptonian civilization has spread... Liang Bing said that the affairs of Kryptonian civilization have nothing to do with her, she only wants the silver blade!

Luther said Liang Bing was simply seeking death.

Three crossings of the pass are deep and barren.

"No matter what, give me a hundred!"

Liang Bing chattered endlessly.

The Demon Queen expressed her willingness to risk her life.

"Don't you have dark silver yourself?"

Luther asked puzzledly while shaving ice.

"Don't mention it, it was destroyed by Kesha's Bichi."

Liang Bing felt heartbroken when she thought of her two dark silver chains. She had been collecting them for who knows how many years to get just one ten thousandth of them.

Although the rest was kindly sponsored by the God of Death, Karl, Liang Bing already regarded it as his own.

Not to mention, when Holy Kesha destroyed An Suyin, Liang Bing was scared to death.

But after Liang Bing analyzed it carefully and added the calculations of Demon No. 1, Liang Bing realized that it was not such a powerful technology. It just broke down Ansu Silver into atoms and destroyed it.

The structure of metal is all atomic. If it can be decomposed at the atomic level, it is quite easy to destroy it.

Of course, the target is An Suyin after all, and not everyone has that kind of computing power. Holy Kesha can even make the silver blade grow out of other people's bodies, so you know how outrageous her computing power is, and it can be analyzed and destroyed instantly. Not difficult.

Morgana was envious and jealous. Even if she knew how to operate it, it would be impossible for her to do it.

"King, my good king, please feel sorry for me. Without An Suyin, I will be very dangerous in the universe."

Liang Bing begged.

"No way, absolutely impossible."

Luther is not used to Liang Bing, joking. His attitude towards Liang Bing has always been the same. At most, it has changed a little recently.

But this is not the time to give Liang Bing any sweetness. Otherwise, Liang Bing's character would follow the stick.

Liang Bing was actually mentally prepared, and Devil No. 1 also calculated that Luther would not be able to compromise easily.

So she didn't say anything in the end and was silent.

He looked very pitiful, and Luther knew it was the cold ice grinding against him.

The problem is that Luther knows who Liang Bing is, an evil god who has fallen into freedom for tens of thousands of years and does all kinds of evil. If he is to be pitiful, he should first pity the innocent people who died in her hands and who were used by her to resurrect him. .

Luther didn't have to vent his anger on those people. He didn't have that much kindness in mind, and he didn't claim to be a good person. At most, he was chaotic and neutral.

Therefore, it was naturally impossible for him to soften his attitude toward Liang Bing with just a few words.

At least eight times out of ten.

"You bastard, eat everything and run away!"

Liang Bing said very unhappily, she was pretending to be pitiful, why couldn't she just pity her directly like Karl's grandson?

"Heartless guy."

Liang Bing cursed, being heartless is so difficult to deal with!

Chapter 234 God's Special

Angel Yan is the most depressed person, there is a God King by her side.

But she can't count on this God King.

Angel Yan asked to become his guardian angel, otherwise there would be no God King to talk to, how could Angel Yan agree.

If it was still the Holy Left Wing, Angel Yan would have agreed for the safety of the sisters on Blue Star, but the situation is different now. Angel Yan can't agree to Luther's request, and naturally can't get Luther's help.

Luther certainly knows what Angel Yan is thinking. This female driver always feels that she is holding a treasure, and her cautious and uneasy look makes Luther feel very interesting.

So Luther often comes to tease Angel Yan after drinking cold drinks to see her frightened look.

As for bringing Angel Leng and others to see Angel Yan, there is no need.

After all, Pan Zhen, who is interested, will probably set his sights on Angel Yan after he can't find Lena.

To put it bluntly, they can "resurrect" without Lena, but this is the only chance to intervene in the birth of the Angel King.

That's the Angel Civilization. Even if the Holy Kesha was destroyed, it's clear to old gods like Pan Zhen that the Angel Civilization is not much weaker. If Morgana continues to fight the Angel Civilization, she will definitely be bottled by He Xi.

So at this time, it's the only time to intervene and influence.

Pan Zhen has the idea of helping in times of trouble, but it doesn't stop him from doing something.

The reason is very simple. The temptation is too great. That's the main god of a super-god civilization whose size and strength completely surpass the Lieyang Civilization!

Although the Lieyang Civilization is closed to the outside world and changed its name from Tiandao to Lieyang, it can be seen from Xuan Tianji's performance that the Lieyang Civilization wants to become the god of everyone and experience that kind of worship and faith. This point will probably not change.

Otherwise, how can Xuan Tianji climb to that position with such thoughts? Can he still get the God-killing Weapon?

This thing is not just a weapon, but it can threaten the main god of civilization, just like Blue Star gave the right to launch nuclear weapons to a general, and this general is a radical thought.

It is probably not difficult for Pan Zhen to locate Angel Yan, but he can't take the initiative to find him.

This kind of thing can only be an accidental encounter.

But now Lena is kept by Luther King, and she is also afraid that because of her, Krypton Civilization and Lieyang Civilization will fight, and then Lieyang Civilization will be defeated.

Lena has witnessed the terrifying torrent of tens of thousands of third-generation super soldiers of Krypton Civilization, and everything is cleared wherever they pass!

However, Lieyang Civilization can light stars and use solar wind attacks in its own Tiandao Galaxy, so it is not afraid of these super soldiers of Krypton Civilization.

Let alone tens of thousands of third-generation super soldiers, even if there are tens of millions, the solar storm can melt you.

It's just that it's hard to say what changes will happen in the technology of Krypton Civilization. After all, it is a super-god civilization from the edge of the unknown universe.

So Lena hid tightly.

Luther did not ignore the little fool, and would go to accompany her every day and bask in the sun.

Most of the time she was with Qilin, then Lena basked in the sun, Liang Bing shaved ice, Tian Shi Leng drank cold drinks, and finally Du Qiangwei picked wild vegetables.

Xiao Bailong's urine could turn wild grass into Ganoderma lucidum and fish and shrimp into dragons, and Luther's effect would be even better.

If absorbed, they would be immortal, youthful, and powerful.

He was not sure whether he had become a single universe-level god, his life form had changed into a god or devil, or whether his body had automatically evolved at this level.

She was very surprised at what these things were, why they had such an effect, or why Luther adjusted his divine body to such a technology in order to conquer the goddess and the female super soldier?

However, the divine objects could not be contained in any container. If she did not absorb them, these divine objects would automatically dissipate between heaven and earth and transform into energy of a higher dimension.

Liang Bing did not give up. Although the demon civilization advocated degenerate freedom, it did not do any scientific research, especially when it was hunted by the angel civilization, it would click on technology as much as possible.

So now Liang Bing is researching tirelessly. If she can find out what this substance is, can she use it on Atuo and others to make them stronger?

Du Qiangwei is the weakest and the change is the most obvious. She can't figure out why her strength has increased.

But she hasn't developed her own super gene, right?

"No way, it can't be that outrageous..."

After Du Qiangwei figured out an absurd possibility, she was a little unbelievable.

Even after Du Qiangwei told Lianfeng about this possibility, Lianfeng was confused, mainly because she had never heard of such a thing. Even the two divine body genes of Galaxy Power and No Star War God could not have such a function.

"Could it be the special function of Luther's divine body, but what is the basis for such a function?"

Lianfeng widened her eyes. She also checked the records of the Super Seminary. Even though Luther said that the Denor civilization and the Super Seminary were not one and the same, and the Super Seminary was only the Super Seminary of Blue Star, they actually exchanged what they had.

The Super Seminary naturally did not have such absurd data records.

Strictly speaking, this seems to be a good thing, but if this is true, then Du Qiangwei and Lianfeng will have an idea.

For example, can a group of voluntary female warriors be arranged?

Of course, this must first verify whether Du Qiangwei's conjecture is correct.

So, Angel Yan saw that Du Qiangwei and Liang Bing seemed to become obsessed with Luther all of a sudden.

Humph, you are greedy for my body, but I will not do as you wish!

At this time, Du Qiangwei received a communication from Lianfeng.

"Qiangwei, a fusion energy reaction that meets Reina's standards has been detected!"

Chapter 235 The Storm Caused by the Butterfly's Wings

Everyone is looking for Lena.

Black Great Wall and Du Qiangwei are looking for Lena to fill up their energy. Lena is the best power bank.

Without Rena, many functions of the Black Great Wall Base would be shut down.

Angel Yan also wants to find Reina and let Reina replenish the energy of his divine body.

By then she will be able to restore her divine body.

So after everyone heard the news, they all became excited.

Except Luther.

Luther lamented that the days of seeing Angel Yan living in fear were gone.

When they all went to find Reina, Luther did not go.

It's boring to know the plot at a glance. It would be better to mass-produce the Noxing God of War and scare them to death.

Angel Yan breathed a sigh of relief. At this time, she felt that she had found Reina, and finally the pain was over, and Luther was not going.

In this way, she doesn't need to worry. The only thing she has to worry about may be Liang Bing, a spy suspected of being a demonic civilization.

However, Angel Yan felt that after he recovered his divine body and opened the arsenal of holy Kesha, he no longer needed to worry about a little spy.

She only needs to worry about Luther, the God-King.

That was the god-king whom Ansu Yinwu and God-killing Wu had thrown around.

Even Queen Keisha told them afterwards that if there was a real fight, she would not be able to analyze Luther's divine body, and she would not be able to use the sacred realm to make the silver blade grow out of Luther's body.

As for those Dark Su Silver Martial Arts and God-killing Martial Arts, Queen Keisha actually has no way to analyze them. Otherwise, it would be good for Holy Kesha to perform a wave of "taking the sword with bare hands" to increase the inventory of the weapons arsenal.

Angel Yan is self-aware, so she just wants to recover her body quickly and leave.

But she didn't expect that she would be manipulated by Pan Zhen. After some testing, Pan Zhen learned that the power of the Galaxy had actually been contaminated by demonic civilization and turned into a demon. The lowest angel gene was gone. Pan Zhen realized The opportunity has come.

In the original plot, he would still say that by harnessing the power of the galaxy, he would make Angel Yan the king, but now Pan Zhen won't say this at all.

Directly helping Angel Yan recover his divine body, Angel Yan was surprised and immediately connected to the treasury of sacred knowledge and restored the angels' internal network communication.

Luther snapped his fingers, blocking Angel Leng's signal.

Angel Yan couldn't contact anyone, only Angel Zhixin who came to Blue Star was contacted by her.

At this time, Angel Zhixin joined Xin Zhao and became a guardian angel. After receiving the news, Angel Zhixin confirmed that Angel Yan was safe and sound, and breathed a sigh of relief.

Regarding the Holy War, Angel Zhixin could no longer care about it, and Angel Yan didn't let her care about it either. He just asked her to assist Xin Zhao.

Angel Yan really has the idea to make Xin Zhao the new power of the galaxy!

Not only Angel Yan, but also Super Seminary and Deno Civilization have this idea.

Ge Xiaolun has been contaminated by the demon civilization, and is still working for the demon within the demon civilization. He is already an enemy to Blue Star.

Even if God's eyes don't care about this, it is impossible to say that Ge Xiaolun will continue to be the main god of the future galaxy and the highest god of the known universe.

The super seminary with backup has this confidence, but the activation of the new Galaxy Power super gene is limited by a problem.

energy.

It was Rena who activated it for them in the first place, and Rena couldn't cover everything, leaving out Kirin, the Kamigawa sniper.

So even if you want to replace the power of the galaxy, it won't be possible for a while.

For Angel Yan, if Xin Zhao can become the Power of the Galaxy, there will actually be no difference in the outcome. Angel Yan will assist the Power of the Galaxy, which is equivalent to replacing her own responsibilities, and she will be able to better assist Aini. Cide grows up.

Then, Liang Bing realized something was wrong. The Demon Queen was able to connect to the Internet after leaving Luther, and the memory deleted by Angel Yan was immediately restored.

"Damn, this Bichi!"

Liang Bing got angry and directly activated the devil's claws. Now that she and Du Qiangwei have become sisters, she doesn't mind exposing her identity in front of Du Qiangwei.

So I didn't pretend to be captured by the devil's claws.

"Morgana?"

Angel Yan also recovered his memory while online, and then he was frightened.

Morgana is actually always by her side?

You must know that in Angel Yan's eyes, there is no plan for Tianzha's comeback. The biggest enemy in her eyes is the Demon Queen Morgana, the next level is the God of Death Karl, who is not very powerful, and the last is the Lieyang Civilization.

This feeling is like encountering the big devil blocking the entrance of the novice village just after leaving the novice village.

It's even worse than that, because the big devil can't enter the novice village, but Morgana has no such worries.

In one encounter, Angel Yan was directly crushed by Morgana.

Nowadays, Morgana's strength has been improved. After all, she has absorbed Luther's artifacts, and she has absorbed the most.

Because of its special constitution, it can accommodate more.

Many others were wasted.

Morgana also discovered this. At first, she was frightened and shivered when she saw the silver blade. However, after discovering that she could actually fly the silver blade away, Morgana realized that her calculation power was because of Luther. Become stronger.

Many times, a small difference in computing power is enough to make up for most conditions and create victory factors.

Not to mention that now Morgana is not as simple as improving a little.

She has even improved the power of her divine body, and the effect is very exaggerated.

Even Angel Yan felt something was wrong. She was fighting according to the data of Queen Kesha against Morgana in the sacred knowledge treasury.

It's just that the third-generation divine body can't support such a huge computing power, but it's impossible to lose so quickly?

So, something embarrassing happened.

Angel Yan didn't run away, and Morgana caught Demon No. 1.

Luther didn't know about this at first, until the Kryptonian civilization said that it had not detected the Demon No. 1 launching the Heavenly Punishment bombing, Luther took a curious look.

Oh, Angel Yan enjoyed the same treatment as Lena and was caught by Morgana.

The sacred knowledge treasury and the arsenal, who wouldn't be greedy?

"Hiss, it's too much."

Luther said, but what should he do? That's definitely impossible. Luther is still curious about how it will develop next. Will He Xi, the Pipi Xi, come alone to snatch people, or will he simply become the king of angels?

This kind of change is the fun for Luther.

As for Angel Yan, there is no benefit in helping her now, it's not worth it.

Of course, the most depressed person should be Pan Zhen. He just helped Angel Yan, but Angel Yan lost to Morgana and was captured by Morgana.

This made Pan Zhen not know what to do for a moment. If he had known that the Demon Queen was next to him, he would definitely not do this.

Chapter 236 Silence!

But if Pan Zhen wants to fight Morgana and rescue Angel Yan, Pan Zhen can't do it.

He is now the regent of Lieyang Civilization, not the former general.

Moreover, Lieyang Civilization has been in seclusion for a long time, and will not rashly start a war and provoke the demon civilization.

Pan Zhen does not have the power to decide on this kind of matter. Only Di Hongkun and Reina are qualified to decide whether to start a war.

Devil One.

"Queen, I advise you to obediently hand over the permissions and passwords to the sacred treasure house of knowledge and weaponry."

Liang Bing returned to Morgana's appearance and looked at the bound Angel Yan in front of her.

"Don't even think about it."

Angel Yan said coldly.

Falling into the hands of the demonic civilization, Angel Yan knew that he would no longer be able to survive.

Therefore, Angel Yan directly disconnected from the sacred knowledge network in order to prevent Morgana and the demon civilization from gaining her authority.

As the new king of angels, he fell into the hands of his greatest enemy before he even started the holy war.

Angel Yan felt that he was the most embarrassing King of Angels in history, bar none.

The only good thing about it is that she wasn't captured by Morgana during the war after returning to the throne.

Now, if Morgana hadn't forcibly invaded her super gene engine and stimulated her super gene engine to automatically shut down, Angel Yan would have deleted her dark data without hesitation.

Morgana also knew the possibility of this situation, so she forcibly invaded her super gene engine.

The current Angel Yan is similar to Rena who was captured by Taotie in the original plot. If he does not replenish energy to reactivate the gene engine, he is no different from ordinary people. At most, his body is strong enough.

Morgana's expression didn't change. Angel Yan thought that this would stop her from cooperating, so there was nothing she could do about it?

joke.

"Black Wind!"

Morgana calls out to her nightmare general.

Black Wind had been waiting for a long time and showed up immediately.

"Queen."

Heifeng said respectfully to Morgana, and then looked at Angel Yan eagerly.

"Leave it to you, you can mobilize 20% of the computing power of Devil No. 1... Forget it, the Queen will give you 30%. Her super gene engine is now forcibly shut down. Don't tell me you can't do it. "

Morgana said with a wave of her hand.

"Queen, this is the new King of Angels after all..."

Heifeng was a little embarrassed. He had never tried this job before. The most Heifeng could do was attack those super genetic warriors. Even the spiritual invasion of gods was restricted by Reina's authority.

Now that he wants to invade a king of angels, Black Wind really doesn't have that much confidence.

In particular, the angel civilization's brain evolution is the most advanced in the known universe, and their research on spiritual attacks is also among the best. After all, in addition to demons, the imaginary enemies of the angel civilization are also the god of death, Karl, who has turned into a phantom.

As for the phantom body, ordinary physical strikes are no longer effective, and can only be achieved by constructing mental strikes and mental suppression.

Although Black Wind also plays mental attacks, Morgana has never paid much attention to him. She worships fallen freedom and cannot research any technology. She only needs to target the angel civilization.

So Heifeng studied it bit by bit by himself.

"Don't worry, she doesn't have the support of the treasury of sacred knowledge now."

Morgana said.

Angel Yan's eyes turned cold, Black Wind?

Naturally, Angel Yan knew that this guy was one of the generals of the demonic civilization and Morgana's most capable subordinate. With the help of Black Wind, Morgana conquered many super warriors and made them degenerate into demons.

If it invades his own spirit, Angel Yan doesn't have much confidence.

Even though she has a secondary biological engine, this secondary biological engine is not a high-frequency secondary biological engine. It is difficult to say whether it can have any impact on Black Wind.

Facing the sub-biological engine and the void engine, the biggest problem is to use your own super genetic engine to detect each other, because this is equivalent to establishing a docking port. The sub-biological engine and the void engine can easily invade along this port. .

However, the secondary biological engine and the void engine are not completely invincible. It is as if Angel Yan has paralyzed her own super gene engine, and the computing power of her secondary biological engine has been greatly reduced.

Black Wind began to invade Angel Yan. The queen had said so, and Black Wind could only give it a try.

I hope it is true as the Queen said, Angel Yan is already dead.

Angel Yan forced himself to support himself, with a painful expression on his face.

[Start building a mental attack]

[Create a mental attack target: Angel Yan]

[The invasion begins...0.01%...]

Then it went down.

Heifeng was amazed. Even at this level, Angel Yan could still resist the invasion of 30% of Demon No. 1's computing power?

However, Angel Yan's persistence could not last long. After all, she had to use her own sub-biological engine to fight against a celestial-level supercomputer. The gap was too big. If she replaced it with Hua Ye's black hole engine, it would still be about the same. Even Ge Xiaolun's Xiong Core No void controller can fight against a celestial supercomputer.

[Start to suppress the target's thinking...]

Heifeng continued to operate. He built his own mental intrusion algorithm. Demon No. 1 invaded Angel Yan's mind based on this algorithm and looked for loopholes. Angel Yan relied on the sub-biological engine to support himself, repair loopholes, and fight offensive and defensive battles.

But it was impossible to persist in this kind of thing, and finally Angel Yan saw Ge Xiaolun appear in front of him.

"quiet!"

Ge Xiaolun shouted at her.

"The Milky Way..."

Angel Yan's eyes widened, and the secondary biological engine was directly suppressed and shut down by the anti-void ability. Angel Yan completely lost the ability to resist. She finally murmured, lowered her head, and fell into a deep sleep.

"Queen, I have made her unconscious."

Ge Xiaolun said flatteringly to Morgana.

"Yeah, good boy."

Morgana was very satisfied. Seeing that Black Wind could not attack for a long time, Morgana thought of Ge Xiaolun.

Now that Ge Xiaolun's Galaxy Power super gene was contaminated by Morgana, he began to learn how to develop it.

For example, the anti-void strike "Silence" is an ability that Ge Xiaolun is using very smoothly now.

It's just that if you want to develop it in depth, you need to obtain the permissions of the Super Seminary and Angel Civilization.

However, this solemn anti-void strike alone is enough to make Ge Xiaolun the most important general under Morgana.

Whoever you call is silent, this is simply not good for Morgana.

Especially after Morgana discovered that Ge Xiaolun's move was also effective on her, she became even more ecstatic.

Although she has no idea of dealing with Luther, after all, Luther is too powerful.

But Morgana also has to be prepared for when Luther turns against her, so she can be prepared.

Chapter 237: Putting Pressure on Luther

Morgana touched Ge Xiaolun's face, and the charming fragrance made Ge Xiaolun ecstatic.

He is now being controlled more deeply by Morgana every day with her charming fragrance. After all, he is also predicting and calculating the existence that may become the highest god in the known universe in the future. Of course, Morgana must do everything possible to control him.

To this end, Morgana also updated her charming aura that had not changed for tens of thousands of years.

Unfortunately, it didn't seem to have any effect on Luther.

After all, Luther's biological force field can repel things and influences he doesn't want.

For example, the biological force field that would affect his spirit and the like was developed by Luther, which is basically equivalent to a I-Xunsi force field.

In addition, he himself has strong spiritual power, which makes it even more impossible for him to be charmed.

Angel Yan is dreaming.

In the dream, Angel Yan returned to his childhood, a carefree life, and soon his childhood sweetheart died tragically, and a strange and beautiful blond angel came to him.

When Angel Yan was a child, his attitude toward angels was not the same as now. Instead, he was very hostile to angels.

The dream reminded Angel Yan of this memory. Although she had always kept it in her database, it was easy to see the past memories, and she could also view them from the first and second perspectives.

However, Angel Yan has not recalled the past for a long, long time, so this made Angel Yan obsessed with it from the beginning.

Until Holy Kesha's curtain call, Angel Yan felt something was wrong, but she couldn't remember what was wrong for the moment.

Heifeng's expression was strange, and the dream developed naturally, and then changed after a fluctuation.

Angel Yan did not become the new King of Angels, she met the God King Luther.

Holy Kesha gave the position of King of Angels to Ainecid, but did not elect a temporary King of Angels. He only made King Hexi of Tianji temporarily the regent.

It was under this situation that Angel Yan met God King Luther, and in order to ask God King Luther for help and save her sisters on Blue Star, she swore a guardianship oath to Luther in exchange for Luther's help.

"Damn, what kind of dream is this?"

Morgana was furious and scolded Black Wind directly.

"Queen, you can't blame me for this. This was Angel Yan's own dream."

Heifeng said he was innocent. He had done nothing and had been busy implanting malicious programs and psychological attacks. Unless the development of the dream was to deliberately make them hostile like Reina and Cheng Yaowen, Heifeng would not do this.

Therefore, the development of the dream is Angel Yan's own imagination.

Morgana looked at the unspeakable scene.

"Why is this little roast chicken thinking of such outrageous things?"

Morgana clicked her tongue and said, she really didn't realize it. Although Angel Yan was said to have the demeanor of a female driver in her speech, Morgana knew that she was just Yun Siji.

But now, these things are not something Yun Siji can play with.

Luther agreed.

Although he has no intention of helping Angel Yan, this does not affect his ability to eat melon.

So he watched Angel Yan's dreaming scene at the same time, and by the way, he also saw Ge Xiaolun's anti-void strike that made Angel Yan quietly.

I just don't know what Angel Yan was thinking when he lost consciousness.

at the same time.

Dead Song Academy.

"What do you want to see me for?"

After loading the black hole engine, Hua Ye felt confident. Although he would not dare to go to trouble Luther and the Kryptonian civilization, at least he would not be timid when attacking Mero Heaven. At least he would have the courage.

"The Taotie King Xihou has been equipped with a void engine and has become a mechanical version of the void warrior."

Death God Karl said calmly.

The Taotie King Xihao came to him and asked him to give him strength. The Death God Karl considered that the Taotie Civilization and the Giant Wolf Civilization would change their goals and attack Mero Heaven, so he naturally agreed.

The Taotie King Xihao, who had obtained the Void Engine, lost his body, but he didn't care at all.

He gained power after all.

"oh?"

Ruoning's eyes lit up. The Taotie King Xihao could load a void engine, so why couldn't he?

Carl, the God of Death, glanced at Ruoning, and Hua Ye also glanced at Ruoning unexpectedly, but Ruoning ignored him and looked at Carl, the God of Death.

"This Styx Void Engine is only suitable for mechanical life forms, Ms. Ruoning, please forgive me."

Death God Karl said calmly.

He gave Hua Ye the void engine because Hua Ye could not escape his control, but Ruoning was different. This was a female angel who had made her fortune from the angel civilization all the way to the present. Even if Ruoning was a fighting type and not a scientific research type, but she knows a lot.

Carl, the god of death, thought that if he gave Ruoning a void engine, Ruoning might be able to find the lowest level loophole.

"Really? It seems that the Taotie civilization will take the lead in the future."

Ruoning said with a sneer.

Karl, the God of Death, pretended not to hear.

"However, although the void engine is restricted, Ms. Ruoning, I can help you upgrade your divine body."

Then the God of Death Carl's next words made Ruoning's eyes widen in disbelief.

She originally thought that the Void Engine was the biggest gain, so she didn't care about Hua Ye's reaction. Anyway, Hua Ye must have known why Ruoning followed Hua Ye. In the face of greater interests, of course It's about stepping aside.

The Void Engine is a greater benefit. Ruo Ning may not know what the Void Engine is, but she must have known about He Xi and Holy Kesha's research on the Void Engine.

After Death Karl refused, Ruo Ning was of course upset. Unexpectedly, Death Karl gave a bigger surprise in the blink of an eye.

Compared with the Void Engine, which is unknown but definitely very powerful, the fourth-generation divine body technology is a powerful technology visible to the naked eye. Ruo Ning must also know the power of the fourth-generation divine body.

If she had to choose between the Void Engine and the fourth-generation divine body, Ruo Ning would definitely choose the fourth-generation divine body.

Because this is the most advanced immortal technology in the known universe. Even if Holy Kesha was destroyed, it was just that Holy Kesha was careless. Otherwise, no one could destroy Holy Kesha!

Hua Ye didn't say anything, even though the atmosphere became a little weird.

"Really?"

Ruo Ning asked.

"Of course it's true."

Death Karl nodded.

"I believe that after Ms. Ruoning upgrades her divine body, she will be able to better deal with the Melo Heavenly Court."

Death God Carl wants to speed up this war. He can't wait. Of course, he also wants to find Lena.

So he needs someone to put pressure on Luther and be able to withstand Luther's pressure.

The fourth generation divine body is such a trump card, giving Ruoning the courage to compete, instead of being afraid of Luther.

Chapter 238: Each with their own agenda

Karl, the God of Death, could tell that after Ruoning was decomposed and destroyed by Luther, he began to fear Luther.

Hua Ye also became wary of Luther because he knew very well how strong Ruoning was. At the very least, Hua Ye probably had no intention of confronting Luther.

"I asked, should this second-generation divine body of my king also..."

Hua Ye didn't hesitate and just reached out to ask for the benefits.

No matter what the fourth-generation divine body is, it must be very powerful. You can tell by looking at Ruoning's expression. Ruoning doesn't mind falling out with him at all and shows his sovereignty.

Ruoning didn't care about letting Hua Ye know about her scheming and calculations, but this was the first time she showed it so openly and impatiently.

"There are not enough materials. It took a lot of materials to load the void engine for King Hua Ye."

Karl, the god of death, said calmly to Hua Ye.

"Really or not, that one is for Ruoning's Fourth Generation..."

Hua Ye's eyes widened and he said.

"Hua Ye!"

Ruoning raised her eyebrows.

"You are already a third-generation divine body, and I am only the second generation. If you add a fourth-generation divine body, the black hole engine will be even more powerful. Then King Luther will solve it for you."

Hua Ye ignored Ruoning and said to the God of Death, Karl.

"King Hua Ye is not familiar with the fourth-generation divine body."

"You can get familiar with it slowly. Besides, don't you still have Ruoning to teach me?"

"I will upgrade King Hua Ye to a third-generation divine body."

Carl, the god of death, said.

This was his bottom line, but it was also the plan that Karl, the God of Death, had made from the beginning.

He knew that without giving Hua Ye some benefit, he would not be able to stand up.

Although, now Hua Ye has been firmly controlled by him, and Hua Ye can't help it.

"That's okay."

Hua Ye knew that Karl, the God of Death, would not give in anymore, so he immediately agreed.

"When does it start? You know, the sooner I take down those short skirts, the sooner I can help you deal with Luther."

"You can start anytime."

The god of death, Karl, didn't want Hua Ye to waste his time anymore.

"happy!"

Hua Ye said overjoyed.

The third generation divine body is much more powerful than his current second generation divine body.

Ruoning is the same, the fourth generation divine body, she never dreamed that it would be her turn.

Even though he knew that the God of Death, Karl, must have bad intentions and bad intentions, and that there might be countless backdoors, Ruoning didn't care about that. If he got this thing, he would be one of the top gods in the universe.

However, she didn't know the reason why Karl, the God of Death, would rather give her the fourth-generation divine body than give it to Hua Ye.

After all, Ruoning is also a king-level warrior. Although she is a king-level warrior in the old era, even Morgana is afraid of Ruoning's strength. You can imagine how powerful she will be once she obtains the fourth-generation divine body.

But compared to Hua Ye, it is not worth mentioning.

It can be seen from a series of events such as Hua Ye being deceived in the original plot, to gathering troops to attack the Melo Heavenly Court, and so on.

Although he looks miserable, he can be said to be a qualified king even if he has no knowledge, is stern, timid, and has all kinds of flaws.

During his reign, Hua Ye basically managed to balance the interests of most people, although it was at the expense of the female angel.

However, this is the key to Hua Ye's future success. Countless scumbags miss the order and era of Tiangong!

This can be said to be Hua Ye's personal charm, or it can be said that he unites and binds the interests of most people with himself.

As a villain, he has a clear purpose, clear thinking, and is flexible and flexible. Looking at it this way, he is simply much more powerful than Ge Xiaolun.

There are very few people who can do the above three points, let alone Ge Xiaolun, but Hua Ye has them all.

For Hua Ye, dignity is not a thing at all.

Karl, the god of death, calculated that if he gave Hua Ye his fourth-generation divine body, there would be a one percent chance that Hua Ye would escape control!

Don't think that one percent is insignificant. This is the fourth-generation divine body and black hole engine that Karl, the god of death, has set up countless backdoors. There is still a one percent chance of being out of control. You must know that Ruoning is even one in ten thousand. None.

Looking at it this way, of course the God of Death, Karl, would not give Hua Ye the fourth generation divine body.

Even when he gave Ruoning the fourth-generation divine body, it was not without the idea of letting Ruoning check and balance Hua Ye.

Ruoning wants to realize the order of the Heavenly Palace and the Heavenly Palace Era by controlling Hua Ye, but it is just a new Heavenly Palace Era where the male and female angels under her control coexist.

But such an ambition is simply impossible to realize without matching strength.

Now the God of Death, Carl, wants to give Ruoning such strength.

Not only is it a fourth-generation divine body, the god of death Karl also gave Ruoning Ansu Yinwu!

It's just an Ansu silver weapon like Sumali's Ansu silver blade. After all, the Ansu silver weapon is too hard and it's too difficult to load the engine. The god of death, Carl, doesn't have time to research what star destiny to give to Ruoning.

Even so, this dark silver weapon will increase Ruoning's lethality several times.

After all, Ruoning's wormhole technology is very powerful and can map silver blades in multiple spaces. One Dark Su Silver Weapon will turn into multiple Dark Su Silver Weapons for attack.

A few days later.

Ruoning, who had upgraded his fourth-generation divine body, and Hua Ye, who had upgraded his third-generation divine body, walked out.

"It feels so powerful. Ruoning, your fourth-generation divine body should be much more powerful than mine, right?"

Hua Ye felt his current body and felt very satisfied, then he said with some greed.

The ability in that aspect was enhanced according to his needs by the God of Death Carl, which was much stronger than the second-generation divine body before.

"How could it be, I will not betray you, Hua Ye."

Ruoning was much more confident.

"Oh, you don't even call me king anymore."

Hua Ye said happily.

"If you want, I will still call you King Hua Ye, and you are still my king."

Ruoning said.

"No need, you are already the fourth-generation divine body, and this king can't bear it."

Hua Ye said indifferently.

Anyway, as long as Ruoning is still by his side, it will be fine. Hua Ye knows very well that he can't leave Ruoning, but Ruoning can completely abandon him now and become the king himself.

"Don't worry, Hua Ye, I will never betray you."

Ruoning said very seriously.

"Then this king will believe it for the time being."

Hua Ye also said very seriously.

The next goal is to take back his own emperor's certificate, Tiangong!

Neither Hua Ye nor Ruoning had the idea of looking for Luther immediately after gaining power. They were not young people who acted on impulse, and they would not continue to look for trouble with Luther at this time.

On the other side.

"What do you want to see me for?"

Luther was enjoying Morgana torturing Angel Yan when he suddenly received a secret communication.

Chapter 239: No rabbit, no eagle

"I'm tired. How about I bring the angels to surrender to you? Anyway, you are now the power of the galaxy."

Hexi's voice came.

"I will send troops now."

Luther nodded.

"Forget it."

Hexi said quickly.

"So, what exactly do you want to say?"

Luther knew that He Xi was anxious, but he was not anxious.

"Did you know that when the Kamigawa Civilization and the Super Theological Academy cooperated with our angel civilization, they calculated through the big clock that no matter how many super divine civilizations there are now, no matter how these civilizations develop, they will eventually tend to be unified, so that's why there is The power of the Galaxy, but it wasn't called the Power of the Galaxy at that time, it was called the Power of the Divine River."

He Xi said with a change of subject.

"Why don't you put it more directly?"

Luther said boredly.

"Angels and Kamigawa cooperated and added their respective super genes to the original Power of Kamigawa. The difference is that the Angel Gene of Kamigawa Power is the gene of a male angel that I personally developed. It is full of kindness, integrity, and bravery. , dedicated..."

Hexi continued to tell the story.

"Stop, I know this, but this is impossible. I have eliminated the thought gene of the Galaxy Power as soon as possible."

Luther already knew what He Xi wanted to express. He just wanted him to accept the ideological genes among the underlying angel genes in the Galaxy Power. This is why the angel civilization is so obsessed with the Galaxy Power.

Such a future male angel, the future of angel civilization, with these ideological genes, will never treat female angels like Hua Ye.

This is the purpose and aspirations of the angel civilization, and this is why they sacrifice one after another, just for a future.

With the potential and future of the Galactic Force, this must be a future full of hope and unstoppable.

"It's actually quite good. Then you can do whatever you want to the angel."

He Xi looked at the information in front of him, frowned, and then said.

"If I want, I can do whatever I want to the angel now."

Luther said disdainfully.

"If it's such a boring thing, then don't continue talking. The Deno Civilization and Super Seminary have already given the super gene to me, and I am ready to mass-produce the Noxing God of War, the Light of the Sun, and the Power of the Galaxy. "

Hexi rolled his eyes. She really thought she didn't know the situation. Thinking about it, she knew that it was absolutely impossible to give the light of the sun and the power of the galaxy. The problem was that Luther already had the super gene of the power of the galaxy, so he really wanted to measure it. It's probably not impossible to give birth.

"Angel Yan was captured by Morgana."

He Xi sighed and said.

"Oh, I watched her being taken away."

Luther laughed.

Of course He Xi knew this. After all, before Angel Yan disconnected, the sacred knowledge treasure house had just been connected to the Internet and all her data had been uploaded. In addition, Angel Gene had He Xi's back door and secret hand. This was to avoid Ruoning. This happens again.

So He Xi had seen all aspects of what happened to Angel Yan.

She also didn't expect that Morgana would change her former name, Liang Bing, and then actually get involved with Luther.

You know, for the handsome Hexi, Luther is simply love at first sight, but after all, she has lived for a long time, and she can still suppress this feeling. If it were in her youth, Hexi felt that she was not Stay with Luther regardless.

Compared with Luther, Sumali, who forcibly kissed her, was just a piece of cake.

This made He Xi reluctant to meet Luther, as she was afraid that she would become obsessed with him.

Until the man-in-law went offline without saying a word and left her to retire, He Xi felt a big headache. Fortunately, the man-in-law had a conscience and did not directly let her become the regent. She probably knew that she was afraid of trouble and was worried that she would solve the problem in order to solve the problem. Sell the angel civilization directly to others.

However, He Xi always insisted that he originally planned to arrange a test for Angel Yan after she came back, and upgrade her sacred body at the same time, so that he could retire gloriously again.

Hua Ye comes back?

Chickens and dogs, dead bones in graves, and clowns are nothing to worry about.

Carl, the god of death?

It may be a little trickier, but the mental suppression algorithm is almost complete and should be able to be solved.

As a result, He Xi was in Bengbu. What kind of situation could have caused Angel Yan to meet Liang Bing and then be caught by Liang Bing.

Why didn't she know that Liang Bing was so much stronger than the man-in-law when they fought against each other?

Angel Yan probably didn't expect this, so he was caught by Liang Bing.

Now that Angel Yan is caught by Liang Bing, the odds are against him. Morgana covets the treasure house of sacred knowledge and weapons and will never let Angel Yan escape.

As for He Xi, she still has to sit in the Merlot Heavenly Court now, because Hua Ye has already brought the Taotie Civilization, the Giant Wolf Civilization and hundreds of scum to kill them.

This makes him powerless. As for sending a baby to save people, He Xi is not so arrogant yet.

She was still in her own territory, and because she bullied Hua Ye into not knowing how to use her own black hole engine, she was able to use a clone to tie or even suppress Hua Ye.

Morgana is definitely much more powerful than Hua Ye, and it is impossible for Hua Ye to be in the same situation.

"Can you help me?"

He Xi didn't say what kind of help he was helping, nor did he care about Luther watching Morgana capture Angel Yan. Pan Zhen was also there at the time. Did she still care about the two great gods and the God King not helping him?

"No, this king has nothing to do with the angel civilization, but with Liang Bing. Even if this king doesn't like her, he can't do anything to her for someone he has no relationship with."

Luther said with a smile.

What kind of relationship? Isn't it just wanting an angel's oath of protection?

He Xi certainly understood. After all, after the establishment of the sacred knowledge network, the situation of Angel Leng and others was uploaded to the network, and He Xi certainly knew what Luther did to Angel Leng and others.

For this kind of thing, He Xi didn't feel particularly angry. After all, He Xi had seen more excessive things. What's more, Luther only did it to Angel Leng, while Angel Lingxi, Angel Yitian and Angel Weifeng were still fine.

"You don't necessarily have to have a relationship to help, His Majesty the God King, why don't you set a condition?"

He Xi tried to ask.

"A future Angel King, what is the standard in the known universe that meets the conditions, this king is still unclear."

Luther said with a smile.

He Xi was not surprised that Luther knew that Angel Yan was the new Angel Queen. Angel Yan had revealed her true colors, so she knew it.

He Xi felt a headache.

"Okay, Your Highness King Tianji, why don't you think about it for a while and then contact me again."

Luther hung up the secret communication after saying that.

Chapter 240 He Xi's Thoughts

Luther has no good or bad feelings towards angels, at most he just likes a few of them.

For example, He Xi is a love-brained + face-obsessed person.

Although He Xi is very smart, she is a love-brained person.

Although He Xi is one of the top sages in the known universe, she is a love-brained person.

Although tens of thousands of years have passed and she seems to have grown a lot, she is still a love-brained person.

He Xi has not changed her face-obsessed attitude.

Regarding He Xi's request for help, Luther knew that she could not leave Melo Heaven. Now Melo Heaven has become nervous because of the incident of Holy Kesha, not to mention Hua Ye's wolfish ambitions, and the army is about to drive out of the Angel Nebula of Melo Heaven.

Therefore, He Xi will definitely ask Luther for help, but if Luther does not help, He Xi will not forcefully rescue Angel Yan.

After all, he is just a temporary Angel King who has not come back to pass the test. He Xi cannot make the decision to sacrifice the overall situation for Angel Yan.

In the original plot, Angel Yan could sacrifice so many angels, and He Xi could save the overall situation without any problem by sacrificing her.

"Really, you are an old lady who has lived for tens of thousands of years, and you don't even have this bit of face."

Luther shook his head. He Xi wanted him to help, and hinted that as long as he accepted the thought gene in the underlying gene of the Galaxy Power, the Angel Civilization would have whatever he wanted!

This temptation is great. After all, there are tens of thousands of old angels, including retired old angels, which is about nearly a million short skirts.

The most stupid and most drunken emperor in the history of human civilization and all the emperors combined probably played with less than half of this number of women.

The old man Huangdi alone accounted for 3,000, but it was still a drop in the bucket.

What is the concept of nearly a million? If you roll around, I'm afraid you will have to become a monk in the future and regard women as red-faced skeletons, right?

Fortunately, Luther is not the kind of greedy and lustful person. He is very picky.

The Angel Civilization only likes a few, and the rest are troublesome for Luther.

Fortunately, there is still a Kryptonian civilization.

When Luther left, the Kryptonian civilization grew wildly, but it was not too wild, after all, Luther left a clone.

They adapted to the life in the known universe according to the memory set by Luther. Those discomforts, unfamiliarities and incongruities made them think that it was the difference between the environment of the known universe and the unknown universe, so they didn't take it seriously.

When Luther descended on the Super Seminary Universe again, all this was not a problem. With Luther's divine power, he directly modified these discordant places.

He also modified the Kryptonian civilization according to his own will, and now the Kryptonian civilization has become more advanced than before.

If the previous Kryptonian civilization relied entirely on the dozen or so cutting-edge war gods and a large number of super soldiers, then the current Kryptonian civilization really has the strength to sweep across the known universe.

After all, the top gods of the Kryptonian civilization are now equipped with void engines.

There is no way, the version has been updated, and now the most fragrant is not the super gene of the No Star War God, but the void engine.

Of course, it doesn't mean that the No Star War God is no good. This top super gene is still good.

Especially the combination of No Star War God + Void Engine, it is simply a king-level combat power, a top god.

Even if the Void Engine that Luther gave them is only 10 frequencies, it is enough for them to beat most of the gods in the known universe. After all, their main body is still the No Star War God.

Gods with fourth-generation divine bodies have to tremble in front of them.

The 10-frequency Void Engine can already add void energy to their own God-killing Weapons, turning them into Void Weapons, and Void Weapons can destroy the atoms of the fourth-generation

divine body, and can also cause "critical strikes + true damage + severe injuries + weakness" to all enemies below the fourth-generation divine body!

In addition to the God-killing Weapons and the God-killing power of their super genes, the attack power is definitely full.

And it is not easy to be directly stimulated by the Void Definition to forcibly shut down the gene engine.

This is very Cao Dan, and I don't know why the means against invasion, if there is no way to solve it, just forcibly shut it down, won't it still be slaughtered?

Can't you learn from him and install a self-destruct program?

The tens of thousands of third-generation super soldiers of Krypton Civilization are enough to satisfy the needs of Angel Civilization for finding a male god, right?

After all, the third-generation super soldiers are real male gods for Angel Civilization, and they will not rot into soil.

Moreover, the warriors of Krypton Civilization also have wings, although they are wings of the same color as metal, but they can also be regarded as male angels.

From this point of view, his Krypton Civilization and Angel Civilization are simply a perfect match!

Therefore, He Xi, the old goblin, probably has similar ideas, but she is still very confident in herself now. She has to wait until she is forced to perish with the black hole by Hua Ye's black hole engine before she thinks of his retreat.

Morgana's capture of Angel Yan must be a pleasant surprise, because at that time, the surviving angels will only have a few places to go.

The first is that He Xi may leave some arrangements before jumping into the black hole. After all, Angel Yan is not the king of angels now. She has to worry about it, and she may not jump into the black hole.

The second one is Fraser, this is inevitable.

The third one... those young angels of Angel Yan's faction have not been killed or injured by her in this timeline. Maybe they will bring people to Blue Star to find Angel Yan.

No matter which one, for Luther, it is a good opportunity to swallow the angelic civilization.

After all, even Merlot Heaven was lost, and the spirit of the angelic civilization was directly hit to the bottom.

In addition, they are mainly young angels, and even now Hexi seems to have called on the old angels in her to return, but upgrading and transformation will take time, unless Hexi does not mind exposing the unlimited resource capabilities of the sub-biological engine.

But He Xi still has to worry about it.

Merlot Heaven.

Since the death of Holy Kesha and the capture of Angel Yan, He Xi had to go from his retirement cabin on the planet Urling to the Mero Heavenly Court.

Although he is back to his old place, Hexi only has memories of this place, especially the memories of being with the man-in-law.

“This guy really doesn’t let the rabbit fly before he sees the rabbit.”

Hexi felt regretful that he failed to sell even though he was selling face.

"Your Highness Hexi, the Styx Legion composed of the Taotie Civilization, the Giant Wolf Civilization and other aerospace civilizations have arrived at the Angel Nebula."

A group of angels walked in respectfully, and then the female angel at the head said to He Xi.

"It came so quickly."

He Xi nodded.
