

Kryptonian 24

Chapter 24 Infiltrating Investigator

"BOSS."

Michelle came in with a beautiful girl with burgundy hair.

Luther's eyes fell on the girl with burgundy hair.

Luther's perspective eyes made it easy for him to see through the other person's workplace OL uniform.

Her physical strength was much stronger than Michelle's, and she was not an ordinary person.

Oh, no uterus?

Luther looked strange, and immediately knew the other person's identity.

"Who is she?"

But even though he knew, Luther still pretended not to know and asked.

"BOSS, she is your assistant, Natalie."

Michelle has been so busy recently that she only sleeps 4 hours a day. There is no way. Luther doesn't care about things and is immersed in the research room. Michelle is the second in command of the Imperial Company. Various orders, business orders, medical insurance systems, and even cross-border trade are all piled up.

In this case, Michelle really doesn't have the energy to take on the position of Luther's assistant secretary, so she can only find someone who can help her share the burden through recruitment.

As for whether this would push the boss to another woman, Michelle was very confident. After all, she was younger than this Ms. Natalie, and she was more beautiful and tall.

Considering that Luther had been too lazy to do anything to her for such a long time, Michelle probably didn't need to worry that her boss would take the initiative to do anything to Natalie. If Natalie wanted to take the initiative to do something, she would know it by referring to her previous experience.

In addition, because of the development of the business of the Imperial Company, Michelle met Ms. Pepper of Stark Industries, and after understanding the relationship between the other party and the great genius and playboy Tony Stark, Michelle suddenly got it.

Since she couldn't take the initiative to make Luther have ideas about her, it would be better to become a woman that Luther couldn't leave.

Unfortunately, she didn't know that she was just a growth observation object used by Luther to learn how to manage for Megatron. Luther never put all his eggs in one basket, not to mention such an important position as the executive vice president.

If Michelle had any accidents, would the Imperial Company be paralyzed?

Luther is too lazy to handle so many things by himself. Even if he has a super brain, the processing speed is definitely tens of thousands of times faster than Michelle. However, as the saying goes, no one is born to like working. Being able to eat and drink without moving is the ultimate pursuit of everyone.

What's more, for money, something that has no meaning to him now becomes a super worker. I'm afraid there is something wrong with his super brain.

So in order to prevent this from happening, Megatron must learn how to manage. It is a strong artificial intelligence, and the speed and efficiency of learning are very fast. Even Megatron can find loopholes and shortcomings that Michelle herself has not discovered.

Even if Michelle has done well, it is still far behind the strong artificial intelligence.

"Natalie, are you applying for the position of senior vice president?"

Luther nodded, and Natalie observed Luther.

"Hello, sir."

Natalie is the Black Widow Natasha Romanoff. Her mission is to sneak into the Monarch Company. Nick Fury asked her to investigate Luther and collect the black material of the Monarch Company.

Of course, Black Widow has more than one goal in this mission. After all, she is too capable and powerful. She is Nick Fury's trump card, so the more capable she is, the more work she can do.

She needs to observe Luther, a genius who lives in seclusion and doesn't like to show up, closely and carefully.

Nick Fury has no way to recruit and question Luther, and his short appearance on TV news can't let psychologists and analysis teams conduct much useful intelligence analysis on him. This stuff requires a lot of data and information to establish a thinking model.

Black Widow is now playing the role of such an observer, collecting various details of Luther in daily life, and then analyzing and evaluating Luther's personality and psychology.

In order to prevent accidents, the cameras carried by Black Widow are not connected to the Internet. Anyway, the recordings help her to study and analyze Luther repeatedly, and can also be handed over to the intelligence personnel and psychologists of SHIELD for analysis.

"I just looked at your information. You have been a model and can speak multiple languages... How do you say lurking in Russian?"

Then Luther suddenly said something that seemed irrelevant.

Black Widow's expression did not change at all, even her pupils, which are the most reflective of a person's inner feelings, did not change at all. She answered Luther's question in Russian calmly.

This was not over yet, because Luther then spoke to her in Russian. Black Widow found that Luther's Russian was very fluent, and he also had accents from various places, which almost made her unable to keep up. Then Luther switched to various languages.

Even small places such as Egyptian, a language that has been passed down from a certain tribe in Africa, and the devilish Wenzhou dialect of the Celestial Empire were all there.

The latter Black Widow could not understand at all.

It made Luther a little regretful. He still wanted to see Black Widow speaking Wenzhou dialect. After all, even the male protagonist in Endless could not speak Chinese.

Black Widow had a new understanding of Luther's genius, and Luther's personality showed that he was not a person who easily believed in others, and he was very confident.

"Very good, Ms. Natalie, you passed."

Luther and Black Widow's series of show-off conversations in multiple languages stunned Michelle. Michelle was already an elite who graduated from a higher education institution and was confident that she could crush a large number of people, but in this regard, she could only say that she could barely speak authentic London accent and American English.

"Thank you very much, Mr. Luther."

Black Widow smiled and said.

This was her habitual means of testing to see what kind of person her target was.

It is impossible for a man to be a gentleman. Even if he disguised himself well, Black Widow could observe some clues and traces.

As a result, she found that Luther really seemed to have no idea about her. His eyes were very calm and he did not stay on the parts of her body that attracted attention.

"Then, you will be responsible for part of the work in the future."

Luther continued.

"I have arranged it."

Michelle said hurriedly. If Luther arranged it, he might have to share her duties.

Now Michelle has many part-time jobs.

They are the highest managers of each department, such as CFO (Chief Financial Officer), COO (Chief Operating Officer), CHO (Chief Human Resources Officer), CIO Chief Information Officer, CMO Chief Marketing Officer, CBO (Chief Brand Officer), CHO (Chief Human Resources Officer), CNO (Chief Negotiation Officer), CPO (Chief Public Relations Officer), CQO (Chief Quality Officer), etc
