

Kryptonian 241

Chapter 241 Liang Bing's Guilty Conscience

This is also what she had expected.

It's just that the angels recalled in advance were to test Angel Yan. Now that they are no longer needed, they will be used to fight Hua Ye.

Hua Ye will definitely be eager to take back his Tiangong.

This is urgent.

Even with the help of the Styx Nebula, Hua Ye still has to spend time to summon the Tianscum, because he also needs his own army.

Otherwise, what kind of king is he?

He Xi is naturally prepared in this regard. The Tianji Cloud Computing Group can even accurately calculate how many Tianscum will be summoned around Hua Ye. At this critical moment, only those Tianscum without a family will respond to Hua Ye's call.

As for the Tianscum with a family, they are all in a wait-and-see state, and it is not ruled out that they will send some Tianscum to help.

The way of survival of the family has always been like this.

If He Xi in the original plot still tried to test and study Hua Ye's black hole engine through a series of weakness, then He Xi no longer has this intention.

She had to quell the riot as soon as possible, and then rescue Angel Yan. Although Morgana might have already run away with the demon civilization by then, she still had to be rescued.

"Then do it directly. I want to make them lose 90% before they reach the defense line!"

He Xi said domineeringly.

"Yes, His Highness He Xi!"

The old angels were very excited, and the young angels felt that His Highness He Xi was worthy of being the King of Tianji, as domineering as Queen Kesha.

In fact, it was He Xi's specious imitation of his best friend.

When the fight really started, He Xi would still hide behind his fourth-generation divine body clone and do some micro-manipulation.

...

"How is Angel Yan doing with you?"

However, at night, Luther asked Liang Bing after shaving ice.

It was still okay to comfort him, although Luther knew Angel Yan's situation very well.

"Why, do you also want the sacred knowledge treasure house?"

Liang Bing was already drowsy, and when she heard Luther's words, she immediately stood up.

She was having a headache about this matter. Angel Yan was completely unmoved. She arranged so many methods, but the result was that the cracking was not as good as Angel Yan's own closure.

This matter was quite strange. Liang Bing didn't know what happened. Why Angel Yan could constantly close the invaded places.

But she couldn't detect any countermeasures from her. Fortunately, Ge Xiaolun's anti-void attack was still effective. Every time Angel Yan was hit by the anti-void attack, the progress could be 1% deeper.

But this was still too slow. Angel Yan was too tenacious. If the energy was exhausted, she would die completely and lose her value.

So Morgana had to give her energy to maintain her minimum divine body needs.

But the energy given was also used by Angel Yan to fight against the invasion without hesitation.

Now it is trapped in a dead loop.

"Do you think this king will lack a sacred knowledge treasury?"

Luther said disdainfully.

"I know, you are the king of the gods, of course you don't lack it."

Liang Bing rolled her eyes. Isn't that greedy for Angel Yan's body?

As for the king of the gods, it is because there are too many divine bodies in the Krypton civilization.

The heavenly soldiers and generals with silver armor and silver wings are all third-generation super warriors, and there are a lot of them. There are also a lot of third-generation divine bodies with gold armor and gold wings.

At least Liang Bing has never seen so many third-generation gods gathered together, and it is hard to imagine how strong Luther is to suppress so many third-generation gods. The sovereignty of gods must be guaranteed to be absolute.

And the spreading divine power will undoubtedly form a split. Otherwise, when Morgana was still a third-generation divine body, she could obviously help the sword demon Atuo upgrade the third-generation divine body. Why didn't she do that?

Obviously, the god of death Carl has countless resources at hand. After all, no one can compare to the big clock in terms of collecting resources, but he only has Snow, a divine body?

Because they all have to maintain the uniqueness of divine power!

The Lieyang civilization is special. In such a large angel civilization, only He Xi is a divine body, and Ruo Ning is also a divine body. Then, no other female angels have become divine bodies after her.

The word divine body is a taboo.

But in the Kryptonian civilization, Liang Bing saw twenty third-generation gods with golden armor and golden wings when she went to the Supreme Heaven!

I don't know if the third-generation gods in the entire known universe combined can match the number here.

Although it's a bit exaggerated, you can imagine Liang Bing's shock.

If she knew that these third-generation gods were all the gods of war on the No Star, she would probably be more than just shocked.

"How about I help you redefine Angel Yan's thinking?"

Liang Bing said to Luther tenderly.

"You still have to be able to get something for nothing, you are worthy of being a devil."

Luther sneered.

I will help you suppress Angel Yan's sub-biological engine, and then you will reap the benefits, and then use my technology to help me redefine Angel Yan's thinking...

"This kind of thing is not good for dirtying the hands of the King of Gods, just pretend you don't know, it's all Morgana's fault."

Liang Bing said with a sneer, she knows a lot.

Luther was stunned, there is such a way to play?

It sounds tempting, but Luther is not hungry and thirsty, so there is no need to use such despicable means.

"Forget it, if you do that, I will feel like I am just like you, and I am in cahoots with you."

Luther said.

"Aren't we in cahoots with you now?"

Liang Bing moved.

"No, if the water is clear, there will be no fish... By the way, you won't use my king's things to test genes, right?"

Luther suddenly asked.

"Fuck you, Queen, could I be such a shameless and despicable person!"

Liang Bing was furious. Even if she really did it, Liang Bing would never admit it.

Because she couldn't let others think of herself as a sampler, and she didn't want to be thought of as a sampler on her own initiative.

"My gene energy level is so high, so I really haven't thought about researching it?"

The corner of Luther's mouth raised. He could see clearly that Liang Bing was trying to decipher his genes and then use them for Sword Demon Atuo and the others.

But even containment is a problem, unless she uses herself as a sampling machine for testing.

God itself is the most sophisticated analytical instrument.

"No!"

Liang Bing yelled guiltily, and then stopped mentioning Angel Yan.

Luther naturally did this on purpose.

Now the plot has changed too quickly. Hua Ye joined forces with the God of Death Karl earlier than the original plot, and also attacked Merlot Heaven.

This time is at least a year and a half early, which is the period when Ge Xiaolun's original plot was lying in the pit.

But now that Blue Star has lost the power of the Galaxy, they are secretly carrying out the transfer of divine power without telling the Kryptonian civilization.

They don't want the Kryptonian civilization to know that they have a backup of the Galaxy Power super gene, even though it is something from the Super Seminary.

Chapter 242 Galaxy Power·Zhao Xin

However, they are now a subsidiary civilization of Krypton civilization. If they do not give the backup of Galaxy Power to Krypton civilization, it is unreasonable.

Therefore, the transfer of divine power cannot be handed over to an ordinary person. It must be someone who was a super soldier before, so that it can be said that the other party's gene engine has been upgraded.

The candidate was Liu Chuang at first, but Liu Chuang did not pass in the end.

On the one hand, Liu Chuang is already the God of War of No Star. If Liu Chuang is equipped with the super gene of Galaxy Power, it will be a huge waste of resources. Combining a God of War with a main god is also a strong enhancement, but it is too wasteful.

And compatibility is also a problem. Neither the gene engine of the God of War of No Star nor the gene engine of Galaxy Power is so compatible with other things.

On the other hand, of course, Liu Chuang's review was not passed. Some things will always exist after they are done. Even if Liu Chuang has changed his face and started a new life, it does not mean that what he did before does not exist.

Especially, now that Blue Star has become a subsidiary of Krypton Civilization, for some indescribable reasons, Blue Star has temporarily become an alliance system led by Dahua. Dahua has no intention of monopolizing power, but has set up a parliament.

Representatives of hundreds of countries have one seat for a member of parliament, while Dahua has ten seats for a member of parliament, and the chairman of the parliament is held by a representative of Dahua for life.

Dahua has never been too greedy. If it were other countries, it would have to let half of the seats in the parliament be representatives of its own country.

With the support of Krypton Civilization, Dahua is finally no longer able to rely on Denor Civilization like before, and completely does not understand the order and various things of the

known universe, how strong the enemy is, how strong the angels are, and how strong the Krypton Civilization is.

I don't know whether this decision is right or wrong, and I don't know how to analyze the situation.

Krypton Civilization shared part of the information of the known universe with Blue Star, and Dahua had its own view of the situation and intelligence model.

Denor Civilization cannot bypass Blue Star to privately decide the ownership of the galactic power, unless what they said about being completely integrated into Blue Star is false.

Moreover, the will of the super soldiers is mainly based on Dahua, and they even hate calling themselves by their genetic code names.

Therefore, after Liu Chuang's choice was rejected by Dahua, considering the special identity of Cheng Yaowen, the final candidate became Zhao Xin!

Galaxy Power · Zhao Xin!

Approved, Zhao Xin's performance is very good. The street urchin in the past was just chivalrous, but he didn't commit any crimes. And when it comes to fighting... it can only be said that there is no harm without comparison.

Compared with others, he is not lacking in courage at all, and is even much stronger than the Galaxy Power, which contains courage and fearlessness. People can't help but wonder whether the definition of courage and fearlessness of the Angel Civilization is different from the courage of the Dexing Gun of the Denor Civilization.

If Zhao Xin becomes the Galaxy Power, there is no need to worry that he will be a deserter. You have to arrange someone to watch him and don't let him, a leader, run to the enemy camp and lead the charge.

Du Qiangwei, the chairman of the Blue Star Parliament, visited the Supreme Heaven of the Krypton Civilization at nine o'clock in the evening.

As for Du Qiangwei becoming the Speaker of the Parliament instead of Qilin, on the one hand, Qilin herself felt that she did not have the ability to be the Speaker of the Parliament, and on the other hand, it was because of the special identity of Du Qiangwei.

She was from the Denor civilization, and she was the woman of the God King Luther. Even though it seemed that she could not even have the position of a princess, after all, Du Qiangwei thought she was just a bonus, but based on this special identity.

In the end, Dahua decided to let Du Qiangwei serve as the lifelong Speaker of the Blue Star Parliament, which was considered to express trust in the Denor civilization and further strengthen the connection between the two sides.

"Your Majesty the God King."

Du Qiangwei said very respectfully after seeing Luther.

The part of information shared by the Krypton civilization made Du Qiangwei and Blue Star clearly understand what gods and super warriors are, and the disasters on their Blue Star were just minor fights.

If these gods get serious, what star-destroying weapons, what blasting the solar system, and instantly extinguishing thousands of stars in the galaxy are all trivial.

And these things are fatal to them, no matter which one.

After clearly recognizing that the gap was so big that it was not enough to win with a will to die, but that even if the whole world was willing to die and perish together, people might not even glance at it, Blue Star had quickly changed its positioning and thinking.

Du Qiangwei knew very well that the original situation on Blue Star would probably last for hundreds of years, because Luther told her that Blue Star was the training ground for the gods, so there would be no weapons of mass destruction, and the means of the gods were relatively mild and within the tolerance range.

Hundreds of years of blood and fire, forging the future gods and super soldiers, such a big move shocked Du Qiangwei and made her feel powerless.

Du Qiangwei was grateful from the bottom of her heart to the God King Luther and Kryptonian civilization who saved Blue Star from this quagmire.

But the only thing she could repay was this body and some information.

"What's the matter?"

Luther stretched out his hand, and Du Qiangwei consciously stepped forward and sat in his arms.

"...The Super Seminary is cooperating with us and intends to transplant the Galaxy Power super gene into Zhao Xin. If your majesty wishes, we can arrange for Zhao Xin to come to the Supreme Heaven for testing."

Du Qiangwei said without any hesitation.

Luther was a little surprised, but after thinking about it, it seemed normal. Dahua probably felt that it was impossible to hide it from Kryptonian civilization, so it was better to show loyalty. Du Qiangwei, on the other hand, could not convince herself to hide this matter.

As for Zhao Xin, they felt that Kryptonian civilization would not cut Zhao Xin into pieces for the super gene of Galaxy Power.

At that time, Zhao Xin only needed to cooperate with the research, and they did not have the resources to cultivate Zhao Xin's growth. If Kryptonian civilization could look up to Zhao Xin, it would be better to cultivate Zhao Xin.

After understanding the situation of the known universe and what the Angel Civilization and Kryptonian civilization represented, Dahua lay down very skillfully.

After discussing with the world's high IQ talents, they finally came to the conclusion that they should be obedient, obedient, and obedient.

Don't hide anything. Kryptonian civilization is now the thickest thigh in the known universe, and Blue Star is so lucky that it can hold such a thigh that even Taotie civilization cannot compare with. Just get whatever you want and don't worry about anything else, as that will only give people a bad impression that you are indecisive.

Chapter 243 Small shock and big shock

Du Qiangwei thought so too, so she said such things directly.

"very nice."

Luther opened a screen, and Du Qiangwei was shocked when she saw the screen.

She saw on the screen that they were discussing the transfer of the divine power of the Galaxy Power and the candidates, as well as deciding whether to tell the Kryptonian civilization, and Lianfeng, who planned to hide the Kryptonian civilization, and their private conversations.

There were no secrets, everything was seen through the screen in detail by Du Qiangwei.

It also made Du Qiangwei deeply aware of the gap between them and the advanced super-god civilization.

This gap is a huge gap in information, just like the Gulf War.

"You haven't learned to block your own dark plane information. Even if the Deno civilization has Deno No. 3, this technology is just a toy in front of me."

Luther said calmly.

Just kidding, Liang Bing can often enter and leave the Juxia without Demon No. 1 and under the surveillance of Deno No. 3, let alone him.

The Deno civilization was very strong back then, but their technology has lagged far behind, because they were more serious than seclusion. Dukao even thought that they were still the pinnacle of the universe. With the power of the Milky Way, the Nuo Star God of War and the Light of the Sun could I want to use "God-killing Deterrence" to scare Holy Kesha.

This kind of behavior is just like the indigenous civilization that has just lit up firearms and is confident that it is standing at the top of the universe, and then threatens the aliens coming across the star sea with firearms.

The most fatal thing is that Dukao doesn't feel that way yet, and he doesn't know where his confidence comes from.

The entire Super Seminary universe has always emphasized the idea of being closed to the outside world and being beaten if you fall behind.

Including the Fierce Sun Civilization, which took one step at a time, ate melons until it was gone, advocated degenerate freedom, did not research any technology, destroyed the Holy Kesha and left it to pieces, leading to the Demonic Civilization that was suppressed as soon as the Void Age came out.

Dukao was first frozen for so many years, and then stayed on the Blue Star. He did not lead the development of the Blue Star civilization. He just watched that for thousands of years, only the God of Death, Karl, had been studying the void and various advanced knowledge.

Therefore, it is not without reason that the heroic companies later are called Angel Company and Carl Company. They deserve to win because they have been working hard.

If Ge Xiaolun hadn't been so big as the Galaxy Power, he would have been suppressed to death. With tens of thousands or even hundreds of thousands of years of study and accumulation, why can you surpass and defeat them all at once?

Even the power of the Galaxy was created through the accumulation of the Kamigawa Civilization and the Angelic Civilization.

Du Qiangwei didn't know what to say. She could only be glad that they made the right choice and did not hide the Kryptonian civilization.

Otherwise, if nothing is said and the Kryptonian civilization knows everything about it, what will happen then?

"What would you have done, Your Majesty, if we hadn't said anything?"

Du Qiangwei couldn't help but ask.

"It won't do anything. The most it can do is exclude Blue Star."

Luther said with a smile, Du Qiangwei has become very good now, she must have learned a lot.

Du Qiangwei worked hard in obscurity.

Without even thinking about it, Du Qiangwei knew that this kind of thing would definitely not be beneficial to the Blue Star civilization. Maybe the technical poverty alleviation of the Kryptonian civilization would be cancelled, or maybe the Kryptonian civilization planned to unify the known universe and put the Blue Star civilization under control. exclude.

After all, why should a civilization with alien intentions help them?

"Have we passed the test?"

Du Qiangwei asked.

"God, there is no shortage of time."

Luther just said, Du Qiangwei understood that God has a lot of time, so there will be many tests.

If you make the wrong move in these tests, it will probably be unacceptable to Blue Star.

Fortunately, I can listen to the heavens, face the Holy Master directly, and even listen to the government behind the curtain with the God King.

This is the biggest advantage. I can bring the God King's information back and let a group of people analyze the God King's joys and sorrows. Even if the God King knows that they are doing this, they will not care.

Luther contacted Liang Bing.

"What is it, my respected King of Gods?"

Liang Bing's gentle tone came, and then Luther changed the angle of the secret communication.

"Depend on!"

Liang Bing suddenly became extremely powerful, this guy is picking weeds again!

rose! My rose!

pain! The pain penetrates the heavenly spirit!

Heart! Heartbreaking!

Although this is not the first time for Liang Bing, and he has played the Ice Sculpture Rose game with Luther and Du Qiangwei, Liang Bing still finds it difficult to accept every time he sees it, let alone from this perspective.

Du Qiangwei said hello to Liang Bing indifferently.

"What are you doing? I'm very busy."

Liang Bing calmed down his emotions and said speechlessly.

Qiangwei doesn't care anymore, she's just hanging on to it.

"Nothing, I just want you to help me tell Ge Xiaolun that this is how Du Qiangwei uses it..."

Before Luther finished speaking, Liang Bing hung up the secret communication with a sigh.

How could you tell Ge Xiaolun about this kind of thing? Wouldn't that stimulate Ge Xiaolun's betrayal?

Although Ge Xiaolun has fallen now and the angel's thought genes have been contaminated into demon genes, Liang Bing can't say that Ge Xiaolun has no feelings for Du Qiangwei at all.

Not to mention letting Ge Xiaolun see it, telling Ge Xiaolun might irritate Ge Xiaolun.

Du Qiangwei said nothing.

She had no thoughts about Ge Xiaolun for a long time. She might have had them at first, but they were all wiped out by Ge Xiaolun's performance again and again.

What's more, Luther didn't let Ge Xiaolun hear or see him. He just contacted Liang Bing, which was probably just a tease.

It is impossible for Liang Bing to relay Luther's words.

Luther said, Ge Xiaolun still wants to hear the voice? He thinks beautifully!

Just make up your own mind, but Liang Bing will definitely not tell Ge Xiaolun about this, and Luther is not in a hurry.

"I have already realized the mass production technology of Nuoxing God of War, and the next step is the mass production technology of Galaxy Power, so you don't need to worry about what I will do to Xin Zhao, because soon, Galaxy Power will be worthless."

Luther said to Du Qiangwei.

Du Qiangwei's eyes widened as she heard such an amazing thing.

"Your Majesty, is this true...is it...didn't you mean..."

Du Qiangwei couldn't react for a moment and said with difficulty.

"Of course it is true. To you, the three major god-making projects of Galaxy Power may be very high-end, but to me, they are just things that can be easily analyzed."

Luther said with the corner of his mouth raised, this news may bring a small shock to the Deno civilization.

The reason why I say Xiaoxiao is, of course, because they may doubt the authenticity of this matter. After the Galaxy Power is actually implemented, they will be greatly shocked.

Chapter 244 Lianfeng: Impossible, absolutely impossible

Du Qiangwei returned to Blue Star.

"How is it?"

Blue Star had already told everyone about the Galaxy Power·Zhao Xin, so naturally they were concerned about what God King Luther would think.

Du Qiangwei shook her head.

Lianfeng only knew about this now, there was nothing she could do, because she wanted to secretly transfer the divine power without telling the Kryptonian civilization, and the people of Blue Star did not want to die with her.

"Aunt Lianfeng, the Kryptonian civilization saw everything clearly."

Du Qiangwei still respected Lianfeng, but her thoughts were biased. She believed that Lianfeng was really thinking about Blue Star, but this kind of thing... it can only be said that her identity was very embarrassing.

In addition to Dahua, there were also people from Blue Star who said they wanted to monitor the people of the Denor civilization, and some said they wanted to force the Denor civilization to reveal its technology.

Even Dahua had similar ideas and discussions, of course, not so explicit, but only proposed to establish a "regulatory department".

To prevent the problem of some privileged organizations from having too much power.

They almost named the Black Great Wall Base.

Lianfeng also knew that her decision to conceal the transfer of divine power also made Dahua feel uneasy.

However, she also had her own difficulties. The power of the galaxy was the future of Blue Star. They were just handing over the future of Blue Star.

"What?"

After hearing Du Qiangwei say that their every move was under the control of Kryptonian civilization and was seen clearly by Kryptonian civilization, Lianfeng was shocked.

"Dark data information reading, but..."

Lianfeng was about to say that they had Denor III, which could not be read.

"It's true, I saw it, and I also saw Aunt Lianfeng and you discussing how to conceal and transfer divine power."

Du Qiangwei shook her head.

Lianfeng's face was pale. She knew very well what it meant to have dark data information read. It meant that they had no secrets in front of Kryptonian civilization, and even the dark information encrypted by Lianfeng herself could not be kept secret.

It is estimated that people know how many spears she has on her body now. This is the horror of information technology suppression!

"I'm sorry, Qiangwei... I, I just..."

After Lianfeng came to her senses, she apologized to Du Qiangwei.

"You shouldn't apologize to me, you should apologize to everyone on Blue Star. You almost pushed Blue Star to the edge of the cliff."

Du Qiangwei said calmly. Although she knew that Lianfeng's original intention was good, this kind of thing can't be counted like this.

After all, Lianfeng is just going her own way and betting the fate of everyone on Blue Star that Kryptonian civilization can't find out about this.

This kind of high-handed perspective is very similar to her father.

"So, Aunt Lianfeng, from today on, you are removed from the position of the person in charge of the Black Great Wall Base, and the new person in charge is Qilin."

Du Qiangwei said to Lianfeng.

"...I accept it."

Lianfeng didn't have any excitement or rebuttal.

"What does Kryptonian civilization plan to do? Let Zhao Xin cooperate with the detection and research?"

Lianfeng couldn't help asking.

"In theory, you no longer have the authority to know such secrets, but the official notice has not yet come down, so..."

Du Qiangwei couldn't bear it, and by the way, she also wanted Lianfeng to face the reality. The gap between them and the Kryptonian civilization was too big. Lianfeng's calculations were not taken seriously at all, let alone in their eyes.

Lianfeng looked at Du Qiangwei. She knew that Du Qiangwei was actually playing a time difference. The official notice had not yet come down, but Du Qiangwei's arrival was a notice. She just didn't want her to look too bad. Did she have to tell everyone in the Black Great Wall Base that she was dismissed?

With Dahua's style, as long as there was no principled mistake, it was estimated that the final notice would only be a transfer.

"The Kryptonian civilization did not ask us to cooperate. His Majesty the God King said that he had mass-produced the No Star War God, and the Galaxy Force would soon be able to achieve mass production. By then, the Galaxy Force would only be the super gene of the Kryptonian civilization."

Du Qiangwei said.

"What???"

Lianfeng was even more shocked. This was impossible!

"This is impossible, that's the power of the galaxy!"

Lianfeng felt that her three views were strongly impacted, and her authority was also questioned.

How could the power of the galaxy be mass-produced? It was one of the three major god-making projects jointly created by Shenhe Civilization, Angel Civilization and their Denor Civilization. The unique supreme god in the future is their unstoppable future.

"The power of the galaxy is one of the three major god-making projects..."

Lianfeng was stopped by Du Qiangwei.

"Shenhe Civilization and Angel Civilization created the god-making project of the power of the galaxy. It may have been very advanced and promising at the time, but tens of thousands of years have passed. Aunt Lianfeng, His Majesty Luther said that the power of the galaxy is outdated."

Du Qiangwei said.

Tens of thousands of years are outdated?

Lianfeng wanted to refute, but didn't know how to refute. After all, tens of thousands of years are too long, and the Denor civilization didn't have such a long time at the beginning.

"Besides, I have seen those mass-produced No Star War Gods."

Du Qiangwei continued.

"What?"

Lian Feng is what? After all, she was shocked and shocked one after another today. Du Qiangwei didn't say anything, but just shared the dark data she detected.

"His Majesty Luther also modified the super genes of the No Star War Gods, saying that they are not suitable for this era and are too backward. Now these No Star War Gods have become Krypton War God super genes, and their data are much stronger than Liu Chuang."

After learning all this, Du Qiangwei was completely flat.

Even the No Star War God can be mass-produced, and the three major god-making projects have now become a joke.

However, what the Angel Civilization and other civilizations cannot do, the Krypton Civilization can do. From a side point of view, it can also be seen that the Krypton Civilization is powerful.

Anyway, Blue Star only needs to be a younger brother and follow the Krypton Civilization, the leader, in the future, and there is no need to think about other things.

Although Lian Feng was a little lost, she still insisted that the power of the galaxy could not be mass-produced so easily. Even if the Krypton Civilization had that ability, it could not get the authorization of the Super Seminary Big Clock. Without the authorization of the Big Clock, the power of the galaxy could not be completely unlocked!

Lian Feng was not locked up after all. After all, she was also a representative of the Denor Civilization, and Blue Star had to consider the ideas of other Denor Civilization people.

But being "protected" is essential.

When Qi Lin learned that she would be in charge of the most important department for Blue Star, she was very panicked and confused.

Reina was also freed and worked as a power bank in the Black Great Wall base.

And Luther allowed the three women to meet openly, oh, and Angel Leng had to be brought along.

Chapter 245 Gathering at the Black Great Wall

"rose!"

When Reina saw Du Qiangwei, she was a little embarrassed and at a loss.

Du Qiangwei looked at Lena. Although she knew that Lena was controlled by Morgana and blew up the Grand Canyon, Du Qiangwei didn't know what to say because of her complicated relationship with Liang Bing.

Liang Bing was her father-killing enemy, but they both debuted together and became a group called "Ice Sculpture Rose".

Qilin looked at Du Qiangwei and Reina. Before, she was not the little sniper of the Xiongbing Company in the original plot. It can be said that Qilin suddenly ascended to heaven and became a member of Luther's "Luther Clan". Her strength Comparable to Nuoxing God of War.

So she, Du Qiangwei and Reina have no intersection with each other in the original plot. Now we just know that they are one of Luther's women.

If Luther was an out-and-out Blue Star person, Qilin would definitely have something to say, but after all, Luther was the king of gods and the most powerful king-level god in the known and unknown universes.

With such an identity, it was reasonable for Luther to find any number of people, not to mention that because of her, Luther sheltered a city's survivors and accepted a large number of survivors who had escaped.

A great kindness cannot be repaid, and coupled with Luther's emotional foreshadowing in the early stage, Qilin can only use the image of the queen of Krypton to accept these three people who don't know whether they should be called "Du Yaosheng", "Di Yaosheng", " "Leng promised" She is still a princess, a sister of a noble concubine.

Angel Leng feels bored. She is a guardian angel, not a rookie who has not grown up yet. Even if Luther is worried about his loyalty and does not allow himself to participate in the affairs of Kryptonian civilization, he should still let her be in charge of Kryptonian civilization. Civilized foreign war is the right thing to do!

Why did she come to this black Great Wall base of Blue Star Civilization?

But soon, Angel Leng knew why, because she saw another angel.

"Heart-burning?"

Angel Leng looked at Angel Zhixin in surprise.

"Sister Leng?"

Angel Zhixin was also startled. She never expected to see Angel Leng here. Then she left Xin Zhao behind and happily greeted him.

Xin Zhao was speechless, but he couldn't be jealous of his wife's best friend, right?

"He is your male god, the future power of the galaxy, Xin Zhao?"

Angel Leng crossed his arms and did not hug Angel Zhixin. That was what Angel Lingxi and the others would do. If Angel Leng did this, it would be better to give her a sword.

"Hello, Sister Leng."

Xin Zhao shouted as he went to the countryside and followed the Romans.

"Who is your cold sister?"

Angel snorted coldly and said.

Xin Zhao, a fool, immediately didn't dare to say anything.

"Sister Leng's character is like this."

Zhi Xin said to Xin Zhao with a smile.

"Hahaha, really?"

Xin Zhao didn't take it seriously, his wife's family, could he still be so reckless?

"The Xiongbing Company and the Deno Civilization are all in your charge, Qilin."

Du Qiangwei and Lena reminisced about the past, and Lena also awkwardly met with Xin Zhao. Zhao Xin used to like Lena, but now his eyes are clear, and he only cares about his wife.

It feels like his own ideological genes are similar to the power of the galaxy, but Xin Zhao's dedication will not be half-hearted.

It's very pure.

Then Du Qiangwei said to Qilin.

This person was attracted by His Majesty Luther and became the Queen of Krypton, and she even reached the sky in one step and became a god directly.

She hasn't even become a god yet.

Moreover, despite her noble status, Reina could not become a queen, and she was hiding like a little lover.

After Qilin knew the identities of her sisters, she also felt that it was too rash for her to become the queen.

However, Luther comforted her by saying that he was the King of God, and what he decided was inevitable, and there were no unexpected factors or force majeure.

So let her be the queen in peace.

Arranging the identity of the person in charge of this Black Great Wall base was just to temper Qilin.

Luther remembered that there would be something about the Triangle Civilization in the future, and asked Qilin to try to solve such a thing.

Liang Bing also wanted to join in the fun, but was chased away by Luther.

On the one hand, Qilin was under great pressure, but on the other hand, she did not want to disappoint Luther and wanted to become a qualified Queen of Krypton.

So she started studying hard. Angel Leng knew what she was here for, which was to teach Qilin.

Coupled with the angel Zhi Xin, good guy, Luther is planning to let her follow Zhi Xin, a fighting angel and a scientific research angel, one on the left and one on the right to assist and teach Qilin. What a good plan!

This configuration is no different from the King of Angels.

Angel Lingxi, Angel Yitian, and Angel Breeze were all let go by Luther, but they had nowhere to go, so they simply followed Angel Leng to the Black Great Wall base.

Lena is not idle either. She cannot teach the knowledge of Lieyang Civilization, but she can teach general things.

Reina was very angry at first about the fact that Luther did not let her become the queen and there were several other women.

After all, she is also the Empress of the Sun, the goddess of the sun. With this status, is she not qualified to be a queen?

But Luther convinced her by sunbathing.

Rena, who felt she had nowhere to go, simply accepted the outcome.

Moreover, she was able to return to her life with the people of the Xiongbing Company, which made Reina very satisfied.

It's just that she was really shameless to see people at first. If Du Qiangwei hadn't persuaded her, Reina would have probably gone into hiding.

Because there are no demons, gluttons, and giant wolves, all of which have been wiped out by the Kryptonian civilization, so the current Blue Star does not have to slowly deal with the mutated demons in the original plot. They focus on the stars and plan to build a ring defense system belonging to Blue Star.

This requires Xin Zhao's efforts. He had just become the power of the galaxy, and Rena replenished his energy and helped him achieve the divine body in one step!

This configuration is higher than that of Ge Xiaolun. In the later stage, Ge Xiaolun was only an invincible body, not a divine body. Now, with the help of Rena and the help of Angel Zhixin, Xin Zhao has directly become a third-generation divine body and an invincible body.

Except for not having Ge Xiaolun's void engine sword, the configuration is much higher than that of Ge Xiaolun.

In addition, although Xin Zhao is a bit simple-minded, Angel Zhixin can teach Xin Zhao in a better way than teaching Ge Xiaolun.

For example, if you don't learn how to use the dark energy conversion algorithm formula, you can't face her test. Zhao Xin finally learned it.

And, without lying down for a year and a half, Zhao Xin's learning speed and efficiency will definitely be better than Ge Xiaolun's in the end. After all, Ge Xiaolun had to have an "inspiring" blind date to wake up at this time in the original plot.

Xin Zhao didn't need this kind of thing at all. He also moved forward courageously in his studies and never looked back.

Chapter 246 Black Hole Changes the Form of War

Luther felt relieved when Qilin was put in charge of the heroic company that had been tempered by blood and fire.

At least now the thorns inside the Xiongbing Company have been smoothed away.
other side.

Things are not going well for Angel Nebula.

Although the plot has changed, in order to deal with Hua Ye as soon as possible and rescue Angel Yan, He Xi directly asked the angel to bomb, and Hua Ye immediately lost 99% of his troops.

The Taotie Civilization and the Giant Wolf Civilization suffered serious losses. However, the Taotie King Xihou and Sumali took action to regain the game.

Although Sumali was not upgraded to the fourth-generation divine body by the God of Death, Karl, he still got the silver blade he lost and was upgraded to the third-generation divine body.

Compared to the original plot, he snatched the genes of a female angel to make himself effeminate, and then snatched the backup of the Galaxy Power gene from the Black Great Wall Base. As a result, because he didn't know how to use it and didn't have the authority, he was at best a pseudo-third-generation super. warrior.

After all, Sumali didn't know anything about the gene engine system. He directly injected the female angel gene into his body, and directly injected the Galaxy Power super gene into his body.

However, even the pseudo-third-generation super soldier put Angel Zhixin into a difficult battle.

Now, Carl, the god of death, has been upgraded to a third-generation divine body in one step. With the silver blade, he is even more invincible.

Not to mention the Taotie King Xihou. Although its void engine is low-frequency, Death God Carl has set up a program branch for it. It does not require much computing power and can just run the program directly.

And this program is aimed at the attack function of angel genes.

When the angels were caught off guard, the angels responsible for the bombing were directly killed by the Taotie King Xihou and Sumali's sneak attack group.

After a wave of group destruction, He Xi immediately realized the problem and directly shrunk the defense line, allowing Yiren Civilization and other aerospace-level civilizations under the angel civilization to go up, and then the angels provided assistance.

The Taotie King Xihou has no program to redefine the environment at all, so the best result for it when facing an aerospace-level civilization is to continuously use void engines to invade, and then control the warships to counterattack its own warships.

However, with the assistance of angel warriors and angel vanguards, their heavy casualties only caused 10% of the casualties of the aerospace-grade civilization on the angel civilization side.

But this achievement is enough. After all, the angel civilization is different from the Styx civilization.

The Taotie, the Giant Wolf, and other civilizations are all capable of life, and they worship death and believe that death is just returning to the death of Karl, the god of death.

Therefore, they did not care about such huge casualties. Instead, the Taotie Fleet and the Giant Wolf Fleet continued to come.

On the side of the angel civilization, the aerospace-level civilization that has been following the angel civilization can be said to be smooth sailing. Even if it goes to war with the demon civilization, the most serious one will be the curtain call for Fraser and the holy left wing Nolan.

They have the powerful Holy Kesha, and basically there are no such huge casualties.

But now, this situation has occurred, which has caused the morale of the Angel Alliance to begin to waver.

Fortunately, this is not the Angel Alliance led by Angel Yan, but the Angel Alliance led by He Xi. Even though He Xi does not have the prestige of Holy Kesha, these aerospace-level civilizations that have been replaced for who knows how many generations still have information. It is recorded that King Tianji was one of the three former angel kings.

They did not dare to provoke the former three angel kings. He Xi could ask them to change their civilization leaders again at any time.

The lifespan of the leader of an aerospace-level civilization is very short. After all, the only people in the Super Seminary Universe who can achieve immortality are gods and super warriors. Even second-generation super warriors like Du Qiangwei are said by Angel Yan not to live for more than a thousand years.

For the angel civilization, it is normal for the aerospace-level civilization to change hundreds of civilization leaders.

As for the civilizations that were taken under the control of the angel civilization, Holy Kesha also asked that they do not need to continue to develop weapons, but only need to live and work in peace and contentment and pursue true love.

This also resulted in their combat effectiveness being much lower than that of the Taotie Civilization and the Giant Wolf Civilization, which were often at war.

"Hua Ye, have you learned it?"

Ruoning looked at Hua Ye helplessly.

"Learned it!"

Hua Ye nodded firmly.

"Have you really learned it?"

Ruoning continued to ask.

"Who am I, the king? Will I make fun of my own life?"

Hua Ye said with a smile.

Ruoning nodded, that was true.

What they are talking about is Hua Ye's operation to release the black hole.

Originally, Death God Carl had already set up a branch program for his black hole engine, and Hua Ye only needed to run the program.

But Hua Ye was worried. After all, it was different from the original situation. Hua Ye was frustrated when he came back. If he didn't run fast, he would probably have to stay in Blue Star.

So Hua Ye planned to figure out the black hole engine, but Ruoning refused to teach him too much knowledge, for fear that Hua Ye would lose his control and control and no longer need him.

Ruoning had no doubt that Hua Ye would do this.

Hua Ye could only pretend to be stupid and couldn't learn how to run the program to release the black hole. Ruoning had to teach him a little more knowledge.

"We can't advance. Hexi's prestige is too high, plus the first line of defense of the 19th Line. Even if that guy Karl doesn't care about the casualties of the Taotie Civilization and the Giant Wolf Civilization, we can't lose too much, otherwise we will continue to How can we attack Merlot Heavenly Palace when we come down?"

Ruoning, the traitor, naturally knows very well about the 19th Line of Defense, and she has now become the fourth generation divine body. She may not be able to seize control of the 19th Line of Defense. As long as she can invade, even if the algorithm and backdoor are changed, but with Ruoning The degree of understanding of angelic civilization.

It would be easy for her to crack it.

Hua Ye and Sumali are close to the battle zone of the 19th defense line. They have not even penetrated the 19th defense line now.

Get close enough and then release the black hole. At that time, the black hole will be able to solve all troubles with the speed of light effect.

As for what to do with Taotie and the giant wolf, Hua Ye doesn't care about them. It doesn't matter how many of them die.

Taotie and Giant Wolf didn't notice that all the scum on the battlefield had run away.

By the time a black hole appears on the battlefield, it's too late.

"His Royal Highness King Tianji, it's not good!"

He Xi actually already knew what happened. This was the convenience of the God of Technology, but He Xi also felt a headache and trouble.

"The black hole engine can actually create a black hole... That guy Carl has created something incredible."

Hexi naturally has no problem with her vision, and her wisdom is recognized by the whole universe, so she can clearly understand what it means.

Black hole engines are about to change the shape of war!

Now it is no longer a matter of the first line of defense of the 19th line being destroyed and the aerospace-grade civilization and angels suffering heavy casualties.

Chapter 247 Multi-space mapping of star destiny

But how should they defend and resist the black hole next!

Although the 19th Defense Line has a huge strategic depth of fifty light-years from the Melo Heavenly Court, the black hole created by Hua Ye is not omnipotent. It may be able to grow to the point of attraction that covers the fifty light-year range, but it is still being done now. Less than.

So Hua Ye needs to keep moving forward, and then release the black hole to swallow everything and destroy it.

This is a complete destruction of resources and an irresistible means of attack.

Moreover, Hua Ye was more cautious than the original plot, but he did not almost kill himself.

The black hole created by the high-frequency black hole engine, which is more powerful than the original plot, is also larger and released faster.

If He Xi wants to win, he can only fight at a distance and deal with Hua Ye from a distance!

So she will use Star Life next.

"We can no longer sacrifice our soldiers, especially in front of those scum."

Hexi said to all the female angels.

Holy Kesha and the others don't feel sorry for the sacrifice of the female angel, but He Xi still does.

"They also have Ruoning on their side, who is older than me and knows the entire defense system of Tiancheng very well. It is very possible for them to march straight in. If I continue to sit here, I am afraid they will defeat them one by one. So next, I will Go out in person!"

He Xi spoke righteously.

"Your Highness Hexi, we are not afraid of sacrifice!"

"For the sake of justice, it is not a pity to die!"

Both the old angel and the young angel said excitedly.

A silver dark silver weapon rotated rapidly, performing unimaginable maneuvers in the starry sky and universe.

It cannot strike at the speed of light or super-light speed, but combined with wormhole transport technology, it is the longest-range ultra-long-range strike weapon in the known universe.

Because its strike range reaches a radius of fifty light years, and no matter what the target is, as long as it is not made of dark silver or a void barrier, it will be broken directly!

In the face of this ultimate weapon called "Star Fate", 99% of the existences of the Super Seminary are vulnerable.

A Taotie battleship that relied on starlight to create light energy barriers became Xingming's target. Xingming accelerated and cut through the battleship at a speed that the battleships of the Taotie civilization could not evade, completely penetrating it!

"The starlight barrier is invalid! The starlight barrier is invalid!"

"It's too fast!"

"One of our flagships has been destroyed!"

"What is that?"

The Taotie King Xihou was frightened. It had never seen such a cruel weapon. It originally thought that it had no opponent after loading the void engine. Hua Ye only had to deal with him because he had a stronger high-frequency void engine. Bow your head and surrender.

But now the Taotie King Xihao clearly realized that it was impossible for him to block the attack of this strange thing!

When he unfolded the void barrier, it must have been cut open, right?

In the original plot, He Xi uses Star Life, which is simple and direct, and goes on a rampage.

After Xingming appeared, many of Hua Ye's fleets were destroyed in an instant. It can be seen that He Xi's use of star life is a simple and direct rampage, using the sharpness of star life to cut off Hua Ye's fleet, in order to achieve the purpose of killing the enemy.

It seems that he is not as powerful as Ruoning.

Ruoning uses Star Life to diversify his Star Life attack methods in conjunction with his own time and space abilities.

In the duel between Ruoning and Qiangwei, Qiangwei originally had the upper hand, but when Ruoning took out the Star Life, he instantly cut Qiangwei in half.

When Qiangwei's fourth-generation divine body activated instant healing, Ruoning used multi-space mapping again, and her star life became three.

Even the Second Demon King Atuo, who had been observing the battle, said that Ruoning's destiny was unpredictable and unpredictable, so Qiangwei should be careful.

Atuo, the Second Demon King, spoke very highly of Ruoning, which directly proved that Ruoning's performance in using Star Life was indeed better than He Xi's.

The majestic Tianji King is not as proficient in weapons as the former left wing guard?

But in the conversation between Yan and Morgana, it was revealed that the star destiny was given to Ruoning intentionally by Tianji King Hexi, and Tianji King Hexi had already calculated the battle on Kunsu Star.

Therefore, Angel Yan was arranged to use Heavenly Blade Judgment to launch a one-time strike against Hua Ye, Ruoning, Morgana, and all the enemies of Merlot Heaven.

This is Hexi's mind that can develop sacred atoms. Hexi's power does not lie in his mastery of weapons, nor in his own strength. Hexi's real power lies in the mind that creates things.

Moreover, Angel Yan's words also indirectly revealed that He Xi was in a completely lax state when using the Star Life. He did not show his true strength to control the Star Life at all. He just gave Ruoning the opportunity to steal the Star Life.

Ruoning, who had successfully stolen the star's life, was still complacent, thinking that he was very powerful and could rival the Heavenly King Hexi. In fact, this was just a way for the Heavenly King to coax Ruoning.

Now Hexi doesn't need to calculate these, because a more powerful enemy has appeared.

Therefore, before Hua Ye had made any preparations, He Xi mapped the star destiny in multiple spaces, and then suddenly turned into ten star destiny!

With the support of the huge computing power of He Xi's sky-based cloud computing group, these ten stars have displayed terrifying massacre efficiency!

...

All forces in the known universe are paying attention to this civil war among angelic civilizations.

Not to mention Morgana, she doesn't have a good impression of whoever wins, because the other person will definitely fuck her next.

Otherwise, why would she keep developing her military strength? Isn't it just for the next war with the demons?

Hundreds of thousands of little demons, even if they are cannon fodder, can kill a lot of angels and scum.

This is Tian Ji's horse racing, inferior horses kill superior horses, no matter how many die, Morgana doesn't feel bad, as long as they play their value.

If Luther hadn't blocked the Chiwu star system, Morgana would have run away long ago. Now she can only hurry up to crack Angel Yan.

"Black hole engine... can actually create black holes!"

Morgana was dumbfounded and wanted to find Karl to cooperate. With her relationship with Karl, it should be no problem to let Hua Ye compete with Luther and then take the opportunity to escape.

Even if Hua Ye can't beat Luther, Morgana doesn't feel bad if he dies.

If Hua Ye solves Luther... that would be even better!

Morgana doesn't believe that the god of death Karl didn't leave a backdoor and control means in Hua Ye's gene engine.

The black hole engine exceeded Morgana's imagination and shocked Morgana, so Morgana thought Hua Ye could have a chance with Luther.

Luther was also unfathomable, beyond imagination, especially the dozens of third-generation war gods. Morgana didn't know how Luther controlled them.

The king of gods sounds very majestic, but it is easy to fall apart. Even if Morgana is confident in her control methods, she dare not let her subordinates be promoted to gods at will!

Chapter 248 PUA Morgana

Morgana felt like there was a wolf in front of her, a tiger behind her, and a real dragon above her head.

Anyway, they are dog eat dog.

Originally, Morgana thought that she had destroyed Holy Kesha, and then she could live a peaceful life in peace.

As a result, now, forget about God King Luther and Death God Karl. One is sleeping with him, and the other is his dead dog.

As long as she avoids these two guys, she can do whatever she wants?

But the sudden appearance of Hua Ye made Morgana realize that there was nothing she could do about it.

Hua Ye coveted her, which was unknown to everyone in the known universe.

If it had been in the past, it would have been easier to say that Morgana wouldn't care about the covetousness of a dead bone in a grave and a clown.

Now Morgana regrets why she didn't kill Hua Ye for so many years.

As a result, Hua Ye has now been promoted to god.

With the configuration of the third-generation divine body + black hole engine, Ruoning under his control has become the fourth-generation divine body, as well as the Ansu Silver Martial Silver Blade!

In addition, Sumali has also become a third-generation god, and also cooperates with the Silver Blade.

Two third-generation gods and one fourth-generation god. Such a configuration can already become the top super-god civilization in the known universe.

At least Morgana couldn't think of a way to fight against it.

Although she has become a lot stronger because of Luther's magical gene, Morgana feels that she can only deal with one at most.

Ruoning is a well-deserved king-level combat power. Except for the lack of the celestial-level supercomputer that is necessary for the king-level, she is no worse than any king-level in other aspects.

Sumali can barely be considered a king, although maybe only half of it.

Hua Ye is a high-end king-level player, but when he performs well, he may be an average king-level player.

These are three king-level combat powers.

There was no other way, so Morgana had no choice but to go to Luther again to ask for the silver blade.

The queen was born between heaven and earth, how could she live in such a depressed state for so long!

Even though Morgana could actually integrate into the Kryptonian civilization and become a subsidiary of the Kryptonian civilization, Morgana was unwilling.

She knew very well that Luther had no feelings for her, and she was just a plaything to him.

That's why Morgana won't get close to Luther. She is very insecure about such a man, and she doesn't think she can charm Luther. This man's heart is as cold as ice and as hard as diamond.

Morgana didn't want to entertain people with sex. If Luther had feelings for her, Morgana might play with Luther.

She was actually very uneasy. Karl, the god of death, turned into a phantom without saying a word, and Morgana became hysterical.

Although Luther's divine charm can gradually fascinate Morgana, it is not a universal hypnosis after all. Luther is too lazy to hypnotize Morgana. Morgana will check her body every time she goes back, and her mind remains online. It's easy to find out what's wrong with you and then revise your thinking.

Except for the void ability of the void engine to redefine thinking, no one can easily change the thinking of a king.

When Luther faced Morgana's request for the silver blade, he knew that he was frightened by the contest between Hua Ye and He Xi.

She begged once before, but she didn't succeed and hasn't been there since. Even though she seemed to be very unscrupulous, Morgana also had her own bottom line.

"You want the silver blade, here it is."

Luther is very generous this time, because he is in CPU... No, KFC, no, PUA Morgana.

Isn't there a saying that if you treat someone badly all the time and then suddenly give them a small favor, you will succeed in PUA?

Morgana feels like this now. She didn't even think that she could succeed this time, but Morgana always felt uncomfortable if she didn't get any benefits.

Unexpectedly, Luther actually gave it.

Even though this silver blade is only the size of a fruit knife, it is still a silver blade, and the technology of multi-space mapping is not difficult at all for Morgana, who is a master of wormhole technology.

Therefore, this silver blade would be unimaginably dangerous in Morgana's hands.

"You really give me this silver blade?"

Morgana checked it over and over a dozen times, but still couldn't believe it, even if it was purely dark silver, without adding anything, at most it was added with dark iron elements, making it more difficult to analyze and locate.

There is nothing that cannot be analyzed, which means there is no hidden hand.

This made Morgana feel like she was dreaming.

"What, no?"

Luther pretended to take back the silver blade, so Morgana immediately grabbed the silver blade and threw it into her dark plane wormhole.

"His Majesty, the God King, is true to his word, but he cannot go back on his word!"

Morgana said quickly.

With this silver blade, Morgana can do more things.

But Morgana actually prefers dark silver chains, which can be used to restrain others, and can easily penetrate and cut through the bodies of super warriors and gods.

However, her chain has been destroyed by Holy Kesha, and now Morgana can be said to have no dark silver weapon at all.

"Don't worry, with just a silver blade, I won't regret it."

Luther said calmly.

Morgana looked at Luther like this and didn't know what to say for a moment.

"Your Majesty, can you give me one more?"

Then Morgana thought of what she should say. She was so easy to talk to, so of course she wanted to try to get more!

"roll."

Luther then looked at her and said.

"Okay!"

Morgana was not angry and ran away.

Being able to pry out a silver blade was beyond Morgana's expectations, and of course she would not be ungrateful.

Rather, Morgana is satisfied.

"Humph, PUA seems to be very successful. A silver blade makes her psychologically satisfied."

Luther watched Morgana leave.

"Karl, you made Hua Ye become a god, do you want him to deal with me?"

Morgana returned to Demon One, played with the silver blade in her hand, then rolled her eyes, secretly communicated with the God of Death, Karl, and questioned the God of Death, Karl.

Death God Carl received Morgana's secret communication almost instantly, and he was indifferent when he heard Morgana scolding him.

"Liang Bing, don't worry, I won't let Hua Ye hurt you."

Death Karl said softly.

"You fart, Hua Ye already has a void engine. Now Ruoning has been upgraded to a fourth-generation divine body by you. He himself is also a third-generation divine body. In addition, that bitch Sumali has also become a third-generation divine body. How can he bear it when someone else has a silver blade?"

Morgana said fiercely.

"I set up a backdoor for Hua Ye's genetic engine."

Carl, the god of death, said.

Morgana said that everyone knows this kind of thing, but is this something that can be said?

"Don't worry, Liang Bing, I don't have any ill intentions towards you."

Carl, the God of Death, continued.

Chapter 249 Hua Ye, a studious person

In order to show that he had no ill intentions, the god of death, Karl, did not hesitate to tell the truth about the backdoor conspiracy, clearly telling Morgana that he could control Hua Ye's behavior at any time.

"I just want Hua Ye to target Luther."

Cal, the god of death, explained to Morgana.

If it were anyone else, it would be impossible to get such an explanation from him.

Against Luther?

Even if Carl, the God of Death, didn't say this intention, Morgana could use Demon One to speculate on the possibility.

It's just that Morgana was naturally eager to do this before, but now, Morgana is a little hesitant.

She controlled the silver blade to fly around her. Morgana liked this bat-wing-shaped silver blade like the wings of a demon and couldn't put it down.

She didn't believe what Luther said. He just gave her a silver blade casually. No matter how hard it looked, this thing took a lot of thought.

Even just a little thought made Morgana think about it.

Especially after adding dark iron elements, the surface appears black and silver instead of the silvery white of dark iron itself.

"What are you going to do?"

Morgana hesitated for a moment, then asked.

Death God Karl was a little surprised as to why Morgana's tone suddenly became so good. He was thoughtful and couldn't think of an answer. Among the results calculated by the big clock, the one with the lowest probability was Morgana's attack on him. Attitudes change for the better.

It is obviously the least likely, but Karl, the God of Death, believes that this is the most likely thing.

"I plan to let Hua Ye capture the Merlot Heavenly Palace and then gather the Tianzha Army."

The god of death, Carl, became gentler and told Morgana his plan without hesitation.

As everyone knows, Morgana is listening here, thinking that she will use this information to earn a few more silver blades from Luther.

She had no other ideas, she just didn't want Luther to die so quickly, and she also wanted to get more benefits!

Do you think it would hurt her conscience to betray Karl, the God of Death?

She is the Demon Queen, would she care about this?

...

In the Merlot Heavenly Court, He Xi controlled the star life to conduct multi-space mapping. The ten star lives roared, clearing all the Taotie battleships and giant wolf battleships in the entire starry sky, leaving only Hua Ye's flagship.

At this time, He Xi concentrated on dealing with Hua Ye's flagship.

Hua Ye looked at the shield being impacted by ten stars as if facing a formidable enemy.

"I don't know if the void shield given by Carl's turtle grandson can withstand it. Ruoning, please think of a way!"

Hua Ye said anxiously to Ruoning.

He had seen the power of this piece of shit, killing all directions and invincible. Hundreds of warships were gone in less than a few minutes, and then they attacked directly.

If it hadn't been for the void shield given by Karna Turtle and the high-frequency void energy support of his black hole engine, it would have been cut in half by now, right?

After all, this Tiangong is no longer his era. Hua Ye's eyes are still on the sword fight, but He Xi pulls out a weapon, leaving him helpless and dumbfounded. If the black hole is released at this distance, it can solve this problem called Star Destiny. weapons.

The problem is that he will be gone by then.

He Xi just bullied him into not daring to create a black hole at this distance.

The beyond-visual-range strike is so cool, the firepower suppresses it.

[Calculating the void shield data of Hua Ye's flagship...]

[Importing void shield data...]

[Calculating the void shield algorithm formula...]

[Import the void shield cracking program...]

He Xi is not idle here either. She knows that the life of the star may be taken away, so she must solve Hua Ye's turtle shell first.

By then, the black hole engine will no longer be a problem.

Once he gets serious, Hexi will not let the black hole engine play any role at all.

The original plot can only be said to be a plot kill, otherwise, with a huge space-based cloud computing group, there is no way He Xi would be deprived of his star life.

However, the tenacity of this void shield exceeded He Xi's expectations.

The calculation is extremely difficult. Even with the computing power of the entire space-based cloud computing group, there is no way to crack it in a short time.

"Don't worry, Hua Ye, I have seen Hexi use this thing before. At that time, it was to deal with Morgana. Nolan, the Holy Left Wing, died in the battle. So Hexi dispatched Star Life, dozens of light years away. Distance, chasing Morgana for several years."

Ruoning said.

"Damn, so powerful?"

Hua Ye really didn't know this.

"The entire Angel Nebula has a radius of fifty light years. In other words, He Xi's star attack can cover the entire Angel Nebula. Once we enter here, it is impossible to escape the star attack. What's more, He Xi can pass through the insect at any time. Cave transport transports stars to our vicinity."

Ruoning continued.

"Then how to fight?"

Hua Ye felt that it was very difficult just to hear it, and he didn't know how to start at all.

"I served as Queen Kesa's sacred left wing, and my authority was greater than that of He Xi, who has retired. Star Life is a weapon in Queen Kesa's arsenal. At that time, I also obtained first-hand authority and information. "

Ruoning's status determines that most of Holy Kesha's weapons cannot have passed through her. Even though most of the weapons were developed by He Xi, He Xi is a goddess who has been in the house for ten thousand years. She is only responsible for research and development. Of course, the work of combat is Holy Kesha and Ruoning are in charge.

At that time, Holy Kesha authorized her to use some weapons. After all, Ruoning's identity was too special and her combat effectiveness was too strong. She was also the old angel who had served the longest.

If it hadn't been for Holy Kesha suddenly retiring her, Ruoning would still be the Holy Left Wing.

"What's the meaning?"

Hua Ye was confused. He couldn't understand this kind of thing at all.

"... To put it simply, I know everything about star destiny, so I can write a set of algorithms for star destiny, and then you use your black hole engine to help me take it!"

Ruoning rolled his eyes and said something simple.

"How to say?"

Hua Ye's eyes suddenly lit up, could he still do this?

Can a black hole engine do such a thing?

Is the black hole engine so powerful?

Make a note of it and try it yourself when the time comes!

Hua Ye felt like he had learned something again.

"It's very simple. I can make a set of void algorithms based on the known data about star destiny,"

Ruoning knew what Hua Ye was thinking when she saw his look. She leaned on the railing of the spaceship and said to Hua Ye.

"At that time, I will go up and entangle the star. You take advantage of the moment when the star is entangled by me and the momentary energy and data changes weaken. According to the void algorithm I gave you, use your black hole engine to remotely Define star destiny."

"In this case, the code of Star Destiny can be redefined and written. He Xi will lose control of Star Destiny at this time, and we can snatch Star Destiny!"

Ruoning said.

Chapter 250: Prepare to Die

Hua Ye didn't expect such an operation.

Just listening to it, he found it completely impossible to imagine and understand. Remote definition?

Don't you need to connect a line or something?

How is he going to invade?

"Is this okay?"

Ruoning sneered when she heard this.

"What does this mean? It's just a basic operation after the gene engine technology is developed. Haven't you discovered that even though we have captured the first line of defense and destroyed so many angel coalition forces, there is still no spacecraft. Are blade battleships or space-based battleships appearing in front of us?"

"Don't you think that Hexi and the Angel Civilization have developed for so many years and just rely on the shabby aerospace-grade civilization warships of the Angel Alliance?"

Ruoning continued.

"When you say that, it seems like it's true."

Hua Ye didn't know this because he had no concept in this regard. He felt that it was very easy to destroy the Angel Alliance. Except for those fifteen annoying angel warriors, most of the Angel Alliance's warships were unable to cause them any trouble.

It turns out it's because Hexi hasn't taken it seriously yet?

"If He Xi really sends out a sky-blade battleship or a space-based battleship, because of my presence and your high-frequency void engine, it will be easy to invade and crack the opponent's combat engine. Unless He Xi personally takes charge, it will be impossible to resist the invasion of your black hole engine!"

Ruoning nodded.

This was the first time that Hua Ye knew that he was so awesome and intimidating. Unfortunately, he couldn't do anything.

Of course Ruoning knows Hua Ye's ignorance. This ignorance is not just ignorance of advanced technology. After all, even Ruoning does not dare to say how many advanced technologies of angel civilization he has mastered. Those are all He Xi and Holy Kesha. Responsible.

Liang Bing may know part of it, but she has been away for many years, and the advanced technologies she knows will definitely be changed by He Xi.

Only Ruoning, because the time of betrayal was too short, Angel Yan betrayed as long as she had been a sacred left-wing guard. In such a short time, it is impossible to make drastic changes to those huge advanced technologies.

Moreover, Hua Ye was even more ignorant about the knowledge of the void, which made it impossible for him to understand many things and methods. He didn't even have the idea and it was impossible to think that he could do this.

As a king and the main god of civilization, he shouldn't be like this. After all, the main god of civilization has mastered most of the advanced technologies of his own civilization and masters all advanced technologies.

No matter how stupid you are, no matter how smart your brain is, in such a long time, even a pig can learn it.

What's more, the scum and divine bodies whose brains have been developed?

It's just that Hua Ye has just upgraded to the third generation of divine body. His brain has been developed, but there is no time for him to learn, and there is no knowledge for him to learn. Hua Ye may feel that his memory and thinking have become stronger, but he did not expect that. at this point.

In addition, Carl, the god of death, was unwilling to teach Hua Ye and even wrote a branch of the program for Hua Ye, just so that Hua Ye could operate it like a fool without using his brain.

This kind of thing can actually easily paralyze a person. Once a person gets used to such fool-like mindless operations, it is impossible for him to get rid of this habit.

Hua Ye didn't know if he was aware of this. Anyway, he seemed to be quite happy with this kind of fool-like operation that didn't concern him with anything. Even a simple void energy attack was enough to eliminate 99% of super soldiers and super warriors. god.

It's hard to say what will happen if you play this kind of abuse too much when you wait for the high-end game.

Death God Carl and Ruoning have a tacit understanding in this regard, trying to keep Hua Ye away from too many possibilities of developing and using their own black hole engine.

"In this case, can we directly rob this point in the future, such as Luther's weapon?"

Hua Ye's eyes lit up and he said that although he had never seen Luther's weapons, Karl, the God of Death, showed him Luther's weapons against Kesha's arsenal, and both sides seemed to be equally matched.

However, Holy Kesha did not come up with high-end weapons like Star Life at that time, and Luther probably had reservations.

"Impossible, do you think this is a game?"

Ruoning knew Hua Ye would say this, so she shook her head and rejected Hua Ye's idea.

"Why, can't it be defined remotely? Any star's fate can be defined so far and so quickly."

Hua Ye frowned, wasn't Ruoning's words contradictory?

"I have said it before, Hua Ye, I know a lot about Star Destiny and have been authorized by Star Destiny, so I can write algorithms for Star Destiny. If it is other weapons that I don't understand, then you can only It can be analyzed with your black hole engine. If it is an ordinary silver blade, it is easy to say. With the high frequency of your black hole engine, it will probably not take long to complete the analysis. "

"But if you are facing a god of Luther's level, your analysis may become a port for him to invade your black hole engine. Therefore, never use your black hole engine to define Luther. That guy Karl said , Luther also has a void engine!"

Ruoning still knows a lot about the void knowledge, but the level of understanding is only half-understood, otherwise he would not have chosen the fourth-generation divine body between the void engine and the fourth-generation divine body.

Even if the fourth-generation divine body is very comprehensive, only the void engine can exert performance beyond its limits.

One is balance, the other is easy to create miracles. Others are of course suitable to choose the fourth generation of divine body, but the problem is that Ruoning, a veteran god who has experienced hundreds of battles, can better exert his power by choosing the void engine.

"Oh..."

After hearing Ruoning's words, Hua Ye immediately realized that he was not as powerful as he imagined, even if he found an opportunity to completely master the black hole engine.

Luther actually also has a void engine, but I don't know how many frequencies it has.

Hua Ye is still used to distinguishing high and low strengths and weaknesses by frequency.

In fact, the frequency of the void engine is just a basic plate, and it depends on various aspects. Apart from other things, how many void warriors have been killed by Taotie?

Ruoning handed the algorithm to Hua Ye.

"If you give me the star destiny, the combat effectiveness will become stronger. The question is, will you give me the star destiny and the arsenal of Queen Kaisha in the future."

Ruoning looked at Hua Ye meaningfully before leaving.

"Don't worry, don't you know who I, Hua Ye, am? You are unique to me, Ruoning!"

Hua Ye said with a grin.

"Then let's get started."

Ruo Ning also knew this, so she was confident in using herself as bait.

I had a nosebleed due to allergic rhinitis, but I still insisted on updating.
