

Kryptonian 251

Chapter 251 Hua Ye's Conspiracy

Hexi directed ten stars to crash into Hua Ye's flagship. After seeing Ruoning come out, her sky-based cloud computing group calculated Ruoning's various possible purposes in an instant.

"Want to take my star life?"

Hexi realized this and sneered.

The star life disappeared instantly.

Ruoning stood in mid-air with a confused look on her face.

Not to mention Hua Ye. He looked up at Ruoning eagerly. Judging from his expression, he was probably asking Ruoning.

What about star destiny?

What is the destiny of such a big star like this king?

Ruoning didn't expect such a situation to happen. She originally wanted to catch He Xi off guard, but she didn't know that all her words and deeds had been modeled by He Xi. Whatever she did or said, as long as it was collected. Once the data is received, the space-based cloud computing group can directly analyze countless possibilities.

Then the most likely ones were screened out. In this case, unless it was an unexpected variable like Luther's deus ex machina, it would be impossible to escape He Xi's judgment.

She was not forced to die in the original plot. She was forced to jump into a black hole and plot against Ruoning to plot against Liang Bing, and finally achieved the purpose of plotting against Ruoning.

Now Hexi is full of firepower. In order to save Angel Yan, the most embarrassing angel king in history, she must deal with Hua Ye and Ruoning as soon as possible.

Liang Bing was once one of the three angel kings, and she was not sure whether Liang Bing had the weapon arsenal and knowledge treasure trove that could obtain the sacred Kesha through Angel Yan.

After all, Liang Bing has the God King Luther by his side, and he is also colluding with the God of Death Karl. If Liang Bing makes a move to give Angel Yan to Luther or the God of Death Karl...

Hexi was very anxious.

This led to Hua Ye and Ruoning's current situation.

"Launch the judgment of heaven!"

Hexi ordered her men, and then she planned to send four generations of god clones to deal with Hua Ye and Ruoning.

The Judgment of Heaven's Punishment bombed Hua Ye's flagship. Even the void shield could not withstand the bombardment of hundreds of rounds per second. Each one could easily destroy a warship!

This is the deterrent power of the combat celestial body. One combat celestial body is enough to sweep hundreds of space-class battleships, and it is impossible for the opponent to break the defense of the combat celestial body.

"Hexi this guy!"

Ruoning grabbed the railing of the flagship, feeling frightened by the explosion. She never expected that He Xi would do this.

In other words, when the Angel Alliance fought against the Heavenly Slag Alliance, why didn't they launch the Judgment of Heavenly Punishment, only to launch it now?

What they didn't expect even more was that He Xi appeared directly outside their flagship.

This made Hua Ye's eyes widen. He had never thought about meeting He Xi.

My legs feel a little weak.

It's not that He Xi makes his legs weak or that his identity as an old aunt makes his legs weak. It's He Xi's name that makes his legs weak.

If it hadn't been for the rise of Hexi, the angels would still be enslaved by Tianzha, and the Tiangong would not have been overthrown.

Although the later plot has cleared up Morgana and many people, the angel is still dark.

But everyone knows that the winner is the king and the loser is the enemy. Naturally, no one will say that justice must win, and the loser must be evil.

It's just that the winner has the final say.

"Hua Ye, Ruoning, I'm impatient. After all, a coalition of rubbish like yours won't be able to enter the Celestial City in a thousand years."

He Xi said to the two of them arrogantly.

"King, I'm going!"

Sumali immediately said excitedly to Hua Ye.

"Damn it, didn't you see that this king is weak?"

Hua Ye cursed.

"You are also weak when in front of me."

Ruoning refuted Hua Ye.

"Next, let's have a battle between kings, but this time, I will completely destroy you."

Hexi opened a heavenly door and went in directly.

The gate of heaven was open there, and the divine judgment that had just been bombarded ceased.

"King, the void shield only has 50% energy left. He Xi is obviously asking you to make a choice."

Ruoning suddenly called Wang again.

"What choice?"

Hua Ye's eyes widened.

"So, you won't accompany me?"

Hua Ye was anxious.

"I'm not qualified. Didn't He Xi say that this is a contest between kings? Do you want to be blown to death, or do you want to defeat He Xi?"

Ruoning said with a shrug.

"Fart, how can I fight alone? What if I'm cheating?"

Hua Ye said excitedly.

"Don't worry, King Hua Ye, Mero Heavenly Court has not destroyed your power yet. Don't underestimate your black hole engine and third generation divine body."

Ruoning shook his head.

Then she talked hard and finally convinced Hua Ye.

It didn't matter, Hua Ye didn't want to be aggrieved and have the void shield blasted open, and then be killed.

That's too frustrating.

In the end, he could only curse secretly, and then flew towards the Tianmen in space.

"I thought you would bring Ruoning with you?"

Behind the Tianmen was the familiar Palace of Heaven. Hua Ye glanced at it and paid no attention to it, because He Xi appeared directly in front of him.

"Didn't you already say that this is a contest between kings?"

Hua Ye can still show the courage of a king at critical moments, although he is indeed very timid.

The black hole engine was running at full speed, detecting everything around him at high frequency, for fear that He Xi would really come up with something to plot against him.

He Xi raised the corners of his mouth and looked at Hua Ye with mockery.

The consequence of reaching the sky in one step is knowing nothing.

Not to mention, Hua Ye was so crazy that he let the genetic engine of the God of Death Carl be installed on himself.

She didn't believe that the God of Death Carl did nothing.

Just like now, Hua Ye didn't realize that this was an illusion of mental suggestion, because he had no knowledge of mental attack. Although the void engine could be redefined, it also needed to be operated.

Just like the recycle bin can recycle and shred all files, but you need to drag the files in or press keys to operate.

With the black hole engine, Hua Ye himself should be able to break all laws with one force, and the effect of mental attack could not be so good.

It's a pity that he didn't understand.

Hua Ye even thought that this was the Heavenly Palace after the big change, although the location of the Melo Heavenly Palace was changed to a different planet from the original Heavenly Palace era.

He drew out the Heavenly Sword.

"Come on!"

Hua Ye said, thought about it, and put down the sword.

He Xi didn't understand.

"Can other people and the outside hear what we are saying here?"

Hua Ye asked.

He Xi narrowed his eyes.

"Interesting, is this a plan to escape his fate?"

After hearing Hua Ye's words, Luther laughed.

It's a pity that the Death God Carl is also paying attention to this battle, and because this battle is not good for Hua Ye and Ruo Ning, the Death God Carl has planned to intervene.

It's just like letting the Holy Kesha be destroyed.

It's not difficult to destroy another He Xi, after all, he has collected a lot of void matter.

Chapter 252 He Xi's Trap

When Luther didn't care, the attack of Karl, the God of Death, was the biggest blow.

But He Xi should be able to guess it, but I don't know if she will be overconfident in her mental illusion.

Or maybe He Xi is using this place as a bait and trap to give Karl, the God of Death, a severe mental blow?

The God of Scientific Research is not static and rigid. Most worlds can change the plot due to the butterfly effect of time travellers. Not to mention that everything like the God of Scientific Research is an existence of data and calculation. It is inevitable that Hexi's thoughts and behaviors will change.

Hua Ye wanted to discuss cooperation with He Xi. He felt that there was no need for the two of them to fight to the death, which would give others an advantage.

After all, the angelic civilization is not alone now. The overlords from the edge space of the unknown universe, the Kryptonian civilization and God King Luther, as well as the unfathomable Death Song Academy and the God of Death Karl who have jumped out now, are all angels. A powerful existence that civilization cannot deal with alone.

Hua Ye felt that they could join forces, and he was willing to ensure that the female angel's status in the Heavenly Palace was equal to that of Tianzha, but he needed He Xi to help him research and control the black hole engine.

Of course He Xi couldn't agree. Not to mention that she was sure of winning now. Even if it wasn't, she wouldn't be able to believe Hua Ye.

Hua Ye felt unreasonable. Under such circumstances, he still insists on that kind of thing?

He even said that Hexi could be on an equal footing with him and implement a special ruling system of male and female angel kings.

As a result, He Xi still refused.

This made Hua Ye very helpless.

How could He Xi agree? If she was asked to agree to this, she might as well go to Luther. At least Luther had the super gene of Galaxy Power, which was justified.

And no matter what aspect, Hua Ye is incomparable to Luther.

However, Luther's Kryptonian civilization super warriors and gods did not have women, which made He Xi hesitate and didn't know what the situation was.

Since the talks collapsed, Hua Ye had no choice but to take action.

Then He Xi directly "disabled" his black hole engine, which made Hua Ye panic.

What he relies on now is the black hole engine. The third-generation divine body is the Styx version, which is more resistant to sex, that is, it has strong melee combat ability and average functionality. Especially the god of death, Karl, deliberately weakened the ability to develop the brain. Hua Ye, as an ancient scum, is Very adaptable.

But the result was that the black hole engine was disabled, and Hua Ye was beaten to pieces by He Xi.

The power of a third-generation divine body driven by dark energy is nothing to mention to He Xi, who possesses huge amounts of dark energy.

In fact, this is not a ban. He Xi is not that powerful to directly invade and ban a high-frequency void engine like the black hole engine. She just used mental illusions to deceive Hua Ye, making Hua Ye feel that she can't use the black hole engine.

In fact, it was just He Xi who caused logical errors in Hua Ye's perception and senses, causing Hua Ye's void engine to not receive the correct instructions, making it impossible to use the black hole engine.

Any third-generation god with other knowledge reserves would not be able to disable the black hole engine so easily. It was purely bullying Hua Ye for not reading.

However, just when Hua Ye was hung up and beaten by He Xi, a huge skull appeared.

"Waiting for you!"

Without saying a word, He Xi concentrated his computing power and forcibly defined the surrounding space remotely.

She does not have a void engine, but even if a king-level main god does not have a void engine, it cannot be handled by just a void engine, even if it is a void weapon built by the god of death, Karl, using a large amount of void matter.

The skull was frozen like this, but He Xi frowned, and the thousands of stars near the Angel Nebula began to gradually dim.

This is the skull resisting her analysis, and the space-based cloud computing group frantically calculating the huge energy consumption of anti-intrusion and invasion.

Every second is an astronomical number of calculations.

Karl, the god of death, also began to mobilize the computing power of the big clock and temporarily stopped research on several scientific research projects.

"Hua Ye, use your black hole engine to create a void computing strike."

And he also contacted Hua Ye directly.

"Karl? Damn it, my black hole engine was disabled by He Xi. Can it still be disabled?"

When Hua Ye heard Karl's voice, he immediately became excited, just like a buyer who complained about product quality problems.

"Your black hole engine has not been disabled from the beginning to the end. He Xi just deceived your own perception and senses to create logical errors. I will give you an algorithm that can directly cause the black hole engine to burst out high-frequency void energy impact."

Carl, the God of Death, briefly explained.

Here Hexi was fighting against the skull, a void weapon, when Hua Ye suddenly burst out with a high-frequency void energy impact. The mental illusion was immediately shattered by the impact, and Hexi's fourth-generation god clone shut down on the spot.

High-frequency void energy is enough to easily disintegrate the fourth-generation divine body and destroy sacred atoms.

It's good that He Xi's fourth-generation god clone just shut down.

Then the skull of Karl, the God of Death, swallowed He Xi up in one gulp.

"Solved?"

Hua Ye quickly asked the God of Death, Karl.

"No, He Xi is a fourth-generation god after all. The most he can do is be exiled to the edge of a black hole. You should hurry up and act."

The god of death, Karl, is still very self-aware. Holy Kesha could actually run away, and he could also directly kill Di Leina to stop the supernova explosion, not to mention He Xi, but He Xi couldn't calculate the high-frequency void energy strike, so he let him He succeeded.

After all, He Xi is very confident that the fourth generation of divine bodies cannot be destroyed in the known universe. She has tried every method. Holy Kesha can only be said to be an accident, and it has not been destroyed.

It's just that she has not tried high-frequency void energy.

This thing is impossible to have whenever you want.

Even if you use the power of the big clock and the big skull void weapon to exile to the edge of the black hole, you can only delay He Xi for a while.

Hua Ye was speechless, but Carl came to support so timely that Hua Ye dared not expose his little thoughts.

He Xi's main body frowned. Just now, her analysis was only completed by one percent, and then she was interrupted by Hua Ye's explosion.

"I underestimated Hua Ye's black hole engine."

He Xi had two purposes this time. One purpose was to extend Hua Ye's spiritual time infinitely, and then take the opportunity to analyze the black hole engine!

In Hua Ye's perception, only one hour had passed, but in fact, dozens of days had passed. There was enough time for He Xi to analyze the black hole engine and calculate the cracking method.

There is only one such opportunity in the known universe, and He Xi has been preparing for this opportunity to analyze a mature void engine for a long time.

The second purpose is of course to use Hua Ye as a tool to lure the Death God Carl to take action.

Chapter 253 The Purpose of Death God Carl

Both the first and second objectives failed.

The time of stretching the spiritual sense of time had just begun, and the god of death Carl took action directly.

Moreover, all the measures taken by He Xi against the god of death Carl failed.

"I underestimated Hua Ye's black hole engine..."

He Xi reconnected with his fourth-generation god clone, and all the gene engines were down. Fortunately, the fourth-generation god body was powerful enough. In this case, it recovered directly after the connection.

At this time, Hua Ye had already led Ruoning and others to kill into the Melo Heavenly Court, and the angels fought hard.

Because Hua Ye was worried that He Xi would come back, he did not fight and took the Tiangong away.

He Xi naturally had the spare energy to keep Hua Ye and Ruoning completely, but in order to avoid her coming back to chase, Hua Ye threw black holes everywhere, intending to let He Xi deal with these black holes first after returning.

Otherwise, after a thousand light hours, these black holes will completely devour the Melo Heavenly Court.

He Xi had no way but to find a way to deal with these black holes first.

Hua Ye successfully took the Tiangong away. Although he did not solve the problem of He Xi and Melo Tianting, he directly revealed his name at this time, and the millions of Tianzha responded immediately!

Apart from anything else, being able to snatch the Tiangong back from Melo Tianting where He Xi was in charge, even if Hua Ye failed, it could give these Tianzha hope, at least it was not a complete crushing game.

They can still fight after some development.

And the return of the millions of Tianzha also let everyone see what the overlord of the former Tiangong era was like.

So many super soldiers, it was simply exaggerated to the extreme.

Hua Ye established himself as the king, of course he could not say that he restored the throne, after all, he had not yet defeated Melo Tianting, how could he say that he restored the throne?

So now he can only call himself the King of Tianzha, King Hua Ye, but he can't call himself the King of Angels.

That will have to be when Melo Tianting is defeated.

But Hua Ye didn't care. With the millions of Tianzha in hand, the basic situation has been stabilized, and the next step is to develop.

Wars between gods usually don't end so quickly, let alone in the universe?

After all, it starts from a thousand years, and ten thousand years is not too long.

Of course, Hua Ye must not let this war last for ten thousand years, otherwise what will happen when the Holy Kesha comes back?

Now Hua Ye has millions of Tianzha in his hands. The first step is to rule an area, then harvest genetic resources, and accept genes from other civilizations.

These genes are primitive super genes. Among them, the excellent primitive super genes will be studied, and then guided by supercomputers to mutate and evolve, and finally become part of the Tianzha gene to improve the Tianzha gene.

In the absence of celestial-level supercomputers, the progress of Hua Ye's project can be imagined. Even the angel civilization took tens of thousands of years to improve the angel gene, completely separating it from the male angels and becoming two species.

As for Hua Ye, unless the death god Carl helps.

Otherwise, it is basically impossible to make the Tianzha reborn in a short period of time.

So, the current situation in the known universe has become very complicated.

It took He Xi more than ten days to solve those black holes. She didn't need to jump into black holes. Thanks to her research and analysis of the black hole engine, although there were not many,

He Xi was inspired. In addition, those black holes were delayed black holes, which gave He Xi enough time.

He Xi, who had freed up her hands, was also very troubled by the current situation and didn't know what to do.

She originally thought that she could solve the troubles caused by Hua Ye and Ruo Ning in a swift and decisive manner, and severely injure the Death God Carl with mental attacks.

But she didn't expect that the Death God Carl would not even show up and appear in his phantom, making the mental suppression algorithm and mental attacks she prepared useless.

Hua Ye took back the Tiangong, and millions of Tianscum arrived in less than a month. It can be imagined how long they waited for this day.

"We shouldn't have left so many Tianscum at the beginning."

A young angel couldn't help but say.

He Xi shook her head. The historical issues of the year were too complicated, and they couldn't eliminate all the Tianscum. In history, the angels won a miserable victory, but in fact, a great miserable victory. If they continued to fight, they would only be extinct.

What about millions of Tianscum?

He Xi became serious. With the resources of Melo Heaven, and the return of retired old angels, it is not a problem to pull out 100,000 angels for upgrading.

The next course of action is to save Angel Yan or target Hua Ye?

Hua Ye doesn't seem to want to fight, but he is just a tool of Death God Carl after all. If Death God Carl wants him to target Melo Heaven, it will be difficult for Hua Ye to refuse.

At present, he has not reached the point where he can't help himself, but He Xi knows very well that Death God Carl pulled Hua Ye out as a tool because he values the power of these millions of scum.

Otherwise, if he really wants a void warrior, Death God Carl can grab a handful, and he won't have so many thoughts as Hua Ye.

Many things are basically things that people with eyes can see at a glance.

He Xi is not clear about the purpose of Death God Carl now, so she is worried that when she takes the angels to fight the holy war to save Angel Yan, Hua Ye will participate in this war under the order of Death God Carl.

At that time, the angel coalition will face the demon army and the scum army alone, plus the army of the Styx Nebula, and attack from three sides. Even if they can win in the end, the angel civilization will not have much manpower left.

Unless He Xi violates the justice order of Holy Kesha and dares to resurrect all the dead angels, even shaking the justice order.

You can indeed win this way, but after winning, the angel civilization will probably fall apart.

King Tianji takes the lead in violating the definition of the righteous order of Holy Kesha.

Isn't this enough to shake the foundation of angelic civilization?

However, Luther knew the purpose of the God of Death, Karl. It must be to find Reina, or to attack the Lieyang Civilization!

The purpose of Carl, the God of Death, is simple and clear, which is to blow up black holes, blow up black holes, blow up black holes!

Whoever prevents him from starting the Void Era is the enemy he wants to kill. Even Liang Bing is no exception. However, the God of Death, Karl, will not destroy Liang Bing, but will only imprison her.

Now that millions of scum are controlled by him through controlling Hua Ye, Death God Karl's first target is naturally not to fight Merlot Heavenly Court, but Lieyang Civilization and Emperor Leina!

Because of Luther's blockade of the Chiwu star system and even the Milky Way, Reina's whereabouts were unknown to the god of death, Karl, so he planned to take down the Lieyang civilization first.

The Milky Way seems to have been regarded as its own territory by the Kryptonian civilization. The God of Death, Carl, cannot take down the Kryptonian civilization for the time being, so he can only take down the Sun civilization first.

After all, Lieyang Civilization is easy to deal with.

Chapter 254 Luther starts to make trouble

Angel Nebula!

In the starry sky where the fleet is densely arrayed, the energy light of various warships is dazzling than the starlight, lighting up the starry sky.

The patrol boats of the Taotie Civilization and the Tianzha that can fly in the starry sky are constantly patrolling.

On a space battleship that looks like a sailing ship, armies of various civilizations are arrayed in order.

Taotie, giant wolf, and scum of heaven.

"Send a message to all the male angels and descendants wandering in other civilizations. King Hua Ye has come to the Tiangong. As long as you surrender to King Hua Ye again and continue to pay tribute to the best genetic resources to the Tiangong, you will be crowned kings and return to the glory of the Tiangong. "

Hua Ye was majestic and looked very majestic sitting on the throne of Tiangong.

"Hua Ye, that guy Karl wants us to lead an army to attack Lieyang Civilization."

Ruoning flapped her black wings and landed in front of him and said.

"Attack the Lieyang Civilization?"

Hua Ye frowned.

"Tell grandson Karl, wait until I gather enough male angels, and then attack the Lieyang Civilization in one fell swoop..."

Hua Ye said impatiently.

After regaining the Tiangong, Hua Ye was no longer floating, but he also regained his kingly spirit. He wanted to control Karl and see where his bottom line was.

"Karl probably won't be able to wait too long."

Ruoning shook his head.

"If you can't wait, you have to wait. Is the Lieyang Civilization so easy to win?"

Hua Ye continued.

"By the way, you have to find a way to get the turtle grandson of Kalnar to give Kunpeng, Maivis and the others a third-generation divine body. After all, we can't let you and Sumali take the lead in everything. If he doesn't give it... then we'll think about it ourselves. way."

Hua Ye's words were both domineering and cowardly.

The main reason is that he also knows that he is controlled by others and cannot be tough.

Ruoning didn't say much when she heard Hua Ye's words. After all, she was now the fourth-generation divine body. Even if Kunpeng and Maivis, Hua Ye's confidants, were promoted to gods, it wouldn't matter. They would not threaten her status.

And she also felt that their current strength was too weak to gnaw down Merlot Heavenly Court, so they could only find ways to strengthen themselves.

The third generation of gods is not backward even now.

"Karl may not necessarily give it to us. If our power is too strong, it will not be easy to control. He should want to strengthen your control over Tianzha. However, if there are too many powerful Tianzhu, power will easily be dispersed."

Ruoning said.

Hua Ye frowned, remembering how he was overthrown.

"This kind of thing, I will never let it happen again."

Hua Ye said confidently that the void engine is the most powerful advanced technology in the known universe, not to mention that he has experienced the power of the black hole engine.

"Actually, with our current capabilities, it's not impossible to upgrade them, but at best we can promote them to pseudo-third-generation super soldiers, which won't be of much use."

Ruoning continued.

"The fake third generation is also the third generation. If you don't have it, you have to have it. What we need now is strength!"

Hua Ye said decisively.

Ruoning was too lazy to explain to Hua Ye that generational differences did not mean combat effectiveness.

But there's nothing wrong with having a few fake third-generation super soldiers, they just fill up the scene.

Unexpectedly, Karl, the God of Death, did not reject Hua Ye's request.

For Karl, the god of death, he doesn't care about these things, he just wants a result.

If Hua Ye takes the things and refuses to work, Karl, the God of Death, can directly control him and his henchmen.

After all, it's hard to believe that Karl, the God of Death, wouldn't leave any backdoors in these divine bodies and genetic engines.

Ruoning really had such a guess, mainly because the God of Death, Karl, agreed too readily, making Ruoning aware of this possibility.

This made Ruoning not know what to do. She also wanted to restore the Heavenly Palace era by controlling Hua Ye, and make male and female angels equal.

Doesn't it become Karl's heavenly palace now?

Karl controls Hua Ye to control Tianzha, so who is she?

In fact, Karl later controlled Tianzha through Sumali.

...

Liang Bing was originally looking for a good show, but she didn't expect that He Xi couldn't do anything to Hua Ye, and Hua Ye couldn't do anything to He Xi, and then the two actually separated.

This gave Liang Bing a headache.

"No, what's going on now?"

Liang Bing wanted to run away, but she couldn't escape if Luther didn't let her run.

It's just that the last time Luther gave her the bat-winged silver blade, she successfully PUAd Liang Bing. Recently, Luther feels that Liang Bing is much more enthusiastic.

Although he still ignored him, Liang Bing didn't care about it, because Luther's performance showed that he didn't really regard himself as a human being.

This was enough. Liang Bing didn't know what he was thinking. It was probably a lie to admit that he was interested in Luther, but it was true that he wanted Luther's benefits!

But compared to Karl, the God of Death, who gave whatever he wanted, whatever he had, and who had to find a way to give whatever he wanted, she stalked Luther and could be happy for a long time even if he pried out a silver blade. I fell in love with this silver blade so much that I even installed an engine on it.

"Queen, there is something going on over there with the Kryptonian civilization!"

Sword Demon Atuo has seen his queen there in a daze more than once, stroking the bat-winged silver blade.

However, he still obeyed the queen's order and informed the queen if there was any movement in the Kryptonian civilization.

This kind of thing should have been done by Ge Xiaolun, who is now in great demand in the Demon Civilization, but Morgana still asked Sword Demon Atuo to do it. Sword Demon Atuo didn't think it was a disgrace to him as a warrior. He did whatever the queen asked him to do.

"What's going on?"

When it comes to Krypton civilization, Liang Bing's eyes lit up, and he put away the bat-winged silver blade in his hand, and then asked.

"They sent a dark communication to the entire universe."

Sword Demon Atuo said.

Luther had done this kind of thing before, but now he did it, of course, to stir up trouble.

"Krypton civilization announced that all Shenhe civilizations and beast civilizations in the known universe sent a message. Krypton civilization was officially renamed Tiandao civilization, and from today on, God King Luther reigned in the Milky Way. The Milky Way does not welcome any illegal invasion. Violators will be punished no matter how far away they are, and they will be killed without mercy!"

Luther's way was very troublesome. After all, everyone knew that the power of the galaxy was the main god of the Milky Way in the future.

Of course, in the eyes of the angels, especially He Xi, there is nothing wrong with Luther doing this, because he has the Galaxy Power super gene.

But some people certainly don't think so.

As for why he changed his name to Tiandao, it's called preemptive registration!

And the name Tiandao is very big, while Krypton Civilization is a bit small.

"Why do you want to change your name?"

Liang Bing was confused, but Luther's name change didn't seem to have anything to do with her.

Then Liang Bing touched Luther.

Chapter 255 You treasure it, but I treat it as a piece of trash

"Luther...why did you change the name of your civilization?"

Liang Bing said to Luther.

"The king is happy."

Luther glanced at Liang Bing and then said.

"That's right, our Kryptonian civilization changed its name to Tiandao civilization. What does it have to do with you?"

Angel Leng crossed his hands and looked at Liang Bing contemptuously.

"Hey, this roast chicken has such a bad temper. Could it be that he was drinking a cold drink just now?"

Liang Bing was not used to Angel Leng and directly retorted.

Angel Leng was immediately furious. Drinking cold drinks was something that Angel Leng had never been able to accept, mainly because he made up a term for it.

But it was really because of this kind of thing that she came back today. Luther said he wanted to drink a cold drink, and then Angel Leng had to come back.

Who makes her a guardian angel.

"Don't make any noise. Today, I want to eat smoothies and drink cold drinks!"

Luther directly put an end to the heated argument over icy products.

Yes, if the debut combination of Liang Bing and Du Qiangwei is "Ice Sculpture Rose", Angel Leng and Liang Bing are "Bing Bing products".

Luther likes to eat smoothies and drink cold drinks the most.

After it was finished, it was already a matter of 10 million words, and both Liang Bing and Angel Leng died.

"Is the Tiandao Civilization the real name?"

Liang Bing got an answer from Luther about Luther deceiving her.

The Kryptonian civilization is just a disguise, and the Tiandao civilization is Luther's civilization.

However, Luther did not call him the Emperor of Heaven, but the King of God.

Liang Bing doesn't care whether the answer is true or false.

...

"Tiandao Civilization... Another Tiandao Civilization..."

Lianfeng's mood was complicated. After listening to this secret communication, Lianfeng didn't know what to say.

In the past, the Lieyang civilization was called Tiandao, but later they changed it to Lieyang civilization. Now the Kryptonian civilization has changed its name to Tiandao civilization.

And their battle celestial body is called "Supreme Heaven".

Coupled with the "Yunxiao Heavenly Court" of the Lieyang Civilization and the "Mello Heavenly Court" of the Angel Civilization, there are three heavenly courts in this known universe.

But the most majestic thing now is of course the Supreme Heaven.

The huge combat celestial body is comparable to the Blue Star in terms of size alone, and will serve as the main star and location of the Tiandao civilization, just like the Merlot Heavenly Court.

It's just that there are not many female angels in Merlo Heaven. The retired old angels are basically scattered on various planets in the Angel Nebula.

I don't know if Luther's Tiandao civilization will do the same in the future, scattering the super soldiers and gods of Tiandao civilization in various places in the galaxy.

"It will be very difficult for Xin Zhao to become the Lord God of the Galaxy in the future."

Lianfeng frowned, Xin Zhao was their last hope, the power of the Galaxy, unlike Ge Xiaolun, the child Xin Zhao was still very obedient, except for being a little reckless, but he could learn and work hard.

Not to mention Zhi Xin had the patience to teach him.

Angel Zhixin's match with Xin Zhao is already a pre-arranged procedure. Even if Galactic Force Ge Xiaolun is contaminated with Angel genes, this will not change, because the issue of time is difficult to say clearly. What if Angel Yan can bring Ge Xiaolun back again?

It's just that they didn't expect that the power of the galaxy would be transferred to Xin Zhao.

Angel Zhixin was also confused, but she didn't say anything, mainly because she didn't know who to say to now.

Sister Yan? Sister Yan was kidnapped by Morgana, and now her life or death is uncertain.

master? The master probably didn't have time to pay attention to her little apprentice.

Therefore, Zhi Xin can only study the adaptation problem of Dexing Gun and Galaxy Power while teaching Xin Zhao to learn.

Lianfeng was prepared for a long struggle in the future. After all, she had to carry out the instructions left by General Dukao to the end.

But all this was destroyed by Luther.

Du Qiangwei received the order from the Supreme Heaven, so she went to the Supreme Heaven to meet Luther.

I thought it was Luther who wanted it, but it turned out to be the first thing Luther said.

"Rose, I plan to make you the power of the galaxy!"

This sentence was so shocking that Du Qiangwei was shocked and speechless.

She didn't know how to answer this question.

Become the force of the galaxy yourself?

Not only once, Du Qiangwei heard from her father and Aunt Lianfeng how important the Galaxy Power was and how promising it was.

She also heard about the Kryptonian civilization from Luther... Now it is the Tiandao civilization that disdains the power of the Galaxy and expresses its intention to mass-produce it.

It's just that Aunt Lianfeng didn't believe Du Qiangwei's words. She was dubious, mainly because the values established since childhood are not easy to change.

But she didn't expect that this day would come so suddenly, so unexpectedly.

She originally thought that it would take a long time for the Tiandao civilization to decipher the power of the galaxy and mass-produce the power of the galaxy. In the best case, it would take hundreds of years.

But I didn't expect that even a month has not passed yet!

"I-can I really do that?"

It took Du Qiangwei a while before she came back to her senses. That was the power of the Milky Way. Among the three major god-making projects, the most anticipated super gene was said to have an unstoppable future.

Du Qiangwei hated Ge Xiaolun's incompetence and betrayal, hated that iron could not become steel, and hated that she was not the power of the galaxy.

As a result, now, as if in a dream, this thing was in front of her.

"Of course, you are my princess after all."

Luther said indifferently that he also made a plug-in version for Qilin. After all, Qilin herself is a Lutheran Protoss and does not need a super gene like the Galaxy Power, so Luther gave Qilin a Galaxy Power super gene shell.

That is, others detected that it was the Galaxy Power, and she could also use various abilities of the Galaxy Power, but it was not the Galaxy Power.

Luther felt that nothing was more shocking to the people of the Denor civilization than Du Qiangwei becoming the Galaxy Power.

If the Galaxy Power appeared in the Heavenly Dao Civilization, they might still think that it was the Galaxy Power of the Heavenly Dao Civilization, which must be different.

But if Luther directly upgraded Du Qiangwei to load the Galaxy Power super gene, it would be equivalent to telling them that the Heavenly Dao Civilization really didn't care about the Galaxy Power super gene, and it was so cheap that it could be given directly to a princess.

This is a treatment that only the queen can get, but the problem is that there is no such record in the known universe.

And the Queen of Heaven, that is, the Queen of Heaven, is Qilin.

So no matter what, this kind of advanced technology cannot be given to Du Qiangwei.

It must be very uncomfortable to think that the things you cherish and hope for are given away by others at will.

Du Qiangwei felt like she was in a dream, so dreamy that she didn't even know when she had completed the loading of the Galaxy Power Super Gene.

"Aunt Lianfeng, you are wrong."

Du Qiangwei returned to Blue Star with the Galaxy Power Super Gene and went to find Lianfeng as soon as possible.

Chapter 256 You are behind, old antique

"What's wrong?"

Lianfeng didn't know why.

"With the help of His Majesty the God King of the Tiandao Civilization, I have been upgraded to the power of the Galaxy."

Du Qiangwei said to Lianfeng.

Angel Zhixin and Zhao Xin happened to be here with Lianfeng. Hearing Du Qiangwei's words, Zhao Xin was speechless.

"Galaxy Power? Has mass production really been achieved?"

Xin Zhao said in surprise.

But his surprise was different from Lian Feng and Angel Zhixin's surprise, they were the two really surprised.

"Impossible. The power of the Galaxy is not compatible with your Space-Time Rose super gene. How is it possible..."

Lianfeng used Deno No. 3 to detect Du Qiangwei's dark data. Because Du Qiangwei did not block her own dark data, she detected it directly.

[Detection target... Kamigawa body... Du Qiangwei...]

[Detection successful, the target super gene engine is a dual-core engine...]

[Rose of Time and Space Super Gene Engine and Galaxy Power Super Gene Engine...]

[Detection target...the third generation Tiandao version of the divine body...]

Lianfeng was completely stunned.

Dual-core engine, Space-Time Rose Super Gene Engine and Galaxy Power Super Gene Engine? ? ?

How is this possible!

When they helped Xin Zhao load the Galactic Power super gene engine, they didn't know how long they had been working on it to avoid the collapse of the German Star Gun super gene engine. Angel Zhixin had been busy for several days and had no time to talk to Xin Zhao. Tired of it.

After all, although the German Star Gun is inconspicuous, if it collapses, it will affect Xin Zhao's life and safety, not to mention the load of Galaxy Power.

In the end, how long had Du Qiangwei been gone?

It didn't even last a day, and when I came back, I was already driven by a dual-core engine, not to mention upgraded to a god and got the third-generation Tiandao version of the divine body.

Angel Zhixin also tested it and got the same result.

This made Angel Zhixin look confused and didn't know what to say.

Their angel civilization had been looking forward to it for so many years, and Sister Yan's future became her future. As a result, the Tiandao civilization achieved mass production of the Galaxy Power super gene, and Du Qiangwei became the new Galaxy Power?

Angel Zhixin was as confident as Lianfeng before, thinking that it was impossible for the Tiandao civilization to replicate the power of the Milky Way. That was the power of the Galaxy, the highest super genetic engineering in the known universe, no one else!

But now, she could only look at Du Qiangwei's dark data in silence like Lian Feng.

Their silence was deafening.

"What's wrong, wife?"

Xin Zhao still didn't understand why Angel Zhixin suddenly fell silent.

"It's the Galaxy Power super gene. The Galaxy Power super gene in Rose's body has unlocked the permissions of our angel civilization. I don't know if the permissions of the Super Seminary have been unlocked, but..."

Angel Zhixin looked at Xin Zhao. Xin Zhao had not yet unlocked the authority of Angel Civilization.

Those were the three tests set by her master. Even Zhi Xin couldn't go through the back door, because this was to select the future for the angels, so of course it was better to be more rigorous.

If it cannot be solved, then the power of the Galaxy is no different than useless.

"So powerful?"

Xin Zhao has experienced the difficulty of unlocking those permissions.

"Tiandao civilization cracked the power of the galaxy..."

Lianfeng sighed. If it were not cracked, it would be impossible to unlock the permissions. Even she could not understand how Tiandao Civilization cracked it.

And what's going on with this third-generation version of the Divine Body?

"His Majesty Luther told me that the computing power of the third-generation Tiandao version of the divine body is comparable to that of Deno III. It has dark energy drive technology and can convert dark energy into kinetic energy, electrical energy, and thermal energy. It can punch tens of millions of tons with one punch. Power, and it can ignore the explosion of a nuclear bomb with a yield of 10 million tons."

"Then it also has the ability to soar into the clouds and ride on the mist. It can fly thousands of miles away with just one breath."

Du Qiangwei talked about her divine body. She finally understood why Reina kept emphasizing that she was a goddess and a god. She was different from them.

"Is this really the third generation divine body???"

Angel Zhi was shocked. She naturally understood their angel's third-generation divine body. Apart from having stronger computing power than the Tiandao version of the divine body, it really had no advantages at all in other aspects. For example, the dark energy driving technology sounded

terrible. On the street, the Xiongbing Company was the first to learn this and wormhole handling technology.

But the great gods of the universe are all driven by dark energy. Before the Void Engine came out, and without the Ansu Silver Martial and the God-killing Martial, the strength of the gods and super warriors completely depended on the amount of dark energy reserves and the technology to drive dark energy. .

"Is it great?"

Du Qiangwei asked in confusion when she saw Angel Zhixin's reaction.

"It's not very powerful, it's very powerful."

Angel Zhixin said seriously.

Under the same conditions, it is estimated that the angel version of the third generation divine body will be completely destroyed.

There really aren't many in the known universe that can compare to this heavenly version of the divine body.

At a glance, one can see how powerful the Tiandao civilization is just from this third-generation divine body.

Their dark energy driving technology is so powerful that they can kill many third-generation gods just by boxing.

Lianfeng felt that all her thoughts were gone. Her persistence had lost its meaning. Luther used a Galaxy Power super gene to shatter all her delusions.

She couldn't help but think of what Du Qiangwei said before. Luther commented that they had fallen behind, and holding a backward Galaxy Power super gene was some kind of treasure.

As a result, the power of the Milky Way is really nothing to Tiandao Civilization, and they have already achieved mass production.

Even with Du Qiangwei's identity, she can get the power of the Milky Way, not to mention the other gods of the Tiandao civilization.

Thinking of the Nuoxing God of War, which was previously improved and then mass-produced, if Galaxy Force were also mass-produced, the three major god-making projects would be completely worthless.

"How could this universe change so much?"

Lianfeng couldn't help but ask himself.

"Rose has the power of the Galaxy, so I won't need such a big responsibility in the future?"

Only Xin Zhao carelessly cared about this issue.

At this point, even the angel Zhixin can't answer Xin Zhao, because the power of the galaxy is no longer valuable, should Xin Zhao be allowed to shoulder such a big responsibility alone?

"The unstoppable future has now become a joke. Master, what should I do?"

Angel Zhixin said in confusion.

Du Qiangwei just wanted to remind Lianfeng not to think about those things that have something but not something anymore. They have fallen behind and are worthless. She should quickly put down her petty thoughts while Tiandao civilization doesn't have much dislike for them.

"Where's Qilin?"

Lianfeng asked belatedly.

"Qilin is the queen of heaven. She is also equipped with several genetic engines, the power of the galaxy, the God of War of Krypton, the light of the sun, and it seems that she has also been upgraded to a fourth-generation divine body."

Du Qiangwei said enviously.

Chapter 257 Wholesale of Galaxy Power

This time it was Di Leina's turn to not be calm.

She saw Qilin, who told her that she would also be the light of the sun in the future.

"Reina, just like you, I will have the Sunlight Super Gene from now on!"

Qilin didn't mean anything malicious by saying this, she simply thought that it could improve her relationship with Reina.

As everyone knows, her words made Di Leina furious.

"The light of the sun? How is that possible!"

Di Leina didn't believe it, and then she tested Qilin's dark data.

Finally, Di Leina found Luther in despair.

"Have you cracked the light of the sun through me, the goddess?"

Di Leina stared at Luther and said, in her opinion, this is the most likely thing, otherwise there is no way to explain why Qilin is equipped with the Sun's Light super gene, and it is still a sun without the gene lock of the Tiandao Tower. light!

Reina herself has the gene lock of the Tiandao Tower. How did Qilin circumvent the gene lock?

Reina thought for a long time with her stupid brain, and finally settled on Luther as a suspicious target.

"Is this king so unworthy in your eyes that you need to use that kind of thing to test your genes?"

Luther didn't expect that he had previously teased Morgana not to use herself as an analyzer to test his genes, but now Xiaohanbi suspected that he had used the sun to test her genetic engine.

"Of course not!"

Di Leina blushed. No matter what she did, she would never doubt Luther in this regard. She suspected that she was caught by Taotie and then rescued by Luther.

Her genetic engine was shut down at that time. Although it would not be easy to do what Luther wanted to do, the possibility could not be ruled out.

"Then you really underestimate me and my Heavenly Way. You regard the mere light of the sun as a treasure, but I have already demonstrated the ability to create stars. In the field of star technology, your Lieyang Civilization is simply not as good as our Heavenly Way. "

Luther said calmly.

Di Leina suddenly remembered the things that shocked her before. The Lieyang Civilization had thought about the technology of making stars, but in the end it only developed an incarnation of the sun, that is, Di Leina turned into a sun herself. Illuminating the void of fear.

If it could create stars, it wouldn't be called the light of the sun. It should be called "the power of stars" or "the power of the sun" or something like that.

To put it bluntly, it's perfectly fine to call him "Sun God" or "Star God".

"Our Lieyang is also very powerful!"

Di Leina said without confidence.

"This is our way of heaven now."

Luther pulled Xiaohanpi into his arms and said.

"...You just said you were a blazing sun."

Di Leina obviously held a grudge very much, but she avenged this grudge on the spot.

"It doesn't matter. Once I conquer the blazing sun, it will become our heaven."

Luther said.

"You can also conquer the blazing sun. You won't be able to pass the solar wind test alone. Don't underestimate the blazing sun!"

Di Leina said unconvinced.

It doesn't matter, someone has already gone to the mine now.

Luther smiled and said nothing. He liked Lena very much. On the one hand, it was the Kryptonian's genetic instinct for light, and on the other hand, he liked Lena's unpretentious character.

Silly elder sister, little fool.

After basking in the sun, Di Leina ran away as if running away.

Angel Leng was approached by Luther again.

"Concubine Leng, how about I give you the Galaxy Power super gene?"

Luther's first words made the angel stunned and dumbfounded.

"What did you say?"

Angel Leng didn't know that Qilin and Du Qiangwei both had the power of the Galaxy. Wasn't she given cold drinks and smoothies by Luther before? Even her physical condition would take some time to recover.

Luther has unlimited physical strength! And it can evolve!

So Angel Leng has just recovered.

"Tiandao has cracked the Galaxy Power super gene. I want you to be my guardian angel and my princess. I cannot let you fail to get it."

Luther's words made Angel Leng deafen his ears, which was similar to Du Qiangwei's symptoms.

"How is that possible!"

Angel Leng doesn't believe that the power of the Milky Way will become something of heaven. Doesn't this make so many years of efforts of the angel civilization in vain?

Even though Angel Leng has always been a middle-class person and has never cared about this aspect, it does not mean that she does not understand the significance of the power of the Galaxy to Angel Civilization.

As a result, Luther now says that he has cracked the power of the galaxy?

"Du Qiangwei and my queen are already equipped with the power of the Milky Way. Not only that, but also the light of the sun and the Kryptonian God of War. I know that you regard the three major god-making projects as treasures and the future, but for me and Tiandao To put it bluntly, it is just backward super genetic technology, but the idea is good and it can become better if it is improved."

Luther said lightly.

Angel Leng paused.

"Really give it to me?"

Angel Leng asked hesitantly.

"certainly."

Luther nodded.

"How long will it take?"

After Angel Leng was sure that Luther was not lying to her, Angel Leng continued to ask.

"Now."

Luther said with a smile.

Angel Leng had doubts and accepted Luther's upgrade.

However, after the transformation was completed, she self-examined her own dark data and fell into confusion and confusion.

No, is this done?

Has he become the power of the galaxy?

Not only that, Angel Leng discovered that his angel gene had become the bottom-level super gene, and upwards it was the Galaxy Power super gene + the third-generation Heavenly version of the divine body!

This heavenly version of the divine body is much stronger than the third-generation angelic divine body that Angel Leng knows about.

If Angel Leng was just doing things for Luther before, and becoming a guardian angel was just a last resort sacrifice, now Angel Leng is also PUAed by Luther.

These things are worthless to Luther, but Angel Leng and the others don't know that they can't stand it.

Becoming a god is something that Angel Leng has never thought about. There is only one god in her mind, and that is Queen Kesha.

But it is impossible not to desire to become a god.

Angel Leng is very conflicted now. She is very sure that she does not have true love for Luther as Queen Kesha said. It is only a temporary solution coupled with the importance of angel civilization and Queen Kesha's oath of guardianship, so she has no choice but to do so.

Even Angel Leng herself didn't think she could gain much trust from Luther, so she thought of fighting to death as soon as possible. This wouldn't be considered a violation of the oath of guardianship. Drawing a sword to fight for him and then dying in battle would be fine, right?

As a result, Luther suddenly made a move, and Angel Leng felt an inexplicable feeling lingering in her heart. It was a feeling that she had not experienced in so many years, and it was indescribable.

"What exactly do you want to do?"

The angel asked Luther coldly.

"You have a death wish. I don't want my concubine to die."

Luther lifted her chin and said, after all, he was a bit tall, Angel Leng had to look up even when he was sitting.

Chapter 258 Lieyang is in trouble

Luther knows Angel Leng's character very well.

Don't think that just by tricking her into swearing a guardianship oath, the angel will follow her with all her heart.

Such a character is no longer angelic.

It's not that Angel Leng won't be moved, but for someone like Leng, the feeling of being moved is insignificant and not worth mentioning.

His mind is filled with justice and sacrifice, and he is bent on proving himself.

The oath of guardianship can only make an angel despair and give up on himself for a while, and then he will naturally want to fight to death.

She cannot accept the consequences of eternal love with anyone.

It takes a long time to break the ice.

Therefore, it is impossible for Luther to use conventional means and methods with her, and it is impossible for Angel Lengbi to attack her.

Of course, if it was a match with Holy Kesha, the situation would probably be different.

When Angel Leng heard Luther's words, his first reaction was not that he was moved, but that this guy actually used his divine body to control his freedom in order to prevent him from leaving!

This heavenly version of the divine body must have Luther's backdoor. Angel Leng could still maintain herself and move when she was still an angel gene. Now, even if she wants to die in battle, it is impossible for her to do so.

The second reaction was doubt, am I that important to Luther?

Although she is Queen Kesha's high-level guardian angel, the number of high-level angels sounds very noble, but in fact it is just like that. Her status and identity are not as good as those of Angel Yan, and even Angel Zhixin is not as good as Angel Yan. Honor yourself.

In terms of appearance, Angel Leng thinks he is not bad, so of course he is not bad either.

Personality... Angel Leng Xunsi probably doesn't have a likable personality. She is not as gentle and gentle as Angel Lingxi, and she is not as good at teasing male gods as Angel Yan. It has been spread throughout the known universe that Angel Yan is best at teasing and seducing male gods. .

Why did Luther spend so much money on her?

Give Galaxy Power super genes and a divine body just to prevent her from dying in battle?

After much deliberation, Angel Leng didn't even think in that ridiculous direction. She thought it was impossible.

"The Tiandao divine body and Tiandao genes I gave you are called lightning genes. They are similar to the super genes of the German Star Gun. They can increase your movement speed. They are not Angel Yan's original lightning super genes."

Luther said that Angel Yan's ability to drive lightning comes from the dark energy driving ability of her original super gene.

This thing has the original super gene, and it also has very useless dark energy driving abilities. For example, it can use dark energy to temporarily strengthen the body and increase strength, or it can only create a fireball attack with lighter temperature.

These original super genes evolved through nuclear radiation mutation and became the super genes of Tian Zha's Tiangong era.

Today's super genes are all super gene engines. Dark matter computers are put into genes to enhance the capabilities of super genes.

"Lightning gene?"

Angel coldly tested himself and discovered the lightning gene that Luther mentioned.

There is an ability called "Flash Movement". According to the description, it converts dark energy drive into acceleration. Angel Leng can soar from twice the acceleration to a hundred times the acceleration, as long as the body can bear it.

It has no ability to control or create lightning, just acceleration, but Angel Cooling realized how terrifying and powerful this lightning gene is!

It is not that Angel's Wings of Time and Space cannot cruise at super-light speeds and travel to and from all corners of the known universe via the Insect Bridge and the Big Insect Bridge Station, but in normal combat, Angel's Wings of Time and Space can only maintain supersonic flight.

This lightning gene is pure acceleration!

what does that mean?

The key is that the acceleration of lightning genes is not just the speed of movement, it is acceleration in all directions.

Nerve reflex speed, thinking speed, and limb movement speed all accelerate!

Therefore, there will be no problem of being unable to react to abnormally powerful super genes.

It's hard to imagine how Tiandao civilization was developed.

"There are many powerful beast bodies in the edge space. This lightning gene is the original super gene from a beast warrior called Lightning Beast."

Luther seemed to see her doubts and said.

After the angels listened coldly, they came up with the idea that there are actually beast bodies in the edge space, but it seems normal. They just fought with the beast bodies and triangles in the known universe and won the physical war. The edge space of the unknown universe They don't know what the situation is.

There is nothing in Queen Keisha's database. Angel Leng couldn't help but wonder why no one in the known universe has wanted to go to the unknown universe for so many years?

Don't want to go simply because of incalculable reasons like the fog of war?

As a result, it is now invaded by the unknown universe in turn, and has no power to fight back against the absolute overlord of the unknown universe.

Not to mention that the known universe now seems to be preparing for internal fighting and holy war.

For a moment, Angel Leng's mind was filled with random thoughts.

No matter how you look at the known universe, it seems very irrational. The key is that the Tiandao civilization has not shown its aggression. They just occupy the Milky Way and probably will not attract attention.

"Your Majesty!"

Just when Luther wanted to continue using PUA tactics against Angel Leng, a God of War from Heaven quickly said to Luther.

"What's up?"

Luther's settings for these people are very complete, so basically if there is no big event, they will not disturb him.

"The Lieyang civilization seems to have changed!"

Luther then looked at the Lieyang Civilization, and then he knew what happened. It was just that the Nantianmen in the Tianmen system of the Lieyang Civilization was taken down again.

To be honest, in this regard, the Lieyang Civilization is really average. The defense of the Tianmen system is average. The former Sun Wukong could single-handedly defeat a group of "heavenly soldiers and generals" at the Nantianmen and then break into the Nantianmen.

It does not have the attack and defense power of the 19th line of defense of the Angel Civilization.

Of course, it is said that it was taken down, but in fact it was not. It was just that several god-level warships of the Lieyang Civilization escaped and entered the Nantianmen, and then they closed the Nantianmen.

Then a vast and vast starry sky fleet appeared.

Taotie, giant wolf, sky scum!

The Lieyang Civilization has been closed for too long, and the number of their super soldiers and gods is seriously insufficient. Because of participating in the wars of Devon Star and Promise Star a long time ago, their current population has been greatly reduced, and a few god-level warships can accommodate the population.

This is a super-god civilization. Can you believe that the population of a super-god civilization is so small?

Not only has the population dropped sharply, but the military strength is also not good.

Now that Hua Ye's army of scum has arrived, it is estimated that the same mistakes will be repeated soon, just like the original plot, and the Lieyang Star will be destroyed.

The Lieyang civilization is fighting stubbornly, and Pan Zhen, who has been scheming for 20,000 years, does not want to be in cahoots with the God of Death Carl.

Chapter 259 The Fiery Sun Will Die

So, Pan Zhen's character is very contradictory.

His previous character is a man of great strategic planning, knowledgeable, careful, and concise.

His later character changed. According to his previous character, he should be very clear that cooperating with the God of Death Carl is the key to the rise of the Lieyang Civilization, and it is not impossible to make the Lieyang Civilization the strongest super-god civilization in the known universe.

Even if he needs to surrender to the God of Death Carl, for Pan Zhen, he will use himself as a wall to block Di Lena. At that time, he will surrender to the God of Death Carl on behalf of the Lieyang Civilization, and the goddess will still maintain her divine power.

When everything is settled and the Lieyang Civilization has mastered the void technology, Pan Zhen will claim to be a sinner and abdicate, and make a sin edict or something. I don't know if the regent will do this.

But it's okay to do this, taking all the blame and the unbearableness of the Lieyang Civilization on himself. At that time, all the blame will be Pan Zhen's, and it has nothing to do with Lena.

Di Lena, the scorching sun queen, did not submit to the death god Carl, and was still the hope of the scorching sun civilization.

After some operations, Di Lena ascended the throne and became the goddess of the strongest civilization, and Pan Zhen retired.

In the end, he did not do so, but firmly refused the cooperation of the death god Carl on the grounds that the scorching sun civilization only wanted peace and prosperity, so the death god Carl sent Hua Ye's army.

"Boom! Boom! Boom!"

The solar wind destroyed the Taotie fleet.

However, there are as many aerospace-level reserve troops and legions as needed. The death god Carl has the strength of the entire Styx Nebula and has no shortage of aerospace-level fleets, so he does not feel sorry for their casualties.

Probably only the Taotie King Shihao felt sorry.

At the same time, Lena was also found by Luther, and then he told her about the scorching sun civilization.

"I want to go!"

Lena stood up and said without saying a word.

"Where are you going?"

Luther looked at the little fool and knew she would be like this.

"The Lieyang Civilization is my civilization after all. I am their goddess and their empress. I can't just sit back and watch!"

Lena said to Luther very seriously.

"The Yunxiao Heavenly Palace is gone. What do you think you can change if you go there? Will you flee with them or live and die together?"

Luther shook his head and said.

The Yunxiao Heavenly Palace was the battle celestial body of the Lieyang Civilization, but it is gone. Only a few god-level warships are left.

The Lieyang Civilization has fallen behind seriously. They look strong, but in fact they are already an empty shell.

Thousands of years ago, Sun Wukong alone robbed the family of their wealth and defeated all the heavenly soldiers and generals. For so many years, the Lieyang Civilization has not developed super soldiers and gods, even though they have accumulated enough resources to supply so many god-level genes to the Xiongbing Company.

I feel that I can't understand why the Lieyang Civilization wants to do this.

"The Lieyang Civilization has Pan Zhen as the regent, so you don't need to go."

Luther continued.

In the original plot, Pan Zhen was determined to die with Lieyang Star because of Di Lena.

Now, Dilena's whereabouts are unknown, Pan Zhen must not die like this, he has to find Dilena.

So Pan Zhen showed his strong strength.

Although the Nantianmen system no longer has wormhole energy, it has obviously been closed by the Lieyang civilization, but the Huaye army, supported by the death god Carl, still completed the invasion.

Deep into the heartland of the Lieyang civilization, the two sides launched an unprecedented fierce war.

Pan Zhen showed his power at this time, raising his hand to fire energy continuously. These micro solar flare bombardments can easily melt super soldiers and destroy the three generations of divine bodies. If it weren't for the consideration of the friendly side, Pan Zhen actually wanted to use a larger solar flare to solve it directly.

However, at this time, Hua Ye appeared, and he raised his hand and fired a purple high-frequency void energy attack.

Pan Zhen knew that Hua Ye was the real boss, and without saying a word, he was a star projection!

In this regard, Pan Zhen was much more decisive than Lena. He had no hesitation at all and even ignored his allies. It was possible that Pan Zhen had been laying the groundwork before, making Hua Ye think that he could make Pan Zhen hesitate, but in fact, it was to lure him out.

The area where Hua Ye was located was projected by Pan Zhen with small energy-storing suns, and then they all exploded.

Hua Ye's pupils shrank and his expression twisted.

"How many soldiers did Pan Zhen kill!"

Lena was anxious, but unexpectedly, Hua Ye's high-frequency void energy attack made Pan Zhen groan and fall to the ground.

The power of the star projection was terrifying, but it was impossible to offset and annihilate each other with the high-frequency void energy. It would only be that both sides would eat each other's big moves.

The surrounding heavenly soldiers and heavenly scum were all swept into the explosion of the star projection, and in an instant, they melted their flesh and bones, and disappeared into ashes!

However, Hua Ye still showed up, but his pair of wings turned into charred chicken wings. This was the first time that Hua Ye suffered a big loss at close range.

If he hadn't forcibly used the program branch left by the black hole engine to build a high-frequency void energy barrier, he wouldn't be much better now.

He could probably be resurrected by the Death God Carl.

Hua Ye originally planned to kill Pan Zhen, but at this time, one of the Four Knights of the Void under the Death God Carl, the Void Sunlight Nusa, took action and directly locked Pan Zhen up with a black lantern-like void weapon.

"With Dilena missing, Pan Zhen is very important to my God Carl."

Snow said to Hua Ye.

As for Nusa, he just folded his hands and didn't say anything.

"Carl, I was almost destroyed, and I must give this king an explanation!"

Hua Ye said unwillingly, what does Death God Karl mean.

Of course, he just regarded this as a bargaining chip for the deal. Being almost destroyed did scare Hua Ye, but that was it.

"Don't worry, as long as you obey the will of my God, you will have milk and bread."

Snow appeared with Nusa, and said with a somewhat arrogant expression.

"Only by following the footsteps of my God can your Tiangong continue to maintain the current high-singing and vigorous progress... My God Karl is the beacon of the gods of the universe."

Lena gritted her teeth and looked at Luther.

"Help me, Luther!"

"What identity do you want me to help you?"

Luther said with a smile.

"If I take action this time, it will not be a problem to solve them, but Death God Karl will not give up. Hua Ye may be upgraded to the fourth generation of God by Death God Karl, which is equivalent to having one more powerful enemy in the future of Tiandao civilization."

Luther continued.

Lena is a god, a great god at the level of a main god. She naturally knows a lot about the affairs between civilizations, and is also very clear that what Luther said is not just speculation, but a very likely thing.

The reason why the known universe situation is so chaotic and orderly now is entirely because Luther's Heavenly Dao civilization has not shown much aggression.

Chapter 260: Heavenly Dao appears and suppresses everything!

When the Heavenly Dao Civilization did not make any move, the Death God Carl would naturally ignore the Heavenly Dao Civilization. Even the Taotie Civilization and the Giant Wolf Civilization that were originally in the Milky Way were called back by the Death God Carl and given to Hua Ye.

The two sides now maintain a tacit understanding that if the enemy does not move, I will not move, and then the Death God Carl is busy with his own goals.

He will not deliberately target Luther before Luther shows hostility towards him.

In this case, if Luther takes action, it will be the hatred of blocking the way.

The hatred of blocking the way is irreconcilable.

However, Luther does not really care about the reaction of the Death God Carl. Even if the ultimate fear comes to the entire Super Seminary, Luther is not afraid. There is nothing that can threaten him, so Luther is actually on vacation and leisure.

The Super Seminary Universe has now become Luther's home, and the Marvel and Dragon Ball Universes have become places for Luther to gain benefits and adventures.

After all, there are still things in those two universes that can threaten him.

The reason why Luther said this to Rena is that he wants Rena, the little fool, to completely return to his heart.

Reina still has the Lieyang Civilization in her heart, but what if Lieyang Star is gone?

Lieyang Civilization will be like this, where there are Asgardians, there is Asgard, right?

"..."

Di Reina is not stupid, she knows what Luther means, but after seeing that Pan Zhen is about to be taken away by the people of the Dead Song Academy, and the treatment is definitely not a good thing, she has to change her mind.

"I am your princess, I want you to send troops to save Lieyang!"

Reina made a decision, and then said to Luther very confidently.

Compared with Qilin, who became the queen but did not dare to exercise her power as the queen, Reina knew very well what she could get with her identity, so she naturally became decisive.

"Okay."

Luther nodded.

"This king will give you one hundred Heavenly Dao War Gods, five hundred Heavenly Soldiers and Generals of the third generation of super soldiers, plus Angel Leng, the Galaxy Power·Lightning War God."

Luther said.

After Angel Leng learned about the situation, her expression was very strange, but there was nothing she could say, because her identity was a guardian angel instead of a princess.

Therefore, there is no such thing as sending one princess to protect another princess.

"Love what he loves, my Leng."

Luther said to Angel Leng with a smile.

Angel Leng snorted coldly, and without saying anything to Luther, he took Rena and the troops sent to support Lieyang.

To be honest, Angel Leng felt that this lineup was invincible. Even if the enemy had void abilities or void equipment, they could crush them directly.

What is the concept of a hundred Heavenly Dao War Gods? Even if it is just the most basic "No Star War God·Modified" and "Krypton War God·Modified", they are also the top gods in the known universe.

Not to mention Rena, she is still in a trance.

"Is the old Lu family so arrogant?"

Rena said stupidly. This lineup is so luxurious that it can beat the Lieyang civilization. What moved Rena even more was that she only said a word, and Luther sent so many troops.

Originally, Rena meant that it would be very good to get a group of heavenly soldiers and generals, and the number might be only one hundred, or even less.

After all, they are the third generation of super soldiers. Even in the entire Angel Nebula, there are no more than thirty of them.

Although the Tiandao civilization seems to be worthless in bulk, the third generation of super soldiers is still very valuable, belonging to the three generals of a civilization.

"The heavenly soldiers and generals of the Tiandao civilization are all third generation super soldiers. The heavenly soldiers are mass-produced third generation, and the heavenly generals have special super genes."

Angel Leng and Lena were both reading the information. Before, they had no channels to understand the information of the heavenly soldiers and generals. These are all secrets of a civilization.

Then when Snow and Nusa were preparing to take Pan Zhen back to the Dead Song Academy as soon as possible through interstellar express, the silver-armored silver-winged heavenly soldiers and generals came in.

Their wormhole technology is stronger than that of the devil. It shows that they are like ghosts and ghosts, and they slaughter the heavenly scum, giant wolves and gluttons like cutting melons and vegetables!

"King Hua Ye!"

Kunpeng quickly blocked the heavenly sword of a heavenly soldier with a sword, but in front of the heavenly sword with some Su Yin added, his sword was directly cut out.

Suyin is not dark Suyin, but a mineral before dark Suyin is added with dark iron. Dark Suyin is an alloy of Suyin and dark iron.

Among the scum of the sky, only Sumali has the silver blade. The other scum of the sky use weapons from the ancient heavenly palace period. Although they are also alloys and can fight against the flaming sword, their strength cannot compete with Suyin.

"It is the heavenly soldiers and generals of the heavenly civilization!"

Ruo Ning controlled his dark Suyin weapon and quickly went back and forth through the wormhole, but was blocked by the heavenly soldiers and generals.

"Suyin weapon?"

Ruo Ning exclaimed. Ordinary weapons, even the flaming weapons and the killing gods, could not stop the silver blade. Only Suyin and dark Suyin could stop it.

Damn it!

In this way, the silver blade cannot play the effect of cutting melons and vegetables.

For the silver blade, the third generation super soldiers are just vegetables. No matter how many come, they can be killed in one second. However, if there are Suyin and dark Suyin, it will become very difficult to deal with.

Sumali was even more unbelievable, because he found that the group of golden armor and golden wings on the opposite side were all stronger than him.

He even had to summon the silver blade back, otherwise he would be killed by the opponent with one sword.

The God of War of Heaven appeared and directly swept and suppressed everyone.

Angel Leng and Lena didn't even make a move, and it was over.

Ruoning, Sumali, Snow, and Nusa were all beside Hua Ye, surrounded by the Heavenly Soldiers and Heavenly God of War.

"Uncle Pan Zhen!"

Leina hurriedly tried to rescue Pan Zhen, but Pan Zhen was imprisoned in the void cage and she had no way to rescue him.

"What does Heavenly Civilization mean? Does Luther want to intervene?"

Hua Ye shouted at the Heavenly Soldiers with an ugly face.

"Bold!"

A Heavenly God scolded Hua Ye. You can't mention the name of His Majesty the God King?

He directly condensed the power of killing God.

"Be careful, he has the Dark Silver Weapon equipped with the God Killing Engine!"

Snow was well-informed and reminded him immediately.

"What?"

Ruoning's eyes widened. Isn't it impossible to load the gene engine with the Dark Silver Weapon? Otherwise, Xingming would not have become a book-eating and face-slapping thing.

Of course, it doesn't mean that it can't be loaded at all, but it's very difficult and needs to be mixed with other alloys.

Ruo Ning knew this, but she didn't think that the Tiandao civilization would be so crazy as to install the God Killing Engine on the Dark Silver Weapon!

This is the maximum physical destruction special attack and energy destruction special attack!

"Hua Ye, quickly use the high-frequency void energy attack!"

Ruo Ning hurriedly said to Hua Ye.
