

Kryptonian 261

Chapter 261: Anti-Void Battle Black Hole Engine

Hua Ye condensed the high-frequency void energy without saying a word. He knew that he had little knowledge, so he completely listened to Ruoning's opinion at this time.

A purple-black ball of light instantly spread from Hua Ye's hand.

The Heavenly God of War struck out a sword at the same time.

The terrifying god-killing power is enough to easily destroy the third-generation divine body. Even the fourth-generation divine body will withstand a very difficult-to-suppress blow, second only to the void energy strike.

The result of the collision between the two sides was that the God-killing power was suppressed by the high-frequency void energy.

If it were the Taotie King Xihou, he would naturally not be able to do this. This is entirely because Hua Ye's black hole engine is too high-frequency, and it can condense into high-frequency void energy.

Even the equally powerful God-killing power cannot offset it.

Unless it is the God-killing power of the fourth-generation divine body, the powerful genetic engine will make the God-killing power undergo a qualitative change, which is enough to compete with and offset the high-frequency void energy.

The surrounding Heavenly Gods of War were affected.

Being hit by high-frequency void energy interfered with his own genetic engine.

Angel Leng received a prompt from his own genetic engine at this time.

[High-frequency void energy fluctuations have been detected. Will the void barrier be deployed?]

Void barrier?

Upon hearing this, Angel Leng roughly understood that it was a shield technology against void energy, and it should be a program branch of the Galaxy Power super gene installed on her by Luther.

Angel Leng hasn't had time to study the Galaxy Power super gene and develop and use gene functions, so he can only follow the prompts of the gene engine.

"Expand the Void Barrier!"

The angel gave a cold command, and suddenly a golden box fell from the sky, covering everyone present inside.

[A void energy strike has been detected. Do you want to remove the void energy impact?]

[Removing the influence of void energy...10%...50%...100%! Void energy effects are cleared!]

The void energy blow was cleared away almost like a countdown, and the God of War, Heavenly Soldiers, Heavenly Generals, and Reina all returned to normal.

The angel's eyes lit up coldly.

What a powerful genetic engine!

This was her first time to experience the power of this powerful genetic engine.

Is this the power of the galaxy that the queen calls?

"What's going on? My king's void energy..."

Hua Ye's eyes widened. He originally thought he could solve it easily. After all, when a high-frequency void energy hit, all the opponents fell down and became extremely weak.

As a result, suddenly his void energy was gone, and everyone on the other side recovered.

"What is this thing?"

Hua Ye quickly asked Ruoning and Snow, there was nothing he could do, these were the only two people around him who knew.

Snow looked at the golden frame thoughtfully and uncertainly, and said nothing for a moment, because he felt that the guess was too ridiculous, impossible, absolutely impossible!

"There is no such thing as an attack against void energy. There is a high probability that my stupid apprentice has a void engine!"

Ruoning stared at Angel Leng with bright eyes and said.

"She also has a void engine?"

Hua Ye said in surprise, feeling suddenly uneasy inside.

After all, Hua Ye has personally experienced how powerful the void engine is.

"What are you afraid of? Your black hole engine is Karl's highest masterpiece. That guy, the Taotie King Xihou, also has a void engine, but he can be easily suppressed by your void engine."

When Ruoning saw Hua Ye like this, she knew that he was timid again.

"That's different. The opposite side is the Heavenly Civilization. Who knows what Luther's turtle-sun's void engine will be like."

Hua Ye confidently defended his cowardice.

"Even if my silly apprentice is lucky enough to become Luther's guardian angel, Luther still can't give her the best void engine!"

Ruoning said with great certainty.

"So, the only gap between you and her is the gap in knowledge. When it comes to the void engine, you definitely have the advantage!"

"And my knowledge is definitely better than that of my stupid apprentice!"

Hua Ye was a little moved when he saw Angel Leng. He was only interested in female angels and looked down upon beauties from other civilizations. The heroic Angel Leng reminded him of the first Keshu.

If you can conquer Angel Leng and work with Ruoning, wouldn't you be master and disciple...

Ruoning knew from the look on Hua Ye's face that he didn't mean anything good, but it was just that little thing, and Ruoning didn't care.

Old angels like her are the ones who don't care about this kind of thing the least. After all, the ancient Heavenly Palace has experienced that kind of time.

Ruoning once took Keshu's place and was tortured by Hua Ye in every possible way.

Angel Leng quickly browsed his genetic engine at this time.

The Galaxy Power Super Gene Engine has no secrets to Angel Leng, and the various program branches are clear at a glance.

In addition, now that she has enough computing power, Angel Leng feels that her brain has been developed even more.

All these allowed Angel Leng to quickly master the basic functions of Galaxy Power.

First of all, this void barrier is used to clear away all void energy attacks. Of course, it also depends on the frequency of the void engine and the frequency of its own gene engine, as well as the computing power and energy support of both parties.

The second is the core function of Galaxy Power-anti-void ability!

At this time, Hua Ye followed Ruoning's instructions and used his own black hole engine to detect Angel Leng's void engine.

As mentioned before, the behavior of this low-frequency void engine detecting the high-frequency void engine is equivalent to giving the other party a port for direct intrusion.

However, both Hua Ye and Ruoning were confident that they were the ones with the high frequency, so they carried out the test unscrupulously.

[Void invasion detected, do you want to activate the anti-void capability?]

The Galaxy Power Gene Engine reacted instantly.

"yes!"

Angel Leng had a thought, and the Galaxy Power Gene Engine activated its anti-void capability.

Hua Ye almost felt that in the blink of an eye, he was disconnected just after the invasion.

"What's going on, Ruoning, it seems that I can't invade your apprentice."

Hua Ye said in confusion.

"Impossible. Have you used the algorithm I gave you?"

Ruoning was startled.

"I don't even know how to use algorithms!"

Hua Ye immediately shouted unconvinced.

Enough is enough, you all despise me for not having read a book, and now you are questioning me for not even knowing how to use an algorithm.

"That's impossible, try again!"

As soon as Ruoning finished speaking, Angel Leng's counterattack came.

[Terminate the target algorithm!]

Hua Ye's void energy fluctuations suddenly disappeared.

"No more, Ruoning! Is there something wrong with your algorithm?"

Hua Ye said suspiciously.

Angel Leng had already floated up, with his feet floating in mid-air off the ground.

[Analysis target...]

[Analysis target: third generation Styx version of the divine body, second generation angel divine body]

[Import the Galaxy Power database...]

[Constructing the three-generation divine body structural strike function...]

Chapter 262 Angel Leng shows his might

[Enter the dark plane and start the Galaxy Power Super Gene Engine!]

[Open the operation interface to analyze the target!]

[Confirm the command: Invade the target gene system!]

[Target analysis: The target belongs to the Shenhe body life...]

[Estimated invasion difficulty...]

[The target energy value is detected to be 100%... The estimated invasion difficulty is 50%...]

[Recalculating the estimated invasion difficulty... The estimated invasion difficulty is 10%...]

[Accept the command: Solve the target gene architecture...]

[Import the technical data of the Shen body...]

[Import the gene architecture algorithm...]

[Accept the command: Solve the third generation Shen body gene architecture...]

[The target gene architecture is extremely stable... Solving difficulty is 90%...]

[Solving target: Internal equipment Styx version black hole engine... The core computing speed is 60 frequency...]

[Add angel gene strike function...]

[Additional advanced concept rewriting function...]

[Additional redefinition of space structure function...]

[Additional advanced void ability attack function...]

[Additional black hole calculation manufacturing function...]

[Start anti-void calculation, anti-kinetic energy, anti-void...]

[Import life energy algorithm, suppress target biological energy...]

[Import dark energy space algorithm, suppress target dark energy...]

[Create void isolation barrier...]

[Block the flow of time and space in the barrier...]

[Void isolation barrier concept setting, incomprehensible...]

Angel Leng's series of operations were as fast as lightning, mainly because her current computing power was much stronger than when she received the computing blessing of Queen Kesha.

More importantly, the anti-void ability of the Galaxy Force is fatal to all void engines. Special attack is more powerful than heaven, and it can directly kill gods!

Hua Ye, Ruoning, and Snow all felt suppressed by the anti-void ability and became extremely weak.

"What is this? I feel so tired!"

"Ruoning, didn't you say that your apprentice is not as powerful as my void engine? Bullshit, this is more powerful than me!"

Hua Ye scolded Ruoning weakly but angrily.

"Impossible!"

Ruoning frowned, not daring to believe what he saw.

"Is it still the time to worry about this? Hurry up and think of a solution!"

Hua Ye was speechless and said hysterically.

The angel looked at Hua Ye and the others coldly.

[Accepting the command: Analyze the target's core structure, analyzing]

[Analysis failed...]

[The target is continuing to resist...]

[Use void energy bombing!]

Angel Leng immediately chose void energy bombing Hua Ye.

Originally, it should have been dark energy bombing, but dark energy bombing is of course not as good as void energy bombing.

[Execute void energy bombing... one bomb...]

Hua Ye felt on the spot that some terrifying energy instantly destroyed his third-generation divine body and paralyzed his black hole engine.

The surging and terrifying void energy was destroying Hua Ye's body crazily and devouring his energy!

"Karl!!! Save me!!!"

"Karl! Kahl! Kahl!"

Hua Ye felt great fear, he was about to die.

[Second bomb!]

Crazy void energy output, a strange and powerful wave was expanding crazily in seconds.

The second void energy bombardment came!

Ruo Ning was also hit by a void energy bombardment. She couldn't believe that her apprentice was so powerful now!

Is the Tiandao civilization crazy, giving such a powerful void engine to their stupid apprentice?

Or, they just don't care, this level of void engine is just a piece of cake for them?

But that's not right, those heavenly soldiers and gods don't have void engines.

Ruo Ning's seven orifices and whole body are emitting black and purple light, that is the remaining void energy eroding and destroying her divine body. If she is not a fourth-generation divine body, she will fall to the ground and wail like Hua Ye.

However, the automatic aggregation function of the fourth generation of divine body can maximize the erosion and destruction of void energy without any waste.

Although Hua Ye became incomplete, the void energy of the bombardment had dissipated in the air because of his incomplete divine body. Ruoning's divine body automatically aggregated, and all the void energy was left on the atoms of her divine body structure, which was equivalent to absorbing the void energy into her body.

"Leng, I am your master!"

Ruoning struggled to say to Angel Leng.

"Master..."

Angel Leng looked at Ruoning steadily, and then sighed.

"You are no longer my master."

She did not intend to let Ruoning go. If she continued to live, it would only cause greater danger to the angel civilization, because she knew the angel civilization too well.

She was already the guardian angel of the Tiandao civilization, and with such a powerful super gene, Angel Leng's mentality had changed.

The main reason was that Luther did not seem to just want to play with her, otherwise how to explain the Galaxy Power·Lightning God·Leng?

In public and private, Angel Leng would get rid of Ruoning and Hua Ye.

But at this moment, Angel Leng suddenly felt something breaking into his void barrier.

This is impossible!

According to the data, the void barrier and dark energy space cannot be directly invaded, and the solution must be completed.

But Angel Leng did not get any hint of being solved.

Especially the anti-void ability of the Galaxy Force, which can make any calculation of the void ability, except Angel Leng and other Galaxy Forces, become a paradox or a logical error!

[Turn on the anti-void ability and stop all void algorithms!]

Angel Leng could only use the anti-void ability of the Galaxy Force in a hurry.

Then a purple skull swallowed Hua Ye, Ruoning, Snow Sumali and others before the second void energy bombardment, and then the second void energy bombardment collided with the purple skull, causing ripples in the space.

The power of this ripple even made Angel Leng and others retreat hundreds of meters. The majestic void energy instantly stirred the surroundings, and the extremely terrifying void fluctuations destroyed everything around.

"Don't try to run!"

Angel Leng raised his hand and constructed a new void barrier, which fell from the sky and covered the purple skull. As a result, the skull instantly moved and disappeared in space.

This made Angel Leng's eyes widen. The other party actually ignored the anti-void ability suppression in the void barrier?

How is this possible!

Lena said she didn't understand it at all. She saw Angel Leng floating up, and then the arrogant Hua Ye and Ruoning were crippled and injured.

Lena didn't understand, but she was shocked.

She realized that an invisible gap seemed to have opened up between her and the Lieyang civilization.

She couldn't even understand the battle between the two sides!

Because Angel Leng had just stopped all void calculations, the void cage that imprisoned Pan Zhen was finally unlocked, and Pan Zhen rolled out of the void cage in a mess.

Chapter 263: Lieyang Submits to Heaven

After Pan Zhen rolled out, he fell to the ground and could not move.

He was suppressed by the void power and became extremely weak. You know, even if Angel Yan only touched Hua Ye's sword later, her sacred body was suppressed by the void energy on Hua Ye's sword. If it weren't for Angel Qing Qing's desperate rescue, she would probably be dead.

Even so, Angel Yan could only watch Angel Qing Qing being killed and took the time to recover her energy.

Pan Zhen was just a third-generation god, not to mention how he was suppressed.

"Uncle Pan Zhen!"

Lena hurriedly helped Pan Zhen up. It was the first time she saw the old and majestic Uncle Pan Zhen so weak.

This made Lena realize that she was very flustered. She always felt that Uncle Pan Zhen was too strict with her.

But seeing the trusted minister and the regent fall with her own eyes, Lena felt that she was not ready yet. If Pan Zhen got into trouble, could she hold up the sky of Lieyang civilization?

She had not realized this problem before, but now that Reina had experienced so many things, she had realized it.

"Is it the goddess?"

Pan Zhen looked sideways in a trance, and when he saw that it was Reina, he let out a long sigh.

Before, he had not received any news about Reina, and Pan Zhen had been thinking about looking for people all over the universe, and he must find Reina.

But he did not expect that the Lieyang Civilization would face such a day.

"I'm sorry, Uncle Pan Zhen."

Reina said hurriedly.

"Reina, my goddess, Lieyang Civilization is no longer safe. The Death Song Academy has set its sights on you and the Light of the Sun..."

Pan Zhen knew what the purpose of the God of Death Carl was, which was for the Light of the Sun of their Lieyang Civilization.

And now Lieyang Civilization is no longer safe.

Being easily destroyed by a dog released by the God of Death Carl, Pan Zhen felt that the known universe had changed too much, and he and Lieyang Civilization probably knew too little about the known universe now.

"Don't worry, Uncle Pan Zhen, they have been driven away."

Reina said immediately.

Pan Zhen smiled bitterly. Even now, Reina is still so naive.

"Thank you, His Excellency Angel Leng... Your Highness for your support, and thank you all the Heavenly Dao."

Pan Zhen then looked at Angel Leng and the others.

The reason why he changed his name to His Highness was, of course, because Angel Leng had been promoted to God.

"No need to thank me, Reina is my Heavenly Dao Princess. This time, Reina fought for it with her own identity."

Angel Leng said calmly.

Hearing this, Pan Zhen began to think about the scheming in his chest.

At present, Pan Zhen knew that the Lieyang Civilization was doomed. It was already very good for Reina, the princess, to win the support of the Heavenly Dao Civilization, although Pan Zhen felt very embarrassed to say that the Empress of the Lieyang became the princess of another civilization, and felt sorry for His Majesty Emperor Hongkun.

It's a pity that the Heavenly Dao Civilization is now powerful, and the Lieyang Civilization has suffered heavy losses, so it is not qualified to fight for anything for Reina.

It's better to say that Reina has now won a situation for them that the Lieyang Civilization will not be destroyed.

But then, as long as the light of the sun is still here, Pan Zhen has no confidence that he can resist the covetousness of the Death Song Academy, and how long can the Heavenly Dao Civilization help the Lieyang Civilization because of Reina?

Heavenly Dao... Heavenly Dao...

Is this the fate of the Lieyang Civilization?

Pan Zhen's series of ideas were all completed in a femtosecond.

"Goddess, I hope to meet the God King."

Since the word "meeting" was used, Reina naturally realized Pan Zhen's thoughts.

"Pan Zhen..."

Reina couldn't believe it.

Angel Leng thought Pan Zhen was decisive enough.

When Luther heard that Pan Zhen wanted to meet him, and after Reina came back, he looked worried. Seeing that he was hesitant to speak, Luther guessed the answer to the matter without telepathy.

Sure enough, as soon as they met, Pan Zhen knelt on one knee.

"The Lieyang Civilization is willing to offer the light of the sun, and only asks the Heavenly Dao Civilization to accept the submission of the Lieyang Civilization."

Without any hesitation or bargaining, even Luther was a little surprised by Pan Zhen's decisiveness.

"This is submission, not merger, nor asylum. Have you asked the Sun God?"

Luther looked at Pan Zhen and said.

"My God has agreed."

Pan Zhen lowered his head and said.

The Sun God Emperor Hongkun can only be regarded as a remnant of consciousness now, or a dark data backup after his suicide.

It can be said that he is Emperor Hongkun, or he can be said to be the Sun God.

What the Lieyang Civilization wants is peace and prosperity. Now, the light of the sun that they are proud of can't give them such peace and prosperity, so after realizing this, Pan Zhen decided to let the Lieyang Civilization submit to the Heavenly Dao.

It's not that Luther's charm is too great, but that the Lieyang Civilization has few choices in the known universe now.

The Death Song Academy worships death and turns the Styx Nebula into a thorough death nebula, where only beasts can survive. Pan Zhen and the Lieyang Civilization will not consider it at all.

Then there is the declining Angel Civilization and the re-emerging Heavenly Scum Civilization.

Pan Zhen has also considered the former, but the problem is that after joining the Angel Civilization, it will be impossible for the Fiery Sun Civilization to continue to maintain its divine power.

And at this time, it is very likely that it will have to fight against Heavenly Scum and the Styx together with the Angel Civilization.

You should know that the Lieyang Civilization was just seriously injured, and it was with the support of the Tiandao Civilization that it repelled the Tianzha Army. The Tianzha Army is still entrenched in the Tiandao Galaxy. Even if they want to surrender to the Angel Civilization, the Angel Civilization probably does not have the ability to support them.

There is no need to consider the Tianzha. There is no difference between surrendering to the Tianzha and surrendering to the Styx.

The Tiandao Civilization, which was domineering and unparalleled when it appeared, and still maintains a strong power to sweep everything, is their best choice.

With the strength of the Tiandao Civilization, this time the support is obvious. The arrogant Hua Ye, who made the Lieyang Civilization helpless, was directly beaten away. Even if it were not for the death god Carl, Hua Ye would have died here.

Not to mention, the goddess Lena also became the princess of the God King Luther.

Although she is not the queen, this identity can do a lot of things.

"Do you know the rules of the Heavenly Dao? The will of this king is absolute, and no one can oppose it."

Luther said to Pan Zhen.

"Of course, the God King is supreme."

Pan Zhen said respectfully.

Now there is no time for Goddess Reina to grow up. The situation in the known universe is complicated. Pan Zhen no longer has the confidence to keep Lieyang. It is better to sell it for a good price.

"The Light of the Sun, I don't think highly of it, but for Reina's sake, I agree that Lieyang Civilization will submit to the Way of Heaven."

Luther summoned Reina and said to Pan Zhen.

Chapter 264: The Ninth Heaven of Heavenly Civilization

Leina was in a complicated mood. Luther called her here just to talk about this kind of thing?

Lieyang will be Tiandao in the future, and it is not a subordinate civilization, but a thorough part of Tiandao.

The key is that after Pan Zhen announced this, he actually got the recognition of many Lieyang people.

After all, Lieyang civilization was called Tiandao in the past.

Now that they have joined Tiandao civilization, isn't it acknowledging their ancestors?

Of course, this certainly cannot be regarded as acknowledging their ancestors, but Pan Zhen did not expect that the people of Lieyang civilization would recognize Tiandao civilization so highly.

Not to mention Pan Zhen, Leina did not expect it.

Lieyang Star must not continue to stay. If it stays here, Tiandao civilization will have to pass through the Great Insect Bridge and Insect Gate to provide support.

The distance between Tiandao Galaxy and Milky Way is calculated in light years.

And Tiandao Galaxy is much larger than Milky Way.

Pan Zhen made a suggestion.

"Your Majesty, why don't you transfer Tiandao to the Tiandao Galaxy? Wouldn't that be more legitimate?"

When Lena heard Pan Zhen's words, her eyes lit up and she looked at Luther.

"Yes, Luther, let's go to the Tiandao Galaxy. The Milky Way is for Ge Xiaolun... for Zhao Xin."

Originally, Lena was still used to talking about Ge Xiaolun, but then she realized that Ge Xiaolun had already joined the devil, and now it was Zhao Xin's era.

"I'll go wherever I like."

Luther glanced at Lena and said.

Lena sat on Luther's thigh without saying a word.

The heavy August 15th is very important, and it is not inferior to Du Qiangwei's big ass!

Luther sat upright, what does it mean, do you think I am a tyrant!

"Then your Majesty, Lieyang and Tiandao are now a family, when will they be arranged to become heavenly soldiers and gods?"

Lena leaned on Luther and said carelessly.

Pan Zhen frowned, looking at Rena's skillful and unroyal appearance, Pan Zhen didn't know what to say.

This kind of flattering behavior should not be done by Rena with her identity!

Of course, Pan Zhen also knew that Rena was thinking about the Lieyang civilization. If she could become a heavenly soldier and god of the Tiandao civilization, she would be truly integrated into the Tiandao civilization.

Otherwise, the Lieyang civilization would be nothing but a rootless duckweed.

They have no lack of courage to sacrifice, and they are not afraid even if they sacrifice for the Tiandao civilization. They are just worried that they will not be treated the same as other people in the Tiandao civilization.

"I will arrange it, but there are many people in Tiandao who have accumulated military merits. Even if I agree, they have to wait in line."

Luther said calmly.

"I am willing to wait!"

Pan Zhen knew that Luther would not agree and arrange it all at once.

First of all, people have to test it to see if Lieyang really surrenders.

Secondly, what Luther said was true. Pan Zhen knew very well that precious resources like super genes must be coordinated by a super-god-level civilization, and the destination of each super gene would be arranged before it was produced.

And judging by merit is the most appropriate way, but the king of gods like Luther must have privileges, but the Lieyang civilization is not worthy of such privileges.

The king of gods has so many gods under his command, and he must also consider the opinions of those gods.

Don't the gods want to use public power for personal gain? They also have their own relatives and important relationships, and they must want to, but they just hold back.

For Pan Zhen, waiting is not a difficult or unbearable thing.

Moreover, if you can get super genes by making merit, the Lieyang people will definitely not be worse than anyone else!

Lena wanted to say something, but Pan Zhen used secret communication to signal Lena that she didn't need to continue.

"There is no difference between Lieyang and the way of heaven, especially here in this king."

Luther said.

This sentence made Pan Zhen feel much more at ease.

This means that no matter how others see it, it is the same for Luther. The words of the King of Gods must be more credible.

"I understand."

Pan Zhen bowed his head.

Then the original four guardians of the Lieyang civilization also became the gods of the Heavenly Dao.

The four guardians of the Lieyang civilization were also majestic in the past. After all, they were four third-generation gods. In the known universe in the past, they had an extraordinary status.

Now, it can only be said that they are not very impressive. After all, the Heavenly Dao civilization now has dozens of gods.

Pan Zhen also became one of the gods and was honored as "Pan Zhen God".

As for the Elders of the Lieyang Civilization, they are not gods, so naturally they do not have the same honorable status as before.

Lena's mood was very complicated at first, but when she saw the Lieyang civilization move their families, although there were not many people left.

But after these people came to the Heavenly Dao civilization, their living standards rose sharply.

This is a matter of course. In the past, Lieyang Star had to be maintained so that it would not explode. Now it lives on a combat celestial body created by Luther.

This battle celestial body is a well-deserved planetary celestial body-level super battleship. It is unprecedented and unique even in the entire Super Seminary Universe.

A battle celestial body comparable to the size of the earth.

There are also changes in the spatial structure inside the Supreme Heaven, which can actually accommodate a space equivalent to the area of 10 earths.

Then it is divided into "Nine Heavens"!

Mythology and legend say that there are nine heavens, but the nine in the nine heavens means the majority, and nine is the largest number among numbers, which means the limit, so the nine heavens refer to countless heavens.

The nine heavens here refer to the spatial orientation.

The center is called Juntian, the east is called Cangtian, the northeast is called Biantian, the north is called Xuantian, the northwest is called Youtian, the west is called Haotian, the southwest is called Zhutian, the south is called Yantian, and the southeast is called Yangtian.

These nine heavens are used to accommodate people from the Tiandao civilization.

However, of course, the Tiandao civilization did not have so many people originally. Now, in order to pretend, Luther created a group of them from his own empire dimension.

That's right, in fact, this nine heavens is Luther's empire dimension!

Here, Luther is an omnipotent, omniscient and omnipotent existence, and it is easy to create a group of so-called Tiandao people to fool them.

The people of Lieyang civilization were surprised to see so many Tiandao people here.

Did the Tiandao civilization bring the entire civilization?

Use a combat celestial body?

This is too arrogant, so they brought the base out during the war?

Then they found that the Tiandao people all had a point between their eyebrows, usually a silver vertical line, shining brightly, and some golden.

I don't know what these are for.

It was also the first time that Lena saw a Tiandao person, so she asked Luther in confusion.

“What is that thing on their forehead?”

“In your words, it's called a dark energy analyzer, and we call it [Sky Eye].”

Luther said calmly, this is also the key for him to let the Tiandao people distinguish others.

Chapter 265 What, you just got online?

"Sky Eye? That thing is an eye?"

Rena said in shock.

"As I said, it's just a name, of course not the eyes. They are the product of the genetic modification of our Tiandao people. They can condense dark energy and analyze dark energy."

Luther said as if you were making too much of a fuss.

"Can you condense dark energy?"

Leina was surprised, and so was Pan Zhen.

Improving the genes of its own civilians requires an exaggerated amount of genetic resources, something that even the Lieyang Civilization cannot do.

Not everyone belongs to the Ancient Tiangong. Even for the Ancient Tiangong, Hua Ye has only managed to arm millions of scum. There are still many people from the Tiangong civilization who do not have genetic resources.

That was still the original super gene, and the current super gene engine system is even more rare.

Has the Tiandao civilization achieved universal evolution?

Being able to condense dark energy means that people in Heaven basically have super genes. Even if they are primitive super genes, that is a very big deal.

"Yes, they can condense dark energy and convert dark energy into kinetic energy, so each of them is a first-generation super soldier, and some outstanding ones are second-generation super soldiers. Moreover, the Sky Eye can also launch dark energy to attack the enemy, with the power to blow up a Blue Star. It doesn't matter if it's a human tank or a Grand Canyon."

Luther said.

"No wonder the heavenly soldiers and generals are all third-generation super warriors. It turns out that the common people of heaven are all super warriors..."

Reina couldn't help but sigh. Compared with the Tiandao civilization, she instantly felt that the Lieyang civilization was like a rich country man. There were only a few servants guarding the courtyard and they thought they were invincible. Who knew that they had hundreds of thousands of troops.

Dozens of gods, thousands of heavenly soldiers and generals, plus who knows how many thousands of heavenly civilians.

Is this the background of an overlord in the edge space of the unknown universe?

Even Lieyang Civilization cannot catch up.

In fact, it is not an exaggeration. If the angel civilization had not stopped expanding its military strength, even female angels could have developed to this extent.

It's just that the female angel finished fighting Tianzha first, and then fought the physical war. After fighting the physical war, the angel and demon started again.

This is why the angel civilization has not developed the foundation that a super-god-level civilization or even a hegemonic-level civilization should have.

It also has something to do with the fact that they feel that enough is enough.

If nothing else, if the Tiangong civilization has developed to the present, there will be hundreds of millions of scum at least.

The people of Lieyang Civilization suddenly felt at ease and safe.

Such a powerful civilization itself can give people a sense of belonging.

"In this case, aren't Lieyang people and Tiandao people inherently different?"

Reina was keenly aware of this. Whether or not there was a celestial eye on her forehead was the difference.

The Lieyang people don't have such "Tongtian Patterns".

In this case, will the Lieyang people be discriminated against by the Tiandao people?

Although it is said that all the super-god-level civilizations have evolved, this is theoretically impossible.

But children are not, and as long as they have not evolved enough to be instilled with countless knowledge and understand this knowledge from birth, then this will definitely happen to them.

This is a human shortcoming and bad trait unless it is genetically eliminated.

"One step at a time."

Luther's words meant that he noticed this problem and would solve it.

Pan Zhen remained silent, he was also shocked by the foundation of Tiandao civilization.

If Lieyang Civilization wants to integrate, it must start to change from the ground up!

The people from Lieyang Civilization followed and were surprised to see everything.

Especially when they learned that people from the Tiandao civilization can actually live for hundreds of years, and they all receive combat training.

This surprised the people of Lieyang Civilization.

Is this a case of all people becoming soldiers?

Pan Zhen and the four guardians were not idle. They became gods, and the super warriors of Lieyang Civilization also became heavenly soldiers and generals.

They are all actively building relationships with their colleagues.

Then I learned about the unknown universe from my colleagues, which everyone in the known universe was curious about.

Logically speaking, the unknown universe cannot develop a cosmic tree structure model, and it is impossible to develop celestial-level supercomputers and wormhole technology. How can they traverse the unknown universe, which is a wider and infinite space than the known universe?

Regarding this point, although Luther has not visited the edge space yet, it is not a problem to come up with a solution to the problem.

He has read so many science fiction works. Isn't it easy to use it to deceive the people from the Super Seminary into a world view that is inferior to civilian science?

Besides, there is also a super brain.

Then there is a series of very mysterious quantum mechanical theories.

It is naturally impossible for them to not understand quantum mechanics, but because of the dark plane, the Super Theological Seminary was collectively led astray by the Kamigawa civilization and embarked on a wrong path. Therefore, their research on quantum mechanics is still just a theory, and even Didn't delve into it.

On the one hand, it takes too long to come to fruition.

On the other hand, there is unconditional technical assistance from the Super Seminary of Kamigawa Civilization. Once you get started, you can become the overlord of a party, live forever, and be promoted to godhood.

In this case, of course, we will continue along the path of the Super Theological Seminary. Quantum mechanics... Anyway, we have not yet produced any results.

Then more evil void technology appeared, and it became even more impossible to study quantum mechanics.

Knowing that the Tiandao civilization used string theory and quantum entanglement technology to achieve interstellar navigation in the unknown universe of the edge space, Pan Zhen and his friends were naturally very curious about this string theory and quantum entanglement technology.

However, this technology is the top secret of the Tiandao civilization, and only the God King Luther can master it at present.

Angel Leng, Qilin, Du Qiangwei and others all got the opportunity to enter the nine layers of the inner sky of the Supreme Heaven because of this incident, and also saw what a super-god-level civilization looks like.

Angel Leng felt unimaginable, the power of the Tiandao civilization has completely exceeded her imagination.

Not to mention, she herself has personally experienced the power of the galaxy, and Qilin and Du Qiangwei are both galaxy powers.

This is equivalent to having three void engines, which the angel civilization does not have!

Angel Leng naturally knows the power of the void engine. It was because of the void engine that Hua Ye made the angel civilization, which had been sacred and inviolable for tens of thousands of years, fall into decline.

He even almost defeated the angel civilization.

The void era is a new era.

Luther thought nothing was wrong, but he received a secret communication from Liang Bing.

"I heard that Lieyang has become a member of the Heavenly Dao? And Angel Leng, the roast chicken, beat away Hua Ye, the scum?"

Liang Bing said in shock.

"What, you just got online?"

Chapter 266 No, you came at the right time

Liang Bing couldn't refute Luther's ridicule that he had just connected to the Internet.

After all, she is studying Ge Xiaolun's galactic power, imagining that her demon civilization can use it to obtain the technology of the void engine.

The result was good. She had only been in seclusion for a short time when she heard the sword demon Atuo say that two major things had happened.

First, Hua Ye almost defeated Lieyang Civilization.

Second, Angel Leng beat Hua Ye away.

For Liang Bing, Lieyang Civilization's submission to Tiandao Civilization is not something worth taking seriously.

Angel Leng beat away the arrogant Hua Ye, and even almost killed Ruoning and Hua Ye, which was a big deal.

It was like a bolt from the blue to her.

It's not like she's never seen Angel Leng's roast chicken before. Is he so capable?

She knew very well how much pressure Hua Ye's attack on Merlo Heaven had put on He Xi. If it weren't for Luther's unclear attitude and He Xi's unfathomable background, which scared Hua Ye away, Melo would have It is really possible that Tianting will be defeated by Hua Ye.

Even so, Hua Ye is the most majestic person in the known universe today. Many god-level civilizations and aerospace-level civilizations do not even know the existence of Tiandao civilization. They only know that the sacred and inviolable angel civilization with tens of thousands of majestic angels is because of Hua Ye And the down-and-out people dare not seek justice even when they are attacked.

Therefore, in their eyes, Hua Ye is the most powerful god in the known universe!

In the end, Angel Leng was able to beat Hua Ye like this?

"Did you upgrade that roast chicken?"

Liang Bing said angrily that he and Angel Leng had debuted in the group "Icy Products", so Liang Bing was still very familiar with Angel Leng.

Mainly because Angel Leng's gene was tested at that time and there was nothing special about it, it was just Angel's gene.

But all fools know that Angel Leng's genes are definitely not as simple as Angel's genes now.

"It's nothing, I just loaded her with the Galaxy Power super gene and upgraded her to the third generation divine body of Heaven."

After Luther finished speaking, Liang Bing's eyes widened.

"Galactic power?"

Liang Bing has been studying the power of the galaxy recently, so he knows how powerful the power of the galaxy is.

"Have you cracked the Galaxy Power?"

Liang Bing asked in disbelief.

"Is cracking a galactic power something worthy of such surprise to me?"

Luther said very Versailles.

"Holy shit!"

Liang Bing is furious, that is the power of the Milky Way, the Space Principal is even the most advanced god-making project of the Kamigawa Civilization!

The original plot to inspire the power of the galaxy is very cumbersome and complicated.

Based on Dinghei's book, Ruiz judged that Ge Xiaolun's gene sequence was in a dormant state, which was consistent with Lianfeng's judgment, and that it was in a damage-invisible sequence. To reactivate the sequence, specific conditions were required to trigger it.

For example, the angel sequence loaded at the bottom of the Galaxy Power requires a piece of sacred code to be mobilized. The angel also used light radiation on Ge Xiaolun to try to awaken his

genetic engine, but failed. Ryze told him that the angel was not an old god. The people of the He civilization have different wavelengths of light radiation than the old-fashioned Kamigawa. However, it is not the key to activate the super gene energy. The wavelength is the key, or the authority.

With the authority of Sunlight, Galaxy Power and Nuoxing God of War were activated at the same time, and there may be others.

So Xiao Lun thought that he might have to wait for Lena to come back, but Riz disagreed. After all, Xiao Lun's serial lock was damaged and he couldn't open it with the key.

Liang Bing is still not allowed to get started because she lacks these steps, and the surviving scientists of the Kamigawa civilization created by the brainless screenwriter later built a cosmic tree somewhere in space. It is not the cosmic tree model we thought in the past, but It does indeed exist. It is responsible for the operation of various insect bridges. Its energy source is the artificial radiation energy of the Heart of Kamigawa, which is the key to unlocking the Ge Xiaolun sequence.

May I ask where Liang Bing is going to get this artificial radiation energy?

Liang Bing knows that Luther is very powerful, but are you too powerful?

“Your Majesty, Your Majesty, even Leng’s roast chicken has the power of the Galaxy, Bingbing also wants the power of the Galaxy!”

Liang Bing quickly changed his mind and said to Luther in a sweet voice.

"What you said made me feel a chill. You want the power of the galaxy. What is your identity?"

Luther started to feel CPU cold again.

"What is your identity... Your Majesty, I am your Daji."

Liang Bing said very understandingly, because she knew that Luther had transformed into a mortal and spent a long time in mortal life with Qilin, so she must know this meaning.

"You are a monster that brings disaster to the country and the people. I, the king, should stay away from you and kill you."

Luther said with a cold snort.

"Okay, will your Majesty come to Demon No. 1 to kill Daji?"

Liang Bing is still very heartwarming when she is shameless and skinless.

Anyway, Liang Bing felt that it was already done, so why not use this as a bargaining chip and condition?

If you don't use it if there are conditions, wouldn't you be an idiot?

God really doesn't pay much attention to this aspect of things.

Luther did not continue the conversation, but hung up the dark communication.

Liang Bing understood that he had to go there by himself.

"Really, do I, the Demon Number One, dislike the Queen so much?"

Liang Bing smashed the table angrily.

But there was no way, Liang Bing risked his life for the power of the Galaxy.

Otherwise, Liang Bing wouldn't know how many years it would take to research something from Ge Xiaolun just by himself.

In addition, the situation in the known universe is so turbulent now, Liang Bing also knows that he must seize the time to become stronger.

So she dressed up, took a shower, put on Luther's favorite pantyhose and uniform, and applied to go to the High Court.

That's right, she needs to apply even to go to the Supreme Heaven. Otherwise, what if she has the coordinates and is sold to the God of Death, Karl, by Liang Bing.

Although Luther didn't care, the problem was that he couldn't make such a big mistake in this common sense.

The coordinates of the Supreme Heaven are always changing, because the Supreme Heaven never stops moving.

After getting the new coordinates, Liang Bing went there without saying a word.

Then she saw Luther hugging him from left to right.

One is Angel Leng and the other is Du Qiangwei.

Reina pressed his shoulder with a pout, while Qilin was fiddling with something with a smile.

Liang Bing was startled, what is going on?

Queen, have I misunderstood? Luther didn't actually mean to call me just now?

"Did I come at the wrong time?"

Liang Bing couldn't help but said.

"No, you came just in time."

Luther said matter-of-factly.

This scene was something he could only do with his current status. Angel Leng had already returned home, but at least he didn't resist this situation.

Du Qiangwei didn't have so many thoughts. She accepted everything and was very obedient.

Chapter 267 Anti-Void Suppression

"Karl!"

Hua Ye was in shock, and his narrow escape from death made Hua Ye realize it completely!

He shouldn't provoke other people, just attack Merlot Heavenly Court honestly.

"King Hua Ye."

Karl, the god of death, also knew that Hua Ye must have been scared out of his wits this time, so he had to comfort him to prevent him from thinking about running away again.

Even Ruoning did, she almost died.

"The methods of Tiandao civilization are unfathomable. Even my stupid apprentice got the void engine and crushed Hua Ye."

Ruoning looked at the God of Death Karl and said.

"I already know about the void engine of His Highness Ruoning's apprentice."

The God of Death, Karl, used the black hole engine and Ruoning's fourth-generation divine body to master a lot of things in real time. In addition to the fact that he did not expect to encounter people from the Tiandao civilization, there was also the void engine.

"Yeah?"

Ruoning crossed his hands and planned to see what Karl, the God of Death, had to say.

"It's not that powerful, it's just a void engine equipped with anti-void capabilities."

Death God Karl said calmly.

"The core computing speed is 10 frequencies, which is nothing compared to King Hua Ye's 60-frequency black hole engine."

After hearing the words of Death God Karl, Hua Ye and Ruoning looked at each other.

"What?"

Hua Ye said that he was pressed to the ground and rubbed by that short skirt, and he had no power to fight back!

"It's naturally impossible to have 10 frequency versus 60 frequency, but as I said, her void engine is equipped with anti-void capabilities. If she doesn't use anti-void, her void suppression will have little effect on Hua Ye."

Carl, the God of Death, continued.

"Anti-void? From what you're saying, could it be that you can restrain the ability of my king's void engine?"

Hua Ye said in surprise.

"To be precise, there is no distinction between anti-void and void capabilities. God's battle is a collection of many factors. Engine, weapons, computing power, algorithms, tactics, cognition, and information."

Carl, the god of death, explained.

"What's the meaning?"

Hua Ye was confused.

Ruoning didn't say anything, this is what illiteracy looks like.

She did understand what Karl, the God of Death, meant.

"In other words, my stupid apprentice relied on his own powerful engine and computing power to suppress Hua Ye?"

Ruoning asked.

"That's it. After Angel Leng loaded the void engine, I detected that her void engine is not too powerful. It has additional intermediate concept rewriting functions, intermediate definition of matter, intermediate definition of energy, advanced definition of space, and advanced genetic structure rewriting. , definition of advanced divine body, anti-void ability."

The god of death, Carl, told the function of Angel Leng's galactic power like a treasure trove.

Ruoning felt very troubled after hearing this.

"King Hua Ye's black hole engine is more powerful in all aspects, but it takes time to use void definition and additional void concepts. For warriors like Angel Leng, it is completely possible to start the anti-void first."

Death Carl said.

Hua Ye still couldn't understand.

"I want you to stop talking nonsense next time you see my stupid apprentice, and directly use void definition and high-frequency void energy to strike, so that she has no chance to activate the anti-void ability, otherwise it will be like today."

Ruoning explained to Hua Ye.

"So that's it!"

Hua Ye understood, that is to say, it was an opportunity for him and Angel Leng to fight who would make the first move?

The void engine frequency of Tiandao civilization is not as good as the black hole engine, but this anti-void ability is very tricky, and it can turn the void to suppress itself.

"That is to say, as long as my black hole engine takes action first, it will definitely be able to deal with that little skirt?"

Hua Ye nodded.

"That's right."

Ruoning and Death God Karl both nodded.

"Hey, the question is, does the Tiandao civilization only have that little skirt and a void engine?"

Hua Ye suddenly thought of a terrible thing.

Ruoning was also startled, and then realized this.

Yes, Tiandao Civilization can even give void engines to its stupid apprentices. Maybe they have already achieved mass production of void engines.

"Tiandao civilization should still have void engines, but the number is estimated to be small."

Death God Karl said calmly, he had realized this a long time ago.

"I tested Blue Star's dark plane information and found that Queen Qilin and Du Qiangwei both had weak void reactions, so they may have been equipped with void engines."

Death God Karl's words made Hua Ye and Ruoning widen their eyes.

"Is this a wholesale sale of void engines?"

Hua Ye said with envy and hatred, Ruoning was the same, because even if she wanted a void engine, the God of Death Carl wouldn't give it to her.

Although the fourth generation divine body is also very fragrant, the problem is that people just want to get two after getting one.

With the fourth-generation divine body, of course I also want the void engine, which is the most powerful force in the known universe now!

"The Queen of Heaven and that princess have void engines. How can the Tiandao civilization not have many void engines?"

Hua Ye questioned, he felt like the angel genes during his reign were given to male angels first, and then many years later, when it was relaxed, angel genes were given to female angels, and they were not ordinary female angels. Only female angels from noble families and big families are qualified to become angels.

Isn't the current situation of Tiandao civilization the same as theirs?

"The void engine is of great importance. It can be given to the princess and the queen, but it cannot be given to too many people."

The God of Death, Karl, saw the situation differently. After becoming a phantom, he became absolutely rational.

So the perspective of looking at things is naturally different.

"Why?"

Hua Ye didn't understand this question, which was also the key to his defeat. His father held the angel gene in his hands, and only he could have the angel gene. When Hua Ye came to power, he spread the angel gene. Although it also made the Tiangong dominate one side, it also made the angel gene become a weapon of "kings, princes, generals and ministers are not of the same species".

"Too many void engines will lose balance and control. Luther is the king of the gods. There are dozens of third-generation gods, but there is no fourth-generation god and void warrior, because he wants to ensure that he has the power to suppress these gods."

Ruo Ning sneered.

So that's the case, it feels so complicated!

Hua Ye hasn't thought about this aspect.

"But even if it's according to what you said, there are not many void warriors, it's not easy to deal with."

Hua Ye pondered, he was not stupid, after knowing the news that Lieyang surrendered to Tiandao, he knew that the god of death Carl would definitely let him deal with Tiandao civilization 1, because the god of death Carl wanted to get Lieyang's chick and a man named Pan Zhen very much.

The problem is that Hua Ye doesn't want to fight. They say that Tiandao Civilization doesn't have many Void Warriors, but who knows.

Just like this time, Tiandao Civilization suddenly appeared and caught Hua Ye off guard.

Don't mention how much psychological trauma Hua Ye has towards Tiandao Civilization.

Chapter 268 Carl plan to conquer the world

"Don't worry, I will add a program for anti-void capabilities to your black hole engine, King Hua Ye."

Death God Carl assured Hua Ye.

"real?"

Hua Ye doesn't understand this kind of thing, but it sounds like it's specifically targeted at anti-void abilities?

Then I don't have to worry about that short skirt in the future.

"It can only be regarded as a stress program. When the anti-void ability is detected, it will automatically start and then execute the program."

Death Karl said calmly.

"How about you upgrade me to the fourth-generation divine body? Anyway, next time, for the sake of that Lieyang girl and Pan Zhen, you must want me to attack the Tiandao civilization, right?"

Hua Ye thought about it for a moment, and then said to Karl, the God of Death, with his eyes brightening.

In this regard, Karl, the god of death, remained silent.

"Can you please give me a nice word?"

Hua Ye said unhappily.

"No."

Carl, the God of Death, said happily.

"What?"

Hua Ye's eyes widened, did he really not give it?

"King Hua Ye, don't get me wrong. The fourth-generation divine body requires void matter, but all the void matter I have on hand has been used to build the black hole engine."

Death Karl said calmly.

"What about Ruoning?"

Hua Ye said you were lying to me. How to explain Ruoning's fourth-generation divine body?

"If I say no, there won't be."

Carl, the god of death, continued.

He obviously also knew that he had to explain clearly to someone like Hua Ye.

It's just that I don't want to give anything openly.

Hua Ye was speechless, but he didn't dare to fall out with Karl, the God of Death. After all, he was relying on Karl, the God of Death.

"Then what should I do? I will attack Tiandao Civilization next."

Hua Ye complained.

"No, King Hua Ye will continue to target the angel civilization."

Carl, the god of death, said.

"Why?"

Hua Ye didn't know why. He knew that the Death God Carl would definitely become more impressive after taking down the Lieyang Civilization, but there was no way. Now the two people were in the same boat. Of course, Hua Ye still hoped that the Death God Carl could become as strong as possible. Who would let him The backer behind him is Karl, the God of Death.

"I still know too little about Tiandao, especially when Angel Leng, Queen Qilin, and Tianfei Du Qiangwei are all equipped with void engines. It is unwise to target Tiandao before we understand the specific situation of Tiandao. "

Carl, the god of death, replied calmly. This was a decision based on absolute rationality. Even though he wanted to get the light of the sun as soon as possible, and then bomb the black hole to get the void matter and void particles, there was no way. The big clock had calculated him + Hua Ye + Tian. The odds of winning or losing against Slag vs. Heavenly Dao + Fierce Sun + Blue Star.

As a result, based on one calculation, the winning rate is only 1.2%!

With such a terrible winning rate, Death God Karl would certainly not gamble. Otherwise, as long as the winning rate exceeds 50%, Death God Karl will still fight with them to the end.

As for the current situation, Death God Karl is worried that if it continues to develop, the angelic civilization may not be able to move closer to the way of heaven. By then, with the unfathomable depth and power of the way of heaven, the known universe will just have another more domineering holy Kesha. That's all.

Therefore, Karl, the god of death, must destroy the angel civilization to make it impossible for the heaven and angels to combine.

The angel civilization cannot be used by him, and the calculated results show that there is a possibility of the angel civilization merging with the way of heaven. He wants to completely kill this possibility!

"But, this old aunt Hexi is not easy to deal with either."

Hua Ye touched his chin. He also agreed not to target the Tiandao civilization. After learning that Karl, the God of Death, did not intend to let him fight against Tiandao, Hua Ye actually breathed a sigh of relief in his heart. This shows how afraid he is of Tiandao.

Even if he doesn't admit it on the surface, Hua Ye is still very timid in his heart.

The result calculated by the God of Death, Karl, was also due to Hua Ye's failure because he was fishing in troubled waters and refused to make any efforts.

"That's because King Hua Ye has not opened his mind."

The good thing about Death Carl's words is that he has not opened his mind, but the bad thing is that he doesn't have eyes.

"What's the meaning?"

Hua Ye asked without understanding.

"King Hua Ye has retrieved the Tiangong No. and did not continue to fight He Xi. It must be for the sake of the sacred knowledge treasury and Kesha's weapons arsenal?"

Death Karl said calmly.

"Of course, the one who gets the treasure house of sacred knowledge gets the universe. Of course I want it."

Hua Ye felt strange. Isn't this a natural thing?

And maybe there is a key to escaping from the control of Karl, the god of death, in the treasure house of sacred knowledge and weapons!

"But it is impossible for Hexi to hand over the treasure trove of sacred knowledge and arsenal of weapons to you."

Carl, the god of death, continued.

"That's not necessarily the case."

Ruoning said with a sneer.

"I understand what Ms. Ruoning means. She just wants to use the casualties of the angel civilization to threaten Hexi to hand over the sacred knowledge treasure house and weapons arsenal. But this is impossible. With Hexi's character, it is very likely that she would rather the angels The civilization has come to an end, and it is unwilling to hand over the treasure trove of sacred knowledge and weapons to King Hua Ye."

Karl, the God of Death, shook his head.

"How is it possible? I am also..."

Hua Ye wanted to say something else.

"Because Angel Civilization still has a backup plan."

Carl, the God of Death, continued.

Hua Ye was startled for a moment, a backup plan?

What else is there to do?

"The new king of angels, Angel Yan."

Karl, the god of death, spoke the name.

"Hasn't that little girl been captured by Liang Bing?"

Hua Ye suddenly realized.

"That's right, so He Xi's next actions are either aimed at King Hua Ye or the demon civilization, with the intention of rescuing Angel Yan."

Karl, the God of Death, nodded.

"I understand, you want me to attack the angel civilization to force He Xi?"

Hua Ye seemed to understand that attacking the angel civilization was not his goal, but holding He Xi back was the goal!

"You can say that, but in fact, the angel civilization has a back-up plan."

Carl, the God of Death, continued.

"besides?"

Hua Ye's eyes widened, why so many back-up moves?

"After all, Angel Yan has fallen into Liang Bing's hands. No matter what He Xi thinks, it is impossible to rule out the possibility that Angel Yan is contaminated and the authority of the sacred knowledge treasure house and weapons depot changes. At this time, He Xi still has another The second one is Fraser."

The God of Death, Karl, had decided to cripple the angelic civilization in one step, so he calculated countless results for the angelic civilization.

"Anicid!"

Ruoning immediately said the name.

"Who is that?"

Hua Ye asked curiously.

"Queen Kesha decided to be the new King of Angels during her lifetime. Angel Yan is just a temporary replacement for the position of King of Angels. He is the most suitable candidate calculated by the Holy Knowledge Treasure House."

Ruoning explained to Hua Ye.

"Then why not attack Fraser and force Aunt Hexi?"

Hua Ye said immediately.

"Hexi can't be forced. Her character is to accept softness rather than hardness."

Ruoning shook his head.

Chapter 269 He Xi takes action

If he just used Angel Yan to negotiate with He Xi, He Xi would definitely choose to fight to the death.

But if Enisid is manipulated, Hexi will not give in.

She knows very well what can be compromised and what cannot be compromised in the slightest.

Especially when it concerns the sovereignty of angelic civilization.

The new King of Angels and the future King of Angels are disposable objects.

"What should we do?"

Hua Ye felt it was too troublesome.

"King Hua Ye attacked the angel civilization and then released black holes. As long as he continues to create black holes, the angel civilization will never be able to resist such an attack."

Death God Karl said simply and clearly that although he also coveted the void knowledge in the sacred knowledge treasure house, Death God Karl was very selective and decisive.

He just wants to destroy the angel civilization, and then use all his strength to deal with the way of heaven!

The hatred of blocking the way is irreconcilable, and the relationship between him and the way of heaven is already the result of a fight to the death.

Therefore, Carl, the god of death, acts more decisively and resolutely than in the original plot, and is even more proactive.

Hua Ye understood what Carl, the God of Death, meant. He just wanted to completely destroy the angel civilization. This made Hua Ye hesitate. Destroying the angel civilization would do him no good.

Although he will definitely be able to harvest a group of short skirts, Hua Ye wants not only these short skirts, but also the resources and knowledge accumulated by the angel civilization for so many years!

That is the key to the rise of Tiangong.

"This move will allow King Hua Ye to get what he wants."

Death God Karl knew what Hua Ye was hesitating about, so he said it simply.

"I also want to see the ancient heavenly palace reappear, and male angels and female angels become a civilization. Only in this way can we fight against the way of heaven."

The words of Death God Carl made Hua Ye quite satisfied.

"Can you really let me get the Merlot Heavenly Court?"

Hua Ye couldn't help but ask.

"As long as King Hua Ye follows my arrangements."

Karl, the God of Death, nodded.

"Does the king need me to send someone over to Fraser?"

Hua Ye paused for a moment, rarely thinking.

"No need, just let Taotie deal with Fraser."

Death Carl said.

In the past, Taotie was not there to kill, he just wanted the people from the Holy Alan Kingdom there to inform the angelic civilization.

When the time comes, with Hua Ye creating a black hole on the front and Fraser being attacked by Taotie on the back, what decision can He Xi make?

He Xi also didn't expect Hua Ye to make a comeback so soon.

She is still studying Hua Ye's black hole engine and analyzing ways to deal with Hua Ye. Unfortunately, these things cannot be completed so quickly.

The 19th defense line had not even been repaired, but Hua Ye came back so quickly.

"Something's wrong. He had to give up and take the Tiangong No. before..."

He Xi frowned.

She knew that Hua Ye was not alone, but also the god of death, Karl, who was the real person worth noting.

Could it be that Karl, the God of Death, has some new tricks?

Hexi had to guard against it.

"Fortunately, in order to prepare to save Angel Yan, many retired old angels were recalled and upgraded."

He Xi sighed, the old angel army originally prepared to capture Morgana was now going to face Hua Ye's Tianzha Army.

The key is that there are too many Tianzha legions, and the number of retired old angels she can temporarily recall is not many.

There was no other way. The one he was trying to save was the most embarrassing King of Angels in history, but he was immediately caught by the enemy.

If she hadn't been the Tianji King, she wouldn't have been able to recall so many people.

Hua Ye declared before the war that He Xi surrender, as he said before, he would never treat He Xi badly, and the two kings could rule together!

The difference is that this time Hua Ye came up and released a black hole.

At a distance of a thousand light-hours outside the 19th defense line, the released black hole was devouring the surrounding meteorite belt and rapidly growing in size.

"Next, you continue to create black holes, keeping a thousand light-hours distance between each black hole."

Ruoning said to Hua Ye.

"Is this okay?"

Hua Ye thinks He Xi can surrender like this?

"No, so we still have to wait for Karl, the God of Death."

Ruoning shook his head. This was just a frog boiled in warm water. Furthermore, Ruoning was worried that after so many days, who knew if He Xi had developed anything that could target black holes?

No one dares to underestimate He Xi.

"Tsk, tsk."

Hua Ye didn't say anything more and continued to throw black holes around, but it wasn't considered littering. They were all thrown towards the Merlot Heavenly Court.

In this way, no matter what He Xi's means, he will be destroyed in front of the black hole.

But then, at the next moment, a brilliant red light flashed through, and the first black hole released by Hua Ye exploded, then collapsed, shrunk into a singularity and disappeared!

"What is that???"

Hua Ye's eyes widened. He always thought that his black hole engine was invincible, and his ability to release black holes was also invincible, but what did he see now?

Did Hee Hee solve the black hole he released?

"not good!"

Ruoning also exclaimed, they rely on the black hole engine, if they are really targeted by He Xi, then they will have no choice but to fight with He Xi, who has endless tricks!

Hexi didn't hesitate at all, the space-based computing group accurately positioned it, and then constructed a stellar energy strike, which was a super giant flare bombing!

The angel's judgment is divided into the flaming-level sky-blade judgment where a single angel uses the flaming sword, and the battleship-level sky-blade judgment using the sky-blade battleship.

Different judgments are used for enemies of different levels and scales. The energy used in the judgment is all stellar nuclear fusion energy.

The Flame-level Sky Blade Judgment has a reading time, that is, the charging time. The shorter the time, the weaker the energy. Angels can control this time to control the power.

The Flame-level Sky Blade Judgment is executed by angels of the third generation or above, but it must be authorized by Queen Kesha or one of the left and right Holy Wing Guards to be executed.

As for the one used by He Xi, it is a more powerful attack than the Sky Blade Judgment of the Sky Blade Battleship.

An attack that is enough to kill stars!

He Xi knows the theory of the Death God Carl bombing black holes, so since real black hole celestial bodies can be destroyed by explosions, let alone these simulated black holes created by Hua Ye?

It is enough to destroy them before they grow up.

[Strike completed... Energy overflow 999900%!]

[Recalculate the black hole structure strike algorithm...]

[Calculation completed... Reconstruct the black hole structure strike algorithm... Constructing...]

[Construction completed... Execute the black hole structure strike... Charging...]

[Strike completed!]

All the black holes created by Hua Ye were adjusted by He Xi in an instant and exploded!

Even Luther was amazed that He Xi found a solution so quickly. He originally wanted to be a hero and save the beauty and take He Xi in as well.

Now it seems that the situation is not so optimistic.

Chapter 270 Black Hole Engine and Stellar Engine

Looking at the picture projected by Luther, the women hugged by Luther were all amazed.

"That old goblin He Xi destroyed Hua Ye's black hole!"

Liang Bing was even more shocked. She felt what had happened to the universe. What had happened? Why did she feel like she was out of touch with the universe?

"It is a simulated black hole that has not yet taken shape. If it were a real black hole object, He Xi would have to drive the star to bomb it if he wanted to destroy it."

Luther said calmly.

Now it's just Hexi who has found a way to deal with the unformed black hole.

But this does not mean that the threat of black hole engines is gone.

Apart from anything else, Hua Ye is now a real king-level combatant. If he goes deep into the black hole at all costs and then releases the black hole, can He Xi blow up the black hole?

Don't forget, the reason why Hexi exploded these black holes so decisively is because they are still outside the range of Merlot Heavenly Court. The 19th Defense Line has a radius of twenty light years, and the distance is only a few thousand light-hours. It cannot affect Merlot Heaven.

Even so, the astronomical phenomenon produced by destroying a black hole has a much higher energy level than a supernova explosion.

If the black hole is destroyed within the scope of Merlot Heaven, He Xi will probably have to consider moving next.

This is not the end. If Hua Ye is cowardly, he can create a black hole outside the strike range of the angel civilization and then accelerate the growth of the black hole.

In the original plot, Hua Ye's black hole engine may not be able to accelerate the growth of a black hole, but this 60-frequency high-frequency black hole engine can accelerate the formation of a black hole even if it is done recklessly. When the time comes, when the black hole expands to the point that it drags the entire Angel Nebula into In his own field of vision, He Xi didn't even need to consider moving, the entire Angel Nebula was simply gone.

"Even so, Hua Ye is no longer a threat to He Xi, right?"

Liang Bing said that Luther is really Versailles, and she has not yet figured out a way to solve the black hole engine, and can only rely on the Galaxy Power super gene in Ge Xiaolun.

"The threat is still there, and it's huge. It depends on how He Xi handles it."

Luther said with a smile.

"What other threats are there?"

Due to lack of information, Liang Bing's Demon No. 1 failed to calculate what threats Hua Ye still had.

"Hua Ye's black hole engine is a 60-frequency high-frequency void engine. It should be fused with some void particles or simply composed entirely of void matter. The core program is a black hole algorithm, but there is no algorithm for closing the black hole. Once the black hole it creates When it is formed, it will expand crazily to the set size, and the data it absorbs will be compressed regardless of its size, and the amount of data is astonishingly large. "

Luther knew very well that the frequency limit of a void particle should be 94 to 100. It depends on the core algorithm of this void engine. If it is a powerful algorithm, it can reach the extreme high frequency of 100.

In the original plot, Hua Ye's black hole engine only has 48 frequencies.

"I remember that my Galaxy Power engine only has frequency 10, so how did I defeat Hua Ye and Ruoning?"

Angel Leng asked in surprise.

"Anti-void ability, also called anti-void algorithm, is the core algorithm of the Galaxy Power engine. This ability alone can suppress all void algorithms and make all void algorithms become paradoxes and cause logical errors."

Luther explained to Angel Leng.

"Damn, so the Galaxy Power Engine can also prevent the Black Hole Engine from creating black holes?"

Liang Bing said with eyes brightening.

"cannot."

Luther looked at Liang Bing with a smile, and then said.

"Why?"

Liang Bing gritted his teeth and asked, why not?

"Because the anti-void algorithm was written by me, and the Galaxy Power engine does not have this algorithm."

Luther returns.

Liang Bing's eyes widened. In this case, what's the point of the Galaxy Power Engine?

Of course, a pure Galaxy Power engine is meaningless. This thing must be matched with a void controller to achieve it every second.

The anti-void algorithm Luther gave to Angel Leng is just a castrated version of the void controller.

"In fact, the power of the Galaxy is indeed meaningless. It has lagged behind for so many years. I have only obtained some interesting ideas in my research. It will not be long before I will be equipped with dual void engines of black hole engine and stellar engine."

Luther was talking nonsense seriously. Anyway, with his current strength, it is easy to pinch black holes and stars with his hands.

"Dual-core void engine?"

Liang Bing heard something she had never heard of before. Even though she knew that the Blue Star people successfully plotted the Galaxy Power, the German Star Gun, and Xin Zhao, the dual-core engine and the dual-core void engine were not the same concept.

The amount of data to be calculated is probably not enough to burn up the stars in the entire galaxy to calculate the result, right?

"What is a stellar engine?"

Reina pursed her lips and pinched her shoulders. She had never served anyone else. She had always been served by others.

As a result, when she heard Luther talking about the stellar engine, Reina immediately asked with interest. Her intuition told her that this stellar engine was probably the ability that Luther had performed before to create stellar objects with his hands!

"The stellar engine is the void engine that creates stars."

Luther said something about nonsense literature.

"Of course I know it's a void engine that can create stars. I want to know how far it can do it!"

Reina was speechless.

"A void engine that can create stars?"

Liang Bing was shocked. If you had this void engine, would you have unlimited energy?

After all, a celestial-level supercomputer needs to burn several stars for each calculation, and a large clock needs to burn the energy of hundreds of stars at once to calculate the result.

The Lieyang Civilization has always boasted that it has unlimited light energy, but in fact it does not have the ability to create stars.

If you use one of these things, you will lose one. If the universe is not vast, if they burn it like this, sooner or later it will be burned out.

It is for this reason that the light of the sun was born. When the time comes, Reina will transform into firewood, burn herself, and light up the world... No, she will transform into the sun and illuminate the fear of the void.

"What the black hole engine can do, the star engine can do. As long as I am willing, it is not impossible to double the number of stars in the Milky Way."

Luther said.

"Your Majesty, are you tired? Let me massage your legs?"

As soon as these words came out, Reina immediately became philistine and said to Luther flatteringly.

"If you press your legs and want a stellar engine, then this stellar engine is too worthless."

Luther said dismissively.

"Then what does the king want?"

Lena was willing to risk everything. Anyway, everything was over.

"The Stellar Engine can't be given to you so quickly."

Luther shook his head.
