

Kryptonian 271

Chapter 271: Choice

"Your Majesty, I also want a black hole engine!"

Liang Bing pressed Luther's other thigh, much faster than Reina could just say nothing.

Du Qiangwei, Qilin and Angel looked at each other coldly. The three of them had already loaded the Galaxy Power Engine. They knew the value of the Void Engine. Of course, they would not participate in such a scene. Being arrogant based on favors was not the right thing. What a good thing.

Luther closed his eyes and enjoyed it without saying anything.

Liang Bing knew that the black hole engine could not be obtained so easily. Before she called for the Galaxy Power Engine, Luther said it was impossible to give it to her.

But it doesn't matter, Liang Bing is shameless and she is willing to grind it as long as she can get it.

Compared to a little goddess like Reina who cares about face, Liang Bing doesn't care.

What's more, Liang Bing saw hope, otherwise, if there was no benefit or sweetness at all, Liang Bing would not be able to make up his mind to continue.

Isn't this nonsense? To lick a dog, you have to get a few reply messages to be motivated to continue licking.

Liang Bing is also a queen after all. The prerequisite for being shameless is that she has value, otherwise how could she do such a thing.

All of God's thoughts and actions are done for the sake of profit and value, not just happiness, anger, sorrow, and joy.

Reina was speechless and helpless, she couldn't do such a thing as Liang Bing.

"As expected of the Demon Queen, she is really shameless."

Lena said.

"Hmph, little girl, Queen, I have something even more shameless. Do you want to try it?"

Liang Bing hinted at Luther teasingly, apparently speaking to Lena.

Luther said he was not interested at all. Isn't it just the world of ice and fire?

What he wants to play today is the Grand Prime Minister of the Six Kingdoms!

As for what's going on on the screen, Luther can naturally focus on it.

Hua Ye and Ruoning discussed it. Of course, Hua Ye was still timid. After all, he was not the fourth generation god.

In desperation, Ruoning had no choice but to give up the plan of going deep into Merlot Heaven to release the black hole, and let Hua Ye release the largest black hole in the Angel Nebula!

He Xi naturally detected this expanding super-giant black hole. According to the black hole algorithm, this super-giant black hole will expand enough to swallow the entire Angel Nebula!

[Calculating black hole deconstruction...]

[Analyzing the black hole structure...]

[The black hole is fully formed and...]

The space-based computing team frantically calculated the data of this super giant black hole, and then concluded that it would only take a month for this black hole to grow enough to swallow the entire Angel Nebula!

Even now, the outer edge of the Angel Nebula has become the event horizon of this black hole and has disappeared!

"Since Carl helped you install the black hole engine, he also upgraded your genes. Otherwise, your genes cannot drive the black hole engine. With your current body, there are no weapons in the entire City of Angels that can destroy you, unless Kai The deepest weapon in Sha's arsenal, but it can only hurt you now."

Ruoning said helplessly, Hua Ye was very confident at first, but ended up being beaten in various ways, and now he is no longer confident.

"What if she gets her hands on the deepest thing in Kesa's arsenal?"

Hua Ye said immediately.

"That's impossible. Only the real King of Angels can get that thing. Now even if He Xi gets the weapons arsenal, she can't get it, so you should use that black hole to face He Xi directly. "

Ruoning said.

"Going again?"

Hua Ye was very hesitant. He remembered clearly what happened last time.

"Otherwise, we'll just wait for Karl, the God of Death."

Ruoning shook his head.

Hexi was studying how to solve Hua Ye's huge black hole. She had previously been given time to study Hua Ye's black hole engine. Although it was not very long, it also gave Hexi inspiration and ideas.

"It's not good, King Hexi, Fraser is asking for help from the angels, and the Taotie Legion is invading!"

An old angel walked in quickly and said to He Xi.

"Taotie?"

He Xi was startled. Is Karl, the God of Death, finally going to take action?

Frankly speaking, even after all these years, He Xi is still very afraid of the God of Death, Karl, especially in the past when there was a man in front of him, and she had never faced any swords, swords, and bloodshed.

He Xi's strategy of fighting dolls and clones was actually to prevent herself from facing the battle. Anyway, there was no way she could compare to the man-in-law in this regard.

Now that there is no man-in-law, He Xi has to face these things by herself, which makes her feel a lot of pressure.

In the original plot, Hexi has no choice but to rely on herself. Angel Yan is also unreliable. She can fight alone, but Angel Yan is not good at leading troops and being a king.

But the situation is different now. There is a man who can't lose in a head-to-head contest. Afterwards, the man said that he can't solve Luther's divine body. He can't even solve it within a kilometer of space near Luther. This makes Silver Blade There is no way to appear directly next to him.

This shows that Luther's computing power is at least not much weaker than hers.

And Luther is a God of War who is better at fighting than a God of War!

Strictly speaking, war gods are only good at fighting. Most gods can be classified as war gods. Scientific research gods are relatively rare. There is probably no scientific research god among a hundred war gods.

The God of War level is even less so.

He Xi looked at the dark communication. At this time, it would be great if he could contact Luther directly and let Luther help him...

no!

He Xi is still very responsible, mainly because He Xi knows that the price required to move a king is too high, and she may not be able to pay it.

"The current situation is already very bad. Something has happened to King Hexi and Angel Yan. If something happens to Fraser, if something happens to Enisid..."

The old angel paused and said.

There is no hesitation, the foundation of a civilization lies in knowledge and the main god, but now, the three main gods of the angel civilization are threatened.

Angel Yan is in the hands of the devil, and He Xi needs to be able to rescue her. Liang Bing might take Angel Yan into hiding, and it would take tens of thousands of years just to play hide and seek.

The angel civilization will be destroyed in the black hole in one month. It's not that they can't run. The problem is that just running is meaningless. It's not that Hua Ye can't continue to create black holes. If Hua Ye and Ruoning are not solved, He Xi and the others couldn't run far.

Frazier is even more deadly, that is the future of the Angels.

Once these three keys go wrong, the angelic civilization will truly perish.

"Perhaps, only when the old man is resurrected can the angelic civilization reappear."

He Xi thought of the fourth hope, which was that after an unknown number of years, the sacred atoms of Holy Keshu would locate each other and then reunite. By then, the angelic civilization would definitely be resurrected.

However, there is little hope. Who knows what will happen in so many years.

Chapter 272: 100,000 Soldiers

He Xi has the courage to destroy the cauldron and sink the boat.

Therefore, faced with the invisible threat of Karl, the God of Death, He Xi ignored Hua Ye's declaration of surrender.

"It is impossible for angel civilization to perish!"

Hexi directly took the lead in the charge.

"Damn it, He Xi is so reckless now?"

Liang Bing said in surprise, the He Xi she knew would not be like this.

"It's interesting that He Xi can use so many high-end weapons in the arsenal."

Luther saw He Xi releasing all his battle dolls, and the angel soldiers and angel warriors united beside He Xi.

Then He Xi followed his example and summoned countless dark silver flying swords to attack Tianzha and Taotie.

Apparently he planned to kill Hua Ye in one battle?

This is also a way to break the situation, but it failed to solve Hua Ye last time, can it be done this time?

But then, they knew where He Xi's confidence lay.

"Holy crap, one hundred thousand second-generation angels???"

Liang Bing was even more violent. What kind of concept is this?

No one expected that He Xi would burst out with a big bang.

What is the concept of one hundred thousand second-generation angels? Even the angel civilization at its peak was not that powerful.

Of course, this does not mean that the second-generation angels created casually are very powerful. It also depends on the combat quality of the super gene user.

But the problem is that He Xi's 100,000 angels are all old angels and young angels who have been recalled from retirement. Their combat literacy may be better than that of Tian Zha. After all, they have experienced several large-scale battles.

The battle between the heavenly palace and the angels, the physical war, the battle between angels and demons, the old angel who can live to this day and not die for once, you can imagine what the concept is, it is simply Ruoning per capita, I dare not say that all of them are wormhole masters, at least under the same strength, a pair of N's is no problem.

"Created from the void, unlimited resources."

Luther knew how He Xi detonated 100,000 troops, but he didn't expect He Xi to do this.

Sure enough, as soon as Holy Kesha came to an end, He Xi had no inhibitions.

For He Xi, as long as she can win, anything is fine. Anyway, she won't jump into the black hole like in the original plot.

"What's that?"

Liang Bing felt like she had guessed something, mainly because Luther's statement gave her the possibility to deduce.

"It's just what you think. The void ability can directly modify and define matter out of thin air. All cherished resources are no longer precious resources and can be created at will. Except for void matter, as for my king's void engine, it has the advanced ability to define matter. , even the essence of void can be pinched."

Luther doesn't mind giving Liang Bing a cake, only in this way will the demon queen lick him with all her heart.

"Unlimited resources? Wouldn't that mean unlimited troops?"

Reina's eyes widened. She finally knew how the Tiandao civilization came to have so many super warriors. There was no shortage of super gene resources in the Emotional Family!

"Infinite violent troops are indeed possible, but it is meaningless."

Luther nodded.

"That doesn't make sense yet?"

Lena was puzzled.

"Because of the Void Engine, the Infinite Troops only have an effect on enemies without a Void Engine, otherwise it would be like this..."

Just as Luther finished speaking, he saw Hua Ye's side. The Taotie King Xihao raised his hand and fired a ball of light. Then the ball of light flew to the front of the angel army and exploded. Wherever the spreading light circle passed, all the angels He immediately lost his reaction and floated in space.

"What is this?"

Everyone was shocked. They originally thought that He Xi's army of 100,000 second-generation angels could directly defeat Hua Ye's millions of scum legions. But now a big mecha came out and knocked down the angels?

"The Void Engine has the added attack function of the angelic gene structure. That's why I said that infinite violent troops are meaningless to gods and civilizations with Void Engines. Once their own super genes are analyzed and defined, they can be wiped out by the Void Engine."

Luther continued.

Liang Bing felt like he couldn't understand. He really couldn't understand. How could this fight be fought like this?

"Your behavior of spreading demonic genes at will is also a channel for the void engine to easily analyze your demonic genes. Maybe Hua Ye and the Void Engine of the Taotie King Howl have added the demonic gene structure strike function."

Luther said to Liang Bing.

After hearing Luther's words, Liang Bing's expression turned ugly.

Especially when she saw the angel warriors falling in droves as the Taotie King howled.

They are not dead yet, they are just paralyzed by the super gene engine, and the super gene engine is constantly being decomposed by the void energy.

If you survive, you can still survive, but this is a battlefield!

Tianzha and Taotie slaughtered the angels unaffected.

He Xi locked the Taotie King Xihou, and the star life mapped multiple spaces to surround and suppress the Taotie King Xihou.

He Xi did not expect such a result.

She didn't know that this was caused by Angel Burning Heart. After being killed by Carl, the God of Death, in a sneak attack, she studied the angel genes, and then she came up with the angel gene strike function of the Taotie King Howl.

This thing can be regarded as a big killer of the Void Engine. It can ignore the crowd tactics. As long as it can analyze the genes of the opponent's race, it won't require much effort.

The Taotie King Xihao was accidentally cut in half by He Xi with his star life. If Hua Ye hadn't come to the rescue, it would have been torn into pieces by He Xi.

"Hexi!"

Hua Ye raised his hand to condense the high-frequency void energy, and then released it directly towards He Xi.

He Xi frowned, and a battle doll rushed forward, received this blast of void energy, and was immediately paralyzed in the starry sky.

She controlled a large number of Ansu Silver Flying Swords to kill Hua Ye.

Hua Ye quickly used the program redesigned by Karl, the God of Death.

"Redefine the spatial structure!"

As the golden light ball in Hua Ye's hand exploded, the surrounding space wormhole structure was modified by him. The previous wormhole transportation algorithm could not succeed, and the star life could not be mapped in multiple spaces.

There seemed to be an invisible barrier around Hua Ye's body, preventing those dark silver flying swords from entering if they approached.

He Xi didn't expect that Hua Ye would change so much the second time he came, with abilities targeting both Xingming and Ansu Silver Blade.

"Come on, let's continue the unfinished battle from the last time!"

Hua Ye took out the Sword of Heaven and attached high-frequency void energy to the sword, directly transforming the already lagging King Sword into a void weapon.

The last time there was no triangle, Hua Ye suffered a big loss and almost lost it.

Fortunately, the God of Death Carl is still very powerful, and this time, Hua Ye specifically contacted the God of Death Carl before going on the expedition, and the God of Death Carl also promised that he would help He Xi make his curtain call.

Hexi did some calculations and knew that the surrounding space wormhole structure had been modified, and it would take some time to recalculate.

Chapter 273 He Xi is well prepared

He Xi also drew out his own king's order.

"I hope that this time, you won't be embarrassed and let others rescue you again."

As He Xi said this, Hua Ye had already rushed up.

"Zheng!"

The two swords bit together, tearing out sparks.

He Xi was directly repelled by Hua Ye.

"Is the power so much stronger than last time?"

He Xi was a little unbelievable.

"Hey, this time, I will let you see how powerful I am!"

Hua Ye was in a dominant position and took advantage of his advantage.

The reason why he was so powerful was that the God of Death Carl saw that he could not use the void engine, so he had to add a simple program for converting void energy into kinetic energy. This made Hua Ye's power surpass He Xi in an instant, and even the God of War of No Star could not compete with Hua Ye in strength.

After all, this was kinetic energy converted from high-frequency void energy. I dare not say that one sword can explode a star, but at least one sword can easily split mountains and seas.

He Xi snorted coldly. She couldn't use wormholes, but that didn't mean Hua Ye could beat her with a black hole engine!

The huge dark energy accumulated by He Xi for many years was converted into kinetic energy, and she fought with Hua Ye again!

This time, He Xi even suppressed Hua Ye in return.

Hua Ye felt He Xi's huge dark energy reserves and immediately realized that he was still not as good as He Xi in this regard.

After all, He Xi was a real king-level, and he was just a top-level king in a certain aspect. If he had a fourth-generation divine body, he would definitely be able to defeat He Xi with the dark energy driving technology of the fourth-generation divine body!

Moreover, the powerful void suppression actually lost its effect on He Xi. After several confrontations, He Xi just frowned, and was not directly suppressed by the void like the last battle doll.

It seems that He Xi upgraded himself!

Hua Ye dared not be careless, and He Xi's performance exceeded his expectations again and again.

He Xi frowned because the feeling of being suppressed by the void was not pleasant.

As for upgrading, there is none. How can the fourth-generation divine body be adjusted so quickly in a short period of time? The fourth-generation divine body is not a simple thing. If you move a part, you have to consider whether it will affect other gene engine functions.

It's just that He Xi wrote an algorithm for void suppression. At present, the effect is not bad, but this feeling is very uncomfortable.

Fortunately, this is only He Xi's fourth-generation divine body clone. Otherwise, if it is replaced by He Xi's original body, I don't know if it can last so long.

The two king-level contests, the others are not idle. Although Ruo Ning does not have the star destiny of the original plot, he is still a powerful enemy that can kill all sides for the angels, not to mention that there is also a gluttonous king Shihao.

Su Mali is also slaughtering angels.

He also recognized many familiar faces, knowing that if it weren't for the sudden angel gene attack function of the gluttonous king Shihao, he might really die here.

But now, only these old angels can die here.

Luther didn't have any waves. These angels died and died, anyway, they can be resurrected.

Even if the angel civilization does not agree with this method of resurrection, it doesn't matter. By then, the angel civilization will be gone, and there will naturally be no such rules.

At present, He Xi can only separate his other combat puppets to deal with Sumali and Ruoning.

The angel gene attack of the Taotie King Xihao naturally has an impact on He Xi's combat puppets, but with a huge dark energy reserve and stellar energy supply plus computing power support, He Xi can ignore this impact.

Other high-level angels who have been upgraded to the third-generation super warriors can also support it, but their strength is greatly reduced.

He Xi became more and more anxious as he fought, and wanted to quickly solve Hua Ye. He forced Hua Ye to be unable to release the black hole in close combat, but he didn't expect Hua Ye to be so difficult to deal with, and the death god Carl upgraded him.

"Damn, Carl! Carl! You bastard, come out quickly, I can't hold on any longer!"

Little did he know that Hua Ye was also madly tagging the Death God Carl. He Xi put too much pressure on him. Although the wormhole transport technology could not be used and He Xi lost a

lot of big killers, He Xi's methods were endless, such as the solar flare furnace and the dark silver chain.

He felt that his change in the space structure was about to be recalculated by He Xi to calculate the wormhole algorithm.

Now He Xi is so powerful, what should he do if He Xi recalculates the wormhole algorithm later?

"The big one is coming."

Luther suddenly said.

"Ah? What?"

Liang Bing looked anxious. He Xi hadn't taken down Hua Ye for so long, and then suddenly heard Luther say this, she was immediately surprised.

"I didn't expect He Xi to do this, but it seems normal?"

Luther said, but he didn't explain to Liang Bing.

Then everyone saw a beam of light coming from nowhere and directly hitting Hua Ye and He Xi who were fighting.

With the dazzling and strong flare reaction, He Xi's fourth-generation divine body combat doll was directly shattered and melted.

Hua Ye was left with only a head.

"Medium-sized flare bombardment? No, it's the Great Judgment of the Sky Blade!"

Liang Bing reacted. When she was on Blue Star, Angel Yan tried to use the Great Judgment to destroy her and Devil No. 1. This was a terrifying flare attack that was enough to burn and melt the divine body, and the energy was also very concentrated.

Hua Ye fell to the ground. Because it was a divine body, he was not dead yet.

However, Hua Ye was already terrified at this time. He never thought that He Xi would do this.

But after seeing He Xi's divine body recovering quickly and regrouping, Hua Ye knew why He Xi dared to do this. He was a fourth-generation divine body that could automatically aggregate atoms to recover, and such an attack could not destroy the sacred atoms.

It was equivalent to only losing a part of the energy, but he would never die.

"This... This is... This is cheating..."

Hua Ye struggled to say that his divine body was also recovering, but after losing so many divine body resources, it was absolutely impossible to recover, and he would only die from energy exhaustion.

"Hua Ye!"

Ruo Ning was also anxious. She never expected He Xi to do this. Wasn't she worried that she would be blown up?

"King!"

Su Mali even abandoned the three-generation high-level angels in front of him who were about to be slaughtered by him, and tried to fly back to save Hua Ye.

"It's over."

He Xi freed her hands and locked Ruo Ning and Su Mali, and then the king's order in her hand lit up red.

At this moment, a huge skull appeared out of thin air.

He Xi was rescued by this skull last time, and of course she was ready this time.

However, this skull was not the purple-red skull from the last time. Instead, it had turned purple-black, emitting an ominous aura of the void.

Chapter 274 He Xi amazing wisdom!

The skull opened its mouth and bit He Xi in an instant.

He Xi intended to freeze the skull, capture the mysterious skull of the Grim Reaper Carl, and then study what it was.

As a result, He Xi's pupils shrank. She had clearly calculated the algorithm based on the last time, but it didn't work at all this time.

[Constructing an algorithm to attack the skull structure...]

[Analysis failed, the target has a large amount of unknown substances and elements...]

[Analysis in progress... 0.0001%... 0.0002%...]

[Analysis failed, the target has a large amount of unknown substances and elements... The target's spatial data is changing...]

[Reanalyze... 0.00000000000001%...]

Ripples appeared in the space around the purple-black skull.

At the same time, the data inside the skull was also flashing rapidly.

[Redefine space... Analyze the target's core structure, analyzing...]

[Analysis failed! The target is continuing to resist...]

The skull swallowed He Xi in one gulp, and He Xi found that she couldn't move.

She was not panicked. On the one hand, He Xi knew her own strength very well. It was not so easy to move her, so she did not give up the resistance. The vast dark energy continued to spread, affecting the calculation, analysis and interference.

On the other hand, this was just a fourth-generation god clone, and the original He Xi was still in the Angel Nebula.

It seemed that she had run out desperately, but in fact, He Xi had not really come out yet.

Just in case, if the God of Death Carl suddenly targeted her, she could at least study and counter the routine.

Although He Xi was not as good at fighting as Holy Kesha, she had her own wisdom!

Her wisdom was to send the clone to go to the mines, test the traps, routines, weapons, etc., and then take action herself.

After the clone was swallowed by the big skeleton, it lost contact, and He Xi didn't know what happened to her clone.

"If the God of Death Carl wants to destroy the fourth-generation divine body, it's nothing more than letting my combat doll be destroyed by a supernova explosion like a tomboy. There's no need to worry about that..."

The cosmic tree model did not detect the possibility of a supernova explosion in the nearby stars, and without the help of the Lieyang civilization this time, the God of Death Carl could not cause a supernova explosion to destroy her divine body.

However, it is also possible that her divine body will be thrown into a black hole.

The problem is that if that happens, the black hole that Hua Ye created with great difficulty will be neutralized by the king-level energy level.

"He Xi, was he captured by Carl just like that?"

Hua Ye asked Liang Bing and the others' questions.

"Hua Ye, are you okay?"

Ruoning came to Hua Ye's side and said to Hua Ye, who had only grown a neck.

"This king seems to be recovering, but he lacks energy, Ruoning..."

Hua Ye said to Ruoning.

"It's over. He Xi has been solved by Carl. Next, the angel civilization is ours. You can have as much energy as you want. Then, we will go to Liang Bing to get back Angel Yan and get the sacred knowledge treasure house and arsenal!"

Ruoning said excitedly.

At this moment, a sword broke through her chest, and the tip of the sword stretched out little by little.

"Ah..."

Ruoning stared at the sword on her chest with wide eyes.

Hua Ye also showed a horrified expression.

"King!"

Su Mali's originally slowed down speed accelerated again.

"Sorry, your two beautiful dreams will end here."

He Xi said with the king's order in hand.

Another He Xi? ? ?

Hua Ye and Ruoning were heartbroken, and then they thought of something.

Could it be that the guy Karl the God of Death took away an avatar?

"Damn, Queen, I knew that He Xi could not be taken away so easily!"

Liang Bing didn't know why she was relieved and said excitedly.

Just now, she was really worried that He Xi was captured by Karl the God of Death. If she sold her face and stepped on Karl's face a few times, she didn't know if she could save He Xi.

Now that He Xi gave her a huge surprise, Liang Bing was relieved and proud of He Xi from the bottom of her heart.

Although the two have become enemies, and He Xi even threatened to put her in a bottle, Liang Bing does not hate He Xi as much as she does her sister.

Luther admires He Xi's behavior as an old Yin Ji, who is so cowardly, so insidious, and so Voldemort.

Otherwise, how can she become the final winner?

He Xi cannot gamble, but she must gamble.

She cannot gamble because the entire angel civilization is in danger now, on the edge of a cliff, and one step away will be the end of the world.

So she must not make any mistakes, and every step must be taken with the most precision and precision!

She must gamble because she has no way to break the situation, and can only gamble with herself.

In this situation, He Xi showed amazing wisdom!

On the surface, she made a desperate move to capture the king first, and took all the angels away from the Melo Heaven to fight Hua Ye to the death!

Secretly, the original body never left Melo Heaven, and stayed behind, enduring the sacrifice of the angels, and deceived everyone through the "burn together" operation. Everyone thought that He Xi dared to take such a risk because of the fourth-generation divine body.

This is a final plan!

The fourth-generation divine body is actually a clone, a fighting puppet?

This is where He Xi hides the deepest, especially the vast dark energy reserve. I guess no one will think that it is He Xi's clone, right?

It's clearly dark energy that only kings can possess!

So, in an instant, Karl, the god of death, took action to deal with "He Xi". Hua Ye and Ruoning relaxed because of such a great victory. Other He Xi's clones on the battlefield were cut off because of the loss of "He Xi" and became weak.

No one noticed that at this time, He Xi's body had arrived on the battlefield.

And it's still a sneak attack without martial ethics!

"Hexi...you..."

Ruoning didn't expect He Xi to do this. This was a sneak attack. How could He Xi do such a thing?

And why do you do it to yourself first!

She didn't know that as the only smart guy in the Tianzha Legion, she was the biggest threat to He Xi. Without Ruoning, a wise general, the remaining Tianzhu would be a threat to He Xi and the Angel Civilization. Vulnerable.

Otherwise, why did He Xi and Kesha kill all the scum with brains in the first place?

"Ruoning, it's time for you to take a bow."

He Xi leaned on Ruoning's back and said with his cheek close to Ruoning's ear.

"I am the fourth generation divine body, you cannot hurt me..."

Ruoning said that she wanted to forcefully break away from He Xi's royal life.

She is a fourth-generation divine body. Even gods-killing weapons like Wang Ming and Ansu Yinwu cannot kill her completely. Her atoms will automatically aggregate.

Chapter 275 Death Karl comes and leaves

"No, I can!"

He Xi said calmly.

[Analysis target: the fourth generation of female angels...]

[The Styx version of the fourth generation divine body...]

[Import the fourth generation divine body data...]

[Introducing the fourth generation female angel genetic data...]

[Introducing the attack algorithm for the fourth generation divine body structure...]

[The fourth-generation divine body atomic structure is being constructed to strike...]

[Import Ruoning Divine Body Atomic Decomposition Program...]

[Import Ruoning dark data decomposition program...]

[Constructing a decomposition program...]

[Execute the decomposition procedure...]

...

Ruoning felt endless dark energy pouring into her body.

"Void Martial???"

Ruoning's eyes widened and she couldn't believe that there was a biological engine on He Xi's Wang Ming!

Hypocritical guy!

"Save me, Sumali!"

Ruoning struggled wildly. Although it was only dark energy and not high-frequency void energy, it was still a biological engine that could not be resisted!

"What frequency is the void engine that Hexi has?"

When Liang Bing saw this, she couldn't help but ask Luther.

"The secondary biological engines of angel civilization are generally low, because they have to hide them. The void engine of the void weapon in Hexi's hand seems to be a temporary one. It doesn't use much void matter. It probably doesn't even have 10 frequencies. It's worse than Taotie. Wang Xihao, please be better."

Luther replied calmly.

Angel Leng was very shocked. The sub-biological engine and the void engine were basically the same thing. She was not stupid. She knew very well that it was absolutely impossible for He Xi, the Tianji King, to suddenly burst out with amazing wisdom and crack and develop it in such a short time. came out.

Therefore, there is only one explanation, and that is that the angel civilization has been conducting research in this area for a long time.

But why?

It is obvious that the angel civilization has always resisted and rejected the void theory of Karl, the god of death, and even does not allow the angels of the angel civilization to understand the knowledge related to the void.

Angel Leng even regarded the knowledge of the void as a taboo and a mortal enemy that must be destroyed. He never thought that the angel civilization was already at the forefront of all civilizations in the known universe and had installed a void engine!

This made Angel Yan start to doubt his faith.

"However, He Xi may have obtained part of the void algorithm of the black hole engine, so even if it is a low-frequency void engine, if the algorithm is high-end, it is no worse than Angel Leng's void engine."

Luther continued.

Compared with the Void Algorithm and the Void Engine, it can be said that the Void Algorithm is definitely more precious, because there is the Void Algorithm before the Void Engine. Without the Void Algorithm, even if you get the void matter and void particles, you don't know how to use them.

Death God Karl has been studying the void for so many years. The void algorithm is definitely much more advanced than the angel civilization. Even if the angel civilization is also studying it secretly, how can it be compared to Death God Karl using a big clock to calculate at full strength?

It is estimated that Holy Keshu is only doing research in advance. Hexi only has his own space-based computing group calculation, and it is impossible to get the support of the sacred knowledge treasury.

Liang Bing was very envious after hearing this, and muttered by the way that if this was the case, why did he lock himself up in the first place?

"Just because I can't do it openly and openly, but I have to do it secretly and sneakily?"

Liang Bing complained.

Sumali also knew the importance of Ruoning to their scum, and wanted to save her, but unfortunately, He Xi just moved his finger, and Star Life roared in, cutting Sumali in half!

Without obtaining the void particles from the original plot, the God of Death, Karl, was naturally not prepared to upgrade Sumali and the others into the Four Knights of the Void.

Sumali, who only had the third-generation divine body, was too fragile in front of Xingming, and was easily crushed by Xingming.

He Xi didn't have any memories of Sumali. She was a beauty control. After seeing Luther's beauty and god-king temperament, who was Sumali? If you don't know me, go and die quickly to avoid misunderstanding!

"No one can save you, Ruoning."

He Xi made a domineering declaration, and then Ruoning was decomposed, and even the dark data was decomposed by He Xi.

"No! Hexi!!!"

"Let me go..."

Ruoning's screams and begging for mercy belatedly reached He Xi's ears.

"Why didn't you tell me earlier and beg for mercy earlier? Why did you go earlier?"

"It's too late, it's too late."

He Xi said regretfully that if she heard this, she would definitely keep Ruoning.

Then, Hua Ye was pressing his forehead to the ground, moving his remaining body. He was able to come up with such a way to escape, and he was worthy of being the most capable of surviving.

Unfortunately, He Xi snapped his fingers unhurriedly.

The familiar solar flare furnace enveloped Hua Ye.

"He Xi!!! This king surrenders!!!"

Hua Ye's soul was rising, and he didn't want to be burned to death.

"I've let you go once, but I won't let you go this time."

Hexi shook his head.

"His Royal Highness King Tianji has good tricks."

A voice suddenly appeared.

He Xi looked at the other party without any surprise.

"Karl, you finally came out of Death Song Academy."

He Xi said calmly.

"Karl! Karl! Save me!"

Hua Ye saw Karl, the God of Death, as if he had seen a savior.

He quickly shouted loudly.

"You misunderstood, His Highness King Tianji."

Karl, the God of Death, bowed respectfully to He Xi.

"I'm just here to recycle my academic work."

He ignored Hua Ye's words.

"Want to recycle the black hole engine?"

He Xi snorted coldly and directly activated Wang Ming's sub-biological engine.

Time was urgent, and He Xi could only install a sub-biological engine for Wang Ming in a short time, consuming all the void matter and upgrading it to a void weapon.

However, He Xi did get some void algorithms when he analyzed Hua Ye's black hole engine last time. In addition to the void algorithms he has studied for so many years, He Xi is not afraid of Death God Carl.

Now is the best academic exchange in the void!

It's a pity that Death God Carl has no intention of fighting at all. He is indeed here to recycle the black hole engine. When He Xi activated Wang Ming and planned to build a void barrier, Death God Carl's phantom disappeared.

Hua Ye screamed and was turned into nothing by the solar flare furnace.

"Damn it!"

He Xi didn't expect that Death God Carl would complete the operation of reclaiming the black hole engine so quickly, and he really didn't care about Hua Ye's life or death. She specially used the solar flare furnace to execute Hua Ye, wasn't it just to force Death God Carl to spend more computing power?

As a result, the Death God Carl was very decisive and recovered the black hole engine and ran away.

This left He Xi helpless. He lost a fourth-generation God clone, but the Death God Carl did not accept the challenge.

In addition, the huge black hole outside the Angel Nebula is still expanding, and the Sky Scum Army will definitely come back...

Chapter 276 He Xi makes a desperate attempt

The reason why Luther kept the God of Death, Karl, was naturally because of the presence of Karl, the God of Death, so that he could achieve his wish and bring the angelic civilization under his command.

Without the threat of Karl, the god of death, unless Luther takes action himself, even if He Xi has thoughts about him, it will not be too late in tens of millions of years.

Anyway, He Xi felt that he had plenty of time.

Only when someone like Karl, the God of Death, presses every step of the way and pushes Angel Wenming and He Xi into a desperate situation, will she think of Luther's goodness.

At this time, the character established by Luther is very good.

Hexi had no choice. When she was desperate, she had to move closer to Luther if she didn't want the angelic civilization to disappear and perish.

This is a conspiracy!

He Xi looked at the black hole outside the Angel Nebula, and at Fraser's side, the Taotie Legion invaded, causing heavy casualties to the mortal kingdom.

Originally, Manzi's country was invaded by Liang Bing's demon factor. After the little demons were wiped out by Angel Yan, now Taotie invades in large numbers.

Ainecid has already seen Taotie, and her growth has been affected and interfered with. Whether she can become the King of Angels in the future is still unknown.

"King Hexi, what should we do?"

Angel Sui asked He Xi confusedly. She was following He Xi's old tribe from the Battle of the Wrath Sea to the present, so He Xi was her king.

Unlike Holy Kesha's old subordinates who called Hexi His Highness, they all called him Wang directly.

"We have only two choices now. One is to save Angel Yan. She has the ultimate authority over the treasure house of sacred knowledge and weapons arsenal. Only she can use the treasure house of sacred knowledge and weapons arsenal. Even if she is not as good as Queen Kesha, she is still much stronger than me. "

He Xi sighed and said.

"The other option is to save Ainecid, but it's not yet time for Aenecid to inherit the treasure house of sacred knowledge and weapons. In this case, we may have to defend Fraser. We don't know how long we have to wait. Only then can we wait for the birth of the future King of Angels."

Angel Sui and Angel Ying next to him looked at each other, feeling that no matter which choice they made, they were terrible.

"King Hexi, why..."

"I don't want to."

Hexi said bluntly, she knew what her old angel wanted to say, but why did Holy Kesha not consider this situation and give Hexi the authority to directly take over the sacred knowledge treasure house and weapons depot?

However, Hexi felt that she was not the person who could take over the important tasks, so she rejected the man-in-law's proposal.

Now, He Xi feels that this is fine. At least, she doesn't need to bear so much.

"The Angel Nebula can no longer hold on. It is impossible for me to develop an algorithm to neutralize this black hole before the black hole engulfs the Angel Nebula."

Hexi finally decided to let the angel army completely evacuate Angel Nebula, and Hexi had no idea of grabbing it with both hands.

Today's angel civilization is not as good as before. At most, it is worse than when Angel Yan was in power and retreated to Fraser.

There is a huge Ansu silver mine left over in Fraser, but He Xi has no idea of recycling it. If he retreats to Fraser, he will easily be wiped out by the Tianzha Legion that comes back, so the best way is to save Angel Yan!

Of the 100,000 second-generation angels who came out of the explosion, a total of about 50,000 angels were killed by the Void Engine of the Taotie King. If it weren't for the Void Engine, if 50,000 female angels died in the battle, at least 100,000 more scum would have died.

However, Hexi, who responded to everyone's call, resisted all opinions.

"Resurrection is a shameful thing, so it is up to me to bear this shame. Now, what we need is strength to ensure that angels are immortal and justice is immortal!"

He Xi wants to resurrect the 50,000 angels who died in the battle, but the old angels have no idea. Even though they have never advocated resurrecting their dead sisters, comrades and relatives, they are not opposed to doing so.

The same cannot be said for the new generation. They think resurrection is evil and shameful.

They didn't know that He Xi wanted to give it a last try. If he still couldn't get Angel Yan back from Morgana, He Xi would give up.

In fact, she wanted to give up now, but He Xi didn't want Luther and the others to underestimate the angel civilization. Coupled with her own pride, He Xi chose to fight again!

In other words, if it succeeds this time, it means that the angel civilization has maintained its sovereignty and does not need to surrender and lose its sovereignty.

If it fails this time, it will also be a good opportunity for Tiandao Civilization and God King Luther to show the value and military strength of the angel civilization. In this way, even if they have to surrender to Tiandao, they will not be completely reduced to Tiandao like the Lieyang Civilization. Subsidiary, even losing its own sovereignty.

Angels must maintain their independence!

They are unique.

Luther's super brain is so smart that it doesn't need any celestial supercomputer. Just knowing that He Xi's angel army has arrived in the Milky Way, he knows He Xi's thoughts.

"Have you already reached the end of your rope and fought your last battle?"

Luther understood that the current situation was that He Xi planned to attack the demon civilization and rescue Angel Yan before Hua Ye was resurrected and the Tianzha Army regrouped. Only in this way would they have room to advance and retreat freely.

At that time, it doesn't matter whether to rescue Fraser or find other places to rebuild the angel civilization.

"Hexi came with angels?"

Liang Bing was stunned when he heard the news. If Demon No. 1 wasn't quite advanced, he might have had to be stepped on by He Xi in the face before he could react.

After the six countries' grand appointment of prime minister yesterday, Liang Bing went back to her demon number one and fell asleep.

Then she woke up and checked her fourth-generation divine body and found that it had 12% damage!

This made Liang Bing complain that Luther was simply a beast! A beast! A beast!

She was a fourth-generation divine body, but she could actually have 12% damage. This was only discovered after she woke up and checked herself. At that time, the fourth-generation divine body had repaired itself to a great extent.

Conservatively estimated, the damage may be as high as 30%!

So much so that Liang Bing felt that she was now severely "lubricated".

"Damn, Luther, this guy, didn't even remind the queen that I was running away?"

Liang Bing widened her eyes and angrily scolded Luther for being heartless and eating everything without recognizing anyone.

However, Liang Bing was actually still thinking whether Luther was planning to protect her, so he didn't notify her to retreat?

It's not impossible. Liang Bing felt that Luther was a sharp tongue but a soft heart. He must have fallen in love with the queen, but he just didn't want to say it.

"Queen, are we leaving the Milky Way?"

Ge Xiaolun asked.

Ge Xiaolun's appearance now did not look like a demon. Apart from a pair of demon wings on his back, even his skin did not change color.

Chapter 277 The Angel Army Stops

"There's no rush. Let's check the situation first. It won't be easy for He Xi to find us."

Liang Bingmi said confidently.

Then Liang Bing saw He Xi's army and realized something was wrong.

"He Xi actually launched all the space-based battleships?"

Liang Bing knew that He Xi had suffered a big loss, and she also knew that the Angel Nebula might not be saved, but she did not expect that He Xi would send out all the Sky Blade battleships and space-based battleships and rush directly to the Milky Way.

Isn't she worried about causing Luther to misunderstand?

Of course, don't worry. After all, it is a military display. Compared with the original plot where Angel Yan had to abandon and destroy most of the Sky Blade battleships and space-based battleships, the situation is not sure how much better.

In the original plot, why Kesha only brought 14 angels to the earth? It was because 2000 years ago, Kesha used too many troops to kill Morgana, which led to the outbreak of the nebula-level war between angels and demons. This was the fourth war between angels and demons. war.

After the war, Kesha realized that "wars cannot be fought like this in the future" and that the entire universe cannot be involved in a war between demons again.

So she changed her strategy and made the operation as low-key as possible, leading only her personal guards to Earth.

Moreover, most of the female angels in the new era are getting weaker and weaker. Except for those few, most angels have no experience. Maybe many angels have not participated in large-scale wars and are doing small jobs such as mining, because Kesha was too strong, and she was manipulated by Kesha or those elites before the angels could gain experience, and she was left in her infancy, just like a flower in the greenhouse!

"Your Highness Hexi, we can actually use the Sky Blade series battle group, and with the assistance of Tianji King, we can have a showdown with Hua Ye's army outside the Angel Nebula. It is more than enough to annihilate Hua Ye's fleet."

An angel didn't understand He Xi's decision and spoke out boldly.

"It is naturally good to resist the enemy. I have no objection, but the question is, have you considered the consequences? Space jumps of large combat celestial bodies need to be recharged in advance. It cannot be completed in an hour or three. If Hua Ye is forced to be anxious, if he ignores the life and death of his fleet and uses the black hole engine to perish with us, then our Tianji and Sky Blade series battle groups will probably be wiped out. "

Hexi was very patient, because she had to be prepared for failure. Did she have to wait until then to eliminate the angels' resistance?

"The large-scale combat celestial bodies of the Tianji and Sky Blade series have extremely strong structures and can be said to be indestructible. They are also protected by various shields. No matter how powerful Hua Ye's black hole engine is, it can still destroy our Sky Blade series battle group. And the space-based series battle group?"

The female angel said in surprise.

Hexi didn't say anything, he just showed the black hole video of the black hole engine to all the angels who had not participated in the war and did not understand the situation.

Then these angels were shocked.

The large combat celestial bodies of the Tianji and Tianren series are large in size but not bulky. Their cruising speed can instantly kill many warships of the top civilizations in the universe. They have almost no opponents in the entire known universe.

But the problem is that the enemy we are facing now is not a battleship of any civilization, but a terrifying black hole.

The gravitational pull of a black hole prevents even light from escaping.

No matter how fast the large combat celestial body of the angelic civilization is, it cannot exceed the speed of light.

You must know that even the third and fourth generations of angels cannot fly out of the gravitational range of a black hole with their wings, let alone a huge combat celestial body.

If you want to escape from a black hole, you have to make an ultra-long-distance space jump and escape directly from the black hole's gravitational range.

But as He Xi said, it is impossible for a large combat celestial body to make a space jump overnight. I am afraid that it will be swallowed by a black hole long before it completes the jump.

The technology of the angel civilization currently has no way to combat black holes.

"So you understand, Angel Nebula is a thing of the past. For safety reasons, Merlot Heaven must find another place to stay."

He Xi said.

When the angels heard this, their expressions froze, showing a trace of sadness, frowning and saying nothing.

The angel civilization has worked hard for tens of thousands of years to create the Merlot Heaven today. Not to mention other things, the nine lines of defense on the periphery of the Angel Nebula cannot be completed overnight.

Merlot Heaven has moved now, and everything has to start from scratch.

What's more, there are only a few habitable planets in the universe. It is not easy to find a planet with an environment similar to Merlo's Heavenly Court.

"The future fate of the Merlot Heavenly Court can be discussed later. The top priority right now is to consider how to eliminate Morgana! This time we must fight the lion against the rabbit and go all out to defeat all the fighting celestial bodies and the Tianji and Tianblade series. The attached battle group strives to annihilate Morgana and the demons in one fell swoop with an overwhelming advantage!"

Hak Hee tells the angels to cheer up.

"yes!"

The angels didn't have so many ideas. They decided to just follow King Tianji. With King Tianji's amazing wisdom, they will definitely be able to restore the glory of angel civilization!

The mighty Angel Legion was intercepted outside the Milky Way.

The relationship between Luther and Angel Civilization is not a good one. What's more, no matter how good the relationship is, it is impossible to let their army enter.

"Tiandao civilization actually has so many fighting celestial bodies?"

Although He Xi had expected it, was this too much?

After all, the Tiandao civilization is the overlord civilization of the unknown universe. This is doubtful. After all, they said it themselves.

He Xi estimated that the Tiandao civilization must have combat celestial bodies, but the number may not be comparable to that of the angel civilization.

The reason is very simple. It is too difficult for them to collect resources. It is not as convenient as the known universe. This is something that can be easily inferred.

The angel civilization has ruled the known universe for so many years. The resources collected are desperately used to make small clocks and combat celestial bodies, relying on the number to pile up the computing power to the point where no one can match it.

Can the Tiandao civilization do it?

As a result, after seeing these combat celestial bodies in front of him, He Xi found that the Tiandao civilization can do it. Not only can it do it, but it has also surpassed the angel civilization!

Pan Zhen has now become one of the gods. This time he is responsible for intercepting the angel army. This is an important task and an opportunity for him to show himself, so Pan Zhen will naturally not let Lena lose face.

"Your Highness He Xi, the King of Tianji, the front is our Tiandao heaven, please stop!"

Pan Zhen calmly conveyed his words through the dark communication. A full fifty combat celestial bodies set up a defense line behind him. Pan Zhen has never been so confident!

Or in other words, he has never fought such a rich battle!

If fifty combat celestial bodies all launched the antimatter bomb of the Sky Punishment bombing, the Taotie fleet could be wiped out in one second. Even if the angel civilization had combat celestial bodies, it probably would not be able to advance.

Chapter 278 I have had a cold for several days, so there is a problem with the update

"King Hexi, we have been locked by the opponent's combat celestial body, and we are currently unable to detect the opponent's strike methods!"

"King Hexi, our space-time barrier has been activated, and the current energy has reached 100%!"

Of course, the angels under Hexi must be prepared to attack and counterattack.

It has to be said that the fifty combat celestial bodies indeed brought huge unimaginable pressure to them.

When have angels been targeted by this level of power?

They haven't even dispatched combat celestial bodies to deal with demons!

"We have no ill intentions, God Pan Zhentian."

He Xi already knew about Pan Zhen becoming the god of the Tiandao civilization.

But she didn't expect that Pan Zhen, who had just joined Tiandao Civilization, would be able to take charge of such a big scene?

In fact, it was just Luther who was too lazy to act and let Pan Zhen fight the war with a bunch of smart AI.

Pan Zhen didn't know this, but he just felt that Luther's behavior was like buying horse bones for a lot of money.

He was very shocked inside, so he was also very serious.

"The Sky Blade and Tianji Combat Series groups are here, and you still say that you have no ill intentions? Your Highness Hexi, this is really the biggest joke I have ever heard."

Pan Zhen said calmly.

Anyway, the order he got was to intercept the angel army, and then the angels could come in if they wanted, but He Xi could only be let in alone.

In this situation, He Xi had no good solution.

She knew that this was a very normal behavior, just as it was impossible for the Angel Civilization and Angel Nebula to allow these fifty combat celestial bodies and hundreds of thousands of super warriors to enter.

Luther took advantage of this rationality to create obstacles for He Xi. He knew exactly what He Xi wanted to do, but he refused to let her do it.

In this case, He Xi will have to face the scum army to bite him in the butt.

"I want to ask to see the God King."

He Xi lowered his attitude. There was nothing he could do about it. Who in the known universe didn't know the current situation of angel civilization?

Even if she wanted to put on a show, she couldn't.

"You really underestimate the way of heaven."

He Xi remembered that Luther had asked her to exchange dark Su silver for technology and materials. She felt that she had been deceived so miserably.

You are so damn rich, why do you want me to exchange materials and technology? ? ?

Why didn't I realize you were so good at acting at that time?

Hexi felt that his cushioning hurt too much and he was angry.

How stupid she was, so foolishly she fell for the trick and handed over her technology and resources.

Even though those technologies were not very good and were not considered the core of the angelic civilization, He Xi suspected that Luther intended to use these technologies to analyze the technological situation of civilizations in the known universe.

As a result, it is estimated that Tu Qiong Dagger has seen it now and feels that the angelic civilization is not worth their attention.

Good guy, He Xi is envious of such a large number of combat celestial bodies.

She had originally planned to rely on the Sky Blade and Sky-Based Combat Series Group to make Luther give in. After all, with such a terrifying legion, Luther had to be crazy to fight with the angel.

But she didn't expect that Luther could actually bring out fifty combat celestial bodies.

Even if these fighting celestial bodies belong to the Tiandao civilization, the angel civilization is not rich now. If there is a fight, not to mention both sides will be hurt. It will be fine if the angels are not destroyed. The Tiandao civilization will probably be injured, but it will definitely Impossible to perish.

"I will pass it on to the king."

Pan Zhen said calmly, and then reported He Xi's request to Chang Wei.

He must now be careful in his words and deeds, and not let others catch him in any of his words or deeds.

But what puzzled Pan Zhen was that in order to prevent himself from appearing arbitrary, he also asked two Tiandao gods who were deputy generals and adjutants, but the other party said that everything was decided by him as the coach.

This made Pan Zhen not know what to say for a moment. He thought the two lieutenants were here to monitor him, but why did he delegate so much power?

With God's level of brain development, Pan Zhen was able to master the rules and regulations of the Heavenly Civilization in one day.

He knew very well that the duties of the lieutenants and adjutants were to balance the power of him as the coach. Pan Zhen felt that this was normal.

But delegating power to such an extent that it was all up to him to make the decision left Pan Zhen a little confused and he became more cautious in his actions.

It's impossible that the two lieutenants and generals don't have the brains to understand the situation, analyze the pros and cons, and react and adapt on the spot, right?

How is this possible?

Pan Zhen thought about it, and the tens of thousands of years old city government just thought of a possibility, that is, this is a test!

"Your Majesty, Hexi, the Heavenly Foundation King of the Angelic Civilization, wants to see you!"

After the secret communication was connected, Pan Zhen said to Luther respectfully.

"Hexi, King of Tianji, wants to see you? He brought so many troops here. It's obvious that the person who came here is evil. God Pan Zhentian, what do you think?"

The goddess's exclamations and breathing came from Luther's side, but Pan Zhen completely ignored them.

"I obey all the king's orders!"

Pan Zhen said that he would listen to you.

"Don't worry, I heard that Hua Ye and Ruoning are resurrected."

Luther said a concise and concise sentence, but Pan Zhen, who has been in the city for so many years, can naturally understand the meaning of this sentence and Luther's thoughts.

"My lord, I obey the order!"

Pan Zhen knew how to deal with it.

"Your Highness Hexi, the king is busy with other things now. The matter you requested to see will be dealt with later."

Pan Zhen said to He Xi.

He Xi raised her eyebrows. She knew it was difficult to ask for help, but she still couldn't help but feel aggrieved and angry at this time.

But he quickly regained his composure and just stared at Pan Zhen.

"I will wait for the God King."

He Xi said.

"As long as the angels don't cross the border, I will naturally not interfere."

Pan Zhen nodded.

The angel army had no choice but to station itself in the desolate galaxy outside the Milky Way.

Their combat celestial body can fully meet their needs, and there is no need to go to the planet.

However, everything that happened today made the angels clearly aware of it.

Their card cannot be used in the known universe now!

Wherever angels have passed in the past, who dares to stop them?

Now I am blocked directly from a galaxy, not to mention how frustrating it is.

He Xi also noticed the wavering of people's hearts, but there was nothing she could do about it. He Xi's methods were not very good. Even if there was a celestial supercomputer that allowed He Xi to analyze various possibilities, these false rumors accumulated. The method is not as practical as strength.

"Forget it, let them go, it's all because I, the Tianji King, am incompetent."

Hexi shook his head.

She didn't know why Luther refused to meet her.

...

On the other side, Hua Ye and Ruoning were resurrected.

The two of them felt even more frightened after this time of life and death.

"This guy Carl just recycles the black hole engine instead of saving me!"

Hua Ye was very angry.

Chapter 279 Hua Ye and Ruoning upgrade

"Do you have any value? To Karna Turtle Sun, your value is nothing more than the Sky Slag Army. The value of the Black Hole Engine is much more powerful than you."

Ruoning said mockingly.

"Hmph, how can I be so worthless?"

Hua Ye said angrily.

"It's a pity that guy Karl doesn't trust me enough. Otherwise, if you install a void engine on me, I may not lose!"

Ruoning said unhappily.

She is the fourth-generation divine body. If coupled with a void engine, how could He Xi destroy herself so easily?

"Ms. Ruoning, King Hua Ye."

The god of death, Karl, appears at this time.

Both of them looked at him angrily.

"What should I say, Karl and Hexi are so powerful, not to mention the grandsons of Tiandao and Luther, I think it is better to break up as soon as possible."

Hua Ye complained.

He wants the fourth generation divine body and his own black hole engine. Only in this way can he feel at ease.

Didn't you see that Ruoning was turned into ashes by He Xi in an instant?

This made Hua Ye's fear of He Xi increase.

Karl, the God of Death, knew Hua Ye's character and didn't care about his grievances.

"I have prepared an upgrade for you two. This time, I won't let you down."

Death God Carl sighed and said.

If it wasn't necessary, Death God Karl would not be willing to dismantle his void weapon and void equipment to let Hua Ye and Ruoning upgrade.

But if they are not upgraded, the two of them will not be able to deal with He Xi, let alone Tiandao and Luther.

In this case, the God of Death Karl could only make plans and dismantle those less important void weapons and void equipment. For this reason, he even took out the void essence of the Four Knights of the Void plan.

There is no way, in the absence of stars to explode the black hole, the god of death Karl has to use a little less void matter on hand. Otherwise, why would he go all the way and go to such trouble to recover the black hole engine?

Isn't it just because we can't afford to waste it?

"How should I put it? If there is no fourth-generation divine body, I feel that it is better to forget it."

Hua Ye and Ruoning looked at each other, their eyes lit up, and then Hua Ye asked tentatively.

"King Hua Ye's upgrade is the fourth generation divine body and the reloaded black hole engine. This time for the black hole engine, I will write more program branches. He Xi's methods have been exposed. I believe next time, King Hua Ye will He Xi will be dealt with in a devastating manner."

Death God Karl said calmly.

The battle between gods is the battle between intelligence. He Xi has exposed too many abilities and techniques. The god of death, Karl, can just use a big clock to study it, and he can immediately create the void ability and void algorithm to restrain He Xi. program.

"Can you crush He Xi?"

Hua Ye couldn't sit still. Hearing this, he was immediately ecstatic.

"I dare not say that He Xi can be completely crushed. After all, the specific situation depends on the battle process. However, most of He Xi's methods can be effectively restrained and targeted."

Death God Carl nodded and said.

"What about Luther's grandson?"

Hua Ye thought for a while and then asked.

Solving He Xi is not the core goal. The most important thing is Luther's way of heaven and Luther. Hua Ye knows this very well.

"If Luther's only means of expression are his God-of-War-level divine body and his King's Treasure House, then it won't be a problem."

Naturally, the God of Death, Karl, would not say how powerful Luther was, as that would only make Hua Ye retreat.

"Didn't you say that Luther has a void engine? Even a concubine has a void engine, let alone Luther?"

Hua Ye said very shrewdly.

"King Hua Ye needs to explore these by himself."

The god of death, Karl, made it clear that he wanted to use Hua Ye as a tool to test Luther.

Hua Ye himself knew this.

However, he thought very broadly. Since both he and Ruoning could be resurrected, there was nothing to be afraid of. However, when Hua Ye had a choice, he certainly didn't want to die.

"I also want the fourth-generation divine body and void engine, so that I can help Hua Ye deal with Luther's Concubine and Queen!"

Ruoning said directly to the God of Death, Karl.

Karl, the god of death, felt very painful.

"Ms. Ruoning, please rest assured, I have prepared the fourth generation divine body and a void engine for you."

But Karl, the God of Death, knew that this was a necessary investment, so he could only do this.

"Then I don't know about Sumali and Kunpeng..."

Hua Ye asked the God of Death, Karl, even more. Of course, he just wanted his men to help him block Luther's men.

"All the void matter in my hand has been used to upgrade the fourth generation divine body and void engine for both of you."

Death God Karl said calmly.

"All right."

Hua Ye waved his hand.

"When will the upgrade start? Don't get me wrong. I just want to help you catch Lieyang's girl and Pan Zhen as soon as possible."

Hua Ye said.

"As long as King Hua Ye is willing, he can do it at any time."

Carl, the god of death, was also very impatient.

Especially after he learned that He Xi had left the Angel Nebula with his army and headed for the Milky Way Galaxy where the Tiandao Civilization was located.

The God of Death, Karl, who was worried about Hexi's alliance with Tiandao, immediately completed the upgrades for Hua Ye and Ruoning.

The black hole engine did not increase the frequency, it was still 60 frequency, but Hua Ye found that it had a lot more functions.

These functions are like fool-proof operation, naturally not as good as the gods who are also proficient in the void algorithm, but they can also defeat masters with fools. With the ultra-high frequency of the black hole engine, the master can be beaten to death with random punches.

Of course, the most important thing is the fourth-generation divine body!

"I forgot to ask Carl that bastard to strengthen my ability in that aspect, so that it is possible to conquer all the short skirts!"

Hua Ye said with some annoyance.

Ruo Ning rolled his eyes at him, although she also wanted to strengthen Hua Ye's ability, after all, she was not the one who was happy in the end?

However, is the fourth-generation divine body for you to play like this?

"Hehe, my current dark energy drive is simply so strong that it explodes!!!"

Hua Ye said excitedly.

The power of the fourth-generation divine body is completely beyond Hua Ye's imagination. No wonder Ruo Ning wants the fourth-generation divine body instead of the void engine.

The divine body is the foundation, and the void engine is a plug-in. When there is a choice, it must be the most important.

But now, I have them all!

"He Xi, wait for me!"

Hua Ye said viciously.

Ruoning completed the upgrade, self-checked the data and void engine.

Then, as expected, it was discovered that the void engine had the permissions of various large clocks.

"Karl is really cautious."

Ruoning said dissatisfiedly, the permissions of the large clock, how could she unlock it?

"And the frequency is so low, only 12 frequencies, isn't it just 2 frequencies higher than the void engine of the Heavenly Concubine and the Queen of Heaven?"

Chapter 280 Death God Carl hooks up with Liang Bing

If there is no comparison, Ruoning is of course satisfied, after all, this is a void engine.

But only with the comparison, Ruoning will feel that it is not enough.

Huaye is 60 frequency, so he must make it a whole, 20 frequency, right?

It is only 12 frequency, just to send beggars, if the Tiandao civilization of the unknown universe sees it, they will think that our void engine in the known universe cannot afford high frequency!

"It's still 60 frequency, Carl, this bastard, probably doesn't plan to upgrade my black hole engine!"

Hua Ye looked depressed and had to ask Ruoning for advice.

"So what should we do now?"

"Of course, we should stand up first to stabilize the morale of the army. Haven't you seen that the morale of these cats and dogs under your command has almost fallen to the bottom? If you continue to shrink like this, I'm afraid your men will sell you out, and they will scatter like birds and beasts and run for their lives first!"

Ruoning said angrily. She didn't expect that Huaye would need to teach her such things.

"Military morale? It's not tens of thousands of years ago. I have received the support of the God of Death Carl and transformed the black hole engine. My strength is no longer what it used to be!"

However, Hua Ye unexpectedly saw it clearly.

He knew very well that the current situation was different from before.

In the past, it depended on military morale, but now, a powerful enough god can destroy a legion by himself.

"The only problem is that we don't have a combat celestial body."

Hua Ye said helplessly.

He has figured out what a combat celestial body is, and then found that without a combat celestial body, the Tianzha Legion would be a piece of cake for the angels and the Heavenly Dao.

In fact, for a strong man of Hua Ye's level, a combat celestial body is of little use.

As Lingxi said at the beginning, under the same function, of course, the smaller the body, the more powerful it is.

The significance of a combat celestial body to a god is mainly to provide support in terms of computing power.

When Queen Yan was tested by He Xi, whether she had the computing power support of Tianren No. 7 or not, the combat power she showed was completely different, which can be seen from this.

But if it is a battle between gods of the same level, the combat celestial body can only serve as a backstage support, and can't do more.

However, the combat celestial body can't deal with gods of Hua Ye and Ruoning, but it is a good hand to fight the Taotie under Hua Ye.

As for the Tianzha army summoned by Hua Ye, in front of dozens of Tianji, Tianren series combat celestial bodies and combat groups, I am afraid they can't escape the fate of being instantly wiped out.

Even Ruoning herself, when being locked by dozens of combat celestial bodies, can't use the wormhole ability to escape. The huge gap in computing power is enough to make her nowhere to hide.

"We don't have combat celestial bodies, but we can grab them!"

Ruoning said confidently. Who knew that the Death Song Academy was so poor that it didn't even have combat celestial bodies.

But it doesn't matter. They tried to seize Xingming before. If He Xi hadn't reacted quickly, Xingming would have been taken away by them.

Combat celestial bodies are naturally no problem.

It is better to say that combat celestial bodies are easier to capture than star lives, because they cannot run away.

"Oh, really?"

Hua Ye's eyes lit up. If they could capture those combat celestial bodies in short skirts, there would still be a fight!

The biggest problem now is the imbalance of combat power.

"What are we waiting for? Let's set off quickly. Carl's grandson is very worried about the union of angels and Tiandao."

Hua Ye continued.

In fact, he himself was also worried that He Xi would be forced to surrender to Tiandao civilization. In that case, Hua Ye basically had no hope of obtaining the sacred knowledge treasure house and arsenal of angel civilization.

Ruo Ning saw through it but did not say it. She was also worried that such a situation would occur.

That's why the God of Death Carl temporarily relaxed the restrictions and gave the two of them, the Void Engine and the Fourth Generation God Body.

Driven by interests, they had to do this.

...

"The angel army was intercepted outside the Milky Way, Queen."

Ato said to Liang Bing.

"Just interception?"

As Liang Bing was talking, a familiar voice sounded in her ears.

"Liang Bing, I heard that you suffered a setback on Earth and suffered heavy losses?"

"Damn!"

Liang Bing was full of anger and was worried about having no place to vent. Hearing this, he shouted without thinking.

"Karl, why do you, old silver coin, haunt me? What's your business if I fail or not? No matter how heavy the loss is, it's not your turn to gloat over it. Get lost..."

You said you suffered heavy losses without even understanding the situation?

Liang Bing complained that the god of death Karl was already behind.

The god of death Karl really didn't know the current situation of Liang Bing and the devil. After all, after the Milky Way was declared as its territory by the Tiandao civilization, it was shrouded in a special war fog. It looked like the situation that the cosmic tree model of the unknown universe could not calculate.

But of course he contacted Liang Bing for his own ideas and wanted to use Liang Bing.

Liang Bing didn't leave the Milky Way for such a long time, and because the Tiandao civilization blocked the Milky Way, the god of death Karl would naturally not come to the absurd conclusion that the goddess he licked had become Luther's plaything.

My Bingbing is pure and innocent, how could such a ridiculous thing happen to her!

"Liangbing, don't you have any thoughts of revenge at all?"

"Damn it, don't even think about trying to persuade me to be your pawn!"

Liang Bing has known the God of Death Carl for tens of thousands of years. She is very wary of this old bitch, especially at this time when her strength has been greatly reduced. If she is tricked by the God of Death Carl again, she is afraid that she will not be able to stand up for thousands of years.

"Luther's strength is already abnormal, even more exaggerated than that bitch Kesha was alive... Carl, even if you say it to the sky today, I will not be fooled by you again!"

Liang Bing is also mean. She did not tell the God of Death Carl the truth and used wrong information to confuse Carl.

When the God of Death Carl heard Liang Bing's words, he immediately confirmed his guess that Liang Bing's demon civilization was likely to be hit by the Heavenly Dao civilization!

"Luther and the Heavenly Dao are indeed very powerful. If he joins hands with He Xi, he will be unstoppable, but now there is a good opportunity!"

The God of Death Carl still did not give up, hoping to convince Liang Bing to join forces with him.

"Hua Ye's army has already conquered the Melo Heavenly Palace. I said at the beginning that Hua Ye's strength has broken the balance. Even if he can't beat Luther, he will definitely be able to deal a heavy blow to the Heavenly Dao Civilization... Liang Bing, don't you want to take advantage of this opportunity?"

"If there is really an advantage to be taken, then of course I would love to take it!"

Liang Bing sneered.

"But I'm afraid that the fisherman will benefit from the quarrel between the snipe and the clam... I don't know who is the fisherman between you and me?"
