

Kryptonian 281

Chapter 281 Liang Bing sold Karl

"Liang Bing, you misunderstood me too deeply!"

Death God Karl did not expect that Liang Bing's vigilance would become so strong. He even mentioned this, but the other party still didn't let go and could only let out a long sigh.

"How can you believe my sincerity?"

"Sincerity?"

Liang Bing raised two fingers as white as green onions, pinched his chin, and thought for a moment.

"Well, Queen, I suffered heavy losses this time. Not only all the demons under my command were dead, but even Demon No. 1 was almost crippled. Unless you can make up for my losses first, I will never give in to you again." Gunslinger!"

Liang Bing knew this was a good opportunity to take advantage of the autumn wind.

Judging from the look of Death God Carl, it seems that he has no idea about the situation on this side of the galaxy.

Isn't it normal for Liang Bing to find an opportunity to kill him?

"Liang Bing, you already have the technology to resurrect your demons. All that's missing is the genetic material..."

Death God Carl already understood what Liang Bing meant. It would be better to say that for so many years, this was the only topic they could talk about for longer.

"I may be able to help with this. You also know that I like to study death, and my gluttonous civilization is attached to me, so it deliberately creates killings everywhere in the universe to please me. Over the years, I have accumulated I have a lot of genetic material, I can lend it to you first."

Of course, the God of Death, Carl, was not so full. He was just like feeding the stupid king. He couldn't give too much at one time. If he gave too much, what would happen if Liang Bing was satisfied and ignored him?

"Hey, it seems like you really spent a lot of money?"

Liang Bing expressed surprise.

This was the first time she heard that the God of Death, Karl, was so generous and satisfied her with just one breath.

That's good, Liang Bing will be able to upgrade more demon warriors by then.

He Xi's angel army is here, and Liang Bing can't make any preparations.

She had been preparing for the demon army before, but after the earth joined the Tiandao civilization and became a subsidiary of the Tiandao civilization, Liang Bing could no longer continue to develop troops on the earth.

"It's empty talk. Let's get the genetic material first... Well, by the way, the reincarnation of a demon requires a living sacrifice. Let me declare in advance that I don't dare to go to the earth again. Fraser is the territory of angels. You can help me find it. A planet with intelligent life!"

Liang Bing said to Karl, the God of Death.

She even thought about the tactical shift, although this would allow the God of Death, Karl, to know her next move.

However, Liang Bing still doesn't know what Luther's thoughts are, and this step is just for future preparation.

If Luther really merges with Hexi and Angel merges with Tiandao, then Liang Bing will definitely run away.

There are many prerequisites for Liang Bing to resurrect his demon army, otherwise he wouldn't have been beaten to the point of annihilation every time, and would have had to survive for thousands of years.

When Liang Bing came to Earth, the first thing she did was to turn Huang Village into a living hell and release her super demon virus on the entire Earth.

She has done so many evil things on earth, and not all of them are just to resurrect the demons under her.

If she wants to resurrect the demon army under her command, she must cause destruction to all living beings.

The Demon Queen is feared in the universe, not without reason.

"In that case, let's use Taotie."

Death Karl said calmly.

"Taotie??? Taotie is the body of a beast. Although the effect of reincarnating a demon is average, it is barely enough!"

Liang Bing's eyes were a little strange. She was really shocked. She didn't expect the God of Death, Karl, to be so cruel!

That is his biggest trump card. The God of Death, Karl, developed the Taotie Civilization and the Giant Wolf Civilization just for the expansion of his subordinates.

"Karl, are you really willing to contribute your vassal civilization to help me resurrect the demon army? If you can really do what you say, then I don't believe in your sincerity!"

Liang Bing asked tentatively, if Taotie is really implanted with demon genes, there will be a lot of beast-body demon warriors. With Taotie's level of civilization, the strength of these beast-body demon warriors is definitely better than ordinary mutants. The devil is going to be powerful!

The question is, is Karl really willing?

"The potential of the gluttonous civilization has reached its end,"

Death God Karl's tone was calm, but the content of his words was so cold and chilling.

"What's more, this time the Taotie army followed Hua Ye to the Angel Nebula. There will definitely not be a few people left alive in the Taotie civilization's army. Without the protection of the army, the Taotie civilization is no longer just a catfish on the chopping board, to be slaughtered by others? Instead of expending effort To protect the Taotie civilization that has lost its value, why not let them finally show their value!"

After becoming a phantom, Death God Karl has become absolutely calm and rational. There are no hormones and emotions secreted by the body to affect his judgment. For Death God Karl, everything can be used or discarded, depending on the value.

"Holy shit!"

A cold-blooded person like Liang Bing couldn't help spitting out the fragrance.

"Karl, you are so cold-blooded. The Taotie civilization fights for you in the north and south. There is no credit, but hard work. As a result, their army is still out there fighting for you, but you are already arranging the funeral arrangements for their entire civilization. "

"Liang Bing, we have each other, and the fate of the Taotie civilization is in your hands, not that I insist on abandoning them. By doing this, I also show you my sincerity to the maximum extent..."

Death Karl said indifferently, saying that he didn't care that he was cold-blooded and shameless, anyway, he only had one goal, that is to open the Void Age!

"Look, in order to revive your demon army, I am willing to sacrifice even my vassal races. Is this sincerity enough?"

"To be honest, I am a little afraid of you, old cunt. You are not the kind of person who crosses the river and destroys the bridge!"

Liang Bing rubbed the goose bumps on her arms.

"But, speaking of which, the queen is not happy with the Taotie civilization. Since you are so generous, I will reluctantly trust you again!"

"A wise choice."

Death Karl laughed, and it was clear from the sound that he was in a good mood. Of course, Liang Bing thought it must be a disguise. How could this dead man have any feelings now.

"Then you just wait slowly!"

Liang Bing also smiled.

She didn't care what conspiracy the Death Karl had, and wanted her to backstab Tiandao and Luther or something. Anyway, she swallowed the benefits and didn't care about other things.

Not only that, Liang Bing even took this matter to Luther to seek credit.

"My Lord, the grandson of the God of Death Karl came to me and said he wanted to join forces with me again."

Liang Bing said to Luther attentively.

Luther knew what happened throughout the whole process and couldn't help but sigh, as expected, a dog licker will end up with nothing.

Chapter 282 Triangle and Sun Wukong

"In that case, then you are responsible for tricking that guy Karl, the God of Death, into coming to our door."

Luther said to Liang Bing.

"Do you still want me to be responsible for deceiving Karl, the God of Death?"

Liang Bing's eyes widened.

"Karl's grandson is not easy to deceive, Your Majesty."

Liang Bing continued.

"Really? If you deceive him this time, I will reward you heavily!"

Luther said with a smile.

"There are many rewards? Is it a black hole engine or a stellar engine, my lord?"

Liang Bing's eyes suddenly lit up.

"It's a beautiful thought. I'll give you a 10-band Galaxy Power Void Engine at most."

Luther said.

Instead of feeling disappointed, Liang Bing was pleasantly surprised.

After all, Heavenly Concubine Du Qiangwei and Heavenly Queen Qilin are just 10-channel Galaxy Power void engines.

If Luther said this, wouldn't he treat her as a concubine and a queen?

Of course, Rena does not have a void engine. Although she also wants it, Rena is embarrassed to say this.

The Tiandao civilization has accepted the surrender of the Lieyang civilization. Now it is necessary to vigorously eliminate the differences between the Lieyang civilization and the Tiandao civilization. She cannot add obstacles to Luther at this juncture.

"It's agreed!"

Liang Bing was afraid that Luther would regret it, so he said quickly.

"I keep my word!"

Luther nodded.

In fact, with the relationship between Liang Bing and the God of Death, Karl, how could he not get a void engine?

It's not even impossible to directly give Hua Ye's "fifth generation divine body" to Liang Bing based on the thoughts of Death God Carl towards Liang Bing.

However, Liang Bing cannot believe the god of death, Karl.

...

Meanwhile, Blue Star!

The command hall of the Great Black Wall.

"The number of casualties in Hengbing City has reached 28,867, and the Second Navy Self-Defense Force has lost contact..."

Lianfeng pressed the remote control, cut off the news broadcast on the TV, and said in a deep voice.

"Judging from the traces of casualties, the terrorist attack came from the East China Sea and disappeared along this path..."

A few hours later, several fighter jets carrying out joint patrol missions in the East China Sea received bad news.

"Three friendly aircraft have crashed, please open fire!"

The pilot spoke quickly.

Lianfeng was startled and said quickly: "Don't fire. The data shows that ordinary missiles are ineffective. Exit five thousand meters away and continue cruising!"

"Yes, the Crane Team has withdrawn from the cruise five thousand meters away!"

After the pilot retreated in accordance with the order, he said unwillingly: "I can't understand that the Taotie battleship is protected by an energy shield. The current enemy has no energy shield protection, and our earth's firepower is still ineffective..."

"There's no point in being anxious, just execute the order!"

Lianfeng scolded, cut off the communication, stood up, and looked around at everyone.

"Assemble the company of heroes! The enemy we want this time may not be easier to deal with than Taotie! In addition...inform Queen Qilin and Princess Du Qiangwei of the situation here!"

Members of the Xiongbing Company arrived one after another.

"Chief Lianfeng."

Qilin asked curiously.

"Now can we tell you who the enemy is?"

Lianfeng nodded and began to explain to everyone.

"The enemy is the legendary triangular body life. It's a long story, and it involves the distant Kamigawa body war..."

"The Kamigawa Civilization fought a physical war with the Triangular Body and the Beast Body 50,000 years ago."

"Most life is born from the ocean, some stay at the bottom of the sea, and some go to the mainland. The most intelligent life that the sea can breed is the triangle."

"On our planet, there are also typical representative species, such as dolphins."

"The brain development of dolphins is more than 5% higher than that of humans."

"In historical records, the largest triangular civilization in the Kamigawa galaxy started a war of intelligent evolution with the Kamigawa civilization."

"Ultimately, the Triangle, despite its more developed brain, lost the battle."

"So, the Divine River System was named the Divine River System instead of the Triangle System."

"Afterwards, the Kamigawa Civilization and the Angel Civilization met and discovered that they were all the same intelligent form. Therefore, the two civilizations jointly launched a physical war and determined that our type of intelligent form is now the dominant form of the known universe."

After Lianfeng finished speaking, Qilin asked.

"Why does it have to be beaten? Is it just because the body shape is different?"

"Qilin, physical wars are not equal to rights wars. They use the conquest of nature as their way of fighting. Therefore, gods and angels spread various concepts of kindness and justice and the wisdom of conquering nature and controlling life to the world of Shenhe body. Gradually, the Triangle fell at a disadvantage in this war, and Holy Kesha became the highest god in the Kamigawa world."

"But the triangular civilization also has its advantages. If they form an advanced civilization, it would be hard to say!"

Lianfeng's expression became solemn.

"Now we have just ended the war against the demons and gluttons, and the Triangular Civilization is here again. We have no idea about the reality of the Triangular Civilization and what kind of methods they have, so we are calling everyone together this time..."

"The opponent is in this part of the East China Sea. We have already had several joint patrol reconnaissance planes crash in this area. At present, we still know nothing about the attack methods of the Triangle civilization."

"The order from the superior is to contact the other party first and find out the other party's purpose of coming to Earth."

"If the other party can live in peace with the earth, that would be the best. If not, we can prepare for war as soon as possible!"

"Given that the other party has shown strong aggressiveness, it may be dangerous to contact the other party. Originally, Sun Wukong has a clone and can advance or retreat. He is the best candidate to contact the other party, but unfortunately Sun Wukong suddenly left the earth some time ago and disappeared, so..."

Lianfeng looked around at everyone in the Xiongbinglian.

"This contact mission can only be completed by everyone present!"

Everyone looked at each other, and the atmosphere was a little stagnant for a while.

Everything in the triangular civilization is unknown.

Facing an unknown enemy, who dares to say that he will be able to get out of it safely?

Even super gene warriors have to be cautious when facing a major task that is enough to threaten their lives.

However, the Sun Wukong who disappeared as Lianfeng said actually went to find Tiandao.

Originally, Sun Wukong was reminiscing about his past in Huaguo Mountain, but after coming out, he didn't expect that earth-shaking changes had taken place.

The Lieyang Civilization was gone, which made Sun Wukong confused. However, Sun Wukong heard that the Lieyang Civilization was destroyed, and the remaining ones joined the previous Krypton Civilization.

Then the Krypton Civilization was renamed the Tiandao Civilization.

This word simply stimulated Sun Wukong's spirit, so he went to the Tiandao Civilization alone without any message or explanation.

I, Sun, want to see what this Tiandao is!

Chapter 283 Diamond Bracelet, Demon Slaying Platform, Sun Wukong

"Your Majesty, there is a monkey attacking our battle celestial bodies!"

The Heavenly Dao Civilization has not hidden its position in the Milky Way. A full one hundred battle celestial bodies guard the Supreme Heavenly Court in the center, which makes Liang Bing drool.

One hundred battle celestial bodies, and fifty intercepted the entry of the angel civilization army, adding up to one hundred and fifty battle celestial bodies. The Lao Lu family is really rich, and I don't know if he hasn't hidden more battle celestial bodies!

No, with the insidiousness of Lao Lu, there must be battle celestial bodies hidden.

In fact, Liang Bing really guessed correctly. Luther hid a territory that no one in the Super Seminary Universe could imagine.

Void engine battle celestial body!

The battle celestial body itself is advanced enough. If a battle celestial body is blessed, it is not impossible to fight against the void warrior.

What's more, it is a battle celestial body equipped with a void engine?

Such a battle celestial body is even less likely to be seized and invaded by Hua Ye and Ruoning using the void engine.

The reason why no one in the Super Seminary Universe does this is very simple, everyone is not rich.

Death God Carl didn't have the capital to spend so much void matter to load a combat celestial body.

Even if the main material is not void matter, but only the void engine is void matter, it still requires a huge amount of void matter.

Where did he get so much void matter?

"As for the monkey, wouldn't it be better to let him become a dead monkey?"

Luther said calmly. Sun Wukong wanted to break in as soon as he came up. Did he really think it was the empty shell of the Nantianmen of the Lieyang civilization?

If Sun Wukong came up and asked for an audience, Luther would not do anything to him.

But his help to Blue Star is obvious to all. Even so, Sun Wukong came to the door without hesitation. It would be better for this crazy monkey to become a dead monkey. Anyway, Luther was not interested in Sun Wukong's hidden technologies and functions.

Sun Wukong didn't expect that this Tiandao civilization was completely different from the Tiandao civilization he had fought against before.

All the Heavenly Soldiers and Generals of the Heavenly Dao Civilization were third-generation super soldiers. In addition, there were also people from the Lieyang Civilization. After they surrounded Sun Wukong, Sun Wukong really had no way to break out of the siege.

After all, all the Heavenly Soldiers and Generals were wearing Suyin armor and Suyin weapons. Even if they were not as good as dark Suyin, they were still one of the hardest materials in the known universe.

Sun Wukong found that his invincible stick could be blocked by two Heavenly Soldiers on the opposite side, and the remaining Heavenly Soldiers and Generals almost chopped him down. However, even if he could fly, it would be useless. The Heavenly Soldiers and Generals could also spread their wings and fly high.

They could still chase him up to the sky and down to the ground and he couldn't escape.

The super genes of the Heavenly Soldiers and Generals were all functional super genes, which converted dark energy into kinetic energy, so each of them was a model of infinite strength and natural superpower. After fighting a few times, Sun Wukong realized that he couldn't rely on strength to fight them.

Otherwise, if his dark energy reserves could not keep up, he would be hacked to death.

Some Heavenly Soldiers and Generals also have the ability to convert dark energy into thermal energy and release flare bombardment, which is more comprehensive.

The arrows fired were armor-piercing arrows like the flame armor-piercing bullets. Sun Wukong felt uncomfortable after being hit by only a few arrows. The flame armor-piercing bullets released flare energy to destroy his indestructible body!

Now, Sun Wukong began to regret that he should not be so reckless.

This Heavenly Dao is much more powerful than that Heavenly Dao.

He originally thought that the remaining Lieyang civilization surrendered to the Heavenly Dao civilization, but only the Heavenly Dao civilization was the main force, but most of the power was still the Lieyang civilization.

After all, who made the God King Luther only have a few men at the beginning, and it looked very shabby.

It is not surprising that Sun Wukong made such a wrong judgment, but now he is asking for trouble. Soon, Sun Wukong was escorted to Luther.

Seeing the God King Luther again, Sun Wukong became a prisoner, which made him feel very subtle.

"You are not on Blue Star to protect the world left by your master, but you come to trouble me. I just want to see if you can pass my Heavenly Way Demon Slaying Platform like in your myths and legends."

Luther did not give Sun Wukong a chance to say anything, and directly asked the heavenly soldiers and generals to drag Sun Wukong out and kill him.

The full name of the Demon Slaying Platform is "God Killing Engine Dark Energy Data Decomposition Device".

If this thing is used to destroy super soldiers and gods, it means they are completely destroyed, unless there is a backup somewhere else to revive them.

Sun Wukong was escorted to the Demon Slaying Platform, his eyes were dull, after all, his dark energy was exhausted.

Those heavenly soldiers and generals are powerful, but it is impossible for them to consume Sun Wukong's dark energy so quickly. Sun Wukong has not taken action for so many years, and the dark energy he reserves is very huge.

However, these heavenly soldiers and generals did not follow the moral principles of martial arts. One of them used a magic weapon called "Vajra Bracelet" to hit him dizzy. It was actually a void equipment, which was used to hit people. The void attack could directly paralyze and weaken all the gene engines in Sun Wukong's body.

So Sun Wukong, who didn't know this, was defeated by the magic weapon of Vajra Bracelet.

At this point, Sun Wukong didn't know what to do. It seemed that he was about to be killed.

"The Demon Slaying Platform... The Lieyang Civilization also had this Demon Slaying Platform..."

Sun Wukong saw that the Lieyang Civilization was nothing in the Tiandao Civilization. There were as many heavenly soldiers and generals as mountains and seas. The Lieyang Civilization couldn't even make a wave when thrown into it.

Therefore, it is not that the Lieyang Civilization is the foundation, but that the Lieyang Civilization directly surrenders to the way of heaven!

If he knew this was the result, Sun Wukong would definitely not come knocking on his door.

Now, Sun Wukong has nothing to be unwilling to do.

With the red light on the demon-slaying platform, Sun Wukong disappeared into ashes and disappeared.

When Pan Zhen saw this scene, he felt very uncomfortable.

Sun Wukong is gone. Pan Zhen loves and hates this dead monkey. What he loves is his character, that he can be a general!

What I hate is also the other person's character, being stubborn and unwilling to change.

Now that it has been destroyed, that is a good thing for Pan Zhen and Lieyang Civilization. At least an obsession that has been there for many years has disappeared.

Death is a big deal.

"Your Majesty, something seems to have happened over at Blue Star. Concubine Tian will report it."

Then Luther received the report from his men.

"The Triangle came out at this time, and the Lieyang Civilization destroyed the city."

Luther complained, and he also knew that it was because of himself that the plot accelerated beyond recognition.

Otherwise, the triangle would not have appeared just now.

Blue Star was unfamiliar with the Triangle, so Xin Zhao volunteered to negotiate with the Triangle.

Chapter 284 Void Controller!

"I know that Xin Zhao, you are very powerful now, but because of this, you must be more cautious. You are the Dinghai Shenzhen of the Xiongbing Company, how can you easily put yourself in danger!?"

Lianfeng said to Xin Zhao.

"Don't worry, I'm measured!"

Xin Zhao smiled and said.

"Isn't it just a triangular civilization? If I don't have a certain degree of certainty, I won't take my life as a joke!"

"I'm not bragging, but it seems that the only person here who is confident about facing the Triangle Civilization and getting out unscathed is me."

Xin Zhao looked at Lian Feng and said.

"Then be more careful..."

Lianfeng thought for a long time before nodding with difficulty.

"If it is confirmed that the other party is an enemy, I allow you to fight back. I will bear all the responsibilities!"

East China Sea!

Several helicopters followed Xin Zhao, and his wife, Angel Zhixin, didn't trust him and followed him.

"I have said that it is very dangerous, so let them go back, Chief Lianfeng?"

Xin Zhao was worried about the safety of the soldiers on the helicopters behind him.

At this time, three strange-looking dolphins flew into the sky and came to Xin Zhao.

"Triangle civilization, right?"

Xin Zhao looked at the three dolphins with barrels on their faces.

"Please state your purpose for coming to Earth!"

"Earth people convey the order of the powerful. We cannot coexist with the Kamigawa system. In the future, there will be only peace and short-term. We accept the immigration of nearby Mars. In the future, one Hundreds of years, assist, develop Mars, never, not, leave, no need, have large-scale, star, weapons, safety, survival, mottled blue, soldiers, dominance, war results, victory, in the future..."

Xin Zhao listened uncomfortably to the other person spitting out word after word. He finally waited for the other person to finish speaking, then pressed the earphone and whispered.

"Chief Lianfeng, have you heard everything? It's clear that the Triangular Civilization is here for the Earth. They want us Earthlings to immigrate to Mars and give the Earth to their Mottled Blue Empire, so do we still need to continue negotiating?"

"Don't be impatient!"

Lianfeng said calmly.

"Take this opportunity to learn about the details of the triangular civilization first, um..."

She pondered for a moment.

"You ask them, does the world of triangles have emotions?"

"Does your world have emotions?"

Xin Zhao relayed Lian Feng's question.

"There are many kinds of emotions. You, the people on earth, understand, cannot, and do not communicate..."

"Did you hear that?"

Zhao Xin spread his hands and said to Lianfeng.

"They said it directly. They didn't communicate and just made demands. This obviously doesn't look like they are seeking peace!"

"In this case, let's simply make conditions directly to them,"

Lianfeng said in a deep voice.

"Require their armies to leave the earth, not to interfere with each other, not to invade each other, and to make progress and prosperity together."

Xin Zhao recounted it truthfully.

"No acceptance, termination of negotiations, galaxy, earth, no acceptance, immigration, war, continue..."

The triangle's response was very direct, an invisible electromagnetic wave swept past.

Several helicopters behind Xin Zhao suddenly stalled and fell straight down.

The soldiers on the helicopter all covered their ears and looked painful.

"court death!"

Xin Zhao quickly took action.

"Import the data of [Keshu's Knowledge Treasury] and analyze the ingredients. The target belongs to a triangular body, a carbon-based organism, and the atomic composition cannot be analyzed. The target relies on biological energy to drive various microwaves, and turns on anti-bioenergy, 20%, 40%, 60% ...100%, close target action, paralyze target..."

Three strange-looking dolphins suddenly became silent.

"Redefining gravity..."

Behind him, the falling helicopters suddenly began to float again.

Angel Zhixin breathed a sigh of relief. She was almost knocked down by the Triangle just now. Fortunately, Xin Zhao is no longer the Xin Zhao he used to be. Today's Galaxy Power Xin Zhao is progressing very quickly and is very strong.

The key is that Xin Zhao did not sink like Ge Xiaolun, and unlocked all aspects of Galaxy Power faster than Ge Xiaolun.

The Great Black Wall.

"Hey, hey..."

Lianfeng said loudly.

"Xin Zhao, are you still there? What's going on over there?"

The electromagnetic waves released by the triangular creatures interfered with communications, and Lianfeng could only hear a burst of noise coming from the communicator.

"It's broken, Yuqin, please transfer me to the Xiongbing Company channel..."

Lianfeng called for a long time, but received no response, and quickly asked Yuqin to switch the communication channel, preparing to notify everyone in the Xiongbing Company to go and meet Zhao Xin.

"Hey, Lianfeng, did you hear that?"

The communicator suddenly sounded Xin Zhao's voice again.

"I heard it, I heard it, thank God, you're fine,"

Lianfeng was overjoyed and asked quickly.

"What happened just now?"

"The Triangle is attacking us,"

Xin Zhao explained.

"They can use biological energy to drive various microwaves. It was estimated that the electromagnetic waves they released just now interfered with communication equipment and caused communication interruption."

"What about the triangle?"

Lianfeng asked.

"Did you fight back? Did you kill them?"

"Of course I fought back. Not only did I fight back, I also captured them alive,"

Xin Zhao smiled.

"However, I think these stubborn creatures are completely incapable of communication. They probably won't be captives obediently. Let's just kill them!"

"Hey, wait, don't kill them yet!"

Lian Feng hurriedly stopped him.

"Triangular creatures are all unfamiliar to us. Since you have captured the enemy alive, that's great. Regardless of whether we can communicate or not, we can at least study the life structure of the triangles and maybe find a way to deal with them!"

"Then you can study slowly!"

Zhao Xin's wife next to him also reminded him that he could study the triangles.

So Zhao Xin agreed.

"The abilities of the triangle creatures are still quite strange. When you study them, you must be careful... I have temporarily paralyzed the mobility of these three enemies, but they have been trying to use biological energy to resist. If you want to study, you'd better hurry up. It takes effort for me to suppress them."

Luther was a little surprised but not surprised.

It seems that Zhao Xin has a "void controller".

The "Void Controller" developed by Angel Zhixin with the assistance of Xin Zhao can be said to be another great Void technology in the known universe, and it is a high-end Void product that even the God of Death Carl does not have.

Xin Zhao himself is hardworking enough, leaving Ge Xiaolun behind by several streets, and with the help of Angel Zhixin, he has a telepathic connection with him, and the connection between husband and wife is as strong as a knife.

The appearance of the Void Controller is simply a great help to Xin Zhao.

The only pity about the triangle is that they appeared too late, and the version is outdated.

Chapter 285 The Decision of the God of Death Carl

Somewhere in the universe.

The angel spaceship, which looks like an ancient sailing ship, is cruising at sub-light speed, heading towards the Milky Way.

Interstellar travel is always boring, so Hua Ye dozed off out of boredom.

Boom!

Suddenly, the spacecraft shook violently.

"What's going on?"

Hua Ye was awakened.

"Where are we?"

"This seems to be near Proxima Centauri,"

Ruoning walked to the console and took a look.

"We were attacked just now. The enemy seems to be...the Triangle Civilization!?"

"Um?"

Hua Ye raised his eyebrows.

"These guys disappeared after losing the physical war. They haven't been seen for tens of thousands of years. Why are they running out to cause trouble again now?"

"It's not surprising that after the fall of Holy Kesha, all kinds of monsters and ghosts jumped out!"

Ruoning completely ignored that his group was actually one of the monsters who jumped out to cause trouble.

In Ruoning's view, she was here to assist Hua Ye, become the new King of Angels, and re-establish the order of the universe. How could such a noble and great cause be called trouble?

"If the Triangle Civilization jumps out, why should it attack us?"

Hua Ye was a little puzzled.

"I heard that the abilities of these guys are quite weird. They are good at suppressing thoughts. It might be miraculous when used against He Xi. Why don't I form an alliance with them!?"

"Alliance with them?"

Ruoning glanced at him in surprise, with a feeling of admiration.

"Do you understand the language of the Triangular Civilization?"

"Does it matter whether you understand or not?"

Hua Ye rubbed his fists.

"Use this thing to negotiate with people, and you can win everything. Words are the least powerful thing!"

"If we can really conquer the Triangle Civilization, we will have greater confidence in attacking the Milky Way!"

Ruoning pondered and nodded.

Hua Ye confidently headed to the Triangle Civilization.

Not long after, Hua Ye came back, followed by several triangles.

"Did we discuss it?"

Ruoning was a little surprised that Hua Ye was so fast this time.

"We've talked about it, they're both easy to talk to."

Hua Ye chuckled, then stretched out his hand to press, and one of the triangles slipped under Hua Ye's hand.

"Have you redefined their thinking?"

Ruoning understood after seeing this scene.

"Yes, I have redefined their thinking. I am their master, and they are my pets."

After Hua Ye went up, he had no intention of negotiating with the triangle body, and directly turned the triangle body into his pet.

The triangles were unable to resist Hua Ye's black hole engine, and they all became Hua Ye's pets.

"It doesn't look like anything special."

Ruoning said after observing these triangles.

"It's not bad, it took a little effort to rewrite their definition."

Hua Ye said with a smile.

Hua Ye was a little surprised that Triangle's brain was highly developed, but he still completed the rewriting.

"With this group of triangles here, we have more confidence in attacking the Milky Way."

"However, we cannot force He Xi too much. In that case, He Xi may just flip the table and lead the angels to surrender to heaven."

Ruoning nodded and continued.

"Liang Bing, did you know? The real void can conquer all known civilizations, and Hua Ye is my first successful test subject in the true sense."

Liang Bing followed what Luther said and began to trick and deceive the god of death, Karl, to come over.

"Hua Ye's army is about to fight with the angel army. If you want to take advantage, you have to hurry up. I will use the big clock to teleport you here! By the way, I will also study how to repair your Demon No. 1... .."

"That's it..."

When Liang Bing heard this, he immediately hesitated.

"Then I need to think about it!"

"What else is there to consider?"

Karl, the God of Death, was stunned.

"Don't you still believe in my ability? Didn't I use the big clock to send you all your demon wings to the earth?"

"Of course I know your abilities, but I'm a little unsure about your character, an old bastard!" Liang Bingbing said with a smile.

"What if you teleport me to Tiandao's face, wouldn't I die?"

"Liang Bing, what do I need to do before you are willing to believe me?"

Death God Karl smiled bitterly.

"In our tens of thousands of years of friendship, have I ever done anything detrimental to you? I even worked hard and took risks to help you kill Holy Kesha!"

"You can do it soon!"

Liang Bing sneered.

"In the battle to kill Holy Kesha, I was the one who charged forward, and you old bastard knew how to hide behind and pick up the slack! If I hadn't been lucky, I would have been instantly killed by Holy Kesha! What's more, killing Holy Kesha Kesha, isn't it your long-cherished wish? We still need to discuss this carefully!"

"Alas, it seems that you misunderstood me very deeply!"

Carl, the God of Death, sighed.

"However, I don't blame you. After all, you have just suffered an unprecedented setback on Earth. You may be a little unhappy, but time is running out now, and I really can't wait for you that long..."

"so what?"

Liangbing said coldly.

"You want to give up?"

As Liang Bing spoke, he couldn't help but reveal a hint of deep disappointment on his face.

She knew that Carl, the God of Death, was timid, but he was unwilling to even make changes for himself.

In this case, how could she complete her mission and deceive the god of death, Karl?

"Give up? Of course not..."

Carl the Grim Reaper wrote lightly.

"There is a saying from the people on earth, if the mountain is not mine, I will be the mountain! Since you are unwilling to accept the teleportation from the big clock, then I will have to spend a little more effort to teleport Bai Mingxing to you!"

"What?"

Liang Bing was shocked.

Bai Mingxing is the birthplace of the Taotie civilization and the home planet of the Taotie people.

The God of Death, Karl, actually wants to deliver a planet across countless distant galaxies to the location of Devil One.

Such a method is really incredible.

Although the Taotie people look ugly, the birthplace of the Taotie civilization, the White Pluto Star, the home planet of the Taotie people, is unexpectedly beautiful and has a pleasant environment. It is a vibrant planet.

However, the gluttonous people living on this planet have no idea that their end is coming.

The sun of White Pluto is a star that is entering the red giant stage from the main sequence star stage, and its light is blazing with a hint of yellow.

All the Taotie people have long been accustomed to their sun. No one has ever thought about what if one day the sun suddenly disappears?

This is not a problem they need to worry about.

Although their sun is entering its twilight years, compared to the lifespan of stars, it will take at least a few hundred million years for their sun to completely transform from a main sequence star to a red giant. By then, the Taotie civilization will still exist. Whether it exists or not is a problem.

Chapter 286 The Demonic Army Resurrects

But this problem that does not need to be worried has become a reality today.

At a certain moment, the sun hanging high in the sky suddenly disappeared.

However, the Taotie people soon discovered that it was not the sun that disappeared, but the planet they were based on, which had been 'moved' away from the Styx galaxy.

Because what they saw when they raised their heads was an extremely unfamiliar starry sky.

The most terrifying thing is that under this starry sky, the stars closest to their parent stars are at least dozens of light years away.

This discovery plunged all the Taotie people into despair.

The fragility of life was extremely cruelly displayed at this moment.

There are countless planets and stars in the universe, but there are only a handful of planets that can give birth to life and civilization.

Because life has very demanding demands on the environment.

The distance between the planet and the star must be just right so that the temperature on the planet's surface can be maintained in a narrow range suitable for the survival of life.

Although the Taotie people are an animal civilization, their individual bodies are very strong, and they are better able to adapt to harsh environments than humans.

But even so, after losing the sun, the temperature of the planet's surface dropped sharply, and their survival was also severely threatened.

The Taotie civilization has powerful aerospace technology and can conduct long-distance interstellar travel across galaxies. As long as it finds a habitable planet, interstellar immigration is not difficult.

However, the disaster came too unexpectedly.

Even for the Taotie civilization, interstellar immigration is a huge project that cannot be accomplished overnight.

Despite this, in the face of the huge crisis of civilization's collapse, the Taotie people still showed unprecedented mobility.

They activated all the space bases and squeezed out the space potential as much as possible, striving to stuff every gluttonous civilian into an interstellar spacecraft in preparation for escaping from the planet where they had thrived for countless years.

It is a pity that the initiator regards every gluttonous person on this planet as genetic material. How can they allow the 'material' to fly away on its own?

Boom boom boom...

Almost all space bases on the entire planet were bombarded by fierce artillery fire at the same time.

Amidst the extremely ferocious firepower, all aircraft capable of interstellar travel were fatally struck and instantly turned into a pile of scrap metal.

At this point, even the strongest Taotie people felt deep despair.

The encounter before them clearly told them that all this was not a natural disaster, but a man-made disaster. However, they were not even able to figure out who the enemy was.

To make matters worse, from the space base that was blown into ruins by artillery fire, monsters with faces even more ferocious and ugly than the gluttonous people crawled out.

These monsters laughed ferociously and rushed into the surviving gluttonous crowd, carrying out inhumane killings.

"They are demons!"

Finally, a Taotie warrior recognized the monster's true face and screamed in shock.

"This is all the Demon Queen's conspiracy!"

"What? Aren't the demons allies with us Taotie?"

"Obviously, the Demon Queen has broken her covenant with my god Karl!"

"My god Karl, have you seen all this?"

Countless gluttons knelt on the ground and began to pray to their gods, hoping that their gods could understand the devil queen's conspiracy and perform miracles to save them from danger.

However, they are destined to be disappointed.

How could the Taotie people imagine that everything they encountered was at the hands of the gods they believed in?

At the juncture when the fleet of the Taotie Civilization was ordered by their gods to expedition to heaven and the Milky Way, the God of Death, Karl, personally sent the Taotie Civilization into the abyss of despair in order to win over the Demon Queen Morgana.

"Karl, this old yinbi, I think he has a dark heart!"

Liang Bing murmured.

"The Taotie people are his vassal race, and they obeyed his orders, conquered all the major galaxies in the universe, and made great contributions to him. However, he was so cruel that he completely ruined such a loyal vassal race. I will be punished in the future. He should be careful, otherwise he might end up like the Taotie Man!"

However, Liang Bing was just talking nonsense. She said that Karl was evil-hearted, but she herself was even more ruthless. Karl just sent Bai Mingxing in front of her. She was the devil who really made the Taotie people fall into a desperate situation. Queen.

When Liang Bing came to the earth, he was still interested in traveling around the world, and even tried to abide by the order of human society. Although in the end he couldn't stand the restraint, he went crazy and killed people in anger.

But compared to the fate of the Taotie people now, Liang Bing could be said to be quite gentle to the people on Earth.

But it's not possible to say that it's because one is a Kamigawa body and the other is a beast body. In the Super Seminary Universe where appearance means justice, Taotie is naturally evil.

Even a five-hundred-year-old angel like Angel Zhixin would say that Carl, the God of Death, shouldn't be so handsome. Since he is so handsome, he shouldn't be evil.

It can only be said that Luther was shocked when he saw this. He can only be said to be an angel of the Beauty Association.

Bai Mingxing right now is simply hell on earth.

After losing the sun, the temperature on the surface of White Pluto continued to drop, and soon reached the critical point that the Taotie people could adapt to. Groups of Gluttonians were freezing to death in the extremely cold environment.

But this is just the beginning!

Demons crawled out of the dead Taotie corpses from time to time, killing people everywhere.

The total number of demons under Liang Bing exceeded one million, which was comparable to the number of angels. Otherwise, how could she fight against the angels?

If you say that Liang Bing did not fight but only escaped and was chased by angels, then the Holy Left Wing Alan would not have died in the battle when Holy Kesha was not there.

That was the death of a Holy Left Wing guard, and the battle between demons and angels also sank a continent of Frazer, which shows that the strength of demon civilization is still there.

When on Earth, Liang Bing was unable to let go because of various concerns and restrictions, so the resurrected demons were only a fraction of the demon army.

But this time, with the all-round help provided by the God of Death Carl, not only all kinds of genetic materials were openly supplied, but the other party even sent a whole star of Taotie to her as a carrier for the resurrection of demons. Liang Bing can finally have unlimited soldiers.

"Queen, I'm sorry, I betrayed your trust!"

The resurrected demon generals knelt in front of the demon queen and said with shame on their faces.

"It's not your fault, Queen, I was too careless!"

Lang Bing said lightly.

Chapter 287 Serious Pipixi

"However, this time with the help of Death God Karl, I will recall all the demons under my command. If I lose again, there will be no excuses!"

Liang Bing looked at them and said.

"yes!"

The demons responded solemnly.

"Fight to the death for the queen!"

...

Outskirts of the Milky Way.

Under the boundless starry sky, giant flaming swords criss-crossed and were killing everyone.

After a period of sailing, they finally arrived at the outskirts of the Milky Way and came into contact with the army of Angel Civilization. Then they learned that they had not entered the Milky Way. After getting permission from the Tiandao Civilization, Hua Ye immediately ordered an attack.

Now, Grandpa Hua has under his command not only the Taotie Civilization warships and the Triangle Civilization warships, but also a large number of Tianzha warships. The lineup is quite luxurious, otherwise he would not dare to invade the Milky Way.

But such a powerful lineup, in front of dozens of Heavenly Blades and Heavenly Base Series combat celestial bodies, had almost no power to fight back and fell directly into the situation of being massacred.

The battle celestial body summons the flame giant sword to attack ultra-long-distance targets. It is essentially a star-driven technology that uses star energy.

Angel civilization mainly develops personal force, and the attack methods of fighting celestial bodies are actually quite lacking.

But precisely because of this, the power of the attacks from the angelic civilization's combat celestial bodies is terrifying.

This is the so-called new trick that can be eaten all over the world!

No matter what level of battleship it is, it is like tofu in front of the flaming giant sword. It is cut in half effortlessly and explodes into a ball of fire in an instant.

However, this move does great damage to the star.

In the original plot, Ge Xiaolun once took charge of Tianren No. 7. With this move, he easily destroyed an entire main fleet of the Taotie civilization. However, after only a few attacks, it became unsustainable and the lifespan of the Chiwu star was greatly reduced. .

This method of attack is a bit like using an anti-aircraft gun to kill mosquitoes. It is really wasteful. The attack power of Tianren No. 7 is indeed very strong. Even the Taotie flagship, which has a light energy barrier and can easily resist nuclear bomb-level attacks, can easily destroy it.

But the price paid is too high.

You must know that the energy released by the Chiwu star, the sun, every second is a number of astronomical units.

The energy consumed by Tianren No. 7, which blasted a few Taotie warships, would have a huge impact on the sun, causing the sun's life to be drastically shortened. This was really outrageous.

Ultimately, it is because Tianren No. 7 is extremely inefficient in utilizing stellar energy.

The combat celestial bodies of the Sky Blade series belong to the command of Holy Kesha.

And Holy Kesha has almost no research on stellar drive technology.

If it were a space-based series of combat objects, the situation would definitely be much better.

Because Hexi once traveled to the Lieyang Star and initially mastered the star drive technology.

After the fall of Holy Kesha, Hexi received the order from Holy Kesha to test Yan, who was about to take over as the new generation king of angels.

At that time, He Xi had used the Flare Furnace technique to force Angel Yan to succeed in being promoted to the fourth generation of divine body when he was on the verge of death.

The Flare Oven is the star-driven technology derived from the Sun Star.

Therefore, when he was about to have a decisive battle with Hua Ye's forces, He Xi temporarily upgraded all the combat celestial bodies of the Sky Blade series to improve the efficiency of the Sky Blade series combat celestial bodies in utilizing stellar energy.

There are now dozens of combat celestial bodies engaged in battle at the same time, but the damage caused to the star by the extracted stellar energy is also limited to an acceptable range.

Under such a terrifying attack, Hua Ye's army was almost powerless to resist.

In fact, without God's intervention, even just one combat celestial body would be enough to kill all the Taotie warships present without leaving any trace behind.

The angelic civilization can stand at the pinnacle of the universe, and the order of justice has ruled the known universe for tens of thousands of years. It is invincible, not because of the beauty or eloquence of the angelic warriors, but because of the use of real force to conquer countless civilizations in the universe.

"You're not feeling well yet, Ruoning?"

Hua Ye and Ruoning are not passively beaten, they are calculating and invading the combat celestial body.

"Don't make any noise, He Xi, it's not like you don't know how powerful she is. The Heavenly Blade Combat Celestial Body is okay, but the Tian-Based Combat Celestial Body has completely changed its operating system and combat engine. I'm not familiar with it at all!"

Ruoning cursed.

The two of them were confident before, thinking that with the two fourth-generation divine bodies and the void engine, wouldn't it be easy to invade and control the combat celestial body?

As a result, He Xi was underestimated. He Xi actually changed all the combat engines of Tianren Combat Celestial Body. I don't know how she did it. She changed all the combat engines in such a short time, which made Ruoning originally want to The idea and plan of using the Sky Blade Combat Celestial to fight against the Sky-Based Combat Celestial and then slowly seizing control came to nothing.

"Let all the scumbags abandon their battleships. The combat celestial bodies lack the means to deal with gods and super soldiers. There is no need to worry about hitting them!"

Ruoning said.

Sumali hurriedly went to convey the order, and immediately, the scumbags all left the battleship and started playing guerrilla tactics.

I don't know why the combat celestial bodies don't have attack methods against gods and super soldiers. They are all used to shoot mosquitoes with cannons. As long as their attacks hit, even the third-generation divine bodies and invincible bodies will be destroyed. The problem is that they attack Missed.

The original plot can only be said to be the screenwriter's eating the book, and I don't know what happened after it became a reality.

Maybe they don't think that any gods and super soldiers can break through the interception of angels?

He Xi sat on the throne of the Tianji series of combat celestial bodies, looking very confident and domineering. Luther felt that this kind of He Xi was much more interesting than the original plot.

However, from her beautiful legs shaking from time to time, it can be seen that she is not as strategic as she seems.

After waiting for the meeting with the God King to no avail, Hua Ye came again. He Xi could only fight, and now she is really a battle that cannot be lost.

If she loses, the angels can only be completely merged into the Heavenly Dao.

"Are you still invading?"

He Xi owns the Tianren and Tianji combat series computing groups, so she is unparalleled in computing power. Even if Hua Ye and Ruoning don't know why the computing power has increased greatly, she can still handle it.

Now He Xi has to worry about whether the Death God Carl will intervene. If the big clock is down, He Xi can only resist for a while.

"Your Majesty, there is a new planet called White Pluto in the Milky Way."

Luther also received the report.

"Don't worry about it."

Luther said.

Chapter 288 Liang Bing turns against her

Hua Ye and Ruoning finally succeeded in invading and controlling a Sky Blade series combat celestial body before suffering heavy casualties!

The situation was reversed in an instant, and the controlled combat celestial body became a fortress for the Sky Scum to avoid attacks from other combat celestial bodies, and then they also used it to fight back.

"Damn it!"

He Xi couldn't help but swear.

The main reason was that she didn't expect Hua Ye and Ruoning to be able to do this.

"Abandon all the Sky Blade combat celestial bodies, destroy the combat engines of the Sky Blade combat celestial bodies, and don't leave any for them!"

He Xi gave the order very decisively.

"But, King He Xi, that's the Sky Blade..."

The old angel next to He Xi paused.

"Tomboy... If the Holy Queen Kesha was still alive, she would make such a decision. Let them execute it quickly. If you hesitate any longer, it will only make the situation worse!"

He Xi refuted the other party's words.

"Yes!"

The old angel didn't insist.

Hua Ye and Ruoning were planning to repeat the same trick and continue to seize other combat celestial bodies.

"We have successfully captured a Sky Blade combat celestial body. Next, we need to expand the results of the battle and invade separately, so that He Xi can be overwhelmed!"

Ruoning said with bright eyes.

"He Xi needs to command and deal with our invasion. She also needs to support the computing power of other angels. As long as we..."

Ruoning hadn't finished speaking when she saw the angels suddenly leave the Sky Blade series of combat celestial bodies.

The Sky Blade series of combat celestial bodies is not just Sky Blade No. 1 to the latest Sky Blade No. 7. Instead, there are multiple Sky Blade series combat celestial bodies with the same number.

It can even be said that the Sky Blade No. 1 series are all obsolete models.

So there are quite a few Sky Blade combat celestial bodies.

Before Ruoning and Hua Ye could react, they saw a combat celestial body suddenly break and explode!

"Not good!!!"

Ruoning's soul was scared.

"He Xi, that guy, actually let the Sky Blade combat celestial body self-destruct!"

Ruoning didn't expect He Xi to do such a cruel thing.

But this is definitely the most correct answer now!

Because only by doing so can they avoid being invaded by her and Hua Ye, and the battle engine algorithm used by the Tianji series of combat celestial bodies is different from that of the Tianren combat celestial bodies, so even if Ruoning wants to invade, it will take more time than the Tianren combat celestial bodies.

So much that the war may have been decided before they succeed in invading!

"What should I do?"

Hua Ye was also shocked by He Xi's decisiveness.

This is too cruel.

"He Xi, this old aunt, won't give me a single ship!"

Hua Ye was so heartbroken that he couldn't breathe. In his opinion, these were all his things, especially when he experienced a combat celestial body adding to his computing power, the pleasure of soaring strength made Hua Ye unable to stop.

He thought that if he could seize all the combat celestial bodies, then even facing the God King Luther, he would not be so cowardly.

"What else can I do? I can only rely on Karl's grandson."

Ruoning said.

She couldn't stop the combat celestial bodies from self-destructing.

Seeing the self-destruction of the Sky Blade series of combat celestial bodies, Ruoning was also very distressed, and his heart was bleeding.

But at this time, the Death God Carl contacted them.

"I already know the current situation, King Hua Ye, and Ms. Ruoning, next, I will let you get some computing power support from the Big Clock."

Death God Carl said.

He can't let the gap between the two sides' combat power be too big, because if that happens, when the Void Age comes, the Void creatures are likely to target him.

What Death God Carl wants is that the known universe will continue to fight, so that the top gods will attract the attention of the Void creatures.

Therefore, Ruoning and Hua Ye must be strengthened.

"The computing power support of the Big Clock? How much?"

Ruoning was moved, that was the Big Clock, the most advanced celestial supercomputer in the known universe, no one else!

Even the sacred knowledge treasury can't be compared with the Big Clock of the Death God Carl, and the Big Clock of the Death God Carl is still a big clock that has not obtained full authority!

So no one knows how powerful this thing is.

"Thirteen percent, this is the limit."

Death Karl said calmly.

"Twenty percent!"

Ruoning said with a big mouth.

"Impossible, you should know the computing power of the big clock, and it is very important to be accurate to three decimal places."

Death Karl shook his head.

"Then just give it fifteen percent."

Hua Ye interrupted.

"Okay."

Death Karl agreed readily.

Ruoning paused, then stared at Hua Ye. If he didn't interrupt, he would get more computing power support!

Hua Ye smiled awkwardly, but he didn't say anything. He felt that Death Karl was not a guy who would give up so easily.

"Get ready for the connection, Ms. Ruoning."

Death Karl urged Ruoning.

Ruoning had to connect to the program of the big clock, and then she experienced what it felt like to have the computing power added to the big clock.

At the same time, Death Karl also found Liang Bing.

"Liang Bing, it's time."

Death Karl said to Liang Bing.

"What?"

Liang Bing was busy transforming the Taotie Demon, and when she heard the words of the God of Death Karl, she almost didn't react.

"Join the war, I have prepared it for you, the big clock supports 30% computing power."

Death Karl said to Liang Bing.

"Oh, about that matter, I'm sorry, Karl, I quit."

Liang Bing hung up the phone after saying that.

Death Karl was stunned.

What does that mean?

Although it's not the first time that Liang Bing has betrayed him, isn't it a little too fast this time?

You just took my advantage, and then you turned over in the blink of an eye?

Death Karl couldn't contact Liang Bing.

He originally wanted Liang Bing to backstab the Heavenly Dao Civilization, but now he can backstab He Xi. When the time comes, the Heavenly Dregs and the Demons will attack together, and He Xi will definitely not be able to cope with it.

There are so many Taotie on the White Nether Star of the Taotie Civilization. Even if only one-tenth of them are transformed into demons, it is enough for Morgana to have millions of elite demons.

Fighting against the Angel Civilization is definitely not a problem, plus Hua Ye's army...

All the plans went smoothly, but they changed when it came to Liang Bing?

Liang Bing didn't change her mind on purpose. She still remembered that if she tricked Death Karl to come, she could get the Galaxy Power Void Engine.

Therefore, Liang Bing is now trying to trick the Death God Karl over here.

"Queen, will the Death God Karl really be tricked?"

Ge Xiaolun asked innocently.

"I don't know, but Hua Ye is very important to him, and He Xi is not a fool. When the situation is unclear, she will definitely ask the God King Luther to take action. At that time, Hua Ye will definitely die. In this case, Karl will definitely come over."

Chapter 289 He Xi enters the Heavenly Dao

"Karl still wants Hua Ye's Tianzha Corps, so he will definitely not watch the Tianzha suffer heavy casualties. If Hua Ye dies, he can be resurrected, but what if all the Tianzha die?"

Liang Bing said to Ge Xiaolun calmly.

"In other words, will the Death God Karl go out in person this time?"

Ge Xiaolun is very curious about this top god in the known universe, especially now that the Holy Kaisha has retired. It can be said that there are only two top gods left, the God King Luther and the Death God Karl.

It is not clear about the God King Luther. For some reason, the queen forbids him to contact the God King Luther.

"Maybe, who knows what Karl thinks, he may come, but he may not come."

Liang Bing drank red wine and said indifferently.

She has done her best, and it would be best if she can succeed.

...

Hua Ye and Ruoning got the computing power support of the big clock, and successfully invaded and seized control of other Tianren fighting celestial bodies before they self-destructed.

Then there was a fierce battle between the Tianzha and the angels.

The space-time barrier technology of the combat celestial bodies is very strong, but the problem is that when they face the attack of the same combat celestial bodies, this strength cannot be exerted, but becomes a disadvantage.

He Xi frowned, the advantage of the angels is gone, although it was destroyed in time, Hua Ye and his team only got five combat celestial bodies.

But Hua Ye used his black hole engine to strengthen the combat engine of the combat celestial body, and ignored the loss of energy of the surrounding stars and attacked frantically.

The space-based combat celestial bodies were all destroyed.

"King He Xi, what should we do?"

The angels are not afraid of death, but they can't see the hope of victory now.

Especially after the triangular bodies appeared around Tian Zha, it was a kind of crushing for them.

The special mental attack of the triangular body is too targeted to the angels.

Even if He Xi is the top scientific research god, he can't change what is happening now.

Although they are fighting back and forth because of the advantage in the number of combat celestial bodies, the casualties are still more than Tian Zha.

But Tian Zha is in large numbers.

The Taotie civilization and the Giant Wolf civilization, who didn't know that their homes were gone, as well as the Sky Scum and the newly joined Triangle Civilization.

There are also space mercenaries, aerospace-level civilizations that came after hearing the news, and so on.

With so many people, Hua Ye really doesn't care how many people die.

If it continues, the defeat is certain!

Looking at the still silent Milky Way and his dark plane communication.

He Xi sighed, she knew that she had no choice.

So she called Luther's dark communication again. When she called before, Luther didn't answer.

As a result, there was still no response this time.

He Xi was helpless. If the dark communication was not answered and no one came to see him, did I have to go to the Milky Way in person?

After thinking of this, He Xi went all out.

"I'm going to the Heavenly Dao, and Kayla, you take people to guard it. If you rely on the combat celestial body, you should be able to hold on until I come back."

He Xi said to the angel Kayla.

"Yes, King He Xi!"

Angel Kayla replied immediately.

She already knew what would happen next.

But the question now is, will the Heavenly Dao Civilization accept them?

If it were the previous angel civilization, they might be very confident that they would definitely accept them.

Unfortunately, the blows over the past few days, coupled with the casualties of their comrades, have made them lose confidence in this.

Their current situation is equivalent to bringing big trouble to the Heavenly Dao, isn't it?

And then with the remaining angels, how much help can the Heavenly Dao Civilization be?

"Your Highness He Xi, please come in."

Pan Zhen said to He Xi.

He Xi couldn't be transported directly to the earth through the wormhole, because the Milky Way was blocked and there was no way to accurately locate it, so he could only go there through Pan Zhen and his team.

"No, that woman He Xi went to the Milky Way!"

Ruo Ning received a report from a scumbag, saying that he saw a female angel with silver hair and silver armor going to the Milky Way where the Heavenly Dao Civilization is located!

Because of the war between the two sides, the combat celestial bodies of the Heavenly Dao Civilization have been monitoring them for a long time, and Hua Ye has no intention of provoking them.

Otherwise, they might be killed as soon as they meet.

"What? He Xi ran to Tiandao? How did she get there? Wasn't the battlefield already blocked?"

Hua Ye was also anxious.

"King Hua Ye..."

Tian Zha didn't know what to say.

"Okay, He Xi really wants to go there. Do you really think your blockade can trap her? Now the worst situation has happened, Carl!"

Ruoning quickly connected to Death Carl.

Death Carl is still constantly calling Liang Bing's dark communication, but Liang Bing has changed a dark communication channel. Before Death Carl cracks the new dark communication channel, it is impossible to contact Liang Bing.

After he learned that He Xi entered the Milky Way of Tiandao Civilization, Death Carl realized that Tiandao Civilization was planning to intervene.

Otherwise, they would not let He Xi in.

He Xi also knew this, so after entering, she relaxed.

"It seems that you are very sure that this king will help you?"

Luther finally appeared in front of He Xi again, and then Luther said to He Xi with a smile.

"I am not sure, Your Majesty, I am willing to lead the angel civilization to submit to you in the name of the King of Heavenly Base."

He Xi didn't hesitate at all, and didn't bring up the past between the two of them to talk about their friendship. That was unnecessary.

Between gods, only interests and values matter.

He Xi knew this very well. After all, Luther had subtly forced her to this point with the god of death Carl.

Otherwise, if there was a choice, He Xi would never do this.

She is one of the most difficult female angels to capture, and the other is Holy Kesha. Fortunately, Luther has no interest in Holy Kesha.

"Submit to me, you should know what happened after Lieyang surrendered to the Heavenly Dao."

Luther said leisurely.

"I know, so I also know very well what the angel civilization should do."

He Xi nodded.

She walked forward slowly and sat on Luther's lap.

"My king, can we send troops now?"

He Xi looked at Luther and asked gently.

"Not yet, what about keeping the oath?"

Luther said with a smile on his face.

"Angels don't need to keep the oath in the future, it will be the Heavenly Dao in the future."

He Xi said.

"Well, but I still want your oath of protection."

Luther refused to give in or relax no matter what he said.

He Xi had no intention of regretting it. Rather, after seeing Luther again, she, who was obsessed with looks, was directly attracted by Luther's divine charm.

She couldn't resist Luther's divine charm at all.

Chapter 290 Angels are no longer assigned

"Okay, I, He Xi, the King of Tianji, am willing to be Luther's guardian angel and love what he loves..."

He Xi swore to Luther very seriously.

Luther was listening very seriously.

After He Xi finished speaking, Luther nodded.

"So, can we save the angels now, Your Majesty the God King?"

He Xi asked.

"Yes."

Luther directly ordered Pan Zhen to lead the army to save the angel civilization.

Although Pan Zhen had expected such a thing to happen, it was still difficult for Pan Zhen to accept it after it really happened.

It's not that he couldn't accept such an order, but it was difficult to accept such a reality.

He actually wanted to save the angels with his own hands, and there was a blood feud between the Lieyang Civilization and the Angel Civilization.

The farewell of the Holy Kesha was inseparable from the Lieyang Civilization, even if Pan Zhen said that Reina was controlled by the devil at that time.

Everyone with a discerning eye knew what was going on.

If the Angel Civilization joined the Tiandao Civilization, wouldn't it be very awkward between them?

Unfortunately, Pan Zhen could not disobey orders, nor could he do anything.

If Pan Zhen really thought that the two deputy generals and adjutants were completely indifferent, then Pan Zhen would be a fool.

"This is the Heavenly Dao Civilization, this is the Heavenly Dao Civilization, everyone from the Angel Civilization, please be prepared, we will carry out rescue."

The angels who were anxiously waiting for He Xi's news were relieved after hearing the wide-area transmission of this dark communication.

It seems that there is a result.

But in this case, they will no longer be the Angel Civilization, but the Heavenly Dao Civilization.

"What? Luther is really going to intervene in this matter?"

After hearing the wide-area live broadcast, Hua Ye was mentally prepared, but still felt that it was too much.

It was obviously his thing, but now it was robbed by someone.

So, what is the difference between this king and Luther?

Is it because he is handsome?

This king is also handsome, and if you dislike this, it is nothing more than a matter of fine-tuning technology of the divine body. It is not that it cannot be discussed. Why sell the Angel Civilization?

Hua Ye was puzzled.

"Hurry up and let them retreat. The Heavenly Dao civilization is unfathomable. We can never be their opponents!"

Ruoning urged Hua Ye.

"Got it, President Su, you heard it, hurry up and let the little ones retreat!"

Hua Ye sat on his throne and ordered unhappily.

"Yes, King Hua Ye."

Su Mali knew that his king was very upset, so he did not neglect and quickly passed on the order.

The Heavenly Scum Army wanted to retreat, and the angels and the Heavenly Dao naturally disagreed.

They would not dislike such things as beating the drowning dog.

"Damn, they really took He Xi and the angels!"

Liang Bing swore.

She was also mentally prepared. After all, He Xi had been forced to this point, and there were only a few possibilities for struggle, which were calculated clearly.

But when this day really came, Liang Bing felt very uncomfortable.

In particular, He Xi entered the Supreme Heaven. Can she still go to the Supreme Heaven after that?

I'm afraid that she will have to face He Xi's pursuit next?

Angel Yan, the Angel King, is still in her hands. Even though she is already a dead Angel King in name only, she still has a certain status with the sacred knowledge treasury and arsenal, not to mention her importance.

It's hard to say that He Xi won't ask Luther to deal with her.

Of course, Liang Bing has other options, which is to compete with He Xi for favor and use Angel Yan as a bargaining chip to get Luther to stand on her side.

Even if Luther doesn't like the sacred knowledge treasury and arsenal, he won't despise it, right?

The problem is that Liang Bing feels that she can't do such a thing.

Luther said, you underestimate yourself too much.

After the Tianzha army left tens of thousands of corpses, they finally got rid of the pursuit of Tiandao.

Then, the fighting celestial bodies of the angel civilization were able to enter the Milky Way.

They felt an unprecedented sense of security.

The Milky Way used to be a rural place for them, but now it is safer than their Angel Nebula.

So this feeling made them very uneasy and at a loss.

They didn't know what they would face next, especially the old angels. They had experienced the tragedy of the ancient heavenly palace era, so they would reject male angels, and some were even extreme enough to reject any man.

What if the God King Luther was too licentious and wanted to occupy all of them?

The angels didn't want to be the playthings of others again. They just wanted a fair environment, and they were not afraid of sacrifice and fighting.

"King of Tianji!"

Seeing He Xi appear, the angels seemed to have found the backbone and quickly surrounded him.

"Don't call me King of Tianji in the future."

He Xi said to them calmly.

"Is the title of king not reserved?"

Angel Keira asked.

"There is only one king in the Tiandao civilization. From today on, there is only one king of the gods in the known universe. All gods and all divine courts are excluded."

He Xi said calmly.

"King of Tiandao, King of Gods..."

It was the first time that the angels heard such a domineering declaration. Although Holy Kesha had such a feeling before, Holy Kesha would not say it out.

Now that Luther had said this, the angels didn't know why, but they felt an unprecedented experience.

It is estimated that they will soon become converts.

"Then, His Majesty He Xi, what will happen to us in the future?"

Another old angel asked with concern.

The other angels also looked at He Xi. This was the issue they were most concerned about.

"Everything remains unchanged. Don't worry. His Majesty the God King doesn't like you."

He Xi teased them and stopped being calm.

This is a good thing. If Luther is the same as Hua Ye, it is not unacceptable. After all, Luther's divine charm is much stronger than Hua Ye.

But He Xi still hopes that Luther can respect the angels' own ideas.

So now is the best way.

"The God King allows you to freely find the heavenly soldiers and gods in the heavenly way as your male gods, and also allows you to remain independent. He will not interfere with your choice."

He Xi knew that many of the female angels present had actually been matched with male gods and super soldiers by the sacred knowledge treasure house, and then lived a happy life. If it were not for her call, these people would not return.

Of course, they want to be able to return to their lovers.

More young female angels breathed a sigh of relief. They were really worried that they would be forced to be assigned.

Then, they were arranged to the thirty-three heavens inside the Supreme Heaven.

The female angels saw the real Heavenly Dao civilization.

It was also the first time that He Xi saw the real Heavenly Dao civilization.
