

Kryptonian 291

Chapter 291 He Xi Void Engine

He Xi was shocked.

"I didn't expect that the time and space technology of Tiandao civilization has reached this level."

He Xi said with emotion.

Especially after she knew that Tiandao civilization had mass-produced void engines, she was even more shocked.

Now who doesn't know that the void engine is the most powerful technology and power in the known universe.

Mass-produced void engines?

What kind of god is this!

Even He Xi has a void engine ready.

The reason is simple. Angel Leng has one, so how could He Xi not have one?

Angel Leng didn't expect something like this to happen today.

The angel civilization is gone, and there will only be Tiandao in the future. What she didn't expect was that she would become a sister with the legendary Tianji King He Xi.

Such a thing is too dreamy, right?

Angel Leng didn't dare to dream that such a thing would happen.

And then it really happened.

The other female angels were very surprised to see that Angel Leng was not dead. They saw that Angel Leng had lost contact and thought that Angel Leng was dead.

Unexpectedly, in Tiandao, not only Angel Leng could be seen, but also other sisters.

Next, Tiandao was busy digesting the impact brought by Lieyang Civilization and Angel Civilization.

The operation of Tiandao life created by Luther's own empire dimension is naturally flawless, and they are life forms created by real souls.

However, with so many angels and people from Lieyang Civilization joining, there are many variables and data added.

Hexi did not participate in the settlement of the angels, and trusted Luther with all the work.

Of course, this is also because she is already Luther's guardian angel.

It took him a million words to pass away. When it was over, Hexi lay in Luther's arms.

"My king, Liang Bing has Angel Yan, and Angel Yan has the knowledge treasure house and arsenal of Holy Kesha. These two things, even I don't have the authority to get, if Liang Bing, the female devil, gets them, it will be troublesome..."

Hexi said to Luther.

She has completely fallen in love with Luther, and the only selfishness left is whether she can use Luther to rescue Angel Yan, and then let Angel Yan restore Angel Civilization by himself.

Anyway, since Angel Yan has his own sacred knowledge treasury and arsenal, plus the descendants of angels distributed in the Angel Nebula, it is only a matter of time to create another angel civilization.

It's just that Angel Yan may not understand why he has become a lone commander and a lonely man, right?

"It's just the sacred knowledge treasury. I don't even care about the big clock of the god of death Carl, let alone the sacred knowledge treasury?"

Luther said calmly.

"But what if Liang Bing gives the sacred knowledge treasury to the god of death Carl?"

He Xi asked, it's not impossible, Liang Bing and the god of death Carl are like-minded and in cahoots.

Especially now that the Tiandao civilization is powerful, Liang Bing can't want the demon civilization to surrender, and she won't surrender to others, so she will definitely go to find her lover, and if the sacred knowledge treasury and arsenal fall into the hands of the god of death Carl, it will be troublesome.

He Xi doesn't dare to bet whether the sacred knowledge treasury and arsenal can resist the invasion of the big clock.

This possibility can only be said to be possible before Luther appeared, but now it is impossible.

Liang Bing probably found a place to hide, and would rather let Angel Yan rot in her own pot than hand her over.

She knew very well what it meant to catch an Angel King.

It is no exaggeration to say that she has already grasped the future of Angel Civilization.

"Even if the Death God Carl gets the Holy Knowledge Treasure House, he can't be the opponent of this king."

Luther said.

He Xi frowned.

"Don't underestimate Carl. The Big Clock is a celestial-level supercomputer of Shenhe Civilization. It is the most advanced celestial supercomputer in the known universe. I don't know what it is like in the unknown universe, but no one has been able to surpass the Big Clock for so many years, and even the Holy Knowledge Treasure House is only close to it."

He Xi said to Luther seriously.

"Don't worry, this king knows the power of the Big Clock, but our Tiandao civilization is more powerful."

Luther said with a smile.

"What is the celestial supercomputer of Tiandao Civilization?"

He Xi asked curiously. Luther was so confident in Tiandao Civilization. Could it be that the celestial supercomputer of Tiandao Civilization is very powerful?

"You will know later."

Luther didn't say anything, so He Xi didn't force it.

She knew that even if she became a guardian angel, there were many things she shouldn't know.

Maybe she shouldn't know it for the time being, or maybe she shouldn't know it forever.

"So what should we do now?"

He Xi turned over and asked.

"Attack the enemy and save them."

Luther said.

"You mean, we should attack the Styx Nebula next?"

He Xi understood.

"The Death Song Academy is in the Styx Nebula. Unless the Death God Karl uses the big clock to move the Death Song Academy to other places, attacking the Styx Nebula is inevitable."

Luther admired the picturesque scenery of the mountains and rivers.

This snow-capped mountain is majestic and steep.

"What if Karl uses the big clock to move the Death Song Academy away?"

He Xi pressed the road and asked.

"If it is moved away, the Tianzha Legion can't escape. First destroy the Tianzha, then kill the Taotie and the giant wolf. At that time, he will have no soldiers to use, and he can target them however he wants."

Luther said.

He Xi thought about it and felt that this was probably the best way, but he still had to find a way to save Angel Yan.

In the following days, He Xi soon waited for his own void engine.

"10-frequency Galaxy Power Void Engine, standard anti-void capability, with additional phantom structure strike function?"

He Xi had already learned from others what the void engine she was about to install was and what capabilities it would have. At the same time, she was also very curious about how the Tiandao civilization solved the problem that the void engine would not cause great damage and radiation to the divine body and super soldiers when it was activated.

This is the key to the Tiandao civilization's ability to mass-produce void warriors, otherwise it can only be like the Styx Nebula, where all the void warriors are robots.

"In the unknown universe you mentioned, there are many spiritual enemies and phantom enemies."

Luther opened his mouth, anyway, no one here would expose him.

"Spirit and phantom? What is that? A life form with different forms?"

He Xi grasped the key.

"Well, the dark universe has also experienced physical wars, physical wars between the Heavenly Dao body, the Spiritual body, and the Phantom body."

Luther nodded.

"Could Carl's phantom body be from an unknown universe?"

After hearing Luther's words, He Xi made a bold guess.

"I don't know, if so, then he is not a problem."

Chapter 292 Carl in Resistance

The Tiandao civilization has a very high level of wisdom.

After He Xi knew that Luther had exceeded the 60% limit of brain development, he knew why Luther was not afraid of the big clock.

"Even a big clock can't calculate the form of intelligent civilization with a brain development rate of more than 60%."

He Xi said with emotion.

According to her research with Holy Kesha, this is certain. It is difficult for the main biological life form to exceed 60% brain development.

Of course, this setting is that of a super-god universe, so don't argue that brain development doesn't exist.

What He Xi meant by this was that Luther and his civilization had surpassed the calculation range of the big clock.

Karl, the god of death, probably doesn't know this yet, otherwise would he still have the idea of confrontation?

"We call it the degree of evolution of intelligence, not the degree of brain development."

Luther corrected He Xi's statement.

In terms of super brains, Luther is undoubtedly at the top of the world. Even Tony, a guy who is cursed by knowledge, cannot match Luther's super brain.

This is Superman's biggest plug-in, bar none. Although the biological force field is also very buggy, it is not on the same level as the super brain.

Many times, Superman only needs to use his super brain to think about it and solve the problem.

Luther estimates that his super brain is not as good as Da Chao, but it is still the highest level below the top level.

Isn't it very simple to have a life form that surpasses the calculations of the big clock?

"So, you've been lying to me this whole time."

He Xi said to Luther.

"It's not a lie, it's a temptation."

Luther said confidently that he knew what He Xi was talking about.

It was nothing more than his previous exchange of Ansu silver for skills.

"Yes, test, who would have thought that such a powerful God-King like you would come out to be a dealer? You are so hidden. To be honest, how sure were you of Kesha to deal with her at the beginning? Can you just let her do it?" Kesha is offline?"

Hexi was very curious about this question.

"It's impossible to go offline directly..."

Luther shook his head.

"That's right, Kesha is so powerful after all..."

He Xi nodded.

"It should be possible to delay her for a few seconds, and then I can finish her off completely."

Luther continued.

He Xi paused for a moment, then put his thigh directly on Luther's shoulders.

The thin pure white panties wrapped around her buttocks were stretched tight by her rich connotations.

She didn't expect that Luther could give her a turn.

"Is the difference that big?"

He Xi didn't think Luther was joking, so she asked solemnly.

"It's already very good. In the dark universe, no one can stand in front of me for a second. One second is hundreds of trillions of calculations. It's an astronomical level of computing power, and you will die if you are just one step away from it."

Luther said calmly.

He Xi nodded with emotion and shut up.

...

The words were divided, and Hua Ye was in dire straits.

The Heavenly Civilization was singing and dancing, and while Luther was enjoying it, Hua Ye and the others were dejected.

This time, they didn't get any good things. Instead, they forced the angel civilization to the side of the Tiandao civilization.

Ruoning cursed He Xi as a traitor!

Sell the interests of angel civilization to other civilizations, why not choose Hua Ye?

"Okay, stop scolding, everything has happened, what should we do next?"

Hua Ye asked Karl, the God of Death.

"Next, get ready for an all-out war."

Karl, the god of death, said calmly, this is inevitable.

Now they are the only people left in the known universe who can resist the Tiandao civilization.

As for saying that Tiandao civilization would not expand its power, no one present had ever thought of such a possibility.

"How to start a full-scale war? How to fight?"

Hua Ye said half-deadly.

"He Xi is so powerful, and he has joined the way of heaven. The way of heaven must be even more powerful. The treasure house of sacred knowledge and weapons arsenal may have fallen into the hands of that guy Luther. Now Luther is invincible in the universe. I think even Kai Sha's resurrection is no match for him."

Hua Ye complained endlessly.

He was complaining that Karl, the God of Death, would never let go. Otherwise, wouldn't He Xi be eliminated in minutes?

"Not necessarily. Even if He Xi joins Tiandao Civilization, she won't be trusted right away, so she won't be exposed to the core of Tiandao Civilization."

Karl, the God of Death, shook his head.

"Hexi doesn't have access to the sacred knowledge treasury and weapons arsenal either, so don't be nervous."

Ruoning also followed suit.

"These things are still in our hands, Anicid, we have mastered her. As long as Angel Yan dies, Anicid will be the inheritor of the sacred knowledge treasure house and weapons arsenal."

The Taotie Legion finally invaded Fraser, and naturally without any obstruction, successfully destroyed Fraser and took away Ainecid.

"Not only that, we also found a large amount of dark silver in Fraser. It is speculated that the angel civilization should have left it there. In other words, our people can all be armed with silver blades!"

Carl, the God of Death, continued.

"real?"

Hua Ye is very aware of the lethality of silver blades, and Sumali's silver blade is the most typical example.

If silver blades become rampant, the third generation of super warriors and the third generation of gods will be a matter of seconds.

"Next, let Tianzha learn how to carry wormholes, so that he won't be able to use the silver blade!"

Ruoning nodded and said.

"Okay, if it's a one-for-one exchange, my Heavenly Scum can definitely afford it!"

Hua Ye suddenly regained his confidence.

More importantly, the God of Death Carl has promised to back up their dark data, so even if they die, they can be resurrected.

So now they have to turn into troublemakers, constantly causing damage, and delaying the time for Luther and his men to attack.

Of course, Hua Ye will not personally go out for such things. Instead, he will start to develop male angel descendants and turn them into Heavenly Scum, and by the way, give birth to the Triangle Army.

The large number of Heavenly Scum Corps and the Triangle Army, as for the severely injured Taotie, were abandoned by the God of Death Carl.

The Giant Wolf Corps is similar, and they can only become genetic raw materials in the end.

The large amount of Dark Silver reserves left by the angels in Frazer are now made into pieces of silver blades, which are used by the Heavenly Scum to practice wormhole transportation.

At the same time, they also have to learn to avoid the opponent's silver blades, otherwise they will be exchanged.

Then, Hua Ye and Ruo Ning went to visit the leader of the Triangle!

The Triangle is a force they must win over, especially the leader of the Triangle, who is even more unfathomable.

If the Death God Carl did not have the big clock, he would not be able to calculate the location of the leader of the Triangle.

Now that the war is about to begin, they must get every bit of help.

As long as the powerful terror of Luther and Tiandao spreads, the Triangle will definitely choose to cooperate.

Chapter 293 Angel Yan is liberated

He Xi and the others were preparing for the battle nervously but without panic.

Luther was thinking about how he could destroy the God of Death, Karl, to be shocked?

The reason why Karl, the God of Death, was kept jumping around before was simply to let Karl, the God of Death, help drive the angel civilization to him.

Now that this is done, Carl, the god of death, seems to have no value.

So Luther was thinking about how to kill Karl, the God of Death.

While Luther was thinking about this very important question, Liang Bing came over secretly.

While Hexi and the others were studying and researching.

"Your Majesty!"

Liang Bing felt that Luther was more attractive, and she also brought a female devil over.

Shae!

Xue Yi did not show his demonic form. He looked just like he had just appeared, wearing a sword cloak and his long, straight black hair blowing in the wind.

"Shae has met the king."

Xue Yi said to Luther respectfully.

Luther glanced at Shae and didn't care.

Luther is not a greedy person for ordinary things.

"What are you doing here?"

Luther's tone towards Liang Bing has always been like this, and Liang Bing is used to it.

"Let me ask your Majesty, what should I do in the future?"

Liang Bing sat on Luther's lap calmly.

Not everyone can sit on the lap of the most powerful male god in the known universe.

Xue Yi was slightly surprised but not surprised when she saw this scene, but rather envious.

After all, she was deeply attracted by Luther's divine charm upon meeting him.

It would be great if she could get the favor of the God King, but Xue Yi was very keenly aware that Luther was not very interested in her.

So Xue Yi was helpless.

Liang Bing didn't know that she had been deeply attracted by Luther's divine charm. Although her mental power was strong, she couldn't resist this instinct. He Xi had directly attached herself to it, and now she knows the taste of the marrow. .

As for Liang Bing, the reason why she can still maintain her sanity is because she has researched in the area of charming auras, and is also tied to the demonic civilization, which prevents her from sinking like He Xi.

"If He Xi wants to pursue you, I will not stop him."

Luther said calmly.

Liang Bing was not surprised by Luther's ruthless answer.

"I thought your Majesty would be like this. Your Majesty, I brought Angel Yan here, please leave it to He Xi."

Liang Bing said preparedly.

"Did you hide her in the hidden plane?"

Luther said with some surprise.

People can be hidden in the dark plane, but Luther didn't expect Liang Bing to be so bold as to hide Angel Yan in his dark plane?

"How can I have the courage?"

Liang Bing shook her head. She was crazy to let a king of angels hide in her dark plane, even if there were various restrictions.

So this Angel Yan is hidden in Xue Yi's dark plane.

Xue Yi also simply released Angel Yan.

Angel Yan staggered and fell to the ground. Without energy, she was extremely weak.

But she didn't expect that she would have a chance to see the light of day again.

Just when Angel Yan raised his head, he saw God King Luther sitting across from him looking at him, and Liang Bing sitting on God King Luther's lap.

"It's so miserable, Angel Yan. It seems like every time I see you, you are in such a mess."

Luther teased.

Because of the butterfly effect caused by his appearance, Angel Yan can be said to be tortured.

It's much worse than the original plot, but at least the reputation has not been ruined. The original plot was saddled with nicknames such as King Tianrun and Prodigal Bitch.

King Tianrun didn't mean that she was moist, but that she ran fast.

There is also the issue of giving a dowry, which is just like Angel Zhixin, also known as a leaky and black-hearted little cotton-padded jacket, and a prodigal twin.

Now, there is only one dark spot for Angel Yan, which is that he was arrested by Demon Queen Morgana just after he took over the treasure house of sacred knowledge and weapons arsenal.

Forcing Tianji Wang Hexi to give up Angel Nebula and Fraser for her.

"Does the God King plan to obtain the treasure trove of sacred knowledge and weapons through me?"

Angel Yan forced herself to stand up. She was the king of angels and could not die on her knees.

"I'm overthinking it. I still don't care about the treasure house of sacred knowledge and weapons. Besides, you are no longer the King of Angels."

Luther said with a smile.

Angel Yan didn't know why. Could it be that something happened to Angel Nebula? For example, they gave up on themselves and chose Enisid to become the King of Angels in advance?

Or has He Xi, the retired King of Heavenly Base, announced that he is no longer the King of Angels?

No matter which one it is, Angel Yan can accept it.

I didn't think there was anything wrong with it.

"I'm leaving first."

Liang Bing knew that Luther was going to call He Xi over next, so he quickly got up and left.

Luther didn't stop him either.

Angel Yan watched Liang Bing and Xue Yi leave without knowing why. At this time, a figure appeared.

"Want a change of scenery?"

As soon as He Xi came out, he vented a lot of information, but then He Xi realized something was wrong and looked in the direction of Angel Yan.

Angel Yan recognized the Tianji King.

"King Tianji, why are you here?"

Angel Yan said in disbelief.

Especially what He Xi said to Luther just now was even more difficult for Angel Yan to understand.

No, Angel Yan can actually understand it, but she can't accept it.

"Because I'm Luther's guardian angel, so of course I'm here."

He Xi said calmly.

"Where is the angel civilization?"

Angel Yan questioned He Xi.

"There is no angel civilization anymore, Angel Yan, or in other words, Sheng Yan."

Hexi shook his head.

"There is no angel civilization anymore?"

Angel Yan looked at Luther tremblingly. If this was the case, then why had he persisted for so long, even wanting to die?

"The Angel Civilization was forced by Hua Ye and Ruoning and had to abandon the Angel Nebula and then join the Tiandao Civilization."

He Xi sighed, and while explaining, he passed a piece of dark data to Angel Yan.

In fact, Angel Yan can know what happened as long as she is connected to the Internet, but Angel Yan does not dare to connect to the Internet. She is afraid that the treasure house of sacred knowledge and weapons will be leaked due to her own reasons, and she is afraid that some backhand and secret door will be left behind in her body.

Now after accepting He Xi's dark data information, Angel Yan finished reading it in one second and knew what happened.

She seemed to have suddenly lost the strength to support her and almost collapsed to the ground. Fortunately, He Xi had been prepared to support her.

"It's not your fault, Angel Yan, it's just that the situation in the known universe is changing too fast."

He Xi knew that Angel Yan must be feeling very uncomfortable right now, so she could only say to Angel Yan.

Yes, the situation in the known universe is changing too fast. The man-in-law has only been offline for such a period of time, and it has already collapsed to such an extent that everything is turned upside down.

Chapter 294 Death God Carl Attacks

Who could have predicted that such big things and changes would happen?

Even the treasury of sacred knowledge cannot calculate this possibility.

Because this change is too sudden.

"Without angel civilization, what will I do in the future?"

Angel Yan asked He Xi confusedly.

He Xi didn't know the answer to this question. Angel Yan was different from them. It was impossible for her to integrate into the Tiandao civilization. After all, she was the new King of Angels.

Although he is also the most shameful King of Angels.

"You are different from us. You can also choose to rebuild the angel civilization."

He Xi said in front of Luther that she knew that Luther would not care about this and would really let Angel Yan create his own angel civilization.

"The Angel Nebula is gone, how can I rebuild the Angel Civilization?"

Angel Yan asked He Xi back.

"What do you mean?"

He Xi looked at Angel Yan.

"I don't know. I'm very confused right now. Let me think for a while, okay, Your Highness Hexi?"

Angel Yan sighed, and then said to He Xi.

"sure."

He Xi nodded and said nothing further.

"If you want to leave, you can leave at any time, and I will not stop you."

Luther then said to Angel Yan.

Angel Yan nodded.

"During this period, I want to chat with my sisters, so I won't bother Tiandao."

Angel Yan said.

He Xi was not surprised that Angel Yan would make such a choice and ask other angels for their opinions instead of acting arbitrarily. He could only say that Angel Yan didn't have his own ideas yet.

At this time, as long as she arranges for someone to say some hints to her, Angel Yan may join the Tiandao civilization.

But she didn't do that, let everything take its course.

Luther also didn't care about Angel Yan's departure or stay.

At this moment, Luther received an urgent message from Qilin.

"No, hubby, the god of death, Carl, invaded Blue Star and attacked Xin Zhao!"

Qilin's tone was very anxious.

Luther immediately disappeared and then appeared on the Blue Star, still beside Qilin.

A man wearing a crimson cloak and hood was fighting against the void energy of Qilin and Du Qiangwei.

"You are no match for me, stand down."

Death God Karl said to Qilin and Du Qiangwei.

He knew that both of them were equipped with void engines, but if he dared to take action, he was sure to deal with them, so the high-frequency void energy impact interfered with the running of Qilin and Du Qiangwei's programs.

Qilin and Du Qiangwei both screamed, they lost control of their genetic engines.

But Du Qiangwei didn't give up yet. The super space-time gene engine in her body combined with the Galaxy Power Void Engine began to rewrite the structure of this space.

The god of death, Karl, shook his head. Just when he was about to take action, he saw Luther appearing out of thin air. Then his expression changed slightly, and then he disappeared.

Luther clicked his tongue as he watched Karl, the God of Death, disappear. This guy actually sent a fake person over.

The real body is probably still over there in the Styx Nebula.

"husband!"

Qilin was very excited when she saw Luther appear. She didn't expect that just after she called, Luther would appear the next moment. This sense of security was simply addictive.

Du Qiangwei was also very excited, but she didn't call her husband like Qilin.

"Your Majesty, you are here!"

Du Qiangwei felt unparalleled peace of mind after seeing Karl, the God of Death, being scared away. Just now, she was so frightened that her whole body was trembling, but she still gritted her teeth to fight against Karl, the God of Death.

"How's the situation?"

Luther restored Qilin and Du Qiangwei's paralyzed void engine with a snap of his fingers.

"Karl, the god of death, hid in the dark plane of a soldier, and then suddenly attacked Xin Zhao. When we arrived, Xin Zhao had already fainted and fell to the ground. It seemed that he had succeeded."

Qilin said quickly.

Luther saw Xin Zhao lying on the ground with a face full of pain, and Angel Zhixin, who also fell to the side.

No one expected that a great god like Death Carl would suddenly launch an attack on Blue Star, not even Xin Zhao and Angel Zhixin.

Their thinking was fine, but they underestimated the acuity of Carl, the God of Death.

Especially Xin Zhao, with the help of Angel Zhixin, was able to dig out black technologies one by one, and Blue Star did not have the consciousness of being a kid to make money.

It's not that they don't have such awareness, but that in their perception, the power of the galaxy has become too widespread, and mass production is no longer valuable.

For its own development, Blue Star Civilization will definitely use the unlimited resources, unlimited automatic construction and other functions brought by the Void Controller.

However, the overflow of galactic power is for the Tiandao civilization, but not for the God of Death, Karl.

Not to mention a killer weapon like the Void Controller. This thing is the biggest plug-in programmed by Angel Zhixin with the help of Xin Zhao.

It's almost the same as the original plot, but the difference is that this thing is not called "heroic core", but is called "courage" by Xin Zhao.

The frequency and program functions of Courage are not much different from those of Xiongxin, but the Void Controller doesn't care about the frequency, it just needs to use the unlimited resources and the ability to build the Void.

The rapid changes in Blue Star were noticed by Karl, the God of Death.

It is true that the Tiandao civilization shields the Milky Way, but the God of Death, Karl, has many secret hands in the Chiwu star system, so this change was also discovered by the God of Death, Karl.

After discovering this through the backhand left behind, Death God Karl judged Xin Zhao's value.

Starting from the Tiandao Civilization, the God of Death, Karl, was not so bold yet, so he naturally set his target on Xin Zhao.

"Karl, the god of death, got the void controller?"

When Angel Zhixin woke up and found out about this, his expression changed.

The void controller is not a simple thing.

Now that the great evil god Karl, the god of death, is given, the known universe will be in trouble!

"It doesn't matter, it's just a void controller."

Luther said nonchalantly, Death God Karl realized the power of the Void Controller, and he did not expect to attack Xin Zhao, but even if he got the Void Controller, at most it would make Death God Karl struggle a little more.

It's a pity that he didn't know that his chances and struggles were things that Luther could easily crush.

In this case, why not let him die with such hope?

"Your Majesty the God King, please save Xin Zhao!"

Angel Zhixin told Luther that the void energy left by the God of Death Carl was too strong, and he also used special algorithm interference to redefine Xin Zhao's body and genetic engine. Angel Zhixin knew with just one glance that he could not solve these problems. .

"Blue Star is my king's vassal, and I will naturally handle it."

Luther said.

Blue Star was relieved to hear Luther's words.

Chapter 295 Angel Yan's Burden

He Xi originally wanted to thank Luther for rescuing Angel Yan, but he didn't expect that something like this happened next, which caught He Xi off guard.

"I didn't expect that guy Karl would target Xin Zhao."

Hexi was also unpredictable.

"This is not surprising, Blue Star's performance is so outstanding, and they don't know how to hide themselves."

Luther shook his head.

"Is Xin Zhao okay?"

Hexi asked.

"It's okay, but the void controller must have been obtained by the god of death, Karl. Fortunately, your little apprentice did not give the core code of the sacred knowledge treasure house to Xin Zhao, otherwise it would have been leaked."

Luther said with a smile.

"How could Zhi Xin give the core code of the sacred knowledge treasure house to Xin Zhao?"

Hexi rolled his eyes and said.

When Luther heard her say this, he immediately became happy.

It seems that you can't predict your little apprentice's future behavior.

"No, how do you know that Zhi Xin has the core code of the sacred knowledge treasure house?"

He Xi asked with a surprised look on her face. She was very sure that she had not told Luther about this matter, nor had she checked the data with Luther. There was no way, Luther was the God King, and there were many things that were destined to be impossible for her to do. Data docking.

Otherwise, if you switch to other super soldiers and male gods, you will have to conduct data connection, just like Xin Zhao and Angel Zhixin.

This is an important step for the guardian angel and your male god to understand each other and be on the same page.

"I know this. Is it strange?"

Luther said with a smile.

"...Of course it's strange."

Hexi was puzzled.

But judging from Luther's thoughts, he probably won't tell her.

Angel Zhixin quickly came to find his master.

"Master, I plan to give the core code of the sacred knowledge treasure house to Xin Zhao. Now that Xin Zhao lacks enough computing power, I plan to let Xin Zhao build one..."

He Xi was dumbfounded. He had just finished speaking, but the next moment, his little apprentice said such a thing to him directly?

"Why do you think so?"

He Xi couldn't understand that that was the core code of the sacred knowledge treasury. If it spread out, it would be a threat to the sacred knowledge treasury, because it is very likely that others could use this core code to crack the sacred knowledge treasury. must.

"Master, didn't you say that the power of the Galaxy is our future?"

Angel Zhixin asked back with a cute expression.

Hexi held his forehead.

She suddenly felt very tired.

Even in the future, not everything can be given!

"There is no future now, or in other words, the way of heaven is our future, because the way of heaven has the power of the Milky Way."

Hexi was serious about correcting his stupid apprentice's thoughts.

"What about Xin Zhao?"

Angel Zhixin continued to ask.

"Xin Zhao, he is no longer the future of the angels. He is your future. However, the core code of the sacred knowledge treasure house of the angel civilization is of great importance. If you really want to give it, you'd better ask Angel Yan for this new one. The opinion of the King of Angels."

He Xi thought for a while and felt that it was impossible for a man's apprentice to agree to give out such an important thing, right?

Angel Yan met his angel sisters who reunited after a long absence, and they were also surprised to see Angel Yan.

"Sister Yan!"

"Yan!"

"Sister Yan, are you okay?"

The angels surrounded Angel Yan excitedly.

"I'm fine, the devil let me go."

Angel Yan greeted each other with a smile, and then told the truth.

After all, that situation didn't look like Luther had used Devil No. 1 to rescue her.

It felt like Morgana threw her out just to avoid trouble.

"Hmph, you are such a disgrace. Queen Keisha shouldn't have chosen you to be the King of Angels!"

Such arrogant concern was naturally the result of Angel Leng's speech.

"Leng... you are right, I am not qualified to be this king."

After Angel Yan heard Angel Leng's words, her heart moved and she figured it out.

She is indeed not qualified to be the King of Angels, so she wants to find someone who is qualified to be the King of Angels and let her rebuild the angel civilization.

When the time comes, I will assist her in re-establishing an angel!

Angel Leng felt that Angel Yan was weird.

"What's wrong with you?"

Angel Leng asked with concern.

"It's nothing, I just figured out some things, some very important things. Next, I'm going to Fraser!"

Angel Yan smiled and said to Angel Leng.

Angel Leng was not used to this Angel Yan who didn't quarrel or argue with him.

"Fraser, that place has been captured by the Taotie, and Enisid is said to have fallen into the hands of Styx."

Angel Moi immediately said to Angel Yan.

"Fraser fell?"

Angel Yan was startled, the dark data information he got from He Xi didn't include this.

Could it be that King Tianji didn't give it to him on purpose?

"We knew about this before the war started. In the end, King Tianji decided to come to rescue you and gave up Fraser. As a result, you were not rescued. Then we didn't know that Fraser had fallen until we joined the Tiandao Civilization. Things, Sister Yan."

Angel chased and said.

Angel Yan suddenly felt like she was drawing her sword and looking around at a loss. She had just decided to let the person who was qualified to be the King of Angels become the King of Angels, and then she would fight for her no matter how tired, painful or difficult it was.

As a result, Enesid was captured by the Styx civilization?

Even if Enesid was rescued, she would probably lose the qualification to become the King of Angels. At that time, the Holy Knowledge Treasury would have to recalculate the right candidate, and it would take the energy and resources of countless stars to complete such a calculation.

"... Give up, Yan, we have all accepted our current life."

Angel Leng couldn't bear to see Angel Yan's overwhelmed look. She felt that this Angel Yan was not the Angel Yan she knew.

"Do you really not want the Angel Civilization?"

Angel Yan looked at them.

"Of course I still do, but the life in the Heavenly Dao Civilization is not bad."

"If Queen Kesha returns, I will still go back."

"The Heavenly Dao is very good, but I will also remember the Angel Civilization."

The angels chattered.

Angel Yan felt cold in her heart. Most female angels only missed the Angel Civilization when Queen Kesha was there, not the current Angel Civilization.

What's more, the Angel Nebula is gone, and they can't go back.

She didn't blame them. Maybe the Heavenly Dao Civilization is really good.

But she couldn't accept it, because she was the main god of civilization, and she shouldered the responsibility of Angel Civilization!

"Queen Kesha doesn't want to see such a future..."

Angel Yan was silent, she felt that she still had to go to the Styx Nebula to try to rescue Enesid.

However, the Tiandao civilization also wanted to send troops to the Styx Nebula, so Angel Yan would not leave for the time being.

Chapter 296 An unprecedented war between gods!

After waiting for so long, the Tiandao civilization finally sent troops to the Styx!

The Heavenly Civilization directly exploded, and millions of heavenly soldiers and generals stunned all civilizations in the known universe.

In this war, Luther chose to declare all civilizations, which was regarded as establishing the rule of the known universe in the future, allowing everyone to see the power of the heavenly civilization!

Millions of heavenly soldiers and generals immediately shocked the entire known universe.

This is especially true for those civilizations that have learned about the concepts of gods and super warriors through the propaganda of angel civilizations and super seminaries.

They were still figuring it out, but Tiandao Civilization turned out to be millions of third-generation super soldiers!

There are many newcomers to the Lieyang Civilization and Angel Civilization.

They all couldn't believe that they had become the third generation super soldier.

You know, they were originally in their own civilization and knew how difficult it was to upgrade to the third generation of super soldiers.

But now, they have suddenly become third-generation super soldiers who can live for thousands of years!

Angels may look down upon this longevity. Even second-generation angels have very long lifespans.

But it's different for Lieyang Civilization.

Moreover, this technology of driving and converting dark energy into kinetic energy is something they have not been able to do before.

Super soldiers don't have any dark energy driving technology. The Super Seminary has to teach Ge Xiaolun and others from scratch. In other words, there is no such technology in genetic instinct or genetic programming, and they have to learn it the day after tomorrow.

The super gene has its own dark energy drive technology, which is an ability that is only available to third-generation super warriors or gods.

In this regard, they can only lament that the power of the Heavenly Civilization is indeed beyond imagination, and they are more respectful and have a little more heartfelt admiration for God King Luther.

Knowing that the Tiandao civilization has achieved unlimited resources by mastering void technology, He Xi and others are not surprised by the millions of explosive soldiers.

But the outside world doesn't know that they will only shock the great divine power of the Heavenly Civilization and be able to control so many demigods!

The third generation super soldiers are demigods.

The mighty army shocked countless people, feeling that the Styx Nebula was definitely no match for the Tiandao civilization.

But the Styx Nebula brought out tens of thousands of third-generation gods!

There are about 20,000 Tianzhu, all of them have purple-black wings, wear special dark silver armor, and drive dark silver blades.

If the millions of third-generation super warriors of the Tiandao civilization shook the universe, then the more than 20,000 third-generation god Tianzhu brought out by the God of Death, Karl, would shake the universe.

Even when the Kamigawa Civilization was still around in the known universe, there were not so many gods!

If gods become too common, they will no longer be valuable, and they will no longer be gods. At that time, they will just be special fourth-generation super soldiers.

Now that the Styx Nebula is doing this, it is tantamount to a counterattack by Karl, the God of Death, against Luther!

"It seems that our cooperation has put a lot of pressure on Carl."

He Xi frowned and said to Luther.

The God of Death, Karl, has no intention of covering up the void technology at all. That's right, after all, his wife is gone, and no one prohibits him from studying the void.

In addition, Karl, the God of Death, obtained the Void Controller by attacking Xin Zhao.

In front of the big clock, it is not difficult for Karl, the god of death, to digest the void controller.

Indeed, for Karl, the God of Death, the Heavenly Civilization swallowed the angels and made peace with them, making him realize that the situation was out of control and that the forces in the known universe were out of balance.

Otherwise he wouldn't have gone to find the leader of the Triangle, nor would he have attacked Xin Zhao to obtain the Void Controller.

Now, Hua Ye has loaded the void controller!

This super seminary's largest plug-in in the universe, coupled with the high-frequency black hole engine, made Hua Ye's strength soar to the point where the God of Death, Karl, thought he could fight Luther.

However, Hua Ye was still greedy for life and afraid of death, and was very cowardly. He had no intention of confronting Luther head-on. He just used the unlimited resources of the Void Controller to pile up more than 20,000 third-generation godly scum!

Of course, just because he is cowardly does not mean that Ruoning will be cowardly. Ruoning is still very stubborn. She thinks that Hua Ye does not need to take action. If Luther does not take action, she can rely on more than 20,000 third-generation gods and scum. Deal with the army of heaven!

"Don't worry, Hua Ye and the others only have a few Heavenly Blade combat celestial bodies that they grabbed. Their computing power cannot support so many third-generation gods and scum, so they can only rely on themselves. If the computing power is not enough, their third-generation gods Gods are just stronger than ordinary super soldiers."

Luther said to He Xi.

Insufficient computing power is a big problem, especially in the world of the Super Seminary, where all the scum who have some brains have been killed by angels, so it is naturally impossible for them to have enough computing power of their own.

"What if Hua Ye holds the small clock?"

He Xi said worriedly.

"Hua Ye doesn't have that knowledge, and neither does Ruoning. Carl, the God of Death, has this knowledge, but if he gives it to Hua Ye, the situation will get out of control. Will Hua Ye still listen to Carl, the God of Death, when he has countless small clocks in his hand?"

Luther said with a smile.

Hua Ye could obviously be more powerful, but in order to control him, Karl, the god of death, would not let him become too powerful and beyond his control.

The Void Controller has reached its limit. The fifth-generation divine body that was supposed to be given to Hua Ye has not been seen yet. It is conceivable that Karl, the God of Death, felt that he could no longer control Hua Ye, so he did not give the fifth-generation divine body to Hua Ye. .

It's a pity that this time, Luther has decided to crush Hua Ye and the God of Death Karl with his magnificent Heavenly Dao.

So no matter how much they struggle, it will only make this ending scene more exciting.

He Xi nodded after hearing Luther's words.

It's not that she didn't think of this aspect, but she wanted to remind Luther implicitly, so that Luther wouldn't be careless and didn't think of this aspect.

"The number of gods is not large, but with millions of heavenly soldiers and generals, it is enough to compete with these tens of thousands of heavenly scum god bodies and millions of heavenly scum armies."

He Xi is not worried that they can't win. Their advantage is too great. The battle celestial bodies of the space-based series plus the battle celestial bodies of the Heavenly Dao civilization are enough to crush the opponent.

This war is nothing more than a protracted war.

If there are unlimited resources and unlimited energy, there will definitely be an unprecedented war!

"Outskirts of the Styx Nebula, they are coming!"

Ruo Ning also received a detection prompt for the battle celestial body.

What annoys Ruoning the most is that there are few scumbags with brains, and she needs to come in person to even control the combat celestial bodies.

It is too late to train talents during the war, and this cannot be trained anytime and anywhere.

Chapter 297 The Age of Void

Styx Nebula, in the nebula ring!

An ancient and unprecedented war is unfolding here, and energy levels unique to astronomical units are being launched to all parts of the universe for free.

The unlucky planets that hit it will be destroyed directly and disappear!

Each battleship has become the most vulnerable thing here, and can only be reduced to a bunker for both sides.

"For the sake of heaven!"

"The way of heaven is supreme!"

"Kill! For King Hua Ye!"

"For the Heavenly Palace!"

Not only the Kamigawa body, but also a large number of triangles mixed in it.

The God of Death, Karl, used the technique of "physical persuasion" to make the Triangle leader completely surrender. Then Mottled Blue and hundreds of other Triangle civilizations participated. The Triangle spawned a large number of marine creatures to participate in the war, plus those of the Triangle civilization. The real triangle, in this war, even the demigods suffered casualties!

However, the Tiandao civilization is generally dominant.

On the one hand, they have too many fighting celestial bodies, and on the other hand, there are also many powerful gods in the Tiandao civilization.

Di Leina bombed with a medium-sized solar flare in one hand, easily killing a large number of sky scum and triangles.

"Hahaha, I am God!"

Reina shouted excitedly as if she was liberating her nature.

A ray of silver light flashed across and hit Reina, but the dark silver blade stayed on Reina's armor.

"An Su silver blade?"

Reina didn't care at all and grabbed the blade that couldn't move any further.

The armor on her body is a super material rewritten by the Tiandao civilization using the definition of void technology!

The void technology of Tiandao civilization has developed to the technical branch of "advanced rewriting of matter". It no longer needs to rely on materials such as Ansu Silver like the backward Angel Civilization and Shenhe Civilization.

They can define and produce materials themselves.

This special super material is superior to Ansu Silver in both strength and hardness. The armor made with it is impossible for Ansu Silver to break through, and the weapons made with it, whether it is Ansu Silver armor or something else, They are all easily cut off in two pieces!

This super material was named "Krypton Gold" by Luther!

After knowing the existence of krypton gold, He Xi once again gained a new understanding of the foundation of Tiandao civilization.

"Several major branches of void technology, space definition, concept rewriting, material definition rewriting, and genetic structure attack, the Tiandao civilization has already reached an advanced level."

He Xi said with emotion, no wonder Luther thought they were backward and thought they were bumpkins.

With such unimaginable things like void technology, she now feels like a bumpkin.

Of course, the one who suffered the biggest blow was Angel Yan. After all, Angel Yan was now thinking that he was the main god of the angel civilization and shouldered the heavy responsibility of creating the angel civilization.

As a result, now we see a one-sided massacre. After the Tiandao civilization is equipped with krypton gold, Tianzha and the Triangle will at most cause them a few casualties.

Especially after seeing the war between the two warring parties, An Suyin does not need money, energy does not need money, and resources do not need money, Angel Yan has the feeling that times have changed even though I have only been offline for a while, not even a few years.

Under such circumstances, what was the point of clinging to her sacred treasure trove of knowledge and weapons?

Even if the Angel Civilization is rebuilt, will it probably become a subsidiary of the Heavenly Dao Civilization?

"Fuck, fuck, fuck!!!"

Liang Bing also widened his eyes.

"What is that thing? Why can't even An Suyin stop it?"

Liang Bing said in disbelief, what kind of technology is this?

"Queen, according to the test, it is a super material weapon called a krypton gold flying knife!"

"It is not equipped with any super engine, it simply relies on its own sharpness to destroy Ansu Silver!"

"In other words, it has performance and material superior to Ansu Silver!"

Atuo also said in surprise.

"Is it a super material from the dark universe? Similar to the dark silver in the known universe?"

Liang Bing boldly guessed that anyway, she could not have thought that it was created by the Tiandao civilization's own definition and rewriting of matter.

How is this possible?

"Damn it, a krypton gold weapon? I didn't expect Tiandao civilization to hide such a good thing!"

Ruoning punched the table hard. She thought she was equipped with dark silver armor and was infallible, but she almost died. If she hadn't had the fourth-generation divine body, she would have been killed like those scum divine bodies. Don't know what happened.

And not everyone has Ansu Silver Armor, even them, let alone those ordinary scum and triangles?

In fact, the scum on the front line has collapsed. The super weapon Ansu Silver Blade they have been practicing hard can't hurt the opponent at all. Ruoning and Wang Ruoning obviously said that as long as they master it, they will be invincible. The worst is to exchange one for one!

But now, his dark silver blade hit the opponent, and the opponent was unharmed. However, he was hit by the opponent's golden flying knives, flying swords, flying guns, and flying arrows, and then died.

This is not fair!

One of the opponent's heavenly soldiers and generals can kill a dozen or even dozens of their heavenly scum. How can we fight this?

Only by cooperating with the triangular body's mental electromagnetic wave attack can the opponent cause casualties, but it is also very difficult. Only the real triangular body can cause casualties. Ordinary triangular bodies cannot fight against the third generation super warriors. The third generation super warriors can already resist such intensity. Electromagnetic waves and mental attacks struck.

Tianzha's army quickly retreated, leaving behind devastation all over the ground.

If any corpse here is released, it is possible to create a god-level civilization.

However, the Tiandao civilization was too lazy to recycle these corpses, so they resurrected them directly.

The Tianzha army will definitely do the same thing. The advantage of unlimited resources is that resurrection becomes easy.

The Styx Nebula has been in business for many years and has a very tight defense line, which is similar to the 19th line of defense of the Angel Civilization.

Behind the first line of defense is a blocking zone formed by countless meteorite fragments. These meteorite fragments cover several light-years, seriously interfering with wormhole transportation and worm bridge transmission.

"Although the battle was won, Styx actually did not suffer any losses. Tianzha will still be resurrected. After the resurrection, Tianzha will be more experienced, and some of the krypton gold weapons are also missing. Karl might develop krypton gold weapons."

He Xi came to Luther to report the results of the battle.

"Krypton gold weapons are not that easy to study. When defining them, we used the void ability for encryption. Any analysis without a password will cause the krypton gold weapons to produce anti-dark matter energy radiation and fusion effects. About one gram of krypton gold It would release enough anti-dark matter energy to destroy a piece of land."

Luther said with a smile.

"Can you still do this?"

Hexi was shocked.

"In the age of the void, many things will subvert your understanding, just get used to it."

Luther said.

Chapter 298: Getting Skilled at Dying

The Age of Void has indeed subverted the perception of angels and the blazing sun.

The Tiandao civilization is a mature Void Age civilization. It is difficult to imagine how far the dark universe has developed before the Void Age civilization appears.

According to the definition and understanding of the Void Age by Tiandao Civilization, it is divided into "Elementary Void Age Civilization", "Intermediate Void Age Civilization", "Advanced Void Age Civilization", and finally "Super Void Age Civilization"!

Each corresponds to a void technology reaching a relative level.

And even a rudimentary void civilization can easily defeat a super-god era civilization.

"To give a simple example, the Taotie King Xihou, its void engine is the most basic void engine, but it has the function of an intermediate concept rewriter, so it can be regarded as an intermediate void civilization. Of course, this is only theoretically, in fact The void engine will not only have such simple functions."

Luther was giving lessons to Hexi and the others. After all, they were all his women, and it was normal to understand void technology.

"The Galaxy Power Void Engine that I gave you is a multi-functional void engine with many aspects such as matter, concept, space, genes, energy, etc. It can only be created by a primary void era civilization with all its efforts, but the probability Very few, and only one percent of intermediate void civilizations can produce powerful and comprehensive void engines."

He Xi nodded thoughtfully.

She had self-examined her void engine, and all she could say was that it was too powerful, but she neglected the comprehensiveness and superiority of so many functions.

"Space-time mass energy is the most basic functional and technical research direction of the Void Engine. As for genes, concepts, and the rules under study, it is the direction of the Void Engine's in-depth exploration, and it is also the key to becoming a super void civilization."

Luther has a clear understanding of the development of void technology. This stuff in the Super Seminary universe is creation particles, infinite gems and the like.

In the later period, Carl, the god of death, even showed that there is still time to modify and redefine space, leading to the outrageous operation of traveling back to the past.

"Rewrite it and define time, space, matter, and energy? Void technology is really scary."

He Xi felt that the void technology was incredible just by hearing it.

"Based on such void technology, the fifth-generation divine body can be imagined. Virtual-real conversion, using the void ability to define and rewrite the state of the divine body, and complete it

in an instant. The void engine shrunk to the size of an atom can also be defined and rewritten. energy....."

Luther looked at Qilin and Du Qiangwei. The two women listened with sullen expressions. They didn't need bad writing, they could remember it directly anyway, but to understand, they didn't know what year and month it was.

Don't talk about them, the angel Lenghun from the super-god civilization wanders the world. It is obvious at a glance that he is not a young man who studies. He is only suitable to be a gangster who only knows how to kill people with a blade... not a warrior.

"The fifth-generation divine body? Have you already thought about it?"

He Xi's eyes lit up. He Xi was the only one present who maintained great enthusiasm. Of course, if Luther let a certain demon queen in, she would definitely be fascinated by it. However, even if Luther was willing to let him in, Liang Bing didn't dare to come either.

"Not only do we have an idea, but we also have ideas. Next, Hexi, you will be responsible for researching the super space-time gene and the fifth-generation divine body technology. You don't need to direct the war. We have Pan Zhen, and this is a long-lasting war." war."

Luther nodded and said to He Xi.

"The super time and space gene...is the super gene studied by Liang Bing, right? I understand. It is necessary to study the time definition rewriting ability of the void ability based on the super time and space gene?"

Hexi is very smart and can draw inferences directly.

"That's pretty much it."

Luther said.

Reina was confused.

"Lao Lu, redefine what energy is?"

Rena, who was born in the Sun civilization, only cares about energy technology.

"To put it simply, it is the conversion and utilization of energy. Once you master this technology, you can directly rewrite the other party's energy source. For example, I can rewrite your energy needs into shit."

Luther snapped his fingers.

Reina suddenly felt extremely weak and desperately wanted to find dog shit to replenish energy.

But after all, she is not a mechanical void warrior, and her reaction speed is very fast, and she reacts directly.

"Light energy has lost its effect on me? Lao Lu, please change it back for me quickly!"

Reina immediately became excited. After she reacted, she tried to recharge herself, but her super gene engine rejected the light energy and detected it as an invalid energy source. She had to use shit to replenish energy!

This drove Lena almost crazy.

"It has been changed back."

Luther said lightly.

Xiaohanpi quickly checked herself and found that her energy was saturated. Nothing seemed to have happened just now. If her own dark data hadn't been recorded, she would have thought it was a dream.

"Is this the power of the void? It's terrible!"

Xiaohanpi, who experienced it firsthand, immediately realized the horror of the void. Although she had also experienced the power of the void destroying the Lieyang civilization, how could this situation be as shocking as it is now?

She is the goddess of the sun, so she has no power to fight back in the end, let alone others?

"This should be a function of concept rewriting, right?"

Hexi asked strangely.

"No, this is the function of defining energy. Of course, concept rewriting also has this part, but as I said before, concept rewriting and definition are more advanced functions. It can not only define energy, but also redefine the surrounding gravity. It even suppresses the target's energy-driven technology, suppresses the target's thinking, and subverts the conservation of energy."

Luther corrected He Xi. This misunderstanding was normal. Who asked Karl, the God of Death, to work out the concept definition and rewrite it first?

"Is that so?"

He Xi nodded to show that he understood.

It is true that He Xi is not needed to direct the war. Pan Zhen is still experienced in this aspect.

Although Pan Zhen's only record was the one fight with Sun Wukong, which also caused the Lieyang Civilization to lose a lot of super warriors and was severely damaged.

But that was a problem because the Lieyang civilization was not top-notch enough at that time.

Now Tiandao Civilization can be said to be the super top match among the top matches. If Pan Zhen can't win in this way, then he can commit suicide and apologize.

"God Pan Zhentian, Tianzha is becoming more and more skillful in resisting the attacks!"

A heavenly general said to Pan Zhen.

"They died and came back to life. They came down so many times that even a pig would be very skillful with us."

Pan Zhen said calmly.

With the power of Tiandao civilization, it can be said that Tianzha and the Triangle can only rely on human lives to resist the advancement of Tiandao civilization.

Chapter 299 The Ultimate Weapon: Heavenly Punishment!

Penalty on the second day!

The number of times a scumbag dies depends entirely on the speed of his resurrection, but so far, every scumbag has basically died hundreds of times.

There is also the case where Death God Carl did not understand the technology of the Void Age, rashly researched krypton gold, and then blew up the Death Song Academy.

Of course, this kind of thing is nothing. Carl, the God of Death, has nothing to do with it. It's just that Snow and the Four Knights of the Void have to go back to the drawing board and rebuild.

Later, a Death Song Academy that was a hundred times larger was even rebuilt.

Anyway, unlimited resources are just arbitrary!

As for the Tiandao civilization, we also have to thank the Styx civilization.

"Thank you for giving us the opportunity to train our troops. After this battle, we will have millions more brave and capable warriors in Heaven."

Pan Zhen said calmly.

Pan Zhen couldn't even see the possibility of them losing. The advantage of Tiandao Civilization was too great.

It is said that the rear is increasing their horsepower and producing combat celestial bodies at a rate of one per day.

It is actually not easy to mass-produce combat celestial bodies with unlimited resources and energy, but who has a void controller that allows them to directly construct materials in the void without the need for manual construction and precision instruments for assembly and assembly.

Just like a 3D printed model, the combat celestial body can be printed directly!

However, this method was quickly learned by the God of Death, Karl. There was no shortage of ideas and data for combating celestial bodies in the big clock.

And he got the Void Controller.

A god of scientific research who is modest in learning is very scary, especially since he is very concerned about the battlefield and will not miss any detail.

This means that whatever new gadgets Tiandao Civilization comes up with will be quickly noticed by the God of Death, Karl, and methods to target them will be studied.

After the Tiandao civilization captured the first line of defense, they found that what was waiting for them was no longer Tianzha's flesh and blood defense line, but the Styx fighting celestial bodies lined up in a row!

"Can the Styx civilization also produce combat celestial bodies?"

Pan Zhen was deeply shocked. He had actually thought of threatening and intimidating the God of Death, Karl.

He couldn't help but think of Shekhar's kindness for not killing him.

Liang Bing was also stunned.

"Atuo, Xiao Lun, let's quickly find a remote place to hide."

Liang Bing said that this cosmic demon civilization is no longer playing. They closed the door and lived their own lives, and they no longer had any ideas about the demon queen dominating the universe.

This is simply impossible!

Give the devil a million years, and I don't know if it can reach even one ten thousandth of what it is today!

"Queen, where are we going?"

Liang Bing was stunned by Atuo's simple question.

Yeah, where can they hide?

Looking at the postures of Carl and Luther, no matter who wins, there is a high probability that they will rule the universe. With the power they have shown, is there really a place in the known universe that they cannot rule or find?

Liang Bing felt that he was in a dilemma. If he had known better, he would have taken the devil and joined the Tiandao civilization.

Otherwise, I wouldn't be like a stray dog now, not knowing where to go.

Liang Bing felt aggrieved because she was the one who came first.

Whether He Xi or Angel Leng, they were all much slower than me.

As a result, now she is like a mistress who was caught.

Pan Zhen looked at the fighting celestial bodies of Tianzha lined up.

"The king is sure to hit the target!"

Pan Zhen has received orders from Luther, and Tianzha may come up with combat celestial bodies.

At that time, it will become a fort battle relying on combat celestial bodies.

However, Luther no longer wants to play with Karl, the god of death. The final value is gone. Angel Yan has fallen into doubt about life and self-doubt after seeing the battle between the two sides. It is estimated that it will not be long before joining Tiandao is a certainty. .

So Luther gave Pan Zhen a big killer weapon!

"Start the Heavenly Punishment System, identification code: I will ask you to seal the beer bottle at Hoover Hall..."

Pan Zhen spoke hundreds of millions of Chinese characters in one breath and activated "Heavenly Punishment"!

Suddenly, Pan Zhen felt that there was an operating system in his dark plane.

The operating system of heavenly punishment!

Originally, Luther planned to call it the Burning Heavenly Weapon as a joke, but after thinking about it, it seems that Heavenly Punishment is more appropriate.

"The Heavenly Punishment Strike is activated, locking the target..."

It was also the first time for Pan Zhen to use the Heavenly Punishment Strike. He had no idea what kind of strike it was, but it was probably an unimaginable attack that could directly destroy a combat celestial body with a space-time barrier, right?

Then he saw that the Styx battle celestial bodies lined up in front seemed to be compressed by something.

The universe is composed of three dimensions: length, width, and height. The strike of heaven, that is, the void redefines space. The moment it comes into contact with the three-dimensional universe, it will cause one dimension in the three-dimensional universe to shrink infinitely, thereby causing all matter in the three-dimensional space to shrink. , melting into a two-dimensional universe.

Since then, irreversibility has gradually led to the compression of high-latitude space to low-latitude space, that is, a dimensionality reduction strike. The universe space and time described by superstring theory is composed of ten dimensions and a single time axis. The existence of dimensionality reduction strikes directly affects different dimensions. life trajectory.

By curling and compressing a single dimension in the original three-dimensional space, the space will be gradually swallowed up and dismantled. Most parts of the original three-dimensional space will no longer exist and become two-dimensional.

This destructive principle is also similar to that of black holes.

According to the modern general theory of relativity, a black hole is a celestial body that exists in the universe with extremely high density and very low density.

Black holes are formed by gravitational collapse of stars with sufficient mass after the fuel of nuclear fusion reaction is exhausted and they die. The gravitational force of black holes is so strong that even light cannot escape.

"What is that?"

Pan Zhen has never seen such a terrible weapon.

"The ultimate weapon created by the advanced space definition and super concept rewriter - two-dimensional foil, a kind of heavenly punishment strike, has nothing in it, it is just a piece of space, the same as the space around us that is nothing and has nothing, the only difference is: it is two-dimensional, it is not a piece, but a piece, a piece without thickness."

Luther's words sounded, but gave Pan Zhen an unprecedented sense of fear.

The four-dimensional space fell into the three-dimensional space, like a waterfall flowing down a cliff.

"Just like the four-dimensional space fell into the three-dimensional space, the three-dimensional space will also fall into the two-dimensional space, and one dimension will curl up into the microcosm. The area of that small piece of two-dimensional space - it only has area - will expand rapidly, which in turn triggers a larger-scale fall. The slag of the sky is now in a space that is falling

into two dimensions. In the end, they will fall into two dimensions, that is, they will become a painting with zero thickness."

Luther continued.

Everyone lost their voices, staring blankly at the gorgeous plane that appeared in space.

It was indeed a painting, with every scum and fighting celestial body clearly visible, expressed with atomic-level painting skills!

Chapter 300 Dimensionality reduction strike suppresses the black hole engine

"Space Definition Technology."

Death God Karl said after watching the battle that made Hua Ye and Ruoning tremble.

"What should we do, Karl, what kind of attack is this? Can it be analyzed? Can we own it?"

Hua Ye quickly asked the God of Death, Karl.

He was really frightened. He originally thought that the most terrifying thing was his own black hole, swallowing everything.

But this move of Tiandao Civilization is completely beyond imagination. Hua Ye never thought that there would be such a terrible attack. His men and the fighting celestial bodies have turned into a painting, and now that painting is still in space. Floating in it.

The scum above the painting are all moving, but they can't return to their original state.

"Being able to analyze, this is just void technology, the ability to re-modify and define space."

Death God Karl said calmly that he did not expect that the Tiandao civilization would have such an attack method.

But I have to say that this really gave Karl, the God of Death, new ideas and thoughts.

As for restoring the sealed sky slag and combat celestial bodies to their original state, it is not difficult, just redefine the space.

The problem is that the big clock detects that this painting is also encrypted with a void code. Without cracking this code, it is impossible for this painting to redefine space.

The void technology displayed by the Tiandao civilization has made the Death God Karl realize that they are a mature void era civilization, which is different from the void technology era that has just begun in the known universe.

As for the God of Death, Karl himself, it is true that he has been studying the void for many years. The problem is that Holy Kesha suppressed him and did not allow him to conduct stellar black hole experiments.

Death God Karl has no choice about this. He has tried it himself, but the effect is not very good, so he can only achieve his goal through the star drive technology of the Blazing Sun Civilization.

The problem is that without stellar power to blow up a black hole, you can't get void matter.

The raw materials are limited, and even if the void technology of Death God Karl is no less than that of the Tiandao civilization, he will not be able to exert it.

It's okay for Karl, the God of Death in this universe. When Luther ignored Holy Kesha and blew up the black hole, he took the opportunity to obtain a large amount of void matter. However, the void matter was used to upgrade and build the black hole engine, which also allowed Ruoning to load a Void Engine is already pretty good.

After all, Luther took away the big head and looked down upon these void qualities.

The real rise of Death God Carl is the Peacock Black Hole in the Peacock Galaxy. The mass of that black hole is far greater than that of ordinary black holes, and the amount of compressed super matter is also very large. Although the original plot only obtained five void particles, the void matter obtained made the Death God Carl built a bunch of void gear.

Therefore, the god of death, Carl, can only use the big clock to calculate star drive technology while thinking about the light of the sun.

"Then can you change them back? What I mean is, can you prevent this kind of thing from having an effect on me?"

Hua Ye immediately asked with concern, and Ruoning also pricked up her ears.

She was the frontline commander. If she hadn't run fast, she would have died.

"No, it's not cost-effective. It would be more appropriate to resurrect directly, and there is no way to prevent King Hua Ye, unless I write a protection program for you now to prevent void rewriting, but there is not enough time."

Death God Carl shook his head and said.

Anti-void rewriting is undoubtedly a very powerful void ability, but it also takes time to complete.

"What about my black hole?"

Hua Ye still has confidence in black holes.

"No, black holes are also within the rewriting range of this void ability. This is an advanced space rewriting ability. Even black holes cannot resist it. Faced with such an attack, only by escaping at the speed of light can you avoid your own space structure being rewritten. "

Karl, the god of death, quickly discovered the shortcomings of dimensionality reduction strikes.

The speed of light can escape the impact of dimensionality reduction, but black holes cannot escape even the speed of light, but this thing is to restrain black holes.

"So, Tiandao civilization has found a way to restrain my king's black hole engine?"

Hua Ye heard this and said with his eyes widened.

You know, his biggest reliance is that his own black hole engine can't solve it. Even he himself can't control the black hole he created. He can only accelerate the formation of the black hole.

Hua Ye even thought about setting up a black hole defense line if the Styx Nebula's defenses were breached. He didn't believe that the Tiandao civilization could come over.

However, now, Tiandao Civilization said that they can really come.

Dimensionality reduction attack!

With the advanced space definition rewriting ability, even black holes cannot escape this dimensionality reduction blow, which means that the black holes he releases in the future are unlikely to have any impact on the Tiandao civilization.

"If this is the case, it can explain why the Tiandao civilization has become the overlord in the unknown universe. They have the technology of dimensionality reduction and strike. When they encounter stars and black holes, they can directly make them disappear and clear a channel that is beneficial to them. Even if Wormhole transport technology is useless in the unknown universe and will not affect their development. "

Carl, the God of Death, clicked his tongue.

"I don't care how they live in the edge space. I just want to know that if the black hole engine loses its deterrent effect, how can we still fight against the Tiandao civilization?"

Hua Ye impatiently interrupted the emotion of Death God Karl, and then said to Death God Karl hysterically.

"That's right."

Ruoning also said that she didn't want to die in vain. She could accept death in battle, but there was no need to die in this meaningless way. She might as well surrender.

"The black hole engine won't work, but what about the space engine?"

Death Karl said.

"What do you mean?"

Hua Ye was stunned for a moment. You have a more powerful void engine hidden?

"The strength of the void engine is related to the powerful and special void ability in addition to the frequency. Your black hole engine is just a special black hole algorithm."

Death Karl said lightly. He studied the black hole engine just to produce a large number of black holes, and then obtain a large amount of void matter and void particles by bombing black holes with stars.

Therefore, the black hole engine is essentially a production type of void engine, not a combat type of void engine.

For Death Karl, now it is nothing more than changing the type of black hole engine.

Just add the void function.

"Then can this king also use this dimensionality reduction attack?"

Hua Ye's eyes lit up immediately.

He didn't quite understand Death Karl's explanation, but he understood part of it.

"It's not difficult, but large-scale space structure rewriting cannot be done for the time being."

Death Karl nodded, and he was too lazy to explain to Hua Ye the difference between space definition rewriting and space structure rewriting.

Rewriting the spatial position definition and rewriting the spatial structure are both void abilities that belong to the large-scale and large-direction space rewriting.
