

Kryptonian 301

Chapter 301 It's the 300th chapter, please give me rewards and votes!!!

"It doesn't matter, it can be done on a small scale!"

Hua Ye quickly said that the black hole engine was no longer good immediately after the dimensionality reduction attack.

This space engine that Death God Carl mentioned is a high-end product as soon as you hear it!

On Pan Zhen's side, after being shocked by the technical weapon of dimensionality reduction strike, the confidence of the entire army doubled.

"Dimensionality reduction strike, with such a powerful weapon, we are not afraid of the Styx Nebula at all. We will win this battle, General!"

Next to Pan Zhen, a god from the Lieyang Civilization said excitedly.

"Don't be careless. Dimensionality reduction strikes are just a backup method. The main purpose of this battle is to train troops."

Although Pan Zhen thought so too, he didn't show it.

Dimensionality reduction strikes are very useful, but Pan Zhen doesn't plan to use them more. Wouldn't that make them appear incompetent?

This dimensionality reduction strike is more convenient than antimatter bombs and flare attacks. The celestial bodies and resources that have been dimensionally reduced can actually be restored and utilized to avoid wasting resources.

And the morale on Tianzha's side was inexplicably low.

Even if you can resurrect indefinitely, if people don't fight you and just throw dimensionality reduction blows, they won't be able to bear it.

Who can just accept that their dimensionality has been reduced?

That feeling, according to Tianzha after the resurrection, is that they don't know anything, and they have lost that part of the dark data forever.

No matter how magical the dark plane is, it is impossible to display the dark information in the two-dimensional space in the dark plane in the three-dimensional space. If they want to understand the world in the book, they can only go to the book themselves. Otherwise, they can see There are only words and patterns.

"General, will Death Karl use void technology to attack us?"

Then Lieyang God asked worriedly.

After all, they have seen the horror of void technology strikes. The Lieyang Gods are not worried that they will die. They will be resurrected in seconds anyway. What they are worried about is that the Styx Nebula's void technology strikes will make it impossible for them to advance.

"Don't worry, my god has already speculated that the Death God Karl only has void materials of about 100 to 150 frequencies. Without special abilities, the void engine frequency differs by more than ten or twenty. There will be no special overpowering advantage."

Pan Zhen shook his head and said.

If you want to launch void strikes or void abilities, you must have void materials. The problem is that Carl, the god of death, does not have this material, unless he is willing to dismantle all his void equipment.

But in that case, the God of Death, Karl, would have no means of his own and could only rely on Hua Ye.

With the caution of the God of Death, Karl, how could he do this?

What if Hua Ye runs away?

Of course, Luther might do the same if he pressed too hard.

However, it seems that they found that the Tiandao civilization did not continue to use dimensionality reduction strikes, and the morale of the Tianzhu people finally did not drop to the bottom.

It's just that their thinking has changed, and the fight is more like a coping style.

Otherwise, what do you want them to do?

Material science has been completely crushed. People are holding krypton gold weapons and krypton gold armors. They can't hurt the other party. The weapons are broken by the other party. Even if they are brave and brave, they don't know if they can scratch them. One gram of krypton gold.

In this case, just hold them back and use the disgusting tactics of torture and kiting!

Pan Zhen didn't care that the scumbags had changed their tactics. It would be better to say that such tactics were more conducive to their training of warriors.

As for why the Tiandao civilization, the overlord of the unknown universe, needs to train troops, it is simple. Luther does not need to say it. Pan Zhen and the others spontaneously understand that these warriors are new generation warriors, just like angels are divided into old angels and new angels.

In addition, there is a real and powerful Tiandao civilization here. Isn't it normal to think like this?

However, even if Tianzha tried his best and even delayed desperately, in the face of this qualitative gap, they only blocked it for a month, and then the army of Tiandao civilization broke through the third line of defense and entered the Styx Nebula. inside!

This place used to be the home of the Taotie civilization, but now that the entire Bai Mingxing is gone, the Taotie civilization is left with only sporadic bases on other planets. Facing the roaring army of heaven, they will naturally be crushed to death. .

"Now that we have penetrated deep into the hinterland of the Styx Civilization, we must be careful next."

Pan Zhen conveyed the order.

Suddenly, the battle celestial body of a Tiandao civilization suddenly changed.

The surrounding space compressed instantly, and finally, in just one minute, this combat celestial body turned into a painting!

"Dimensionality reduction strike???"

After Pan Zhen saw this scene, he immediately lost his composure.

"Hahahaha! This king is back again!"

Hua Ye's arrogant and domineering voice appeared in the secret communication channel of the Tiandao army.

Then Pan Zhen and the others saw Hua Ye's figure.

I saw two purple-black energy balls in Hua Ye's hand. After throwing them out, they appeared directly next to the two combat celestial bodies through the wormhole. The speed was so fast that the two combat celestial bodies could not react and were touched. In an instant, it is compressed into a painting!

"It's really a dimensionality reduction blow!"

Pan Zhen looked ugly. Did Death Song Academy actually have a dimensionality reduction attack? Or was it an ability they had only recently mastered?

"General, what should I do?"

Lieyang God said anxiously, they are very aware of the terrifying impact of dimensionality reduction.

"It doesn't matter, it's just a dimensionality reduction attack."

Pan Zhen quickly regained his composure, and then he activated another strike function of the Heavenly Punishment System.

"Regional time rewind!"

Hua Ye was preparing to use a dimensionality reduction strike to shock the Heavenly Dao army, so his targets were all combat celestial bodies.

But at this time, Hua Ye found that the combat celestial body that he had turned into a painting was suddenly covered with a layer of light. This layer of colorful light was like rewinding, restoring the combat celestial body that had turned into a painting little by little.

Hua Ye was stunned.

"No, what is this, Carl!!!"

Hua Ye exploded. After his space engine was completed, his confidence doubled, and he felt that he was invincible again. As a result, the reality was that he had been arrogant for less than a few minutes, and the dimensionality reduction strike lost its deterrent significance.

"... Advanced time definition rewriting technology."

Carl gave the answer quickly.

But just knowing the answer is useless. Carl has a headache. The endless void technology of the Heavenly Dao civilization makes the Death God Carl feel powerless.

The space engine with the dimensionality reduction strike function that had just been urgently analyzed and completed lost its meaning in the blink of an eye in front of this time ability.

"Can you make a time engine?"

Hua Ye quickly drew inferences from his experience and asked.

"No, time technology is Liang Bing's area of expertise."

Death Karl was silent for a long time before speaking.

Chapter 302: Destroying the Scum in One Go

"This is going back in time???"

He Xi stared at what happened on the battlefield with wide eyes.

"Well, advanced time rewriting ability can achieve regional time acceleration, time reversal, time stasis, time confinement, etc. Theoretically speaking, the power of time is very strong, and the effects of distorting time are also very powerful. of."

Luther said with a smile.

He has made great use of void technology. Before, he was limited by his strength. Even if he knew about void technology, he couldn't develop it as he wanted.

Now, Luther has discovered all the development routes and possibilities of void technology in his own empire dimension.

The universe embodied in the Super Seminary is the invincible power of the void.

Even if Karl, the God of Death, has studied the power of the void for so many years, there is no way he can compete with him.

Just with the ability to rewrite advanced time, the God of Death, Carl, will never be able to analyze and reproduce it!

Even if he can really do it, Luther still has rules, definitions, and concepts waiting for him.

"How far can we go back in time?"

Hexi asked with interest.

"You can go back to the end of time, it all depends on the strength of the void."

Luther said.

"So powerful?"

He Xi exclaimed, the end of time?

"It's impossible for Karl to deal with us."

Luther continued.

The power that can rewrite and define time makes Pan Zhen's side once again unstoppable and overwhelming.

The difference is that this time, the Tianzha army really has no intention of blocking it.

After Hua Ye learned that Karl, the God of Death, could not deal with the advanced time definition ability, he wanted to run away, but Karl, the God of Death, controlled him.

There was no way. After the black hole engine was upgraded to a space engine, the God of Death, Carl, also made great efforts to prevent him from betraying.

So it's not surprising that Hua Ye can be controlled.

Hua Ye naturally cursed loudly.

"Karl, you are such a turtle grandson, you can't beat others, and you want to bring this king to support you!"

"Karl, please let me go. I will definitely resurrect you!"

"Carl! Carl! Carl!"

Seeing that the ship of Death Karl was about to sink, Hua Ye naturally did not want to die with him.

The way of heaven is so majestic that anyone who stands in its way will die.

Even Ruoning had the same idea. For people like them, betrayal would be as simple as eating and drinking, and they wouldn't even take it to heart.

"It's just a time reversal. King Hua Ye doesn't need to be so panicked. We still have the strength to fight."

Death God Carl said calmly, he also knew that Hua Ye and the others would definitely run away, otherwise they would not be restricted from traveling, as they would be paralyzed once they leave Death Song Academy.

"Bah! People can be resurrected, so what if they have the strength to fight? The cost of trial and error is infinite, and for us, as long as we lose once, we will never be resurrected again!"

Hua Ye complained.

He felt that Carl, the God of Death, was certain to die, but he wanted to drag them to the bottom.

This person is really bad.

I don't know if it's too late to contact Tiandao to surrender.

Of course, the main thing is that there is no contact information.

Hua Ye knew very well that his power was dispensable in the eyes of the God of Death, Karl. All he needed was the command of the Sky Scum Legion.

Now that Tian Zhadu's morale has plummeted and seems to be in ruins, Death God Karl simply dismantled a piece of void equipment and created several void engines to arm Tian Zha.

The appearance of several void warriors barely boosted Tianzha's morale.

Karl, the God of Death, sighed. He had already gone to the unknown universe in the edge space, trying to obtain the void matter from there.

But sailing in the unknown universe is like sailing to discover a new continent without a chart. He doesn't know where he will sail. That's a place that even a big clock can't calculate.

If the void matter can be found, then there is still a glimmer of hope for Karl, the God of Death.

He doesn't believe that Luther has wiped out all the void matter in the unknown universe. That's impossible, so the unknown universe must have more void matter than the known universe!

Although it is now equivalent to finding a needle in a haystack, at the very least, it is the method with the best chance of winning calculated by the God of Death, Carl, through the big clock.

The God of Death, Karl, also planned to abandon the Death Song Academy and the Styx Nebula, and use Hua Ye and the others to buy him time and attract attention.

As for himself, of course he is building a new god-level civilization at the junction of the edge space of the unknown universe and the known universe!

It's a pity that he didn't know that all his calculations were from Luther's perspective of God.

"Tsk tsk tsk, you are worthy of being the protagonist of Carl Company. You can find a way out of this."

Luther admired that he was from the fringe space just to fool everyone, so the situation in the fringe space was unexplored.

Even if there is civilization there, it is a very different civilization.

After all, the environment of the unknown universe is different from that of the known universe, and there is no Kamigawa civilization, the ultimate troublemaker, to spread the technology and concepts of gods and super warriors. What they will develop into is still unknown, and it is impossible to be the same anyway.

It is also possible that there is a dark plane, but wormhole technology cannot be developed.

The size of the unknown universe is also unknown. It may be countless times larger than the known universe, or it may be smaller than the known universe.

Death Karl might be able to collect void matter. Because of the existence of two super civilizations, Pangu Civilization and Shenhe Civilization, the void matter in the known universe has probably been plundered.

There is not much time left for Death Karl and Angel Civilization to secretly plunder, but they can still fight a glorious war.

However, Luther was too lazy to continue playing with Death Karl, so he asked Pan Zhen to use the wide-area void gene strike to clear the sky scum at one time!

The wide-area gene strike function is a super invincible enhanced version of the angel gene strike function of the Taotie King Shihao.

The range is calculated in light years, and the dark plane is used to transmit this strike. It is a heavenly punishment strike that combines the space definition and gene rewriting functions.

Pan Zhen was shocked when he saw the unlocked heavenly punishment strike.

"This is an attack that is enough to destroy a civilization at one time..."

And it is more efficient than the super-giant solar flare bombing that their Lieyang civilization is proud of, and it protects the environment and resources better.

The super-giant solar flare bombing blows up everything.

"Launch wide-area gene strike, targeting the target, Tianzha!"

Pan Zhen activated the Heaven Punishment Strike, and was very interested in the subsequent Heaven Punishment Strike that had not been unlocked. Just the dimensionality reduction strike, time reversal, and wide-area gene strike made Pan Zhen feel extremely shocked and beyond imagination.

[Locked on target: Tianzha.]

[Locked on, building the strike range...]

Chapter 303: Attack the Death Song Academy

[Strike range has been constructed... Styx Nebula!]

[Start a wide-area genetic strike!]

As a ray of light spread, the entire Styx Nebula changed!

The scumbags suddenly felt that their bodies were disappearing and being disintegrated.

"Ahhhhh!!!"

"King Hua Ye, save me!!!"

"Dead again, ε=(o ` *))) alas..."

"I don't know what kind of power Tiandao civilization has used..."

"See you later..."

Some of the scum are afraid, and some are relieved.

They were able to resurrect, so they didn't think it was anything, it was just another double death.

In an instant, it struck down all the scum in the entire Styx Nebula.

This kind of thing sounds ridiculous.

It is estimated that in the conventional thinking of past god-level civilizations, such a thing could not be imagined.

How many times faster than the speed of light must it be to hit so many targets at the same time?

But under the magical cosmology of the Super Seminary, this is what can be done.

Because there is a magical thing called the dark plane in the universe of the Super Seminary.

The Dark Plane has the setting and theory of Dark Transformation Quantum, which means that at different times and in different places, gene engines can be inherited, as well as the transfer of authority over the Dark Plane's weapons arsenal, etc.

This is completely consistent with quantum theory, and the dark plane can even be regarded as an observed quantum realm.

The biggest performance point is that Angel Yan can instantly summon the silver blade anywhere.

What seems reasonable is actually the most outrageous thing about the Dark Plane.

Holy Kesha's arsenal has the space coordinates of the dark plane.

In other words, her arsenal is fixed somewhere in the dark plane!

As for the coordinate exit in reality, I don't know where it is.

Anyway, the entrance to the dark plane of the weapons arsenal of Fraser's Altar is just an entrance. If there was one in the City of Angels, He Xi would not be forced to fall into this situation.

There are fixed dark plane coordinates, but Angel Yan can directly summon silver blades and armor anywhere in the galaxy, on Earth, in the City of Angels, and anywhere in the universe.

The most outrageous thing about the dark plane is this. It does not comply with any spatial distance effect, nor is it a piece of paper stuck under the material plane as many people have guessed before.

It reverses ordinary physical thinking and quantum effects!

In this case, let alone a super-light strike, it would only take an instant to use the dark transformation quantum effect to strike all the scum in the Styx Nebula at the same time.

The god of death Carl was stunned, Hua Ye was stunned, and Ruoning was also stunned.

“What's going on, Carl???”

Hua Ye asked tremblingly.

This is how anyone would react if they saw their army wiped out in the blink of an eye.

"Tianzha's genetic strike function...but why is this so?"

The god of death, Karl, gave the answer immediately, but he would rather not know the answer.

Millions or even tens of millions of scum were all gone in an instant.

In front of them, they were disintegrated and annihilated by the void energy released by their own dark plane.

If Hua Ye didn't have some of Ruoning's angel genes, he wouldn't be safe.

And when the anti-void rewriting ability was not completed, Sumali naturally died.

"This, this, even if we want to be resurrected, it will take a long time, right?"

Hua Ye murmured to himself that with unlimited resources, resurrection is not a problem, but it will take time.

Tianzha continued to expand his troops, and tens of millions of Tianzha were wiped out in an instant. It was not as fast as before to resurrect them.

In other words, before Tianzha recovers to a certain scale, the army of Heavenly Dao can march straight in.

And considering that there is no way to resist this attack from the Tiandao civilization, even if those scum are resurrected, won't they be eliminated in an instant?

"...Cannot be resurrected."

The silent god of death, Karl, suddenly said.

"What?"

Hua Ye didn't understand why he couldn't be resurrected. Was he running out of resources? If he didn't have resources, why wouldn't he just pinch it?

"There are no more gene carriers like Tianzha in this area. I just resurrected a few Tianzha, and they were decomposed before they could say anything. This is a continuous Tianzha gene attack ability. And it's regional."

The God of Death Carl said word for word. If he was not an illusion and did not have the emotions of a living body, the current Death God Carl would not be able to say such complete words.

This means that the Tiandao civilization directly banned Tianzha!

Carl, the God of Death, wanted to say, Coach, I'm reporting someone for cheating! ! !

"hiss----!!!"

Hua Ye and Ruoning gasped after hearing the explanation from Death God Karl.

"Tiandao still has such a method? Not even resurrection? What should we do?"

Their biggest reliance is the infinite resurrection of the disgusting opponent, but now, they have banned you directly.

"Redesign a super gene, change the scum into another super gene, and then resurrect them."

Death God Karl said calmly.

"Are you kidding? What if the Tiandao civilization continues genetic attacks?"

Is it so easy for Ruoning to complain?

"Then continue designing new super genes."

Death God Carl said without any wavering.

"You're crazy, Karl. We can't go crazy with you. Let's escape. We can still escape now!"

Hua Ye said excitedly.

"There is no escape. Space has been blocked. The structure and position of space will be modified 100 million times every femtosecond. Now the Styx Nebula has become a new edge space. Even the big clock can't calculate it..."

The words of Karl, the God of Death, made both Hua Ye and Ruoning lose their minds. Now, wouldn't it be like catching a turtle in a jar?

They immediately attacked Karl, the God of Death, but were directly controlled by Karl, the God of Death.

"There is still a chance, don't worry, King Hua Ye, and Ms. Ruoning."

Hua Ye and Ruoning were already in despair. They stared hysterically at Karl, the God of Death, but could not say anything.

Without the Tianzha army, the remaining triangles were no match for the Tiandao army, and were quickly and steadily pushed outside the Death Song Academy.

In this place, only Holy Kesha came here with high-level guarding angels before. Now, the army of heaven appears almost covering the sky, and the god of death, Karl, does not appear.

Hua Ye and Ruoning appeared like zombies.

"Hua Ye, Ruoning!"

Pan Zhen looked at the hundreds of Hua Ye and Ruoning that appeared on the screen.

"The art of clone, dying struggle."

Pan Zhen understood that this was a tactic that would definitely appear with unlimited resources.

Chapter 304: Putting Death Karl into a bottle

What limits clone tactics is nothing more than resources.

And if this problem is solved, then the clone tactic is the best development route.

Naturally, the clones of Hua Ye and Ruoning cannot have void engines and fourth-generation divine bodies.

The fourth-generation divine body has applied part of the void matter, and Karl, the God of Death, has not yet achieved the freedom of void matter.

Perhaps when he reaches the "rewriting and definition of advanced matter", it will be possible to produce void matter.

Now, it is absolutely impossible for him to produce void matter.

The God of Death, Carl, asked Hua Ye and Ruoning's clones to delay time while he ran away with the space engine and all the void matter.

However, he did not expect that the entire Styx Nebula was blocked.

This was originally a lie told by Death God Karl to Hua Ye and Ruoning, but he did not expect that the Tiandao Civilization had actually completed the blockade.

When did this happen?

The god of death, Karl, analyzed that the space near the Styx Nebula has been blocked and time has been defined.

Once he enters, the passage of his own time will be accelerated a thousand times, and the distance in space will be infinitely lengthened. As long as this distortion of time and space is not resolved, it will be impossible for him to escape, and he will only stay in place for the rest of his life.

"General, the time and space distortion captured a high-energy reaction!"

When Karl, the god of death, broke into the space-time distortion area, Tiandao also quickly received a response.

"The fish is in the net."

Pan Zhen was very resentful towards the God of Death, Karl. In other words, the entire Lieyang Civilization was full of hatred for the God of Death, Karl. Their homeland had to be abandoned because of the God of Death, Karl.

Although they are now living better and have access to resources and technology that they could not even imagine before, this does not mean that the hatred between them has just ended.

The God of Death, Carl, did not rush into the distortion of time and space. After studying with the big clock for a long time to no avail, the God of Death, Carl, made a decision.

He dismantled the space engine and all void equipment, and then absorbed all the void matter at once!

This allowed the void energy of Death God Karl to reach an unprecedented intensity. He exploded to the maximum extent of void energy in an attempt to analyze and rewrite the distortion of time and space.

To put it simply, it is to defeat all methods with one force. This is the most likely way to break through that Karl, the God of Death, can find.

At this time, Hua Ye and Ruoning had been destroyed by the Tiandao civilization.

Their two bodies were also found by heavenly soldiers, heavenly generals and gods.

"I surrender, Karna turtlesun ran away!"

Hua Ye looked at the gods and said.

"Surrender? Hua Ye, do you think it is possible for us to accept your surrender?"

Pan Zhen appeared in front of Hua Ye.

After Hua Ye saw Pan Zhen, he realized that he was not afraid of dying.

"Your scum army is gone, and your space engine has been taken away by the god of death, Karl. Do you think you, a lost dog, are still qualified to surrender?"

Pan Zhen asked Hua Ye calmly.

"This king knows many things about Karna's grandson!"

Hua Ye said quickly.

"Karl? Whether he can leave or not is unknown. As for you, the God King has ordered that the Heavenly Scum King Hua Ye be executed on the spot."

Pan Zhen said with a smile.

"This is impossible!"

Hua Ye screamed hysterically, but was dragged down by the gods and prepared for execution.

Ruoning wasn't much better. She only had a fourth-generation divine body, so it was impossible for her to resist.

"I want to see He Xi. I know many of Karl's secrets, which will definitely be useful to He Xi!"

Ruoning shouted, she felt that the only one who could save her was He Xi.

Because He Xi must be rational, it is probably impossible for his apprentice to save him.

"Okay, go on your way peacefully, you won't see anyone."

Pan Zhen ignored Ruoning's words. The order he received was to execute the two of them on the spot. Even if Tianfei Hexi was there, Pan Zhen would not tolerate her.

He knew exactly what he should do.

Ruoning frantically sent dark messages, trying to contact He Xi, but the place had been blocked, and it was impossible to send information even to the dark plane. Naturally, her efforts were in vain.

By the time He Xi and Angel Leng found out, Ruoning was gone.

Even the dark plane data and dark information backups were destroyed.

However, it cannot be ruled out that the god of death, Karl, took away the dark plane data or dark information backup of the two people.

He decisively took away the space engine and void engine, and abandoned Hua Ye and Ruoning to attract attention. It is hard to say that he would not do this.

Death God Carl relied on the burst of high-frequency void energy to break through the distortion of time and space, but he found that after breaking through the distortion of time and space, he appeared in a colorful space.

[Dark plane not detected...detecting...]

[Dark energy not detected...detecting...]

[Stellar energy not detected...detecting...]

[Biological energy not detected...detecting...]

...

The great clock of Carl, the god of death, quickly checked the space, only to find that there was nothing there.

This is an absolute vacuum!

[Void algorithm logic error...recalculate...]

[Void energy does not exist, search again...]

Death God Carl frowned, knowing that he had fallen into a trap.

"An absolute vacuum constructed with anti-void capabilities!"

Death God Karl did not expect that he would fall into such a trap. The absolute vacuum meant that he could not use anything.

Moreover, the anti-void ability will negate all his void algorithms and void abilities. In other words, he will not be able to mobilize even one unit of void energy.

There is no way to communicate in the Dark Plane, it is forbidden by this space.

Then, the colorful space turned into a transparent box, and Karl, the god of death, saw the surrounding scene.

"This is....."

Carl, the God of Death, lost his composure and saw everything around him.

This was obviously a laboratory, and he was placed on a table, with two huge Kamigawa bodies in front of him.

Tianji King Hexi!

God King Luther!

"First meeting, a scholar from Deathsong Academy, Bachelor Carl."

Luther smiled and said to Karl, the God of Death.

Karl, the god of death, looked at Luther and He Xi silently.

"His Majesty the God King has a good idea!"

Carl, the god of death, knew exactly what was going on.

It must have been when he broke through the distortion of time and space that the opponent used advanced void abilities to modify his spatial position, and then appeared in the anti-void barrier of absolute vacuum.

Although he is an illusory body that is not afraid of physical attacks, in the absolute vacuum formed by the anti-void barrier and dark energy space, he cannot do anything, not even escape.

"It's really, beyond imagination."

He Xi was so shocked that he finally came back to his senses and said.

She didn't expect that the God of Death, Karl, would be captured like this, and now he would be the size of a figure and contained in a square body.

This is the enemy that their angelic civilization has been plotting against for who knows how many years!

Chapter 305 Unify the Universe!

"I think so too, His Highness Hexi."

Death God Carl sighed, and then agreed with He Xi's words.

"He can hear our conversation?"

He Xi felt that it was very magical. This technique of shrinking the divine body, especially since the God of Death, Karl, had a phantom body, so how was it achieved?

Is space defined?

"Of course it can, it's just a definition of space. You can understand it as the size gap caused by vision. In fact, it has not shrunk, but it has become smaller from the perspective of the dimension of space. It is similar to seeing people from a distance. "

Luther's words were simple and clear, and He Xi made sense at a glance.

"Is it the distance?"

He Xi understood that, so to speak, Karl, the God of Death, was probably thousands of miles away from them.

What a magical thing.

"...What are you two going to do with me next?"

Death God Karl asked calmly.

"The anti-void barrier will prevent you from escaping for the rest of your life, and it also has a mental suppression algorithm. Therefore, I hope you can be sensible and hand over the authority of the big clock and cooperate in void research. This should be what you want. Bar?"

Luther had no ill feelings towards Karl, the God of Death. He was a pure scholar. Besides, he had eaten all the cold ice and wiped it clean. It was not good to be too cruel to the licking dog. He might as well just let him be a villain in the bottle from now on.

"In other words, I will have to stay in this anti-void barrier from now on?"

asked Karl, the god of death.

"That's right."

"Then I refuse. I would rather choose to decompose myself than accept such treatment."

Death God Karl said immediately.

"Really? Then let me rewrite your thinking."

Luther nodded, and the face of Death God Carl suddenly changed slightly, and he began to decompose himself without hesitation.

For him, exploring the void and studying the void are certainly his lifelong pursuit, but without freedom, Karl, the God of Death, is not willing.

[Redefining goal thinking...]

But Luther was faster, and with just a snap of his fingers, the mind of the God of Death, Karl, was redefined.

This is also a scary aspect of Void's ability. With this ability, he can turn all the short skirts and goddesses into his harem. However, Luther has no such interest. He will only take what he wants.

After the death god Carl had his mind redefined, he realized that he was a celestial-level supercomputer created by the Tiandao civilization.

"The Great Clock Carl is pleased to serve you, His Majesty the Supreme God-King."

Karl, the god of death, bowed to Luther.

Hexi sighed after seeing it.

Angels also do this kind of thinking rewriting and definition, so it's not surprising.

It's just that the angel is a mind implant, and Luther now completely defines the mind of Karl, the God of Death.

Poor Karl will not only become a celestial-level supercomputer in the future, but also an artificial intelligence.

But he himself wouldn't think there was any problem unless his mind was redefined by a more advanced void power.

But the power of the void is just an appearance. In fact, Luther used his own power to define the mind of Karl, the God of Death.

In the entire super seminary universe, perhaps only the so-called ultimate fear can touch it, but it is impossible to defeat Luther!

The Tiandao civilization won a great victory, defeating the evil Death Song Academy, Tianzha and the Triangle Civilization.

Next, millions of heavenly soldiers and generals will sweep across the galaxy and the known universe to eradicate all evil!

As for who is evil, it depends on who understands what evil is.

Obviously, the civilization of the known universe has been shocked by the divine battle between the Tiandao civilization and Tianzha showing their power.

When Luther and Tiandao Civilization declared that they would sweep away the known universe, they were very sensible and took the initiative to express their surrender.

"We won?"

Angel Yan felt that he had a hard fight in the early stage. Later, after Tiandao Civilization showed its true skills, Death God Karl was completely a paper tiger and was defeated in an instant.

This also made Angel Yan realize that the hard battle between Tiandao Civilization and Death Song Academy was probably not really unwinnable. It was Tiandao Civilization that was using Death Song Academy to train troops and show its strength!

"Sister Yan, Tiandao is already the absolute overlord of the universe, and the God King has also been crowned God Emperor. Even if Queen Kesa comes back, I guess..."

Many angels have changed their thoughts and beliefs, mainly because the civilization of heaven is too powerful, and the power of heaven is unrivaled.

No matter how proud they are, they will inevitably lower their proud heads.

The Tiandao civilization is a civilization that they cannot defeat and match, even if Queen Keisha is still there.

Under this situation, Angel Yan had long been relieved, but she had no intention of looking for Luther.

"The God Emperor already has His Highness Leng and Hexi by his side, so I don't need to join in the fun."

Angel Yan said to the sisters that she knew why they said these things to her. The problem was that Angel Yan didn't have a good impression of Luther, but Angel Yan couldn't accept being kissed by Leng, let alone a Tianji King.

Forget it, she heard that Demon Queen Morgana also had an affair with Luther, not to mention Queen Qilin, Princess Du Qiangwei, Empress of the Sun and so on.

Angel Yan doesn't mind sacrificing himself and stepping forward if necessary.

But now, Angel Yan feels that it is no longer necessary.

Luther was afraid that he didn't care about her, and she didn't want to get involved by herself.

The Heavenly Civilization has become the undisputed master of the known universe, and the Supreme Heaven has become the only heaven in the known universe.

Being crowned God-Emperor is just a formality.

Finally, the home front was stabilized, and from now on, the Super Seminary Universe was Luther's gentle hometown and home.

The Imperial Dimension can only be regarded as another home, and limited by the Marvel Universe, Luther will not put everything in the Imperial Dimension.

Liang Bing ran over seamlessly.

"The Supreme God Emperor..."

Liang Bing is very aware of current affairs and is a hero. Under her hard work, Luther reluctantly accepted the surrender of the demon civilization.

This made Liang Bing even more excited.

"Your Majesty the God Emperor, I heard that you had an affair with Angel Yan?"

Just after Luther finished his life-and-death battle with Liang Bing, He Xi came to the door. Naturally, Liang Bing was frightened and ran away through the wormhole, just like a captured mistress.

In fact, it's impossible for He Xi not to know Liang Bing's existence, but she also knows that she can't control Luther, so she just turns a blind eye. As long as Liang Bing doesn't jump around in front of her, He Xi won't pay attention to her existence and just treat her as air.

"Why are we having an affair? There is nothing wrong between me and Angel Yan."

Luther had a clear conscience and confidently refuted He Xi's words.

He is a gentleman, and there is nothing between him and Angel Yan.

Chapter 306 He Xi's plan

"Is that so? Your Majesty really has no idea about Angel Yan?"

He Xi called up the dark plane data from when Angel Yan was injured on Blue Star and had no energy to restore his divine body.

"It's just a joke."

Luther said with an unchanged expression, this cannot be regarded as black history or proof.

As for why He Xi was able to obtain this dark plane data, isn't it normal?

Angel Yan is connected to the treasury of sacred knowledge. Naturally, it is impossible to hide the data from He Xi, the former Heavenly King.

"It's a pity that His Majesty the God-Emperor was just joking, but our Yan took it seriously."

He Xi clicked his tongue and said.

Luther glanced at her. Angel Yan took it seriously that it was impossible. Luther wondered why He Xi was looking for trouble, and it was such a meaningless thing.

He didn't believe that He Xi couldn't see that Angel Yan couldn't accept this kind of experience with others.

After all, it's not an urgent or unavoidable situation.

With Angel Yan's character, it is impossible to do this.

This is also why it is so difficult to open a harem in the Super Seminary Universe. It is impossible for female super warriors here on Earth to accept it, let alone female angels.

This is possible only in Lieyang Civilization, because Lieyang Civilization has the concept of three wives and four concubines, but it is impossible for Xiaohanpi Reina to accept three wives and four concubines. In the absence of an overwhelming strength gap, after all, Xiaohanpi After all, she is an empress.

"It doesn't matter if Angel Yan is serious. I don't mind having one more concubine. The question is, He Xi, why are you doing this? Shouldn't there be as few women as possible for this emperor?"

Luther looked at He Xi.

"How is that possible? As long as the emperor is willing, it is okay to accept the Demon Queen as his concubine. I have absolutely no objection."

He Xi shook his head and said.

"Since the emperor said it doesn't matter if there is one more heavenly concubine, then it's easy to talk about it."

Then Hexi walked away slowly with a full harvest.

Luther cleaned up and recovered.

When the super brain asked him to ask questions, he figured out what Hexi wanted to do.

"I never expected that King Tianrun would finally take possession..."

The corner of Luther's mouth rose. He originally thought that his inability to move or say anything to Angel Yan would lead to King Tianrun to stay with his sister with peace of mind.

Now it seems that as long as He Xi is around, this is impossible.

He Xi specially dug out the dark plane data to find herself. It was hard to say that she had not planned it in advance.

"Yan, I have something to say to you."

Angel Yan is sorting out the flowers and plants, preparing to plant the flowers he wants in the supreme heaven of the Heavenly Civilization.

The special space of Jiuchongtian is enough to accommodate everyone in the Tiandao civilization, and they do not have to go to the outside world to station and live.

"Your Highness Tianfei!"

Angel Yan was confused after receiving the secret communication. She didn't know what He Xi wanted from her. However, she put down what she was doing for the time being and went to He Xi's palace.

After He Xi saw Angel Yan's arrival, he motioned for Angel Yan to sit down.

"What do you want from me, Your Highness?"

Angel Yan asked seriously, planning to solve it quickly.

"Yan, what do you think of our future?"

He Xi took his time and conjured up two cups of tea, then asked.

Angel Yan was even more confused. What about our future? Are you talking about it?

This kind of thing shouldn't come to a warrior like yourself, right?

"Now that the known universe has been unified, the law of heaven has done what the angels have not been able to do, but in the future, the order of heaven will also completely replace the order of justice, and it will be an unshakable replacement."

When He Xi said this, Angel Yan already had a rough idea.

Although her brain is highly developed, many things in Angel Hikohara's plot are not obvious to her.

Angel Yan only has a partial understanding of what He Xi said now.

"This means that, unless there are any accidents, the order of Heaven will always be maintained for ten thousand years, one hundred thousand years, or even one million years..."

Angel Yan couldn't help but be shocked by the time He Xi mentioned. Angel civilization hadn't even been that old.

"Your Highness Tianfei, what exactly do you want to say?"

Angel Yan frowned and asked directly.

"Don't you have the brain? Forget it, what do you think of the order of heaven?"

He Xi clicked his tongue. It was different from the original plot. She only knew Angel Yan from the dark data and had not tested Angel Yan. Therefore, after discovering that Angel Yan did not have the brain, He Xi could only speak helplessly. Let's make it clear.

"The order of heaven...the divine power is supreme, but there is only one god above all others, the God Emperor, the king of gods. Therefore, the divine rights of other gods are not divine rights. The God Emperor is supreme."

This is what Angel Yan understands about the order of heaven, and Luther is the way of heaven.

"He is the law of heaven, the will of heaven, and the laws of movement and change of heaven. The world must have its own rules, which are the ways of heaven. The so-called ways of heaven are the rules and principles of all things. Everything has certain rules."

He Xi took over the conversation.

"The order of heaven is to use the God Emperor as the rule for all things. This is even more domineering than Kesha's original one."

"After all, he is the overlord of the edge space, so it is normal."

Angel Yan didn't think it was anything. If Luther wasn't overbearing, he wouldn't be Luther.

From the moment Luther appeared in the known universe, he displayed an extremely domineering character and behavior.

"It's not enough to just be domineering and righteous."

Hexi shook his head.

Angel Yan was shocked when she heard what He Xi said. What did He Xi want to do?

"What does His Highness Hexi mean?"

Angel Yan asked cautiously.

"Don't worry, I'm not stupid enough to seek to usurp the throne, and it's impossible for the guardian angel to do that. In that case, wouldn't the sign left by Holy Kesha be destroyed by me?"

Hexi said with a smile.

Holy Kesha has spent so many years building the brand of Guardian Angel, so that the male gods and male super warriors in the known universe have a certain fondness for angels. It is just so that angels can marry. Naturally, He Xi will not marry his own man. Destroy.

Angel Yan was confused. If this was the case, what else had to do with her, a little warrior?

"I want you to be the guardian angel of the God-Emperor."

After He Xi realized that Angel Yan really didn't have the brain, she had no choice but to speak thoroughly and clearly.

This time Angel Yan understood.

"His Royal Highness Hexi wants me to influence the God Emperor? But isn't Leng He already there with you?"

Angel Yan quickly said that she didn't want to wade into this muddy water, even if she didn't mean anything to Luther, but it was unnecessary.

I already have two guardian angels.

Chapter 307 Angel Yan can't escape

"Leng and I are not enough. Although the God-Emperor has the super gene of Galaxy Power, he has eliminated the thought gene of the angel gene at the bottom of Galaxy Power. In other words, he will not be affected by the thought gene."

How could He Xi let Angel Yan be a little angel with peace of mind?

Angel Yan really didn't know about this. She only knew that the power of the Galaxy was rampant in the Tiandao civilization. Both the Queen and the Concubine had the super gene of the Galaxy Power, which was a good thing for Angel.

But if He Xi says this now, doesn't it mean that the influence of the Galaxy Power is gone?

"But....."

What else did Angel Yan want to say.

"Angel Yan, you are the heir chosen by Kesha. You are the king of angels. For the future of angels and the future of the known universe, become his guardian angel and use your thoughts to influence his thoughts. This is This is what you should do, you are not one of those little angels after all."

He Xi interrupted Angel Yan's words and said to Angel Yan with a solemn expression.

Angel Yan was silent.

Even if she is relieved and chooses to leave everything to time and wait for Queen Kesha to return to rebuild the angel civilization, although the angel civilization may be worthless by then, she will still follow Queen Kesha.

However, she cannot ignore her identity.

She is the King of Angels, even if she has not yet ascended the throne or passed He Xi's test, she is still the King of Angels!

In the original plot, she still had the angelic civilization which prevented her from paying too much attention to the power of the galaxy. However, because of the underlying ideological genes of the angels, Angel Yan did not have to worry about Ge Xiaolun going astray.

Now, it's different.

"In addition to you, I plan to develop other angels to become the concubines of the God Emperor. Guardian angels are not necessary. This is already a thing of the past. Luther may not care."

Hexi continued.

Angel Yan looked at He Xi in disbelief.

"What are you looking at? If you work hard, I won't do this. Besides, that's Luther. He deserves to be the supreme male god, so he won't be at a disadvantage."

He Xi said angrily.

With He Xi's wisdom, although she has a love brain and facial control, she can see the overall situation clearly. Even the Holy Kesha cannot be as decisive as He Xi.

Angel Yan said that this was the first time she heard that true love could be shared, and His Highness Hexi was really different.

"In addition, Hua Yue from the old Mero tribe is also here."

He Xi said a crucial message.

"Hua Yue? Hua Ye's sister?"

Angel Yan was shocked, what was she doing here?

"Why else would she come? The law of heaven controls the universe, so of course she has to come. This is an opportunity for the old Merlot tribe to stand up and rise. Even if she betrayed and overthrew Hua Ye with us, it doesn't mean that she is of the same mind as us."

He Xi said.

Before Holy Kesha's curtain call came to an end, the Mero Tribe was naturally aligned with the Angel Civilization, and its military sources also came directly from the Mero Tribe.

It's hard to say now.

"Could it be that Hua Yue wants to..."

Angel Yan realized the seriousness of the problem. Hua Yue was Hua Ye's sister, which meant that she carried the ideas of the old Tiangong era.

"It's possible."

He Xi nodded.

The biological sister of Heavenly Scum King Huaye was the former Heavenly Slayer King Huayue.

In the era of the change of three kings, the Tianzhan King, who had great military achievements, was the wife of the Grand Duke of Shang Yun.

It is impossible to become a heavenly concubine, but it is difficult to say that Hua Yue will not let people from the old Mero tribe become heavenly concubines.

"And Enisid."

Hexi continued.

"Aenecid?"

Angel Yan was stunned. Is this a bet on the future of angel civilization?

Although it is now clear that the angelic civilization has no future, and even its thoughts may disappear in tens of thousands of years, but that is still Enisid.

After Luther's heavenly path swept across the Styx Nebula, he found Ainecid. The future Queen of Angels was not contaminated. Luther had little interest in her. In addition, Fraser had been slaughtered by the Taotie. , so she stayed in Jiuchongtian.

Hexi found Ainecid, and then explained his thoughts and Ainecid's own situation to her.

After all, Ainecid was a qualified Queen of Aylan and a future Queen of Angels, so after weighing the pros and cons, she agreed without hesitation and became a real angel.

But I don't know whether Luther will accept her as the Heavenly Concubine.

Everyone knew that Luther was not a greedy scumbag Hua Ye, and even his concubines were so few that they could be counted among the three wives and four concubines of the Lieyang Civilization.

In this case, He Xi just made preparations so that he would not be unable to find anyone when needed.

If possible, Hexi doesn't mind stuffing ten angels into the concubine. What's the point? She is confident that her charm and wisdom will not be easily replaced by others, so naturally she doesn't mind adding more concubines. quantity.

Angel Yan was speechless. Even the future Queen of Angels had done this. What reason did she have to refuse?

It's her responsibility.

"Unexpectedly, we ended up back to the starting point... Your Highness Hexi, can we really affect Luther by doing this?"

Angel Yan sighed with emotion, and then asked He Xi.

"Luther does not seem like a god who is easily influenced, but we have the advantage that Luther only started to find true love after he came to the known universe."

Naturally, He Xi was not just a fool, but he made such a judgment and decision after analyzing Luther.

"Qilin?"

Angel Yan suddenly realized.

If we talk about true love, Qilin deserves it.

As an earthling, she has become the most honorable queen in the known universe. No matter the Fiery Sun Queen or the angels behind her, they can't shake her position.

Angel Yan finds it hard to imagine that a domineering god like Luther can have true love.

"Qilin has helped us melt the ice, and the tomboy has cultivated you for so long, it is not impossible for her to influence Luther."

He Xi said with emotion, if there was no Qilin, what would Luther be now?

Absolutely rational, cold and ruthless heaven and tyranny?

However, heaven is affectionate!

"Now heaven is affectionate. When it was ruthless before, you also saw how Morgana was treated. If it weren't for that guy Carl, Morgana would have been gone. Even so, Morgana died several times."

He Xi said with a smile.

Angel Yan did know about this matter. After all, it was no secret. Luther made public the dark data information he had hidden before, which was actually his own trick.

Including the first step he took when he arrived at Blue Star was to find Sumali, kill Sumali, and turn Sumali into Dark Silver to trade to He Xi, etc.

This operation made He Xi speechless, after all, that piece of Dark Silver had now turned into a silver blade

Chapter 308: Ignored You at First

There is also secret data about Luther killing Morgana, which made Angel Yan feel that Luther was too cruel at that time.

Luther is really better now, not too much.

"Your Highness Hexi, I understand what you mean."

Angel Yan nodded and said.

"But what does Luther think?"

Angel Yan felt that he should not be sentimental at that time. What if Luther actually didn't mean that to him?

"Don't worry about this. Compared to others, you have a very good advantage in this regard."

He Xi raised the corners of his mouth and said to Angel Yan.

By the way, she also released secret data from when she discussed Angel Yan's problem with Luther.

Angel Yan received the dark data and when she heard what Luther said, she felt as if she had returned to the previous time.

Angel Yan could still convince himself before, but now what He Xi said and what Luther said made Angel Yan shaken.

For some things, all that was missing was a passable excuse, not to mention that He Xi also used his righteousness and angelic faith to convince her.

Angel Yan asked himself, he actually did not resist, but felt relieved inside.

She knew what it was, and she knew that she had just found her true heart.

After all, Luther is so domineering and powerful, and at the same time, his divine charm can be said to be unmatched by all the gods in the known universe. He Xi was even fascinated and fell, let alone others?

Angel Yan was just suppressing his feelings. Now that he faced this feeling head-on and knew the true answer in his heart, this feeling was out of control.

Luther knew that He Xi was always causing trouble recently, but he didn't care. He Xi was just doing things for the sake of angels' thoughts.

That was tens of thousands of years of persistence and belief between her and Holy Kesha, and it was not so easy to change course.

Otherwise, wouldn't tens of thousands of years be in vain?

There is still such a possibility in the animation. If it were replaced in reality, the heaviness of tens of thousands of years would be invisible.

This requires Luther to use a larger future to crush the past.

One hundred thousand or even one million years later, what they insist on will become fragile and not worth mentioning. At that time, they will truly belong to Luther.

Instead of like now, their hearts belong to Luther, but they are inevitably affected and controlled by their own thoughts. This is behavior determined by thinking patterns.

Luther saw the angel in his garden.

"Supreme God Emperor, I don't know, do you still remember what you said?"

Angel Yan said to Luther with a smile.

"I don't remember."

Luther knew that Angel Yan would appear here, which was the result of He Xi's troubles. Angels such as Angel Chase, Angel Moi, and Angel Keira would probably appear in the future.

No way, Luther looked at them more because they were female angels with names in the original plot, and he also had a crush on them. Such details would naturally be noticed by He Xi. Even if He Xi didn't notice, others would. noticed.

In the world of gods, the ability to observe words and emotions is many times better than that of mortals. Each one has his own astronomical-level telescope and microscope and multiple slow magnifications. What he likes, what he pays attention to, and what he hates will be observed and mastered in detail.

Hexi probably also acted based on this kind of information.

Angel Yan's expression did not change. She knew that Luther was not that easy to take down. If Luther was so easy to take down, it would be impossible for her to escape from Luther's clutches and still remain free until now.

"It doesn't matter if you don't remember, I have a dark data backup."

Angel Yan smiled evilly and released the dark data on Earth.

Reminisce about the past with Luther.

"It's just fabricating and modifying dark data. It's not a very rare technique."

Luther said calmly.

Angel Yan found it funny.

"Then, does Your Majesty really think this is fabricated and modified?"

Angel Yan sat on Luther's lap, put his arms around Luther's neck and said.

"It must be you who are plotting something against me, so you fabricated such dark data."

Luther nodded and said seriously.

"That's right, Your Majesty."

Angel Yan restored Yun Siji's true nature. Angel Yan was the most charming when he was not the king, especially with his provocative personality and ability to drive at any time.

"I am planning to become the Heavenly Concubine, is that okay?"

Angel Yan asked.

"Just the position of a Heavenly Concubine? Without the addition of the Galaxy Power Void Engine?"

Luther naturally started to play with Dayan's legs.

Yeah, tight, delicate, smooth.

"Isn't that the standard configuration of a Tianfei?"

Angel Yan looked at Luther with innocent eyes and said.

Luther said how could it be possible? For example, even if Liang Bing was made a concubine, it would be impossible for her to get the void engine.

At most, give her a super time and space gene, which is an upgraded version of time and space rose.

The main reason is that Liang Bing's ability to get things done is not that strong, so the problem of Carl, the god of death, has been solved.

But the space principal who has been upgraded to the cosmic heaven has not yet solved it.

The Super Theological Seminary recently came to the door and expressed its desire to establish a Super Theological Seminary of the Heavenly Civilization.

They are very interested in the knowledge of Heavenly Civilization, and they want to share the knowledge of Super Seminary very generously and selflessly.

Then he was rejected by Luther.

He doesn't need this knowledge.

"Of course it can't be standard. There are different levels of Heavenly Concubines, Angel Yan."

Luther is not a man who will be soft-hearted if he acts coquettishly.

Besides, Angel Yan's original idea was not to associate with him for the rest of his life and get along well with his sisters.

Luther is not interested in provoking such a lofty and arrogant character, but if he takes the initiative to come to the door, Luther will not be ecstatic and not care about anything.

You ignored me at the beginning, and now you want to climb up so easily?

Isn't he, Luther, a lofty and arrogant character?

Angel Yan smiled bitterly. She knew Luther's character and thoughts very well. Because of this, Angel Yan knew the difficulties now.

It was fun at the beginning, but now it's a funeral home for chasing husbands.

"Then I don't know how many times I have to brush His Majesty to upgrade?"

Angel Yan's hands began to search up and down, and then asked Luther.

"You can only brush once a day, because this emperor has other Heavenly Concubines to brush, this is daily."

Luther said.

"Can you increase the number of times, Your Majesty?"

Angel Yan's hands were not very clean, and she found Luther's important things.

Luther caught him in the act, but Angel Yan was so vicious that he wanted to use the things to commit crimes and rob Luther's treasures.

What kind of person is Luther? How could a little Angel Yan be so presumptuous?

She gave Angel Yan a Kai Yan operation on the spot.

Chapter 309 Returning to hometown

After seeing Luther's operation, Angel Yan was amazed and felt that he had learned a lot.

However, Teacher Yan then assigned Luther an assignment, requiring Luther to complete millions of words.

Luther not only completed millions of words in excess, but also helped Teacher Yan to correct the assignments. Even so, Teacher Yan was still so tired that his hands and legs were weak and his whole body was exhausted.

"Yan, no, your body is too weak. Is this the third-generation divine body?"

Luther said with a sigh.

Angel Yan is different from the original plot. He did not pass the test, so he naturally did not advance to the fourth-generation divine body of the sacred body.

And Luther's strength... It can only be said that even if Superwoman came, she would be paralyzed into a pool of mud.

Angel Yan did not want to talk.

She did not expect Luther to be so powerful.

"I completed the daily task once, although it was very reluctant."

Luther said to Angel Yan.

Angel Yan said weakly, "Thank you, Your Majesty."

She felt that if it was such a daily task, no wonder she could only do it once a day.

At the same time, Angel Yan maliciously wondered if He Xi was looking for them not only because they were angels, but also because she couldn't bear it?

"If I should say it, I will make it clear. There is a first come first served rule for this kind of thing, and the later Tian Fei is worthless."

Luther did not leave immediately, but continued to talk to Angel Yan.

Angel Yan remained silent. She understood the principle of first come first served, and she also knew that Luther could not equip all Tian Fei with void engines. If that happened, wouldn't the position of Tian Fei be crazy?

By then, I'm afraid that male super soldiers and male gods would want to change their bodies and become Tian Fei.

Angel Yan could understand Luther's arrangement, and she didn't really care about the void engine. She had her own biological engine.

Angel Yan valued her influence on Luther's thoughts more.

This kind of thing is subtle. According to what Luther said, just brush the daily tasks every day.

After all, it's good to be able to complete a daily task.

After Luther completed the Kaiyan operation, he went to find He Xi.

Drive He Xi away and make Xi time.

Anyway, after all these, He Xi was also paralyzed.

It turned out that the sacred body only lasted one million words longer than Angel Yan.

Liang Bing now lives in Tiandao. Although she has obtained the position of Tianfei, she also did not get the void engine.

On the one hand, she did not complete the operation of attracting the body of the God of Death Carl.

On the other hand, Luther also said to Liang Bing what he said to Angel Yan.

If Liang Bing had brought people to the door earlier, she would have enjoyed the void engine now. Unfortunately, she missed it.

Liang Bing was also speechless. She originally judged that the battle between Tiandao civilization and the Styx Nebula would take thousands or even tens of thousands of years, and after adding the variable of unlimited resources, this time was extended to hundreds of thousands of years.

As a result, the Tiandao civilization was too fierce and directly took out the dimensionality reduction attack, time reversal, super gene attack and prohibition function.

Until now, the area of the Styx Nebula is still a forbidden area for the Tianzha gene. Any Tianzha who enters will be annihilated and destroyed, and will be decomposed instantly.

She couldn't understand such power. It was not unfair for the death god Carl to fall.

What should Liang Bing do? The game that was originally planned slowly was decided in an instant.

She couldn't even react.

In contrast, the silly Lena officially installed the void engine.

"Stellar engine, void engine, 10-frequency power, additional stellar algorithm, stellar drive, stellar manufacturing, and additional four basic function rewriters!"

Lena was surprised to feel her current power. Although it was only a 10-frequency stellar engine, it was much stronger than her previous Sunlight Super Engine.

More importantly, the symbolic significance of Lena installing the void engine. After all, the Tiandao civilization has no opponents now, and the void engine has become a symbol of status.

Currently, only a few Tianfei and Queen Qilin have installed the void engine.

Qilin's void engine was upgraded by Luther for the second time. Now it is a super void engine with up to 50 frequencies. It not only comes with four basic function rewriters, but also has advanced concept rewriting, advanced rule rewriting, advanced gene rewriting, advanced anti-void capabilities, etc.

If a fight really breaks out, Qilin can suppress the current Tiandao civilization alone!

Moreover, Luther also gave Qilin the Sky Punishment Strike, a powerful killer weapon. Now everyone knows that the Sky Punishment Strike has surpassed the arsenal of the Holy Kesha and has become the most powerful killer weapon in the known universe.

Not only that, Luther still loves Qilin very much, and her own Luther Protoss power has been greatly strengthened by Luther.

This power is no less than that of the Father God, but Luther has sealed this power up, and it will only be released when Qilin is in danger. At that time, the stars will move, the Milky Way will be shaken, and the creation and destruction of stars will be a matter of ease for Qilin.

With such a configuration, even if the principal of the space has ill intentions, or if there are any great gods coming to kill in the future, and the ultimate fear comes, Qilin can directly kill the other party.

"Next, should I go to the Dragon Ball world or return to the Marvel Universe?"

Luther thought about this question.

But in the end he decided to go to the new world. The Dragon Ball world was messed up by him, and Broly became his Odoudou.

I don't know how it will develop, but Luther no longer looks down on the power of the Dragon Ball world. It is estimated that the beginning will not begin until Beerus, the God of Destruction, wakes up, or Majin Buu is unsealed.

"Time travel!"

The superpower activates again.

This time, because Luther became extremely powerful, this super power also allowed Luther to reach the new world effortlessly.

"This is... an island?"

Luther appeared high in the sky. He stabilized his body and then noticed that he seemed to have arrived on an island.

"One Piece?"

Luther landed on an island, presumably not the desert island where Captain Jack Sparrow was originally located in Pirates of the Caribbean.

"Who are you?"

At this moment, Luther saw a heroic woman appearing in front of him.

“Gal Gadot???”

Luther's eyes widened. The long legs that appeared in front of him looked very similar to Gal Gadot. The only difference was probably the height. These long legs were almost catching up with him.

After noticing the other person's appearance and attire, Luther suddenly realized where this place was.

The home of his race, the DC Cinematic Universe!

"It's either Dragon Ball or Marvel, DC or Super God. Can't I live in a warm, everyday world?"

Luther complained.

"Are you, a man?"

The woman frowned and looked Luther up and down. She came over after hearing the noise here.

Chapter 310 DC Protoss

"No, I am a male god."

Luther said in Chinese.

Then Diana looked at Luther with a confused expression.

"Didn't it say that Amazons can speak hundreds of languages? Chinese is not among the Amazons' language range?"

Luther complained.

"Do you speak other languages?"

Diana also felt why she couldn't understand Luther's words. It was obvious that the Amazons were created by Zeus so that humans could communicate with each other.

"Luther, this is my name."

Luther said in English.

"Diana Prince, I am the daughter of Hippolyta, Queen of the Amazons..."

Luther saw that Diana was about to introduce herself at length like in the movie, so he interrupted her.

"Okay, okay, I know who you are."

Luther said looking at the enhanced version of Gal Gadot in front of him.

It is not an exaggeration to say that it is an enhanced version. It is a very faithful reproduction of the Wonder Woman in the comics. The original plot of Gal Gadot was only B at best, but the one in front of me has a D. At the same time, the details of the skin are also flawless. After all, it is Gods.

The legs are long, the waist is thin and plump. Luther is so tall, but Diana almost reaches his nose.

The height of 183cm can be said to be very restored, with this pair of long legs.

"Then who are you? The name Luther feels strange. What about your last name?"

Diana asked Luther full of curiosity.

"My name is Luther, Lu is my last name, De is my name, and as for who I am, I am God."

Luther said.

"God? Then you are Ares' subordinate?"

Diana suddenly felt like she was facing an enemy.

"Relax, I'm not from the same god as you."

Luther's words did not make Diana relax her vigilance. Despite her original appearance of being ignorant of world affairs, she was actually very smart and could draw inferences from one instance to another.

For her, Luther naturally made her wary. After all, Luther appeared out of thin air, unlike Steve Trevor who was rescued by her.

"Divinity?"

Diana's narrow view of life did not know that there were other pantheons.

So she saw Luther conjure a book out of thin air.

"This is the mythology of the outside world, including your Greek mythology and my mythology. Take a look."

Luther threw it to Diana, who took it. She hesitated and opened the book.

Gods receive information very quickly, especially the DC protoss.

This is a creationist universe, where the Supreme God is supreme, the most awesome and the most capable guy.

Even a group of gods are awesome beings, and Darkseid is also a god.

The new god race where Darkseid belongs is a big attraction, because compared to the original old god system of the DC universe, DC's later new god system has stronger attractions and derivative plot capabilities.

What is a new god?

The New Gods refer to the humanoid creatures on New Creation Star and Apokolips. Both New Creation Star and Apokolips are outside time and space and are called the fourth world.

These new gods evolved into gods because of their proximity to the Source, the ultimate basis for the expression of energy in the universe.

And the advanced technology of the New Gods gives them stable genetics and perfect evolution.

The New Gods are stronger, smarter, and faster than humans, but there are also many inferior beings on Apokolips.

The origins of the New Gods are millions of years ago in the God Realm, a world outside of reality, inhabited by the Old Gods (Old Gods).

However, under the instigation of the evil god Loki, the War of Gods occurred. The divine world was torn apart, the old gods were destroyed, and huge divine waves were released that swept across the entire universe, creating countless gods and superpowers.

As time passed, the ruins of the God Realm evolved into two planets, New Creation Star and Apokolips Star, and new gods were born.

The new gods of the New Creation Star are kind and just.

Apokolips' new god is evil and warlike.

The two planets have completely different destinies. New Creation is peaceful and beautiful, while Apokolips is ruled by tyranny and dedicated to war.

The two sides broke into a truce because of a big war and then exchanged heirs.

But then Darkseid broke the truce in order to find the Anti-Life Equation that could control the minds of all sentient beings in the universe.

The war between New Creation Star and Apokolips breaks out again, and the battlefield is the earth.

The New Gods' abilities are also novel. The New Gods are functionally immortal. They stop aging after the age of 30 and are immune to the ravages of time unless they are killed in battle.

The strength, endurance, speed, resistance, immunity, reaction and other physical functions of the New God are far beyond those of ordinary people.

And many of the new gods have their own unique superpowers.

In the 2010 comic "Batman" #702, Batman said that the Fourth World of the New Gods corresponds to Plato's Republic.

Mister Miracle is the physical representation of free thought, Darkseid represents evil, Orion represents war, Lightray represents joy, and so on.

Anyway, in the DC world, as long as it involves gods, they are awesome.

Diana didn't spend much time reading this history of world mythology.

Various myths, legends and stories opened Diana's eyes.

"Then what kind of god are you?"

Diana asked Luther curiously. This was the first time she had seen a living god. Diana still didn't know that she was a god.

Luther thought for a moment, what kind of god is he?

After the Empire Dimension from the Marvel Universe entered the DC Universe, it felt strange, and the concept of the Luther God Clan created by Luther was also recognized.

So, now Luther is the God King, the God King of the Luther God Clan.

However, due to the lack of God Waves and Sources, Luther's divine power is naturally not as good as the new and old gods.

Of course, because he is an alien god, he can be regarded as an "outer god" and "the adventurer".

This means that Luther can obtain and exercise completely different divine powers.

Marvel's divine power is naturally very different from DC's divine power.

"Magic and divine arts and superpowers and the god of destruction and destruction and power."

Luther thought about it and said that magic is of course based on the magic of the Dragon Ball world, and the emphasis is on being unreasonable, just like the magic of deformation.

Divine arts are the abilities used by the gods of Dragon Ball, but Luther did not get them, but it doesn't matter, he just has a concept.

The same is true for superpowers, and as for the latter, it is the concept of divine power formed by Luther's own source of power.

Destruction comes from Broly, destruction comes from Doomsday, and power comes from Kryptonians.

The Trinity, the combination of the three, is Luther's most important and basic power.

This makes Luther have the conditions to become a god in the DC universe, Doomsday and Kryptonians are both locals!

The essence and origin of the Outer Gods, plus the concept and origin of the locals, Luther will become the most special god in DC.

The premise is that he is not kicked out by the Supreme God.
