

Kryptonian 33

Chapter 33 The Second Way to Stimulate Potential

Dr. Gero's wife is a genius in the new game, but she only appeared after being transformed by Dr. Gero.

Now, she is dead.

And Android 21 was created by Dr. Gero using his wife/not sure if it is his wife but it is definitely the mother of the prototype of Android 16 as the fusion material, plus the cells of Cell and Majin Buu.

By the way, something like Majin Buu actually has cells?

As for Dr. Gero's grandson, Dr. Hyde in the future movie version, he has not been born yet.

"Next, we will go to Namek."

Luther couldn't wait any longer.

So he summoned the dragon directly.

"Speak, tell me your wish, no matter what it is, but you can only make one."

The familiar dragon appeared from the dark clouds that were about to destroy the city, and then looked at everyone below and said.

The people of the Red Ribbon Army had long been transformed into androids who obeyed Luther's orders, and even Dr. Gero couldn't control them, so naturally they would not mess around at this time.

"I want to go to Namek! The hometown of God!"

Luther was worried that the name of Namek had too many overlaps, so he added a key.

"This wish is very simple and has been fulfilled."

Shenlong said, and then Luther felt the familiar traction again, and then he followed the traction without resistance.

Below, Shenlong disappeared, and when the seven dragon balls were about to disperse, the seven androids jumped up and grabbed a dragon ball from each other.

With the power of the seven dragon balls being intercepted by the young Son Goku, it is known that their power is not strong. Luther was too lazy to collect the dragon balls after he came back, so he let his androids intercept all the dragon balls directly.

This will make it convenient for him to make a wish directly when he comes back next time.

Luther slept soundly under the effect of traction, and he felt quite comfortable.

But this time it was unexpectedly fast. It seems that in the original plot, Son Goku also arrived at Namek very quickly by taking a spaceship. Shenlong is faster than the spaceship anyway. If Luther did not have the coordinates, he would have flown here or crossed over.

"Is this Namek?"

Luther landed on the ground. There was no difference in the surrounding environment, but he still walked forward.

He released his aura. The great elder of this period was still alive. He would probably be able to sense him soon, right?

Luther had no ill intentions and would not kill innocent people indiscriminately. His aura was naturally not evil, but such a strong aura would naturally attract the attention of the great elder.

Not long after walking, Luther's aura sensed a strong aura that seemed to cover the sky and the sun approaching him quickly.

"Is this Nayru? 42,000 combat power!"

Luther felt a sense of oppression. He had never known how strong he was before. Now that he felt Nayru's strong aura that covered the sky and the sun, he knew that he probably didn't have 10,000 combat power.

"Who are you?"

A tall Namekian appeared in front of Luther, and then spoke the Namekian language that Luther could not understand.

"I, Luther."

Luther pointed at himself and said the pronunciation of Luther.

Nayru paused.

"Nay."

But Nay, who didn't know how to communicate, finally took Luther back, because the Great Elder said he wanted to see Luther, otherwise, Nay would most likely get rid of Luther or expel him from Namek.

Of course, Luther was not afraid of Nay. Just kidding, a Kryptonian from Doomsday, what's the point of being afraid of him? Even if Frieza was here, Luther would dare to go up, anyway, Frieza would not use his full strength at the beginning.

He hasn't tried his growth speed and adaptability yet.

Following Nay, Luther met the Great Elder.

"Hello, outsider."

The Great Elder didn't speak, and the voice automatically sounded in Luther's heart.

Luther knew that the Great Elder had the superpower of telepathy, so it was not surprising.

"Hello, Great Elder of Namek."

Luther replied.

"What is the purpose of your coming to Namek?"

The Great Elder asked directly.

"For the Dragon Balls, and for the Great Elder to help me develop my potential!"

Luther said.

The way to develop the potential of the seven dragon balls is nothing more than the super divine water to stimulate the potential, the Namek elder to stimulate the potential, and the old Kai King God sealed in the Kai King Sword to stimulate the potential. The latter stimulates the most potential and has the strongest effect.

"I see."

The Namek elder was a little surprised by Luther's directness, but he didn't feel Luther's malice and decided to satisfy Luther's purpose.

"Come here, kid."

The Namek elder said.

Luther obediently walked in front of the Namek elder. It was the first time he saw such a tall intelligent creature, especially when he knew that the other party was an alien.

That made him even more curious and full of shock.

The elder's hand pressed on Luther's head.

"I feel that you have terrible potential."

The elder said even more unexpectedly.

He could only activate part of this unprecedented huge potential.

"Really?"

Luther didn't think it was a big deal. The potential of Doomsday was not scary, but incredible. Especially since he hadn't used evolution once. If he had evolved, the potential would probably be even greater, right?

But Luther's personality is to plan before acting, and he would rather attack by surprise than head-on. He turned Doomsday into a life-saving resurrection armor.

Then the Great Elder began to stimulate Luther's potential.

Luther felt as if something was caught in his body, just like a fish biting a hook, but the difference was that this fish was as big as a Kun, and the Great Elder's hook almost broke.

When he finally succeeded in catching it, the Great Elder felt as if he was going to die.

The difference was that Luther felt that his whole body was bursting with power, and the power surged out from his limbs!

"Ahhhhhhhhh!!!"

Luther's breath instantly suppressed and covered Neru's breath, making Neru show a fearful expression, and then blocked in front of the Great Elder.

"What is my current combat power?"

Luther didn't know the answer. His breath completely suppressed Neru, but the combat power gap was 1.5 times, which was a complete crushing in the Dragon Ball world, so his current combat power was at least 60,000 or more?

Then Luther used the bio-force field to completely restrain his energy, and even the combat power detector probably couldn't detect Luther's combat power.

After all, when the combat power detector was used to detect the future Trunks, the combat power was also very low.

"Thank you, Great Elder. I owe Namek a favor. If there is any crisis in the future, you can send someone to Earth to find me. My name is Luther..."
