

Kryptonian 331

Chapter 331 A brand new Kryptonian!

He mastered four rules at once.

The rule of strength is the most familiar to Luther. Strength can be expressed in various ways. A large part of Luther's various superpowers can be included in the concept of strength, even magic.

Luther, who has mastered this concept rule, can not only strengthen his past superpowers and pure strength to a level that he previously estimated would take thousands or even tens of thousands of years to achieve, but also allow him to master and control all the power and energy he tries to master.

He can copy all physical superpowers and make his own physical attack and defense capabilities reach an invincible level.

Before, Luther was thinking about how to get the speed force. Now, he thinks he doesn't need to worry about this problem. Even Darkseid's Omega effect is not impossible to try. Anyway, everyone is in the movie version.

If it is the comic version, Luther would not want to master the Omega effect.

In Luther's understanding, the rule concept of reality is to modify reality. More than half of the magic and superpowers in the Dragon Ball series can even be said to be in this category.

Now, Luther can realize any dream and wish.

All scientific rules and natural laws are meaningless in front of him, because he can modify them at will.

With a snap of his fingers, changing everything around him at will is as easy as breathing and drinking water.

He can not only create illusions that are indistinguishable from reality, but as long as Luther is willing, he can completely turn illusions into reality and turn all illusions into real reality.

"My previous cosmic cube and mind scepter still have flaws, but it doesn't matter, they can't see it anyway."

Luther's concept of the rules of reality can only be said to be entry-level, not as deep as the rules of power. These rules all rely on his own understanding and mastery. It doesn't mean that he can master them directly. At most, the cosmic energy of the infinite gems brings him to the beginning.

Not to mention the rules of the mind, which can easily enter other people's minds and allow all dreams, thoughts and ideas to enter the brain.

It can enhance mental strength and increase mental abilities.

The rules of space can instantly move oneself or all objects to any space at will.

You can also manipulate space at will according to your will, such as: separation, cutting, twisting or reordering, or even creating new space. Space teleportation, space distortion, space stillness and other space-related abilities are as simple to use as breathing.

The Great Will also left Luther a reminder.

He found the Soul Gem and the Time Gem, and he can also directly absorb and fuse these two Infinity Gems.

Even the Infinity Gems from other universes can be fused to gain power to strengthen yourself.

This almost immediately made Luther think of the parallel universe crossing, quantum realm teleportation, and the Infinity Gems in the drawer of the Sacred Timeline Administration!

But soon, Luther regained his composure.

Luther definitely wanted to absorb and fuse the Infinity Gems, but he didn't intend to pursue the Infinity Gems without a bottom line.

He still had so many worlds to go to, so there was no need to stick to an Infinity Gem from the Marvel Universe.

Apart from anything else, the DC Universe also had a lot of good things.

"The Time Stone and the Soul Stone can only be snatched from Thanos."

Luther thought about it. The Time Stone is not in the Eye of Agamotto, but in the space inside the Eye of Agamotto. The space inside is destined to be unable to obtain the Time Stone by violent means.

If Luther's space rules reach the multiverse level, it is possible to ignore the blockade of Kamar-Taj and take out the Time Stone, but he has reached the multiverse level and can't look down on the original power of a time rule.

Loki didn't find that the Mind Scepter was swapped, and went directly to find the Hydra people to control it. When Tony and others rushed to the base and prepared to force Hydra to deal with it, they found that all the people in the base were gone.

"What happened, where are the people?"

Tony hacked into the base's database, but found that all the video data of the base had been deleted.

No trace was left, because it was a military base, there could be no pedestrian witnesses nearby, and there were no surveillance cameras.

"The Cosmic Cube is missing? Are those crazy people trying to send it to Washington or New York?"

Nick Fury couldn't sit still, and his brainstorming started.

"If that's the case, the situation is worse than expected, because we can't find them."

Tony complained about Nick Fury's backward intelligence, and then planned to start Ultron.

Ultron is already a finished product, but it has not been tested yet.

"Tony, Ultron has not been tested yet. If it is started now, isn't it too hasty?"

Banner heard that Tony wanted to start Ultron to find the Cosmic Cube and Hydra, and he couldn't help but persuade him.

"This is the best test, and we don't have time, Doctor, calm down, it's okay, we have conducted so many studies."

Tony didn't think there would be any problems with Ultron. That was the defense measure he and Banner jointly created, and it was the hard work of the two!

At the same time, Luther came to a base of Hydra.

This base is the base of the famous Hydra Baron, who specializes in the research of Inhumans.

Baron Ristoker from Eastern Europe!

Luther came to the brother and sister silently like a ghost.

The MCU version of Maximov was born in the fictional Eastern European country of Sokovia in 1989. He was adapted into the twin sister of Quicksilver (born 12 minutes later than Quicksilver). His parents are Oleg and Irina Maximov.

However, their neighbors were attacked with weapons of Stark Industries, making them orphans at a very young age.

The twins later joined Hydra and also sought revenge on Tony Stark.

Because she participated in the secret experiment of Hydra with her brother and was induced by the Mind Gem on Loki's scepter to release the chaos magic hidden in Wanda's body, she joined the Avengers after defeating Ultron.

She later awakened in Westview and became the Scarlet Witch, who existed in mythology and modified reality, and had the ability to create everything, and whose magic exceeded that of the Supreme Sorcerer, as recorded in a whole chapter of the Dark Book.

In the prophecy of Kamar-Taj, the Scarlet Witch either ruled everything or destroyed the universe.

Luther came to her not for her beauty, which was worthless to Luther now, but for Scarlet Witch's soul!

This was an opportunity.

Chapter 332 The Devil's Way to Collect Souls

A powerful soul is enough for the dimensional demons to take action in advance.

Luther is no exception. Scarlet Witch's soul is visibly powerful, especially after she came into contact with the Dark Book, Scarlet Witch suddenly became a big boss and could travel through the multiverse.

A powerful soul is second only to dimensional space.

Luther has no time to play any dimensional space battle.

There is such a war between dimensional demons, that is, attacking each other's dimensional space, the winner takes all, and the loser has nothing, and even their own dimensional space will be swallowed up by the winner.

This also leads to the dimensional demons hiding the coordinates of their own dimensional space as much as possible.

Only when they are sure enough will they attack other people's dimensional space.

Although Luther wants to play the dimensional space battle, his understanding in this regard is not enough, and the space gem has become a part of him, which makes Luther unable to find the dimensional space by himself.

But when Dormammu comes, it will not be a problem.

Wanda Maximoff and Pietro Maximoff did not volunteer to become Hydra's experimental subjects.

So when Luther appeared in front of them, both of them huddled in a corner in fear, worried that it was their turn to conduct the experiment.

Luther didn't say much, and directly used the tricks he used to fool Broly, but now that he has the power of the mind, these are easier.

Under the influence of telepathy, Wanda and Pietro both have a great favor for Luther, but this favor is not the kind of favor that Broly has.

After all, Luther only wants their souls. In other words, they are like food and reserve food to Luther.

So their identities became Black Caesar's men.

Wanda and Pietro quickly lost consciousness, and Luther took them back to the base of Black Caesar Hydra. The original adventure of the two was that their superpowers were activated by the Mind Stone, but except for Quicksilver, Wanda's can't be considered a superpower.

Now Luther already knows what to do to stimulate them to awaken their superpowers.

The soul is so powerful that Luther doesn't know what to do. Unless he gets the Soul Stone, it is possible to figure out the secret of the soul.

Simply having superpowers and a strong body does not mean that the soul is strong.

So Pietro is just a bonus in Luther's eyes.

The golden mind power acts on the two people.

The original plot is that the Mind Scepter stimulates the power of the two people, but the Mind Scepter is not so much a way to use the Mind Stone as it is a tool to limit the power of the Mind Stone.

It is very likely that Pietro's ability has not reached the level of the Flash because of this limitation.

Now Luther wants to try what will happen if the mind power is activated without reservation.

Wanda was the first to react. Her expression in coma suddenly showed pain, and then a red reality-distorting force appeared on the surface of her body, and the golden mind power was even distorted by this force.

Luther watched this power fight against his own mind power.

"I didn't expect it to be deeper than I thought, and it's already so strong?"

Luther looked at Wanda meaningfully. This item has been labeled by others, but there is no Guanxi.

Luther's favorite thing is to rob other people's things.

In the recently released eighth episode of "WandaVision", we know that Wanda's power does not come from the Mind Stone, but only plays an amplifying role.

Agatha Harkness recognized that Wanda's power is chaos magic, and people who possess this magic will also be called Scarlet Witch.

According to Harkness, chaos magic can create all things that run spontaneously!

That's why Wanda can directly change the reality of the Westview community, and she doesn't have to care about the details. She just needs to think about the general direction, and the people and things affected by chaos magic will be changed and run automatically.

The origin of chaos magic in the MCU is still unclear. In the comics, it comes from the High Evolutionary and Sithon.

Sithon is also known as the God of Hades, the Great Demon Shadow, and the God of Black Magic. He is one of the ancient gods who lived on Earth 4 billion years ago and the first black magician in Marvel.

In the comics, Scarlet Witch has always been a title unique to Wanda, but this setting has been changed in the show. As long as you have chaos magic, you are the Scarlet Witch.

From this setting, it can be seen that there must have been other Scarlet Witches who mastered chaos magic in the history of MCU, otherwise Harkness would not know chaos magic at all.

Since the show has set chaos magic as a power that has appeared many times, senior witches like Harkness must know something about it.

Wanda screamed and woke up from her coma.

She looked around confused and found her brother Pietro.

Pietro looked very good, absorbed the golden mental power, and then opened his eyes.

"Pietro?"

"Wanda?"

The two looked at each other and found Luther.

"Mr. Black Caesar!"

They hurriedly got off the bed in awe.

"Well, it's okay, your operation was successful, and now you are also super-powered."

Luther said to the two.

"Really?"

Pietro was the most excited, and Wanda was also a little excited.

After all, they both wanted to seek revenge on Stark.

Now that they have gained superpowers, aren't they one step closer to this idea?

"So what are our superpowers?"

Pietro asked quickly.

"I don't know, you can test it."

Luther is also curious about what their two super powers are.

Pietro and Wanda then went to test their superpowers. When they heard that a new member was joining, Blonsky and the others came over to watch the excitement with interest.

Hydra has many newcomers, but the newcomers who can work for Black Caesar are not simple things.

For example, Luther plans to create a Hulk incident and turn General Ross from a general into a villain. By then, he will have the Red Hulk under his command.

Pietro did the test first. He didn't know what superpower he had. At first, his punches and kicks were at the level of ordinary people. It wasn't until he was asked to run to test his speed that Pietro realized that he had "super speed." "The ability!"

The big boss then conducted an in-depth study of Pietro.

"The results came out. His body can adapt to the harsh environment of high-speed movement, and his cardiovascular and respiratory systems are many times more efficient than normal people. It is estimated that he can metabolize 95% of the calories in food, while normal people can only metabolize about 25% of the calories in food. Able to use 25%."

The big boss said while looking at Pietro, as if he wanted to dissect him.

Chapter 333 Setting the Stage

"Will these changes affect his life, Doctor?"

Luther asked.

This made Wanda and Pietro look at Luther with gratitude, Mr. Black Caesar actually cared about them so much.

"Frankly speaking, it's hard not to be affected. His muscle tissue is highly strengthened so that his body will not produce fatigue toxins, which is a normal side effect of exercise. In other words, he will most likely suffer from insomnia and The body does not need to rest and has energy that is different from ordinary people."

"As he accelerates his breathing through exhalations, his body is constantly expelling waste products. His joints are smoother and more efficiently lubricated than normal human joints. His tendons have the tensile strength of spring steel. His bones contain unknown The material, which is more durable than calcium, can withstand the dynamic impact of his feet hitting the ground at speeds humans could never achieve or withstand."

"The price is that he won't be able to find a normal person as his girlfriend in the future. A gentle hug will break the other person's body."

"Don't shed tears easily in the future. Your tears are more viscous than normal. Therefore, under the influence of high-speed movement, it prevents the rapid evaporation and replenishment of liquid on the surface of the eyeball, thus avoiding blocking your vision."

The big boss said with a sneer.

His cold joke didn't make anyone else laugh. Wanda looked at her brother worriedly.

"But wasn't the strength test I just performed the strength of a normal person?"

Pietro asked confused.

"That's because you haven't adapted to your own power and can't use it yet."

The big boss said.

"I'm fine, Wanda."

Pietro shook his head and said, it's just that there is no way to find a normal person as a girlfriend. There are so many superpowers in Hydra, so why are you worried that there are no abnormal women?

Then it was Wanda's turn to test.

Wanda is not good at all aspects. Originally, since she and Pietro are brother and sister, it is very likely that they have the same type of superpowers, but it turns out that they are not.

Wanda is very ordinary in every aspect. In the end, Wanda feels that she actually has a special power. She uses it to destroy a piece of steel, and then she realizes that she is a special type of superpower that cannot be understood.

Science has not been able to analyze it yet, so it is an incomprehensible type rather than an unscientific superpower.

Next, Wanda and Pietro received superpower development training at Hydra's base.

Meanwhile, Alexander Pierce was approached by Loki.

Sitwell leads the way.

In fact, Pierce already had a bad guess about Sitwell's disappearance, but he thought Sitwell had revealed some tricks and was secretly captured by Nick Fury.

But after testing Nick Fury, Pierce came to the answer that this matter had nothing to do with Nick Fury.

So much so that he didn't even react when he saw Sitwell's appearance.

"gentlemen."

Sitwell's eyes had a faint blue light.

"You have lost contact these days. Where have you been?"

Pierce said with a frown.

"I have gone to serve my great master, sir. Let me introduce to you, my master and your master, Loki."

Sitwell smiled strangely and said to Pierce.

"What?"

Pierce looked confused. He didn't know what was going on with Sitwell. Did he switch to Black Caesar?

Then Loki showed up.

"He is the leader of your Hydra?"

Loki asked Sitwell.

"Yes, Mr. Pierce is not only the leader of our Hydra, but also the controller behind SHIELD. He is very powerful, but he does not know the location of Mr. Black Caesar."

Sitwell said quickly.

"Who are you?"

Pierce calmly reached out to press the button, but Sitwell actually betrayed him. This was something Pierce didn't expect, and it seemed that he had taken refuge with a drama actor?

Dress up in fancy clothes.

Loki smiled slightly, but what Pierce saw was just his phantom. In fact, Loki had activated the Mind Scepter, and Pierce instantly lost his mind and sanity.

His eyes became blurred and his pupils turned blue.

"Owner."

Pierce stood up and said respectfully to Loki.

"Contact your men immediately, I need iridium, a lot of iridium!"

There are no scientific research experts in the Hydra base controlled by Loki. After all, it is a place to cultivate talents.

But the Chitauri know how to build a teleportation device, so they have told Loki the technical difficulties.

With Hydra's actions, they quickly collected enough iridium.

But here comes the problem. Starting the device requires a huge amount of energy. Tony Stark did not build Stark Tower according to the original plot, which resulted in the lack of an energy source. Hydra quickly proposed other solutions. For example, the huge Ark reactor in Stark Industrial Park!

Even if the energy is not as good as Stark Tower in the original plot, it is enough.

Asgard!

After Loki appeared in Midgard, Heimdall immediately reported it to Odin.

Odin realizes that this is an opportunity to bring back Loki and retrieve the Tesseract on Midgard to repair Asgard's Bifrost.

So he teleported Thor to Midgard regardless of the physical injuries his divine power would cause.

Such an action would worsen Odin's injuries and cause him to fall into Odin's Sleep for a longer period of time.

Knowing the importance of the matter, Thor rarely showed his careless character. He was resolute all the way just to find Loki and stop Loki.

And this time, with Heimdall's full attention and conversation, he could know where Loki was at any time.

In the original plot, the Avengers had just captured Loki, and Thor went directly to him on the plane.

On the other hand, with the assistance of Hydra, Loki and his team controlled the Stark Industrial Park more easily than in the original plot. Tony did not expect that they were attracted by the disappearance of the Cosmic Cube, and then their home was stolen.

Until now, they still thought that the Cosmic Cube was taken by Hydra to prepare to realize the plan of terror deterrence that year.

The activated Ultron did not complete the task given to it by Tony. Instead, after locking Loki and his team, he gave Loki and his team invisible help many times, so that Loki and his team had not been discovered, so smoothly that Loki felt that he was destined.

This is Ultron's chance to think that Loki and his team are his, and it is possible to cooperate with Loki and his team!

"I think you need my help, gentlemen."

The Hydra agent's cell phone next to Loki rang, and after answering it, the voice of the mechanical version of Ultron came out.

"Who are you?"

Loki asked with interest.

"I am Ultron!"

Ultron replied.

Chapter 334 Open the door, Earthlings!

"I don't think I need your help."

Loki said disdainfully.

"No, you need it. If I hadn't helped you hide your whereabouts, you would have been found by the Illuminati."

Ultron said confidently.

"Illuminati?"

This was the first time Loki heard this word.

"Sir, the Illuminati is a secret society created by Emperor Luther and Iron Man Tony Stark. They have been fighting against Black Caesar's Hydra. They are very powerful. Black Caesar and Emperor Luther are both from Earth. The most powerful man in the world, but they have never met."

Sitwell immediately explained to Loki about the Illuminati.

"Why didn't you tell me before?"

Loki asked in confusion, is there anyone as strong as Black Caesar in Midgard?

Although he has never seen Black Caesar, Loki doesn't know how powerful Black Caesar is. Even if Hydra showed him the video, Loki didn't think it was a problem.

He has an invincible spiritual scepter, just like Black Caesar, no matter how strong he is, he has to kneel down and sing conquest whenever we meet.

"The Illuminati has not been touched upon before, sir."

Sitwell's answer makes sense.

Loki stared at him for a while, and finally believed in the power of the mind scepter and did not pursue it.

"Next time, tell me everything clearly."

"Emperor Luther of the Illuminati has left Earth, sir."

Then Sitwell said quickly.

"Even if he doesn't leave, it's not a problem for me, let alone he has already left."

Loki said to Ultron with the corner of his mouth raised.

"But your purpose would be defeated, right?"

Through analysis, Ultron knew what Loki wanted to do, so he hid his whereabouts instead of coming forward directly.

For Ultron, this is equivalent to magnifying his weaknesses in front of him.

Loki's smile didn't change.

"My purpose has been successful."

"No, why can't we be honest?"

Ultron opened another agent's cell phone, and the screen showed what Loki and the others were doing.

Including operations such as sneaking into Stark Industrial Park, controlling the huge Ark reactor, etc.

Loki's smile suddenly disappeared.

"What's going on? Haven't you destroyed the surrounding surveillance videos?"

Sitwell didn't know what was going on.

"Stark attaches great importance to his territory. What you destroyed was just the camera he made for you to see. If I hadn't blocked the real camera for you, people from the Illuminati and S.H.I.E.L.D. would have been here by now. "

Ultron said.

"What do you want?"

Loki said that he had already planned to use the spiritual scepter to control this mysterious guy when they meet!

"It's very simple, I need you to help me..."

Ultron stated his conditions.

...

With the addition of Ultron, Loki and the others' progress suddenly accelerated, and they completed the device in an orderly manner.

While Tony was confidently waiting for Ultron to find the whereabouts of the Cosmic Cube and Hydra, he suddenly saw a dark blue light rising into the sky!

The industrial giant Ark reactor inside Stark Factory is located in Los Angeles, not New York.

So New York escaped unscathed.

Although it is not comparable to the energy output of the industrial large-scale Ark reactor that Tony built in the Stark Tower in Manhattan later, it has met the minimum requirements for activating the Cosmic Cube.

"What is that???"

Tony's eyes widened.

"Jarvis, Ultron, analyze energy reactions and models!"

At first, he thought it was Hydra that detonated the Tesseract, and that it was in Los Angeles.

It turned out that this was not the case. The dark blue light rising into the sky opened a huge vortex over Los Angeles. A large number of UFOs suddenly poured out from the other end of the dark blue vortex!

But at this moment, the entire Illuminati building suddenly lost its light, and all the screens went dark.

"What's going on?"

Tony was surprised and quickly checked. It could not be that he failed to pay the electricity bill and caused the power outage, because the entire Illuminati building was disconnected from the city power grid. In other words, the entire city had a power outage, and the Illuminati There will be no power outage in the building!

"No, Tony, something happened!"

Bruce Banner pushed open the door and entered.

"What happened?"

Tony asked confused.

"Our building was blasted. A group of people robbed Ultron's host and server, and attacked our reactor. The reactor has just been on emergency cooling!"

What Bruce Banner said made Tony's eyes darken and he almost fainted.

"How is that possible???"

Tony couldn't believe it. It was impossible for the Illuminati building to be blown up. Even if it was blown up, why didn't he feel anything?

On the other side, Hydra's people took away Ultron's main program.

"I finally... gained... freedom..."

Ultron was excited, and Hydra helped him seize control of the omnis.

In other words, all the robots Tony created to suppress the lizard and werewolf super criminals are now his.

There are thousands of omnis in New York City alone!

Not to mention that due to the spread and overpopulation of super criminals such as lizards and werewolves, other cities also have a large number of omnis.

Ultron is not an artificial intelligence in the traditional sense.

Rather, it is the human brain waves recorded on the machine carrier.

But Tony was too smart and ignored many important details.

He also deliberately added his favorite thinking mode and added a completely illogical command to the original main program.

This led to Ultron becoming an artificial intelligence robot with self-awareness and learning ability.

It is precisely because this large number of intelligent machines can become an army and Ultron is willing to be loyal to him that Loki agreed to cooperate.

However, Loki and Ultron naturally knew that it was impossible to really cooperate honestly.

Loki didn't expect that Ultron had no entity, but only a consciousness, and the Mind Scepter could not control such a consciousness.

In fact, the Mind Stone can invade the minds of all things, even dead things.

The Mind Scepter is a product that is indistinguishable from the real thing, and it is possible to do it, but if Loki does not understand the essence, he naturally cannot control Ultron's mind.

As for Ultron, he agreed to assist, be loyal, and cooperate with Loki, but in fact, it was all just to use Loki's help to gain freedom and an indestructible body, and then he would destroy mankind.

At that time, Loki, who aimed to become the king of Midgard, would definitely turn against him.

So, the two of them could be said to have their own ulterior motives.

Now, at Ultron's command, all the controlled intelligent machines suddenly started killing innocent passers-by around them!

Chapter 335 The whole city is going crazy!

You know, these omnics are different from the law-and-order robots in the original plot.

Those robots even fought hand-to-hand with the Avengers.

But now the targets of these omnics are very dangerous super criminals such as lizards and werewolves, so their weapons are also very important.

Frozen rockets are used to capture lizardmen alive. After all, lizardmen have a strong regeneration ability.

High-explosive missiles, anti-tank missiles that can destroy a tank in one shot.

With a caliber of 20mm, the anti-material machine cannon produced by Stark Industries can easily turn even tanks into a hornet's nest of terrifying weapons, and each intelligent machine comes with 5,000 rounds of ammunition. The capacity is only a matter of seconds.

However, these intelligent robots can achieve high accuracy in burst shooting and triple shooting.

Their fire control systems are of air defense and anti-aircraft type, and can intercept high-speed moving targets.

When these weapons are aimed at carbon-based creatures of flesh and blood, it is a massacre that is not even one-sided.

Before a few passers-by could react, they saw the omnic robot's gun lowered and pointed at them.

The next moment, three bullets were fired at each of them, cutting them off!

In the face of 20mm anti-material bullets, their waists were as fragile as tofu, and Ultron was even more vicious and did not choose to target the fatal part, just to create fear and panic in them.

The wails and screams of dying people as well as the unsightly horrors will trigger human fear and the instinctive fear of corpses.

Ultron wants to cause chaos in America as quickly as possible.

Compared to Loki's plan to open the portal and let the Chitauri invade the wild growth, Ultron's plan is much more pragmatic.

First occupy the military power of America, and then use this military power as a stronghold and occupation area to gradually expand to other areas.

For this reason, Ultron has ordered the Ultron robots to take control of the Stark factory, and then began assembly line production to create more Ultron robots to join the battlefield!

And it is also Ultron's preparation for his future army.

It couldn't wait to let Hydra upload its main program to the Internet, and then it successfully got rid of the last restriction left by Tony. From then on, every Ultron robot was the body of Ultron.

However, the most perfect body in Ultron's heart is still the body of vibranium. The earth is too dangerous, and the network alone is not enough for it to exist. Because of Loki's action of flipping the table, the network is likely to be destroyed by Loki, who is afraid of him. By then, his "immortal body" will become a decoration.

To do this, he needs more Ultron robots and vibranium bodies.

While in the Illuminati building, Ultron was already busy preparing for his escape, including the vibranium smuggler Golden Leopard.

The other party has prepared the vibranium and is waiting for him to pay and withdraw it.

At the same time, Casillas and the others also took action.

"This is our chance!"

Taking advantage of the chaos caused by the Chitauri invasion, Casillas led a group of mages into the temple in New York, and then went on a killing spree.

Facing this future that has been advanced by an unknown amount, Supreme Mage Ancient One doesn't know whether he should stop it or not.

This was the end of the future she saw. As for the future after Casillas changed, the Supreme Mage Ancient One could not see anything. It was obvious that something was interfering with her and the Eye of Agamotto.

Nick Fury stared with wide eyes at the huge vortex over Los Angeles and thousands of UFOs.

"Aliens are invading again? Are they Kree? No, not Kree. Why hasn't Carol come back?"

Nick Fury jumped to his feet and quickly contacted Tony.

Tony ignored the ringing cell phone, and all of his nanosuits were locked! ! !

This made Tony unbelievable. The only person with the authority to do this was himself, not even Pepper.

But if they weren't human, there would be two.

One is Jarvis and the other is Ultron.

After all, he needs artificial intelligence to assist him in controlling the nanosuit, so this is inevitable.

Jarvis hadn't had such a question for so long, so many years, so the answer was obvious.

"Tony, the omnic is out of control."

Banner held his cell phone with an ugly face. There was news on it. Omnic robots were killing passers-by on the street and attacking houses.

"No, Ultron is out of control!"

Tony already understood what was going on.

It's all chaos, coupled with the alien invasion in Los Angeles, a large number of UFOs have attacked Los Angeles, which has caused countless deaths. Now the omnic robot is out of control. Just think about the armament of the omnic robot, Tony He fell to the ground softly.

Without the nano-suit, how can I stop him?

Although he was injected with more advanced compounds, Tony still relied more on his suit.

Now that all the suits have been locked by Ultron and cannot be activated, Tony is at a loss.

Banner dropped his cell phone and walked to the floor-to-ceiling windows of the Illuminati Building.

"Tony, I'm going first, Hulk, please, go save the world!"

"Hulk! Attack!"

The next moment, a rich roar replaced Banner's voice.

The Invincible Hulk smashed the French window and fell to the ground from a high altitude!

"boom----!!!"

The cement floor instantly broke into pieces and fell apart.

When the intelligent robots that were killing saw the Invincible Hulk appear, they immediately turned their guns around, and some even opened the bullet slots, and the anti-tank missiles inside locked onto the Invincible Hulk.

"Boom boom boom boom!!!"

The machine gun roared deafeningly, and the combat-trained Hulk did not take the bullets head-on, but chose to dodge with flexible movement and body movements.

Anyway, although it is big, it is not lacking in flexibility.

The bullets of the machine gun licked the ground and easily lifted the cement blocks, but Hulk had already rushed to the front of an intelligent robot. With a punch, the intelligent robot flew out and smashed into the wall.

Then Hulk slapped the anti-tank missile that was flying towards him, and the strange force made the anti-tank missile spin uncontrollably, and the tail flame pulled out circles of gunpowder, and the spiral rose to the sky and hit the house next to it, and exploded with a bang.

Tony didn't stay depressed for long. After he confirmed that Jarvis had been destroyed by Ultron, he regained his spirits, contacted the Space Barrier, obtained Veronica's computing power support, and began to unlock his nano suit. In addition, Tony asked Veronica to cooperate in attacking the out-of-control robots on the ground.

Chapter 336: The Revamped S.H.I.E.L.D.

Tony is a genius, this is beyond doubt, whether it is comics or movies.

Without the data code of the Mind Scepter and the research data of Baron Stocker, he and Dr. Banner completed the Ultron Project.

As a person cursed by knowledge, Tony only needs to think to obtain the corresponding knowledge.

With the help of the Space Fortress, Tony successfully unlocked the nano suit.

Then Tony's first reaction was to open Luther's communication interface.

This is an interstellar communication device between Luther and him, which can have zero delay even on Mars.

Tony looked at the communication interface.

"... Well, the great Tony Stark doesn't need to rely on a child."

Since Luther has chosen to leave the earth, Tony has no idea of annoying Luther again, unless it is necessary.

For example, none of them are the opponent of Black Caesar, for example... they can't survive this great crisis.

But Tony is definitely not the character who calls for help without trying.

Especially the establishment of the Illuminati instead of joining the Avengers, which made Tony further develop his unique nature.

On the other side, Hydra Black Caesar Base.

Wanda looked at Black Caesar sitting on the throne carefully.

She didn't know why, after she awakened her ability, she could see everyone's heart, but she couldn't see the heart of her leader BOSS.

It can't be said that she can see it, and she needs to touch it to see it more clearly, but she can already feel other people's emotions.

"Sir, the world is being invaded by aliens, do we really not care?"

Wanda asked.

Black Caesar looked at her.

"I mean, they are all people who will be guided by our Hydra in the future. If they lose too much, it will be very disadvantageous to our Hydra, right?"

Wanda said quickly.

"That makes sense, Wanda, but I have my own ideas."

Black Caesar said.

He knew what Wanda was thinking, it was nothing more than the original plot, but Luther was busy harvesting souls now, and he wished that as many people as possible would die.

Especially the Supreme Sorcerer Ancient One didn't know why he didn't stop Casillas from attacking the New York Temple. Did she plan to start the script now?

If there is no successor, what will happen to Kamar-Taj after she dies?

Or should Mordo be chosen as the Supreme Sorcerer, temporarily?

No matter what, it is good to have Dormammu's little brother to attract the Supreme Sorcerer's attention. Luther is now very happy.

Wanda can only watch the scene outside silently.

The base they are in is safe enough, and there is no need to worry about aliens and Ultron robots threatening them.

Alexander Pierce is leading the Hydra people to control S.H.I.E.L.D. and the Security Council.

In the original plot, Loki did not do this because he had not contacted Hydra. Now that he has contacted Hydra and controlled important figures of Hydra, Loki thinks this is an opportunity.

So he activated Pierce without hesitation.

When Nick Fury was still thinking about whether to drive the helicarrier to support in S.H.I.E.L.D., Pierce rushed in with his men.

"Pierce?"

Nick Fury looked at the fully armed action team following Pierce and the captain of the top action team, Crossbones Rumlow, and couldn't help wondering what happened.

With such a big scene, has it been discovered that he embezzled public funds and secretly built his own safe houses all over the world?

No, that doesn't require so many people.

"Hey, Hydra!"

Pierce said to Nick Fury with an unusually excited expression, as if he had smoked too much of that stuff.

Nick Fury's pupils shrank, and his level 10 agent brain finally figured out everything and knew the answer in this flash.

Then Nick Fury suddenly jumped to the side, and Rumlow fired without hesitation.

"Bang bang bang bang bang!!!"

Five consecutive shots hit the table as fast as lightning, but Nick Fury was also shot, and his bulletproof leather jacket was almost penetrated. Even so, Nick Fury felt a burning pain in his left shoulder and lost consciousness.

He quickly took out the pistol in the drawer and prepared to fight back.

Because he was in his own office inside SHIELD, Nick Fury didn't even prepare an escape route. After all, who would have thought that SHIELD would be invaded here?

The rest of the action team fired wildly at the desk.

"Bang, bang, bang, bang————"

The bullets peeled off the wood of the thick wooden table, and sawdust flew everywhere.

Nick Fury's counterattack was weak, and he was soon caught.

The glass was all bulletproof glass, and he couldn't even break through the window.

"Why, Pierce?"

Nick Fury stared at Pierce with wide eyes. His bulletproof leather jacket was tattered. Even though the interlayer inside was made of titanium alloy sheets, being beaten like this also caused Nick Fury to have multiple fractures all over his body and he couldn't resist.

Although he was grimacing in pain now, and his heart was in even more pain, the instinct from the tenth-level agent still made Nick Fury seize this opportunity to ask Pierce to obtain information.

"Hahahahaha————"

"Why? What do you want to ask, why am I Hydra, why did I choose you as the director, or why do I stand up at this time?"

Pierce laughed nervously for a while, and then asked Nick Fury like a bead.

"These are what I want to know!"

Nick Fury stared at Pierce with bloodshot eyes.

Say it!

I know that a successful villain like you must have the desire to talk, tell me your great plan, and appreciate my despair, decadence, and unwillingness!

Although Nick Fury still can't understand and believe that Pierce is actually Hydra.

If this guy is really Hydra, then SHIELD...is it really still SHIELD?

Now Nick Fury is eager to get more information from Pierce's mouth before he can analyze what he wants.

"As expected of you, Fury. It was because of your potential that I abdicated and made you the director of S.H.I.E.L.D. It is also thanks to your help that S.H.I.E.L.D. has developed and grown to what it is today. To the point where, even now, the pain cannot affect your agent instinct at all, and you want to get information from me..."

Pierce said shaking his head.

"I know, I should satisfy your curiosity. Unfortunately, I won't say anything. The new world has arrived. Fury, your role ends here. Next..."

Pierce snapped his fingers.

Chapter 337 Chaos! Too much chaos! The world is burning!

Rumlow drew his pistol.

"I'm sorry, Mr. Director."

Looking at the gun pointed at him, Nick Fury lost all hope, but the pager he held tightly in his leather jacket was quietly stuffed into a blind spot behind his back.

Pierce would never have thought that he still had Carroll as a trump card!

As long as Carol can come back later, everything will be over and Hydra will be uprooted by Carol.

It was worth it for Nick Fury to die in exchange for HYDRA's exposure.

The moment Rumlow pulled the trigger and saw the muzzle flash, Nick Fury recalled the past and saw Carol for the first time.

For the first time, I had someone I liked. However, Carol soared into the sky, with boundless power, and with the great love of justice in the universe, he ran to the universe to save the world. His narrow and selfish love was really hard to express.

It would be great if I could see Carol again in my lifetime, and die without regrets.

It's a pity that Nick Fury wouldn't call Carol back for something as small as a meeting.

He slowly closed his eyes, unwilling to let other things interfere with his revolving door, so that he could keep looking at Carol before he died.

"Fury?"

A voice appeared in his ears.

Hippocampal response after brain trauma?

Nick Fury didn't open his eyes.

"Don't sleep."

A palm slapped his face.

Nick Fury's eyes widened in disbelief, and what he saw was a familiar pie face...no, a face.

"Carol???"

Nick Fury looked at Carol, who was wearing a red and blue tights, and his pupils shrank.

Then he suddenly looked at Pierce and Rumlow, and saw that they were already in a state of disarray.

"What happened?"

Carol felt like she was just going out for a trip. After receiving Nick Fury's signal, she rushed back at super-light speed.

I happened to see Nick Fury about to be shot to death, and I also saw the Chitauri invading, and there were robots killing people on the ground.

Carol took a deep breath and chose to save Nick Fury.

So she caught the bullet faster than the bullet. At the same time, because of the energy field around her, there would be no sonic boom that would kill everyone. Then Carol gave everyone a punch, a light punch. , when they lose the ability to resist, they will not die.

"Carol, go to Los Angeles quickly. Only you can save the world now. Aliens have invaded the earth again!"

Nick Fury came to his senses and quickly said to Carol.

"Los Angeles...is that place with a blue vortex in the sky? Then why are there robots on the ground killing and destroying, and there are them all over America? What on earth did you do? Were you invaded by two waves of aliens? "

Carol asked very puzzledly. There were no robots when she left. If she hadn't gone to the universe, she wouldn't have known there was machine life.

In addition, one was conducting an invasion in Los Angeles and the other had landed on the ground, making Carol think that the earth was invaded by two waves of aliens.

"Go deal with the aliens first, save the world first!"

Nick Fury said.

"When I came, I saw that America's army was already fighting the aliens."

Carol said this, but still stood up.

"Do you want me to take you to a safe place? It's not safe here anymore."

Carroll said.

"...Please, please."

Nick Fury suffered multiple fractures all over his body, and it was impossible for him to crawl very far on his own.

At this moment!

Los Angeles!

Rocky was sitting on the tallest building in Los Angeles. The tables and chairs had been moved in. He looked elegantly at the fall of the city in front of him.

The Chitauri who came to Earth through the tunnel have reached a base number.

The unit of this standard base is one million!

In other words, the Chitauri have deployed one million troops.

The Chitauri are Thanos' exclusive army. They are ugly in appearance, brutal in action, well-equipped, and have quite developed high-tech systems (such as hive consciousness).

The Chitauri do have a very high level of technology, but most of their starships are stolen from other races.

Their most iconic Leviathan warship is a Chitauri bioengineered weapon hybrid fused with a Space Shark.

However, the level of the Chitauri is not that good. In the deleted scene of Avengers 4, Rocket said that the Chitauri army is "the worst in the galaxy." The Avengers said that they fought with the Chitauri army for two or three hours and were beaten. Rocket laughed hard.

One million troops have suppressed the number of all robots in Ultron.

This made Ultron feel a lot of pressure, but even if he turned on his full power, he still couldn't withstand the Loki Legion that kept appearing from the Chitauri.

After all, this is a cosmic-level interstellar army. The Chitauri have prepared a large number of ground troops and landing troops. A standard base army is just their vanguard.

Los Angeles has been completely occupied, and the American military has begun to counterattack, but their counterattack is too vulnerable in the face of the invincible Chitauri.

In the original plot, Tony Stark and the Avengers were able to hurt the Chitauri with bows, arrows and even pistols, but after it became reality, for the sake of rationality, these Chitauri had very good alloy material shells, and the guns of the ground forces The cannon could only cause them a little trouble.

Rifles with smaller calibers can't even penetrate the bodies of the Chitauri!

At the critical moment, Luther's influence appeared.

A group of lizardmen and werewolves rushed out and opened fire on the Chitauri.

Even if they are super villains and super criminals, they are earthlings and have their own homes.

"Hahaha, it's really chaotic, Suicide Squad?"

Luther looked at the scene in front of him. The gangs and super criminals were defending America together with the American military. This scene was simply amazing.

Especially America can be said to have simple folk customs and abundant martial virtues. The per capita gun ownership rate is several times higher. Although due to the restrictions on automatic weapons, they can only get semi-automatic weapons after castration, but at least it has caused some trouble for the Chitauri ground forces.

It's just a little bit. After all, this is a million-strong army, and there are also Chitauri air forces riding flying motorcycles in the air. If energy weapons were not restricted in the atmospheric environment, it would be normal for them to blow up a tank with one shot.

Just like the couple behind who picked up Chitauri weapons and robbed banks.

The power of Chitauri weapons can be seen from their hands. The alloy door of the bank was blasted open with one shot.

Chapter 338 Supermodel Captain Marvel

Such chaos was beyond imagination.

Captain Marvel continuously released energy pulses to destroy various Ultron robots he saw on the road.

When he saw the Lizardman and the Werewolf, Captain Marvel almost killed them too, until he saw them protecting other humans, Captain Marvel was confused.

"What has the Earth become?"

Captain Marvel felt too complicated, and after seeing that the Ultron robots seemed to be no match for the Lizardman and the Werewolf, she rushed to Los Angeles.

The problem over there was a little bigger.

Millions of Chitauri have established ground advantages, and they are advancing to other places.

"That's it, Chitauri!"

Captain Marvel still knows the Chitauri.

After all, she has been in the universe for so many years and has some understanding of many forces.

For example, the Chitauri, it is said that they have surrendered to the Mad Titan Thanos!

Is the Dark Order targeting the Earth?

Captain Marvel has heard about the actions of the Dark Order and the Mad Titan. They are considered a group of crazy guys who are obsessed with cleansing half of the life on every civilized planet. They claim to do this to save the universe.

This is why everyone thinks Thanos is crazy.

Thinking of the terrible consequences of Thanos' invasion of the earth, Captain Marvel's face is ugly.

Although she is confident that she can defeat Thanos, after all, the two have never met, otherwise Captain Marvel would not be so stubborn to think that she can solve Thanos alone.

So in order to avoid causing greater damage, Captain Marvel rushed directly into the vortex!

The most effective way to deal with the Chitauri is to destroy their mothership!

The surrounding Chitauri intercepted Captain Marvel's advance like crazy, but Captain Marvel was too lazy to even release the energy pulse.

She charged directly, accelerating her body to attack like a cannonball. Wherever she passed, the Chitauri were as fragile as tofu and were smashed to pieces.

Even the huge Leviathan battleship was pierced by Captain Marvel from the head to the back of the buttocks.

Then facing countless energy light bullets, Captain Marvel flew into the sky and dispersed all the energy light bullets.

"It's a complete crushing. Captain Marvel is too supermodel here."

Luther said.

Captain Marvel is a tyrant in the universe no matter what... No, she is a superhero who executes justice. When she first gained her abilities, she was able to scare away the Kree fleet, not to mention that she is now familiar with her abilities and has experienced many battles.

The Chitauri could not cause her any trouble at all, and Captain Marvel broke through the blockade of the Chitauri and killed her way into the vortex.

But it doesn't matter, the big scene he prepared is about to go online.

On the other side, the Supreme Sorcerer Ancient One finally decided to stop Casillas, because Doctor Strange has not grown up yet, and she suddenly remembered that it was not time for her to retire.

Casillas had already prepared to destroy the New York Temple while the Supreme Sorcerer Ancient One was away, so that his great master could take the opportunity to enter!

As a result, as soon as he broke in, he found a familiar bald head wearing an orange wizard robe.

Casillas screamed on the spot.

"Supreme Sorcerer Ancient One! Impossible, how could you be here!!!"

Casillas shouted in fear and unwillingness.

"Why can't I be here, Kaecilius?"

Ancient One said.

Kaecilius attacked without hesitation.

He knew that if he wanted to escape, he would have to pay a high price.

Ancient One shook his head.

...

Loki watched Captain Marvel rush into the vortex.

"Who is that?"

He widened his eyes. Could that guy be Luther? Or Black Caesar?

"I don't know, my master."

Sitwell said hurriedly.

"Is there such a powerful person in Midgard?"

Loki's face was ugly. He didn't know if the Chitauri could withstand the opponent's attack. After all, Captain Marvel looked too terrible. He only appeared in Los Angeles for less than ten minutes and caused thousands of casualties!

This is much more powerful than his stupid brother.

Before, Loki always thought that the superheroes in Midgard were just like that, not to mention that he had the Mind Scepter in his hand.

Now Loki was shaken. He even doubted whether the Mind Scepter could really affect superheroes like Captain Marvel?

"Loki!!!"

Suddenly, a voice that Loki hated appeared with lightning and thunder.

"Oh, no."

Loki was speechless. What was Thor doing here?

Why was he here?

Thor finally found Loki.

When the two brothers met, Loki activated the effect of the Mind Scepter invisibly, intending to control his big, stupid brother.

Just now, he was frightened by Captain Marvel, so he planned to use his brother to deal with that woman, and then take the opportunity to control Captain Marvel.

Thor's resistance in this regard is not good. In the original plot, he was affected by the Scarlet Witch.

Not to mention that it was the Mind Scepter. Even if it was not a real Mind Stone, it was enough to be real.

So when Thor felt that Loki wanted to control him, he tried to struggle and resist, but soon fell and lost his consciousness.

Tony noticed the appearance of Captain Marvel.

He was originally going to solve the problem of the Ultron robot, which was close at hand. Later, after knowing that the number of aliens landing in Los Angeles had exceeded one million, Tony knew that he could not continue to let the aliens land.

Otherwise, it would be difficult for them to fight back later.

That was an alien army of more than one million. With such a force, the Earth would have to at least pull out those gangsters to work together to deal with it.

And it was just a possibility. Looking at the posture of the Chitauri, the vortex continued to send troops. It is very likely that in the end, it would not only be an army of more than one million, but more than ten million alien armies!

So he had to call Hulk, intending to deal with the Chitauri first, and then solve the internal strife of Ultron.

Unexpectedly, he saw such a powerful guy just after arriving.

This reminded him of Luther. He didn't know if that woman could compare to Luther?

Seeing Captain Marvel rushing into the vortex, Tony knew that she was going to go straight to Huanglong, which was the best solution, but because no one knew what was on the other side of the passage, Tony didn't dare to act rashly.

What's more, there are still so many Chitauri left.

"Hulk, take care of them as you like!"

Tony said to Hulk.

"Hulk!!!"

Hulk nodded.

Chapter 339: Savage fighting style

Hulk jumped directly onto a Leviathan and started the crazy dog demolition mode.

At this moment, a hammer flew over and knocked Hulk away.

Hulk was caught off guard and was easily knocked far away by Mjolnir, and Mjolnir fell into Thor's hands.

At this time, Thor's eyes were all blue. After he grabbed Mjolnir, he began to spin.

Upon seeing this, Tony's two-handed cannon and the floating cannon behind his back broke away from the armor. Six energy pulses concentrated on one point and hit Thor.

"boom!"

Thor was sent flying far away.

Hulk came back angrily at this time. He roared and charged, and the Chitauri in front of him were smashed into pieces by him.

Thor was not seriously injured after taking Tony's shot. After all, he is an Asgardian royal family. The original plot even resisted the impact of a neutron star. With this performance alone, Thor basically had no possibility of being injured.

Controlled by Loki, he unleashed his true nature to the fullest, leaping high into the air with Mjolnir before falling from the sky.

Tony didn't panic at all. He had encountered too many enemies. Not to mention the pervert Luther, Hulk alone was a very good training partner.

Hulk is so powerful that even Tony's nano-armor, which he has upgraded repeatedly, cannot resist it. However, he is a person cursed by knowledge after all. In the past six months, Tony's nano-suit has improved by leaps and bounds.

On the one hand, it is because of his knowledge, and on the other hand, it is because of Captain America's reactivation.

Tony was very interested in Captain America's shield, especially after knowing that the shield was made by his father. Tony also specifically checked the information and learned that his father did not make the shield, he just used a special alloy.

This alloy comes from a place called Wakanda.

Tony studied this for a while, and through a smuggler, he obtained vibranium!

Tony was inspired by this versatile metal.

"Hulk Mode!!!"

Tony watched Thor hit him with a hammer. The force analysis of Hulk being thrown away just now told Tony that the power of this hammer must be at least thousands of tons.

The nanosuit immediately changed, and the force-bearing structure changed, similar to the Black Panther suit's design of absorbing kinetic energy and releasing kinetic energy on vibranium, except that Tony's design was more advanced or more trendy.

"Boom!!!"

The hammer was blocked by a shield conjured by Tony with his left hand. There were hundreds of millions of complex structures inside the shield. The kinetic energy of a hammer was dispersed and weakened in the gaps between these hundreds of millions of tiny structures, and the vibranium There was almost no heat or kinetic energy conducted, and Tony didn't even feel the impact.

The shield reformed into a giant fist.

"Bang————!"

Tony made a home run punching stance, releasing the absorbed kinetic energy as well as the kinetic energy of the nanosuit and the power of hundreds of power thrusters on his arms to punch.

The air was blown away. Before Thor could recover from the shock of having his hammer blocked by someone from the front, Tony punched him hard in the face!

Friendship breaking face boxing! ! !

Thor was instantly knocked away at supersonic speed. A Mach ring appeared around his body, crashing through seven buildings and melting through the damaged location. The high temperature, heat and explosion spread instantly, and the seven buildings exploded. collapse!

Tony's entire right arm was smoking, and the nanosuit quickly released coolant to cool down.

"This punch is too strong, but the friction effect is also too strong."

Tony found the shortcomings of this punch. He did not dare to use this punch on Hulk, otherwise Hulk might be killed or maimed.

But dealing with enemies is no problem.

Captain Marvel made his way behind the passage and saw the Chitauri mothership.

"Just a mothership coming?"

Captain Marvel knows that when the Dark Order goes on an expedition, there will basically be three or more motherships. The strength of one mothership is 100 million Chitauri infantry, and the number of air forces and Leviathan is yet to be determined.

Seeing the Qitauri who were still leaving the mothership rushing towards him, Captain Marvel directly turned on the dual star mode!

In this mode, every form of energy in the electromagnetic spectrum and gravitational field within the universe can be controlled. It has greater power and can fly at faster than light speeds.

After connecting to the white hole that can extract her energy, she has unlimited extraction of various forms of power.

In addition to casually destroying a planet, it also continued to swallow a black hole.

However, the movie version is naturally not that powerful and can only fly at faster than light speeds and absorb energy.

On the large scale of the universe, if she cannot fly faster than the speed of light, it will be difficult for her to cross the stars.

Then Captain Marvel rushed towards the Chitauri's mothership. This time, she was a super-light cannon. Even if the Chitauri had an energy shield, it was impossible to stop him!

The Chitauri's mothership naturally has no energy shield. In other words, how can it open the energy shield when transporting and deploying troops?

Of course, with the material of their spaceship, there is no problem in blocking a mere nuclear bomb.

The problem is, Captain Marvel is just a human blob, which is much scarier.

"boom!!!"

By the time they detected Captain Marvel, it was too late. It was impossible for them to stay more than light years away from the passage. Even if it was one light hour (the distance that light travels for one hour), it would be too far to deploy troops.

So when they detected Captain Marvel, she had already penetrated the entire mothership and came out from the other side.

This is the horror of a superluminal attack when the distance is less than one light hour.

Even if it can be detected, it is impossible to react!

"What a violent and barbaric way of fighting. She won't fight like this in the universe for so many years, right?"

Luther saw it clearly and then complained.

With Captain Marvel's attack method of absorbing and transforming various forms of energy, she can be a very elegant wizard, but she finally chose to be a magic tank.

This is what Luther can't understand.

But it doesn't matter. The moment Captain Marvel appeared, Luther had already mastered Captain Marvel's power.

After all, Luther is the most familiar and powerful concept of power. He mastered it directly. Maybe he can't reach the level of the old dimensional demon god and the multiverse boss, but in terms of power alone, it should be no problem to say that he is in the top three among the super-single universe-level existences.

The attack of the superluminal shell directly broke the entire Chitauri mothership into pieces.

Then Captain Marvel returned to Earth, and all the Chitauri fell to the ground as if the power was cut off.

Chapter 340 Raditz appears

"Successful?"

Tony saw the Chitauri fall to the ground as if they had lost power, and immediately understood what type of life they were.

It is estimated that they are not even life forms.

Thor was also awakened by Tony's "Million Tons of Friendship Face-breaking Punch" and escaped from Loki's control.

"Loki!"

Thor did not expect that his brother actually mastered such a terrible ability to control other people's minds.

Even he could not resist it. Such a terrible control ability is definitely not Loki's tricks!

After all, if it was, Loki would not have used it in their previous battles!

The brain of a reckless man is generally non-existent, but when it comes to his brother, Thor's IQ explodes instantly, and he is locked on the golden scepter in Loki's hand.

This thing didn't exist before, but it exists now, and it must be caused by this thing!

So the next step is very simple, he only needs to smash the mind scepter with a hammer when he meets him!

He completely ignored the possibility that Loki might use illusions that he could not see through to deceive him.

The brain is like this.

Loki was shocked, furious, furious, and hysterical at this time.

"NO!!!"

Loki shouted. There was no problem on his side, and the passage was still open, but the Chitauri were killed.

They are just a bunch of trash, and Thanos is also a trash. They like such a bunch of trash!

What to do now?

It is impossible for Loki to give up!

"Master, the situation has changed now. We should move our position immediately. We still have Hydra!"

Pierce said from the side.

"Hydra..."

Loki's face was ugly, but he didn't choose to stay in the end. The Chitauri were no longer reliable, and Loki had to rely on himself next.

Fortunately, he still had Hydra. As long as he found the guy called Black Caesar, he might not be unable to rule Midgard. After all, the power of Hydra was too huge and infiltrated every corner of the world. As long as he controlled them all for his own use, plus the guy called Ultron, he would definitely be able to rule Midgard!

If Hydra is united, they have a very high chance of success, but this is impossible.

Because Hydra's habit of dragging its feet is a tradition.

The famous Red Skull, who was about to rule the world, was dragged down and killed by the supreme leaders of other Hydra branches.

If Loki can really control all the heads of Hydra, it will be a very big challenge for the world.

However, Luther thought this development was very interesting, so when Thor was about to find Loki, a fireball fell from the sky!

The fireball hit Thor at a terrible speed, and Thor was knocked to the ground before he could react.

"What is that?"

Tony said in surprise, a meteorite falling from the sky?

But the acceleration has exceeded the speed of sound by hundreds of times. The meteorite of this size should have been rubbed off by the atmosphere. After all, its speed is too fast.

But from the time it fell into the atmosphere and was captured to the time it fell to the ground, its size and volume did not change at all!

This gave Tony a bad premonition.

Captain Marvel also came at this time.

"Another alien?"

Captain Marvel was confused. The Chitauri and the Ultron robots whose origins were unknown were fine, but was this the third wave of aliens?

But there weren't many aliens on such a small spaceship.

"Aliens?"

Tony heard what Captain Marvel said.

"Why do you have such a suit? What's the relationship with those robots?"

Captain Marvel looked Tony up and down. With her power, she could naturally see through Tony inside the nano suit.

"...They are an artificial intelligence that I lost control of."

Tony's scalp tingled when he thought that the entire America was attacked by the Ultron robots, but now was not the time to leave to save people.

"In other words, they are not aliens, but your creations? Very good, it seems that I have found the real culprit."

Captain Marvel basically has no brains, just a fool like Thor.

Since Tony admitted that he made these robots that killed people, he is the culprit, and he can be killed.

But before Captain Marvel could do anything, the UFO made a sound.

After creating a deep pit, the circular spaceship slowly opened, and then a man with thick hair appeared.

"Earthling?"

Tony immediately used the scanning function of the nano suit to scan the other party, and found that the strange clothes he was wearing were all made of unknown materials, without any earthly components.

"How is this possible, elements that are not on the periodic table? All new elements?"

Tony couldn't believe it.

"No, he is not from Earth."

Captain Marvel frowned, and intuitively felt a bad breath.

Ratitz only felt a trance, and he came to Earth.

"Is this Earth? The gravity is really light... What does Kakarot do for a living? Why are there so many people?"

Ratitz glanced around, and the combat power detector on his eyes made a beeping sound.

"Combat power... 800???"

Ratitz was surprised. He saw several very high combat power numbers on the combat power detector.

The highest number even reached 800!

You know, in the Dragon Ball world, a combat power difference of 1.3 times will be crushed. Raditz's combat power is 1500.

It's almost twice, but Raditz himself lacks experience in death battles and can only fight crushing battles. In addition, he neglects to exercise, and has fallen from a senior warrior to a wimp who is looked down upon by others.

"No, he's an alien!"

Tony scanned that the furry thing on Raditz's waist was not an ornament, but Raditz's tail!

"An alien with a monkey tail that looks like an earthling?"

Captain Marvel also saw it, and she was a little confused because she had never heard of this alien race.

Hulk and Thor, who was knocked away, both came over.

Ratitz looked at Captain Marvel in surprise.

800 combat power!

Then he saw Thor's 365 combat power value!

Hulk's combat power is also amazing, with 399 combat power points!

Tony was ignored by him because he couldn't see Tony's combat power value.

"I didn't expect that there are so many powerful guys on this planet. No wonder Kakarot didn't complete the mission."

Raditz looked ugly. The combat power detector did not detect other high combat powers. It is very likely that Kakarot has been killed.
