

Kryptonian 361

Chapter 361 Mathematics Does Not Lie

"Dr. Kinos, you are still too superficial. Variable control is necessary, but it does not affect your clones' application of genetic technology. Just think of it as creating a bodyguard for yourself."

Luther continued. This level of debate was not even a sophistry for Luther. It was too naive.

Kinos was stunned for a moment. Yes, why didn't he think of this.

Even if it was to control variables and increase the control group, it would not affect his arrangement of bodyguards for himself. If he had two rhinoceros beetle clones, could he press the rhinoceros beetle's head to make it cooperate with him to study how to evolve and lose control?

No, by then, there would be no need for the failed rhinoceros beetle!

All of a sudden, Kinos felt that he was suddenly enlightened.

"No, Zero, we don't want to become monsters either. What we want is perfect evolution!"

"That's right, we have the same brain as you. Shouldn't such a smart and perfect brain be matched with a perfect body?"

"That's right, if we become monsters, wouldn't it be a blasphemy to your wisdom?"

The clones naturally don't want to agree to such an evolution. They have the same memory as Kinos, so they will naturally have the same pursuit.

"Shut up, you only have part of my wisdom and memory!"

Kinos is still very domineering in this regard.

The main thing is that he really thinks so.

"Then, Dr. Kinos, what do you think of my initial proposal?"

Luther will use force to persuade those who can't communicate and can only be persuaded by force, and will use telepathy to persuade those who can't be persuaded. He doesn't mind if he can persuade through academic exchanges.

What kind of people use what kind of means, this is his pleasure.

Kinos was silent. For him, what Luther proposed doesn't need to be considered at all. From Luther's words, it can be seen that he should have completed the human evolution he wanted?

"Prove it to me, your caution!"

Kinos said.

Luther smiled slightly, and did not stomp the ground to show his strength. He just lifted his feet off the ground and floated on the ground.

Such an elegant way of showing strength made Kinos' eyes widen.

"How did you do that? Are you a superpower? No, superpowers are very dependent on their superpowers and cannot have such insights. Did you create a special organ in your body that can synthesize energy?"

Kinos was crazy, and he looked at Luther excitedly.

"Of course not a superpower, this is gravity manipulation."

Luther said calmly.

At this point, there was no need for any hesitation. Kinos immediately said that there was only one answer, that is, to be loyal to Luther!

"However, only you can intervene in my experiment, and no one can affect my experiment."

Kinos said to Luther stubbornly.

"It doesn't matter. I will arrange a colleague for you if you can conquer him."

Luther moved Kinos and the entire base of the Evolution House to the world of the Marvel Universe.

In Kinos's eyes, it was naturally Luther who took him and his base a long way to the secret base.

Anyway, he would not go out. Even if he needed intelligence, Kinos would only send his weird men. Luther was very confident that Kinos would not find himself in another world under the surveillance of Galvatron.

Of course Galvatron could do such a simple operation as the information cocoon.

"Welcome back, Lord Black Caesar, I heard that you brought back a very smart researcher who invented the rejuvenation technology, cloning technology and gene transplantation technology? Excuse me, I think I can handle all the scientific research work of our Hydra alone..."

The big boss came up directly and chattered to Luther and Kinos.

"Oh, are you the chief scientific officer of Hydra?"

Kinos pushed his glasses. He could not tolerate being provoked in his professional field. What's more, Luther also said with a bad taste that the big boss was in charge of the research funds, and he was only responsible for giving money and checking whether it was a fraudulent fund.

At present, the big boss has been caught cheating on funds for 112 times. The punishment given by Luther is to cut the funds once he cheats. However, the big boss seems to be very keen on competing with Luther. It is also possible that he is testing Luther's bottom line and tolerance.

Is he planning to see how smart his boss is?

Looking at the other party's huge green head, Jinos couldn't help but despise this colleague.

He has eliminated this kind of transformation. He thought about such a transformation a long time ago, but Jinos looked down on it and felt that this was not the perfect evolution of humans, and he didn't need this kind of brain evolution.

I didn't expect the other party to use such a crude evolution technology. It seems that he should have transformed his brain and increased his brain capacity?

But what he showed was ridiculous deformity and arrogance. If the chief scientific researcher of Hydra is at this level, then Jinos thinks that it will only take a few minutes for him to replace him.

Luther was watching the two researchers with a completely good attitude and gambled on their knowledge.

But the big boss soon felt that why Jinos had so many theoretical knowledge gaps and was still very empty?

"Your basic knowledge is not solid enough. I won't talk to someone like you who comes from a wild background."

The big boss walked away with disdain.

Kinos looked at the big boss's back thoughtfully.

Luther asked.

"What's wrong?"

"His knowledge is not right. There are many paradoxes, gaps and data errors, but some aspects are logically self-consistent. If what he learned is not knowledge compiled by others, then there is a data error between him and me. Mathematics will not lie."

Kinos said.

"It seems that you have discovered it."

Luther was a little surprised, but he did not hide it.

"Is this another world? Or, another universe? The physical parameters and mathematics are different from my world?"

Kinos asked this question enthusiastically.

"Yes, you found what he didn't find."

Luther was very satisfied.

"If the physical parameters are different, I have to study and learn the mathematics of this world again."

Kinos nodded and did not continue to comment on the big boss. It is normal for a frog in the well to be worse than himself?

"Don't worry, the things in your world can definitely be used in this world. The formulas and data are wrong, but it can run."

Luther said directly.

"Why? How could there be such an absurd world?"

Kinos was stunned. He was confident that he could learn the knowledge of a world by himself, but he didn't expect Luther to say that.

Chapter 362 Conflict between the two parties

"That's the magical thing about this world. As long as you believe you can succeed, you can succeed, no matter how ridiculous it is."

Luther said with a smile, just like Tony Stark smashed the Ark reactor in the cave, and even hammered out a steel suit.

Not to mention the subsequent synthesis of new elements, which is full of the flavor of my thinking power. You must know that the synthesis of new elements cannot be done in a house and a set of instruments. The high-energy particles produced during impact will make everything Fragile.

But Tony Stark didn't wear any protective measures and just synthesized new elements like this. Moreover, the thing glowed in broad daylight, brighter than an incandescent lamp, and the radiation must have exceeded the standard.

Anyway, as long as it can be justified and logically consistent, it will all work in Marvel.

This can be seen from the capsule technology.

Jinos feels that there is no big problem in such a world, but he has no way to understand the nature of this world for a while. It is probably impossible for him to do that kind of thing, so he should learn the science of this world first. Say it again.

The entire Evolution House was moved here by Luther and became a subsidiary base of Hydra.

Luther's Hydra base was built underground. Galvatron built it himself, using a lot of Thundersteel from the Dragon Ball world that Luther had used transformation magic to create. Even if there was a magnitude 10 earthquake, the base would not move at all. , the building will not deform.

Now with the addition of vibranium, dark silver, and "krypton gold" made by Luther himself, it is even more indestructible.

The overall shape of the base is that of a "honeycomb" base. Luther placed the Evolution House next to the hive base, and asked Galvatron to use nanorobots to dig and build a passage.

The weirdos in Genos' evolutionary home were all brainwashed by Luther and became his loyal lackeys. Now they naturally came to Luther's side, including the mosquito girl who was still in the culture tank just now.

Luther feels pretty good about Mosquito Girl. After all, she understands the dubbing, and the skin of the two-dimensional character is flawless, and there are no mites or parasites.

Mosquito Girl has just been adjusted by Jinos, and now she feels that she is a cripple.

When the original plot first appeared, the sky was full of mosquitoes, and the mosquito swarms absorbed the blood resistance of other creatures to enhance their own abilities.

She is a house of evolution." The monster with a fusion structure of mosquito and woman developed by Dr. Genos was said to be only a semi-finished product, but it still put Genos in a desperate situation.

There are several abilities shown by the Mosquito Girl in the story. One of them is to control large swaths of mosquitoes to attack other creatures, absorb their blood and turn it into her own energy, and then she will be satisfied after draining a certain thief.

Although she is a bad girl, she must have a good figure and good looks. Ranked very high in the first character popularity poll.

After absorbing the energy of the mosquito swarm, its combat power greatly increased and became very powerful. Genos was once driven into despair. Teacher Saitama slapped him away like an ordinary mosquito.

Later, he sold takoyaki with Dr. Kinos and the armored gorilla.

The character of Mosquito Girl is really eye-catching with her beautiful appearance and figure as well as her slightly sexy dress.

A fan of Monster Girl wrote a poem for her:

The black haze, clouds and dragons swirl, the typhoon surrounds the eyes, and the charming mosquito girl lingers.

The white legs are wrapped in jade lotus ink ribbons, the muscles and bones are stretched out, and the legs are four sections and two meters long.

Her charming waist twists her breasts with dark patterns, her fairy face looks up, her teeth are exposed and she licks her cherry lips.

The tail of the sac is sucking red blood, its voice is thin and its arms are hanging upside down.

It's so wet, so wet... No, what a poem, what a poem!

Compared to the Crossbow S, Luther feels that Mosquito Girl is more beautiful. Who doesn't like having a pleasing subordinate?

He just became ugly after sucking blood.

Luther was thinking about asking Genos to solve the problem of the mosquito girl turning ugly after sucking blood.

"BOSS!"

The Mosquito Girl wandered around Luther, showing off her beauty to please him.

She was just a white-collar working woman who was unfortunately caught by Kinos and had her body modified. After she woke up and learned that she had gone deep into the dragon's den and was more terrifying than Kinos' evolutionary home, Mosquito Girl knew To hug the thighs.

So who else has thicker thighs than Luther?

However, Mosquito Girl's behavior made Wanda very unhappy. After she and Pietro were "rescued" by Luther, she was also full of gratitude to Luther. And Wanda's gratitude was not mixed with any personal feelings. She knew it herself.

Black Caesar is usually untouchable, so Wanda can only work hard to express herself and exercise her superpowers.

Unexpectedly, this time Black Caesar would have a shameless woman with no clothes on her!

You mean those black and white stripes? Are those clothes? Those are simply unsightly things!

Although Wanda couldn't sense Black Caesar's emotions, she knew that Mosquito Girl wouldn't be able to hang around Luther if Black Caesar didn't want to.

Doesn't this mean Black Caesar acquiesces?

"BOSS, do you want some tea?"

Mosquito Woman brought a cup of tea to Black Caesar, who took it and drank it.

The mosquito girl was very happy.

The Unicorn Fairy had a conflict with Bronski and the others.

Nothing, this is how reckless people communicate.

"What are you talking about? Haven't you seen my muscles?"

The rhinoceros beetle came to a new place, eager to be at the top of the food chain here. Of course, he is still the loyal dog of Lord Black Caesar, but there is also a difference between dogs, and he is the most loyal one!

"Interesting, you want to fight, right?"

Bronski has been in the army for many years, and he has long known how to communicate and gain the right to speak in the army. The operations department of Hydra is no different from the army. It's all about the big fists!

So he didn't refuse.

It just so happens that he also plans to teach the newcomers a lesson and let them know who has the final say here!

"Ah, isn't this nonsense?"

The rhinoceros beetle said with his face in front of Bronski.

"Then let you see the power of Chimera Beast Emperor!"

Bronski's transformation should have been called Chimera Hulk, but that didn't have his own characteristics, and he didn't like the name of hate, so Black Caesar gave him the name Chimera Beast Emperor.

This made Bronski like it very much.

"Is that the masterpiece of that big-headed guy?"

Kinos and the big boss came to watch the fight, they thought this was the best opportunity to observe each other's skills.

The big boss said disdainfully, and didn't even find the problem, but he actually knew that Black Caesar would not choose useless people.

Chapter 363 Bronski wins big

Kinos couldn't see what was so powerful about Blonsky until he saw Blonsky transform, expand, and finally become a giant, his eyes widened.

"How is this possible!!!"

This is what Genos has been pursuing, or something similar. What he wants is for humans to gain such power and maintain their human form.

In the end, all he created were monsters, but now, the guy with the big head actually went one step further than himself and made evolved humans switch between humans and monsters? ? ?

If you can figure out the principle here, can you achieve your goal?

The one-horned fairy also looked at the sudden transformation of Bronsky in surprise.

"Interesting, in this case, I can free my hands and feet!"

The horned fairy grinned.

"Let's find another place. If we do it here, it will cause too much damage."

Then he said.

"No, the operations department is specially paved with kryptonium and vibranium. Even a charging red tank cannot knock it away."

Bronski said.

"Is that so?"

The horned fairy nodded.

"Then let's get started!"

It took an excited step, and the feedback from the ground made the rhinoceros even more excited, because even the laboratory specially built by Kinoshita for testing could not withstand its violent power. Now, his foot did not move at all. .

Blonsky and Rhinoceros were like two tanks running at full speed, colliding violently together!

Except for the guys who were confident in themselves, everyone else left this place consciously.

There are too many things in Blonsky's body, and it depends on his special physique and the terminal virus to fuse, but this also makes him extremely terrifying.

The horned fairy felt that he was no match. He was punched in the face by Bronsky. The carapace on his face was cracked, but his fist seemed to hit something indestructible, and his finger bones were directly shattered. .

Then it was punched by Bronsky and flew away, but under the interaction force, Bronsky himself took several steps back.

But everyone can see that this is Bronski completely crushing the one-horned fairy!

"His power is actually more powerful than the One-horned Fairy!"

Kinoshita felt that his authority and domain had been challenged, but this was because he lost control of the unicorn and felt that the unicorn had reached the limit of its power, so he turned to research on

controllability and other genes, which led to the death of the unicorn. The strength is not as good as the other's.

But it doesn't matter, the one-horned fairy also has an Asura mode, and that is the true power of the one-horned fairy!

Kinos pushed up his glasses.

The Horned Fairy still can't seem to believe that he has actually met his opponent. You must know that even the Beast King's attack that can slice through high-rise buildings with his claws and wind is no different from scraping to the Horned Fairy.

"That punch of yours was good, but it's not possible to hurt me."

There wasn't even a trace on Bronski's body.

The horned fairy roared angrily.

"Impossible, I am the most powerful!"

Then he rushed towards Bronsky and punched out. The violent fist even broke the air. Bronsky sneered and grabbed the fist of the rhinoceros. He had already figured out the power of the rhinoceros. Then it was his turn to show off his power.

The moment he caught the fist, before the Unicorn could react, Bronsky had already hit the Unicorn on the chest with a fierce cannon punch!

This punch caused a sonic boom cloud to explode on the body of the Rhinoceros, and the shock wave swept in all directions, and was eliminated invisible due to the hardness of the vibranium.

The horned fairy flew out and hit the wall. The kinetic energy was absorbed by the vibranium, preventing it from ejecting.

But the damage suffered by the horned fairy was real, with cracks all over its body.

"What's wrong? Isn't it okay?"

Bronski walked up to the rhinoceros and said.

"You're such a good guy!"

But the one-horned fairy responded to him not with anger, but with a teasing smile.

Bronski thought he was being harsh.

"In this case, I will use my power!"

The horned fairy stood up, and then its body expanded rapidly, and finally became a purple-green violent beast!

"This is the Asura Armored One-horned Immortal!"

Asura Unicorn laughed wildly. Bronsky did not expect that the Unicorn could become bigger, but would being big be useful?

Then he was punched away by Asura One-horned Immortal.

The speed was too fast for Bronski to react.

Asura in rampage mode is at least a dragon. Judging from the fact that the ghost-level monster King of Beasts can cut through high-rise buildings with just the air blade formed by his claws, dragon-level disasters are well-deserved natural disasters with destructive power. .

Asura Unicorn is no exception. If no one stops it, it can destroy a city.

Bronski did not expect that the one-horned fairy would be so powerful after its transformation. After being knocked away, he hit the wall hard and fell to the ground.

He quickly rolled to his feet and avoided Asura's falling attack.

Bronsky got up again and became serious. Asura Unicorn didn't care and punched Bronsky crazily.

Like hailstones, Bronski felt the pain from his fists pounding down crazily.

"Hahahaha, I will continue to be violent until next week, can you hold on until then?"

Asura was beating him with a hammer, smashing and blasting, and talking trash at the same time.

Little did he know that Bronski was absorbing his kinetic energy.

This was Bronski's mutated ability, similar to how Red Hulk could become stronger by absorbing gamma ray energy, and how Green Hulk could become stronger as long as he was angry. Bronski's ability was to absorb kinetic energy and become stronger, but he was not as comprehensive as Black Emperor Shaw who could absorb all energy.

But in terms of kinetic energy, Bronski could directly absorb and strengthen himself!

After enduring hundreds of punches from Asura Rhinoceros Beetle, Bronski punched through Asura Rhinoceros Beetle's chest!

"Ah!"

Asura Rhinoceros Beetle never expected that Bronski had such power. He had clearly tried, but Bronski could not hurt him at all.

"What's going on? He should not be the opponent of Asura Armor. Data will not lie. Is there any secret in him?"

Kinos was also analyzing this battle. He calculated a lot of data for Bronski. He originally thought that Asura Armor could directly crush Bronski, but he did not expect that he would be slapped in the face just after making this conclusion.

Asura Rhinoceros Beetle fell to the ground.

He won't die, but he will be seriously injured for a while.

"Who else?"

Bronski said, looking at the others.

Chapter 364: The Contest between Kinos and the Big Boss

"I!"

The vaccine man came out and said to Blonsky.

"Purple-skinned guy, come here."

Bronsky told Vaccine Man.

Bronsky is very interested in the vaccine man, but the other person seems to be very arrogant.

The vaccine man snorted coldly, and fired an energy ball with his hand.

Bronsky's pupils shrank and disappeared instantly.

"boom----!!!"

An energy ball comparable to a hydrogen bomb exploded. After all, the Vaccine Man's energy ball had a terrifying record of destroying several cities. This was shown when he appeared on the scene. To say that it is comparable to a hydrogen bomb is actually to exaggerate the hydrogen bomb.

This wasn't over yet, the vaccine man raised his hand, and above his palm, several energy balls appeared out of thin air.

Compared with the energy bombs of the Wandering Emperor, the energy balls of the Vaccine Man are more dangerous. With just a wave of his hand, these energy balls exploded around Bronsky. This is because Bronsky himself is fast enough. He evaded and was not hit from the front.

Even so, he was still bruised all over by the explosion. After all, the room was so big and there was no room for Bronsky to hide. The range of the explosion of these energy balls was too large, especially in a closed environment, and the power was even greater. surge.

Even the vibranium on the walls was melting.

After all, this is equivalent to several hydrogen bombs exploding. No matter how powerful the vibranium is, it cannot remain intact.

"What's wrong? Isn't this okay?"

The Vaccine Man looked at Bronsky, and the others looked at the Vaccine Man with monster expressions. For some reason, they remembered the scenes they had seen before when the Saiyans invaded the earth and fought against Captain Marvel and the Illuminati.

The Vaccine Man is really similar to the Saiyans. They can also destroy the world with energy attacks that are so powerful that they don't seem to be in the same dimension.

Bronsky could only admit defeat, after all, his Chimera Beast Emperor was just rough-skinned, thick-bodied, and extremely powerful.

Luther didn't think so. Instead, he thought that Bronsky's Chimera Beast Emperor could have one more fusion material.

Weird cells!

This thing can be said to be a limiter breakthrough material. Ordinary people who eat it have the possibility of directly turning into tiger-level monsters. Even though tiger-level monsters seem to be very low, they are also capable of overturning tanks and massacring troops head-on. Character.

However, Luther does not intend to let Bronsky eat the weird cells directly, as that may cause Bronsky to lose control.

There are too many messy things in his body, and even the terminal virus cannot control it. He is just barely maintaining a balance.

So he planned to let Genos and Big Boss study the weird cells first and make a side-effect-free version.

Moreover, the good things in the world of One-Punch Man are not only weird cells, but also the ultimate steroid preparation "Biceps King" developed by the giant brother's brother Fu Kegao.

This thing can turn an ordinary person into a dragon-level monster. Even if the giant brother's level in the original plot is ghost-level, but destroying a city with a slap and crushing a city with a kick, is this a ghost-level monster? ? ?

Although Luther doesn't care about these so-called good things, after all, they are of little use to him, but they are useful to his men and the earth.

If the people on earth don't go through more hardships, how can they press Thanos to the ground and rub him in the future?

Although the Vaccine Man defeated Blonsky, he did not become the head of the operations department. After all, he did not know how to command, nor was he interested in commanding.

Blonsky had nothing to do with this. He was used to obeying orders, and he was only suitable to be the head of an action department. He could not become a commanding officer, and he did not want to be a commanding officer.

The battle between the big boss and Genos soon begins.

Genos investigated the physical data and information of everyone in the action department managed by Galvatron, and then began to study with interest.

The big boss was no exception. He examined and took samples from the Vaccine Man, the Unicorn Fairy, and the Iron Gorilla. The Mosquito Girl escaped because she followed Black Caesar.

Although the Unicorn Fairy was not angry, given that he was no match for Blonsky and that the Vaccine Man was powerful enough to suppress a group of them by himself, he had no choice but to accept his fate of being studied.

At the same time, Genos also received the first task requested by Luther, which was to improve the problem of mosquito women becoming ugly after sucking blood.

Although he can solve it with a snap of his fingers, of course the boss has something to do.

If he had to do everything himself, why would he need these guys?

Jinos accepted the task without any complaints.

I don't even think this is a hindrance to him, since he has so many clones anyway.

Ever since Luther said that to him, Genos thought about it over and over again and felt that it made sense. Now there are several clones that have accepted Genos' human body modification technology.

So in addition to the one-horned fairy, Genos will be accompanied by a long-horned worm at any time. It uses the same technology as the one-horned fairy, but after improvements, its strength is still higher than that of the one-horned fairy.

After Kinos learned that there was a magical virus like the Extremis virus, he was even more excited.

So I just created a giant halberd bug. Next, Genos will not continue to create it unless he solves the problem of human form.

Anyway, the presence of the unicorn fairy and the giant beetle is enough to ensure his safety.

The big boss also found something wrong with the products of the House of Evolution, such as the rhinoceros beetle.

The biological genetic engineering that should have died suddenly was miraculously alive, which puzzled the big boss.

There are also vaccine people. They are actually made of viruses, but they are viruses that have become vaccines. It sounds a bit complicated, but these viruses are very dangerous. Once they spread, humans will perish because they are viruses targeting humans!

Fortunately, this virus cannot survive in the air. As long as it is exposed to the air, it will be killed by oxygen.

He couldn't understand how such a contradictory virus was born. Shouldn't this be a virus that only exists in an anaerobic environment?

The physiological mechanism of vaccine people is also very special. The big boss came to a terrible conclusion.

Maybe there is nothing wrong with Kinos's theoretical knowledge, but he lives not on Earth, but on a special celestial body!

In other words, they are aliens!

The influence of celestial bodies on various data is still very large. For example, living on a planet with a large gravitational celestial body nearby, the observed data is definitely different from that of the earth, and the technology born is also very different.

Chapter 365 The Bald Devil!

While Genos and the big boss were studying the conspiracy, Luther once again went to the world of One-Punch Man.

"There is no shortage of precious materials like the zombie man. He was tortured and killed by the Unicorn for a week and he didn't die. This kind of immortality is even more outrageous than Wolverine."

Luther suspected that Zombie Man had achieved cell-level regeneration. Wolverine had to rely on the Adamantium alloy skeleton to prevent himself from being completely killed, but Zombie Man could regenerate quickly after his whole body was blown to pieces by the Wandering Emperor.

His energy conservation has been broken, and it is unknown where he absorbs energy to regenerate himself.

Genos should still have Zombie Man's technology and data, but Luther still plans to capture Zombie Man, as well as the only remaining vampire in the One Punch Man world, with pure blood, and three generations of ancestors have been vampires, and there are vampires Bloodline certificate.

I don't know how it compares to Marvel's vampires. It seems quite weak because of the zombie man.

Also, Luther plans to meet Saitama. He is curious whether this Saitama is the Murata version or the ONE version.

Returning to the world of One Punch Man again, Luther immediately raised his head.

"It's really huge..."

A huge black shadow appeared in his sight.

Giant brother!

This giant is hundreds of meters tall, and even in the comics, even the clouds can only cover his perineum. After seeing it with his own eyes, he realizes how terrifying it is. The key is that its nerve reflex speed is not slow, it can be so fast. A series of punches created a big hole.

I'm afraid most of the Ultramen are here, and there's no good way to deal with it.

Luther instantly appeared on the giant brother's shoulders.

"That's right, brother, just destroy the nearby city like this. This world belongs to us!"

A man in a white coat was talking nonsense and said excitedly to his younger brother.

Luther's appearance attracted Folkgo's attention.

"What's going on? Who are you? How did you get here?"

Fokker was shocked, and then Luther pushed him down with a malicious smile.

"Ah ah ah, brother, save me quickly!!!"

Falling from such a high place, Fokker knew that he would definitely be shattered into pieces, so he could only ask for help from his brother.

"Nissan..."

The giant brother stretched out his hand, intending to catch his brother, but because the speed of his fall had reached its maximum, and the giant brother's muscles were much harder than rocks at this time, he only heard a heavy "bang" sound. The sound of objects falling to the ground.

Fokker fell to pieces.

Even the giant brother reached out and accelerated too fast. He was equivalent to falling down and hitting a hard object that was moving upward at high speed!

"It seems like it would be easier for him to die like this."

Luther shook his head, and then saw a big bald head appearing next to him.

The shiny bald head is clearly visible and can be used as a mirror. The light bulb-like bald head is his signature. Apart from the bald head and hanging eyes, his appearance is very ordinary. He has no character that a strong person should have (because his feelings are gradually disappearing), usually wears a rustic yellow Superman suit with a white cape when going into battle.

According to OVA's recollection, the suit was handmade by a clothing store owner out of approval of Saitama's lofty ideals, and it is of commemorative significance.

I finally meet you, the bald caped man, the bald devil!

"Who is you?"

Saitama looked at Luther and asked curiously, and then he was punched out by Luther.

Regarding Saitama's strength, he was born as an ordinary person, but he broke through his own limitations with hard training. His physical abilities improved by leaps and bounds in three years, and all the weirdos that appeared were easily defeated. How strong Teacher Saitama is has always been a mystery. This is also one of the highlights of this work, causing countless debates and reveries among people.

It is said that the original author ONE stated that Saitama will not encounter characters that make him fight hard in this work!

But in the remake, Saitama is no longer invincible.

In the remake, Saitama fights against the hungry wolf in the horror mode of the universe. Because he has never encountered an enemy that can match his power, Saitama's growth curve that no one can detect is due to the unprecedented Emotions grew exponentially.

Hungry Wolf has surpassed his former self and copied his own moves and strength, making his next punch stronger than the last one.

But that is to say, Hungry Wolf at some point surpassed the former Saitama.

As a fan of the original work, Luther naturally does not recognize Murata's version.

Even if Saitama explosively improves his strength later, it is equivalent to Saitama breaking his invincibility setting. At a certain moment, even if it is only a moment, a femtosecond, a Planck time, Saitama is no longer invincible, sorry for the original work Setting and core.

"Fuck him!"

Luther's punch knocked Saitama flying without much resistance. Even so, the sonic boom and shock wave generated caused the giant brother to be overturned, and when he fell, he destroyed a city.

Saitama was knocked out and heard Luther calling his name.

"A guy I know? But it hurts so much. The guy who hit me when he came up... No, why can I feel the pain?"

Saitama was a little stupid and thought, it's not that he can't feel pain. For example, when he was playing games with Bang Gu, his head was turned red by Bang Gu, and there was also the weird

"Cat" who was a god or above, and his claws broke Saitama's. Shameless, this is something even Boros can't do.

Beating Saitama all the way was just polishing and scraping Saitama's surface.

So "Cat" is definitely a weirdo above God.

Saitama fell to the ground and almost fell down, but after he stood firm, Luther had come in front of him and punched him in the head!

Saitama's pupils shrank, and he subconsciously stretched out his hand to block, but Luther's fist had already hit his head.

"Boom—————!!!"

Under the coverage of the biological force field, everything around was not destroyed on a large scale, and Saitama was knocked away again.

And this time, Saitama finally realized that something was wrong.

"That guy, seems a little strong?"

Saitama was stunned for a while, and then his eyes lit up.

"Do you realize it now?"

Luther appeared in front of Saitama. He had just increased his strength to 100 million tons, but Saitama was unscathed, not even a hair fell off.

Oh, he was originally hairless.

"Asshole, you hit me in the face three times!"

It's not that Saitama doesn't get angry, especially when someone hits him in the face, but he doesn't feel anything when other people hit him in the face, but Luther made him feel something.

"Hit me in the face once too!"

Saitama stretched out his fist and hit Luther in the face.

Chapter 366: Crushing

How could Luther let Saitama hit him in the face?

He punched him in the face faster than the Bald Cape Man.

Saitama's pupils shrank, and Luther punched him hard in the face, making a dull sound.

Saitama took a few steps back, put his hands on his face, and showed a surprised expression.

Luther continued to attack, hitting Saitama with several consecutive punches, knocking him thousands of meters away.

Saitama fell to the ground in a mess, with blood oozing from his mouth.

"You guy, hit me in the face again!!!"

He rubbed his face, stood up, stared at Luther, and disappeared in the next moment.

Saitama's speed has increased to another level!

This speed of becoming stronger or starting to be serious is something that others can't react to at all, and then Luther's eyes locked on Saitama.

No matter how much he accelerated, he couldn't hide from Luther. Instead, when he approached, he slapped Luther's face. The friction between the red gloves and the air produced flames and red high temperature. Luther turned his head to avoid the big bag that was hundreds of times faster than the speed of sound.

This bald man is too insidious to hit people without hitting their faces!

Luther looked at the ruins of the city behind him that was destroyed by Saitama's big bag's palm power, and then punched out.

"Got you!"

Saitama's eyes curled up slightly, and he punched out with a clenched fist, bursting out dark mist.

The fists of the two collided fiercely, and the violent air waves flew away, sweeping everything around.

The flames and dark mist intertwined, and dazzling sparks and burning black mist rose up.

There was no retreat.

Saitama punched Luther continuously with powerful punches, while Luther attacked and dodged from time to time, fighting with Saitama with ease.

Every attack from Luther could cause Saitama to tremble, causing him to retreat several steps.

However, Saitama became more and more excited as he fought, and then he began to increase the intensity of his attacks.

"Normal punch!"

Saitama finally threw a normal punch, which was a sure-kill blow for dragon-level monsters. Except for monsters above dragon level, basically whoever was hit would die.

Before, Saitama didn't dare to use too much force, after all, Luther was still a human being, and Saitama would not kill humans.

However, Luther's strength was beyond his imagination, and he was even injured, which made Saitama excited.

Saitama stomped his feet heavily, and the whole venue shook instantly. Countless stones ran around like wild horses, and the violent attacks pounced on Luther like beasts.

He clenched his right hand and punched.

"Your tricks without any skills are ridiculous."

Luther said, and then punched.

"Boom————!!!"

The thunder-like blow shook the earth and countless rocks were blown away.

After the ordinary punch was blocked, Saitama became more excited. This punch was more like a test, and then Saitama went completely crazy!

Luther and Saitama flashed and the distance between them was shortened in an instant.

The two exchanged fists and feet, and each punch and kick made a shocking sound, and each punch hit the flesh.

The ground cracked quickly, and the surrounding buildings and trees were also shattered under the momentum of the two sides.

The continuous punches and kicks exploded with huge air waves, distorting the surrounding air.

Luther and Saitama both exuded a powerful momentum, like two powerful prehistoric beasts confronting each other, and neither of them was willing to compromise.

Suddenly, Saitama blocked Luther's fist with one hand.

Then, he stomped his foot down, and the entire ground cracked because of this kick, and no soil grew.

With a loud bang, the surrounding buildings were shaken, and it seemed that the whole city was shaken a few times.

However, Luther remained motionless. He burst out with even more powerful power, and directly blasted Saitama hundreds of meters away. Over the entire battlefield, two figures could be seen intersecting at high speed, and earth-shaking atmospheric fluctuations swept in all directions.

"What's going on? Hasn't the giant been destroyed?"

The Hero Association would naturally find out the battle between Luther and Saitama.

Although Luther used the biological force field to lay the battlefield, he could only prevent the earth from being blown up at most. As for the things on the surface, they were not important to Luther.

After the Hero Association discovered that the giant had been knocked down, the heroes sent out lost contact.

Then helicopters and satellites were urgently sent to check the situation, but they could not capture Luther and Saitama, whose speed had exceeded the speed of sound by thousands of times. They could only see bursts of explosions, as if there were some terrifying guys fighting.

"Is there an S-level hero fighting a monster?"

The head of the Hero Association, Xiqi, said with wide eyes.

"I don't know, but the nearby S-class heroes haven't arrived yet, so they should be monsters!"

"The energy intensity is very exaggerated, Minister!"

Siki's face suddenly turned ugly, such a powerful monster?

"Wait, could it be the mysterious hero who eliminated the vaccine man last time?"

Then Xiqi suddenly thought of the unknown strong man who mysteriously appeared and disappeared last time.

The opponent's strength seems to be in line with the current situation.

"I don't know, Minister, we can't catch them at all, they are faster!"

The technicians of the Hero Association said in shock.

"...Contact Tornado immediately!"

Siki can't gamble, what if it's really a fight between two powerful monsters?

Of course, seize this opportunity and let them die together!

And the only ones who can do this are Tornado and King.

Although Luther kidnapped the Vaccine Man, King had defeated Saitama N times before, so he is still the strongest man on the face of the earth. However, due to the lack of the Vaccine Man's record, Tornado no longer fears him as in the original plot.

After all, in the original plot, Tornado is unscrupulous and disguises her character without fear. When she meets King, she only speaks harshly because she is not sure about dealing with the Vaccine Man. However, King happened to pass by when Saitama punched the Vaccine Man and fell down.

Then the whole body is covered with the blood of the Vaccine Man. In this case, King solved the Vaccine Man and the record of being unscrupulous made Tornado afraid.

Luther's figure is like lightning, and his punch is like thunder in the sky, hitting Saitama hard.

Saitama screamed in pain, and his momentum surged. He punched Luther, and the two of them exchanged fists and feet, making a deafening roar.

Their fists collided, and a destructive force instantly erupted, and a sound like a landslide sounded.

The battle became more and more intense, and the surrounding buildings and the ground were smashed into pieces, and dust filled the air.

Luther's punches were fierce, and each punch had the power to destroy everything. Saitama's moves were extremely fierce, and each blow could easily destroy everything around.

The two of them punched each other, shaking the whole world, and lightning flashed in the sky, as if the world was about to end.

Chapter 367: Heaven and Earth Confronting Each Other

The scene gradually became extremely shocking, and soon it spread to the entire city. The terrified surviving citizens and the rescue teams sent by the Hero Association fled in all directions.

Huge energy shock waves raged over the city, accompanied by the sound of collapse. They blew the surrounding buildings into pieces, and the terrifying energy ripples spread with the breath of destruction.

Saitama was so high now that he wiped the blood from the corners of his mouth and face, only to find that the blood had long been vaporized by the high temperature generated by the battle between the two.

This made Saitama feel that high burning feeling and passion for fighting.

His whole body exuded a strong aura, and all he could see was energy overflowing and strong winds roaring.

"Continuous ordinary punches!!!"

Saitama's fists exploded with an aura that destroyed the world.

He fired a fist that was howling in the wind, and when it collided with Luther's fist, it was like a mountain collapsing and the ground cracking, setting off a majestic wave of air.

A shocking energy followed, and the entire battlefield was trembling in an instant.

At that moment, the sky seemed to be torn apart, the energy became more and more noisy, and the wind howled.

Such a scene was truly earth-shattering, and many people who saw it were stunned and didn't know what to do.

Luther punched punch for punch, easily keeping up with Saitama's punching speed with both hands, exactly the same, but his strength and speed surpassed Saitama's!

Powerful forces surged within both sides.

Luther's offensive surged like a volcano.

Saitama did not show any weakness, and his series of punches were like a hurricane, and all of his moves were aimed at Luther's vitals.

The huge energy fluctuations between them have affected the surrounding nature, causing mountains to collapse and the earth to crack, and the sky and earth to change color.

Every punch and kick of their attacks seemed to destroy the impenetrable ground.

In an instant, Saitama's figure condensed in Luther's field of vision, and like a sharp arrow struck by lightning, it headed straight for Luther's safe area.

This blow was simple and extremely fast. The world seemed to be cut off from all sounds at this moment, leaving only a harsh sound like thunder.

Luther's figure exploded instantly, criss-crossing, as if two huge rocks were hitting each other.

The surrounding city was shaking, and the hazy light made all the sounds disappear, leaving only two people fighting furiously.

The vegetation withered, the land collapsed, and the sky seemed to be trembling with the super heavy blows of the two.

Everything around me seemed to have changed for thousands of years.

The silhouettes of the two sides were like lightning, intertwined crazily, and the speed was so fast that they formed a huge overwhelming net. Now the people of the Hero Association were finally able to capture their silhouettes, but they could only see the trajectories of their movements.

Luther swung his fist, and with a loud bang, it hit Saitama's face.

Saitama lowered his head and flashed a bright smile.

He punched out, and the force of the punch rumbled everywhere, creating a bursting sound in the air.

The fists of the two collided fiercely in mid-air, and the fist force surged, making people feel the boundless power.

As the battle intensified, strong winds began to blow on the site, and the rocks on the ground were blown away in all directions.

Luther remained in the air, constantly knocking Saitama down and to the ground. Like the king of gods, the sky is his domain and cannot be desecrated or violated!

Saitama's eyes have become serious, and even the scrawled face and dead fish eyes have turned into a serious face with clear lines, handsome and resolute.

He jumped into the air, and the ground beneath his feet suddenly exploded into a huge crater.

The heavens and the earth shook, the earth split open, and thousands of rocks poured down from the cracks.

The two fought hard, twisted figures shuttled between the sky and the earth, countless rocks and flames collided fiercely, and the roars rolled with fanatical power, becoming more and more earth-shattering, leaving people deeply shocked.

"This guy is a monster."

Luther complained about Saitama, and he found that Saitama could keep up with him no matter how much strength he showed, and Saitama had not resorted to serious beatings yet.

Of course, Luther himself also enjoyed this kind of battle.

"What's wrong, are you tired? Do you want to take a rest?"

Saitama saw Luther stopped, braked quickly, and then asked.

"No, I haven't even warmed up yet."

Luther shook his head.

"Yeah!"

Saitama's eyes lit up.

"I haven't warmed up yet, how about we get serious about it!"

Luther is the most powerful guy Saitama has ever seen. He didn't feel that Luther's words just now were provoking him, but he was even more excited.

"OK."

Luther and Saitama moved up and down, looking at each other from heaven to earth, sparks shining in their eyes.

They both punched at the same time.

The fists collided together, whizzing through the air, revealing a powerful aura.

The surrounding air was burned, forming a sea of fire.

The two sides fought again, their figures entangled in the air, and every impact of fists and feet brought violent impact.

Their fists transmitted huge energy, as if they were destroying everything, and even caused the earth to shake.

Layers of shock waves spread around, like a big scene of combing the earth's hair with one punch. Now the whole world is being combed.

Luther keeps attacking while Saitama keeps retreating. The battle between the two has caused a disaster.

Behind them, the mountains collapsed and the ground cracked, the whole sky seemed to be torn apart, cracks cut out from the clouds, like the bloody mouths of demons.

The battle between the two sides has lost control and is getting more and more intense. Each attack is as terrifying as if it will destroy the whole world.

The whole world seems to have fallen into a dark abyss.

A dazzling light burst out, like the first light of the Big Bang, getting brighter and brighter!

Luther and Saitama's fists and feet intersected, and an amazing force broke out that shook the whole space.

Their muscles bulged, and heat waves spurted out of their mouths, as if both of them had turned into giants.

Dust flew in the air with the roar of the attack. Luther suddenly threw several heavy punches in succession, each of which was accompanied by a terrifying pressure, as if it could shatter the whole world.

Saitama was not to be outdone, and quickly stepped forward half a step, hitting Luther with a powerful punch.

An incomparable destructive force erupted instantly, and the entire space seemed to be squeezed.

The whistling sound was like the wind on the battlefield, and the change in height made the lightning-like red shadow and the scarlet giant intertwined.

With a loud bang, lightning flashed in the sky, and a burst of thunder and lightning emerged continuously.

When the two collided, it immediately caused a powerful explosion that seemed to shake the entire earth. The entire ground turned over, the mountain collapsed, and the sky and the earth lost their color.

Chapter 368 Tornado wants to get closer

Luther punched Saitama in the face.

Saitama reacted quickly, stretching his hands forward, trying to catch the fatal punch.

However, the force of Luther's punch was too great. The two of them moved in an instant. There was only a loud noise. Saitama felt as if his whole body was filled with water under great pressure. He was stuck in place and could no longer move.

Luther took the opportunity to attack further, and the sudden punch directly pressed Saitama's body against the mountain.

The whole mountain was shaking, rocks fell off, and in an instant, the cliff collapsed, and there was a noise between heaven and earth.

"This is Tornado, it has arrived..."

In the sky where Luther and Saitama were fighting, a transport plane opened the hatch, and the pilot reported to the Hero Association.

Tornado had already walked out of the hatch impatiently.

At this moment.

Luther's punch penetrated the ground, leaving a huge hole.

Saitama also fought back in the same way, causing the entire ground to tremble and a deafening roar.

The fists and footsteps of the two collided with each other, causing the entire ground to collapse, and a crack extended all the way to the horizon.

Then the atmospheric fluctuations caused affected even the transport plane at high altitude.

"There is an unknown airflow!"

"No, the strong airflow affects the balance of the fuselage, and I can't control the plane anymore!"

The pilot said in horror, seeing that the transport plane was about to disintegrate and explode under the fierce airflow fluctuations, Tornado frowned, and a green shield appeared on the transport plane.

"What a trouble, get out of here quickly!"

Tornado said to the pilot.

"Yes!"

The pilot was relieved immediately, and he couldn't wait to drive the transport plane away after being reborn.

He was really scared, you know, this is 10,000 meters high, and the Hero Association took into account the amazing destructive power of the two suspected monsters, so he asked him to transport Tornado here.

10,000 meters high, it's safe no matter how you think about it, so he didn't think there was any danger.

Now, he couldn't wait to leave this hellhole.

He didn't know that for Saitama and Luther, who could reach thousands of times the speed of sound, the air was already more than a hundred times harder than steel. In this case, their random movement would cause the earth to collapse, because the air was the medium.

Even if the power transmitted was less than one ten-thousandth of their direct attack, it would still cause the earth to collapse and the sky to break, let alone ten thousand meters in the sky.

From the highest point of the atmosphere to the depths of the earth, no place is safe!

"What kind of weirdo is so powerful?"

Tornado himself also felt the pressure. The atmosphere was pressurized by two crazy super life forms. With their battle, the atmospheric pressure here has reached an incredible level. Tornado had to bear the terrifying pressure of the deep sea pressure if he wanted to move!

If steel appeared in such a place, it would turn into a newspaper in the blink of an eye!

Tornado has destroyed countless dragon-level monsters, but she has never encountered such a guy who has to go all out to open the telekinetic shield just to get close.

Of course, this full effort is relative to Tornado's usual output. In fact, she showed less than one percent of her, and the purpose was just to paralyze those who were interested, otherwise there would be no accidents when facing Tornado's various targets.

She would not be shocked that Tornado was so powerful, which shows that Tornado is still scheming.

Tornado approached quickly, and then she frowned, because the closer she got, in addition to the terrifying pressure, there was actually a fatal shock!

It was as if someone was beating a huge drum as big as a mountain between heaven and earth, shaking people's internal organs. Tornado was just a careless thing, and her mouth and nose bled.

"Damn it!"

Tornado was injured for the first time in so long. Since she was saved by the explosion, Tornado has not been injured for a long time.

Because she has unlocked the seal, people can only rely on themselves!

Tornado said nothing, and the output directly increased sharply, surged, and surged!

The telekinetic shield withstood the shock waves that made her internal organs vibrate.

She continued to approach, but the shock waves became stronger and stronger, and the frequency increased!

"Boom!"

"Boom boom!"

"Boom boom boom!"

Tornado moved forward quickly. She wanted to see what kind of weirdo it was, and then she could kill him with a meteorite!

Originally, Tornado was planning to kill the two guys with a meteorite at the beginning, but Xiqi told her that it was very likely that one of the two unknown life forms was the mysterious hero who solved the vaccine man, so Tornado gave up the idea of directly killing people with a meteorite.

It would be bad if a powerful guy was killed.

Therefore, it is necessary to find out the identities of the two unknown life forms before making a decision.

Luther glanced at Tornado's room.

"Can Tornado get close to this place?"

Luther saw Tornado, and his super vision allowed Luther to see clearly.

"Awesome, even though it's just for fun, the battle between me and the bald guy has already changed the world, how can you get close to him?"

"Luther! Pay attention, I'm going to be serious next time!"

At this moment, Saitama's eyes flashed, his whole body was full of strength, and he said to Luther.

"Come on."

Luther nodded.

"Beating him seriously!!!"

Saitama was not polite. He had already exerted his strength close to his real strength, but he still couldn't do anything to Luther, so he planned to enter a serious state!

Facing Saitama's serious beating, Luther's eyes lit up.

After playing for so long, I finally saw it. This punch was much more fierce than the one Boros faced.

He followed with a punch, and the two fists collided. A loud bang shook the whole scene, and the ground shook continuously.

Tornado, who had just approached, had a face full of fucking expressions, and was then knocked back by the shock wave and flew far away.

After Luther and Saitama exchanged a punch, they did not stop. Instead, their speed became faster and faster, and every instant movement caused the wind to whistle.

Their fists drew lines of light in the air, and sparks were produced. The whole space seemed to be shattered by their battle.

The power of the two collided together, as if the whole world was shaken.

A huge tornado broke out in the air, and the whole scene was swept up with dust.

At this time, Saitama counterattacked with a punch that instantly caused the surrounding rocks and soil to fly everywhere, shaking the mountains to collapse.

The sound of the collapse was endless, the rivers and seas turned upside down, and the sky and the earth collapsed.

The whole scene was almost destroyed, the road collapsed, and the rocks turned into powder.

The area of the city destroyed by the giant brother was large enough, but it was directly covered by the battle between the two.

Chapter 369 Saitama: I want to practice more!

Luther and Saitama's fists and feet collided, making a deafening sound, and the whole air was hit with a clear ripple.

During the collision of fists and feet, the heaven and earth seemed to shake.

Cracks began to appear on the entire ground, and long cracks extended from the confrontation point of the two people.

At the same time, the entire sky became extremely dark, as if a storm was about to come.

"What's going on? Didn't Tornado go to the scene?"

Xiqi looked at this astronomical wonder and was shocked with cold sweat.

"I can't contact Tornado, Director Xiqi!"

The technician said hurriedly.

"Tornado lost contact???"

Xiqi couldn't believe what kind of powerful enemy could make Tornado lose contact.

Could it be... a god-level monster?

Xiqi could only think of this possibility. After all, Tornado was the killer of the Hero Association and killed countless powerful dragon-level monsters.

The first S-class hero, Blast, is elusive, and the strongest man on the planet, King, has a weird temper. He only looks for weirdos to deal with, and never pays attention to the Hero Association's request for battle.

So the only one who can be relied on is Tornado, and only Tornado has the strength to complete such a task.

Unexpectedly, Tornado lost contact directly.

He didn't know that the magnetic field and gravity at the scene were disordered, and it was naturally impossible to keep in touch with radio signals.

After Tornado saw the sky and the earth turn white, everything returned to calm. She immediately rushed to the scene, but found that there was nothing to see except a huge, bottomless pit.

"What's the situation?"

Tornado looked around anxiously.

But he could only see a big pit that could accommodate several cities, and nothing else, no winners, and no traces of losers.

Tornado had to go deep into the big pit. In case the mysterious hero who didn't know what his identity was really the winner, but fell into the deep pit and couldn't get out, she could bring the other party up.

The telekinesis covered the hole, and Tornado was surprised that the pit was beyond imagination huge, and deep.

At this moment, in a distant city, Saitama was covered with bandages.

"You are really strong!"

Saitama said to Luther in a lively manner.

"Oh."

Luther didn't care, wasn't it natural that he was strong?

The last time the two collided, Saitama hit a series of serious beatings, directly vaporized tens of trillions of tons of soil, and Luther did not continue to hold back, and hit the bald cape man with a happy blow and made him circle the earth for more than a hundred times before stopping.

Of course, in order to prevent Saitama from turning into an all-powerful man and turning the entire surface of the planet into a magma land under that terrifying acceleration, Luther covered his body with a biological force field, so Saitama just experienced a round-the-world trip, and did not fly out of outer space because he was out of the earth's gravity.

Saitama lost convincingly, after all, he was now covered with bandages all over his body.

"I've decided. I'm going to keep training!"

Since he became invincible, Saitama has become lazy and stopped exercising every day.

After he became stronger, he worked out with all his strength every day. For example, if he could do 100 push-ups in one microsecond, he would definitely not need to do it in one second. If he could run 100 kilometers at hundreds of times the speed of sound, he would definitely not need to run 100 meters in one second.

It can be seen from the animation that the past Saitama and the current Saitama are in the same frame, and then the other person throws his butt off.

Going all out to complete the exercise is one of the most important reasons why he can continue to become stronger. Otherwise, if he only maintains the intensity of ordinary people's training, even without the limiter, it will only increase it very little. It is impossible to have such an exaggerated increase and strengthening effect as Saitama.

Luther didn't say anything else, and his interest in Saitama ended there.

It seems very powerful without the limiter, but that's it, Luther has already got it.

The original power from the power gem allows Luther to obtain the power he wants. For example, Saitama is a special life form without a limiter. Perhaps there is only one such life form in the entire omnipotent universe. It sounds like it is not as good as the energy of millions of stars exploding after a sip of medicine from the Sentinel.

But it is only a matter of time before Saitama surpasses the Sentinel.

The most terrifying thing about this ability is the unlimited growth!

If Saitama continues to grow endlessly, it is unknown whether he will eventually surpass his own universe or be trapped at the level of a single universe.

However, Luther himself is a Kryptonian + Broly + Doomsday with an absurdly high growth rate, so he does not have these problems.

"It's outrageous. I can actually get stronger at such a fast speed."

After Luther became a dimensional demon god at the level of a single universe, his speed of becoming stronger became extremely slow, but just now, he just tried to do a few push-ups, and he had an outrageous growth like the king's counterattack against Super Saiyan Sun Wukong!

"Infinite growth, this is probably the most important thing to me in the One Punch Man world. The next step is to preach. The Book of Luther allows everyone to become a magician and have the ability to fight monsters without relying on heroes!"

Luther thinks he is a good person. Although this kind of soul lending sounds evil, he will never be like Mephisto, who just signed the contract and then used various accidents to kill the other party and take away the other party's soul.

This efficiency is very fast, but it is too evil. Luther disdains it!

He would never do anything to let the other person live until he was supposed to die, because his soul was destined to be Luther's anyway.

This is the elegance and style of the immortal species. Those who are impatient to kill their employers are just nouveau riche.

Moreover, Luther's approach is strictly to save the common people. He gave the humans in this world the power to fight against monsters!

There are only a few heroes, not even 10,000 heroes. It is beyond their ability to protect so many humans. There must be a lot of things that are beyond their ability.

So Luther wants to help them.

It just so happens that the Hero Association has recently attracted attention from the battle between him and Saitama. Whether it is the battle between the unknown mysterious hero and the monster, or the internal conflict between the two monsters, it shows that there are monsters beyond imagination.

Tornado didn't find anything and was very upset. There was only that big pit at the scene. It was not easy for the Hero Association to conceal the news. More importantly, how to deal with this big pit.

The reason why meteorite craters look harmless is that they have been naturally processed for countless tens of thousands of years. Those that appear suddenly will only cause soil erosion and terrain changes in the vicinity.

Chapter 370 Monster Cells

"magic?"

People in the world of One Punch Man suddenly discovered that overnight, it seemed as if the world had changed.

Before anyone knew it, the magician appeared.

At first, these magicians were thought to be magicians. It was not until they defeated the weirdos that they quickly attracted attention.

"I saw with my own eyes that the strange man who suffered a tiger-level disaster was defeated by the magician named Haqimi using magic. It is said that the reason why he learned magic was because of a magic book called the Book of Luther!"

The passerby who was interviewed said very excitedly.

This incident also attracted great attention from the Heroes Association.

The main thing is that they actually got the magician's battle videos, and the targets were all weirdos.

However, it soon emerged that magicians used magic to rob banks and rich people, which also made those rich people start to feel insecure.

Luther was not surprised that magicians would use magic to rob banks. After all, he originally gave the Book of Luther to people like Taoyuan Tuan who didn't want to go to work, had nothing to do and could just eat, drink and have fun.

Then the fastest way they could think of to get money was to rob a bank.

The Hero Association attaches great importance to the Book of Luther, which has no threshold. As long as you can see the magic book, you can learn magic.

And this is in line with the needs of the Hero Association. They are too short of heroes, especially when the number of weirdos is increasing. The number of heroes now is seriously insufficient. At this time, the Book of Luther turned out to be satisfied. Their needs?

I just don't know if it's dangerous, but the rich men in the Hero Association can't sit still, and the forces they sent out quickly found the Book of Luther.

In fact, this thing is just like wholesale. Luther wholesales it according to the number of people.

A large amount of inventory was distributed at the sight of anyone, and the rest was thrown from the sky when it was too lazy to distribute.

Under such circumstances, a large number of Luther's books could not be destroyed and could only be hidden by thoughtful people.

Because a magician holding the Book of Luther is more powerful than a magician without the Book of Luther!

High-speed Divine Word + Double Casting + Increased Spell Power + Quick Mana Recovery. All of these BUFFs can be obtained by holding the Book of Luther.

Ordinary magicians can only rely on themselves.

Rich people, thoughtful people, and ambitious people hid a large number of Luther's books, naturally to prevent anyone from being able to train a large number of magicians like them.

The number of magicians who have emerged now has exceeded a thousand. Living in a world like the One Punch Man world where ghosts are inferior to dogs and dragons are everywhere, they will die very quickly, so Luther will also return to his roots. Very fast.

However, Luther no longer continued to care about the Book of Luther. He came to Z City.

Z City, Saitama's home, is also called the City of Monsters, a city where ghost-level monsters and dragon-level monsters can be seen everywhere. Because Saitama, the bald devil, is here, basically none of the weirdos here can survive more than a day.

Sykes is also very arrogant, putting the Weird Association under the butt of such a big devil, and he doesn't know why it has not been discovered for so long.

If Saitama finds out, the Weird Association will be destroyed, and it will be an unknown group.

Luther is here just for the weirdo cells. Don't worry about capturing the weirdo's men. If not, you can take away all the Deep Sea Tribe. There is also the underground man who was exterminated by Saitama. You know, the Deep Sea Tribe was killed by Saitama in the underground race. Only after it was destroyed did they dare to go ashore.

It can be seen that even if the underground man is not as good as the god-level underground king in the dream, he is still superior to the deep sea king. He is also a ghost-level weirdo.

Sykes didn't see Luther at all. Luther walked in swaggeringly and took away the inventory made by Sykes. He also saw human heroes by the way.

At this time, the hero was still a human being, but he later turned into a weirdo and was captured and brought to the Weird Association.

Luther doesn't pay much attention to heroes, and being able to easily defeat Long Shao's Baoshan doesn't mean how strong heroes can be.

Even Luther doubted whether the hero could defeat Asura.

After all, Saitama said he didn't feel anything.

"Let's make a reservation and bring the heroes or the entire Weird Association there."

Luther thought so.

Sykes didn't notice anything was wrong after Luther left.

"Human martial arts masters and swordsmen from the Sword Saint Association are good candidates. Bring the weirdo cells to find that guy called ventricular incision."

Sykes looked at the human hero in the footbath of Monster King Orochi. The other person was looking at Monster King Orochi tremblingly. Originally, he was also very powerful. In a mere human body, he was not even a ghost-level monster. His opponent, but facing a dragon-level monster, he was no match at all.

Not to mention the psychological pressure that a weirdo like King Orochi would put on the hero can be imagined.

Luther returned to the Marvel Universe with the weird cells, and hundreds of weird cells were handed over to Genos and the big boss.

"Is this what you said can make people a weirdo?"

Genos looked at the weird cells with disgust, but he was still interested.

What he disliked was the fact that weirdo cells turned people into weirdos, but what he was interested in was what Luther told him, the weirdo cells were very awesome.

"Weird cells are not found in just any weirdo. They have to be collected from a special material. They have the ability to turn humans into weirdos."

According to the plot, monster cells are extracted from the body of King Snake and then cultivated by Sekkus using scientific technology. They have very special abilities and can directly turn humans into monsters very quickly.

Monster cells have many performances in the plot, the most prominent performance is in the martial arts conference chapter, where Haojie brought monster cells to the martial arts conference and threatened the warriors to eat monster cells.

Among those warriors, there are several characters whose abilities and physical constitutions are very weak, especially one character whose physical constitution is no different from that of ordinary people. After eating monster cells, his body muscles swelled and his strength increased significantly.

If his strength as a human was about wolf level, then his strength after becoming a monster was about tiger level, which was a big class improvement, and there were no side effects.

Eating it is almost equivalent to taking effect immediately. Among the warriors in the martial arts conference, except for the explosion mountain who ate too many monster cells, the other warriors stimulated their abilities in their bodies after eating, and it was stimulated instantly.

According to the monster level rankings, most of them are at Tiger level and Demon level. Even though Bakuzan is a shame to Dragon level, he is still Dragon level after all.
