

Kryptonian 45

Chapter 45 Stimulating consumption and panic

Things like mutants have always been handled by SHIELD, but now two mutants suddenly appeared and attacked a big shot. So is SHIELD negligent in their work?

Nick Fury faced the accountability of the Security Council, which was in an emergency meeting, and had to say that he would arrest the two mutants as soon as possible.

"This is an unexpected incident. Mutants are like this. They get superpowers by chance, and then they can't control their greed and commit crimes. I believe these two mutants have no intention of targeting. It's just a coincidence."

Nick Fury lied with his eyes open. No matter what, let's push the current matter over first.

"Does it mean that SHIELD has no way to control the occurrence of this situation? It can be said to be a coincidence once, but what if it happens again?"

How could the Security Council be so easy to fool him? Those who can sit in this position are not good-for-nothings.

They just make trouble and act crazy when they need to. In fact, they are all smart.

Now is obviously a good opportunity to attack SHIELD. It is not suitable for them to continue to act stupid at this time.

Nick Fury also knew that SHIELD had gradually expanded over the years, and its power was too great. Moreover, it overlapped with the powers of many privileged intelligence organizations. Although SHIELD was a global organization, it was inevitable that these people would have opinions.

They felt that SHIELD had too much power and needed to be regulated.

This time was a good opportunity!

"It will never happen again. My people will catch these two mutants as soon as possible."

Nick Fury said with his one eye glaring.

Then the Security Council did not continue to pursue the responsibility. They had already got what they wanted. Nick Fury made a guarantee. If it happened again, SHIELD would not disintegrate, but it would definitely be affected and restricted.

Nick Fury was naturally aware of this, so he raced against time to let his men deal with the matter.

These two mutants had caused a bigger mess than the sky. It was only a matter of time for SHIELD to find them.

Nick Fury thought that the matter was over, but a video recording was circulated wildly on the Internet.

By the time Nick Fury knew about this, it was too late. The number of views of this video had exceeded 100 million!

Although there are billions of people in the world, there are not so many people who have the tools to receive electronic information. If the 100 million views are true, the impact of this incident has spread and cannot be contained.

The mutants that SHIELD has been hiding have been exposed to the public!

Before this, the public did not know the existence of mutants. In addition, mutants are different from mutants. There are not so many of them, and their abilities are not so strong. The reason why mutants are discriminated against is that those who are out of control are very powerful and can easily destroy a block.

As for mutants, the strongest ones are only a few hundred people, which is still within the control of SHIELD.

Those who know the truth will also be dealt with and arranged for confidentiality. For so many years, most ordinary people really don't know the existence of mutants.

It's different now. They know it.

This is naturally done by Luther. If he did such a thing and was covered up by SHIELD, how could it attract attention?

We, the public, have the right to know, okay!

The video also thoughtfully attached the information of SHIELD's research on mutants, which is shocking and terrifying.

"Who did it?"

Nick Fury was furious. He had just said that in front of the Security Council to make a promise, but the next moment, what SHIELD had been hiding was exposed to the sun, including all the information about mutants that SHIELD had dealt with over the years.

It was so complete that Nick Fury suspected there was a mole.

It was impossible for hackers to hack into SHIELD. If it was so easy to hack into SHIELD, there wouldn't be many people who knew about SHIELD over the years. Even Tony Stark didn't know the difference between them and the CIA and the FBI!

How could hackers find what happened last night so accurately and send out SHIELD's information over the years?

This is targeting me!

Nick Fury immediately thought of this. He just said that. Could it be that some country behind the Security Council took action?

This is too much.

Don't blame Nick Fury for making up his mind. There are too few possibilities. He doesn't even know the existence of Hydra. It's impossible for mutants to be involved in any conspiracy with anyone. SHIELD is a multinational global organization. Who else can do such a thing except its own people?

...

Luther looked at the mutants that were hotly discussed on the Internet. Just as he expected, mutants and Monarch Company soon became hot searches, and the whole world was affected by this trend.

In fact, the mutant incidents are all records of how many people were killed and injured. This thing is too scary.

Although the number of people killed in Afghanistan may be more than this in a year, they don't know. Afghanistan doesn't have such detailed records. Naturally, this is more shocking.

After the shock, everyone began to feel threatened and uneasy. Two mutants can slaughter more than 300 armed bodyguards. What if more mutants appear?

Although they still have an army, everyone knows the national conditions of America. The degree of trust that the people have in the American military can be seen from various Hollywood blockbusters. When the military blocks them, they just rush through the blockade and escape.

It seems to be a suicidal act. Many times in the movie plot, they break out of the blockade, take the source of infection out, and then fall.

In fact, the people are scared by the American military. They block you and say that they are blocking virus infection or something, but in fact, they put viruses into the blockade area, and the vaccines injected into you are also viruses, and use you for experiments.

This kind of thing has happened more than once, so would you still believe in such a military?

In this case, the Emperor Company was pushed to the peak of hot discussion, and everyone believed that the Emperor Company was their hope.

For this reason, the Superman Drug stimulated another wave of consumption, and the branch pharmacies of the Emperor Company in various places were sold out.

And more and more people accepted the transformation of Compound No. 1.

Luther and the Emperor Company received more appointments.

The main reason is that they are jealous of the technology of Emperor Company. Although the two mutants are powerful, after analysis by their scientific researchers, they say that the two mutants are definitely no match for Luther.
