

Kryptonian 461

Chapter 461: Punishment of Esdeath

Esdeath watched helplessly as his severed arm grew new flesh and bones, and then recovered to be intact.

If this new arm wasn't much whiter and tenderer than the other arm, like a new baby, she would have thought that her broken arm was just an illusion.

Esdeath clenched her fist and felt that this arm was indeed not as strong as before, but she only needed to exercise for a period of time to recover.

"A broken arm is not a good look."

Luther said.

Esdeath smiled and lowered his head, expressing his surrender.

Luther used a biological force field to control Esdeath to stand up.

"Let's go back to the imperial capital first."

Luther is still very interested in the current situation. The young emperor probably took office not long ago, because Esdeath's rapid rise in position was due to his relationship with the minister. In the past, even if Esdeath had made many meritorious deeds, his boss would always take credit for it. If you pretend to be the leader, it will be difficult to get ahead.

"I am now ordered to annihilate the foreign ethnic groups in the north, Master."

Esdeath said.

"So what?"

Luther looked at Esdeath and said.

"Of course it's based on your orders."

Esdeath said with a smile, she had no idea of loyal ministers and did not serve the two masters, and she did not care about the position of the general. It was just that she had no target before, and for Esdeath, killing the foreign people in the north was for her own people. A process of revenge.

"General Esdeath, do we really have to go back to the imperial capital directly? Without the emperor's order, we will be attacked."

The adjutant persuaded Esdeath.

"It doesn't matter anymore. I am now the master's property. Naturally, I have to follow the master's orders."

Esdeath made it very clear that she did not intend to take the army back and let the army stay here.

Anyway, Luther didn't ask her to bring the army back.

"How is this possible, General Esdeath..."

Esdeath's charm is naturally very great. She conquered the entire army. Watching her goddess become someone else's property, this feeling can definitely make them vomit blood.

Unfortunately, this was something Esdeath had already decided, and he ignored their opinions.

"Does the master plan to go back by flying dangerous species, or is he going back like this?"

Esdeath asked Luther.

"casual."

Luther didn't care either. The super brain detected his body and analyzed that he would need at least a hundred days to absorb the sunlight of this world before he could complete his super evolution.

Then it's time to go to other worlds.

So Luther was left with the idea of having fun.

Esdeath wasn't sure what Luther wanted to do when he went to the Empire, and Luther seemed like he didn't care about anything.

So she chose the dangerous method of flying.

If Luther's purpose was to cause a scene in the imperial capital, then Esdeath would definitely be happy, because she had long wanted to compete with General Bude, who was the double wall of the empire with her.

With Luther's power, it might be easy to overthrow the empire.

The flying dangerous species was very fast, but Esdeath was used as a pillow by Luther, especially the brain waves, which made it feel very comfortable.

Esdeath doesn't care about this kind of thing. In her opinion, it is natural for the strong to do anything to the weak, so she is very obedient.

It's just that Esdeath has never been so close to the opposite sex before, only the same sex, and that woman is still coveting Esdeath's body. Now Luther is so close to her, it can even be said to be intimate, and Luther has the power Powerful, this gives Esdeath a very special feeling.

This kind of danger of life not being controlled by oneself is really exciting!

Esdeath really wanted to try to see if Luther could be killed by sneak attack.

Luther seemed unprepared. Esdeath raised his hand and stabbed Luther in the neck like lightning the next moment.

Esdeath's long-trained body was able to kill people with her bare hands. However, she felt as if her fingers had touched something indestructible, and the reaction force shattered her fingers and palm.

"My body is much stronger than the super dangerous species. Even if I am not prepared, you can't hurt me."

Luther then spoke.

"So that's how powerful it is, my master."

Esdeath clicked her tongue and said, she could feel that Luther really didn't use his magical power, just the power of his body.

What a powerful body this is!

"However, you attacked your master with the intention of killing your master. How do you think you should be punished?"

Luther said lazily.

"As long as the master wants, any punishment is fine."

Esdeath accepted it calmly.

"Well, then I want it to be around the corner."

Luther then said.

"Um?"

Esdeath didn't know what it meant.

The speed of flying dangerous species is like an arrow, thousands of miles per day.

In this situation, Esdeath endured Luther's punishment on her.

She felt like she was "not happy even if she didn't vomit". Luther told her that it was okay. She was suffering from altitude sickness and was just airsick.

Luther massaged her, holding the two pearls in his hands, using his eloquent techniques to help her relax her muscles and bones.

The sea is turbulent, the waves are turbulent, the eagle strikes the sky, the bloody battle is fought to the end, Loulan will never be returned until it is broken!

When they arrived at the Imperial Capital, Esdeath finally couldn't help but vomited out the overwhelming feeling in her stomach.

"You're quite airsick."

Luther was upright and said to Esdeath with integrity.

"If this is considered punishment, it feels good."

Esdeath's cheeks naturally turned red due to "altitude sickness".

It was quite high indeed, because Luther lifted her up.

Although Luther was as steady as a mountain and as solid as a rock throughout the whole process, the feeling was really uncomfortable.

Fortunately, Esdeath himself is a powerful warrior. Even with such a powerful Teigu as Demon God Appearance and Demonic Essence, he did not neglect physical training, and was able to complete the dance of dragons and phoenixes on the balance beam that even gymnasts would be ashamed of. The difficult action of dragon climbing and phoenix attached.

"Of course it's punishment."

Luther said.

Esdeath smiled slightly.

"What are you going to do next, my master? Are you going to enter the palace, kill the young emperor and ministers, and then become the emperor yourself?"

Esdeath asked.

"No rush, let me live the life of a foolish king for a few days. Besides, who told you this is my purpose?"

Luther said disdainfully.

"The life of a faint king?"

Esdeath was very interested and planned to see how he could live like a humble emperor. Could he be like a little emperor?

The news of Esdeath's return to the imperial capital was naturally not hidden from those who were interested.

Chapter 462 Vacation (crossed out), Playing badly (correct)

The imperial capital of an empire is the largest city in the empire. It may sound like nonsense, but in many cases, the imperial capital is not necessarily the largest city in a country.

The imperial capital built since the time of the First Emperor covers an area beyond imagination. It is an unprecedented super-large capital. There is no such large city in either the Western Kingdom or the more distant island country.

The imperial capital's architectural style is in the form of a staircase, with its own class divisions. The closer to the central area, the higher the terrain, as if it were built against a mountain.

In fact, it was just the First Emperor who chose a high-lying place to build his imperial capital.

The most central place is the Imperial Palace. Like the Forbidden City, it is a city within a city. It is extremely huge.

"General Esdeath is back. Isn't she going to suppress the invading foreign nations in the north?"

The pot-bellied Minister Ernest frowned, not knowing why.

What happened to this woman, Esdeath, that she came back without saying a word?

He remembered that Esdeath used to stay in the north for a long time before coming back, and then the foreign races in the north were killed in pieces.

It's just that these foreign ethnic groups in the north are endlessly killing them, and they often come back to invade the border.

Ernest didn't think that Esdeath would fail. A normal person might think that he would come back silently and dejected after failing in the battle. But how could Esdeath fail? That woman was known as one of the twin walls of the empire. The empire's highest combat power.

The number of foreign ethnic groups in the north that were massacred every time was in the tens of thousands. After so many years, more than 100,000 foreign ethnic groups may have been killed.

They come back with great victory every time. How could a foreign nation defeat Esdeath?

No news has come back from the assassination team arranged by Ernest in Esdeath's military headquarters, and he doesn't know what the situation is.

So, Ernest accidentally told the little emperor about Esdeath's return to the imperial capital, and the little emperor was very surprised.

After all, he also knew that every time Esdeath went to the north to fight, it would take a long time before he came back.

"Minister, do you think the war is going badly, or has there been any change?"

The little emperor asked Ernest puzzled and worried.

"Your Majesty, I don't know that General Esdeath has not left her mansion since he came back. Should I ask someone to invite General Esdeath to come over?"

Ernest immediately pretended to be embarrassed and said.

"You should really ask about the situation. If the war is really unfavorable, I will not blame General Esdeath."

The little emperor nodded.

He felt that he was very wise.

After Ernest got the name of the little emperor, he immediately sent people to find Esdeath.

As for Esdeath.

Luther is talking to Esdeath about how "Jade Mountain has fallen down and no one can recommend it" and "has grown up against the crystal plate."

Esdeath has always been a very strong character. After two days, Esdeath felt like he had found a treasure, like a fish in water, and felt like he was reborn.

As the saying goes:

I don't know what happy beans are. A pure body and a pure heart are also virtuous.

This thing is born from the dumpling skin, and it is turned over and over in a hurry.

...

"General Esdeath, your majesty and ministers have summoned you to the palace!"

Esdeath's men said respectfully outside.

Luther played with Esdeath's Happy Valley. After hearing what was said outside, Esdeath looked at Luther lazily.

"My master, what exactly do you want to do?"

She felt that she couldn't understand Luther even more. This man really had no ambition at all. He spent every day either basking in the sun or playing with her.

"Let's go to the palace first. Anyway, you are still a general of the empire for the time being. This status is more interesting."

After Luther finished speaking, he disappeared.

Esdeath didn't care either, knowing that Luther had gone out to bask in the sun again.

I don't know why he likes to bask in the sun so much, and what's more, Luther is too strong. In two days, Esdeath tried every part of Luther's body, and there was no flaw at all.

Even in a place that would be fatal to other men, Luther was actually invulnerable. Esdeath felt that even if Luther didn't have that weird ability, he could defeat her with his physical strength.

Then she was very curious about how Luther achieved such strength. Unfortunately, Luther's response to her desire for power was vague, saying that it was not the right time yet.

What can Esdeath do? All she can do is wait.

Even if Luther didn't want to give it to her, she couldn't help it.

After cleaning up, Esdeath put on military uniform and came to the palace.

Minister Ernest and the young emperor are waiting here, and there is no need for her to go to the main hall. After all, if the war is really unfavorable, of course the less people know about this kind of thing, the better, otherwise it is very likely that those in the empire will be exposed. The thoughtful person is ready to act.

"I have met His Majesty."

Esdeath half-crouched down without kneeling down on the other foot. After all, the situation was different now.

She already has a master, and before, Esdeath was barely considered the little emperor's.

Neither the little emperor nor Ernest noticed this detail. Even if Ernest noticed it, he wouldn't care.

Esdeath can abide by this formalism if he wants to, or he can not abide by it if he wants. This is the privilege brought by strength.

"Excuse me, General Esdeath, why did you suddenly come back to the imperial capital? Is it because the war in the north is not going well?"

The little emperor asked anxiously.

"Your Majesty, the war in the north is going well. I only came back because of personal matters."

Esdeath replied calmly.

"Private matter?"

Ernest frowned. This was the first time he heard the woman Esdeath say this.

However, Esdeath, a woman who leaves her post without permission for her own personal matters, is really willful.

"I see."

The little emperor breathed a sigh of relief. It wasn't just that there were problems with the war in the north. Although the foreign nations were repulsed by Esdeath every time, it did not mean that

the foreign nations in the north would be easy to deal with. Otherwise, before Esdeath rose, the empire will not always be disadvantaged.

What's funny is that Najexitan also chose to betray the empire because of Esdeath's massacre of foreign ethnic groups in the north. She felt that the empire was doing this unjustly.

I don't know if she has ever asked the people of the empire who live on the border of the empire what they think of the foreign peoples in the north.

"What is it? Can the Empire help?"

The little emperor then asked.

He still cares about his generals.

"No need, His Majesty the Emperor."

Esdeath said with a smile, she didn't know what Luther was thinking, so there was no need to speak out at this time.

"Well, if necessary, General Esdeath can ask the minister for help. I believe the minister will be able to help General Esdeath."

said the little emperor.

"Yes, General Esdeath, if you need anything, you can come to me."

Ernest said.

Chapter 463: Ice Monsters in the Far North

"Please rest assured, Your Majesty, I will handle my private affairs myself, and I don't need the help of Minister Ernest."

Esdeath refused.

Neither the little emperor nor Ernest said anything else. Esdeath was a woman of her word, and she would not change her decision.

However, Ernest still decided to send someone to investigate the situation. Also, why hasn't there been any news from the assassination team in the north?

Esdeath left the palace and returned to her home, and saw Luther basking in the sun in the yard.

"You're back."

Luther said.

"Yes, my master."

Although Esdeath already knew Luther's name, she still called him master. This was the consciousness of being a slave and a property!

"Let's go, I'll take you to hunt the ice phoenix in the far north."

Luther said to Esdeath.

"Why hunt the ice phoenix?"

Esdeath asked puzzledly.

She naturally knew what the ice phoenix was.

Because Esdeath's imperial weapon, the Demon God Appearance·Devil's Essence, was made from the material of the super dangerous ice phoenix.

Dangerous species materials give special abilities to the imperial equipment, allowing it to have the same or even better abilities as dangerous species.

The main reason is due to its magic-like ability. However, there is obviously no such thing as magic in the world of Zhan Tong, only blood and blades, but this world has all kinds of dangerous creatures, and the materials that give them abilities are the materials of the legendary super dangerous species.

In other words, the imperial equipment is like the enchanted weapons in fantasy novels, but the difference between the two is that the enchanted weapons are attached with magic, while the imperial equipment is attached with the terrifying abilities of the legendary super dangerous species!

The original dangerous species are classified as follows:

The fifth-level dangerous species are wild beasts that can be found everywhere.

The fourth-level dangerous species look similar to wild beasts, but they do not exceed the scope of earth creatures.

The third-level dangerous species look like a car, and their strength is beyond mortals.

The second-level dangerous species are mainly Asia-Pacific dragon species, King Kong and all fantasy creatures.

The first-level dangerous species are mainly in the image of some dragons, and their strength is strong enough to destroy a town.

The special dangerous species are almost all small bosses. They are not only huge, but also have various super powers.

And the most powerful "super dangerous species"!

The unique setting here is to separate those creatures related to the original myth as super special dangerous species. Their biggest feature is that they have the instinct to communicate across species.

Esdeath's is a blood-type imperial weapon, a terrifying ice imperial weapon, which is called the strongest imperial weapon by Najeta.

It is made of the blood of the super dangerous species living in the Far North. It was previously placed in a pot, and everyone who drank it went crazy.

The mark on Esdeath's chest is the sign formed after drinking blood.

It can control ice freely, attack and defend freely, and its speed and power are amazing.

Imperial weapons are made of materials from super dangerous species.

However, super dangerous species are naturally divided into different levels.

The low ones, such as Black Marlin, are killed and their organs are used to make imperial weapons.

The powerful ones are legendary super dangerous species.

For example, the dragon-type super dangerous species "Cross Tail Dragon/East China Sea Cloud Dragon" living in the clouds of the East China Sea, the First Emperor could not defeat it successfully even with his army. He could only get a hair from the opponent to protect his vitals and create the night attack killer Rab's imperial weapon "Thousand Changes Cross Tail".

This hair is even tough enough to resist space cutting, called "Boundary Cut Line", cutting off the world line!

There is also the imperial weapon of Esdeath, the ice monster in the Far North, which is also powerful and at the top of the food chain of the entire planet.

The First Emperor could only lead the army to injure it and obtain some blood to make an imperial weapon.

Luther could see that Esdeath's blood-type imperial weapon was not a good thing. It turned Esdeath into a hybrid.

A hybrid of super dangerous species and humans!

Just like the special ability of the leader of An Ning Dao, humans and dangerous species are actually hybrids in this world, and there is no such thing as reproductive isolation.

The reason why Esdeath is so strong is that she is a super dangerous species in human form.

Of course, there is also the reason that Esdeath is strong enough and talented.

But there is another woman who is no less powerful than Esdeath, which is the best comparison and answer.

After growing up, Esdeath became the strongest in the empire through the imperial weapon, while the other party was just the leader of an assassination organization.

Luther's idea now is to find the ice beast, kill it, and give its power to Esdeath to see if Esdeath can become stronger.

After a thousand years, the ice beast is likely to be alive.

"Don't you want power? When the original emperor failed to kill the ice beast, you only got a part of its blood. If you can get its original power, how strong do you think you will be?"

Luther said to Esdeath.

Esdeath was moved after hearing this. She really hadn't thought about this.

Yes, since he could become so strong just by getting blood, if he could kill the ice monster, wouldn't he become even stronger?

So the two of them flew away on the special dangerous beast without saying anything.

Ernest had just arranged for someone to test what Esdeath was doing, but after seeing this scene, he was speechless.

"What is this woman doing again?"

He could see that the direction of the special dangerous species was the north. Could it be that Esdeath was going back to the front line?

However, this time Esdeath was going to the Far North, so she did not stop.

The flying speed of the special dangerous species was naturally very fast, but after approaching the Far North, the speed of this dangerous species could not help but slow down.

Firstly, it was because of the cold weather, and it was obviously a dangerous species living in a warm place. It was not adapted and was about to freeze.

Secondly, it was because of the terrifying breath.

That was the territorial breath emitted by the existence at the top of the food chain above it, warning any intruders.

If it weren't for Esdeath, this special dangerous species would have probably run away.

"It's useless!"

Esdeath stomped his foot.

"Here it comes."

Luther said, looking into the distance.

"Huh?"

Esdeath followed and looked into the distance, and then the two saw a huge ice crystal phoenix.

The wings that covered the sky and the sun spread out, and the cold air that hit the face instantly froze the special dangerous species into ice, and it fell headfirst.

"Such a strong cold air!"

Esdeath felt the piercing cold, and her own cold air was completely not on the same level as the other party's.

Chapter 464: Knight of Esdeath

"My master, let me try it!"

Esdeath said to Luther that she planned to test it out herself first.

Of course, she is also interested when she sees a strong opponent. She won't say whether she can beat him or not. Anyway, she will feel comfortable fighting first.

"Are you sure? Your ability is given by the other party, so it may be restrained."

Luther said with a smile, he didn't care.

"That's better, solve it on my own and gain the power of it!"

Esdeath said.

"Then go ahead."

Luther nodded, and Esdeath jumped off the back of the super dangerous species.

Esdeath would not act without Luther's permission. Whatever she asked of her subordinates, she would ask of herself.

Strictly speaking, she is really a worry-free woman.

The reaction of the Ice Monster was a bit strange, especially after Esdeath appeared in front of it, the Ice Monster folded its wings.

At this time, Esdeath saw clearly that this ice monster actually had four wings, or two pairs of wings.

The wings on the forelimbs are connected to the arms, like a harpy.

Then the wings at the back are normal wings, and there is a pair of sharp claws, which look very special.

The strange reaction of the ice monster was naturally because it felt the breath of its own blood coming from Esdeath, and it was a little confused for a while.

A legendary super-dangerous species like it that has survived for who knows how many thousands of years will naturally not mistake Esdeath as its child. After so many years, even a stupid bird will be full of wisdom due to experience, not to mention It is this super dangerous species that can establish communication with people.

Esdeath felt the communication from the ice monster, and she just replied with a battle signal.

The Ice Monster responded immediately.

Without any hesitation, it directly condensed the ice cubes and formed sharp ice spikes. The overwhelming ice spikes and blizzard rushed towards Esdeath.

"This is the first time I have faced my own power."

Esdeath sneered and created an ice shield to resist.

"Bang bang bang bang bang bang!!!"

Esdeath's ice shield is naturally very strong in defense, but it's just that the original plot encountered powerful Teigu users, so it would be broken so easily, such as Susano'o's Amazong Cloud Sword, Akahomi's slashing, etc. wait.

Now, Esdeath's expression changed slightly after feeling the power of the Ice Demonic Beast's ice spikes.

"Esdeath, let me teach you a few tricks."

Luther's voice appeared behind Esdeath.

Esdeath turned around suddenly and realized that Luther had appeared behind her at some point.

He was really elusive, and more importantly, how did he get through the blizzard and get behind him in this destructive scene of a polar blizzard?

I didn't even notice it at all!

Esdeath became even more interested in how powerful Luther really was.

Luther expressed his thoughts to Esdeath.

After hearing this, Esdeath felt that it was very difficult, but you can try it.

"Ice dragon!"

The fingertips of Esdeath's ten fingers are connected, and the palms of the palms are facing each other in the center. The power of ice is condensed in the palms of the hands.

The next moment, a huge ice dragon broke out of the ground, covered with thick ice and snow, and was no smaller than the Ice Monster in size.

More importantly, at the beginning, this ice dragon was still very rough, but with Esdeath's control, it began to become more lifelike.

Esdeath's control is still very strong, and he can control so many ice knights with precision, let alone a mere ice dragon.

"Come on, let me see your power!"

Esdeath controlled the ice dragon and rushed towards the ice monster.

The Ice Monster looked at the ice dragon, and then it flew up and controlled the cold air. An identical ice dragon actually appeared on the ground. The frozen ice dragon was even covered with ice spikes and pounced on Esdeath's ice dragon.

The two ice dragons immediately strangled and became entangled.

"It can actually learn?"

Esdeath was very surprised.

"Its intelligence is not low. It is smarter than most humans. What's more, the nature of this coldness is too easy to see through."

Luther said with interest, he did not expect that this ice monster would learn Esdeath's new skills all of a sudden.

"In that case!"

Esdeath was even more excited. In the far north, her power could be used unscrupulously without physical maintenance.

"Come out, my knight!"

Esdeath put her hand on the ground, and as the light lit up, a huge knight rose from the ground, with both Luther and Esdeath standing on the knight's shoulders.

This huge knight carries an equally huge "mountain-cutting sword", which is huge enough to cut through peaks and mountains!

"Susanoh!"

Esdeath said, her eyes staring at the ice monster.

"In fact, it can also be called Obelisk's Titan Soldier."

Luther said jokingly.

Susanoo was naturally impossible. Esdeath was also a heavy knight wearing heavy armor. The mountain-cutting sword was probably not hundreds of meters long.

Esdeath controlled the huge knight and rushed towards the ice monster.

The ice monster is huge and has four wings spread out, like a mythical beast from ancient times.

Its wings were covered with ice crystals, shining with a cold light.

The claws are sharp enough to tear through steel.

The most fearsome thing is its mysterious power to control ice.

In contrast, the giant knight summoned by Esdeath was majestic and majestic.

Wearing ice crystal armor and holding the Mountain-Slashing Sword, every detail shows its power and extraordinaryness.

The Mountain-Slashing Sword is about hundreds of meters long, and its broad sword body seems to be able to cut through the mountains. The cold air flowing on it echoes the ice power of the Ice Monster.

The Ice Monster launched the attack first.

It opened its mouth, and a blizzard gushed out of its mouth, carrying a biting cold air, sweeping towards the knight.

The knight swung the Mountain-Slashing Sword and slashed at the blizzard.

The giant sword collided with the blizzard, making a deafening roar, and ice and snow splashed everywhere, and the scene was spectacular.

The huge forces collided with each other, ice and snow splashed, and the cold air was pressing.

An unprecedented blizzard was set off in the Far North, affecting countless animals and plants. It was already very difficult to survive in the Far North, and now they are all extinct, even the dangerous species are no exception.

Although the Ice Monster is powerful, facing the knight summoned by Esdeath who has the power of ice, its attack does not seem to have much impact.

Every swing of the knight's mountain-slashing sword could dissolve the ice beast's attack into nothingness.

Although the ice beast's attack was fierce, it seemed insignificant in front of the knight's hard armor.

The battle entered a stalemate, and neither side could gain a clear advantage.

However, this was just the beginning of the battle.

Esdeath's eyes flashed with excitement. She loved fighting and enjoyed the process of fighting against powerful enemies.

Chapter 465: Kill with one punch

"Esdeath, your control is very good. You can move such a huge ice knight freely."

Luther praised, watching the battle between Esdeath and the ice beast with interest in his eyes.

It is not easy to control the actions of such a huge ice knight, such as the problem of maintaining balance.

"I know, isn't this obvious?"

Esdeath said coldly, with only victory in her eyes.

The battle continued.

The ice beast suddenly let out a thunderous roar, full of anger and murderous intent.

It waved its huge wings, raised gusts of ice and snow wind, and launched a fierce attack on the knight.

Esdeath controlled the knight and waved the mountain-cutting sword to meet the attack of the ice beast.

"Break!"

The mountain-cutting sword collided with the wings of the ice beast, making a deafening sound.

The ice and snow flew everywhere, and the whole battlefield was shaken by a powerful energy wave.

But the ice beast did not retreat, but advanced instead.

Seeing this, Esdeath immediately commanded the knight to attack.

The knight swung the Mountain-Slashing Sword and slashed at the Ice Beast with the force of splitting the mountain.

"Bang!"

The Mountain-Slashing Sword collided with the thick ice covering the Ice Beast, making a deafening sound.

The Ice Beast was pushed back several meters by the powerful force, and the knight also retreated slightly due to the recoil force.

This attack was still evenly matched.

"I didn't expect this Ice Beast to be so strong."

Esdeath frowned and was secretly amazed.

Although the knight's power was extremely powerful, a crack began to appear under the continuous attack of the Ice Beast.

Esdeath felt the knight's fragility.

She knew that if this continued, the knight would be destroyed by the attack of the Ice Beast sooner or later.

"Amazing, the knight can do this to my extent."

Esdeath became more fanatical.

"In that case, let's try to face two Ice Knights!"

Esdeath attacked again, and a new Ice Knight appeared next to him, equally huge and towering.

The appearance of the two ice knights made the ice beast a little overwhelmed.

How could they call for help while fighting?

The ice beast roared angrily, waved its huge wings, and launched a fierce attack on the two ice knights.

The two ice knights attacked the ice beast from two directions.

Although the ice beast was powerful, it was also a little flustered under the attack of the two ice knights.

Esdeath controlled the two ice knights and continuously launched attacks, each attack was full of power and might.

Although the ice beast was powerful, it began to show signs of fatigue under such a fierce attack.

Its movements became slow, and the power of its attacks was also weakened.

"It seems that you are just like this."

A trace of mockery flashed in Esdeath's eyes.

She knew that victory was already waving to her.

But at this moment, something strange happened.

The ice beast, which was originally forced by the two ice knights, suddenly let out a thunderous roar, and its body instantly became a circle larger.

The ice on its body became thicker, and its defense increased greatly.

Moreover, its attack became more fierce and swift.

The attacks of the two ice knights could not break its defense.

"How is it possible?"

Esdeath was stunned. She did not expect that the ice beast would have such a change.

The battle that was originally thought to be victorious actually took such a turn.

"It seems that I still underestimated you."

Esdeath said coldly, with a sharp light flashing in her eyes.

She knew that the most important thing now was to break the ice beast's defense as soon as possible, otherwise the battle would be dangerous.

So, Esdeath began to control the two ice knights with all her strength and launched a more fierce attack.

However, no matter how fierce her attack was, she could not break the ice beast's defense.

The counterattack of the ice beast became more and more fierce, and once almost defeated an ice knight.

"Damn it!"

Esdeath cursed in her heart.

She knew that this was not a solution.

This was not over yet, and it seemed that it would never end if it continued.

The Ice Monster roared loudly, and all the strength in its body was gathered on its wings.

It flapped its wings, stirred up gusts of ice and snow, and launched a fierce attack on the two Ice Knights.

At this moment, the Ice Monster was no longer a monster, but an incarnation of ice and snow, an endless gust of wind.

The moisture in the air condensed quickly, and finally formed huge hailstones that fell from the sky!

Each of these hailstones was the size of the hailstones in Esdeath's Hail Fury Leap, but the number was multiplied by who knows how many times.

It was simply the ice version of "Meteor Fall" or "Meteor Shower".

"What!"

Esdeath was shocked. He didn't expect that the Ice Monster could have such a terrifying attack.

This move could completely bury the two Ice Knights, and even the entire Far North was affected, and the hailstones were smashed to pieces.

There was no possibility of dodging at all. The two Ice Knights were smashed by the hailstones and fell to the ground.

Esdeath was struggling to avoid the impact of the hailstones, as well as the terrible shock waves generated by the hailstones hitting the ground, which could shatter a person's internal organs and make people die without knowing what happened.

Fortunately, Luther was next to Esdeath, and he took her directly into the air.

"You can fly?"

Esdeath was shocked, she really didn't know that her new master could actually fly.

"Is it weird that I can fly?"

Luther asked rhetorically.

"The ability to fly is rare, my master."

Esdeath replied, otherwise the dangerous flying species wouldn't be so precious.

The empire doesn't even have such a thing as an air force.

An empire that even has a navy doesn't even have an air force, so you can imagine how precious it is.

"You are no match for that ice monster, let's stop here."

After Luther finished speaking, he punched the flying ice monster.

This feeling is very strange, as if an invisible giant is shaking its fist at the same moment.

The deformation of the Ice Monster is visible to the naked eye.

"Boom!!!"

It was hit directly to the ground by this punch. The Far North shattered suddenly, the earth's crust experienced violent movements, and the Far North drifted.

Esdeath's eyes widened, unable to understand how Luther managed to kill the ice beast with one punch from a distance.

The shattered ice monster was so dead that Luther and Esdeath fell to the ground.

"Go, its original power is its heart, which is a great tonic for you."

Luther has used super vision and clairvoyance to see the structure of the Ice Monster. He has even seen the atomic structure. It can be said that he understands its own body better than the Ice Monster.

Esdeath then approached the body of the ice monster.

Chapter 466 Ultimate Esdeath!

Then Esdeath found the heart of the ice monster. Because it was shattered to death by Luther's punch, the hard ice crystals covering its body for who knows how many thousands of years were also shattered, so Esdeath didn't need to bother to break the defense.

The heart of the ice monster is very huge, but Esdeath saw at a glance what the material of the super dangerous species she needed was.

There was a place in the heart that shone with a deep blue dreamy light. Esdeath used an ice knife to scrape it open, and then saw the glowing crystal.

"Is this the source of the power of the ice monster?"

Esdeath picked up the fist-sized sapphire-like crystal, which made Esdeath not know how to eat it.

"Just eat it directly."

Luther's voice sounded next to her, and Esdeath's body trembled instinctively, and then she was controlled.

She really couldn't stand Luther's elusive appearance next to her.

"Eat it directly?"

Esdeath held the sapphire, indicating that you are not kidding, right?

Then Luther pushed the sapphire, and the sapphire entered Esdeath's mouth.

Esdeath was about to shut up, but she found that the sapphire entered her mouth like an invisible object, and there was no situation that it could not be stuffed in because of its large size.

"What's going on?"

Esdeath was very surprised. The next moment, she felt the chill surging from her body!

Her entire skin was shining blue at this moment, and her long blue hair was dancing wildly, making Esdeath feel very uncomfortable.

Endless cold light burst instantly, enveloping the air and rolling back out.

Wherever the icy air passed, everything would freeze.

Luther knew that this was the activation of Esdeath's ice beast bloodline. It was originally a power of the same origin. Esdeath's body began to absorb the power of the ice beast's core.

But it was not easy to absorb, because this was the core of the ice beast, which was equivalent to the accumulation of the ice beast for countless thousands of years and its will. Even if a beast had wisdom, what else could its will have? It was nothing more than killing and hunting.

If it thinks, it might, but compared to that, the time for thinking is too short. From the fact that it has not moved for so many years, it can be seen that its thoughts have not changed much. It will not look at what the stars look like, will not look for other possible similar species, and even has no need to reproduce.

Esdeath felt a sharp pain in her head, and a huge dangerous species appeared in her mind.

‘Kill it! Eat it! Crush it! Get rid of it! Blood! Flesh! Killing! Eating! Desire! ’

Countless voices appeared in her mind, not just voices, a violent emotion crazily eroded her mind, and she even had an inexplicable feeling of wanting to tear everything in front of her apart.

Esdeath had experienced this feeling before, after all, she had this feeling when she drank the essence of the devil.

But it is much stronger, and even this will is enough to crush, destroy and drown Esdeath's insignificant life. At that time, she will be a completely human-shaped super dangerous ice monster.

"Ugh ah ah ah ah ah!!!!!!"

The voice was like a demon from hell. The visible black energy had covered Esdeath's whole body, and the whole body made a clattering sound. This was a sign that the power of the ice beast had begun to transform her body and was going to completely erode it.

"Hehe... So that's it, this little power doesn't seem to be enough?"

The voice suddenly changed, and the dangerous consciousness in Esdeath's mind stagnated. She didn't expect why Esdeath could resist her erosion. When she was about to completely shatter Esdeath's mind, she felt her body tighten and she was caught by a big hand.

"Even second-rate, no, I'm afraid that even second-rate power wants to erode me?"

Esdeath sneered.

After seeing Luther's powerful power to destroy the world, the influence of the ice beast on Esdeath was negligible.

For those who don't understand high-level power, they may be frightened by the power of this dangerous species and occupy their consciousness. For Esdeath, there is a more terrifying existence next to her, a guy who can kill the ice beast with one punch.

So how could Esdeath be afraid of the ice beast?

The mark on her chest disappeared at this moment, which was equivalent to untying the shackles on her bloodline for Esdeath.

From today on, she is Esdeath, not the ice beast.

Once the shackles were removed, Esdeath's long hair danced wildly, and the cold air around her formed a cold area covering thousands of miles, and endless cold air poured out.

She didn't need to spend several days and nights to condense the ice knight like the final battle in the original plot, and finally form a blizzard covering the entire empire. The entire empire is more than thousands of miles, and now Esdeath can simply cover thousands of miles of blizzards.

The almost endless, vast, surging cold power made Esdeath feel that she was omnipotent at this moment.

Then when she saw Luther next to her, she instinctively trembled, but soon, Esdeath overcame this fear from the heart and attacked Luther.

"Master, be careful, I can't control myself!"

Esdeath said with a smile on her face.

She was full of madness and unrestrained to the extreme.

"Really? Then I have to help you control it."

Luther said with a smile.

She knew that Luther must know what she wanted to do, but she didn't care. She said that just to save herself from being beaten to death by Luther's punch.

Luther also knew why Esdeath said that, and he didn't mind "flirting" with Esdeath, even if after this flirting, the Far North might completely cease to exist due to crustal movement.

Esdeath got the essence of the ice monster's core power, and the effect she exerted was naturally more terrifying.

With the help of the ice monster, she was able to get a glimpse of the essence of ice power.

"Absolute freezing air!"

It just so happened that among the methods Luther taught her, there was an extremely suitable move.

"Absolute freezing air" that pursues the limit of ultra-low temperature!

"Absolute freezing air" is a skill in the anime "Digimon", mastered by the character Steel Garurumon.

The effect of "Absolute freezing air" is to spray a strong breath of ice from the mouth, freezing the opponent instantly.

However, the absolute freezing air that Luther taught Esdeath came from his own "super breath" ability, which is commonly known as Superman's freezing breath.

Now Esdeath condensed the power of cold, the temperature around her dropped rapidly, and then she shot out an ice-blue rainbow light.

Chapter 467: The devastating explosion

This icy blue rainbow light seemed to freeze the space wherever it passed, and time also slowed down at this moment.

It can be said that this move is infinitely close to the freezing time of Esdeath's Maha Bottom.

Under the influence of absolute freezing gas, even if the target is not hit, the effect of slowing down the surrounding time will affect the enemy, making it impossible for them to avoid absolute freezing gas!

Both time and space are affected. As long as you can't jump out of time and space at any time, you can't avoid Esdeath's move!

But Luther just exhaled a breath of hot air.

After this hot air left Luther's mouth, it instantly reacted with the air and turned into a blazing fire, and then the fire was further compressed and became an ultra-high temperature plasma!

In simple terms, it is similar to the atomic breath of the real Godzilla.

The difference is that this is also one of the abilities of "super breathing". In addition to freezing breathing, there is also scorching breathing, which can spray ultra-high temperature hot air, and even exceed the limit of the gas itself. It is easy to reach a high temperature of tens of thousands of degrees Celsius or even hundreds of millions of degrees.

Esdeath's absolute freezing air has absolutely no rival in this world, even if Susanoo enters the liberation form.

The collision between Esdeath's absolute freezing air and Luther's super-high temperature hot air produced a shocking physical effect.

In an instant, the surrounding air seemed to have been drained of all energy and became extremely thin.

The hot air and the cold air met in mid-air, stirring up a strong air vortex.

This vortex was as powerful as a tornado, and its edge flashed with brilliant electric light, which was caused by the ionization phenomenon caused by the extreme compression of the gas and the rapid change in temperature.

In the vortex, the hot air and the cold air started a fierce battle.

The intersection of energy produced a fatal chain reaction.

When the 100 million degree hot air met the absolute freezing air, a series of chemical and physical reactions were instantly triggered.

The hot air quickly heated the freezing air to above its boiling point, while the freezing air tried to cool the hot air to below its freezing point.

This extreme temperature change caused violent vibrations between gas molecules, which in turn triggered a chain reaction of energy.

Molecular vibration and activation Under such extreme temperature and pressure, the gas molecules gain enough energy to make their internal chemical bonds begin to vibrate violently.

This activated state makes it easier for the molecules to react with other molecules.

Due to the ionization of the gas under extreme temperature and pressure, a bright electric light is produced in the collision area.

This electric light spreads like lightning, illuminating the entire battlefield.

At the same time, the free electrons and ions released during the ionization process produce dazzling plasma in the electromagnetic field.

As the energy is released, powerful shock waves and sound waves spread instantly.

The amplitude of these sound waves is so high that the air molecules collide with each other during the vibration process, further heating and compressing them.

The roar of this sound wave is deafening, like a roar between heaven and earth, making even creatures far outside the Far North feel palpitations.

The energy released by this battle between ice and fire is huge. It not only changes the local atmospheric state, but also affects the climate in a wider range.

Due to the release of energy and atmospheric disturbances, the temperature in the collision area and its surrounding areas has fluctuated significantly.

This fluctuation may bring about a sudden rise or fall in temperature in a short period of time, which will have a profound impact on the local ecosystem and biological population.

As the energy dissipated, a short-lived phenomenon of light and shadow residue appeared in the air.

This is due to the optical effect produced by the rapid vibration and mutual collision of gas molecules.

These light and shadow danced in the air like dancing, leaving a gorgeous tail for this contest of ice and fire.

Luther saw it clearly, and the super brain also gave the results of various chemical reactions and physical effects at the same time. After comparing his real earth data, he found that there were still many differences.

After all, the environment is different, which is normal.

Generally speaking, the energy level generated by gas collision may be equivalent to thousands to tens of thousands of tons of TNT explosives, but this is only a rough estimate.

The actual energy level may vary depending on the composition, temperature, pressure and other factors of the gas.

Esdeath did not expect that her killer move would be cracked by Luther, and she herself was affected and was blown away by the explosion.

And because the energy output by both sides can be called natural disaster level, the energy generated is also so large that it destroyed the entire Far North.

It was worse than Luther had expected.

The released energies collided with each other, forming a dazzling beam of light.

This beam of light instantly illuminated the entire world, and the strong light made it impossible to look directly at it.

In the center of the beam of light, there was a chaotic energy vortex.

The vortex spun wildly, releasing waves of destructive power. The surrounding air instantly burned under the action of this power, forming a sea of fire.

In this sea of fire, the original continent no longer existed. Instead, there was a huge crack, and seawater rushed in from the crack, swallowing everything.

The crack seemed to be a portal to another world, which made people feel terrified.

The whole world trembled in the aftermath of this energy collision, as if it would collapse at any time.

"Is this my current power?"

Esdeath looked at the disappearance of the Far North in shock, and looked at her hands in disbelief.

Not panic, but surprise.

"You're overthinking. It's just that my attack and your attack produced extreme physical effects and chemical reactions that have such a powerful effect."

Luther said, hugging Esdeath's waist.

"What is that?"

Esdeath felt that she knew every word Luther said, but she didn't know it when they were combined.

"Anyway, you just need to know that you are still far away."

Luther took Esdeath to find the super dangerous species. This super dangerous species was scared crazy by the big noise just now, and now it is running around like a headless fly.

However, Luther knew that it relied on the magnetic field for positioning. The big explosion just now and the disappearance of the Far North seriously affected the magnetic field of the entire planet. I don't know how many creatures that rely on the magnetic field to live died under the current magnetic field fluctuations, so it seems to be running around everywhere, but it just can't be positioned.

The impact caused by this magnetic field disorder and gravitational tides may last for a thousand years.

Those who develop technology probably climbed the technology tree in vain.

Such a riot, a global magnetic storm, will magnetize a large number of materials and plants and animals exposed on the surface.

The two men tamed this extremely dangerous species again.

Chapter 468 Esdeath wants to be the emperor

Esdeath's strength increased greatly, and she felt even more dissatisfied after returning to the empire.

"My master, can I take over this country for you and make you the emperor?"

Esdeath said eagerly that she had heard that the empire had something called the Supreme Imperial Arms, but she never knew whether it was true or not, and the minister would not say much.

"Why should I be emperor?"

Luther asked funnyly.

"It doesn't matter, I will help you conquer this country, and you will be the emperor."

Esdeath has the demeanor of a black fan leader.

"So, you want to use my name to conquer the empire and then make me the emperor? Why don't you change your mind and become the emperor?"

Luther naturally wouldn't care about a mere throne. To him, behead! He has already obtained the biggest treasure in the world of Crimson Eyes.

If Tifa is Luther's first goddess and has never wavered since then, then Esdeath is the second.

Other than that, Luther looked down on everyone else, including Alice, Yuffie, and the group of girls who attacked him at night.

He is quite dedicated. Most of the dramas are just for fun and he does not have a wife of his own, unlike other otakus who change their wives from season to season.

But if you fall in love with a wife, it will last forever.

"Am I going to be the emperor?"

Esdeath had never thought of such a thing.

She might be able to think of it, but she doesn't have the direction or possibility.

After all, the world of Zhan Crimson Eyes is still a world of blood. Even the minister, Ernest, needs to control the young emperor to control the Supreme Imperial Equipment, because the Supreme Imperial Equipment can only be used by the royal bloodline.

Therefore, Minister Ernest had no idea of becoming emperor.

If it were Luther, he would directly become the emperor, and then let people breed the little emperor, and he would be guaranteed to give birth to a child every year, with enough offspring to control the Supreme Imperial Equipment, and by the way, he would brainwash and shape the descendants of the little emperor from an early age. ideas and values.

Live for the emperor, die for the emperor, devote your whole life to the emperor and die.

Of course, his thinking may be too advanced for people in this world.

So it's not surprising that they didn't think of it.

"Of course, after all, it is you who built the empire, your own actions, your own thoughts, and your own desire to do this. In that case, why did you give me the throne? I did not order you to do this. Although I am your master, I allow you to have the power to act and make your own decisions."

Luther said with a smile.

Esdeath's eyes lit up.

"I can't be emperor."

Then she began to feel unconfident, after all, Esdeath felt that she was self-aware.

"Being a general is no different from being an emperor. As long as you are a good general, you can be a good emperor. Isn't it the best proof that those people love you so much?"

Luther continued that in the original plot, many civilians did have great respect and love for Esdeath and her army, mainly because Esdeath helped them resist foreign enemies.

It's something that the people like to hear and see. How many onions does Najiexi honestly think she is?

You still feel cruel and think the empire is bad, so why don't you ask the people on the border who were invaded and massacred what they think?

Esdeath fell into deep thought, and she felt that what Luther said seemed really interesting.

If you think about it carefully, being an emperor is the same as being a general?

If this is the case, then Esdeath feels that she can also be the emperor. She has this confidence.

"As long as you can bring benefits to everyone, you will be a good emperor."

Luther could see that Esdeath was already moved.

Then he said.

"Isn't that simple?"

Esdeath didn't expect that becoming emperor would be so easy.

So she decided to go to the palace the next day and seize the bird's seat!

"Boom!!!"

There was a big commotion in the palace early in the morning.

Esdeath entered directly from the main entrance, and even because her army was in the north, Esdeath directly used ice to condense the ice knight.

"Esdeath, why are you so crazy?"

General Bude came after hearing the news.

Then he said angrily.

He is permanently stationed in the palace and is the only great general in the empire. Even Esdeath and he are called the twin walls of the empire, but Esdeath is still a general and not a great general. The position of great general can only be held by members of the Bude family. Talent is a hereditary system.

Judging from the original plot, General Bude's strength is not too powerful. At least Esdeath can kill all ten Teigu users when faced with attacks. But for General Bude, Ma Yin plus A few other Teigu users can replace him.

In a real fight, among the four top combat powers in the original plot, General Bude may be stronger than Hundred Man Slayer Brand. If he fights Susano'o alone, he will definitely die.

Facing the dragon-transformed Tazmi and the double-improvised Will, they may both be just the same.

The eldest brother, Brand, couldn't evolve. Although the wavelengths of the Haunting were the same, the eldest brother's Haunting never evolved until his death. Instead, Tazmi evolved several times to gain that powerful strength.

Will was strengthened by the second imperial weapon. Although part of his internal organs was missing, his combat power was still strong enough to compete with the dragon-turned-Tazmi.

The dragon-turned-Tazmi is even so strong that Esdeath can't even come out, and it's basically impossible to find an opponent in the empire, let alone the full dragon-turned-dragon later. Susano-o may only be 50-50 when he comes. .

The supreme commander of the imperial army who is deeply trusted by the emperor, another "strongest" person, together with Esdeath, is called "the two little strong men of the empire", and leads the palace guards.

He is upright and old-fashioned, serving the empire wholeheartedly, and is not polite even to ministers. He is called "old stubborn" by Esdeath and the ministers.

Originally, he followed the ancestral precepts and believed that military generals should not interfere in politics. Therefore, although he knew the corruption of ministers and others, he did not intervene, but used his authority to protect the officials of the conscientious faction.

It can only be said that if it were not for this, Ernest would not be able to control the empire so smoothly.

"Old stubborn, I have wanted to fight you for a long time."

"In that case, then take you down, the sinner!"

General Bud snorted coldly. He is also an imperial weapon user. The imperial weapon "Thunder God's Wrath·Admeller" is the same as Esdeath's imperial weapon. This is an elemental imperial weapon. The armor-type imperial weapon equipped on the body can enhance the striking ability in the hand.

He can manipulate lightning to attack with heavy pressure, strike from a distance, and transform lightning into energy balls for long-range attacks. He can also form a thunder armor around his

body, paralyzing anyone he touches. He is a natural nemesis for close-quarters-based imperial weapon users like Leone and Tatsumi, and he defeated them directly.

He has a wide-range attack skill "Thunder Emperor Summoning" and a beam laser "Solid Shooter", and can also use electromagnetic fields to float in the air.

Chapter 469 General Bude

General Bude knew that Esdeath was very strong, but he was also confident enough.

The main reason is that I have never seen Esdeath's achievements.

Not to mention the current enhanced version of Esdeath.

"Admelech!!!"

General Bude gathered the power of thunder and lightning.

Esdeath looked at General Bude's actions and sighed.

"It's a pity. If it was before, it would be pretty good, but now."

Esdeath waved her hand, and the blue light flashed away.

"What?"

General Bude's pupils shrank, and the lightning he condensed was actually frozen.

Esdeath doesn't know the meaning and operation of freezing the movement of molecules, but she can now achieve this effect very roughly, even if the force is so strong that bricks fly away, so freezing lightning is no problem.

General Bude never thought that Esdeath could freeze thunder and lightning.

"If you lose the power of that Teigu, what do you have left?"

Esdeath put her hands on her hips and said with a smile.

"Arrogant!"

General Bude activated the two pile drivers in his hands and punched Esdeath directly.

Esdeath stretched out her hand to receive the punch.

Before she obtained the power of the Teigu, she relied on physical skills to fight her way to the position of general. She even killed all the dangerous species around her tribe when she was young. Therefore, physical skills are Esdeath's main fighting method. .

"Boom————!!!"

The deafening roar shook the entire palace, but it finally calmed down.

The battle between Esdeath and General Bude ended in a draw.

Although Esdeath didn't take a step back, General Bude didn't take a step forward either.

"You do have some skills."

Esdeath moved her hands. She felt that it was a bit difficult to confront General Bude head-on.

General Bude also looked at his hands, which were now slightly numb.

Although he is a general, he also knows the strength gap between himself and Esdeath.

"But you still have to die."

The thunder and lightning on General Bude flickered, and he punched Esdeath directly.

This punch was wrapped with a large amount of thunder and lightning, which looked very terrifying.

Esdeath didn't dare to underestimate her. She moved her feet and her whole body disappeared instantly, appearing behind General Bude.

"What?"

General Bude was startled. He felt a strong sense of crisis, turned around instantly, and then punched him.

"Boom————!!!"

Fists collided with fists, and General Bude was directly knocked away.

The lightning on his body was also extinguished a lot.

"Damn it!"

General Bude spat out a mouthful of blood and looked very embarrassed.

He looked up at Esdeath, a hint of panic flashing in his eyes.

He didn't expect that his speed would be suppressed by Esdeath.

Esdeath is very fast. If she uses the Teigu, she might be able to kill her, but now that she has lost the power of the Teigu, she is no match for her.

General Bude's eyes became more gloomy. He clenched the pile driver in his hand and looked at Esdeath coldly.

The corners of Esdeath's mouth raised slightly, but she did not let down her guard because she knew that General Bude had not given up yet.

Sure enough, the next moment, the thunder and lightning on General Bude's body shone brightly, and he disappeared instantly and appeared behind Esdeath.

"Suffer death!"

General Bude punched him, knocking Esdeath away.

Esdeath rolled several times in the air and then landed firmly on the ground.

She looked up at General Bude, with a solemn look in her eyes.

Although she was not injured, the power of the blow still frightened her.

If this blow hits her, she will be seriously injured even if she doesn't die.

"You are very fast and very powerful, but your defense is too weak."

General Bude looked at Esdeath coldly, and the thunder and lightning on his body became more and more intense.

The next moment, he disappeared from the spot and appeared behind Esdeath.

"You are strong, stubborn, but you haven't seen my true strength yet."

The aura on Esdeath instantly became different, and her aura instantly filled the entire palace.

Visible frost froze everything around.

General Bude also felt the changes in Esdeath, and the lightning light on his body instantly became much dimmer.

He looked at Esdeath, a trace of doubt flashing in his eyes.

"What are you..."

Esdeath didn't give General Bude a chance to speak. She disappeared instantly and appeared in front of General Bude.

"Die!"

Esdeath punched him, and General Bude reacted in time and followed up with a punch.

"Boom!!!"

A deafening roar resounded throughout the palace, and powerful energy overflowed, shattering the surrounding objects.

The entire palace was trembling, as if it couldn't bear this powerful energy.

In this earth-shattering collision, General Bude was knocked out and hit the wall hard.

Blood spurted out from his mouth, and his body slid down weakly, lying motionless on the ground.

"Your speed and strength are good, but your defense is too poor."

Esdeath walked slowly to General Bud, she looked down at General Bud, and the corners of her mouth rose slightly.

She returned the words General Bud gave her to him.

General Bud also looked at Esdeath, and a hint of cruelty flashed in his eyes.

He knew that he was not Esdeath's opponent, but he would not surrender.

"Even if I die, I will drag you with me!"

Suddenly, General Bud's face showed a hint of cold smile, he suddenly raised his chest and shouted, and the lightning on General Bud's body instantly shone.

As his voice fell, a powerful energy burst out from his body, and the whole palace was shaken violently by this energy.

Esdeath's eyes condensed, and she instantly understood that General Bud wanted to detonate the imperial weapon and die with her.

At this critical moment, Esdeath did not hesitate at all. She released her power calmly, and a powerful energy was released, instantly wrapping the entire palace in a layer of transparent ice crystals.

"Bang!!!"

A shocking explosion sounded, and the entire palace was shaking.

The powerful energy shock wave swept across everything in the palace, shattering the surrounding objects.

However, in this terrifying explosion, the entire palace seemed to be frozen, and the energy shock wave gradually dissipated after contacting the ice crystals.

Chapter 470 The Supreme Emperor's Gear Activated

Esdeath was in the ice crystal, and she looked forward with a firm look.

Her body released a powerful aura, gradually suppressing the shock wave inside the ice crystal.

Her figure was looming in the ice crystal, as if it had merged with the ice crystal.

After the explosion, the entire palace was in a mess.

The ice crystal gradually dissipated, revealing the scene inside the palace.

General Bud's body had disappeared, leaving only debris and dust on the ground.

But Esdeath was still standing there, her figure flashing blue light in the light, like an invincible goddess statue.

"I didn't expect this old stubborn man to have such a strong side."

Esdeath protected the main body of the palace and said as she looked at General Bud who had turned into ashes.

Then she put her hands together, and an ice crystal formed in her hands.

This ice crystal collected everything that had just been covered by the explosion, including the things in the palace and everything of General Bud, which was considered the "ashes" of General Bud.

It is guaranteed that there is not a little less, but there is more.

For an opponent who deserves her respect, Esdeath doesn't mind giving him a lavish burial.

This ice crystal condenses Esdeath's power and can last for thousands of years, even under the scorching sun on a hot summer day.

Because this is already a rule.

The rules will naturally not be shaken by external things.

Esdeath's high heels stepped on the floor of the palace, making a crisp and powerful sound.

"General Esdeath, please stop!"

The guards rushed over, but General Bud did not show up. They already knew what happened. These guards looked heartbroken. As long as Esdeath dared to take a step forward, they would choose to perish together.

"Your courage is commendable, but your threats are nothing to me."

Esdeath sneered, and without her making any moves, the guards found a layer of frost on their bodies, and the frost froze at a very fast speed, and they struggled quickly.

But such struggle obviously did not work. They were soon completely covered by frost and turned into lifelike ice sculptures.

Esdeath continued to move forward. The other soldiers in the palace were already stunned by this scene and stood there at a loss.

"Stop her!"

Someone shouted, and everyone reacted and rushed towards Esdeath with weapons.

But their speed was as slow as a snail in Esdeath's eyes. They fell to the ground one by one without any effort.

The little emperor was being led by Minister Ernest at this time.

"Minister, how could General Esdeath betray the empire?"

The little emperor was puzzled and even dared not believe this situation. He wondered if there was any misunderstanding.

"Your Majesty, General Esdeath has gone crazy. She wants to be the emperor herself. General Bud went to stop her, but General Bud failed. Now only you can deal with her."

Ernest said with a cold sweat.

Only he knew how terrible Esdeath was, but he didn't expect Esdeath to be more terrible than he imagined.

He originally thought that this was his best chance, to let Esdeath and General Bud fight to a draw, and then he could reap the benefits, eliminate General Bud, who was hindering him, and also deal with Esdeath.

But he didn't expect that Esdeath was so powerful that even that guy Bud was no match for him.

The four Rakshasa ghosts who were sent to finish the job were so scared that they ran back and told him that Esdeath had solved General Bud without any damage.

This made Ernest panic. Although he had a secret imperial device that could destroy all imperial devices, who knew if this secret imperial device would be useful to Esdeath?

If it was useful, it would be fine. When Esdeath lost her imperial device, the four Rakshasa ghosts would be able to surround and kill her.

If it was useless, they would die.

Ernest naturally didn't want to gamble his life like this, so he needed the little emperor to activate the supreme imperial device now!

After hearing what Ernest said, the little emperor also remembered the matter of the Supreme Imperial Equipment, which was his ultimate Imperial Equipment.

The Supreme Imperial Equipment driven by the little emperor was also the first and strongest Imperial Equipment of the empire. It was not only the origin of the Imperial Equipment, but also the pinnacle of all Imperial Equipment, and was called the "Supreme Imperial Equipment".

It is said that it has the ability comparable to that of gods, and only those with the blood of the emperor can use it.

The secret technique is "Purge Mode", which combines alchemy and the characteristics of the Imperial Equipment. The appearance changes to a dragon shape, and the user will be eroded by the Imperial Equipment and become bloodthirsty. The destructive power and number of weapons increase greatly, and the hardness of the armor is also improved.

The giant robot comparable to Gundam, the Guardian God Machine, is unmatched whether it is clearing soldiers, defending or attacking.

The little emperor came to the Supreme Imperial Equipment. He looked at this huge robot with awe and excitement in his heart.

This is his power and his responsibility.

He knew that he must protect the empire and his people.

He climbed into the cockpit of the Supreme Imperial Equipment and turned on the switch.

Only those with royal blood can activate the Supreme Imperial Device, so a series of verification procedures are required.

First, the driver's bloodline needs to be verified.

The Supreme Imperial Device has a set of sophisticated detection devices and alchemical rituals built in, which can confirm whether the driver has royal blood through blood analysis.

This process is very strict, and any discrepancy will not activate the Supreme Teigu.

When the driver's lineage is confirmed, the next step of the initiation ceremony is required.

The driver needs to stand at the core of the Supreme Teigu and connect his or her life force to it.

As the ceremony progressed, the Supreme Imperial Equipment began to emit a strong light, and the entire body seemed to be activated.

At this time, the power of the Supreme Teigu is fully ready, just waiting for the pilot's command.

However, this power is not easily harnessed.

Once the Supreme Teigu is activated, the driver's life force will be rapidly depleted.

As a strong current surged through his body, the little emperor felt his strength growing.

He felt the powerful power of the Supreme Teigu and also felt its heavy responsibility.

He knew he had to make the right choice.

The little emperor drove the Supreme Imperial Equipment and walked out of the palace.

He saw Esdeath and the guards and soldiers who were frozen in ice.

He saw the horror of it all and understood his responsibility.

"General Esdeath, why did you do this?"

The little emperor shouted through the loudspeaker of the Supreme Teigu.
