

## ***Kryptonian 471***

### *Chapter 471 Gundam War*

"Poor Majesty, of course it's for the future of the empire."

Esdeath replied coldly.

"Do you think you can become the emperor? The ministers will not recognize you!"

The little emperor asked.

"I don't need the recognition of the ministers, I just need the recognition of the empire."

Esdeath's will was unwavering at this time.

"Do you think your strength is enough?"

The little emperor continued to ask.

"My strength is enough for me to be competent."

Esdeath replied.

"Then let me test your strength."

The little emperor said.

The little emperor stood in the cockpit of the Supreme Emperor, his heartbeat accelerated and his breathing became rapid.

He knew that he had to control this power for the empire and for those who trusted him.

With a strong vibration, the Supreme Emperor began to start.

All the systems inside the body began to operate, emitting powerful energy.

The little emperor felt that his body was surrounded by a powerful force, which was the vitality from the Supreme Emperor.

He knew that he had to control this power.

He concentrated and began to establish a connection with the Supreme Emperor. He felt that his consciousness was integrated with the Supreme Emperor, and he could control its every movement and every attack.

At this time, the little emperor was no longer the weak boy, but a real warrior. He drove the Supreme Emperor and rushed towards Esdeath.

He knew that he had to defeat Esdeath, otherwise the empire would fall into chaos and disaster.

The weapon of the Supreme Emperor was a huge energy cannon.

The red gem on the crown was one of the energy cannons, like the eyes of a giant beast, flashing a dazzling red light and emitting strong energy fluctuations.

The little emperor took a deep breath and infused energy into the energy cannon through the control system of the Supreme Emperor.

He aimed at Esdeath.

"Boom!"

A red energy beam gushed out from the muzzle of the Supreme Emperor, like a fire dragon cutting through the sky, and rushed straight towards Esdeath.

Wherever the beam passed, the air seemed to be burning, and suffocating heat waves rolled in.

Esdeath felt this powerful energy and was slightly interested, but not much.

"Boom!!!"

A mushroom cloud and a huge fireball rose from the ground.

"Ugh!"

Esdeath saw this scene and knew that the energy cannon of the Supreme Emperor was so powerful that it could destroy the entire imperial capital.

If the Supreme Emperor could not be dealt with as soon as possible, the residents of the entire imperial capital might suffer.

So, Esdeath stopped hiding and decided to confront the Supreme Emperor head-on.

She released her power and condensed a huge ice shield to block the energy beam of the Supreme Emperor.

"Boom!"

A red energy beam hit the ice shield hard, making a deafening sound.

However, the ice shield was very strong, and the red energy cannon could only melt the outer layer of ice crystals, and could not shake the inside of the ice shield at all.

And it did not cause an explosion, because the cold air on the ice shield was too cold, slowing down the movement of molecules.

At this time, the little emperor was no longer the weak boy. In his eyes, there was only victory and protection of the empire.

He drove the Supreme Emperor towards Esdeath, firing a more powerful red energy beam.

As the red energy beams intertwined, the entire palace was illuminated red.

Each explosion brought a shocking shock wave, as if to overturn the entire palace.

Dust and smoke filled the air, blocking the sight of both sides.

"I won't let you destroy our future."

The little emperor attacked Esdeath again.

"For our future, you must disappear!"

As the little emperor's shout fell, the Supreme Emperor launched a more powerful attack.

At this time, the little emperor was no longer satisfied with using ordinary attacks. He decided to turn on the purge mode of the Supreme Emperor.

In the purge mode, the energy attack of the Supreme Emperor will be greatly improved, but it will also consume a huge amount of vitality.

However, the little emperor can no longer care about so much. He must defeat Esdeath for the empire!

As the little emperor's will was firm, the Supreme Emperor began to change.

The crown on his head released a dazzling light, and two huge red energy cannons appeared on both sides of the crown.

The red energy cannon in the palm of her hand also began to accumulate energy, preparing to fire a more powerful energy beam.

In the purge mode, the mouth cracked, and the energy cannons revealed by the hideous and terrifying mouth were even more powerful. Ten red energy cannons appeared on each shoulder, and each energy cannon exuded an amazing aura.

"Interesting, but that's all."

Esdeath looked at this scene, she stretched out her hand and pressed on the ground, and then saw a blue light circle appear under Esdeath's feet, and then expanded to a size that almost covered half of the imperial capital, and then a huge frost knight emerged from the light circle.

Hundreds of meters high, covered with heavy ice armor, and holding a huge sword in his hand.

Esdeath stood on the top of the frost knight's head, where a frost throne condensed, and she sat down.

"Come on, Your Majesty, this is the last battle."

Esdeath's leg was placed on the other leg, the corner of her mouth was raised, and she laughed wildly.

The Supreme Teigu's whole body in purge mode is emitting red light, as if it were a burning flame.

"For the Empire!"

The little emperor shouted and drove the Supreme Imperial Gear towards the Frost Knight.

"boom!"

The two powerful forces collided together, making a deafening noise.

The Supreme Emperor's purge mode is turned on at full power, and red energy beams are continuously fired at the Frost Knight from various angles.

Every beam of light carries the power of destruction, as if it will completely destroy the Frost Knight.

However, the Frost Knight is very strong, and the beam can only leave scratches on its body, but cannot shake its interior.

The Frost Knight wielded the giant sword, and every slash was filled with sharp cold energy, as if he was going to cut the Supreme Emperor's sword in half.

The Supreme Imperial Equipment does not show weakness, its fists and feet are still very flexible. Although it is impossible to dodge the attack, it can withstand the attack of the Frost Knight.

It is not ruled out that the imaginary enemy of the Supreme Emperor's Arms may be legendary super-dangerous species such as the Dragon in the Clouds of the East China Sea and the Ice Monster of the Far North, both of which are very large enemies.

The two forces collided fiercely in the imperial capital, making an earth-shattering sound.

The little emperor felt that the Supreme Imperial Instrument was shaking violently, and every attack overloaded its internal system.

Under the attack of the Frost Knight, the Supreme Imperial Arms was almost unable to withstand it.

#### *Chapter 472 Killing One Million People*

"Hmph, the Supreme Emperor is just like this."

Esdeath sneered, her eyes full of disdain and contempt.

In her opinion, this so-called Supreme Emperor is just like this, and it is not worth her spending too much thought.

Ernest was even more shocked. He never expected that Esdeath, that woman, could actually compete with the Supreme Emperor with her own strength!

This is an existence that is regarded as invincible by everyone, but now it seems so powerless in front of Esdeath, this woman.

Then why did he go to great lengths to control the Supreme Emperor by controlling the little emperor?

If you had said you were so awesome earlier, I would have made you the queen and stood on your side!

Ernest thought to himself, with a trace of regret on his face.

"It's over. Esdeath is so strong, and the Supreme Emperor doesn't seem to be a match for her. How about running away now?"

Minister Ernest could already see that the Supreme Emperor was obviously no match for Esdeath's frost giant.

The advantage of that huge frost giant is that it has thick skin and flexible flesh, and even if its body is damaged by the Supreme Emperor, it will not be a problem at all with the endless cold air replenished by Esdeath, and it can be restored in the blink of an eye.

Facing the offensive of the frost giant, the Supreme Emperor's purge mode energy is running out.

The little emperor became more and more desperate. He knew that he had to resolve the battle as soon as possible, otherwise the Supreme Emperor would be unable to continue fighting due to the exhaustion of energy.

Time was running out, and the little emperor was extremely anxious.

So he decided to use his last strength and launched the strongest attack of the Supreme Emperor.

In the purge mode, the strongest attack of the Supreme Emperor is the cluster ray.

This is the ultimate weapon of the Supreme Emperor, which can gather the energy of the whole body together and emit a powerful energy ray.

This ray of light is like a sharp blade that can cut through all obstacles in an instant.

When it shoots at the enemy, it is like a bright lightning that cuts through the dark sky, which is amazing.

The original plot did not use it because Tatsumi found that the weakness of the Supreme Emperor was in the abdomen. Otherwise, if the little emperor used this move, it would be unknown who would win.

The little emperor took a deep breath and infused all his strength into the beam of the Supreme Emperor.

As the power gathered, the Supreme Emperor emitted a strong light.

A dazzling light burst out from the muzzle of the Supreme Emperor's open mouth, and this light gradually gathered into a dazzling beam, like a sharp blade cutting through the sky.

The color of the beam kept changing, gradually transitioning from deep red to deep purple, exuding a chilling breath.

Under the illumination of this beam, the entire battlefield fell into silence, shrouded by this strong light, as if day suddenly fell into night.

Everyone's eyes were focused on this beam, waiting for the final result.

They felt the powerful power contained in the beam, as if even their souls were trembling.

Wherever the light passed, the air seemed to be burning, and suffocating heat waves rolled in.

The air twisted and rolled under the scorching beam, and waves of scorching air came overwhelmingly.

The little emperor clenched his fists and poured all his last energy into it.

He knew that this was his last hope.

The huge frost giant also felt unprecedented pressure in the face of this fatal blow.

Its body began to crack under the illumination of the beam, as if an iceberg was gradually melting under the scorching sun.

Esdeath's eyes were stern. She didn't expect the little emperor to be able to launch such an attack.

"But it's still too weak."

Esdeath sneered, and the frost giant opened its mouth, and the cold gathered, condensed, and compressed in its mouth.

The frost giant's whole body began to flash with a blue light, and the cold air in its mouth increased greatly.

"Absolute freezing air!"

A deep blue light gushed out of the frost giant's mouth.

Wherever this blue light passed, the world froze and the flames went out.

The impact was like a volcanic eruption, and the whole city trembled.

The two huge forces collided violently in the air, causing a shocking explosion.

The entire battlefield was shocked by this force, as if the end of the world was coming.

The energy of ice and fire collided, and ice rings and flames collided in the air, and the residual power swept through like a tsunami wave after wave.

The hard shell of the Supreme Emperor's device was broken, revealing the flesh and blood of the huge super dangerous species inside.

It was originally transformed from the corpse of a dragon super dangerous species, so it has the powerful energy cannon.

That is actually the ability of this super dangerous species.

The body of the frost giant has become riddled with holes, and the dazzling light gradually dimmed.

Finally, the light dissipated, and the muzzle of the Supreme Emperor's device slowly closed.

The little emperor looked at the scene in front of him, and a sense of helplessness and sadness surged in his heart.

He knew that he had tried his best.

However, in this contest of great disparity in strength, he still lost.

The Supreme Emperor lost control and fell to the ground.

Esdeath came down from the frost giant, and the frost giant drifted away in the wind.

"From today on, I am the new emperor of the empire!"

There was no need to pronounce the death of the little emperor, Esdeath disdained it, but Minister Ernest would definitely not be able to escape, because Luther taught her that she had to kill the chicken to scare the monkey, and find a target that would not be enough to appease the public anger without killing.

And Minister Ernest and his son Sheila are obviously such people.

So after Esdeath successfully won, she did not go to the self-pitying little emperor in the Supreme Emperor, but ordered everyone to go to Minister Ernest and his son Sheila.

In addition to the imperial guards who guarded the palace, the imperial army also had the Imperial Capital Guard, where the master of the crazy woman Seleu was. Apart from that, the imperial capital did not have its own army.

Or, the imperial guards were the army.

Now, the new emperor has ascended the throne, and Esdeath still defeated the Supreme Emperor with absolute strength and sat on that position with a record of shocking the entire imperial capital. After Esdeath announced her victory and ascension to the throne, no one dared to disobey her orders.

Minister Ernest's escape was still very successful, mainly because he was originally from the Royal Fist Temple, just like the Four Rakshasa Ghosts, but later Ernest was lazy and abandoned himself.

In addition, the exiled Sheila happened to return to the empire at this time. Sheila brought back a large number of strong people he had found around the world, but found that an unimaginable war was taking place in the imperial capital. By the time he found his father, the Supreme Emperor had already lost.

Ernest quickly ordered his son to run away.

### *Chapter 473 The Second Humanoid Super Dangerous Species*

During her travels, Sheila developed martial arts skills by learning from the strong points of martial arts from various countries. She was good at windmill kicks. She once defeated dozens of disciples of the Imperial Fist Temple alone. She was evaluated by General Bude as a young but accomplished kung fu master.

During his travels, he recruited famous criminals and masters from all over the world, and also collected Teigu scattered outside the empire.

Sheela's Teigu, Dimensional Phalanx, and Shangri-La are space movement type Teigu.

The setting device can instantly move the target to a predetermined marked position, and its performance is one of the few among all Teigu.

Thanks to this Teigu, Minister Ernest was able to escape.

It's a pity that they don't know where Luther can see them. He plans to report to Esdeath and let Esdeath send people to hunt them.

There are a lot of people who have a blood feud with Minister Ernest and Sheela, so there is no need to worry about no one chasing them.

Ernest left in a hurry and did not take away the Imperial Equipment in the Imperial Equipment Storehouse.

Even the failed "official implements" made by subsequent emperors following the example of Teigu were not taken away.

There were only four Rakshasa ghosts around him, as well as the masters brought by Sheela's snare.

It is considered to have good strength, but it is nothing compared to the empire.

"What? Can't find it?"

Of course, Esdeath didn't know about this, and the rest of the security team and personal guards were breaking out in cold sweat.

"Your Majesty, please calm down. Maybe Minister... No, Ernest died in the battle between Your Majesty and the Rebel Emperor, so we couldn't find him."

They said quickly.

Esdeath felt that this was a possibility. After all, with Ernest's size, it was very possible that he died accidentally.

"No, they just escaped."

Luther suddenly appears.

"Who?"

The guards and guards said immediately.

"My master, how do you know?"

As a result, they heard words that shattered their outlook.

The invincible Queen Esdeath actually called the other party master?

How is this possible!

Is this pretty boy more terrifying than His Majesty Esdeath?

"No need to doubt, I just know that Ernest's son Sheila has an imperial tool called Dimensional Phalanx Shangri-La, which can transport people, so naturally you can't find them, but I can see where they are, I think we can play a game to organize those who have a grudge against Ernest and his son to take revenge, called [Battle Royale]."

Luther said with a smile.

He also said that he would only give an approximate location each time, and whether they could find the person would depend on their ability, but he ensured that it was absolutely correct and that they would not be allowed to run away.

After hearing this, Esdeath felt that this game seemed very interesting.

She felt that it was more interesting than torture. Battle Royale. Her master was really a genius. Why didn't she think of such a fun game?

"Avenger, but the manpower cannot be too weak."

Esdeath thought about it and realized that Luther had told her who was around Ernest now. In addition to the four Rakshasa ghosts who could hunt down the Imperial Arms users, there were other Imperial Arms users.

If ordinary people were sent there, they wouldn't be able to defeat it.

The Teigu user is still very powerful. Regardless of the original plot, it seems that anyone can kill the Teigu user, but when these people say that they are powerful, they always say that they can compete with the Teigu user.

There are no three beast warriors around Esdeath yet, and General Leva was framed and arrested because he refused to pay bribes. He was later rescued by Esdeath and has been loyal to her ever since.

In other words, at this time, Brand did not betray the empire.

After all, he betrayed the Empire only after Leva was imprisoned.

Luther mentioned it to Esdeath, and Esdeath called out Leva and Brand with interest.

Although one-third of the imperial capital was destroyed by the battle between Esdeath and the Supreme Imperial Instrument, it was still being rebuilt, but it did not affect the functioning of the empire, so Leva and Brand were quickly found.

"Liva, Brand, you both have the talent to become a Teigu user."

Esdeath's outfit remains unchanged as she doesn't like wearing the crown and wearing that outfit doesn't look comfortable at all.

"His Majesty?"

Levi and Brand were both stunned. They had no idea what Esdeath was looking for. Was he going to make them Teigu users?

"The empire's most serious criminal, Ernest, and his son escaped. Now the empire plans to set up a department to hunt them down, regardless of life or death. The name of this department will be [Avengers]."

Esdeath said calmly.

"I see."

Leva and Brand understood. They were originally a little uneasy about Esdeath, a new emperor. They didn't know why they summoned two fringe people. But now after hearing about such a thing, plus Ernest Everyone's notoriety is really known to everyone, so there is no need for Esdeath to continue talking, they all want to come forward.

"Your Majesty, please rest assured, I will definitely arrest Ernest!"

Brand said even more impassioned, making the good man's blood boil.

"It doesn't need to be like this. If you're not sure, you can just bring the body back."

Esdeath is still very considerate of her subordinates.

"Yes, Your Majesty!"

Both Leva and Brand said.

The two of them immediately accepted the Teigu from their original plot. The difference was that after Brand accepted the Teigu: Haunted by Demons, he was also asked to spar with the Queen Esdeath.

The main thing is that Esdeath is curious about whether what Luther said about Brand's strength being second only to her before is true. Luther also said that the Imperial Tool·Devil's Haunting has infinite potential. If she keeps breaking Brand's armor, Brand can quickly become stronger.

At the same time, the armor will become harder, and it will be difficult for Ernest and others to break through it.

Luther plans to let Brand complete super evolution and withstand the damage of various imperial tools, including but not limited to the poison of Murasame, which kills with one blow.

Tyrande can definitely adapt to this thing, it's just a matter of quantity.

After all, the original super dangerous species does not have such a thing as cursed poison, it is just the most poisonous in the world, and it is the poison in the form of curse that is added with alchemy.

As for Brand's death from toxins, Luther decided to help him overcome it, and he would breathe poison gas every day when wearing the Devil's Haunting.

Although this will accelerate Tyrande's cells to erode Brand's flesh and blood, and Brand's body will become riddled with holes in the end, but once he starts to transform into a dragon, Brand will have the strongest human body in the world.

Like Esdeath, both are extremely dangerous species that have the potential to become humanoids!

The only difference is that one is mentally dangerous, while the other is physically dangerous.

#### *Chapter 474: Conquering the enemy without fighting*

Luther felt that in the world of Crimson Eyes, developing dangerous humanoid species was more promising than researching Teigu.

The premise is to be able to control yourself.

Otherwise, whether it is becoming a dangerous species mentally or physically, it is just a path to failure.

It just so happens that Tyrande cells are a good thing.

This thing is similar to the universal "Hashirama Cells" in Naruto. Anyway, as long as you can withstand the erosion of Hashirama Cells, you can easily become a shadow-level powerhouse.

The same is true for Tyrande's cells. After being made into a Teigu, its cells and flesh are still alive. You must know that this is already an alloy armor mixed with metal. As a result, it is still alive like this, which is equivalent to cell-level immortality and regeneration. And can be resurrected at any time.

And the scariest thing is its adaptability.

The highlight of the original plot is that Tazmi adapted to the ultra-low temperature "Mahabatmo" that can freeze time for the second time!

The ability to move was restored while time stood still.

In theory, Tyrande will have the most powerful body in the world.

The key is that there is not just one thing, but a group of them.

There are different versions of Tyrande in various extreme environments.

For example, the volcano Tyrande can release flames and magma at thousands or even tens of thousands of degrees.

Sky Tyrande, for example, can command storms and thunder.

The Tyrande pursued by the First Emperor even evolved the ability to become invisible in order to avoid the army. After being made into a Teigu, the Teigu also gained the ability to become invisible.

I don't know if there is a super-ancient Tyrande who has become the strongest in the world. This also makes the world of Zhan Crimson Eyes very deep.

The body hair of Donghai Yunzhonglong that protects important positions can block the power of space cutting. That is space cutting. In theory, no matter or energy can block it.

As long as Tyrande gives it time to adapt, it will definitely be able to do the same thing, and even surpass the East China Sea Yunzhonglong.

Maybe there's also Cosmic Tyrande or something.

Anyway, Tyrande is equivalent to Doomsday and Godzilla in this world. The upper limit of evolution is currently unknown, but he will definitely become the strongest in the world.

The world's strongest creature that dominates the sea, land and air!

Brand's body has become riddled with holes after repeatedly overdrawing his life force and allowing evil spirits to haunt him and evolve.

But his strength now definitely exceeds the peak period of the original plot, and he may not be able to kill him with one punch.

At the same time, Luther also observed that Tyrande cells eroded Brand, causing Brand to transform into a dragon like Tazmi in the comic, and powerful life force began to emerge from Brand's body.

After this period of time, Brand will become a super strong person.

Luther had Tyrande cells extracted from Brand's own cells, and then conducted experiments on death row prisoners.

These prisoners on death row were all cancers of the previous empire, and they were all the kind that would not anger the common people if they were not killed. Now they have all become prisoners on death row and experimental subjects.

Esdeath took time out of her busy schedule to find her master to make money every day to fill the void.

But it was discovered that Luther was conducting experiments.

"My lord, what are you doing?"

Esdeath watched as a half-human, half-dragon monster, covered in dragon scales, fell to the ground, apparently dead.

"Create a group of powerful subordinates for you, but Tyrande's cells are too powerful. Even if Brand's cells are used to neutralize them, the result is that they still cannot support the erosion of such cells without a strong body. They have been dead for thousands of years. Tyrande, if it were original Tyrande cells..."

Luther clicked his tongue and said that for him, these are just entertainment projects, and they are easy to solve. With his current super brain, he can solve this problem casually.

"Powerful body? How about the foreign races in the north?"

Esdeath said brightly, she did not resist having a group of powerful subordinates.

"Alien people from the north?"

Luther remembered that at this time, Esdeath had not yet killed the hundreds of thousands of troops from the foreign nations in the north.

"They invaded again?"

Esdeath nodded.

"Yes, this time I plan to kill them all directly, and then leave those children behind to make them hate the empire."

Esdeath said with a smile.

"That's right, that's right. Born in sorrow and dying in peace and contentment, you will be invincible to foreign patients, and your country will perish. Only by using the foreign peoples of the north as the whetstone of the empire can the sword of the empire be kept sharp."

Luther praised that Esdeath's behavior may be very problematic, but it is very appropriate.

Who makes the empire unable to find a decent opponent? Whether it is the Western Alchemy Kingdom or the Northern Kingdom, they are either too weak or too far away, which is not conducive to the empire's expedition unless they are full and have nothing to do.

In the eyes of the empire, those places were remote and remote and not worthy of their expedition.

"Actually, there is no need to kill them all. To rebuild the empire, manpower is needed in many places, such as mining. You have to make full use of your human resources and turn them all into slaves and use them until they die."

Luther continued.

Esdeath listened attentively. She knew that the knowledge Luther imparted could help her fill her own shortcomings and shortcomings.

Of course, it's not just knowledge either.

Luther is a good teacher, and Esdeath is still the queen. Although he seems to have slept with several empresses and goddesses, it doesn't matter, Esdeath is different after all!

So Luther was very interested and taught Esdeath step by step how to climb mountains to pick out pearls, jade, and brilliance.

When this teaching by example was over, Esdeath felt that she had suddenly realized something.

Esdeath planned to lead the army in person, to show her civil and military virtues with a great victory, and to divert the current contradictions within the empire.

The contradiction within the empire was a struggle for orthodoxy. After all, Esdeath was not in the right position, so this problem must exist.

"Facing opponents, it is impossible to simply eliminate them. That will only make you a tyrant. However, the founding emperor does not need to worry about this problem, so change the name of the empire to the Empire, the Esdeath Empire!"

Esdeath listened to Luther's words, so now the empire is officially renamed the "Imperial Kingdom", and Esdeath is the first empress.

With her physique as a dangerous humanoid species, it is not a problem to survive for a thousand years or even longer.

Esdeath took the first war of the Empire very seriously. Although she felt that she could handle it alone, Luther told her that she not only had to show her military strength, but also her army.

Only in this way can we deter most people, and kill all the stubborn elements who still oppose.

This is called "subduing the enemy without fighting" and "using both kindness and force".

Esdeath didn't understand, but she obeyed.

#### *Chapter 475 Biological Imperial Tool*

"By the way, although the experiment of death row prisoners becoming dangerous humanoid species failed, there are also some successes."

Luther said to Esdeath.

"What?"

Esdeath asked with interest. She knew that with her master's strength, what she could create would definitely not be something weak and vulnerable.

"The biological Teigu created using Tyrande cells mixed with Brand's cells has very strong combat effectiveness."

Luther took Esdeath to an open place.

Esdeath saw three-headed and two-meter-tall dragon men.

It was very similar to what she saw on the death row, but there was still a difference, that is, these three dragon men looked stronger, and their strong vitality was almost ready to be breathed out.

"Biological Teigu? Where are their Teigu users?"

Esdeath asked.

"There are no Teigu users. They are biological Teigu that act independently. I improved the technology of the biological Teigu to create them."

Luther said calmly.

As long as the core of a biological Teigu is not destroyed, its body can be reborn indefinitely. This is why biological Teigu is more difficult to deal with.

Teigu's technology poses no technical barriers to Luther and can be copied and manufactured directly.

Even improvement does not require any superpowers, only a super brain can do it.

"This one is a steel dragon, with an iron wall-like defense. It is stronger than the evil ghost and the noble chariot, and it is infinitely more powerful."

Luther pointed to one of them and said.

Its surface is covered with a layer of exoskeleton, which is thick and hard, as if it is made up of pieces of iron plates, showing a metallic luster. There are also spikes and barbs on the surface, making it extremely ferocious.

There are also fangs and sharp claws. The claws are as long and sharp as the original claws of the murderer, and gleaming with cold light.

Its eyes were like two steel-cold beads, revealing an unshakable determination.

The body of the steel dragon is huge and strong, and every muscle seems to have been carefully carved, making it appear to be infinitely powerful.

"This one is an ice dragon. It can use your cold power to attack and fly. It is a control unit."

Its body showed a cool white color, as if it were carved from ice and snow.

Its eyes are ice blue, as if they can freeze everything.

There is a pair of huge ice wings on the back of the ice dragon, and the wing membranes are hung with crystal clear ice, as if it can trigger an ice and snow storm with just a slight wave.

"This one is a thunder and fire dragon. It is responsible for output and has the ability to release thunder and fire. I added a special dangerous species with thunder and lightning capabilities to create it."

Its body is covered with scales, each one like polished metal, shining with sharp light.

Its eyes are blazing red, like two burning flames.

The end of the Thunder Fire Dragon's tail flashes with lightning from time to time, indicating that it has powerful lightning power. The tail even has a head, which looks like a snake head, spitting out thunder and lightning.

At the same time, the Thunder Fire Dragon's mouth can spit out blazing flames, as if it can instantly burn everything to ashes.

Luther introduced with interest.

Esdeath felt very satisfied. These three biological Teigu looked very powerful, and more importantly, they did not require an Teigu user.

"They have high intelligence, can obey orders, and can fight independently. And unlike ordinary biological Teigu, they can be reborn even if their core is destroyed. It can be said that unless their bodies are completely destroyed, they will be just immortal."

Luther handed over control to Esdeath. Esdeath's first order was to let them besiege her. She planned to personally test the ability and combat effectiveness of these three biological Teigu!

Luther was not surprised, this is the character of Esdeath.

"Come on, please me."

Esdeath waved her hand, and the three-headed biological Teigu immediately rushed towards her.

Esdeath didn't move. She disappeared instantly after the three biological Teigu rushed forward.

The next moment, Esdeath appeared on the top of the steel dragon's head and kicked a large hole directly into the top of the steel dragon's head. Then he held the ice blade that condensed in an instant and stabbed it down, piercing the steel. Dragon head.

The huge body of the steel dragon fell to the ground, but it did not die, but struggled to stand up.

Esdeath would not give it a chance, leaping down and trampling on the steel dragon.

Along with a shrill scream, the Iron Dragon's body completely exploded.

However, when the smoke dissipated, the core part of the steel dragon was still in place, and its body began to rapidly reorganize.

"It's interesting."

Esdeath licked her lips. She controlled the power of the blow just now to only destroy the nerves and tissues around the core of the steel dragon, but did not completely destroy the core.

"Try this!"

The ice dragon opened its huge mouth, and an icy cold breath swept out, roaring towards Esdeath like an ice and snow storm.

On one side of Esdeath's body, he easily dodged the breath of the ice dragon, and then appeared in front of the ice dragon in an instant.

She clenched the ice sword with both hands and slashed it down suddenly.

The ice dragon raised its front paws to block.

However, the next moment, the ice dragon's front claws were neatly cut off!

The ice dragon let out a shrill scream.

But Esdeath didn't pause, and chopped off the ice dragon's head with a backhand sword.

The ice dragon fell to the ground with a crash.

However, like the Steel Dragon, the Ice Dragon's core quickly reorganizes its body.

"It's not over yet!"

The Thunder Fire Dragon instantly appeared behind Esdeath. The snake head at the tail had its own will and spewed a visible lightning towards Esdeath!

Crackling!

The Thunder Fire Dragon opened its huge mouth and spewed out a hot flame, as if it could melt everything.

However, Esdeath seemed not to notice and let the Thunder Fire Dragon attack.

The Thunder Fire Dragon's attack fell on Esdeath almost at the same time.

In an instant, a powerful force of lightning and thunder poured into Esdeath's body, and at the same time, the hot flames wrapped her body.

However, the next moment, the power of flames and lightning disappeared.

The Thunder Fire Dragon was stunned. What happened?

Its attack was ineffective?

The next moment, Esdeath's figure appeared on top of the Thunder Fire Dragon's head.

"Too naive."

Esdeath punched the Thunder Fire Dragon's head so that it sank into its abdominal cavity.

It was a completely one-sided crushing, and Esdeath felt very satisfied.

Even though she was crushing them, in fact, if it was anyone else, even the stubborn General Bud, he would definitely be dead or disabled under the siege of these three biological imperial tools.

The Iron Dragon, Ice Dragon, and Thunder Fire Dragon recovered quickly.

"Not bad for the recovery speed."

Esdeath was even more satisfied.

*Chapter 476: Tatsumi Trio*

Esdeath took away the three biological Teigu and began to recruit troops.

The empire will definitely have to recruit troops again. The difference is that Luther said that she will produce her "Imperial Gear" next. In fact, it is an improved version of the armor-type Imperial Gear. Luther used his super brain to carry out the task. Improvement.

The empire recruits soldiers and improves the treatment of the army. After all, Esdeath is from the army and knows the needs of soldiers very well, so there is no need for Luther to say anything in this regard. Anyway, it is impossible for her to recruit soldiers according to the modern military system.

It was Luther who asked her to change her position in the army in a bad way.

For example, there is no military rank of marshal, and the highest military rank is "three generals."

Directly responsible to Esdeath.

"Three generals, is that too much?"

Esdeath didn't know what the three generals were, she could only understand them from her own perspective and knowledge.

"Definitely not many. These three generals are what you use to control the army. They check and balance each other and stand as three pillars. This way you don't have to worry about someone becoming a dominant force. Then there is the general, the highest position under the general. Just set up seven. Yes, Your Majesty, Seventh General."

Esdeath feels weird. There are three generals and seven admirals. Why do we have to limit the number?

"This is to allow them to compete for power and prevent them from joining together. Otherwise, the balance of power will easily become unbalanced."

Luther was talking serious nonsense.

"Don't worry about that kind of thing, I'll take care of them."

Esdeath said confidently.

"But an empire that is always in chaos and an empire that has many internal conflicts are not good things. How many people can you kill? Are you going to kill everyone in the empire?"

Luther fooled Esdeath.

"Tsk."

Esdeath has now discovered that being a queen is really troublesome. Ernest is relaxed, but he doesn't care about things, which leads to the empire being in a mess.

Esdeath naturally didn't want to be like that guy Ernest, so this made her feel very troublesome.

Fortunately, Esdeath still has her own master.

Her master was not interested in becoming an emperor, but he was interested in cultivating a queen.

"Master, do you want to experience the pleasure and taste of being the queen of a great empire?"

Esdeath clamped her legs around Luther's waist and asked.

"What is an empress? I have experienced all the empresses. An empress is in charge of an entire galaxy. There are countless worlds in a galaxy, and there are countless countries in countless worlds that are greater and more powerful than your empire. To me, These are not worth mentioning."

Luther said disdainfully.

"Empress?"

Esdeath is very sensitive. I wonder if it is because Luther has entered her heart many times that Esdeath's character has begun to change, such as "possessiveness" and "desire to conquer".

Even if she is stronger than Luther now, it is impossible for her to kill Luther. She will only want to possess Luther and conquer him!

Now when she hears Luther talking about countless worlds and kingdoms, Esdeath doesn't know why she feels that Luther seems to be ethereal and might leave her at any time.

"Countless worlds, countless countries, master, will you leave me? I'm just your plaything?"

Esdeath did not doubt Luther's words. She had already seen clearly that Luther was a very arrogant person. It was impossible for such a person to lie.

"It depends on your performance. There are many kinds of playthings. Some treat them as treasures, while others discard them as if they were nothing. Which one do you think you are?"

Luther asked, lifting her chin.

"Don't worry, my master, I will become your most precious plaything."

Esdeath said with a smile.

"Then I'll wait and see."

Luther nodded slightly.

The recruitment went smoothly, and the empire was now in dire straits. Esdeath seemed to be a queen who valued military affairs over civility. In addition, Esdeath had people send recruitment flyers to the whole country in advance. So, a month later, the recruitment craze broke out.

An endless stream of people became soldiers of the empire, including the trio of Tazmi, Iyeas, and Sayu who came to the city from the countryside.

The young swordsmen who came to the imperial capital to save their villages successfully joined the army this time.

"Her Majesty the Queen is about to conquer the foreign nations in the north. We can take this opportunity to make meritorious deeds!"

Sayu said with admiration, she is a girl, of course she admires Esdeath who became the queen, which also led to many more female soldiers in the army.

Esdeath is very charming in the empire, otherwise she would not have had much civil opposition after becoming queen.

"Don't worry, Tazmi and I are very strong and we will definitely get the reward and save the village!"

Iyeas followed.

"That's right!"

Tazmi was also excited.

The three of them showed their ambitions, but they didn't expect that they would be directly selected as "Imperial Arms Envoys". Of course, they were not called that to the public, but "Royal Knights"!

"What is this Royal Knight?"

The three of them were all confused, and the officer responsible for informing them explained to them with an envious look.

"This royal knight is the first technology developed by the empire. It is said that it cracked the empire... The new equipment created by the former empire's Teigu technology, once obtained, can compete with the Teigu user, or even surpass it. You guys The three of them didn't know what luck they had, but they were able to directly become royal knights."

"Is that so? What is an Imperial Equipment User?"

The three of them were still confused. They came from the countryside and had never seen any Imperial Equipment Users or Minister Equipment Users. Their veteran instructor looked very powerful. He could make Tatsumi kill the first-level dangerous species in seconds.

You should know that the first-level dangerous species is the strongest dangerous species below the special dangerous species and the super dangerous species. It can be seen that the veteran is not simple.

"You don't even know the Imperial Equipment User? You must be from the countryside."

The officer was speechless and threw a booklet to them.

"Take it and read it. This is the information on various Imperial Equipment Users, Minister Equipment Users and Dangerous Species compiled by the Empire. Only officers have this information."

The officer also planned to make friends with these three future Royal Knights.

Otherwise, such information can be said to be priceless and enough to be passed down as a family heirloom. Only officers have it because it is difficult to popularize it. At present, Esdeath has established a military academy to train soldiers and officers with complete civil and military skills according to Luther's instructions.

What if there is a lack of talents and you want to break the monopoly of the nobles?

Set up a school!

"Um, sorry, we can't read."

Iyeas said with an awkward smile.

Officer: "..."

### *Chapter 477 Royal Knights*

In the end, Tazmi, Iyeas and Sayu finally understood what a Teigu user and a vassal user are through the officer's patient explanation and the pictures and texts in the booklet.

This booklet is as thick as a Xinhua dictionary, about the same size, and the exquisite portraits are so lifelike that they are basically recognizable.

There are also portraits of a group of wanted criminals in Ernest and their crimes.

But naturally these officers would not say it because there was no need.

"Did the Royal Knight turn out to be such a powerful being? He could kill hundreds of people!"

Iyeas said excitedly.

Although the three of them seem to be very strong, they can kill the first-level dangerous species in an instant, but when faced with an army, they cannot kill a hundred people.

But each Teigu user can match an army of hundreds of people. Even Esdeath, who is obviously a supermodel, can easily deal with an army of 100,000 people by one person, and can kill them all.

So they're looking forward to it.

The next day I arrived at the Royal Knights training ground.

Then they saw there were others here.

There were too many talents in the empire during this period, and the night raid in the original plot was not developed yet. Only Najehitan betrayed, so it was not difficult to find those people in the original plot. It was just a question of whether they were suitable or not.

Fortunately, the Royal Knights are not only complete melee knights, but also have long-range attack types, for which Mayne is very suitable.

"elder sister!"

Black Tong was also here, and was very excited after seeing Red Tong.

"Black Eyes!"

Chitong didn't know what was going to happen when she came to the imperial capital as instructed. After all, she hadn't met Najiexitan yet.

Now after seeing Heitong, Chitong was shaken all of a sudden.

"Sister, we can be together in the future. We will become an assassination force that assists the Royal Knights."

Black Eyes said excitedly.

"Really?"

Chi Tong couldn't believe that such a good thing would happen. The sisters had never seen each other since they were separated by blood. Chi Tong never knew Black Tong's situation, and Black Tong didn't know Chi Tong's situation either.

As for the assassination force that assists the Royal Knights, Chitong doesn't care. As long as he can be with Heitong, he can do anything. And the assassination force, isn't it his specialty?

"My master, do you like those two sisters?"

Esdeath and Luther were in a nearby house. Esdeath hugged Luther from behind, rested her head on Luther's shoulder, and asked cheek to cheek.

No wonder she is so close, the main reason is who her master has found this time, almost half of them are beautiful girls.

There are also various types.

Natural Silk, Ma Yin from a foreign race, and the daughter of a loyal minister who are said to be very strong, they can actually achieve this level by exercising on their own.

The one at the back is the loyal minister's daughter who was skinned by the three beast warriors. This daughter's combat power is very strong. At least she can deal with the thieves who block her way along the way, and can also fight against the three beast warriors, although she was severely injured with just one blow.

But at least it would be awesome if such a big weapon can be wielded freely.

"You're so free."

Luther said lazily that he didn't like tragedy, so he took action to solve Heitong's physical problem. Then Heitong agreed to Luther's "withdrawal reaction challenge" in order to be able to meet Chitong.

Success survived the painful and excruciating withdrawal reaction.

Her dependence on drugs is already worse than that of many poisonous insects, but her desire to reunite with Chi Tong is stronger.

For Luther, reuniting the two sisters was just a matter of words.

"I'm very busy, but even in my busy schedule, I have to take time to see the master's masterpiece."

Esdeath said with a smile.

"Then let's take a good look."

Luther had already asked the royal knights to be given to them.

The assassination troops and the royal knights will train together and then fight together. In terms of combat effectiveness in this world, the royal knights alone can defeat thousands of troops. But if they cooperate with the assassination troops, they can defeat more than thousands of troops and even thousands of horses. It can exert functions and effects that even an army cannot.

Esdeath also pays attention to it because he knows this.

However, it is not ruled out that she is here to declare her sovereignty.

Ma Yin was very surprised that she, a foreigner, could be taken seriously. She was often bullied. When she grew up and understood why the people of the Empire bullied her, Ma Yin was able to have the idea of changing the Empire. I can only speak of her thoughts. Not bad, but it's a pity that I followed the wrong person.

Now, she was assigned to the Royal Knights, a place full of honor and status. Ma Yin didn't know what to say, but she knew that this was her only chance in this life, so she tried her best and even tried her best to train. Own.

The Royal Knight is a living Teigu, but it is controllable and will not cause erosion reactions. Luther has been castrated. Molecular castration makes it impossible for these cells to undergo new mutations and evolutions.

Then they will create the weapons they want based on each person's inner needs.

For example, Ma'in is a gun like a pumpkin cannon, Sayu is a bow and arrow, Tazmi is a big sword, and the same goes for Iyeas.

Leonai is a specialized claw-like arm gauntlet.

In addition, Akatomi's weapon was also replaced by Luther's one-hit kill Murasame. She originally used a Japanese sword weapon called "Kiriichimonji". Although it did not have the fatal effect of the Teigu Murasame, it was used by this A wound cut by a knife cannot be healed.

In cooperation with Kuroyon's March of the Dead · Eighth House, the fighting power of the two sisters is terrifying.

The training of the Royal Knights is basically resistance training and physical training, but the intensity is naturally not comparable to that of ordinary people. There is also the Queen Esdeath who appears from time to time to show her presence and spar with them by the way, so that they can understand how strong Esdeath is.

The way to control subordinates is to use both kindness and force. Esdeath doesn't understand, but she uses it very well.

"Her Majesty is really powerful. Although we are trained to protect Her Majesty, is it really necessary?"

Tatsumi asked his companions puzzledly.

"Of course it is necessary. If Her Majesty has to do everything, then we, as ministers, are not decorations?"

Main directly scolded Tatsumi and felt that his thinking was incorrect.

I don't know how this half-baked guy was selected. In comparison, his childhood sweetheart Shayou is pretty good, and the people here will not discriminate against him, which makes Main feel that this place is very good.

However, she has been conquered by Esdeath's kindness and force, and has become Esdeath's most loyal fan.

Esdeath did not react to Tatsumi's smile. She was about to turn into Luther's shape, how could she react?

*Chapter 478: A severe blow*

The Royal Knights, the assassination corps, the three biological imperial weapons, and the 500,000 troops obtained through conscription.

Esdeath set out in a mighty manner and headed north.

There, Esdeath's original army was also waiting for Esdeath's arrival.

They already knew that Esdeath had unified the empire and renamed it "Imperial Kingdom".

This made them very excited.

No one would think it was inappropriate for Esdeath to be the emperor.

Instead, they thought it was a matter of course.

General Esdeath was so powerful that it was unreasonable for her not to be the emperor!

In this case, the Revolutionary Army and An Ning Dao became anxious and quickly notified the northern foreign nations to prepare.

At the same time, they were also preparing to mobilize the people and local people on the route of the army to cause sabotage so that the imperial army could not concentrate on advancing.

The northern foreign nations attached great importance to this information after learning of it.

The Warrior of the North, that is, the prince of the northern foreign nation "Numa Seka", immediately began to arrange defense lines and troops.

This prince has never been defeated when holding a gun, and has a terrible situation strategy, which is deeply trusted by people.

Using his own fortress city as a base, he strengthened his invasion of the empire. Because of his handsome appearance and good temperament, he is more active in fan fictions based on the template of Zan Tong.

In the original plot, the Northern Legion led by Esdeath and his three imperial weapon users (the three beast warriors) were suppressed by lightning, and the fortress city (the capital of the northern alien race) was broken. All the soldiers who followed him died in the battle, and he was killed soon.

Then 400,000 tribesmen were buried alive and frozen by Esdeath.

"With 500,000 troops, plus Esdeath's original army in the north, nearly a million troops, the northern alien races are absolutely unstoppable."

The revolutionary army knew this very well, so they began to sabotage and attack the logistics of the imperial army.

Solved the logistics supply of the imperial army, destroyed the roads, and cut off the water source.

Try every means to stop the advance of the imperial army.

In order to do this, a tactical team that is proficient in infiltration and flexible operations is needed.

The Imperial Artifact Master is the most suitable candidate in this regard. The Revolutionary Army has invested a lot of money and has formed an Imperial Artifact Master team with all the Imperial Artifacts obtained in recent years, specifically for this operation.

After all, if Esdeath really solves the big problem of the northern foreign ethnic groups, they will have no manpower.

They are anxious. The Revolutionary Army has been stirring up fires everywhere for so many years, isn't it just to be able to rise up and become the new master of the empire at that time?

As a result, now it's good that their efforts for so many years are about to bear fruit, but Esdeath has taken it away first.

Moreover, they learned about the series of decrees after Esdeath became the queen, and they knew very well that if they continued, the Revolutionary Army's biggest basic force would be gone!

So they must take advantage of the fact that the basic forces of the Revolutionary Army are still unclear about the situation and ignite the war everywhere.

To this end, they arranged a large number of people to sabotage various parts of the empire, saying that it was to divert the attention of the empire and allow the northern ethnic groups to cooperate in defeating the severely damaged imperial army!

Such deception is only useful now, so they are also very decisive.

At the same time, Ernest and his son Sheila also learned the news.

"Dad, do you think that woman Esdeath has left any power in the imperial capital?"

The people brought by Sheila were originally unruly. After all, they followed Sheila back to enjoy and eat delicious food, but as soon as they came back, they had to run away. How could they accept this?

Then Minister Ernest didn't say anything, but just let the four Rakshasa ghosts teach them a lesson.

Although the record of the four Rakshasa ghosts doesn't seem to be very good, their comparison targets are all imperial tool users. The trained Tatsumi is not even a one-on-one opponent of the four Rakshasa ghosts. The four of them joined forces, and they really could completely defeat all except multiple imperial tool users.

Of course, the five strongest combat forces like Esdeath are not counted.

In this case, the group of people were naturally obedient, and Silla became a good son again, with a loving father and a filial son.

"Esdeath..."

Ernest was thoughtful. He had set his sights on the Imperial Equipment Library. If he could sneak attack while Esdeath was away from the Imperial Capital, no one should be able to stop them, right?

As long as they obtained a large number of Imperial Equipment, they could occupy one side, and Ernest could continue to enjoy it.

As for fighting against Esdeath, Ernest wanted to live a few more years until he died of old age.

"Then let's go back to the Imperial Capital."

Ernest bit the barbecue in his hand fiercely.

He was not interested in women, nor in money. His favorite thing was to eat meat. Because he had not eaten it when he was a child, he would make up for it now.

Facing the malice and harassment from all sides, Esdeath felt very interesting when looking at the intelligence.

She naturally could not see what was going on, but she didn't care, because Luther had told her that the more the enemy didn't want you to do something, the more you must do it, so that you can give the enemy the biggest blow!

Anyway, the Empire was already in ruins and in need of reconstruction, so it didn't matter if it got even worse at this time.

Wait until everything is settled, and then slowly rebuild it.

So Esdeath ignored the wars and rebellions that broke out in various parts of the Empire and kept the army moving forward.

With Esdeath's unwavering determination, it was the Revolutionary Army's turn to get anxious. Unfortunately, the revolutionary army's imperial weapon team encountered the Royal Knights.

"You damned rebels!"

Tatsumi swung his great sword, and the silver-white Royal Knights' armor made it impossible for the imperial weapon users to break through.

"Damn, what is this, a new imperial weapon?"

The imperial weapon users were very surprised. They couldn't recognize what these armors were that were put on in an instant. They looked like armor-type imperial weapons, but they all knew what armor-type imperial weapons were. These were definitely not imperial weapons they had seen before.

Could it be another ministerial weapon left by a certain emperor?

If so, it didn't seem strange.

Although the ministerial weapons were not as capable as the divine weapons in all aspects, they were numerous, and there were so many strange things. Who knew how many ministerial weapons there were.

However, these people were all wearing the same silver armor, and they didn't look like individual ministerial weapons.

"Stop wasting time, you half-wit!"

Main fired, and the energy beam pierced through the body of the Teigu user. The other party looked at the big hole in his body in disbelief, and then fell to the ground with his eyes wide open.

"The others have been dealt with, Tatsumi."

Sau returned with a Teigu. Retrieving a Teigu is a great achievement.

So the Teigu of these Teigu users were all retrieved.

#### *Chapter 479: Total Annihilation*

As for the purpose of recycling, of course it is for the assassination troops. In the future, the empire will only have the configuration of royal knights.

Luther was very interested in this area.

In the future, the Royal Knights will be divided into several arms.

The "Black Knight" with the strongest defense, black heavy armor and giant sword, is powerful and powerful, invulnerable and indestructible!

The fastest "Blue Knight", blue is the symbol of speed. After wearing it, the speed is as fast as the wind. Correspondingly, the strength and defense will be reduced, making it much weaker than the Black Knight.

The most powerful "Red Knight" is not as good as the Black Knight in defense and not as fast as the Blue Knight, but it is the most powerful.

The "Green Knight" with the strongest firepower has a variety of long-range output and attacks from machine guns and missiles.

Finally, there is the "Silver Knight", which combines the "Black Knight's defense", "Blue Knight's speed" and "Red Knight's power" into one, and then there is the Golden Knight, an upgraded version of the Silver Knight, which is more perfect and better in all aspects. powerful.

With these royal knights around, Esdeath's future empire will be more durable than the empire. The empire has relied on forty-eight imperial gears for thousands of years. It makes no sense that Esdeath now has more powerful ones than the imperial gears. The Royal Knights, existed even shorter.

And Ernest and the others also encountered the "Minister's Punishment Team" composed of Brand, Leva, and Will.

The minister's expedition team never gave up hunting Ernest.

Not to mention Luther as a guiding light, wherever Ernest and the others go, the minister's expedition team will follow them.

Ernest and the others successfully used the coordinates of Sheila's stay in the Imperial Capital to return. They deliberately waited for the Imperial Army to arrive halfway, so even if Esdeath wanted to get news of the attack on the Imperial Capital, they would not know when.

"Teiguku, here!"

Ernest was familiar with the road, and he was also worried that Esdeath would find the Imperial Palace and change the location of the Imperial Palace. But now it seemed to be good, there was no one guarding the Imperial Palace.

As a result, when Ernest opened it in surprise, he found that not a single piece of imperial equipment was left inside, and it was empty.

"Damn it!"

Only then did Ernest realize that it was not that no one was guarding the Teigu warehouse, but that Esdeath had moved the Teigu here, so naturally there was no need for anyone to guard it.

But in this case, this place is not simple. Otherwise, how could Esdeath still keep this place?

"Finally found you, traitors!"

Brand fell from the sky, holding his hands.

The evil ghost on his body has been severely mutated, and a pair of huge dragon wings on his back have gained the ability to fly.

Will and Levi also blocked the way of this group of people.

"Damn, it looks like a trap, Dad."

Silla said with a hideous smile.

"However, there are only three of us, and we want..."

"Pfft!"

Brand's hand had already penetrated the chest of a guy dressed as a fat circus man.

This guy's name is Champ.

The serial killer clown "likes" children very much and has a twisted and perverted personality. He calls children angels and kills them all because he doesn't want them to grow into dirty adults.

He once tortured and killed Lan's students, which led to Lan's revenge, and he was finally killed by Lan.

Teigu: Fast Throw Ranma (Big Thrower) - a six-ball Teigu, each one has different attributes and needs to be thrown to activate, and will fly back after being thrown.

The six balls are Storm Jade, Explosion Jade, Flame Jade, Ice and Snow Jade, Lightning Strike Jade, and Corrosion Jade.

Luther had already given the information about these people to the minister's crusade team, so Brand and the others were merciless and didn't bother to talk nonsense with them.

Especially Champ, who attracts almost the most hatred.

"What!"

Champ fell to the ground in disbelief, and Brand cruelly clawed out his internal organs.

This made him miserable before he died.

"You all deserve to die, so hurry up and get on your way."

Levi controls the surrounding water flow. Although it is very limited, it is still no problem to provide assistance.

The main attacker was Brand, and even Will just prevented them from escaping.

Seeing this, Sheila immediately activated the Dimensional Phalanx Shangri-La, and a teleportation array appeared at their feet.

"Don't even think about leaving!"

Will was just about to take action when he saw Brand rushing out like a strong wind. Sheila's pupils shrank. At the critical moment, his men blocked Brand.

They didn't want to do it, but only Sheila could let them escape, so they had to do it.

Brand smiled scornfully. After transforming into a dragon, he felt stronger than ever before. These people were very troublesome before, but now they are just defenses that can be penetrated with one punch!

With one punch, the pirate Yan Xin who dominates the southern islands wields the Imperial Equipment: Moonlight Reimai (Wind Blade Sword) - a scimitar-shaped Imperial Equipment that can emit vacuum blades. Its characteristic is that its performance changes according to the age of the moon. can be at its strongest.

Then the vacuum blade was shattered by Brand's punch, and his whole body was shattered.

"Crush it, the earth roars!"

Cosmia saw that Brand was as unstoppable as a tiger descending a mountain, and quickly used the Teigu to attack.

Teigu: Earth Sound (Heavy Pressure) - A microphone-type Teigu, the sound emitted through it can be transformed into ultrasonic waves, crushing the enemy's bones.

But Brand was only delayed for less than a second before adapting to the ultrasound. He punched a shock wave through the air. Cosmia could not dodge it and was blown away by the shock wave. Her internal organs were shattered alive.

"What kind of monster is this!"

Dotya was so scared that she wanted to run away. She could transform her body. As long as she ran away, she could change her appearance directly.

"Don't even think about running!"

Will chased after her and stopped her.

"Get out of here!"

Dotya's body has been transformed countless times. She is actually quite old, but she looks like a young girl. She can transform others into the creatures she wants.

Because of her body transformation, she has great strength, but she does not have superb fighting skills.

Imperial weapon: Blood collection (extremely fast absorption)-tooth-shaped imperial weapon, installed in the mouth, can suck people into mummies by sucking blood and use it for self-healing and improving her own strength.

However, Will is an armor-type imperial weapon, and he is also an imperial weapon user who has been tempered in dangerous battles in the navy. At first, he didn't know what Dotya was doing, and was stunned by her great strength. After he got used to it, Dotya was cut off by Will's waist.

"Damn... I... don't want to..."

Dotya struggled, trying to suck the blood of the dead Cosmia and others to recover herself.

"Go to hell."

Will stood in front of her.

*Chapter 480 Brand miraculously evolves again!*

Will killed Dotya without mercy.

Lianxiangxiyu is not used on this kind of femme fatale.

Brand also successfully interrupted Sheila's teleportation.

He hid the fact that he had long-range attack capabilities. After getting close to a certain distance, Brand opened his mouth.

The powerful energy fluctuations were condensed in an instant and then launched out.

Neither Sheila nor Yi Zang expected this situation, and one of their arms was suddenly broken by Brand's energy attack.

"Ahhhh, my arm!!!!"

Silla screamed in pain, and his fragile endurance made him very intolerant of pain.

Although his strength is very good and he can defeat many masters of the Imperial Fist Temple on his own, I don't know if there is any water in it.

"What a useless good-for-nothing son!"

Ernest blew his beard and stared.

"Four Rakshasa ghosts, take him away from me!"

Ernest said angrily.

"Yes, Minister."

The four Rakshasa ghosts stepped forward and took Silla aside.

"Ernest, your death has come!"

Brand was surprised to see Ernest stand up on his own.

But he didn't think Ernest could be stronger than him.

"You three are all Teigu users, right?"

Ernest said with a sneer.

"So what?"

Will questioned.

"In that case, it's easy to handle."

Ernest directly used his own Teigu.

Teigu Ireton!

This is an anti-Teigu that can destroy the opponent's Teigu. It is usually something like the jeweled tiara that Ernest wears on his head.

Broken gems only take a week to regenerate and cannot be used until then.

At this moment, the Teigu on Will and Levi both made a cracking sound in an instant.

The gem on Ernest's head also shattered into pieces and fell to the ground.

This imperial weapon can be said to be very outrageous. It is likely to come from a super dangerous species with special abilities, a super dangerous species that can invalidate the abilities of other super dangerous species.

But there should be a limit, otherwise, if the First Emperor gets this thing, he will definitely run to deal with the East China Sea Yunzhong Dragon and the Ice Monster.

Maybe those who are too strong cannot be neutralized.

"The four Rakshasa ghosts, get rid of them!"

Ernest said calmly.

The four Rakshasa ghosts knew that this was the time for them to slaughter these Teigu users.

The four Rakshasa ghosts all grew up eating sea monsters in the mountains of the Imperial Fist Temple. They all underwent rigorous training and became one of the four Rakshasa ghosts. They are the minister's personal executioners and can manipulate their bodies at will. Distinguish those who kill the world.

The four Rakshasa ghosts once teamed up to defeat five Teigu users and obtained the Teiju and handed it over to the minister.

So when they faced Night Raid later, they looked down upon them, but who knew that a small assassination organization would have multi-powerful Teigu users like Chitomi and Brand.

Ji, Suzuka, Zhu Tian, Ma Tou, and the four Rakshasa ghosts are eyeing Brand. If this most powerful enemy is captured first, it can also deal a blow to the enemy's morale.

But at this time, Brand's rupture stopped.

"Go to hell, Imperial Fist Temple Hundred Split Fist!"

Zhu Tian used the boxing techniques of Huangquan Temple.

Then he was punched through the body by Brand.

"What's going on!"

The other four Rakshasa ghosts were shocked. Why didn't the evil ghost haunting Brand's body break?

Although it looks full of cracks, it is recovering!

"How is that possible!"

Ernest was also shocked. Something happened beyond his control.

Ireston's ability should be absolute!

But how to explain it now?

"It's such a powerful Teigu, but it's a pity that my evil spirit has withstood countless fatal attacks and has grown to this level. The destructive power is not enough to defeat me!"

Brand's high-pitched voice sounded, and the next moment, Zhu Tian's body was split into two by him.

"Zhu Tian!"

Both Thorn and Ma Tou couldn't help but exclaim.

"Son of good-for-nothing, activate Shangri-La's power quickly!"

Ernest grasped Silla's shoulders tightly.

Silla also knew that it was a matter of life and death, so she endured the pain and activated Shangri-La's ability.

However, he did not expect Brand to let the four Rakshasa ghosts go and choose to kill him first.

After all, the empire has already investigated clearly. Without Sheila, they would not be able to escape very far. It doesn't matter if the four Rakshasa ghosts escape. They will be blocked in this area and they will be able to find them sooner or later.

But if there is Sheila, it will be difficult to find.

"hateful....."

Silla was pierced through the chest by Brand in an instant.

But he also got ruthless.

"Come with me to the end of the world and rot!"

Sheela finally activated the dimensional phalanx.

"Nani?"

Brand was startled, Ernest seized the opportunity and jumped out of the pink formation of Bagua Yin Yang Fish, the next moment.

Brand and Sheila disappeared instantly and were transported to the end of the world.

The empire's satellites are even here, and judging from the surrounding stars, it is speculated that it is probably in space.

But the original plot of Rab and Sheila can still breathe and talk here. It's hard to say. Maybe it's a different dimension?

Brand grabbed the edge of the space rift before it disappeared.

“Ahhhhhhh————!!!”

Sheila couldn't believe it. This was the first time he saw someone being able to capture the teleportation array of the dimensional phalanx.

"It's useless, no one can resist the power of space!"

Silla said proudly as she was dying.

"boom----!!!"

Brand felt as if his hands were cut into pieces by a thousand knives, and the fingers were connected to his heart, which made Brand miserable.

"But, I have endured this kind of pain many times!"

"You are haunted by evil spirits, answer me, and once again, transcend space and achieve miracles!"

Brand squeezed the space as hard as he could.

The evil ghost sensed Brand's will and vitality. It had already begun to merge with Brand, and now it is further integrated.

So, in Silla's disbelieving and dilated eyes, the space was actually torn open by Brand even wider.

"roar--!!!"

The shadow of a dragon appeared behind Brand, and the surface of Brand's body transformed into a dragon again, doubling in size.

More dragon characteristics appear, and then the dragon becomes as black as ink, haunted by evil spirits and crazily adapts to the oppression of space, and strengthens its own toughness and strength.

The space was torn open wider and wider by Brand, and then Brand got out.

Only Sheila's lifeless body was left floating at the end of the world.

After Brand came out, he saw the other four Rakshasa ghosts dealing with Will and Levi who had lost their imperial gear.
