

Kryptonian 481

Chapter 481 Esdeath embarks on a journey

Obviously, they didn't expect Brand to come back.

So they didn't run away.

Now, they are embarrassed.

Brand's body expanded by twice, and his ferocious and tall body was like a demon descending.

Ernest's eyes widened.

"Shira, this waste..."

Before he finished speaking, he was grabbed by the head by Brand and thrown aside.

Brand kept his sanity and decided to let Ernest accept the trial and judgment of the justice of the Empire!

As for the four Rakshasa ghosts, they didn't want to die, so they chose to surrender directly.

Brand didn't tell them that surrender was also a dead end, giving them hope, and then they would be more desperate when they were executed.

The two sides fought on two fronts, but the result was a great victory. The Royal Knights and the assassination team were dispatched to solve the revolutionary army's imperial weapon attack team, and Esdeath's army finally came to the north.

The northern army here excitedly welcomed Esdeath.

"General Esdeath!"

"No, it should be His Majesty Esdeath!"

"Queen Esdeath!"

Everyone was very excited, and Esdeath was as friendly as ever, without any estrangement or alienation with them, which made the people of the Northern Legion even more excited.

This is their General Esdeath!

Even if he becomes the emperor, he will not be alienated from them.

"What is the situation of the northern foreign ethnic groups?"

Esdeath asked.

"Yes, the foreign ethnic groups have now built several lines of defense."

A deputy legion commander stood up and said.

Esdeath's Northern Legion has several deputy legion commanders, each of whom manages 10,000 troops.

In the north, it is very easy to build a line of defense. You only need to water it to build an ice wall overnight.

And it is not easy to melt, and the defense is also good.

If combined with stones, it will really be a daunting line of defense.

The northern foreign ethnic groups are determined to use these lines of defense to compete with Esdeath.

The Imperial Army has so many people, and the logistical pressure is definitely very tight. They can't be their opponents.

Even if the Imperial Army can capture the front line of defense, there is still the North Warrior Numasaka who will lead the army in a positional battle.

It can be said that there is no problem with tactics and strategy. The problem is that they don't know how strong Esdeath is.

"Build a defense line?"

Esdeath sneered, and then she led the army in person and took action directly.

The terrifying cold air instantly broke out in the ice and snow in the north.

If the previous temperature was still the sub-zero temperature that humans could withstand, then now it is an ultra-low temperature that neither humans nor dangerous species can withstand.

The northern foreign ethnic groups stationed on the defense line have not reacted yet, and they were frozen into ice by the cold air.

Everything in their bodies was invaded by the cold air and then frozen. Even if they thawed, they would be deadlier than dead.

Esdeath naturally would not give them a chance to recover. After freezing, the cold air broke out again, and then they were broken into ice chips.

In this way, Esdeath's army was unstoppable wherever they passed, as if they were in an empty land. It was not until they were at the gates of the city and arrived at the fortress city of the northern foreign ethnic group that Numasekka received the news.

This made Numasekka a little unbelievable. You know, there were thousands of people arranged for each of the defense lines in front of him.

No matter how strong Esdeath was, and how good he was at using soldiers, it was impossible for him to be defeated so quickly!

Unfortunately, he didn't know that Esdeath was not using soldiers like a god, but "using ice like a god". If he didn't want to train the new recruits of the imperial army, Esdeath would have wiped them out now.

The imperial army marched all the way, and thousands of people fell without any enemies. It was very outrageous.

However, this was also caused by the fact that most people were from the south and were not adapted to the harsh environment in the north.

A lot of people were frozen to death, just like when Esdeath went to conquer the southern foreign ethnic groups before, there were all kinds of poisonous insects and snakes in the tropical jungle, and many people died.

Esdeath then engaged in a normal offensive and defensive battle, under the idea of training troops, while also dealing with the wars and civil unrest that were now ignited in various parts of the Empire.

Esdeath would not make a final move until the casualties reached a certain level, ending the war directly.

This time was coming soon.

Luther stretched his body lazily.

He had been exposed to the sun for a hundred days, satisfying the needs of this super evolution.

"Esdeath's game for the Empire is almost over, but this woman may not leave with me."

Luther did not care whether Esdeath followed him or not. Even if she did not leave, Luther would at most feel that he was "hiding a beautiful woman in a golden house", after all, he could come back at any time.

When he found Esdeath, Esdeath had already hung Numaseka's head on the territory of the northern foreign ethnic groups, and then buried 400,000 northern foreign ethnic groups alive.

Esdeath took action and ended the battle in less than a day. Even if the Revolutionary Army participated, and the male Susanoo before Najeshitan used the imperial weapon, they were no match for Esdeath.

Esdeath now not only developed Maha Bottom in advance, but also can use it multiple times a day. Susanoo is still the original version, how can he be Esdeath's opponent?

Moreover, Esdeath also looked down on Susanoo's strength and froze Susanoo into slag directly.

The Revolutionary Army suffered a heavy blow and went underground to hide.

Unfortunately, at this time, the Royal Knights' sub-group arranged by Luther has already been deployed.

Select good people with good telepathy from the past army and then become Royal Knights.

Because these Royal Knights are sub-groups, they will exist in the major cities of the Empire in the form of teams, and will even be detailed to villages and towns in the future.

Maintaining rule in this way is to rest assured.

Even if the Revolutionary Army wants to make trouble, it can't.

"My master, are you leaving this world?"

Esdeath didn't expect Luther to say that.

"Well, what do you think? Do you want to go with me, or stay and continue to be the queen? You have become a humanoid dangerous species. You don't need to worry about your lifespan, and you won't age. It's more than enough to be an emperor for a thousand years."

Luther will go to the world of One Punch Man to continue basking in the sun.

If Esdeath is in that world, at best, she is currently at the upper dragon level, and she is not even above the dragon that washes the surface.

"Are there any strong people in other worlds?"

Esdeath asked very straightforwardly.

Luther already knew the answer.

"Yes, and there are more than you can imagine. Although none of them can match your master, they are all stronger than you."

Luther said with a smile.

"Then what are you waiting for?"

Esdeath also laughed.

Chapter 482 Esdeath's First Battle

Esdeath, who had no regrets, was not interested in the queen.

She couldn't imagine what it would feel like to be the millennium queen. After all, she had no rivals in this world, and it would definitely be a very lonely thing.

In this case, if she could go to other worlds, Esdeath would definitely agree.

"Countless worlds, countless strong men, countless enemies, my master, I didn't expect you to come from such a beautiful place."

Esdeath hugged Luther tightly, acted as a "Military Minister" for a while, and exchanged work opinions with Luther, the "Minister of the Ministry of Revenue".

Luther didn't say anything, Esdeath would play with fire, and every time she had a fire, she couldn't put it out.

She was a typical person with a big addiction to being a loser, but she thought she could conquer Luther from this aspect. Luther had super vision and super hearing, and Esdeath's every move could not be hidden from him. Luther wondered why Esdeath had so many tricks, and then he knew that she had found someone to study.

Although they were all women, Luther felt weird. Did this count as experiencing the life of an emperor?

"Really? I was worried that you would be hit. I hope you can keep this mentality in the future."

Luther activated his ability to travel through time. He didn't need to hold so tightly when he took people through time. After his strength became stronger.

Esdeath didn't know that she was worried that she would be thrown away in an accident. She didn't care about death, but she was afraid of being left behind, so she was tightly wrapped around like a python.

But with Esdeath's appearance, even a python would be a beauty snake.

Esdeath felt that she opened and closed her eyes, and the two came to a strange place.

"Is this another world?"

She was like a little girl who had never seen the world, looking around curiously.

"Yes, this is another world. There should be many beings stronger than you in this world."

Luther said with a smile.

"Really?"

As soon as Esdeath finished speaking, there was only a loud noise.

"Boom————!!!"

Luther and Esdeath looked in the same direction at the same time.

"It's here now, you can feel it in advance."

It started to rain, and Luther said to Esdeath.

He already knew who was responsible for the loud noise.

The Deep Sea King!

The Deep Sea Tribe invaded the land and attempted to rule the land. Their subordinates were all defeated by the hero. He fought in person, but because of the dry environment, he temporarily entered the weakened "shrunk mode".

He defeated the A-level Stinger right away, and then killed the peeping A-level Max. When he was about to kill Max, he was blocked by the S-level sexy prisoner. After a battle, he defeated the sexy prisoner and fought with Sonic who was passing by. At first, his speed was far behind Sonic, but because of the rain, he recovered his wet state and his strength was improved. His speed barely caught up with Sonic and beat him away.

Afterwards, it was mentioned that the S-level hero Pig God was the hero sent by the Hero Association to deal with the Sea King, but because the Pig God swallowed dozens of sea people, he could not enter the transportation and failed to arrive in time.

If the Pig God arrived, the outcome would be unknown. It is likely that the Deep Sea King would be eaten by the Pig God.

There are also different opinions about the strength of the Deep Sea King.

The strength of the three kings is mutually exclusive. — 【one's speech】

If Sonic had a weapon, he could have killed the Deep Sea King before the rain.
— 【one's speech】

The prisoner is stronger than before. The monster that was killed by the prisoner is not weaker than the Deep Sea King, but it is to stand out. Even stronger monsters will be turned into meat paste by the Superalloy Black Light. ——
【one's drawing live in episode 135】

If it is a monster at the level of the Deep Sea King, we can undoubtedly easily solve it based on our combat power. The problem is that it is quite dangerous when there is a "Dragon" level. —— 【Original comic】

This is a more authoritative setting. Anyway, it is different from many people who think that the Deep Sea King has dragon-level strength.

The Deep Sea King is clearly just a monster of this level. After the sexy prisoner became stronger, the combat power shown in the Monster Association chapter was able to kill a monster at the level of the Deep Sea King in seconds.

As for Esdeath, the chances of winning against the Deep Sea King are too high. The ice power alone is a complete defeat.

With Luther's permission, Esdeath went hunting happily.

A deep-sea creature was spotted by Esdeath.

"Dangerous species? Looks like a deep-sea creature?"

Esdeath had also seen dangerous species in the deep sea. Will and his navy called them sea monsters. Eating them was good for the human body, or rather, dangerous species were like this. Eating them was very helpful to the body.

"Human? They look delicious."

The deep-sea creatures also noticed Esdeath.

"Want to eat me? Then come on."

Esdeath said with a smile, exuding the breath of the ice monster that had been on her body for thousands of years.

The deep-sea creatures, which had evolved wisdom, did not react, but it instinctively felt a chill, not knowing why.

Then it pounced on Esdeath. This was a deep-sea creature that was like a combination of a great white shark and a crab. It came from the deep sea to dominate the land. Disaster level: wolf → tiger.

It has a human-like body and a head like various marine creatures.

"Bang!"

The huge pincer was blocked by Esdeath with one hand.

But it was not one-handed, Esdeath temporarily used ice to create a gauntlet on her arm.

As if materialized, the finely crafted ice gauntlet had an unimaginable density and hardness. Even with such a loud blow, it did not move at all, and not even a piece of ice fell off.

Although Esdeath would not go all out right from the start, she would not be careless.

After all, she is now in an unknown world, and humans are not only curious about the unknown, but also afraid of the unknown!

"What?"

The deep-sea tribe couldn't believe that their attack was blocked.

"Is it just this level?"

Esdeath already knew the opponent's level. She put her hand to her mouth and blew.

The cold air instantly froze the deep-sea tribe.

The inspiration for this move naturally came from Kula's ice blowing.

Esdeath performed it without any sense of disobedience, and added a kind of big sister charm and queen's domineering.

The deep-sea tribe shattered and turned into ice chips on the ground.

"The strength is average, just the level of the first-level dangerous species."

Esdeath said to Luther.

"There is a more powerful one ahead."

Luther said with a smile, now they can just catch up with the deep sea king attacking the shelter, directly the full form of the deep sea king.

Or is it called the wet form?

Esdeath continued to move forward.

Her appearance made the Deep Sea King's pupils shrink.

At this time, it just defeated the sexy prisoner and dealt with Genos who had been careless.

As a result, it seemed as if a prehistoric beast came behind it, and the creepy feeling made it feel like it was facing a great enemy.

Chapter 483 Universe Level!

Will die!

His whole body was sending out such warnings.

"who!"

The Deep Sea King overcame this fear and turned around to see Esdeath walking out on high heels.

"who is she?"

"S-class heroes have been defeated, and she doesn't look like a hell tornado!"

"What should we do? Are we really going to die here?"

"So beautiful. It doesn't seem like a loss to have such a beautiful woman die with me."

The survivors in the shelter said tremblingly.

Some people feel that death is inevitable, so it is better to accept it calmly.

Unwilling to give up, he was already looking for a refuge. Is there any place he could leave?

"Esdeath, I heard that you are the king of those monsters. Let me see your strength."

Esdeath announced her home address, then laughed wildly and said.

"It looks delicious."

The Deep Sea King licked his lips. Facing such a danger as Esdeath, it expanded directly. His body entered the final stage where Saitama was instantly killed by a single blow. It was more powerful, but also consumed more money. Fortunately, it was raining now. It has plenty of moisture.

"boom----!!!"

As if skipping frames, in human eyes, both Esdeath and the Deep Sea King burst out with uncaptured speeds. In an instant, the rainwater was knocked out of "roads". Genos caught it, and he was shocked.

Originally, he wanted to ask Esdeath to leave. It was very dangerous here. After all, he compared the hero information of the Hero Association and could not find Esdeath.

The other party is an ordinary person!

As a result, Esdeath was instantly slapped in the face.

He actually had such a high-speed battle with the King of the Deep Sea, and the King of the Deep Sea was even more powerful than when he fought against him!

Even if I am not careless, I am afraid I am no match for this Deep Sea King!

Esdeath and the Deep Sea King clashed head-on at high speed, both hands covered with ice gauntlets.

Then she discovered that this Deep Sea King was indeed very powerful, even stronger than the biological Imperial Equipment given to her by Luther!

In terms of hand-to-hand combat, I'm afraid some super dangerous species are no match for it.

The Deep Sea King was even more surprised. It thought that it would have no opponent after the Underground King died, so it led the Deep Sea Tribe to invade the land.

But he didn't expect that when he encountered a race like humans, strong men would appear one after another, and now this one was even more annoying.

Every time it collides, the other party seems to be fine, but it is me, whose fists are bone-chilling. Every time they come into contact, there is an extremely annoying cold that invades the skin and bones, so cold that the water in its body is close to the freezing point. .

If the Deep Sea King's blood flow rate was not fast, much faster than that of humans, and the heat generated and heat dissipation mechanism were not as incredible as humans, his blood would have been frozen.

"What a dangerous warrior, but as long as I eat you, I will become stronger!"

The Deep Sea King is salivating. The more dangerous the prey, the more delicious it is. This is the law of the deep sea!

Esdeath started to feel boring after playing for a while.

"That's it. I've seen your methods, so it's over."

Esdeath condensed the ice sword casually, and the huge ice sword was as light as a feather in her hand. However, after swinging it, the indestructible momentum made the Deep Sea King not choose to confront the enemy head-on, but chose to dodge for the first time.

But Esdeath was stronger in this regard, and the Deep Sea King could be injured in just a few strokes. Faced with such an ice sword, the Deep Sea King had no good way to deal with it.

"Ice and snow!"

Esdeath observed that Deep Sea King's ability to recover quickly after being injured seemed to be related to the rain, so she directly used a small-scale ultimate move to freeze the surrounding ground and clouds in the sky.

This was terrible. It suddenly changed from heavy rain to snow, and a certain bald devil was so cold that he sneezed.

"Hey, why did it suddenly become so cold?"

Saitama was watching the battle with Luther from the side, and was now shivering from the cold.

Luther finds it ridiculous that Saitama can still feel cold and is afraid of cold. Although he no longer has the ability to copy the opponent without a limiter, he still knows very well what it means to have no limiter. He will adapt to the cold when he feels it. Evolving in the same direction, Saitama should be no longer afraid of the cold.

All I can say is that he is indeed a funny character.

After Esdeath used Ice and Snow, the Deep Sea King suffered a huge blow, was completely weakened, and was quickly killed by Esdeath with a single sword.

Then Esdeath did a last hit and froze it, completely eliminating the possibility of it coming back from the dead.

"My master, is there a more powerful opponent?"

Esdeath returned to Luther.

"Of course, don't worry, a very powerful person will appear soon."

Of course, what Luther was talking about was Boros. Esdeath would definitely die if he faced Boros.

The premise is that her Mahabotmo takes action first, but that is no match for Boros.

As long as Boros' energy is not exhausted, his body will not die. Even if he is beaten like that by Saitama, he can recover. He is the first BOSS that can take a series of ordinary punches and still survive.

You must know that Saitama also took special care of him and punched him everywhere on his body. In the end, he couldn't even be beaten to death.

If the final ultimate move hadn't drained the energy center of his energy, Boros, who was still half a corpse after a serious beating, might still be alive.

Therefore, even if Esdeath uses Mahapotma in advance, it is impossible to kill Poros.

The two ignored the survivors' cheers and their desire to come over, and left directly.

This also disappointed the people from the subsequent Hero Association, who still wanted to contact Esdeath.

She is so powerful and beautiful. If she can be operated well, she can create a fan economy for them like the handsome mask.

The Hero Association is not only invested by capitalists and wealthy people, but also accepts financial support from ordinary people.

Otherwise, where would they get so much money to deal with the accidents caused by the war between heroes and monsters, and compensate for the losses?

When Luther came to the world of One Punch Man, he knew how long he would be in the sun, about two hundred days. His originally plump cells now absorb sunlight crazily to grow and strengthen themselves.

Growing in a completely unscientific way, Luther reached a level of total energy exceeding that of a universe in the blink of an eye.

The total energy of the universe is $E = (dE/dt)t = h^4 c^8 \sigma / 44 M^2 \approx 7.52155822076 \times 10^{47}$ watts $\times 4.3582752 \times 10^{(17)}$ seconds = 3.27810265 joules.

The essence of the infinite universe is (observable universe + unknown universe) $\times$ infinite expansion, and the speed of infinite expansion of the universe is much higher than the observation speed, which results in the essence of the infinite universe. The infinite universe in the work is $\neq$ the true infinity in the mathematical sense.

Chapter 484 Esdeath is upgrading

Luther's total energy has exceeded that of a universe, but it has not yet reached the level of a single universe.

This certification requires the power to destroy a universe in one blow to be considered a single universe.

Luther doesn't know if he can do it now.

Then Luther and Esdeath found a place to "rest" temporarily.

"My master, is there any strong person in this world?"

Esdeath couldn't take any time off, mainly because she was interested in too many things.

For example, doing that kind of thing with Luther even surpassed the pleasure that fighting, hunting, and torture brought to Esdeath. However, she couldn't bear this kind of thing herself, and when she couldn't bear it, Esdeath I will find other things to do for fun.

Luther doesn't need to bask in the sun all the time. What he needs is not the poor energy of the sun. What he needs is the concept and difference of sunlight in different worlds.

Luther's understanding of so-called charging is "absorbing the differences in the world."

So he took Esdeath to find Bangu the Silver Fang.

In the name of visiting.

"I wonder who you two are?"

Bang Gu was also very interested when he heard that someone was visiting, but he was not very well-informed, and the Heroes Association did not specifically promote it, so Bang Gu did not recognize Esdeath.

It just feels like both of them are very otherworldly and stunning, giving people a feeling that they are incompatible with the painting style of this world.

This feeling is not an illusion. After all, Luther is taking people to sneak across. Currently, he does not have the ability to hide the essential difference between Esdeath and the life forms in this world. This makes him very special in the eyes of the life forms in this world.

It feels very special too.

"We are challengers who want to spar."

Luther said with a smile.

Oh, just for playing.

Banggu understands, but he is no longer young and does not want to fight, but wants to make peace and make money.

But Esdeath's fighting spirit made Banggu unable to ignore it.

"It's amazing how many battles it took to have such a will."

Bang Gu was surprised. His intuition was still very sensitive, and then he was shocked by Esdeath.

"Don't worry, Mr. Bangu, it's just that she wants to compete with you."

Luther said with his hands crossed.

"What, I can compete with you without the teacher's intervention!"

Charanzi immediately stood up and said.

"Charanzi, you still haven't done your hygiene, why don't you go clean it up quickly?"

Bang Gu knew how much his disciple weighed. He was just the last remaining disciple. His talent was not comparable to that of a hungry wolf. Even the disciples who had escaped had many who were stronger than him.

Of course, Bang Gu also valued Chalanzi's character, which was why Chalanzi was able to stay here.

Otherwise Banggu would probably persuade him to quit.

"teacher!"

Chalanzi was worried, but under Banggu's eyes, he left obediently.

"Don't worry, we're not bad people."

Luther said something that made people want to laugh at him.

Chalanzi didn't know what to say for a moment. Would a good person really say that about him?

Esdeath became impatient and directly attacked Bangu.

"Oops, I was in such a hurry that I almost didn't get past him."

As a result, Bangu's body twisted like incredible water, and he actually avoided Esdeath's very fast attack.

Esdeath became interested.

"Tyjutsu like running water?"

She had also seen the physical skills masters from the Imperial Fist Temple, and her long legs followed closely and swept Banggu mercilessly.

Bangu resisted Esdeath's kick with one hand. Esdeath felt as if he had kicked something soft and deflected the direction of the force.

Luther learned Banggu's flowing strength and movement method just by watching.

But this kind of thing is naturally a trivial matter to him. Even learning it is not Luther's subjective idea. He just sees it and then his body knows it.

Of course, for Esdeath, she was fooled around by Bang Gu using this trick.

No matter how she attacked, she couldn't break through the defense of Bangu's hands.

Bang Gu was also a little surprised. Judging from Esdeath's ruthless attacks and her consistent moves, it was obvious that she was a very powerful person, but her way of generating energy was really bad.

Bangu couldn't understand why such partiality occurred.

"Then continue and see if you can stop it!"

Esdeath condensed ice and shot out.

"So he is a person with super powers?"

Bangu suddenly understood, no wonder Fa Jin was like a beginner. It turned out that the opponent was a superpower. There were many superpowers in the One Punch Man world, but he had never seen one of the elemental system so far.

There are even people like Qingyan who pretend to be using flamethrowers inside their sleeves. Esdeath has such super power, which in Banggu's opinion is the reason why her skills are so poor.

It's not that Esdeath's fighting skills are terrible, but it's killing! The combat skills in the Crimson Eye world are terrible compared to the One Punch Man world.

Esdeath's fighting skills are only "quick, accurate and ruthless" that have been trained to the extreme, which is naturally not enough.

Bang Gu waved his hands calmly and deflected all the flying ice spikes.

This surprised Esdeath. She had never seen such physical skills before.

Naturally, she was keenly aware of the soft power of this physical technique, but she just didn't know why the soft power had such an effect.

"If the dojo freezes, it will be very troublesome for my idiot disciple to deal with it. Come outside."

After Bang Gu knew that Esdeath was a superpower, he didn't want to fight with her at home, so he left directly.

Esdeath didn't care where he fought, he just followed him.

"The boxing technique I have practiced can deflect the attack with a strange force, weakening the intensity of the attack. An attack that would have been seriously injured or even fatal if hit head-on would also lose its original effect."

Banggu said to Esdeath with his hands behind his back.

"Its name is - Flowing Water Rock Shattering Fist!"

Esdeath's pupils shrank, and the next moment, Banggu appeared in front of her.

She punched down, but it failed. What she saw in front of her was the afterimage of Bang Gu!

Using special steps, he moves as smoothly and quickly as running water, and uses the enemy's unpredictable body to accurately attack the enemy's vital points.

At this moment, Esdeath only had time to cross her arms and cover them with ice to form a shield.

"That's not okay. The characteristic of the Flowing Rock Shattering Fist is that its movements are like running water without any stagnation, and at the same time it has huge destructive power that can 'shatter rocks', just like a waterfall!"

Bang Gu fired hundreds of punches in an instant, and the power of Liu Shui Jin was fully exerted at this moment.

Chapter 485 Flowing Water Esdeath

Esdeath only felt severe pain in her arms, the ice shield was directly smashed into pieces, and the terrifying punch force blasted into her body through both arms.

She couldn't help but groan, and stepped back again and again. Every time she took a step back, a layer of ice formed under her feet.

What a terrifying physical skill!

Esdeath was horrified.

She tried to imitate Banggu's Liushuiyan Shattering Fist, trying to understand the essence and principles of this martial art.

"It's interesting."

Esdeath licked her lips, her eyes full of fighting spirit. What she liked most was a strong opponent. Only in this way could she have the motivation to become stronger.

"Then let me see if your Flowing Rock Shattering Fist can take on my move!"

Esdeath took a deep breath and clasped her hands together. The terrifying cold air quickly spread around her.

"General Binglan!"

An ice giant tens of meters tall stood up from behind Esdeath. With a wave of his hand, an ice blade hundreds of meters long condensed and slashed hard at Bangu.

The power of this move is enough to destroy a hill.

Bangu's face was solemn. He could feel the terrifying power of this move and did not dare to be careless at all.

"It's really scary, superpower."

Bang Gu feels that compared to superpowers, the advantages of martial arts are too weak.

After all, martial arts requires repeated training, and only through continuous training can a strong person emerge, but this strong person cannot compare with a person with super powers who is born with special abilities.

They can easily achieve strength that most martial artists will never be able to achieve in their lifetime.

But Bangu can naturally deal with it.

Boom boom boom!

In an instant, fist shadows filled the void, and the attacks were so dense that people couldn't react in a straight line.

The two collided, making a deafening noise, and terrifying shock waves spread around.

"So strong!"

A trace of surprise flashed in Esdeath's eyes. She didn't expect Bangu to be able to take her move.

"Your physical skills are indeed very powerful, but if that's all you can do, then you'd better admit defeat."

Esdeath sneered and clasped her hands together again.

"General Binglan, Binglan descends from the sky!"

The ice giant waved his hand again, and huge icicles fell from the sky, completely covering the area where Bangu was.

The diameter of these icicles is several meters. If hit, even Bangu will be turned into pulp.

Moreover, these icicles were extremely numerous and densely packed, blocking all of Bangu's evasive routes.

"What a mess."

Banggu bypassed all the icicles in an instant and did not choose to attack head-on.

His body is not as young as it used to be. It cannot stand the stimulation of cold and is prone to rheumatism.

Bang Gu shook his head, his whole aura changed, and a more powerful aura erupted from him.

Feeling this momentum, Esdeath felt the hairs on her body stand up. She could feel a danger coming over her.

"Now...it's just begun!"

Bangu's aura rose crazily, and his whole body turned into a stream of light and rushed towards Esdeath.

Esdeath had suffered the loss of an ice shield being instantly defeated, so he knew the characteristics of Liu Shui Jin very well.

Her learning ability is naturally very good.

The Liushuiyan Shattering Fist is not as simple as hitting hundreds of punches at once, and that would be too underestimated.

It is a flowing force that accumulates little and makes a big difference, rather than an explosive punch.

Therefore, every blow is not Banggu's full strength, but a lot of power is reserved for emergencies, and it can also store energy for the next blow.

Coupled with the special breathing method, the blood accelerates crazily, like running water, bursting out with continuous strength, allowing Banggu to launch more offensives in one breath.

Banggu was merciful for not using the more lethal tooth protruding finger, because it was a killing move, and even weirdos would be killed by this move.

But at this moment, Esdeath put on a posture and crossed his hands.

"This is?"

Bang Gu's pupils shrank and he couldn't believe it, because this was the starting move of Liushuiyan Shattering Fist!

But how is this possible? Liushuiyan Shattering Fist lacks the most important breathing method, so it is impossible to imitate it?

"Bang! Bang! Bang!"

The two people's attacks continued to collide, making deafening noises, and they continued to hit like a heavy rain of punches.

Banggu became more and more frightened as he fought. Esdeath was still very immature at the beginning, but later she actually kept up with his movements and speed!

Not only that, Esdeath also fought him back and forth, deflecting the all-pervasive punches he attacked. This was the most difficult part of the Liushuiyan Shattering Fist. The punches were pervasive, like running water, making it difficult to resist and parry.

Now he felt it too.

In terms of deflecting and resolving attacks, Esdeath was not very good, but in terms of all-pervasive attacks, Esdeath was very effective, and even forced Banggu, who didn't want to use his legs, to use his legs. to resist and parry Esdeath's attacks.

Hundred hits! Thousand blows!

In the blink of an eye, thousands of attacks had exchanged, and Esdeath's whole body began to overheat.

Her blood flow is accelerating crazily, in exchange for faster speed and stronger strength, but the accumulated heat will not disappear, and the body's excellent heat dissipation mechanism cannot be satisfied. This is caused by the lack of breathing methods, which limits Liushuiyan's ability to break. fist.

If you can't solve this problem, you will be stuck here for the rest of your life.

This is also the reason why Garou stole the boxing manual.

When Bang saw white gas coming out of Esdeath's body, he wanted to stop, but he found that Esdeath seemed to be completely unaffected by this heat barrier. Instead, she attacked faster and with greater strength.

"Stop it. If you keep going like this, you will burn your blood dry and die!"

Bang said hurriedly.

"Don't worry, I still have a long way to go."

Esdeath naturally noticed this change, but she was a humanoid dangerous species. In an instant, her blood reached the freezing point, but it didn't freeze into ice.

Then the insignificant heat was also lowered in temperature, and Esdeath discovered a new world.

Bang couldn't believe it. Could it be the other party's superpower?

Can superpowers do such convenient things?

After fighting for 5,000 attacks, Bang retreated.

He couldn't hold on. Even with the breathing method, he could gather heat to the attack and produce greater destructive power, but the body was still limited.

Even a body that had been tempered for thousands of times couldn't withstand the current heat.

"You win."

Banggu couldn't beat Esdeath without showing his true strength, and if he did, he wouldn't be able to hold back.

So he just admitted defeat.

Esdeath wanted to continue, but was stopped by Luther.

"Okay, that's enough."

Chapter 486 Whirlwind Iron Fist

Esdeath learned the flowing water rock crushing fist, and Luther also taught her the real flowing water rock crushing fist.

The upper limit of this kind of boxing is quite high, for example, Hungry Wolf is the best proof.

Regardless of whether it is the original version or the remake, the stronger the hungry wolf is, the more powerful his punches will be.

Physical strength is directly proportional to the power of boxing.

With Esdeath's strength, her only shortcoming is her hand-to-hand combat.

Now she has learned the Flowing Rock Shattering Fist, and combined with the breathing method of the Flowing Rock Shattering Fist, she can bring her extremely powerful body functions to another peak.

Although Bang Gu had the idea of finding an apprentice to pass on the Flowing Rock Shattering Fist, Esdeath didn't feel good about him. Killing countless people was not so scary.

This made Bang Gu hesitate to teach. Luther didn't seem to have these problems, but he obviously lacked interest.

"Liu Shui Rock Breaking Boxing is a martial art that is based on the long-term observation of natural water flow and is created based on the force of flowing water. The strong men in this world are really interesting. That old man gave me the feeling of facing a bursting dam or impacting a waterfall. Generally, the punches are powerful."

Esdeath thought about it as if she had found some new toy.

Because she found a way to become stronger!

"That's right, but this is not the true intention of the fist. Why can running water break rocks? It's just because of the long-lasting impact. The term dripping water can penetrate rocks. Endurance and stable explosive power are the key points..."

Luther said.

Then Esdeath felt a familiar aura appear on Luther's body, which was the blood and breathing method that she was still exploring.

"Come, let me teach you."

Luther taught step by step, just like flirting, but in fact he was giving very serious instructions, helping Esdeath push her luck, and teaching her at the same time. Esdeath learned quickly.

There was also a sound of rushing water inside her body. At this moment, she felt as if she was the river and ocean itself. Nothing could stop her, and everything she passed would become a country under the endless impact of the surging water.

Luther saw that Esdeath's biomagnetic field changed even more strangely. It actually gathered on his right hand like water flow. The magnetic field formed by the transmission of bioelectric current between cells could be artificially changed.

But it didn't matter to Luther. He was concerned about Esdeath's physical condition.

But Esdeath was a one-of-a-kind martial arts prodigy, and he successfully mastered the Flowing Rock Shattering Fist, reaching the same level as Bangu.

In terms of actual strength, the current Esdeath can probably defeat Bangu with one blow, and there is no need to resolve Bangu's defense line of Flowing Rock Shattering Fist.

"Okay, I have become stronger again, and this unpredictable way of running strength like water can actually strengthen the qi, blood and body. If the body is kept in this state without overheating or overloading, the body can also be subtly improved. , meticulous training."

Esdeath said to Luther without reservation.

Meticulous training is very scary. No matter how humans train themselves, there will always be places that they cannot train themselves to.

But Liushuiyan Shattering Fist is different. It allows the blood to imitate water flow, a water flow that penetrates all pervasive!

Capillaries exist everywhere in the human body, which means they are pervasive.

"Let's go visit his brother Bangpu next. Master Bangpu practices Whirlwind Zanteeken. The two fists complement each other and originate from the same body. The most profound part of Whirlwind Zanteeken training is the hand sword slashing. There will be an aura bursting out in the city that can cut through gold and jade."

Luther said.

Not only that, the combination of Whirlwind Zhante Fist and Flowing Rock Shattering Fist also creates a combo that is far more powerful than all other punches. It is considered the strongest punch in the world of One Punch Man.

"Then what are you waiting for?"

Esdeath couldn't wait.

Bump is an elderly man with a slight bald head and long hair around his head. He has an almost perfect figure with a wasp waist and ape arms, and there is an inexplicable charm in his every move.

Obviously, this is also a martial arts master, an expert who has pushed his physical ability almost to the limit.

At least now when Esdeath sees Bump, he will see that he is not some bad old man, but a very powerful master.

Every time he breathed in, the surrounding air flow moved around him, pulling the air flow for hundreds of meters.

Bump's desire to fight is not as strong as Bangu's, but he still agreed to spar with Esdeath because Esdeath said that he had just come from Bangu's side and learned the Flowing Rock Breaking Fist through fighting.

"impossible!"

Bump didn't believe this kind of thing at first. It wasn't until he saw Esdeath's flowing water force that he casually displayed that he was shocked to realize that Esdeath's flowing force was no worse than his younger brother's. All the subtleties have been understood.

"Since you have learned Ou Doudou's skills, I would also like to see if you can learn the Whirlwind Slayer Iron Fist."

Bump became interested and did not mind the spread of martial arts. They were originally open-minded people. At the same time, they had practiced martial arts to this level. What they hoped most was to teach the martial arts concepts to their disciples and witness more dazzling achievements in them. light.

And Esdeath definitely didn't get the true inheritance, but he was so solid in the movement of Qi and blood. He was obviously the kind of genius who could understand the power of the strongest and key details from the subtleties.

Hey--!

Esdeath exhaled and spoke, and the blood hidden under the clothes and muscles also rose with all his strength. He used the flowing rock-breaking fist to control the blood flow and urged it to move vigorously. Undercurrent, flowing water, rapids, and explosive currents... all kinds of flow forces burst out in Esdeath's blood in detail.

After the momentum gathered to a peak, it suddenly jumped high towards Bang. The right fist hit Bang with an indomitable and heroic momentum, and the water splashed!

Bang's eyes lit up, his eyes narrowed slightly, and his expression was solemn. He carefully observed this momentum, which was an amazing blow. How could he not see the power of Esdeath's move.

Bang stroked his beard and pondered for a moment, then flashed to Esdeath's side. His left hand seemed to follow the trajectory of the breeze and came to his side in a misty moment.

What?

Esdeath didn't expect Bang's speed to be so fast, even faster than Bang!

After all, the wind itself is better at speed and flexibility.

But Esdeath's response was even more amazing.

Her whole body flowed like water at this moment, and she actually bypassed Bump's hand.

Bump threw a punch, and the fists crossed, and waves of sharp and cold air continued to hit the surroundings. This was a coolness different from the natural wind, but more like the coldness of a knife blade close to the vital parts of the body.

Chapter 487 The Disaster Begins

Esdeath turned sideways to avoid the punch, and the punch force of Liushuiyan's shattering fist was cut open, as if it was some kind of magic weapon.

Invincible and sharp.

Feng can actually do this?

Esdeath stimulated his blood and became faster, surpassing Bangu.

Bump was surprised.

He thought that even if Esdeath had learned it, he would not be able to do better than Bangu, but now, Esdeath has surpassed Bangu!

"Flowing Water·Thousand Strikes!"

Esdeath punched the sky with his bare hands, covering Bump's whole body.

Bump was stunned for a moment, but the sharp-edged wind blade turned into a breeze, slightly weakened, and avoided Esdeath's fist attack like a paper painting.

However, at the next moment, Esdeath, a whirlwind wrapped around her arm, crushing her sleeves and protruding!

Bump was unexpected. He never expected that Esdeath would learn the Whirlwind Slasher so quickly. Although it was specious, it was extremely close.

After Esdeath knew the essence of the boxing technique, his learning speed was naturally different from that of Liushuiyan Shattering Fist, and he learned it easily.

Now she can wield the Whirlwind Slashing Iron Fist and the Flooding Rock Smashing Fist in one hand, which shocks Bump even more.

Why are the Flowing Rock Shattering Fist and the Whirlwind Zhante Fist separated?

Isn't it because no one can do two things at once, use two punches at the same time, and then launch a stronger attack?

As a result, now Esdeath has done it.

When Bump didn't react, or had no time to react, Esdeath used one hand like a cone to connect points on Bump's body.

"Puff puff puff!"

There was an explosion in the air, the sound of being penetrated. Bump stumbled and fell to the ground, but he soon discovered that he was not injured.

Even if he used the whirlwind force to protect himself in time, he shouldn't have been uninjured, right?

"You were very strong. It's a pity that you died like this."

Esdeath pulled his military cap and said.

Bump sighed. He didn't expect Esdeath to be better than he thought, so he wouldn't be too proud of himself.

"Now that you have learned the Whirlwind Slasher, I won't hide anything."

Bump patted his butt and stood up, putting his hands behind his back.

"unnecessary."

Esdeath shook her head. She had Luther. Her omnipotent master could even break through the Flowing Water Rock Fist, let alone the Whirlwind Iron Fist?

"You really don't want it?"

Bump was a little doubtful about life, and his offer of the essence of Whirlwind Slayer Iron Fist was actually rejected.

"It's not a good thing to be too sure of yourself."

Bump advised.

No matter how talented a person is, he has his limits.

"Let's go."

Esdeath left directly.

"My master, you should have seen the essence of the Whirlwind Zhante Fist, as well as the combined attack technique."

Esdeath asked with a smile.

"You are treating your master as an encyclopedia."

Luther said this, but he still revealed the essence of the Whirlwind Iron Fist and the combined punch technique.

Apart from the "Monster God Killing Fist" and the breathing technique created by Hungry Wolf later, this is the strongest boxing technique.

Luther's super brain just thought about it for a moment and got the answer.

Not only did he get the answer, but he also created a more powerful boxing technique that completely combined whirlwind and flowing water, and each move was more powerful than the combined punching technique.

It can only be said that this kind of thing is really not difficult for super brains.

Once you see it, you will know it, after a while you will be good at it, once you are good at it, you will understand it, and once you understand it, you will become a master!

Reaching the pinnacle and transcending the world are easy.

Of course, Esdeath would not pick up the sesame seeds and lose the watermelon for this. Her trust made Luther give her the boxing technique he created.

"Feng Shui Life and Death Fist!"

The first move, "Explosive Air Splitting Fist", is a combined punch technique, but Luther perfected it.

There is also the Jiaoyalong Killing Fist.

Esdeath immediately adjusted his blood flow and breathing. After all, the Feng Shui Life and Death Fist was more advantageous and comprehensive.

When Luther took Esdeath to play in the gym, the great prophet, Master Xi Dabawa, choked himself to death on a piece of throat candy, but he also left a prophecy.

The Heroes Association was very nervous after receiving the prophecy, and immediately gathered S-class heroes together.

"Today I will take you to see the real strong man."

Luther originally thought that if Boros hadn't arrived yet, he would take Esdeath to find the Weird Association.

But at this time, Luther saw a spacecraft entering the solar system.

The Cosmic Dark Matter Pirates are finally here!

City A, the city that once became bustling and lively because the headquarters of the Heroes Association was here, which led to the migration of rich people from all over, is now in ruins.

Bits of concrete were scattered all over the place, like hills. Only the foundations of the once high-rise buildings remain, and even these foundations are covered by countless rubbles.

The air was filled with the smell of dullness and despair, as if even time had frozen at this moment.

In this chaos, countless citizens lost their lives in an instant.

Among them are white-collar workers who are working, children studying in school, and families enjoying family happiness at home. Their laughter, cries, and quarrels were all reduced to silence in this disaster.

With the exception of the Hero Association's headquarters, almost all other buildings were destroyed.

This headquarters is barely able to support itself and is riddled with scars.

Now, in the entire city, no building has a complete height of more than three meters.

In this ruin, there are also some lucky people who survived the disaster.

They are either buried under the ruins or hiding in a small space.

But no matter how lucky they are, the rescue work is extremely difficult. People under the ruins are difficult to be found, let alone rescued.

Moreover, the culprit of the disaster is still hovering over the city, threatening everyone's life at all times.

It is an unimaginable spaceship.

Its length and width are almost half of City A, giving people a feeling of covering the sky and the sun.

The surface of the spaceship is deep black, as if it can swallow all the light.

And at the bottom of the spaceship, the dense purple crystal-like protrusions are like the teeth of a monster, which makes people shudder.

These protrusions are the launch point of the super-strong artillery that just destroyed the entire city.

This spaceship seems to have extremely powerful power, and its destructive power is staggering.

Its appearance brought a devastating blow to the city, causing countless people to lose their homes and loved ones.

People knew nothing about the origin and purpose of this spaceship, and were filled with fear and anxiety.

Esdeath looked at the spaceship in shock. She could destroy a city with one strike, but what shocked Esdeath was this thing. Esdeath, who had never seen any large man-made flying objects, was amazed.

Chapter 488 Immortality does not exist

"My master, is that the strong person you are talking about?"

Esdeath asked Luther impatiently.

"Well, that's right, there are very powerful life forms there, and probably no one is a match for them except me."

Luther was talking nonsense in a serious manner. Saitama certainly cannot be considered a human being. He is bald.

"It seems like a guy came down and killed a weirdo."

Esdeath already knows that the monsters in this world are not called dangerous species, but weirdos.

But it doesn't matter what you call it.

"That one is a good sandbag."

Luther naturally noticed it.

The creature that came out of the spaceship was a strange creature as tall as a small building.

The whole body is not deformed flesh or flesh, or whether it is a carbon-based creature, but gray rock-like muscles, with dense bulges on the surface, which look like tendons or meridians and blood vessels.

What's strange is that it feels like a humanoid structure, and the muscles can also be seen. The face is considered a humanoid structure, but there are indeed black holes and reflective bodies on it like insect compound eyes.

And there are as many as three such heads!

"This creature is called Meruza Garudo. It is a relatively powerful monster, but the tricky part is its immortality-like ability."

Luther said.

"Immortality?"

Esdeath became even more excited after hearing this. She didn't think there was such a thing as immortality in this world. Even Luther told her that there was no need to panic when encountering an enemy who claimed to be immortal. True immortality does not exist, even beings at high latitudes will be killed.

At best it's just bluffing, it can't be killed or anything like that, but sometimes it's a kind of torture.

The invasion method of the Cosmic Dark Matter Pirates is so simple that it can even be said to be child's play.

First, they will use the spacecraft to destroy the planet's observation equipment, that is, satellites and the like.

Then the spacecraft will invade directly into the atmosphere. At this time, Meruza Garudo, one of the three special combatants, will be dispatched. It has unlimited recovery capabilities and has super immunity to various harsh environments. Strong adaptability.

Even if there is any danger, it will only be a loss of clones, which will be restored in a hundred years. The fact is that Meruza Garudo did not lose any clones even if he encountered Boros, and gained one clone in a hundred years. Melza Garudo is the strongest life form of its species.

He had no choice but to follow Boros. Boros knew his weakness and spared his life. The price was that Meruzagarudo had to serve Boros until Boros died of old age.

After Meruza Garudo arrives, it will clear the obstacles in the air, allowing the spacecraft to invade smoothly.

Then there is the bombardment of places where a large number of creatures on the planet gather, in order to force out the planet's highest combat power.

Usually they are representatives of life on this planet.

The next step is to collect information. After the information analysis is completed, the spacecraft will attack the possible resistance forces and targets on the planet. A large number of basic combatants, low-level combatants and advanced combatants will land from the spacecraft to various parts of the planet for landing operations.

These are generally tiger-ghost combatants (except for technicians who are wolf-level) who can cause a large number of casualties.

And the superior combatants began to solve the higher life forms on this planet. If they cannot be solved, then the final combat power of the dark matter pirate group that runs rampant in the universe, and their common leader, Boros, who is regarded as a super life form, will take action to wipe everything out. ...

The S-class heroes were already on the attack, but they soon discovered that someone was fighting a monster that clearly didn't look human.

"The life forms on this planet are actually so strong?"

Meluza Garudo looked at Esdeath in front of him.

"Come on, let me see how strong you are."

Esdeath erupted into a series of astonishing explosions in one second.

The force of her Feng Shui Life and Death Fist was like a storm and tsunami, and the outer layer of her fists was almost visible to the naked eye, a pale white tip with extremely sharp spiral drill bits.

Landing on Meruza Garudo, every blow can instantly cause horrific piercing and explosion damage as well as spiral and cutting quadruple damage.

All the while, body tissues that had been crushed, exploded, and destroyed were splashing around, but even so, Meruza Garudo's recovery speed still did not slow down at all.

It is as if there is no energy mechanism or cells. Even if the body tissue is damaged in this way, it is directly reshaped for recovery.

Meruza Garudo's attacks were non-stop. Its limbs had turned into large spikes, and small spikes were quickly ejected from its head and waist, making it look like a hedgehog with explosive hair.

Seeing this, Esdeath showed no intention of hesitating or retreating. The Feng Shui spiral on his right hand was shot out first, and the needle tip hit like a wheat awn.

"Bang! Bang! Bang!"

The sound was like the drill bit of a large exploration machine hitting a hard rock.

The terrifying sound resounded throughout the world, making many people feel very uncomfortable and deafening after hearing it.

The "Tian Yuan Breakthrough Explosion Spiral" in Esdeath's Feng Shui Life and Death Fist generates punch power from bottom to top as if it is about to break through the sky. Meruza Garudo, who is larger and seems to have more advantages, is overwhelmed by the overwhelming force. Breaking open the spikes on its limbs, he then cut through thorns and thorns all the way, breaking through mountains and rocks to penetrate its body!

The incredibly strong bursting spiral force exploded in Melzagardo's body!

Melzagardo originally wanted to forcefully squeeze and destroy this strange power, but it found that it could not resist it at all.

It was as if a miniature nuclear bomb was detonated in its body, especially in a confined space, the power of the bomb was even stronger.

"Boom ---!!!"

Melzagardo exploded in an instant, and then turned into pieces of meat floating in the air. This was the abnormality of the body recovering after being completely damaged.

"This weirdo can recover continuously?"

Atomic Samurai, Iai Steel, Silver Fang Bang and others came, and they were surprised to see Melzagardo recovering continuously. As for Esdeath's identity, they already knew it through Bang.

"No, it's not recovery, but reshaping. There is a difference."

Esdeath said, and then she found a flaw and directly froze those body tissues.

The instant freezing made Melzagardo unable to reshape himself, and also exposed his "core"!

Through the layers of broken gray body tissue, one can see that there is something like a deep red glass bead in the center.

Chapter 489: Esdeath sweeps across the land, Luther becomes a tourist

"Found your weakness!"

Esdeath sneered and grabbed the "core" directly.

She did not touch it rashly, but condensed the cold air to freeze the core.

Then the core was overwhelmed and broke directly.

"Ah!!!"

Meruzagarudo couldn't believe that a personality that had accompanied him for more than a hundred years was gone.

And this was his life!

"So that's it, there is a core in the body, this is the real key."

Atomic Samurai and the others went up without hesitation.

Esdeath did not intend to compete with them, and returned to Luther, looking at Luther with burning eyes.

"Well done, I thought it would take you some time to find the core."

Luther was indeed surprised that Esdeath's combat wisdom was so strong.

In his own words, he could easily find the core at any time, something that could be seen through at a glance.

I deliberately didn't tell Esdeath that I wanted Esdeath to find it out by herself, so as to train her combat wisdom. However, I didn't expect Esdeath to realize so quickly that Melzagardo's regeneration ability was not regeneration, but reconstruction.

None of the S-class heroes in the original plot thought of the difference between these two mechanisms.

Esdeath realized it directly, and then found the core of reconstruction.

"My master, are we going to go to that spaceship next?"

Esdeath said expectantly.

"Hey, who are you?"

Tornado floated in the air with her hands folded, and her whole body was glowing green. She always felt that these two people looked very dangerous, especially Esdeath easily killed the alien's life. After finding the key, the S-class heroes also took down Melzagardo one by one.

"Just a passing tourist."

Luther disappeared with Esdeath and came to the interior of the spaceship in an instant.

At this moment, Saitama has already started to kill people everywhere. He is very worried that the spaceship will bombard again, so Saitama has been fighting all the way. Wherever he passes, nothing can remain intact.

Luther gave a mental hint, and Saitama changed direction and headed in another direction, which was the residential area where the basic fighters were.

"Let's go, it depends on you along the way."

Luther strolled leisurely, and Esdeath became a personal guard. She looked down on most of the fighters and had no desire to fight them at all, so she froze them directly.

At the same time, Goryuganshup, the giant octopus, was very anxious.

"The life forms on this planet are so powerful? Did they just bombard the place where the higher life forms live?"

Goryuganshup was unbelievable. He had never encountered such a critical situation before. The overall damage of the spaceship reached more than 30%.

What on earth came in!

[Gloribas, destroy it!]

A strange roaring voice appeared in her mind, and Esdeath was startled.

"Don't worry, it's just a mental connection."

Luther said.

The giant octopus Goryuganshup doesn't have the ability of telepathy and mental control, or maybe it does, but it doesn't work on Saitama?

But it can't be underestimated, after all, it can throw stones and create black holes.

Although strictly speaking, it shouldn't be considered a black hole.

"Shhhh!"

Then a monster broke through the wall and appeared in front of them.

This is an alien with dark green skin, and the tops of his face and hands are made up of huge mouths full of sharp teeth.

It is probably the Gloribus mentioned by the voice, one of the three top fighters. In terms of difficulty, it is probably not inferior to Melzagardo because it has too many skills.

In the popularity vote, the author used Goryuganshup's mouth to say that all three fighters easily surpassed the demon level.

The special skill is to spit out strong acid from the mouth, and before coming to Earth, he learned some new special moves, totaling more than 20.

"Intruders, you are unlucky to run into Lord Gloribas!"

Gloribas didn't waste any words and directly sprayed out his strong acid.

Luther watched with interest. The degree of this strong acid was already higher than that of the aliens. It was a pity that he ran into Esdeath, who was a natural enemy.

Esdeath didn't make any moves. The strong acid condensed into ice in mid-air when it approached, and then fell to the ground and shattered into ice chips.

"What is this?"

Gloribas couldn't believe that his strong acid was so easily solved.

"I can spit out strong acid from all over my body. Let's see how you defend yourself!"

It continued to spit out strong acid, but Esdeath sneered at it and didn't make any moves. All the strong acid froze and fell to the ground.

"Is this the only ability?"

Esdeath accelerated in a spiral and instantly appeared behind Gloribas.

Gloribas exploded instantly. Esdeath didn't know when he had injected a burst of spiral force into its body. If the ice power was added, it would instantly turn into a move similar to the Ice Sky Hundred Flowers Burial.

Now, Gloribas exploded into a firework.

"Go this way."

Luther walked towards Goryuganshup, and Esdeath followed.

"What? Gloribas died in an instant!"

Goryuganshup was shocked.

And soon after, the information of Meruzagarudo also disappeared.

Two of the three top fighters are now gone, and Goryuganshup can still feel that the life form that destroyed Gloribas is moving towards him.

"Could it be that the prophecy is true?"

Goryuganshup couldn't believe it, but he remembered the prophecy at this time. So, there are three life forms invading the spaceship, and the life form without hair on its head looks the weakest. Was it ordered to clean up the basic fighters, so it kept going deeper?

These two are the most powerful life forms on this planet?

They walked towards him so confidently.

Goryuganshup will not admit defeat.

So, Luther and Esdeath appeared in front of it.

"Hey, are you the most powerful life forms on this planet?"

Goryuganshup asked.

This is a treatment that Saitama has not enjoyed. After all, Saitama has a weak aura. People who see him will magically think that he is very weak. Even if he kills a dragon-level monster with one punch, people will think he is picking up a leak.

Luther and Esdeath will naturally not be like this.

Esdeath is a queen, and her aura is different.

Not to mention Luther, even if he is a tourist now, he still has a domineering aura.

"That's about right, little octopus."

Luther said with a smile.

"Don't associate me with the low-level life forms on your planet!"

Goluganshup was furious.

Chapter 490: Made into a figurine

Goryuganshup has certainly investigated creatures on Earth.

Goryuganshup naturally knows creatures like octopuses that look very similar to him.

However, for creatures without intelligence, Goryuganshup will certainly not admit that they are his own kind.

It's like aliens saying that monkeys and gorillas are the same species as humans. Even if this is the case, humans will not admit it.

Not to mention that Goryuganshup is from an alien planet, which is naturally even more impossible.

"Let me show you how powerful Lord Goryuganshup is!"

Goryuganshup said.

One of the three top fighters of the Universe Dark Matter Pirates, he claims to be the number one telekinetic master in the universe. In the anime version, his telekinesis is strong enough to affect gravity, but it has no effect on Saitama.

As for Goryuganshup's strength, there are only dialogues at present.

Q: Can Goryuganshup really create a black hole? I care about this very much.

A: Well, I don't know. If he can create a black hole, it would be too powerful. I can't say for sure without asking Teacher ONE.

But his ability to throw things should be better than Tornado, because he can eliminate the friction between air and stone. If Tornado also throws like him, the friction and pressure will evaporate the stone in an instant because of the strong output.

Goryuganshup's telekinesis can eliminate air friction, and the stone will fly over at sub-light speed. I drew it according to this setting. Although Tornado is super powerful and can throw very large things, there is a limit to its speed.

Goryuganshup is worthy of being the highest telekinetic ability in the universe.

Although Saitama killed him with a casual stone throw, in the protagonist's eyes, the stone at the speed of light is just like this, it really seems like a joke.

Source: One Punch Man Murata Yusuke 133 episode drawing live broadcast.

Q: If Gloribas, Melzagardo, and Goryuganshup join forces, can they beat the monster king Orochi?

A: If the tactics are fully planned, there is a small probability of winning, but it is very small. After all, we don't know whether Tornado can beat Orochi.

Source: One Punch Man Murata Yusuke 133 episode drawing live.

...

So, in terms of strength, Goryuganshup is actually quite strong, although it is a bit strange to use telekinesis to throw stones.

But the two basic abilities of humans, boiling water and throwing stones are actually similar?

Moreover, that is a sub-light speed stone, and it is possible that Esdeath will be killed instantly if she is not careful.

Esdeath does not know this yet, and Luther will not tell her.

So Esdeath used ice to test Goryuganshup's strength.

But this was used by Goryuganshup instead.

"Take it!"

Goryuganshup used telekinesis to affect gravity, and Esdeath immediately felt her body sink, as if she was carrying a weight.

It's just that she hasn't experienced this feeling for a long time.

"My telekinesis is so strong that it can affect gravity, and in the face of huge gravity, even light cannot escape. Go to hell, Earthling!"

Goluganshup rolled up Esdeath's ice, and then instantly accelerated to sublight speed, eliminating the friction between the ice and the air.

Esdeath lost control of the ice in an instant.

Seeing that Esdeath was about to die from the sublight speed ice attack, Luther took action instantly.

When Esdeath saw the ice disappear in front of her, she knew that it was her master who took action.

Was it an attack that her master judged that she could not solve and could kill her?

"What happened?"

Goluganshup could not see what had just happened. After all, being able to launch sublight speed attacks does not mean that its reaction speed can keep up with sublight speed.

Only true sublight speed creatures can keep up with sublight speed. How could Goluganshup do that?

"Okay, so far, it is not an enemy you can deal with."

Luther said to Esdeath.

"What just happened, my master."

Esdeath was very curious about what had just happened, so Luther had to take action.

"It used a sub-light speed attack, which was very fast. You can't react in time. If the attack fails, it will probably wipe out land hundreds of times the size of the empire."

Luther to Esdeath.

"Earthling, I didn't expect you to know my ability!"

Goluganshupu was shocked.

"Your move is too dangerous, and it also affects gravity, but it's not bad."

Luther's words made Goluganshupu wonder if there was a problem with the translator, or if the mental link misunderstood the meaning?

Say he is dangerous, and say he is good?

Then it saw Luther stretch out his finger.

"Turn into a toy."

This is not a transformation magic, but a superpower to modify reality!

Goluganshupu has not reacted yet, and he has turned into a puppet doll.

This is still Luther learning the moves of the Joker King. When he was a child, he felt that the Joker King's skills were too powerful and despairing. Now he feels okay when he uses it himself.

Luther collected the doll of Goryuganshup, and when he goes to Marvel or DC in the future, he can release it to let Goryuganshup wreak havoc on the earth.

Esdeath's eyes widened. She had never seen such an ability before, and even Esdeath couldn't imagine it.

What kind of existence is her master? Why does he have so many endless abilities?

Where are his limits?

"Let's go, the next step is to go see the owner of this place."

Luther led Esdeath out of the control room of Golyuganshop.

The two walked for a while, and then they saw a very tall door. The height was probably tens of meters high, and the width was also ridiculous.

This door has a circuit-like pattern on it, and it lights up with energy light. It is obviously powered on.

Then in the center of the door is a mysterious one-eye.

They look like patterns, not real eyes.

This actually means that this room is Boros, and it is also the largest room on the spaceship.

Boros alone occupied the largest room on the ship.

"Is the owner of this spaceship a huge monster?"

Esdeath asked with interest.

Luther knew why she had such a question, because from a human perspective, doors are generally about the same size as the occupants, unless they are buildings like the Xuanwu Gate.

And this door is obviously too big, so it's not surprising that Esdeath would have such a suspicion.

"no."

Luther said.

Unlike Saitama, Luther and Esdeath had just arrived and didn't even need to break the door to get in. The door opened by itself.

The black lines on its upper part shone slightly at this time, and then the one eye also lit up, and the door opened.
