

KRYPTONIAN: MAN OF STEEL

Chapter 5: 2 billion becomes 50 billion

After Luther was attacked one after another and solved the shit cooker behind the scenes, everything calmed down. With the help of these shit cookers behind the scenes, Emperor Company also stood firm and became a new enterprise.

The most important thing is that in the eyes of outsiders, Emperor Company actually withstood the pressure from America. They don't think that calm means no impact at all.

Only fools will be so naive, and fools who grew up in America will not be so naive.

Even after knowing that Emperor Company actually contacted Vodka and other sensitive countries to promote Super Soldier No. 1 compound, and America did not care, they knew that Emperor Company was not simple!

Becoming a cooperative enterprise of the Ministry of Defense, it means that they also have a deep influence in politics!

Although it is not known whether the relationship between the big boss behind Emperor Company is the Elephant Party or the Donkey Party.

America's political system is divided into the Elephant Party and the Donkey Party, and they are fighting every day. The Elephant Party is the most powerful on the surface. The current president and vice president and some senior military officials are their people.

Most of the members of the Donkey Party are in opposition, so it seems that they are not as good as the ruling Elephant Party.

But who can say for sure about this kind of thing? It just depends on whether the big figures behind the Elephant Party and the Donkey Party are willing to take action.

Luther doesn't know about this. Of course, even if he knows, he won't care whether he controls the Elephant Party or the Donkey Party or both?

What do these things have to do with him, a time traveler and a Kryptonian?

In this case, the Emperor Company soon received a lot of friendly visits.

These people saw the potential of Super Soldier Compound No. 1 and wanted to invest, but the Emperor Company did not accept any investment or listing ideas for the time being.

The Emperor Company turned losses into profits from a state of continuous losses, which made the company's employees confident in their work. Who would have thought that the threshold for the signboard was average at the beginning, and graduates from famous universities such as Ivy League universities could enter the company, but now it has become a super giant.

Monopoly of a commodity?

What is the most profitable business in this world? Monopoly!

And it is a company that does not even use antitrust laws. Isn't it just lying down and counting money?

America placed an order of a full billion dollars with Emperor Company. It may not sound like much, but don't forget how much Emperor Company invested. This is equivalent to half of it.

Luther thought that America might not give up and planned to buy a batch for research. Don't think that America will not do this. She will only pay money to major companies to buy directly. That is when the benefits are not so great.

Now, the Super Soldier Compound No. 1 of Emperor Company may be taken over by people like General Ross for research.

But this is not a problem for Luther at all.

It is the advertising and publicity of Emperor Company that has caused heated discussions across the United States.

...

Triskelion Building!

This is the headquarters of the Strategic Defense Attack and Logistics Support Agency.

On a hot summer day, a one-eyed black-skinned braided egg wearing a big black leather coat was looking at the news with a serious face.

It was the publicity of Emperor Company.

"Compound No. 1, the hope of human evolution, doubles physical strength, easily breaks world records, breaking human limits is no longer a dream!"

"Compound No. 1, anti-aging, maintain youth..."

"Something big has happened."

Nick Fury's face turned ugly and darker.

This suddenly emerging Emperor Company has not made any moves for a year after its establishment. It has only recruited scientific researchers in the biological field and nothing has happened. Unexpectedly, it has made such big news all of a sudden.

All mankind has evolved?

If it were that simple, it would be fine, but Nick Fury saw chaos from this!

If everyone has become a superhuman, then do the weapons have to be upgraded as well? Otherwise, how can you subdue these superhumans?

If the weapons are upgraded, other countries will definitely have to upgrade as well, which will be another round of arms race.

More importantly, it's okay for big countries, everyone is very restrained and doesn't want to destroy the world.

What about small countries? After becoming superhumans, if the conflicts of small countries do not escalate and the destruction does not become stronger, can they still be called superhumans?

"I didn't expect that America would succeed in developing a super soldier."

Nick Fury's face was grim. He knew that the super soldier project and human enhancement technology had always been studied by others, such as Osborn Industries, but he originally thought that it was a series that would happen in his lifetime. Didn't you see that there has been a Captain America since World War II?

Now, with 10 million US dollars, you can become a super soldier.

Nick Fury's headache was not this, but that Monarch did not select its customers. It sold to any customer. If it was bought by terrorists...

In addition, Monarch, a small company with no background, invented such a powerful thing and it was still calm, so Nick Fury thought that America had developed the super soldier technology.
