

Kryptonian 55

Chapter 55 I wanted to shine my heart on the bright moon, but the bright moon only shines on the dit

"This is not a good idea. The Lieyang Civilization may not be that easy to talk to."

He Xi said calmly.

"That makes sense, but I'm still a little confident in my ability to protect myself."

Luther said with a smile.

The way he used it when he was getting along with Qilin was different from now. After all, he even knew how to transform, so of course Luther had to use it.

Seeing that Luther was really turning around to leave, He Xi couldn't help it anymore.

The main reason is that Luther blocked the dark plane information. If he really left, He Xi would not be able to find him.

As for the dark silver weapon, even if it is a semi-obsolete weapon for men, its lethality is still terrible. Gods and super soldiers without the ability to recover can only use one sword at a time.

If it weren't for the special material of Ansu Silver and the inability to load the engine of the God-killing device, Ansu Silver's God-killing weapon would be the most sophisticated weapon in the known universe.

Now the dark silver weapons and the god-killing weapons are tied together, followed by the flame-level weapons.

If it were circulated to Lieyang Civilization, He Xi would definitely be nagged by the manly woman over and over again.

"Okay, you win."

He Xi said.

"What?"

Luther looked confused, and then he disappeared.

Hexi was stunned for a moment, and then she went crazy.

He actually left! ! !

No, haven't I already compromised? How could you just walk away?

He Xi quickly realized, could it be that Luther had never thought about this aspect at all, and simply left after the transaction failed, instead of playing hard to get?

Your uncle is already a super soldier, but there is still such a simple person?

"not good!"

He Xi had a headache, but he couldn't refuse to report the information, so he could only contact the main body and send the information.

"!!!"

The reaction of the body is like this.

Then the main body quickly contacted Kesha.

"Little Shasha..."

"...Have you done something wrong again?"

Keisha was shocked by Hexi's affectionate tone when he opened his mouth. This was the second time she heard this title and this tone after so many years. Keisha said she would rather this was a dream, because Hexi said so last time. At that time, it was a big basket.

Sure enough, after listening to Hexi's words, Kesha knew that the problem this time was bigger.

A large piece of dark silver. With that amount, even if the Lieyang civilization used all of it to make blades, it would at least be able to arm thousands of Lieyang warriors!

An Suyin weapon is like cutting melons and vegetables against third-generation divine bodies and below. Even third-generation divine bodies probably won't be able to withstand many hits.

"You are indeed not wrong in this matter."

Kesha rubbed her eyebrows. She was such a careless bestie. She didn't tell her even when she went to Blue Star.

But He Xi can't be blamed for this matter. He Xi's starting point was also good, but he didn't expect Luther to be so straightforward. He would come to the door to make a deal and leave if the deal failed. He won a group of people without any delay and decisiveness.

At the same time, Kesha also became interested in Luther. Even He Xi couldn't read the other party's dark plane information. What kind of technology is this?

As for the original super gene, is it the super power that comes with the super gene?

If this original super gene is really like this, it would be incredible. Hiding dark plane information is equivalent to being invisible in front of super soldiers and gods. It is like the effect of black armor, which cannot be located or scanned.

Even Luther's ability is stronger. If it is used for sneak attacks, it will be invincible.

"Yeah, who would have thought that this is the case!"

Hexi said quickly.

"But if anything, you have made some mistakes."

Kesha said slowly.

"He wants super gene engine technology and divine body technology. This is related to the upgrade of a civilization from a god-making civilization to a super-god civilization. There are only a few super-god civilizations in the known universe. Little Shasha, tell me, can I not discuss it with you? For a moment?"

Hexi was timid again.

"... Super-divine civilization is not that easy, and An Suyin is more important than this."

Kesha said very domineeringly that one more super-god civilization would be nothing.

"You are awesome."

He Xi said quietly.

"Edge space, Kryptonian civilization..."

Kesha contacted Angel Yan who was heading to Blue Star. Isn't this a coincidence? She had just sent Yan out, hoping to make it in time.

"Yan."

Angel Yan was already outside the Blue Star's atmosphere.

"I'm here, Queen Keisha!"

Angel Yan responded immediately.

"You go to Blue Star for broadcasting...Dark Plane Dark Communication and use the Blue Star people's broadcast to send messages, contact a person from the Kryptonian civilization named Luther, and tell him that our angels not only agree to the transaction, but are also willing to give away three A portion of super gene engine material."

Kesha was very serious and generous when she corrected her best friend's mistakes. Anyway, it was He Xi's own mistake, so these three super gene engine materials came from He Xi's own resource library.

"Queen?"

Angel Yan was confused and didn't know what happened.

"Just do it."

It's hard for Kesha to explain, so He Xi's mistake should not be made known to everyone.

"Yes, Queen Keisha."

Angel Yan had no choice but to suppress his confusion and replied respectfully.

...

Luther did it on purpose, he just wanted to see He Xi going crazy.

Humph, I brought An Suyin over directly to trade, but in the end, I was pushed back and forth, so I decided not to trade at all. It would be better to give it to the ambitious Lieyang Civilization.

He is not a dog licker, and he will not spoil the other person just because he is beautiful.

To be fair, the Ansu Silver material is the most precious material in any god-making civilization or even a super-god civilization. Especially the angel's blockade has made the Ansu Silver even more rare and rare. Super gene engine technology and divine body technology have already Knowing the universe is not a precious thing.

After all, three generations of gods have gone to work as mercenaries. What kind of precious technology is this?

So Luther felt that he had done his best and didn't want the angel's super gene. As a result, He Xi still wanted to bargain with him, so Luther simply gave up the deal.

"The worst case scenario is tricking Reina into buying An Suyin."

Luther feels that Reina is easier to fool. On the surface, Lieyang Civilization is no longer a Heavenly Civilization, but it can be seen from Xuantianji's attitude that they still want the entire universe to surrender under their divine power.

Such ambitions will still be hidden when the Angel Civilization is strong, but if it obtains An Su Silver, will Lieyang Civilization still hide it?

Even if it is hindered by the silver-winged realm of Holy Kesha... I guess my small actions in private will become bolder, right?

"You can't blame me. After all, I am sincere. My heart should illuminate the moon, but the moon illuminates the ditch."

Luther sighed.

"Mr. Luther of Kryptonian civilization, Mr. Luther of Kryptonian civilization, I am Angel Yan of Angelic civilization..."
